American Express 2019 Investor Presentation April 2019

(1) Total revenues net of interest expense on an FX - adjusted basis is a non - GAAP measure. FX - adjusted information assumes a constant exchange rate between the periods being compared for purposes of currency translation into U.S. dollars (i.e., assumes the foreign exchange rates used to determine results for the year ended December 31, 2018 apply to the period(s) against which such results are being compared). Management believes the presentation of information on an FX - adjusted basis is helpful to investors by making it easier to compare the Company's performance in one period to that of another period without the variability caused by fluctuations in currency exchange rates. (2) The reported growth rate for diluted EPS was greater than 100% and therefore not meaningful. Adjusted diluted EPS and the related growth rates, excluding the impacts of certain discrete tax benefits in the fourth quarter of 2018 and, for the growth rates, the impacts of the Tax Act in the fourth quarter of 2017, are non - GAAP measures. Management believes adjusted diluted EPS is useful in evaluating the ongoing operating performance of the Company. See Appendix A for a reconciliation to diluted EPS on a GAAP basis.
