GAIN FROM OUR PERSPECTIVE (R)

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Franklin Templeton's distinct multi-manager structure combines the specialized expertise of three world-class investment management groups-- Franklin, Templeton and Mutual Series.

SPECIALIZED EXPERTISE

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

FRANKLIN. Founded in 1947, Franklin is a recognized leader in fixed income investing and also brings expertise in growth- and value-style U.S. equity investing.

TEMPLETON. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with offices in over 25 countries, Templeton offers investors a truly global perspective.

MUTUAL SERIES. Founded in 1949, Mutual Series is dedicated to a unique style of value investing, searching aggressively for opportunity among what it believes are undervalued stocks, as well as arbitrage situations and distressed securities.

TRUE DIVERSIFICATION

Because our management groups work independently and adhere to different investment approaches, Franklin, Templeton and Mutual Series funds typically have distinct portfolios. That's why our funds can be used to build truly diversified allocation plans covering every major asset class.

RELIABILITY YOU CAN TRUST

At Franklin Templeton Investments, we seek to consistently provide investors with exceptional risk-adjusted returns over the long term, as well as the reliable, accurate and personal service that has helped us become one of the most trusted names in financial services.

Annual Report

Franklin Templeton
Limited Duration Income Trust

YOUR FUND'S GOALS AND MAIN INVESTMENTS: Franklin Templeton Limited Duration Income Trust seeks to provide high, current income, with a secondary objective of capital appreciation to the extent it is possible and consistent with the Fund's primary objective, through a portfolio consisting primarily of high yield corporate bonds, floating rate bank loans and mortgage- and other asset-backed securities.

Dear Shareholder:

We are pleased to bring you Franklin Templeton Limited Duration Income Trust's annual report for the fiscal year ended March 31, 2010.

PERFORMANCE OVERVIEW

For the 12 months under review, Franklin Templeton Limited Duration Income Trust had cumulative total returns of +43.18% based on net asset value and +63.14% based on market price. Net asset value increased from \$10.15 per share on March 31, 2009, to \$13.48 at period-end, and the market price rose from \$8.92 to \$13.40 over the same time. You can find the Fund's performance data in the Performance Summary on page 7.

ECONOMIC AND MARKET OVERVIEW

The U.S. economy improved during the 12-month reporting period as corporate profits, manufacturing and exports showed steady gains. The nation's economic

activity as measured by gross domestic product registered annualized quarterly growth rates of -0.7%, 2.2% and 5.6% in the last three quarters of 2009 and an estimated 3.2% in 2010's first quarter. Remaining challenges to economic recovery included elevated debt concerns, tight credit markets, stalled consumer confidence, restrained spending, and lack of job prospects for the unemployed as federal stimulus measures began to wind down. The unemployment rate, which peaked at 10.1% in October 2009, stood at 9.7% by period-end. (1)

As economic conditions improved, demand for energy products increased and crude oil prices rose from \$50 per barrel in March 2009 to \$84 at period-end, still well below 2008 highs. March's inflation rate was an annualized 2.3%. (1) Core inflation, which excludes food and energy costs, rose at a 1.1% annualized rate, (1) which was below the Federal Reserve

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Board's (Fed's) informal target range of 1.5% to 2.0%. The core personal consumption expenditures price index reported a 12-month increase of 1.3% for the second month in a row.(2)

During the period under review, economic improvement and benign inflation trends prompted Fed policymakers to maintain record-low interest rates and discontinue certain stimulus plans. Noting that it believed the recession had ended, the Fed left the federal funds target rate unchanged at a range of 0% to 0.25% and began laying the groundwork for its exit strategy. The market anticipated an eventual tightening of monetary policy and a gradual phase-out of the Fed's support and liquidity programs.

In February 2010, investor fears over the Greek government's ability to finance its budget deficit forced several companies to delay bond sales and prompted investors to flee to safer assets such as U.S. Treasuries. These fears largely subsided by period-end, and the credit market rebounded although uncertainty remained about how several European countries would meet their debt obligations. U.S. companies aggressively borrowed in the debt market and liquidity levels rose.

Wary investors favored short-term Treasuries, and the Treasury yield curve reached all-time steep levels in February. The spread between two- and 10-year Treasury yields increased from 190 basis points (100 basis points equal one percentage point) at the beginning of the period to 282 basis points at period-end. The two-year Treasury bill yield rose from 0.81% to 1.02% over the 12-month period, while the 10-year Treasury note yield rose from 2.71% to 3.84%.

INVESTMENT STRATEGY

We primarily invest in a diversified mix of fixed income securities, primarily high yield corporate bonds, senior secured floating rate bank loans, and mortgage-and other asset-backed securities. Our top-down analysis of macroeconomic trends combined with a bottom-up fundamental analysis of market sectors, industries and issuers drives our investment process. We seek to maintain a limited duration, or interest rate sensitivity, to moderate the impact that fluctuating interest rates might have on the Fund's fixed income portfolio. Within the corporate bond and bank loan sectors, we seek securities trading at reasonable valuations from issuers with characteristics such as strong market positions, stable cash flows, reasonable capital structures, supportive asset values, strong sponsorship and improving credit fundamentals. In the mortgage- and other asset-backed securities sector, we look to capture an attractive income stream and total return through our analysis of security prepayment assumptions, possible pricing inefficiencies and underlying collateral characteristics.

MANAGER'S DISCUSSION

The Fund's fiscal year was marked by a remarkable recovery from one of the worst economic environments in modern history. With unprecedented amounts of government stimulus being applied around the globe, most risky assets began to recover in late 2008 or early 2009, and equity markets rose significantly. Meanwhile, as investors became more convinced the economy would recover, raising

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

concerns of higher inflation, the 10-year Treasury note yield increased from 2.71% at the end of March 2009 to 3.84% at the end of March 2010. During the same period, the Fed kept short-term interest rates extremely low.

In the prevailing environment of improving economic prospects and low short-term interest rates, investors increasingly sought out risky assets, thus driving returns for such securities sharply higher. High yield corporate bonds returned +52.27% as measured by the Credit Suisse (CS) High Yield Index, while leveraged loans returned +41.06% as measured by the CS Leveraged Loan Index.⁽³⁾ Mortgage-backed securities (MBS), which are generally higher quality and lower yield than other fixed income securities, generated a more modest +5.21% return as measured by the Barclays Capital (BC) U.S. MBS Index.⁽⁴⁾ Within the credit

portion of our portfolio, we liquidated investment-grade corporate positions we had purchased at cheaper valuations, as those bonds were again trading at prices near historical averages. We used the proceeds to increase our high yield corporate bond and leveraged loan exposures, and the Fund ended the period with overweighted positions in both of these asset classes relative to MBS and asset-backed securities (ABS). We reduced our MBS exposure, partly to invest in what we believed were more attractively valued ABS and partly due to relative performance versus the Fund's other assets.

HIGH YIELD CORPORATE BONDS

High yield corporate bonds generated positive returns every month during the Fund's fiscal year. After suffering severely from the deep credit crisis, high yield corporate bonds began the period with attractive valuations and yields above 17%.⁽⁵⁾ As signs of economic improvement became more widespread, fears of record default levels abated and investors seemed to believe the market had overreacted. In addition, the new-issue market gradually opened, allowing companies to refinance debt to extend maturities or to eliminate onerous bank covenants. This refinancing activity led to further decreases in default expectations and enabled bond yields and spreads to tighten. Following the remarkable rally over the past fiscal year, valuations were in line with historical averages. At year-end, we had a favorable outlook for high yield corporate issuers' fundamentals, and we maintained a slightly overweighted position.

FLOATING RATE BANK LOANS

The bank loan asset class delivered strong returns for the year, and lower credit-quality loans outperformed higher credit-quality loans. The loan rally was supported by strong liquidity in the finance system, which allowed companies to refinance their bank debt through the high yield bond and public equity markets. In particular, the bond-for-loan conversion returned significant cash to loan investors, which forced them to redeploy the cash in the secondary loan market. Demand strengthened in the secondary market because supply was limited in the primary market. As a result, secondary loan prices increased from 75 cents on the dollar on March 31, 2009, to 94.9 at period-end, and the average discounted spread to maturity (the interest rate margin over LIBOR, factoring the current trading price and the loan's maturity) tightened from 991 basis points to 370 basis points over the same period.⁽⁶⁾

4 | Annual Report

Merger and acquisition activity also benefited some leveraged companies that were acquired by larger and better-capitalized companies who subsequently repaid loans at par. In addition, loan fund inflows and year-end loan amortization payments also returned cash to investors and contributed to the loan market's continued strength. With improvement in credit markets, several issuers extended loan maturities through amendments to their credit agreements, with a few issuers returning for second extensions. These actions benefited investors with higher spreads, which also helped secondary market prices. Overall, the environment remained positive for the loan market as the high percentage of loans coming due from 2012 to 2014 was slowly being addressed.

With issuers' improved access to capital markets and their ability to amend and extend loan maturities, the loan default rate trended lower from its peak of 10.8% in November 2009 to 5.8% at the period-end, according to S&P Leveraged Commentary and Data. (6)

MORTGAGE- AND OTHER ASSET-BACKED SECURITIES

During the Fund's fiscal year, the overall MBS market delivered solid results but lagged the robust performance of the high yield corporate bond and bank loan sectors. The Fed's MBS purchase program continued to support the agency MBS market but was concluded at period-end. With a lack of consistent investor demand outside Fed purchases, we anticipate less favorable technical conditions and higher volatility.

The Fund's coupon allocation remained relatively constant over the period. Prepayment risk for higher coupon MBS remained restrained as stagnant home prices, loss of home equity and tighter underwriting standards lessened prepayment activity. The Fund's heaviest allocation remained in the 5.0% to 6.0% range.

Outside conventional MBS, the Fund remained allocated to higher quality securitized sectors with strong credit fundamentals, specifically those related to commercial real estate. During the period, the Term Asset-Backed Securities Lending Facility (TALF) was successful in supporting the commercial MBS and consumer ABS markets.

Performance Summary as of 3/31/10

Your dividend income will vary depending on dividends or interest paid by securities in the Fund's portfolio, adjusted for operating expenses. Capital gain distributions are net profits realized from the sale of portfolio securities. Total return reflects reinvestment of the Fund's dividends and capital gain distributions, if any, and any unrealized gains or losses. Total returns do not reflect any sales charges paid at inception or brokerage commissions paid on secondary market purchases. The performance table does not reflect any taxes that a shareholder would pay on Fund dividends, capital gain distributions, if any, or any realized gains on the sale of Fund shares.

INTEREST RATE MOVEMENTS AND MORTGAGE PREPAYMENTS WILL AFFECT THE FUND'S SHARE PRICE AND YIELD. THE RISKS ASSOCIATED WITH HIGHER YIELDING, LOWER RATED SECURITIES INCLUDE HIGHER RISK OF DEFAULT AND LOSS OF PRINCIPAL.

- (1.) Figures are for common shares. As of 3/31/10, the Fund had leverage in the amount of 32.01% of the Fund's total assets. The Fund employs leverage through the issuance of Auction Preferred Shares and purchase of Mortgage Dollar Rolls. The use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares). The cost of leverage rises and falls with changes in short-term interest rates. Such increases/decreases in the cost of the Fund's leverage may be offset by increased/decreased income from the Fund's floating rate investments.
- (2.) Total return calculations represent the cumulative and average annual changes in value of an investment over the periods indicated.
- (3.) Assumes reinvestment of distributions at net asset value.
- (4.) Assumes reinvestment of distributions based on the dividend reinvestment plan.
- (5.) Distribution rate is based on an annualization of the Fund's 7.6 cent per share March dividend and the NYSE Amex closing price of \$13.40 on 3/31/10.

Important Notice to Shareholders

AMENDMENT TO THE BYLAWS OF THE TRUST

The Bylaws of the Trust have been amended as follows, effective February 23, 2010:

ARTICLE IX
COMPLIANCE WITH FITCH RATING GUIDELINES

Section 1. OVERCOLLATERALIZATION TESTS. For as long as the Trust has outstanding Auction Preferred Shares, Series M, Series W or Series F (collectively, "AP Shares"), as described in that certain Statement of

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Preferences of Auction Rate Preferred Shares (the "Statement") dated October 20, 2003, and the AP Shares are rated by Fitch, Inc. ("Fitch"), the Trust shall maintain asset coverage ratios with respect to the Fitch Total Overcollateralization Test ("Fitch Total OC Test") and the Fitch Net Overcollateralization Test ("Fitch Net OC Test") consistent with maintaining a Fitch rating of AAA, as described by Fitch in CLOSED-END FUND DEBT AND PREFERRED STOCK RATING CRITERIA dated August 17, 2009, as the same may be amended from time to time and made publicly available by Fitch on its website or such other location as Fitch may designate by reasonable notice (collectively, the "Fitch OC Tests").

Section 2. VALUATION PERIOD. The Trust shall calculate its compliance with the Fitch OC Tests weekly (each such weekly calculation date to be referred to as a "Valuation Date") and will send the calculation to Fitch monthly.

Section 3. CURE PERIOD. If in any weekly valuation the Trust fails to comply with the Fitch OC Tests, the Trust shall have ten (10) business days from such Valuation Date to restore compliance with such coverage ratios (such tenth (10th) business day to be referred to as the "Cure Date"). The Trust may restore compliance through any combination of deleveraging, portfolio rebalancing, suspending dividends or distribution payments on common shares, or such other means as the officers of the Trust deem necessary, desirable or appropriate to restore compliance with the Fitch OC Tests.

Section 4. MANDATORY REDEMPTION. In the event that the Trust fails to comply with the Fitch OC Tests on a Valuation Date and fails to restore compliance by the close of business on the Cure Date, the Trust shall conduct a mandatory redemption of AP Shares in accordance with Section 9(b) of Part I of the Statement and such other provisions of the Statement as shall be applicable to mandatory redemptions. Such mandatory redemption shall take place within thirty (30) days of the Cure Date (the date on which the redemption takes place to be referred to as the "Redemption Date"). During the period between the Cure Date and the Redemption Date, the Trust shall not issue or incur additional leverage, nor declare or pay dividends or distribution on common shares.

Dividend Reinvestment Plan

The Fund's Dividend Reinvestment Plan (Plan) offers you a prompt and simple way to reinvest dividends and capital gain distributions (Distributions) in shares of the Fund. PNC Global Investment Servicing (Agent), P.O. Box 43027, Providence, RI 02940-3027, will act as your Agent in administering the Plan. The Agent will open an account for you under the Plan in the same name as your outstanding shares are registered. The complete Terms and Conditions of the Dividend Reinvestment Plan are contained in the Fund's Dividend Reinvestment Plan Brochure. A copy of that Brochure may be obtained from the Fund at the address on the back cover of this report.

You are automatically enrolled in the Plan unless you elect to receive Distributions in cash. If you own shares in your own name, you should notify the Agent, in writing, if you wish to receive Distributions in cash.

If the Fund declares a Distribution, you, as a participant in the Plan, will automatically receive an equivalent amount of shares of the Fund purchased on your behalf by the Agent.

If on the payment date for a Distribution, the net asset value per share is equal to or less than the market price per share plus estimated brokerage

commissions, the Agent shall receive newly issued shares, including fractions, from the Fund for your account. The number of additional shares to be credited shall be determined by dividing the dollar amount of the Distribution by the greater of the net asset value per share on the payment date, or 95% of the then current market price per share.

If the net asset value per share exceeds the market price plus estimated brokerage commissions on the payment date for a Distribution, the Agent (or a broker-dealer selected by the Agent) shall try, for a purchase period of 30 days, to apply the amount of such Distribution on your shares (less your pro rata share of brokerage commissions incurred) to purchase shares on the open market. The weighted average price (including brokerage commissions) of all shares it purchases shall be your allocated price per share. If, before the Agent has completed its purchases, the market price plus estimated brokerage commissions exceeds the net asset value of the shares as of the payment date, the purchase price the Agent paid may exceed the net asset value of the shares, resulting in the acquisition of fewer shares than if such Distribution had been paid in shares issued by the Fund. Participants should note that they will not be able to instruct the Agent to purchase shares at a specific time or at a specific price. The Agent may make open-market purchases on any securities exchange where shares are traded, in the over-the-counter market or in negotiated transactions, and may be on such terms as to price, delivery and otherwise as the Agent shall determine.

10 | Annual Report

The market price of shares on a particular date shall be the last sales price on NYSE Amex, or, if there is no sale on the exchange on that date, then the mean between the closing bid and asked quotations on the exchange on such date. The net asset value per share on a particular date shall be the amount most recently calculated by or on behalf of the Fund as required by law.

The Agent shall at all times act in good faith and agree to use its best efforts within reasonable limits to ensure the accuracy of all services performed under this agreement and to comply with applicable law, but assumes no responsibility and shall not be liable for loss or damage due to errors unless such error is caused by the Agent's negligence, bad faith, or willful misconduct or that of its employees. Your uninvested funds held by the Agent will not bear interest. The Agent shall have no responsibility for the value of shares acquired. For the purpose of cash investments, the Agent may commingle your funds with those of other participants in the same Fund.

There is no direct charge to participants for reinvesting Distributions, since the Agent's fees are paid by the Fund. However, when shares are purchased in the open market, each participant will pay a pro rata portion of any brokerage commissions incurred. If you elect by notice to the Agent to have it sell part or all of your shares and remit the proceeds, the Agent will deduct brokerage commissions from the proceeds.

The automatic reinvestment of Distributions does not relieve you of any taxes that may be payable on Distributions. In connection with the reinvestment of Distributions, shareholders generally will be treated as having received a Distribution equal to the cash Distribution that would have been paid.

The Agent will forward to you any proxy solicitation material and will vote any shares so held for you first in accordance with the instructions set forth on proxies you return to the Fund, and then with respect to any proxies you do not return to the Fund in the same portion as the Agent votes proxies the participants return to the Fund.

As long as you participate in the Plan, the Agent will hold the shares it has acquired for you in safekeeping, in its name or in the name of its nominee. This convenience provides added protection against loss, theft or inadvertent destruction of certificates. However, you may request that a certificate representing your Plan shares be issued to you. Upon your written request, the Agent will deliver to you, without charge, a certificate or certificates for the full shares. The Agent will send you a confirmation of each acquisition made for your account as soon as practicable, but not later than 60 days after the acquisition date. Although from time to time you may have an undivided fractional interest in a share of the Fund, no certificates for a fractional share will

Annual Report | 11

be issued. Distributions on fractional shares will be credited to your account. If you terminate your account under the Plan, the Agent will adjust for any such undivided fractional interest in cash at the market value of shares at the time of termination.

You may withdraw from the Plan at any time, without penalty, by notifying the Agent in writing at the address above or by telephone at (800) 331-1710. Such termination will be effective with respect to a Distribution if the Agent receives your notice prior to the Distribution record date. The Agent or the Fund may terminate the Plan upon notice to you in writing mailed at least 30 days prior to any record date for the payment of any Distribution. Upon any termination, the Agent will issue, without charge, stock certificates for all full shares you own and will convert any fractional shares you hold at the time of termination to cash at current market price and send you a check for the proceeds.

The Fund or the Agent may amend the Plan. You will receive written notice at least 30 days before the effective date of any amendment.

Limited Duration Income Trust

NOTES TO FINANCIAL STATEMENTS

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Franklin Templeton Limited Duration Income Trust (Fund) is registered under the Investment Company Act of 1940, as amended, (1940 Act) as a closed-end investment company.

The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

Equity and other securities listed on a securities exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Over-the-counter securities and listed securities for which there is no reported sale are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Certain equity securities are valued based upon fundamental characteristics or relationships to similar securities. Investments in open-end mutual funds are valued at the closing net asset value.

Corporate debt securities, government securities, mortgage backed securities, asset-backed securities, collateralized debt obligations and other debt securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from bond dealers, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services may use valuation models or matrix pricing which considers information with respect to comparable bond and note transactions, quotations from bond dealers, or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves, to determine current value. Debt securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the date that the values of the foreign debt securities are determined.

Senior secured corporate loans with floating or variable interest rates generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from loan dealers and other financial institutions, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services use independent market quotations from loan dealers or financial institutions and may incorporate valuation methodologies that consider multiple bond characteristics such as dealer quotes, issuer type, coupon, maturity, weighted average maturity, interest rate spreads and yield curves, cash flow and credit risk/quality analysis, to determine current value.

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

A. SECURITY VALUATION (CONTINUED)

The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. Methods for valuing these securities may include: fundamental analysis based upon the underlying investment book value, anticipated future cash flows, market changes in comparable or similar securities, matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. Due to the inherent uncertainty of valuations of such securities, the fair values may differ significantly from the values that would have been used had a ready market for such investments existed. Occasionally, events occur between the time at which trading in a security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a portfolio security held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services. All security valuation procedures are approved by the Fund's Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. The Fund may enter into foreign currency exchange contracts to facilitate transactions denominated in a foreign currency. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. SECURITIES PURCHASED ON A WHEN-ISSUED, DELAYED DELIVERY, AND TBA BASIS

The Fund may purchase securities on a when-issued, delayed delivery, and to-be-announced (TBA) basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Fund will generally purchase these securities with the intention of holding the securities, it may sell the securities before the settlement date. Sufficient assets have been segregated for these securities.

D. DERIVATIVE FINANCIAL INSTRUMENTS

The Fund may invest in derivative financial instruments (derivatives) in order to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives may contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and the potential for market movements which may expose the Fund to gains or losses in excess of the amounts shown on the Statement of Assets and Liabilities.

Derivatives are marked to market daily based upon quotations from market makers or the Fund's independent pricing services and the Fund's net benefit or obligation under the contract, as measured by the fair market value of the contract, is included in net assets. Realized gain and loss and unrealized appreciation and depreciation on these contracts for the period are included in the Statement of Operations.

The Fund generally enters into forward exchange contracts in order to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency for a specific exchange rate on a future date.

See Note 11 regarding other derivative information.

E. MORTGAGE DOLLAR ROLLS

The Fund may enter into mortgage dollar rolls, typically on a TBA basis. Mortgage dollar rolls are agreements between the Fund and a financial institution to simultaneously sell and repurchase mortgage-backed securities at a future date. Gains or losses are realized on the initial sale, and the difference between the repurchase price and the sale price is recorded as an unrealized gain or loss to the Fund upon entering into the mortgage dollar roll. In addition, the Fund may invest the cash proceeds that are received from the initial sale. During the period between the sale

E. MORTGAGE DOLLAR ROLLS (CONTINUED)

and repurchase, the Fund is not entitled to principal and interest paid on the mortgage backed securities. The risks of mortgage dollar roll transactions include the potential inability of the counterparty to fulfill its obligations.

The Fund is investing in mortgage dollar rolls as an alternate form of leverage. As a result, the mortgage dollar rolls are considered indebtedness or a "senior security" for purposes of the asset coverage requirements under the 1940 Act.

F. SENIOR FLOATING RATE INTERESTS

Senior secured corporate loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR). Senior secured corporate loans often require prepayment of principal from excess cash flows or at the discretion of the borrower. As a result, actual maturity may be substantially less than the stated maturity.

Senior secured corporate loans in which the Fund invests are generally readily marketable, but may be subject to some restrictions on resale.

G. INCOME TAXES

It is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code and to distribute to shareholders substantially all of its taxable income and net realized gains. As a result, no provision for federal income taxes is required. The Fund files U.S. income tax returns as well as tax returns in certain other jurisdictions. As of March 31, 2010, and for all open tax years, the Fund has determined that no provision for income tax is required in the Fund's financial statements. Open tax years are those that remain subject to examination by such taxing authorities, which in the case of the U.S. is three years after the filing of a fund's tax return.

H. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Facility fees are recognized as income over the expected term of the loan. Dividend income is recorded on the ex-dividend date. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with accounting principles generally accepted in the United States of America. These differences may be permanent or temporary. Permanent differences are reclassified among capital

accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

I. ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

J. GUARANTEES AND INDEMNIFICATIONS

Under the Fund's organizational documents, its officers and trustees are indemnified by the Fund against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. Currently, the Fund expects the risk of loss to be remote.

2. SHARES OF BENEFICIAL INTEREST

At March 31, 2010, there were an unlimited number of common shares authorized (without par value). During the years ended March 31, 2010 and 2009, there were no shares issued; all reinvested distributions were satisfied with previously issued shares purchased in the open market.

3. AUCTION RATE PREFERRED SHARES

On November 7, 2003, the Fund issued 2,534 Preferred Shares Series M, 2,533 Preferred Shares Series W and 2,533 Preferred Shares Series F, each with a \$25,000 liquidation preference per share totaling \$190,000,000. During the year ended March 31, 2009, there was a pro rata preferred redemption of each series totaling 4,000 shares and \$100,000,000 leaving 1,200 Preferred Shares Series M, 1,200 Preferred Shares Series W and 1,200 Preferred Shares Series F, each with a \$25,000 liquidation preference totaling \$90,000,000. Dividends to preferred shareholders are cumulative

and are declared weekly, at rates established through an auction process. The weekly auctions for Series M, W and F have all failed during the year ended March 31, 2010; consequently, the dividend rate paid on the Preferred Shares has moved to the maximum rate as defined in the prospectus. During the year ended March 31, 2010, the dividends on Preferred Shares ranged from 1.46% to 1.66%.

The Fund is required to maintain, on a weekly basis, a specified discounted value of its portfolio in compliance with guidelines established by Fitch Ratings and Moody's Investor Services Inc., and is required to maintain asset coverage for the Preferred Shares of at least 200%.

The Preferred Shares are redeemable by the Fund at any time and are subject to mandatory redemption if the asset coverage or discounted value requirements are not met. During the year ended March 31, 2010, all requirements were met.

4. TRANSACTIONS WITH AFFILIATES

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

SUBSIDIARY -----	AFFILIATION -----
Franklin Advisers, Inc. (Advisers)	Investment manager
Franklin Templeton Services, LLC (FT Services)	Administrative manager

The Fund pays an investment management fee and administrative fee to Advisers and FT Services of 0.50% and 0.20%, respectively, per year of the average daily managed assets. Managed assets are defined as the Fund's gross asset value minus the sum of accrued liabilities, other than the liquidation value of the Preferred Shares and other financial leverage.

5. EXPENSE OFFSET ARRANGEMENT

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the year ended March 31, 2010, the custodian fees were reduced as noted in the Statement of Operations.

6. INCOME TAXES

For tax purposes, capital losses may be carried over to offset future capital gains, if any. At March 31, 2010, the capital loss carryforwards were as follows:

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

Capital loss carryforwards expiring in:	
2014	\$ 682,502
2015	895,575
2016	726,440
2017	11,687,026
2018	15,871,424

	\$29,862,967
	=====

For tax purposes, realized capital losses occurring subsequent to October 31, may be deferred and treated as occurring on the first day of the following fiscal year. At March 31, 2010, the Fund deferred realized capital losses of \$2,883,891.

The tax character of distributions paid during the years ended March 31, 2010 and 2009, was as follows:

	2010	2009
	-----	-----
Distributions paid from ordinary income ...	\$26,929,863	\$28,495,333

At March 31, 2010, the cost of investments, net unrealized appreciation (depreciation) and undistributed ordinary income for income tax purposes were as follows:

Cost of investments	\$525,532,398
	=====
Unrealized appreciation	\$ 22,770,933
Unrealized depreciation	(11,719,188)

Net unrealized appreciation (depreciation)	\$ 11,051,745
	=====
Distributable earnings - undistributed ordinary income ..	\$ 4,350,800
	=====

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of defaulted securities, foreign currency transactions, mortgage dollar rolls, paydown losses, payments-in-kind, and bond discounts and premiums.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatments of wash sales, foreign currency transactions, mortgage dollar rolls, paydown losses, payments-in-kind, and bond discounts and premiums.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

7. INVESTMENT TRANSACTIONS

Purchases and sales of investments (excluding short term securities) for the year ended March 31, 2010, aggregated \$1,078,893,838 and \$1,065,353,326, respectively.

8. INVESTMENTS IN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

The Fund may invest in the Institutional Fiduciary Trust Money Market Portfolio (Sweep Money Fund), an open-end investment company managed by Advisers. Management fees paid by the Fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management and administrative fees paid by the Sweep Money Fund.

9. CREDIT RISK AND DEFAULTED SECURITIES

At March 31, 2010, the Fund had 68.10% of its portfolio invested in high yield, senior secured floating rate notes, or other securities rated below investment grade. These securities may be more sensitive to economic conditions causing greater price volatility and are potentially subject to a greater risk of loss due to default than higher rated securities.

The Fund held defaulted securities and/or other securities for which the income has been deemed uncollectible. At March 31, 2010, the aggregate value of these securities was \$727,125, representing 0.14% of the Fund's portfolio. The Fund discontinues accruing income on securities for which income has been deemed uncollectible and provides an estimate for losses on interest receivable. The securities have been identified on the accompanying Statement of Investments.

10. UNFUNDED LOAN COMMITMENTS

The Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers' discretion. Funded portions of credit agreements are presented on the Statement of Investments.

At March 31, 2010, unfunded commitments were as follows:

BORROWER -----	UNFUNDED COMMITMENT -----
Smurfit-Stone Container Enterprises, Term Loan ...	\$2,100,000 =====

Unfunded loan commitments and funded portions of credit agreements are marked to market daily and any unrealized appreciation or depreciation is included in the Statement of Assets and Liabilities and Statement of Operations.

See Note 1(d) regarding derivative financial instruments.

12. OTHER CONSIDERATIONS

From time to time, officers, directors or employees of the Fund's Investment Manager may have discussions or enter into agreements with issuers, underwriters or creditors' committees which, pursuant to the Fund's policies and requirements of applicable securities laws, could prevent the Fund from trading in the securities of such company for limited or extended periods of time.

13. FAIR VALUE MEASUREMENTS

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

- Level 1 - quoted prices in active markets for identical securities
- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of March 31, 2010, in valuing the Fund's assets and liabilities carried at fair value:

14. NEW ACCOUNTING PRONOUNCEMENTS

In January 2010, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update which enhances and clarifies existing fair value measurement disclosure requirements and is effective for interim and annual periods beginning after December 15, 2009. The Fund believes the adoption of this Accounting Standards Update will not have a material impact on its financial statements.

15. SUBSEQUENT EVENTS

The Fund has evaluated subsequent events through the issuance of the financial statements and determined that no events have occurred that require disclosure.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE BOARD OF TRUSTEES AND SHAREHOLDERS OF FRANKLIN TEMPLETON LIMITED DURATION INCOME TRUST

In our opinion, the accompanying statement of assets and liabilities, including the statement of investments, and the related statements of operations and of

changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Franklin Templeton Limited Duration Income Trust (the "Fund") at March 31, 2010, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at March 31, 2010 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

BOARD REVIEW OF INVESTMENT MANAGEMENT AGREEMENT

At a meeting held February 23, 2010, the Board of Trustees (Board), including a majority of non-interested or independent Trustees, approved renewal of the investment management agreement for Franklin Templeton Limited Duration Income Trust (Fund). In reaching this decision, the Board took into account information furnished throughout the year at regular Board meetings, as well as information prepared specifically in connection with the annual renewal review process. Information furnished and discussed throughout the year included investment performance reports on the Fund, information on its share price discount to net asset value, and other related financial information, as well as periodic reports on legal, compliance, pricing, brokerage commissions and execution and other services provided by the Investment Manager (Manager) and its affiliates. Information furnished specifically in connection with the renewal process included a report prepared by Lipper, Inc. (Lipper), an independent organization, as well as additional material, including a Fund profitability analysis report prepared by management. The Lipper report compared the Fund's investment performance and expenses with those of other funds deemed comparable to the Fund as selected by Lipper. The Fund profitability analysis report discussed the profitability to Franklin Templeton Investments from its overall U.S. fund operations, as well as on an individual fund-by-fund basis. Included with such profitability analysis report was information on a fund-by-fund basis listing portfolio managers and other accounts they manage, as well as information on management fees charged by the Manager and its affiliates to U.S. funds and other accounts, including management's explanation of differences where relevant, and a three-year expense analysis with an explanation for any increase in expense ratios. Additional material accompanying such report was a memorandum prepared by management describing project initiatives and capital investments relating to the services provided to the Fund by the Franklin Templeton Investments organization, as well as a memorandum relating to economies of scale.

In considering such materials, the independent Trustees received assistance and advice from and met separately with independent counsel. In approving continuance of the investment management agreement for the Fund, the Board, including a majority of independent Trustees, determined that the existing management fee structure was fair and reasonable and that continuance of the

investment management agreement was in the best interests of the Fund and its shareholders. While attention was given to all information furnished, the following discusses some primary factors relevant to the Board's decision.

NATURE, EXTENT AND QUALITY OF SERVICE. The Board was satisfied with the nature and quality of the overall services provided by the Manager and its affiliates to the Fund and its shareholders. In addition to investment performance and expenses discussed later, the Board's opinion was based, in part, upon periodic reports furnished it showing that the investment policies and restrictions for the Fund were consistently complied with as well as other reports periodically furnished the Board covering matters such as the compliance of portfolio managers and other management

personnel with the code of ethics adopted throughout the Franklin Templeton fund complex, the adherence to fair value pricing procedures established by the Board, and the accuracy of net asset value calculations. Favorable consideration was given to management's efforts and expenditures in establishing back-up systems and recovery procedures to function in the event of a natural disaster, it being noted by the Board that such systems and procedures had functioned smoothly during the Florida hurricanes and blackouts experienced in recent years. Among other factors taken into account by the Board were the Manager's best execution trading policies, including a favorable report by an independent portfolio trading analytical firm. Consideration was also given to the experience of the Fund's portfolio management team, the number of accounts managed and general method of compensation. In this latter respect, the Board noted that a primary factor in management's determination of the level of a portfolio manager's bonus compensation was the relative investment performance of the funds he or she managed and that a portion of such bonus was required to be invested in a predesignated list of funds within such person's fund management area so as to be aligned with the interests of Fund shareholders. Particular attention was given to management's conservative approach and diligent risk management procedures, including continuous monitoring of counterparty credit risk and attention given to derivatives and other complex instruments. The Board also took into account, among other things, the strong financial position of the Manager's parent company and its commitment to the fund business as evidenced by its subsidization of money market funds. The Board also noted management's efforts to minimize any negative impact on the nature and quality of services provided the Fund arising from Franklin Templeton Investments' implementation of a hiring freeze and employee reductions in response to market conditions during the latter part of 2008 and early 2009.

INVESTMENT PERFORMANCE. The Board placed significant emphasis on the investment performance of the Fund in view of its importance to shareholders. While consideration was given to performance reports and discussions with portfolio managers at Board meetings during the year, particular attention in assessing performance was given to the Lipper reports furnished for the agreement renewal. The Lipper report prepared for the Fund showed its investment performance in comparison with a performance universe consisting of the Fund and all leveraged closed-end BBB-rated corporate debt funds as selected by Lipper during 2009 and the five previous calendar years. Such report considers both income return and

total return on a net asset value basis without regard to market discounts or premiums to accurately reflect investment performance. The Lipper report showed the Fund's income return for 2009 to be in the middle quintile of such performance universe and its income return on an annualized basis to be in the second-highest quintile of such universe for the previous three- and five-year periods. The Lipper report showed the Fund's 2009 total return to be in the second-highest quintile in such performance universe, and on an annualized basis to be in the second-highest quintile and highest quintile of such universe for the previous three- and five-year periods, respectively. The Board was satisfied with the Fund's performance as shown in the Lipper report.

COMPARATIVE EXPENSES. Consideration was given to a comparative analysis of the management fees and total expense ratios of the Fund compared with a Lipper expense group consisting of the Fund and three other leveraged closed-end BBB-rated corporate debt funds as selected by Lipper. Lipper expense data is based upon information taken from each fund's most recent annual report, which reflects historical asset levels that may be quite different from those currently existing, particularly in a period of market volatility. While recognizing such inherent limitation and the fact that expense ratios generally increase as assets decline and decrease as assets grow, the Board believed the independent analysis conducted by Lipper to be an appropriate measure of comparative expenses. In reviewing comparative costs, Lipper provides information on the Fund's contractual investment management fee rate in comparison with the contractual investment management fee that would have been charged by other funds within its Lipper expense group assuming they were similar in size to the Fund, as well as the actual total expense ratio of the Fund in comparison with those of its Lipper expense group. The Lipper contractual investment management fee analysis includes administrative charges as being part of contractual investment management fees. The results of such expense comparisons showed that the Fund's contractual investment management fee rate was the second highest in its Lipper expense group, but within five basis points of its Lipper expense group median, while its actual total expense ratio, including investment related expenses and taxes, was the lowest of such expense group. The Board found such expenses to be acceptable.

MANAGEMENT PROFITABILITY. The Board also considered the level of profits realized by the Manager and its affiliates in connection with the operation of the Fund. In this respect, the Board reviewed the Fund profitability analysis that addresses the overall profitability of Franklin Templeton's U.S. fund business, as well as its profits in providing management and other services to the Fund during the 12-month period ended September 30, 2009, being the most recent fiscal year-end for Franklin Resources, Inc., the Manager's parent. In reviewing the analysis, attention was given to the methodology followed in allocating costs to the Fund, it being recognized that allocation methodologies are inherently subjective and various allocation methodologies may each be reasonable while producing different results. In this respect, the Board noted that, while being continuously refined and reflecting changes in the Manager's own cost accounting, such cost allocation methodology was consistent with that followed in profitability report presentations made in prior years and that the Fund's independent registered public accounting firm had been engaged by the

Manager to review the reasonableness of the allocation methodologies solely for use by the Fund's Board in reference to the profitability analysis. In reviewing and discussing such analysis, management discussed with the Board its belief that costs incurred in establishing the infrastructure necessary for the type of fund operations conducted by the Manager and its affiliates may not be fully reflected in the expenses allocated to the Fund in determining its profitability, as well as the fact that the level of profits, to a certain extent, reflected operational cost savings and efficiencies initiated by management. In addition, the Board considered a third-party study comparing the profitability of the Manager's parent on an overall basis as compared to other publicly held managers broken

down to show profitability from management operations exclusive of distribution expenses, as well as profitability including distribution expenses. The Board also considered the extent to which the Manager and its affiliates might derive ancillary benefits from fund operations, as well as potential benefits resulting from allocation of fund brokerage and the use of commission dollars to pay for research. Based upon its consideration of all these factors, the Board determined that the level of profits realized by the Manager and its affiliates from providing services to the Fund was not excessive in view of the nature, quality and extent of services provided.

ECONOMIES OF SCALE. The Board also considered whether the manager realizes economies of scale as the Fund grows larger and the extent to which any such benefit is shared with the Fund and its shareholders. The Board believed that a manager's ability to realize economies of scale and the sharing of such benefit is a more relevant consideration in the case of an open-end fund whose size increases as a result of the continuous sale of its shares. A closed-end investment company such as the Fund does not continuously offer shares, and growth following its initial public offering will primarily result from market appreciation, which benefits its shareholders. While believing economies of scale to be less of a factor in the context of a closed-end fund, the Board believes at some point an increase in size may lead to economies of scale that should be shared with the Fund and its shareholders and intends to monitor future growth of the Fund accordingly.

PROXY VOTING POLICIES AND PROCEDURES

The Fund's investment manager has established Proxy Voting Policies and Procedures (Policies) that the Fund uses to determine how to vote proxies relating to portfolio securities. Shareholders may view the Fund's complete Policies online at franklintempleton.com. (g) The aggregate non-audit fees paid to the principal accountant for services rendered by the principal accountant to the registrant and the registrant's investment adviser and any entity controlling, controlled by or under common control with the investment adviser that provides ongoing services to the registrant were \$15,362 for the fiscal year ended March 31, 2010 and \$300,677 for the fiscal year ended March 31, 2009.

(h) The registrant's audit committee of the board has considered whether the provision of non-audit services that were rendered to the registrant's investment adviser (not including any sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registrant that were not pre-approved pursuant to paragraph (c) (7) (ii) of Rule 2-01 of Regulation S-X is compatible with maintaining the principal accountant's independence.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

The board of trustees of the Fund has delegated the authority to vote proxies related to the portfolio securities held by the Fund to the Fund's manager Franklin Advisers, Inc. in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the manager.

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's instructions and/or policies. The manager votes proxies solely in the interests of the Fund and its shareholders.

To assist it in analyzing proxies, the manager subscribes to RiskMetrics Group

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

(RiskMetrics), an unaffiliated third-party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. In addition, the manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third-party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies. Although RiskMetrics' and/or Glass Lewis' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from RiskMetrics, Glass Lewis or any other third party to be determinative of the manager's ultimate decision. As a matter of policy, the officers, directors/trustees and employees of the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, distributor, broker dealer and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund with the manager's recommendation regarding the vote for approval. If the conflict is not resolved by the Fund, the Proxy Group may refer the matter, along with the recommended course of action by the manager, if any, to an interdepartmental Proxy Review Committee (which may include portfolio managers and/or research analysts employed by the manager), for evaluation and voting instructions. The Proxy Review Committee may defer to the voting recommendation of RiskMetrics, Glass Lewis or those of another independent third-party provider of proxy services; or send the proxy directly to the Fund. Where the Proxy Group or the Proxy Review Committee refers a matter to the Fund, it may rely upon the instructions of a representative of the Fund, such as the board or a committee of the board.

Where a material conflict of interest has been identified, but the items on which the manager's vote recommendations differ from Glass Lewis, RiskMetrics, or another independent third-party provider of proxy services relate specifically to (1) shareholder proposals regarding social or environmental issues or political contributions, (2) "Other Business" without describing the matters that might be considered, or (3) items the manager wishes to vote in opposition to the recommendations of an issuer's management, the Proxy Group may defer to the vote recommendations of the manager rather than sending the proxy directly to the Fund for approval.

To avoid certain potential conflicts of interest, the manager will employ echo voting, if possible, in the following instances: (1) when the Fund invests in an underlying fund in reliance on any one of Sections 12(d)(1)(E), (F), or (G) of the 1940 Act, or pursuant to an SEC exemptive order; (2) when the Fund invests uninvested cash in affiliated money market funds pursuant to an SEC exemptive order ("cash sweep arrangement"); or (3) when required pursuant to the Fund's governing documents or applicable law. Echo voting means that the investment manager will vote the shares in the same proportion as the vote of all of the other holders of the Fund's shares.

The recommendation of management on any issue is a factor which the manager considers in determining how proxies should be voted, but is not determinative of the manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

MANAGER'S PROXY VOTING POLICIES AND PRINCIPLES The manager has adopted general

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS. The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

RATIFICATION OF AUDITORS OF PORTFOLIO COMPANIES. The manager will closely scrutinize the role and performance of auditors. On a case-by-case basis, the manager will examine proposals relating to non-audit relationships and non-audit fees. The manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence.

MANAGEMENT AND DIRECTOR COMPENSATION. A company's equity-based compensation plan should be in alignment with its shareholders' long-term interests. The manager believes that executive compensation should be directly linked to the performance of the company. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the RiskMetrics quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen" feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES. The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. However, as with all proxy issues, the manager conducts an independent review of each anti-takeover proposal. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. In addition, the manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE. The manager realizes that a company's financing decisions have a significant impact on its shareholders, particularly when they involve the issuance of additional shares of common or preferred stock or the assumption of additional debt. The manager will review, on a case-by-case basis,

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

proposals by companies to increase authorized shares and the purpose for the increase. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES. The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE. Many of the tenets discussed above are applied to the manager's proxy voting decisions for international investments. However, the manager must be flexible in these instances and must be mindful of the varied market practices of each region.

The manager will attempt to process every proxy it receives for all domestic and foreign issuers. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. If a security is on loan, the manager may determine that it is not in the best interests of the Fund to recall the security for voting purposes. Also, the manager may abstain from voting under certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.

Copies of the Fund's proxy voting records are available online at franklintempleton.com and posted on the SEC website at WWW.SEC.GOV. The proxy voting records are updated each year by August 31 to reflect the most recent 12-month period ended June 30.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

(a)(1) As of May 27, 2010 the portfolio managers of the Fund are as follows:

Roger Bayston, CFA, Richard Hsu, Christopher Molumphy, CFA and Eric G. Takaha, CFA, serve as the portfolio management team responsible for managing the Fund's portfolio investment. Each of them has experience managing Franklin mutual funds and private accounts.

Mr. Bayston has been a portfolio manager of the Fund since inception. He joined Franklin Templeton Investments in 1991.

Mr. Hsu has been a portfolio manager of the Fund since 2006. He joined Franklin Templeton Investments in 1996.

Mr. Molumphy has been a portfolio manager of the Fund since inception. He joined Franklin Templeton Investments in 1988.

Mr. Takaha has been a portfolio manager of the Fund since inception. He joined

Franklin Templeton Investments in 1989.

(a)(2) This section reflects information about the portfolio managers as of the fiscal year ended March 31, 2010.

The following table shows the number of other accounts managed by each portfolio manager and the total assets in the accounts managed within each category:

NAME	NUMBER OF OTHER REGISTERED INVESTMENT COMPANIES MANAGED	ASSETS OF OTHER REGISTERED INVESTMENT COMPANIES MANAGED (x \$1 MILLION)	NUMBER OF OTHER POOLED INVESTMENT VEHICLES MANAGED/1	ASSETS OF OTHER POOLED INVESTMENTS VEHICLES MANAGED (X \$1 MILLION)/1	NUMBER OF OTHERS ACCOUNTS MANAGED/1
Roger Bayston	6	15,554.3	4	3,273.0	1
Richard Hsu	2	1,481.5	2	533.9	0
Christopher Molumphy	8	13,277.6	5	1,572.4	4
Eric G. Takaha	5	9,369.0	5	1,000.6	4

1. The various pooled investment vehicles and accounts listed are managed by a team of investment professionals. Accordingly, the individual manager listed would not be solely responsible for managing such listed amounts.

Portfolio managers that provide investment services to the Fund may also provide services to a variety of other investment products, including other funds, institutional accounts and private accounts. The advisory fees for some of such other products and accounts may be different than that charged to the Fund and may include performance based compensation. This may result in fees that are higher (or lower) than the advisory fees paid by the Fund. As a matter of policy, each fund or account is managed solely for the benefit of the beneficial owners thereof. As discussed below, the separation of the trading execution function from the portfolio management function and the application of objectively based trade allocation procedures help to mitigate potential conflicts of interest that may arise as a result of the portfolio managers managing accounts with different advisory fees.

CONFLICTS. The management of multiple funds, including the Fund, and accounts may also give rise to potential conflicts of interest if the funds and other accounts have different objectives, benchmarks, time horizons, and fees as the portfolio manager must allocate his or her time and investment ideas across multiple funds and accounts. The manager seeks to manage such competing interests for the time and attention of portfolio managers by having portfolio managers focus on a particular investment discipline. Most other accounts managed by a portfolio manager are managed using the same investment strategies that are used in connection with the management of the Fund. Accordingly, portfolio holdings, position sizes, and industry and sector exposures tend to be similar across similar portfolios, which may minimize the potential for conflicts of interest. The separate management of the trade execution and

valuation functions from the portfolio management process also helps to reduce potential conflicts of interest. However, securities selected for funds or accounts other than the Fund may outperform the securities selected for the Fund. Moreover, if a portfolio manager identifies a limited investment opportunity that may be suitable for more than one fund or other account, the Fund may not be able to take full advantage of that opportunity due to an allocation of that opportunity across all eligible funds and other accounts. The manager seeks to manage such potential conflicts by using procedures intended to provide a fair allocation of buy and sell opportunities among funds and other accounts.

The structure of a portfolio manager's compensation may give rise to potential conflicts of interest. A portfolio manager's base pay and bonus tend to increase with additional and more complex responsibilities that include increased assets under management. As such, there may be an indirect relationship between a portfolio manager's marketing or sales efforts and his or her bonus.

Finally, the management of personal accounts by a portfolio manager may give rise to potential conflicts of interest. While the funds and the manager have adopted a code of ethics which they believe contains provisions reasonably necessary to prevent a wide range of prohibited activities by portfolio managers and others with respect to their personal trading activities, there can be no assurance that the code of ethics addresses all individual conduct that could result in conflicts of interest.

The manager and the Fund have adopted certain compliance procedures that are designed to address these, and other, types of conflicts. However, there is no guarantee that such procedures will detect each and every situation where a conflict arises.

COMPENSATION. The manager seeks to maintain a compensation program that is competitively positioned to attract, retain and motivate top-quality investment professionals. Portfolio managers receive a base salary, a cash incentive bonus opportunity, an equity compensation opportunity, and a benefits package. Portfolio manager compensation is reviewed annually and the level of compensation is based on individual performance, the salary range for a portfolio manager's level of responsibility and Franklin Templeton guidelines. Portfolio managers are provided no financial incentive to favor one fund or account over another. Each portfolio manager's compensation consists of the following three elements:

BASE SALARY Each portfolio manager is paid a base salary.

ANNUAL BONUS Annual bonuses are structured to align the interests of the portfolio manager with those of the Fund's shareholders. Each portfolio manager is eligible to receive an annual bonus. Bonuses generally are split between cash (50% to 65%) and restricted shares of Resources stock (17.5% to 25%) and mutual fund shares (17.5% to 25%). The deferred equity-based compensation is intended to build a vested interest of the portfolio manager in the financial performance of both Resources and mutual funds advised by the manager. The bonus plan is intended to provide a competitive level of annual bonus compensation that is tied to the portfolio manager achieving consistently strong investment performance, which aligns the financial incentives of the portfolio manager and Fund shareholders. The Chief Investment Officer of the manager and/or other officers of the manager, with responsibility for the Fund, have discretion in the granting of annual bonuses to portfolio managers in accordance with Franklin Templeton guidelines. The following factors are generally used in determining bonuses under the plan:

- o **INVESTMENT PERFORMANCE.** Primary consideration is given to the

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

historic investment performance over the 1, 3 and 5 preceding years of all accounts managed by the portfolio manager. The pre-tax performance of each fund managed is measured relative to a relevant peer group and/or applicable benchmark as appropriate.

- o NON-INVESTMENT PERFORMANCE. The more qualitative contributions of a portfolio manager to the manager's business and the investment management team, including professional knowledge, productivity, responsiveness to client needs and communication, are evaluated in determining the amount of any bonus award.
- o RESPONSIBILITIES. The characteristics and complexity of funds managed by the portfolio manager are factored in the manager's appraisal.

ADDITIONAL LONG-TERM EQUITY-BASED COMPENSATION Portfolio managers may also be awarded restricted shares or units of Resources stock or restricted shares or units of one or more mutual funds, and options to purchase common shares of Resources stock. Awards of such deferred equity-based compensation typically vest over time, so as to create incentives to retain key talent.

Portfolio managers also participate in benefit plans and programs available generally to all employees of the manager.

OWNERSHIP OF FUND SHARES. The manager has a policy of encouraging portfolio managers to invest in the funds they manage. Exceptions arise when, for example, a fund is closed to new investors or when tax considerations or jurisdictional constraints cause such an investment to be inappropriate for the portfolio manager. The following is the dollar range of Fund shares beneficially owned by each portfolio manager (such amounts may change from time to time):

PORTFOLIO MANAGER	DOLLAR RANGE OF FUND SHARES BENEFICIALLY OWNED
Roger Bayston	None
Richard Hsu	None
Christopher Molumphy	None
Eric G. Takaha	None

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no changes to the procedures by which shareholders may recommend nominees to the Registrant's Board of Trustees that would require disclosure herein.

ITEM 11. CONTROLS AND PROCEDURES.

(A) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and

Edgar Filing: FRANKLIN TEMPLETON LTD DURATION INCOME TRUST - Form N-CSR

forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Shareholder Report on Form N-CSR, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(B) CHANGES IN INTERNAL CONTROLS. There have been no significant changes in the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Shareholder Report on Form N-CSR.
