

Mountain Province Diamonds Inc.

Form 20-F

April 01, 2011

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 20-F

(Mark One)

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR (15d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report _____

For the transition period from _____ to _____

Commission file number 001-32468

MOUNTAIN PROVINCE DIAMONDS INC.
(Exact name of Registrant as specified in its charter)

Not Applicable
(Translation of Registrant's name into English)

Ontario
(Jurisdiction of incorporation or organization)

401 Bay Street, Suite 2700, PO Box 152, Toronto, Ontario Canada M5H 2Y4
(Address of principal executive offices)

Patrick Evans – 416-361-3562
Fax: 416-603-8565; Email: info@mountainprovince.com
401 Bay Street, Suite 2700, PO Box 152, Toronto, Ontario Canada M5H 2Y4
(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Edgar Filing: Mountain Province Diamonds Inc. - Form 20-F

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Common Shares no par value	NYSE Amex

Securities registered or to be registered pursuant to Section 12(g) of the Act.

Not Applicable
(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None
(Title of Class)

Indicate the number of outstanding shares of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 77,416,057

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note – Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to file such reports)

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards Other
as issued by the International Accounting Standards Board

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

Yes No

Not Applicable

GLOSSARY

2002 Agreement or Gahcho Kué Joint Venture Agreement or means the joint venture agreement entered into by Mountain Province Diamonds Inc., Camphor Ventures Inc., and De Beers Canada Exploration Inc. on October 24, 2002, but which took effect from January 1, 2002, and which was amended and restated on July 3, 2009;

2009 Gahcho Kué Joint Venture Agreement or Gahcho Kué Amended and Restated Joint Venture Agreement means the Gahcho Kué Joint Venture Agreement as amended and restated, and entered into by Mountain Province Diamonds Inc., Camphor Ventures Inc., and De Beers Canada Inc. on July 3, 2009;

2009 Technical Report means the Technical Report dated as of April 20, 2009 entitled "Gahcho Kué Kimberlite Project NI 43-101 Technical Report, Northwest Territories, Canada" prepared for the Company by AMEC Americas Limited;

2010 Technical Report, Definitive Feasibility Study, or Feasibility Study means the "Gahcho Kué Project, Definitive Feasibility Study, National Instrument ("NI") 43-101 Technical Report" dated December 1, 2010 (with Information effective as of October 15, 2010) as prepared and completed by JDS Energy and Mining Inc., and filed by the Company on SEDAR on December 3, 2010;

Affiliate has the meaning given to affiliated bodies corporate under the Business Corporations Act (Ontario);

AK Property means the claims known as the "AK claims" held by the Gahcho Kué Joint Venture;

AK-CJ Properties means, collectively, the AK Property and CJ Property;

AMEC means AMEC Americas Limited;

AMEX means the American Stock Exchange prior to the take-over of the American Stock Exchange LLC by the New York Stock Exchange;

CJ Property means the claims known as the "CJ claims", which have now lapsed, previously held by MPV;

Arrangement means the arrangement between the Company and Glenmore which was effected as of June 30, 2000;

Arrangement Agreement means the Arrangement Agreement dated as of May 10, 2000, and made between MPV and Glenmore, including the Schedules to that Agreement;

Business Corporations Act (Ontario) means the R.S.O. 1990, CHAPTER B.16, as amended from time to time;

CDNX means the Canadian Venture Exchange Inc, formerly the Vancouver Stock Exchange, and now known as the TSX Venture Exchange;

Camphor or Camphor Ventures means Camphor Ventures Inc.;

Canadian National Instrument 43-101 means the National Instrument 43-101 (Standards of Disclosure for Mineral Projects) adopted by the Canadian Securities Administrators;

Code means the United States Internal Revenue Code of 1986, as amended;

Company, MPV or Registrant means Mountain Province Diamonds Inc.;

De Beers means De Beers Consolidated Mines Ltd.;

vii

De Beers Canada or Monopros means De Beers Canada Inc., formerly known as De Beers Canada Exploration Inc., and before that as Monopros Limited, a wholly-owned subsidiary of De Beers;

Desktop Study means the preliminary technical assessment of the Gahcho Kué resource conducted by De Beers Consolidated Mines Ltd. in 2000 (and updated in 2003, 2005, 2006, and 2008) and the Independent Qualified Persons' review of the Desktop Study provided by AMEC;

Definitive Feasibility Study, Feasibility Study, or 2010 Technical Report means the "Gahcho Kué Project, Definitive Feasibility Study, National Instrument ("NI") 43-101 Technical Report" dated December 1, 2010 (with Information effective as of October 15, 2010) as prepared and completed by JDS Energy and Mining Inc., and filed by the Company on SEDAR on December 3, 2010;

Exchange Act means the U.S. Securities Exchange Act of 1934, as amended;

Feasibility Study, Definitive Feasibility Study, or 2010 Technical Report means the "Gahcho Kué Project, Definitive Feasibility Study, National Instrument ("NI") 43-101 Technical Report" dated December 1, 2010 (with Information effective as of October 15, 2010) as prepared and completed by JDS Energy and Mining Inc., and filed by the Company on SEDAR on December 3, 2010;

GAAP means generally accepted accounting principles;

Gahcho Kué Amended and Restated Joint Venture Agreement or 2009 Gahcho Kué Joint Venture Agreement means the Gahcho Kué Joint Venture Agreement as amended and restated, and entered into by Mountain Province Diamonds Inc., Camphor Ventures Inc., and De Beers Canada Inc. on July 3, 2009;

Gahcho Kué Joint Venture or Joint Venture means the joint venture between Mountain Province Diamonds Inc., Camphor Ventures Inc., and De Beers Canada, for the Gahcho Kué Project, and as currently governed by the 2009 Gahcho Kué Joint Venture Agreement;

Gahcho Kué Joint Venture Agreement or 2002 Agreement means the joint venture agreement entered into by Mountain Province Diamonds Inc., Camphor Ventures Inc., and De Beers Canada Exploration Inc. on October 24, 2002, but which took effect from January 1, 2002, and which was amended and restated on July 3, 2009;

Gahcho Kué Project, located on Kennady Lake, and comprising four mineral leases that are 100% owned by De Beers Canada Inc. ("De Beers Canada"), which holds them on behalf of the Gahcho Kué Joint Venture. The participating interest of each of the joint venture parties is governed by the 2009 Gahcho Kué Joint Venture Agreement;

Glenmore means Glenmore Highlands Inc., a company incorporated under the Business Corporations Act (Alberta) and which, pursuant to the Arrangement, amalgamated with the Company's wholly-owned subsidiary, Mountain Glen Mining Inc., to form an amalgamated company, also known as Mountain Glen Mining Inc.;

Glenmore Shares means the common shares of Glenmore, as the same existed before the Arrangement took effect and "Glenmore Share" means any of them;

Glenmore Shareholder means a holder of Glenmore Shares;

JDS means JDS Energy and Mining Inc.;

Joint Information Circular means the joint information circular of the Company and Glenmore dated May 10, 2000 for the Extraordinary General Meeting and Special Meeting of the Company and Glenmore respectively to approve the Arrangement;

Joint Venture or Gahcho Kué Joint Venture means the joint venture between Mountain Province Diamonds Inc., Camphor Ventures Inc., and De Beers Canada, for the Gahcho Kué Project, and as currently governed by the 2009 Gahcho Kué Joint Venture Agreement;

Kennady North Project means the mining leases (4330, 4466, 4467, and 4468) and eight mineral claims which were staked in 2010 (Kwezi 01 to Kwezi 08) which are 100% owned by Mountain Province in the area around the Gahcho Kué Project and Kennady Lake;

Letter Agreement means the letter agreement dated March 6, 1997 among Mountain Province Mining Inc., Camphor Ventures Inc., Glenmore Highlands Inc., 444965 B.C. Ltd. and Monopros as amended or supplemented by: an agreement dated April 10, 1997 among Mountain Province Mining Inc., Camphor Ventures Inc., Glenmore Highlands Inc., 444965 B.C. Ltd. and Monopros; an assurance given to De Beers by the other parties., dated July, 1997; an agreement given to De Beers by the other parties dated November 1, 1997 and two agreements each dated December 17, 1999 among the parties;

Monopros or De Beers Canada means De Beers Canada Inc., formerly known as Monopros Limited, a wholly-owned subsidiary of De Beers and also formally known as De Beers Canada Exploration Inc.;

Mountain Glen means Mountain Glen Mining Inc., a wholly-owned subsidiary (now dissolved) of the Company;

MPV, Mountain Province, Company or Registrant means Mountain Province Diamonds Inc.;

MPV Shares means the common shares of MPV, and MPV Share means any of them;

Nasdaq means the National Association of Securities Dealers Automatic Quotation System, now the Nasdaq Stock Exchange;

NYSE Amex means the New York Stock Exchange Amex, after the take-over of the American Stock Exchange LLC by the New York Stock Exchange;

Old MPV means MPV prior to its amalgamation with 444965 B.C. Ltd.;

OTCBB means the OTC bulletin board;

PFIC means Passive Foreign Investment Company under the Code;

Qualified Person as defined by Canadian National Instrument 43-101 (Standards of Disclosure for Mineral Projects), means an individual who:

- (a) is an engineer or geoscientist with a least five years experience in mineral exploration, mine development or operation or mineral project assessment, or any combination of these;
- (b) has experience relevant to the subject matter of the mineral project and the technical report; and
- (c) is a member in good standing of a professional association (as that term is defined in Canadian National Instrument 43-101).

Except where specifically indicated otherwise, scientific and technical information included in this report on Form 20F regarding the Company's mineral projects has been reviewed by Carl Verley, a Director of the Company and a

Qualified Person as defined by National Instrument 43-101. Independent Qualified Persons responsible for the 2010 Technical Report prepared for the Gahcho Kué Joint Venture and discussed in Item 4 D “Property, Plants and Equipment” from the headings “Property Settings” to “Economic Analysis - Summary” are: Daniel D. Johnson, P.Eng., Mike Makarenko, P.Eng., and Ken Meikle, P.Eng.;

TSX means the Toronto Stock Exchange; and,

VSE means the Vancouver Stock Exchange, subsequently renamed the Canadian Venture Exchange, and now known as the TSX Venture Exchange.

x

GLOSSARY OF TECHNICAL TERMS

Adit	A horizontal or nearly horizontal passage driven from the surface for the working of a mine.
Archean	The earliest eon of geological history or the corresponding system of rocks.
Area of Interest	A geographic area surrounding a specific mineral property in which more than one party has an interest and within which new acquisitions must be offered to the other party or which become subject automatically to the terms and conditions of the existing agreement between the parties. Typically, the area of interest is expressed in terms of a radius of a finite number of kilometers from each point on the outside boundary of the original mineral property.
Bulk Sample	Evaluation program of a diamondiferous kimberlite pipe in which a large amount of kimberlite (at least 100 tonnes) is recovered from a pipe.
Carat	A unit of weight for diamonds, pearls, and other gems. The metric carat, equal to 0.2 gram or 200 milligram, is standard in the principal diamond-producing countries of the world.
Caustic Fusion	An analytical process for diamonds by which rocks are dissolved at temperatures between 450-600°C. Diamonds remain undissolved by this process and are recovered from the residue that remains.
Craton	A stable relatively immobile area of the earth's crust that forms the nuclear mass of a continent or the central basin in an ocean.
Diabase	A fine-grained rock of the composition of gabbro but with an ophitic texture.
Dyke	A body of igneous rock, tabular in form, formed through the injection of magma.
Feasibility Study	As defined by Canadian National Instrument 43-101, means a comprehensive study of a deposit in which all geological, engineering, operating, economic and other relevant factors are considered in sufficient detail that it could reasonably serve as the basis for a final decision by a financial institution to finance the development of the deposit for mineral production.
Gneiss	A banded rock formed during high grade regional metamorphism. It includes a number of different rock types having different origins. It commonly has alternating bands of schistose and granulose material.
Indicator mineral	Minerals such as garnet, ilmenite, chromite and chrome diopside, which are used in exploration to indicate the presence of kimberlites.
Jurassic	The period of the Mesozoic era between the Triassic and the Cretaceous or the corresponding system of rocks marked by the presence of dinosaurs and the first appearance of birds.

Kimberlite	A dark-colored intrusive biotite-peridotite igneous rock that can contain diamonds. It contains the diamonds known to occur in the rock matrix where they originally formed (more than 100 km deep in the earth).
Macrodiamond	A diamond, two dimensions of which exceed 0.5 millimeters.
Microdiamond	Generally refers to diamonds smaller than approximately 0.5mm, which are recovered from acid dissolution of kimberlite rock.
Mineral Reserve	Means the economically mineable part of a Measured Mineral Resource or Indicated Mineral Resource demonstrated by at least a Preliminary Feasibility Study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified. A Mineral Reserve includes diluting materials and allowances for losses that may occur when the material is mined.

THE TERMS "MINERAL RESERVE," "PROVEN MINERAL RESERVE" AND "PROBABLE MINERAL RESERVE" USED IN THIS REPORT ARE CANADIAN MINING TERMS AS DEFINED IN ACCORDANCE WITH NATIONAL INSTRUMENT 43-101 - STANDARDS OF DISCLOSURE FOR MINERAL PROJECTS WHICH INCORPORATES THE DEFINITIONS AND GUIDELINES SET OUT IN THE CANADIAN INSTITUTE OF MINING, METALLURGY AND PETROLEUM (THE "CIM") DEFINITION STANDARDS FOR MINERAL RESOURCES AND MINERAL RESERVES (THE "CIM DEFINITION STANDARDS") AS ADOPTED BY THE CIM COUNCIL ON DECEMBER 11, 2005. IN THE UNITED STATES, A MINERAL RESERVE IS DEFINED AS A PART OF A MINERAL DEPOSIT WHICH COULD BE ECONOMICALLY AND LEGALLY EXTRACTED OR PRODUCED AT THE TIME THE MINERAL RESERVE DETERMINATION IS MADE.

Under United States standards:

"Reserve" means that part of a mineral deposit which can be economically and legally extracted or produced at the time of the reserve determination.

"Economically," as used in the definition of reserve, implies that profitable extraction or production has been established or analytically demonstrated to be viable and justifiable under reasonable investment and market assumptions.

"Legally," as used in the definition of reserve, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, there should be a reasonable certainty based on applicable laws and regulations that issuance of permits or resolution of legal issues can be accomplished in a timely manner.

Mineral Reserves are categorized as follows on the basis of the degree of confidence in the estimate of the quantity and grade of the deposit.

"Proven Mineral Reserve" means, in accordance with CIM Definition Standards, the economically viable part of a Measured Mineral Resource demonstrated by at least a Preliminary Feasibility study. This Study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate at the time of reporting, that economic extraction is justified.

The definition for "proven mineral reserves" under CIM Definition Standards differs from the standards in the United States, where proven or measured reserves are defined as reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes; grade and/or quality are computed from the results of detailed sampling and (b) the sites for inspection, sampling and measurement are spaced so closely and the geographic character is so well defined that size, shape, depth and mineral content of reserves are well established.

"Probable Mineral Reserve" means, in accordance with CIM Definition Standards, the economically mineable part of an Indicated, and in some circumstances a Measured Mineral Resource demonstrated by at least a Preliminary Feasibility Study. This Study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified.

The definition for "probable mineral reserves" under CIM Definition Standards differs from the standards in the United States, where probable reserves are defined as reserves for which quantity and grade and/or quality are computed from information similar to that of proven reserves (under United States standards), but the sites for inspection, sampling, and measurement are further apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven reserves, is high enough to assume continuity between points of observation.

Mineral Resource

Under CIM Definition Standards, a Mineral Resource is a concentration or occurrence of diamonds, natural solid inorganic material, or natural solid fossilized organic material including base and precious metals, coal, and industrial minerals in or on the Earth's crust in such form and quantity and of such a grade or quality that it has reasonable prospects for economic extractions. The location, quantity, grade, geological characteristics and continuity of a Mineral Resource are known, estimated or interpreted from specific geological evidence and knowledge.

THE TERMS "MINERAL RESOURCE", "MEASURED MINERAL RESOURCE", "INDICATED MINERAL RESOURCE", "INFERRED MINERAL RESOURCE" USED IN THIS REPORT ARE CANADIAN MINING TERMS AS DEFINED IN ACCORDANCE WITH NATIONAL INSTRUMENT 43-101 - STANDARDS OF DISCLOSURE FOR MINERAL PROJECTS UNDER THE GUIDELINES SET OUT IN THE CIM DEFINITION STANDARDS. THE COMPANY ADVISES U.S. INVESTORS THAT WHILE SUCH TERMS ARE RECOGNIZED AND PERMITTED UNDER CANADIAN REGULATIONS, THE U.S. SECURITIES AND EXCHANGE COMMISSION DOES NOT RECOGNIZE THEM. THESE ARE NOT DEFINED TERMS UNDER THE UNITED STATES STANDARDS AND MAY NOT GENERALLY BE USED IN DOCUMENTS FILED WITH THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION BY U.S. COMPANIES. AS SUCH, INFORMATION CONTAINED IN THIS REPORT CONCERNING DESCRIPTIONS OF MINERALIZATION AND RESOURCES MAY

NOT BE COMPARABLE TO INFORMATION MADE PUBLIC BY U.S. COMPANIES
SUBJECT TO THE REPORTING AND DISCLOSURE REQUIREMENTS OF THE
UNITED STATES SECURITIES AND EXCHANGE COMMISSION.

"Inferred Mineral Resource" means, under CIM Definition Standards, that part of a Mineral Resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. U.S. INVESTORS ARE CAUTIONED NOT TO ASSUME THAT ANY PART OR ALL OF AN INFERRED RESOURCE EXISTS, OR IS ECONOMICALLY OR LEGALLY MINEABLE.

"Indicated Mineral Resource" means, under CIM Definition Standards, that part of a Mineral Resource for which quantity, grade or quality, densities, shape and physical characteristics, can be estimated with a level of confidence sufficient to allow the appropriate application of technical and economic parameters, to support mine planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough for geological and grade continuity to be reasonably assumed. U.S. INVESTORS ARE CAUTIONED NOT TO ASSUME THAT ANY PART OR ALL OF THE MINERAL DEPOSITS IN THIS CATEGORY WILL EVER BE CONVERTED INTO RESERVES.

"Measured Mineral Resource" means, under CIM Definition standards that part of a Mineral Resource for which quantity, grade or quality, densities, shape and physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters, to support production planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drillholes that are spaced closely enough to confirm both geological and grade continuity. U.S. INVESTORS ARE CAUTIONED NOT TO ASSUME THAT ANY PART OR ALL OF THE MINERAL DEPOSITS IN THIS CATEGORY WILL EVER BE CONVERTED INTO RESERVES.

Operator

The party in a joint venture which carries out the operations of the joint venture subject at all times to the direction and control of the management committee.

Ordovician	The period between the Cambrian and the Silurian or the corresponding system of rocks.
Overburden	A general term for any material covering or obscuring rocks from view.
Paleozoic	An era of geological history that extends from the beginning of the Cambrian to the close of the Permian and is marked by the culmination of nearly all classes of invertebrates except the insects and in the later epochs by the appearance of terrestrial plants, amphibians, and reptiles.
Pipe	A kimberlite deposit that is usually, but not necessarily, carrot-shaped.
Preliminary Feasibility Study	Under the CIM Definition Standards, means a comprehensive study of the viability of a mineral project that has advanced to a stage where the mining method, in the case of underground mining, or the pit configuration, in the case of an open pit, has been established, and which, if an effective method of mineral processing has been determined, includes a financial analysis based on reasonable assumptions of technical, engineering, operating, economic factors and the evaluation of other relevant factors which are sufficient for a Qualified Person acting reasonably, to determine if all or part of the Mineral Resource may be classified as a Mineral Reserve.
Proterozoic	The eon of geologic time or the corresponding system of rocks that includes the interval between the Archean and Phanerozoic eons, perhaps exceeds in length all of subsequent geological time, and is marked by rocks that contain fossils indicating the first appearance of eukaryotic organisms (as algae).
Reverse Circulation Drill	A rotary percussion drill in which the drilling mud and cuttings return to the surface through the drill pipe.
Sill	Tabular intrusion which is sandwiched between layers in the host rock.
Stringers	The narrow veins or veinlets, often parallel to each other, and often found in a shear zone.
Tertiary	The Tertiary period or system of rocks.
Till Sample	A sample of soil taken as part of a regional exploration program and examined for indicator minerals.
Xenolith	A foreign inclusion in an igneous rock.

NOTE REGARDING FORWARD LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 concerning the Company's exploration, operations, planned acquisitions and other matters. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

Statements concerning mineral resource estimates may also be deemed to constitute forward-looking statements to the extent that they involve estimates of the mineralization that will be encountered if the property is developed, and based on certain assumptions that the mineral deposit can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be "forward-looking statements." Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation:

§ risks and uncertainties relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits;

§ results of initial feasibility, pre-feasibility and feasibility studies, and the possibility that future exploration, development or mining results will not be consistent with the Company's expectations;

§ mining exploration risks, including risks related to accidents, equipment breakdowns or other unanticipated difficulties with or interruptions in production;

§ the potential for delays in exploration activities or the completion of feasibility studies;

§ risks related to the inherent uncertainty of exploration and cost estimates and the potential for unexpected costs and expenses;

§ risks related to commodity price fluctuations;

§ the uncertainty of profitability based upon the Company's history of losses;

§ risks related to failure of the Company and/or its joint venture partner to obtain adequate financing on a timely basis and on acceptable terms;

§ risks related to environmental regulation, permitting and liability;

§ political and regulatory risks associated with mining and exploration; and

§ other risks and uncertainties related to the Company's prospects, properties and business strategy.

Some of the important risks and uncertainties that could affect forward looking statements are described further in this Annual Report under the headings "Risk Factors", "History and Development of Company," "Business Overview," "Property, plants and equipment," and "Operating and Financial Review and Prospects". Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary

materially from those described in forward-looking statements. Forward looking statements are made based on management's beliefs, estimates and opinions on the date the statements are made and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change. Investors are cautioned against attributing undue certainty to forward-looking statements.

xvi

Forward-looking information is based on certain factors and assumptions regarding, among other things, exploration, permitting, construction, mining, and production at the Gahcho Kué Project and Kennady North Project as well as world and U.S. economic conditions and the future worldwide demand for diamonds. Specifically, in making statements regarding expected mineral recovery, diamond prices and expectations concerning the diamond industry, the Company has made assumptions regarding, among other things, foreign exchange rates, continuing recovery of world and U.S. economic conditions, our ability to successfully implement our exploration, construction and mining plans, the success of permitting the Gahcho Kué Project, and overall demand for diamonds. While the Company considers these assumptions to be reasonable based on the information currently available to it, they may prove to be incorrect. See “Risk Factors”.

NOTE REGARDING FINANCIAL STATEMENTS AND EXHIBITS

The financial statements and exhibits referred to herein are filed with this report on Form 20-F in the United States. This report is also filed in Canada as an Annual Information Form. Canadian investors should also refer to the annual consolidated financial statements of the Company as at December 31, 2010, which are incorporated by reference herewith, as filed with the applicable Canadian Securities regulators on SEDAR (the Canadian Securities Administrators' System for Electronic Document Analysis and Retrieval) under "Audited Annual Financial Statements - English".

METRIC EQUIVALENTS

For ease of reference, the following factors for converting metric measurements into imperial equivalents are provided:

To Convert From Metric	To Imperial	Multiply by
Hectares	Acres	2.471
Metres	Feet (ft.)	3.281
Kilometres (km.)	Miles	0.621
Tonnes	Tons (2000 pounds)	1.102
Grams/tonne	Ounces (troy/ton)	0.029

PART I

Item 1. Identity of Directors, Senior Management and Advisors

Not Applicable

Item 2. Offer Statistics and Expected Timetable

Not Applicable

Item 3. Key Information

A. Selected financial data.

The selected financial data set forth below should be read in conjunction with “Item 5 - Operating and Financial Review and Prospects”, and in conjunction with the consolidated financial statements and related notes of the Company included under “Item 17, Financial Statements.” The Company's consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“GAAP”). Material measurement differences between accounting principles generally accepted in Canada and the United States, applicable to the Company, are described in Note 9 to the consolidated financial statements. The Company's financial statements are set forth in Canadian dollars.

The following chart summarizes certain selected financial information for the Company as at and for its fiscal years ended December 31, 2010, its fiscal nine month period ended December 31, 2009, and the years ended March 31, 2009, 2008, and 2007. Except as otherwise indicated, dollar amounts presented are equivalent under Canadian and United States generally accepted accounting principles.

For the year ending (except as noted)

All in CDN\$1,000's except

Earnings (loss) per Share and Number of Common Shares	December 31, 2010 (12 months)	December 31, 2009 (9 months)	March 31, 2009 (12 months)	March 31, 2008 (12 months)	March 31, 2007 (12 months)
Operating Revenue	nil	nil	nil	nil	nil
Interest Revenue	123	12	37	62	24

Net (Loss) Earnings -					
Under Canadian GAAP:	(1,567)	(1,458)	(1,538)	166	(1,961)
Under U.S. GAAP1:	(13,890)	(5,388)	(1,969)	(70)	(2,050)
Basic and diluted (loss) earnings per share -					
Under Canadian GAAP:	(0.02)	(0.02)	(0.03)	-	(0.04)
Under U.S. GAAP1:	(0.20)	(0.09)	(0.03)	-	(0.04)
Total Assets -					
Under Canadian GAAP:	117,306	83,747	65,560	66,764	41,616
Under U.S. GAAP1:	64,769	43,044	28,219	29,601	10,925
Share Capital					
Under Canadian GAAP:	133,054	97,313	85,871	85,582	66,579
Under U.S. GAAP:	133,054	97,313	85,871	85,515	66,559

Net Assets -

Under Canadian GAAP:	105,164	71,516	59,681	60,642	41,197
Under U.S. GAAP ¹ :	56,727	35,991	28,028	29,388	10,506
Number of Common Shares issued	77,416,057	66,631,746	59,932,381	59,870,881	55,670,715

¹ During the year ended December 31, 2010, the Company determined that a future income tax liability recognized for Canadian GAAP in its fiscal year ended March 31, 2008 should not be recognized for U.S. GAAP purposes as the carrying value of the mineral property for US GAAP purposes was less than its tax basis and also determined that the previously recorded adjustment to expense deferred exploration cost in the balance sheet reconciliation was overstated. The Company has revised comparative figures to correct the immaterial impact of these items in this chart and in Note 9(c) of its consolidated financial statements.

No dividends have been declared in any of the years presented above.

1

Currency and Exchange Rates

All dollar amounts set forth in this report are in Canadian dollars, except where otherwise indicated. The following tables set forth, (i) for the five most recent financial years, the average rate (the "Average Rate") of exchange for the Canadian dollar, expressed in U.S. dollars, calculated by using the average of the U.S. noon exchange rates per the Bank of Canada for each trading day of the fiscal year; and (ii) the high and low exchange rates for each of the previous twelve calendar months for the Canadian dollar, expressed per the Bank of Canada.

The Average Rate is set out for each of the periods indicated in the table below.

	Dec-09			
Dec-10	(nine months)	Mar-09	Mar-08	Mar-07
US\$0.9704	US\$0.9034	US\$0.8878	US\$0.9688	US\$0.8784

The high and low exchange rates for each month during the previous twelve months are as follows:

Month	High (US\$)	Low (US\$)
January 2010	\$ 0.9552	\$ 0.9619
February 2010	\$ 0.9425	\$ 0.9505
March 2010	\$ 0.9739	\$ 0.9804
April 2010	\$ 0.9911	\$ 0.9990
May 2010	\$ 0.9548	\$ 0.9671
June 2010	\$ 0.9577	\$ 0.9678
July 2010	\$ 0.9547	\$ 0.9637
August 2010	\$ 0.9564	\$ 0.9639
September 2010	\$ 0.9633	\$ 0.9716
October 2010	\$ 0.9776	\$ 0.9857
November 2010	\$ 0.9833	\$ 0.9902
December 2010	\$ 0.9890	\$ 0.9950

On March 30, 2011, the noon buying rate in Canadian dollars as per the Bank of Canada (the "Exchange Rate") was \$1 Canadian = US\$1.0294.

B. Capitalization and indebtedness.

Not Applicable

C. Reasons for the offer and use of proceeds.

Not Applicable

D. Risk factors.

The Company, and thus the securities of the Company, should be considered a highly speculative investment and investors should carefully consider all of the information disclosed in this Annual Report prior to making an investment in the Company. In addition to the other information presented in this Annual Report, the following risk factors should be given special consideration when evaluating an investment in any of the Company's securities. Any or all of these risks could have a material adverse effect on the Company's business, financial condition, results of operations, cash flows and on the market price of its common stock.

(a) The Company's limited operating history makes it difficult to evaluate the Company's current business and forecast future results.

The Company has only a limited operating history on which to base an evaluation of the Company's current business and prospects, each of which should be considered in light of the risks, expenses and problems frequently encountered in the early stages of growth of all companies, and in mining companies in particular. The Company has not commenced mining operations and is still in the development and permitting stage of the Gahcho Kué Project and the exploration stage of the Kennady North Project. The Company may not be able to obtain all of the permits which are necessary for it to commence operations. The Company's mining operations may not be successful. As a result of this limited operating history, period-to-period comparisons of the Company's operating results may not be meaningful and the results for any particular period should not be relied upon as an indication of future performance.

(b) The diamond mining business is speculative and the Company may not be successful in implementing its plans to establish a successful and profitable diamond mining business

Resource exploration and possible development is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in quantity and quality to return a profit from production. Diamonds acquired or discovered by the Company may be required to be sold at a price which is reflective of the market at that time.

(c) The Company has no significant source of operating cash flow and failure to generate revenues in the future could cause the Company to go out business.

The Company currently has no significant source of operating cash flow. The Company has limited financial resources. The Company's ability to achieve and maintain profitability and positive cash flow is dependent upon the Company's ability to generate revenues. The Company's current operations do not generate any cash flow. The Company's annual operating costs, excluding its share of costs of the Gahcho Kué Project, and exploration costs for the Kennady North Project, are approximately \$1.7 million.

(d) The Company is in the development and permitting stage for the Gahcho Kué Project and may never become profitable.

The Company's Gahcho Kué Project is in the permitting and engineering design stage. The Company's proposed mining operations may never become profitable. Drilling of the 5034, Hearne, and Tuzo kimberlite pipes has been extensive and has now been completed. Reserves have been established through the Feasibility Study but the permitting of the mine is still underway. Estimates of mineral deposits, development plans and production costs, when made, can be affected by such factors as environmental permit regulations and requirements, weather, environmental factors, unforeseen technical difficulties, unusual or unexpected geological formations and work interruptions. In addition, the grade of diamonds ultimately discovered may differ from that indicated by bulk sampling results. Mine plans and processing concepts that have been developed are not necessarily final.

(e) The preliminary process testing may not be accurate in predicting the actual presence and recoverability of diamonds on Company properties.

Process testing is limited to small scale testing based on a number of laboratory test programs, trade-off studies and design evaluations. There can be no assurance that diamonds recovered in small scale tests will be duplicated in large scale tests under on-site conditions or in production scale. Difficulties may be experienced in obtaining the expected diamond recoveries when scaling up to a production scale process plant.

(f) The Company may not have adequate funds to explore properties other than the Gahcho Kué Project.

Over time, as the Kennady North Project continues, the Company may not have the ability to pay for exploration or development costs on its Kennady North Project. If such funds were available, there is no assurance that expending such funds would result in discovery of any diamondiferous kimberlite.

(g) The Company has a history of losses and is likely to continue to incur losses for the foreseeable future.

The Company has a history of losses and is likely to continue to incur losses for the foreseeable future. During the fiscal year ended December 31, 2010, the fiscal nine month period ended December 31, 2009, and the fiscal year ended March 31, 2009, the Company incurred net losses or earnings during each of the following periods:

- \$1.567 million loss for the year ended December 31, 2010;
- \$1.458 million loss for the nine months ended December 31, 2009; and,
- \$1.538 million net loss for the year ended March 31, 2009.

As of December 31, 2010, the Company had an accumulated deficit of \$30.5 million. There can be no assurance that the Company will ever be profitable.

None of the Company's properties have advanced to the commercial production stage, and the Company has no history of earnings or cash flow from operations and, as an exploration and development company, has only a history of losses.

(h) The Company may never recover the amounts it has capitalized for mineral property costs.

The recoverability of the amounts capitalized for mineral properties in the Company's consolidated financial statements, prepared in accordance with Canadian generally accepted accounting principles, is dependent upon the ability of the Company to complete exploration and development, the discovery of economically recoverable reserves, and, if warranted, upon future profitable production or proceeds from disposition of some or all of the Company's mineral properties.

(i) The Company's failure to generate revenues in the future could cause the Company to go out of business.

As of December 31, 2010, the Company had cash and cash equivalents and short-term investments of approximately \$33.6 million and working capital of approximately \$29.5 million. During the past three fiscal years ended December 31, 2010, December 31, 2009 (nine months), and March 31, 2009, the Company used approximately \$3.517 million in cash flows in operating activities including approximately \$0.988 million during the year ended December 31, 2010, \$1.387 million during the nine months ended December 31, 2009, and \$1.142 million during the fiscal year ended March 31, 2009.

The Company's administrative and other expenses are expected to be approximately \$1.7 million for the next year, in addition to an estimated \$6.2 million for expenses for the Gahcho Kué joint venture for 2011, any exploration costs for the Kennady North Project, and possible repayments of historic sunk costs.

In order to advance the Gahcho Kué Project and exploration of the Kennady North Project, the Company will be required to raise additional capital through equity and/or debt financings on terms that may be dilutive to its shareholders' interests in the Company and the value of their common shares. The Company may consider debt

financing, joint ventures, production sharing arrangements, disposing of properties or other arrangements to meet its capital requirements in the future. Such arrangements may have a material adverse affect on the Company's business or results of operations. As well, there is no guarantee that the Company will be able to raise additional capital, or to raise additional capital on terms and conditions which it finds acceptable. If the Company is not able to raise sufficient capital, it may not be able to grow the Company, or it may be forced to cease doing business.

(j) Only the Company's Gahcho Kué Project has probable reserves.

The Gahcho Kué Project, the Company's major property, is in the permitting stage. The Kennady North Project is in the early stage of exploration. The Gahcho Kué Project has probable reserves in three of the four kimberlite bodies at Kennady Lake. See "Item 4D - Property, plants and equipment - Principal Properties". The Company has not yet determined whether the Kennady North Project contains mineral reserves that are economically recoverable. Failure to discover economically recoverable reserves at the Kennady North Project will require the Company to write-off costs capitalized in its financial statements.

(k) If the Company does not hold good title to properties, its ability to explore and eventually mine them could be prevented or restricted.

The Company's business depends upon having clear title to its properties and its ability to explore, develop and mine its properties without undue restriction. If any of its properties are subject to prior unregistered agreements that restrict the use of the properties, or if it does not hold title to the properties as it believes it does, its ability to explore, develop and mine on those properties could be limited or prevented completely. This would have a material adverse effect on the Company and its results of operation.

(l) Diamond prices can fluctuate significantly, and as a result, the Company's results of operation may fluctuate significantly.

The market for rough diamonds is subject to strong influence from demand in the United States, Japan, China and India, which are the largest markets for polished diamonds, and supply from major producers such as Alrosa of Russia and Debswana of Botswana. The price of diamonds has historically fluctuated. The price of diamonds dropped sharply after September 11, 2001. Between 2003 and 2006 diamond prices increased on average by approximately 15%. In 2007, rough diamond prices increased by an average of 25%, and in the first five months of 2008, by a further 11%. From about mid-2008 to mid-April 2009, rough diamond prices fell sharply with concerns of the global economic environment of the time. By mid-April 2009, rough diamond prices rebounded to pre-global recession levels. During 2010, rough diamond prices increased by approximately 30% and are currently trading at historic levels. Such fluctuations make it difficult to predict future diamond prices and the Company's future results of operation may fluctuate significantly with rough diamond prices.

(m) The Company may incur significant costs to comply with Environmental and Government Regulation

The current and anticipated future operations of the Company, including development activities and commencement of production on its properties, require permits from various federal, territorial and local governmental authorities and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs, and delays in development, production and other schedules as a result of the need to comply with applicable laws, regulations and permits. The Company's exploration and development activities and its potential mining and processing operations in Canada are subject to various Canadian Federal and Territorial laws governing land use, the protection of the environment, prospecting, development, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, mine safety and other matters.

Such exploration, development and operation activities are also subject to substantial regulation under these laws by governmental agencies and may require that the Company obtain permits from various governmental agencies. The Company believes it is in substantial compliance with all material laws and regulations which currently apply to its

activities. There can be no assurance, however, that all permits which the Company may require for construction of mining facilities and conduct of mining operations will be obtainable on reasonable terms or that such laws and regulations, or that new legislation or modifications to existing legislation, would not have an adverse effect on any exploration, development or mining activities which the Company might undertake.

Further detail on governmental regulation may be found in “Item 4 - Business Review - Government Regulation”, below.

Failure to comply with applicable laws, regulations and permit requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violation of applicable laws or regulations. The amount of funds required to comply with all environmental regulations and to pay for compensation in the event of a breach of such laws may exceed the Company's ability to pay such amounts.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation of existing or new laws, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining facilities.

(n) Climate and transportation costs may increase and have a negative effect on the Company's results of operation.

The Gahcho Kué Project is subject to climate and transportation risks because of its remote northern location. Such factors can add to the costs of exploration, development and operation, thereby increasing costs and negatively affecting profitability.

(o) The Company is dependent upon its joint venture partner for the success of the Gahcho Kué Project.

The Company, and the success of the Gahcho Kué Project, are dependent on the efforts, expertise and capital resources of our joint venture partner, De Beers Canada, and its parent De Beers. De Beers Canada is the project operator and is responsible for exploring, permitting, developing and operating the Gahcho Kué Project. In addition, De Beers Canada is providing its share of financing for the Gahcho Kué Project. The Company is dependent on De Beers Canada for accurate information about the Gahcho Kué Project, and the proper and timely progress of exploration, permitting and development.

(p) Operating Hazards and Risks

Diamond exploration and mining involves many risks. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks (such as accidents, injuries, and hazardous waste) normally incidental to exploration, development and production of resources, any of which could result in work stoppages, damage to property and possible environmental damage.

(q) There are numerous factors beyond the control of the Company that may affect the marketability of any diamonds discovered.

Factors beyond the control of the Company may affect the marketability of any diamonds produced. Significant price movements over short periods of time may be affected by numerous factors beyond the control of the Company, including international economic and political trends, expectations of inflation, currency exchange fluctuations (specifically, the U.S. dollar relative to the Canadian dollar and other currencies), interest rates and global and/or regional consumption patterns. The effect of these factors on the prices of diamonds and therefore the economic viability of any of the Company's projects cannot accurately be predicted.

(r) The Company's expectations reflected in forward looking statements may prove to be incorrect.

This Form 20-F includes "forward looking statements". A shareholder or prospective shareholder should bear this in mind when assessing the Company's business. All statements, other than statements of historical facts, included in this annual report, including, without limitation, the statements under and located elsewhere herein regarding industry prospects and the Company's financial position are forward-looking statements. Although the Company believes that the expectations reflected in such forward looking statements are reasonable, such expectations may prove to be incorrect.

(s) The Mineral Resources Industry is intensely competitive and the Company competes with many companies with greater financial means and technical facilities.

The resource industry is intensely competitive in all of its phases, and the Company competes with many companies possessing greater financial resources and technical facilities. Competition could adversely affect the Company's ability to acquire suitable producing properties or prospects for exploration in the future.

(t) Future equity financings which the Company may undertake would cause shareholders' interests in the Company to be diluted.

The Company's current operations do not generate any cash flow. As the Company seeks additional equity financing, the issuance of additional shares will dilute the interests of the Company's current shareholders. The amount of the dilution would depend on the number of new shares issued and the price at which they are issued. The Company has raised funds in recent years through share, option and warrant issuances. As of December 31, 2010, the Company had cash and cash equivalents and short-term investments of approximately \$33.6 million and working capital of approximately \$29.5 million. To develop the Gahcho Kué mine, and perform exploration on the Kennady North Project and any other properties acquired, the Company will need to investigate sources of additional liquidity to increase the cash balances required in the future. These additional sources include, but are not limited to, share offerings, private placements, credit facilities, and debt, as well as further possible exercises of outstanding options by directors and officers. There can be no assurance that the Company will be able to raise additional funds as needed, or that funds raised, if any, would be on terms and conditions acceptable to the Company. The Company's annual cash administrative operating costs, excluding the costs directly associated with the Gahcho Kué Project or Kennady North Project, are approximately \$1.7 million.

(u) If outstanding options to buy Company stock are exercised, existing shareholders' interests in the Company will be diluted.

As at March 30, 2011, there were 1,114,635 options outstanding with exercise prices ranging from \$1.26 to \$6.13 (expiring at various dates). There were 1,547,950 warrants outstanding with an exercise price of \$3.20, expiring June 8, 2011. The stock options and warrants, if fully exercised, would increase the number of shares outstanding by 2,662,585. Such options and warrants, if fully exercised, would constitute about 3.2% (out of 81,309,558 shares (78,646,973 issued and outstanding, plus total outstanding options and warrants)) of the Company's resulting share capital as at March 30, 2011. It is unlikely that outstanding options and warrants would be exercised unless the market price of the Company's common shares exceeds the exercise price at the date of exercise. The exercise of such options and the subsequent resale of such Common shares in the public market could adversely affect the prevailing market price and the Company's ability to raise equity capital in the future at a time and price which it deems appropriate. The Company may also enter into commitments in the future which would require the issuance of additional common shares and the Company may grant new share purchase warrants and stock options. Any share issuances from the Company's treasury will result in dilution to existing shareholders.

(v) Members of our Board of Directors may have outside interests which conflict with the Company or its shareholders.

Patrick Evans and Jennifer Dawson have Consulting Agreements with the Company (see "Item 6C - Board Practices"). In addition, certain officers and directors of the Company are associated with other natural resource companies that acquire interests in mineral properties. Such associations may give rise to conflicts of interest from time to time.

(w) If the Company is not able to attract and maintain qualified key management personnel, it may not be able to successfully implement its planned business activities and growth.

7

The nature of the Company's business, its ability to continue its exploration, development and permitting activities and to thereby develop a competitive edge in its marketplace depends, in large part, on its ability to attract and maintain qualified key management personnel. Competition for such personnel is intense, and there can be no assurance that the Company will be able to attract and retain such personnel. The Company's development to date has depended, and in the future will continue to depend, on the efforts of Patrick Evans. See "Item 7B -Related party transactions" and "Item 6C - Board Practices". Loss of the key person could have a material adverse effect on the Company. The Company does not maintain key-man life insurance on Patrick Evans.

(x) The Company's stock price is subject to significant fluctuations.

Prices for the Company's shares on the TSX and on the NYSE Amex, have been extremely volatile. The price for the Company's common shares on the TSX ranged from \$2.02 (low) and \$6.65 (high) during the fiscal year ended December 31, 2010, and from \$0.86 (low) to \$3.07 (high) during the nine-month fiscal period ended December 31, 2009. The price on the NYSE Amex ranged from \$1.96 US (low) and \$6.64 US (high) during the fiscal year ended December 31, 2010, and from \$0.69 US (low) to \$2.90 US (high) during the nine-month fiscal period ended December 31, 2009. Any investment in the Company's securities is therefore subject to considerable fluctuations in value.

(y) The Company has not paid dividends in the past and does not anticipate paying them in the foreseeable future.

Since its inception, the Company has not paid any cash dividends on its common stock and does not anticipate paying any cash dividends on its common stock in the foreseeable future. Without dividends on its common stock, shareholders will be able to profit from an investment only if the price of the stock appreciates before the shareholder sells it.

(z) Currency rate fluctuations may have a material effect on our financial position, results of operations, and timing of the development of the Company's properties.

Feasibility and other studies conducted to evaluate the Company's properties are typically denominated in U.S. dollars, and the Company conducts a significant portion of its operations and incurs a significant portion of its administrative and operating costs in Canadian dollars. The exchange rate for converting U.S. dollars into Canadian dollars has fluctuated in recent years. Accordingly, the Company is subject to fluctuations in the rates of currency exchange between the U.S. dollar and the Canadian dollar, and these fluctuations in the rates of currency exchange may materially affect the Company's financial position, results of operations and timing of the development of its properties. In particular, the recent strong increase in the value of the Canadian dollar compared to the U.S. dollar should be expected to have a material impact on projected future capital and operating costs, which could impact on the economic viability of the Gahcho Kué Project.

(aa) Historically, the Company has been dependent on the support of De Beers and there is no assurance that their support will continue in the future.

The exploration of the Gahcho Kué Project has historically been funded by De Beers Canada, De Beers Canada is the operator of the Project, and De Beers Canada has made an equity investment in the Company. With the execution of the 2009 Joint Venture Agreement, De Beers and the Company share funding responsibility for the Gahcho Kué Project. Under the 2009 Gahcho Kué Joint Venture Agreement, the Company and De Beers are required to fund their share of costs for future operations. As well, the Company is required to make certain repayments of agreed historic costs of the Gahcho Kué Project, funded by De Beers, if and when certain events occur. If either party is unable to fund their share of costs, or, if the Company defaults on its required payments of historic costs if and when they are due, in addition to interest on late or defaulted payments, marketing rights can be diluted for the defaulting party. As

well, there is no assurance that the Company will have the required funds on hand when the payments are required to be made. Finally, there is no assurance that the level of support provided by De Beers will continue in the future.

(bb) It will be difficult for any shareholder of the Company to commence legal action against the Company's executives. Enforcing judgments against them or the Company will be difficult.

As the Company is a Canadian company, it may be difficult for U.S. shareholders of the Company to effect service of process on the Company or to realize on judgments obtained against the Company in the United States. Some of the Company's directors and officers are residents of Canada and a significant part of the Company's assets are, or will be, located outside of the United States. As a result, it may be difficult for shareholders resident in the United States to effect service of process within the United States upon the Company, directors, officers or experts who are not residents of the United States, or to realize in the United States judgments of courts of the United States predicated upon civil liability of any of the Company directors or officers under the United States federal securities laws. If a judgment is obtained in the U.S. courts based on civil liability provisions of the U.S. federal securities laws against the Company or its directors or officers it will be difficult to enforce the judgment in the Canadian courts against the Company and any of the Company's non-U.S. resident executive officers or directors. Accordingly, United States shareholders may be forced to bring actions against the Company and its respective directors and officers under Canadian law and in Canadian courts in order to enforce any claims that they may have against the Company or the Company's directors and officers. Subject to necessary registration, as an extra provincial company, under applicable provincial corporate statutes in the case of a corporate shareholder, Canadian courts do not restrict the ability of non-resident persons to sue in their courts. Nevertheless it may be difficult for United States shareholders to bring an original action in the Canadian courts to enforce liabilities based on the U.S. federal securities laws against the Company and any of the Company's Canadian executive officers or directors.

(cc) The MPV Shares may be delisted from NYSE Amex, and if this occurs, shareholders may have difficulty converting their investment into cash efficiently.

NYSE Amex has established certain standards for the continued listing of a security on this exchange. If the MPV Shares were to be excluded from NYSE Amex, the prices of the MPV Shares and the ability of shareholders to sell such stock would be adversely affected. If the Company were to be delisted, the Company would be required to comply with the initial listing requirements to be relisted on NYSE Amex.

Item 4. Information on the Company

A. History and development of the company.

The Corporate Organization

Mountain Province Diamonds Inc., formerly Mountain Province Mining Inc., was formed on November 1, 1997 by the amalgamation (the "MPV Amalgamation") of Mountain Province Mining Inc. ("Old MPV") and 444965 B.C. Ltd. ("444965") pursuant to an amalgamation agreement (the "MPV Amalgamation Agreement") dated as of August 21, 1997.

Under the terms of the MPV Amalgamation Agreement, as at November 1, 1997, each Old MPV share was exchanged for one MPV Share and each 444965 share was exchanged for approximately 0.80 of one MPV Share. The conversion ratios reflected the respective interests of Old MPV and 444965 in the AK-CJ Properties prior to the date of the MPV Amalgamation.

Old MPV was incorporated under the laws of British Columbia on December 2, 1986 under the British Columbia Company Act and was engaged in the exploration of precious and base mineral resource properties until the date of the MPV Amalgamation. Prior to the date of the MPV Amalgamation, Old MPV held an undivided 50% interest in the AK-CJ Properties and an interest in each of the other properties which are currently held by MPV, as described below.

444965, a wholly-owned subsidiary of Glenmore Highlands Inc., (Glenmore being a former controlling shareholder of the Company as defined under the Securities Act, British Columbia) prior to the MPV Amalgamation, was incorporated under the laws of British Columbia on August 20, 1993. Prior to the MPV Amalgamation, 444965's only material asset consisted of a 40% undivided interest in the AK-CJ Properties.

As of March 31, 2000, the Company had one wholly-owned subsidiary, Mountain Province Mining Corp. (USA), which has since been voluntarily dissolved.

On April 4, 2000, the Company incorporated a wholly-owned subsidiary, Mountain Glen Mining Inc. in Alberta. Pursuant to an arrangement agreement (the "Arrangement Agreement") with Glenmore dated May 10, 2000, Glenmore was amalgamated with Mountain Glen effective as of June 30, 2000 to form a wholly-owned subsidiary (also known as "Mountain Glen Mining Inc.") of the Company. All Glenmore Shares were exchanged for common shares in the Company on the basis of 0.5734401 MPV Shares to one Glenmore Share, and Glenmore Shares were concurrently cancelled. All of the assets of Glenmore became assets of Mountain Glen, including 16,015,696 MPV Shares previously held by Glenmore.

Glenmore had two wholly-owned subsidiaries, Baltic Minerals BV, incorporated in the Netherlands, and Baltic Minerals Finland OY, incorporated in Finland. Pursuant to the Arrangement Agreement, these companies became wholly-owned subsidiaries of the Company.

The Company changed its name from Mountain Province Mining Inc. to Mountain Province Diamonds Inc. effective October 16, 2000. It commenced trading under its new name on the TSX on October 25, 2000.

Pursuant to an Assignment and Assumption Agreement dated March 25, 2004 between the Company and Mountain Glen, Mountain Glen distributed its property and assets in specie to the Company with the object of winding up the affairs of Mountain Glen. The property transferred included Mountain Glen's shares in Baltic Minerals BV and the 16,015,696 MPV Shares. On March 30, 2004, the 16,015,696 MPV Shares were cancelled and returned to treasury.

Mountain Glen was voluntarily dissolved on August 4, 2004.

Pursuant to the repeal of the British Columbia Company Act and its replacement by the British Columbia Business Corporations Act (the "New Act"), the Company transitioned to the New Act and adopted new Articles of Incorporation. On September 20, 2005, the Company's shareholders approved a special resolution for the continuance of the Company into Ontario, and the Company amended its articles and continued incorporation under the Business Corporations Act (Ontario), transferring from the Company Act (British Columbia).

The Company is domiciled in Canada.

The names of the Company's subsidiaries, their dates of incorporation and the jurisdictions in which they were incorporated as at the date of filing of this Annual Report, are as follows:

Name of Subsidiary	Date of Incorporation	Jurisdiction of Incorporation
Baltic Minerals BV	January 26, 1996	The Netherlands
Baltic Minerals Finland OY	May 18, 1994	Finland
Camphor Ventures Inc.	May 9, 1986 (as Sierra Madre Resources Inc.)	British Columbia, Canada

The subsidiaries of the Company, represented diagrammatically, are as follows:

The Company's registered, records, administrative, and executive office is at 401 Bay Street, Suite 2700, PO Box 152, Toronto, Ontario, Canada M5H 2Y4, the telephone number is (416) 361-3562, and the fax number is (416) 603-8565.

The Company's initial public offering on the VSE was pursuant to a prospectus dated July 28, 1988 and was only offered to investors in British Columbia. The Company listed its shares on the TSX (Trading Symbol "MPV") on January 22, 1999 and on the Nasdaq Smallcap Market (Trading Symbol "MPVIF") on May 1, 1996. Its shares were delisted from the Vancouver Stock Exchange (now known as the TSX Venture Exchange and prior to that, as the CDNX) on January 31, 2000 and from the Nasdaq Smallcap Market on September 29, 2000. Presently, the Company's shares trade on the TSX under the symbol "MPV" and also on the NYSE Amex (formerly Amex) under the symbol "MDM". Prior to April 4, 2005, the Company's shares traded on the OTCBB under the symbol "MPVI". The Company is also registered extra-provincially in the Northwest Territories, and is a reporting issuer in British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland. The Company files reports in the United States pursuant to Section 13 of the Securities Exchange Act.

The Company's transfer agent is Computershare Investor Services Inc. located at 100 University Avenue, 8th Floor, Toronto, Ontario, Canada, M5J 2Y1.

Principal Capital Expenditures and Divestitures

There are no principal capital expenditures and divestitures currently in progress.

Takeover offers

There were no public takeover offers by third parties in respect of the MPV Shares or by the Company in respect of other companies' shares during the last and current financial year.

Acquisitions and Dispositions

On October 10, 2002, the Company granted an option for the acquisition by Vision Gate Ventures Limited (now known as Northern Lion Gold Corp.) of a 70% interest in its Haveri Gold Property, which was not considered to be a property that was material to the Company. On October 4, 2004, the Company agreed to exchange the Company's 30% interest in the Haveri Gold Property for 4,000,000 common shares of Northern Lion Gold Corp. The shares were subject to a two-year hold period and there were volume restrictions on re-sale thereafter. The 4,000,000 common shares of Northern Lion Gold Corp. were sold in July 2007.

On July 5, 2006, the Company announced that it had entered into an agreement with certain Camphor Ventures Inc. ("Camphor" or "Camphor Ventures") shareholders to acquire approximately 33.5 percent of the issued and outstanding shares of Camphor through a private agreement exempt share exchange on the basis of 0.3975 MPV Shares for each Camphor share. The acquisition was completed on July 24, 2006.

On January 19, 2007, the Company announced that Camphor had accepted an offer letter from the Company in terms of which the Company offered, subject to certain conditions, to acquire all of the outstanding securities of Camphor Ventures on the basis of 0.41 MPV Shares, options or warrants (as the case may be) per Camphor common share, option, or warrant. Offering documents and the Camphor Directors' Circular were mailed to Camphor shareholders on February 23, 2007, and the offer remained open until March 30, 2007, following which Mountain Province took up the Camphor shares tendered into the offer increasing the Company's interest in Camphor to over 90 percent. The offer was subsequently extended until April 16, 2007, following which the Company's interest in Camphor increased to 96% percent on a fully diluted basis. On April 19, 2007, the Company issued a Notice of Compulsory Acquisition to acquire the balance of the outstanding shares of Camphor. The Notice expired June 19, 2007 and the Company took up the balance of the Camphor shares. Camphor Ventures was de-listed and is now a wholly owned subsidiary of Mountain Province.

B.

Business overview.

1.1 Introduction

The Company is a natural resource property exploration and development company. The Company has interests in several natural resource properties, the most significant and principal property being a 49% interest (including the 4.9% interest in the property held by Camphor) in the AK Property located in the Northwest Territories of Canada. See "Item 4D - Property, plants and equipment".

Bulk sampling and drilling on the AK Property is complete, as is the Definitive Feasibility Study on the Gahcho Kué Project which demonstrates an economically viable project. The Project is currently in the permitting stage. There are no revenues from the Company's natural resource properties.

In November 2010, the Company acquired eight (8) mineral claims just north and west of the Gahcho Kué Project mineral leases. The Company refers to these eight claims, and its five mineral leases, as the Kennady North Project. The Kennady North Project is currently undergoing a desktop study to compile the historic exploration information in order to assess what exploration, if any, should be done on these 13 claims and leases.

1.2 Historical Corporate Development

AK-CJ Properties, and the Gahcho Kué Project

In August 1992, the Company acquired a 100% interest in the AK-CJ Properties that encompassed approximately 520,000 acres. Pursuant to an agreement dated November 18, 1993 (as amended), the Company optioned 40% of its interest in the AK-CJ Properties to 444965, a subsidiary of Glenmore.

Pursuant to an agreement dated August 16, 1994 (as amended), the Company also optioned 10% of its interest in the AK-CJ Claims to Camphor. Following the merger of the Company with 444965, the Company held a 90% interest in the AK-CJ Claims, and Camphor, the remaining 10%. Exploration work in the form of soil sampling, aerial geophysical surveys and geochemical and geophysical analysis were undertaken on these properties during the period from 1992 to 1995.

During fiscal 1995, the Company focused the majority of its attention on the AK Property. In February 1995, a diamondiferous kimberlite was discovered (the "5034" kimberlite pipe) and a program of delineation drilling was undertaken. Activity during this period on the Company's other properties was minimal because of the focus on the AK Property.

During 1996, the Company completed a 104-tonne mini-bulk sample from the 5034 kimberlite pipe. The results indicated an average grade of 2.48 carats per tonne. During 1997, the Company concluded a joint venture agreement (the "Letter Agreement") with Monopros, a wholly-owned subsidiary of De Beers now known as De Beers Canada Inc., Camphor Ventures Inc., and other parties, and further amended it (as the Gahcho Kué Joint Venture Agreement) in 2002, to develop the AK-CJ Properties. The Letter Agreement granted De Beers the sole and exclusive right and option to acquire a 51% ownership interest in the AK Property in consideration of incurring certain expenditures.

During the 1997 exploration season, De Beers Canada discovered three new kimberlite pipes on the AK Property: Tesla, Tuzo and Hearne. All are diamondiferous.

During the spring of 1998, De Beers Canada conducted mini-bulk sampling on the three new pipes as well as the 5034 kimberlite pipe, the original pipe discovery on the AK Property. The results were positive enough for De Beers to commit to a major bulk sample in 1999.

During 1999, De Beers Canada completed a major bulk sample of the four major pipes. For the 5034 kimberlite pipe, a total of 1,044 carats were recovered from 609 tonnes of kimberlite. For the Hearne pipe, a total of 856 carats were recovered from 469 tonnes of kimberlite. For the Tuzo pipe, a total of 533 carats were recovered from 523 tonnes of kimberlite. For the Tesla pipe, 64 carats were recovered from 184 tonnes of kimberlite. The Tesla pipe was too low grade to be considered as part of a mine plan.

On March 8, 2000, the Company agreed to extend the feasibility study decision date, and De Beers Canada agreed to carry all exploration, development and other project costs.

On August 4, 2000, De Beers Canada presented the Desktop Study to the Company. Upon presentation, De Beers Canada was deemed to earn a 51% interest in the AK-CJ Properties. Consequently, the Company was left with a 44.1% interest and Camphor with a 4.9% interest in the AK-CJ Properties. The main conclusion of the Desktop Study was that only a 15 percent increase in diamond revenues was needed for De Beers Canada to proceed to the feasibility stage.

On May 4, 2001, De Beers Canada completed the bulk sample program of the Hearne and 5034 pipes. A total of approximately 307 tonnes and 550 tonnes of kimberlite were recovered from the Hearne and 5034 pipes respectively. The modeled values of the diamonds recovered from the Hearne and 5034 pipes were reported on December 18, 2001 and the results were encouraging enough for De Beers to commit to another bulk sample during the winter of 2002. The main purpose was to recover more high quality, top color diamonds, like the 9.9-carat diamond recovered in the 2001 program.

The CJ Property claims substantially lapsed in November 2001 and the remaining CJ Property claims lapsed on August 17, 2002.

During 2002, the Company entered into the Gahcho Kué Joint Venture Agreement. This agreement provided that De Beers Canada could have earned up to a 55% interest in the project by funding and completing a positive definitive feasibility study. The agreement also provided that De Beers Canada could have earned up to a 60% interest in the project by funding development and construction of a commercial-scale mine.

The winter 2002 bulk sample program of the 5034 and Hearne pipes was completed on April 20, 2002. The modeled grades and values per carat for both pipes were used to update the Desktop Study. De Beers Canada's 2003 updated Desktop Study showed that, due to the decrease in diamond prices since September 11, 2001 and a lower U.S. dollar against the Canadian dollar, the projected return on the project would be slightly less than that obtained previously. As a result of the indicated internal rate of return, well below the agreed hurdle rate of 15%, De Beers decided to postpone a pre-feasibility decision until the next year when the Desktop Study would be updated again.

At the end of July 2003, De Beers notified the Company that they had started work on a detailed internal cost estimate study on the Gahcho Kué Project that incorporated the Kennady Lake diamond deposits. They based their decision on their belief that the improving geo-political and economic conditions supported confidence in longer-term diamond price projections. In November 2003, the Joint Venture's management committee approved a budget of approximately \$25 million for the study which started in January 2004, and was completed mid-2005.

The projected profitability levels were sufficiently encouraging to the Joint Venture to support the Joint Venture's decision to proceed to the next phase of permitting and advanced exploration to improve the resource confidence and input data for mine design to support further study. On July 11, 2005, De Beers reported an increase in the modeled value of the diamonds for the Gahcho Kué Project with the modeled values increasing by approximately 6, 7 and 8 percent for the Tuzo, Hearne and 5034 pipes respectively.

During 2006, 2007 and the winter of 2008, advanced exploration and permitting work continued on the AK Property. For further particulars, reference should be made to "Item 4D - Property, plants and equipment - Principal Properties - Resource Properties".

Other Properties

The Company does not regard the properties, other than the AK Property (the "Gahcho Kué Project"), as material at this time, and other properties are only briefly discussed in this annual report. For further particulars, reference should be made to "Item 4D - Property, plants and equipment - Other Properties".

Kennady North

The Company (outside of the Joint Venture with De Beers Canada) has the following five mining leases at Kennady Lake, adjacent or close to the Gahcho Kué Project, with their respective lease numbers -4340, 4342, 4466, 4467, and 4468. These five mining leases represent about 12,555 acres. In late 2010, the Company also staked eight claims around Gahcho Kué - Kwezi 01 to Kwezi 08. These claims represent approximately 17,839 acres, and together with the five mining leases, comprise 30,394 acres - the Company's Kennady North Project. These mining leases and claims are not part of the 2009 Gahcho Kué Joint Venture Agreement with De Beers Canada and are not considered part of the Gahcho Kué Project. See also Item 4.D. Property, Plant and Equipment.

Historical exploration on the Kennady North Project was done starting in 1992 and continued until about 10 years ago when the Company and De Beers Canada focussed exploration efforts on the Gahcho Kué Project.

The Company is currently undertaking a desktop study of the exploration work done in the past on the Kennady North Project, and when the desktop study is completed, will be able to assess what further exploration work might be warranted.

Other

The Company has a 50% interest (acquired pursuant to an option/joint venture agreement with Opus Minerals Inc., now known as First Strike Diamonds Inc. on July 13, 1998) in claims held by Opus Minerals Inc. in the northern end of the Baffin Island. The property values for these claims have been written off and the Baffin Island property is no longer of interest to the Company.

Acquisition of Camphor Ventures Inc.

On July 5, 2006 the Company announced that it had entered into an agreement with certain Camphor shareholders to acquire approximately 33.5 percent of the issued and outstanding shares of Camphor through a private agreement exempt share exchange on the basis of 0.3975 Mountain Province shares for each Camphor share. The acquisition was completed on July 24, 2006.

On January 19, 2007, the Company announced that Camphor had accepted an offer letter from the Company in terms of which Mountain Province offered, subject to certain conditions, to acquire all of the outstanding securities of Camphor on the basis of 0.41 Mountain Province common shares, options or warrants (as the case may be) per Camphor common share, option, or warrant. Offering documents and the Camphor Directors' Circular were mailed to

Camphor shareholders on February 23, 2007, and the offer remained open until March 30, 2007, following which Mountain Province took up the Camphor shares tendered into the offer increasing the Company's interest in Camphor to over 90 percent. The offer was subsequently extended until April 16, 2007, following which the Company's interest in Camphor increased to 96% percent on a fully diluted basis. On April 19, 2007, the Company issued a Notice of Compulsory Acquisition to acquire the balance of the outstanding shares of Camphor. The Notice expired June 19, 2007, and the Company took up the rest of the shares. Camphor Ventures was de-listed and is now a wholly owned subsidiary of Mountain Province.

Foreign Assets

Until the Arrangement with Glenmore, all of the Company's assets are and have been located in Canada (see Item 4D - Property, plants and equipment - Principal Properties). Since the Arrangement, the Company has not generated any revenue from operations. Pursuant to the Arrangement, the assets of Glenmore, including properties in Finland, were acquired by Mountain Glen, and are now held by the Company, having been distributed to the Company on the winding up of Mountain Glen. The Haveri Gold Property in Finland was transferred to Northern Lion Gold Corp. in 2004. See "Item 4A - History and development of the Company - Acquisitions and Dispositions".

Government Regulation

The current and anticipated future operations of the Company, including development activities and commencement of production on its properties, require permits from various federal, territorial and local governmental authorities and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development and operation of mine-related facilities generally experience increased costs, and delays in production and other schedules as a result of the need to comply with applicable laws, regulations and permits. The Company's exploration activities and its potential mining and processing operations in Canada are subject to various laws governing land use, the protection of the environment, prospecting, development, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, mine safety and other matters.

In most jurisdictions, mining is regulated by conservation laws and regulations. In the Northwest Territories, the mining industry operates primarily under Canadian federal law because the ownership of water, fisheries, and surface and sub-surface rights to land are vested in the federal government. Accordingly, federal legislation governs prospecting, development, production, environmental protection, exports, and collective bargaining. Matters of a purely local or territorial nature, such as mine safety standards, the establishment of a minimum wage, education and local health services are matters for the Territorial government. With respect to environmental matters, the Company's properties are subject to federal regulation under, inter alia, the Canadian Environmental Protection Act, the Fisheries Act, the Northwest Territories Waters Act, the Arctic Waters Pollution Prevention Act, the Navigable Waters Protection Act, the Mackenzie Valley Resource Management Act and the Mackenzie Valley Land Use Regulations. Territorial environmental legislation may also apply for some purposes. The Mackenzie Valley Land and Water Board established under the federal Mackenzie Valley Resource Management Act has the responsibility to receive and to process applications for water licenses under the Northwest Territories Waters Act in most areas of the Northwest Territories. These licenses outline the volume of water the mine may use, how tailings will be treated, the quality and types of waste that may be deposited into the receiving environment and how the quality and types of waste may be monitored and contain requirements regarding the restoration of the tailings disposal and other affected areas. The Mackenzie Valley Land and Water Board also issues land use permits applicable to most areas of the Northwest Territories under the Mackenzie Valley Land Use Regulations. Such permits govern the manner in which various development activities on federal Crown and other lands may be undertaken. Applicable territorial legislation and regulations include the Apprentice and Trade Certification Regulations, Archaeological Resources Act, Boilers and Pressure Vessels Regulations, Business Licence Fire Regulations, Civil Emergency Measures Act, Environmental Protection Act, Environmental Rights Act, Explosives Use Act, Explosives Regulations, Fire Prevention Act, Fire Prevention Regulations, Labour Standards Act, Mine Health and Safety Act, Mine Health and Safety Regulations, Public Health Act, Research Act, Wildlife Act, and Workers Compensation Act.

The Fisheries Act, Northwest Territories Waters Act, Territorial Lands Act and Regulations, Territorial Quarrying Regulations, Mackenzie Valley Land Use Regulations, Real Property Act, Transportation of Dangerous Goods Act, and the Canada Mining Regulations are federal legislation or regulations. Failure to comply with territorial and/or federal legislation or regulations may result in cease work orders and/or fines.

The Company's operations and exploration activities are also subject to substantial regulation under these laws by governmental agencies. The Company believes it is in substantial compliance with all material laws and regulations which currently apply to its activities. There can be no assurance, however, that all permits which the Company may require for construction of mining facilities and conduct of mining operations will be obtainable on reasonable terms or that such laws and regulations, or that new legislation or modifications to existing legislation, would not have an adverse effect on any exploration, development or mining project which the Company might undertake.

Portions of the Northwest Territories will also be subject to the jurisdiction of the Tlicho Government, a First Nations government which will have certain powers of regulation in respect of "Tlicho Lands" under the "Tlicho Agreement", a land claim agreement entered into between the Tlicho First Nation and the federal and territorial governments.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violation of applicable laws or regulations.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

On October 17, 2007, the Company entered into an agreement with the Government of the Northwest Territories pursuant to which it agreed to make available 10% of its share of the diamonds from the Gahcho Kué Project to the Northwest Territories diamond cutting and polishing facilities.

C. Organizational structure.

See "Item 4 A - History and development of the Company - The Corporate Organization".

D. Property, plants and equipment.

Principal Properties

In this section on "Principal Properties", the reader should note that where disclosures pertaining to mineral resources are made, these are not mineral reserves and do not have demonstrated economic viability. The Company has only one principal property, the AK Property also known as the Gahcho Kué Project, which is located in the Canada's Northwest Territories. The Gahcho Kué Project is in the permitting stage.

A "mineral resource" as defined under the Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards for Mineral Resource and Mineral Reserves (the "CIM Definition Standards"), which are different from the U.S. Securities and Exchange Commission ("SEC") guidelines (the "SEC Guidelines") set forth in Guide 7 under Item 802 of Regulation S-K, means a concentration or occurrence of natural, solid, inorganic or fossilized organic material

in or on the Earth's crust in such form and quantity and of such a grade or quality that it has reasonable prospects for economic extraction. The location, quantity, grade, geological characteristics and continuity of a Mineral Resource are known, estimated or interpreted from specific geological evidence and knowledge. See "Glossary of Technical Terms" in this Report.

A "mineral reserve" as defined under the CIM Standards, which are different from the SEC Guidelines set forth in Guide 7 under Item 802 of Regulation S-K, means the economically mineable part of a Measured Mineral Resource or Indicated Mineral Resource demonstrated by at least a Preliminary Feasibility Study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified. A Mineral Reserve includes diluting materials and allowances for losses that may occur when the material is mined. See "Glossary of Technical Terms" in this Report.

In this Annual Report, because the Company is a Canadian company with mining properties in Canada, the definitions and disclosures are made in accordance with the CIM Definition Standards as required by Canadian law for disclosure of material facts. The CIM Definition Standards differ from those adopted by the SEC in its Industry Guideline No.7. See "Glossary of Technical Terms" in this Report.

It should be noted that the SEC Guidelines define "reserve" to mean "that part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination". See the Mineral Reserves Section, below.

Description of Property

Administrative Offices

The Company's administrative office is located at 401 Bay Street, Suite 2700, PO Box 152, Toronto, Ontario, Canada M5H 2Y4. The Company considers these premises suitable for its current needs.

Mineral Properties

Of the Company's properties, the Gahcho Kué Project is under the most intense work because of the discovery of the Kennady Lake Kimberlite Field, and it is considered to be the Company's principal property.

Amended and Restated Joint Venture Agreement

Under the 2002 Agreement with De Beers Canada previously in effect, the Company was not responsible for funding the Gahcho Kué Project, and De Beers Canada had no recourse to the Company for repayment of funds until, and unless, the Gahcho Kué Project was built, in production, and generating net cash flows.

On July 3, 2009, the Company entered the "2009 Gahcho Kué Joint Venture Agreement" with De Beers Canada (jointly, the "Participants") with respect to the Gahcho Kué Project that replaces the 2002 Agreement entered into by the Participants. Under the 2009 Gahcho Kué Joint Venture Agreement:

1. The Participants' continuing interests in the Gahcho Kué Project will be Mountain Province 49% and De Beers Canada 51%, with Mountain Province's interest no longer subject to the dilution provisions in the 2002 Agreement except for normal dilution provisions which are applicable to both Participants;
2. Each Participant will market their own proportionate share of diamond production in accordance with their participating interest;
3. Each Participant will contribute their proportionate share to the future project development costs;
4. Material strategic and operating decisions will be made by consensus of the Participants as long as each Participant has a participating interest of 40% or more;
5. The Participants agreed that the sunk historic costs to the period ending on December 31, 2008 will be reduced and limited to \$120 million;

6. Mountain Province would repay De Beers Canada \$59 million (representing 49% of an agreed sum of \$120 million) in settlement of the Company's share of the agreed historic sunk costs on the following schedule:
- \$200,000 on execution of the 2009 Gahcho Kué Joint Venture Agreement (Mountain Province's contribution to the 2009 Gahcho Kué Joint Venture expenses to date of execution of the 2009 Gahcho Kué Joint Venture Agreement) (paid);
 - Up to \$5.1 million in respect of De Beers Canada's share of the costs of the feasibility study (paid \$4,128,434 to December 31, 2010, recorded as "sunk cost repayment" in the Company's financial statements);
 - \$10 million upon the completion of a feasibility study with at least a 15% IRR and approval of the necessary development work for a mine (as defined in the 2009 Gahcho Kué Joint Venture Agreement);
 - \$10 million following the issuance of the construction and operating permits;
 - \$10 million following the commencement of commercial production; and
 - The balance within 18 months following commencement of commercial production.

Mountain Province has agreed that the marketing rights provided to the Company in the 2009 Gahcho Kué Joint Venture Agreement will be diluted if the Company defaults on certain of the repayments described above.

Extracts from Technical Report

Unless otherwise stated, the technical information in this section from the sub-headings "Property Setting" to "Economic Analysis - Summary" is based upon Independent Qualified Person's Technical Report dated as of December 1, 2010 (with information effective as of October 15, 2010) (the "2010 Technical Report") entitled "Gahcho Kué Project, Definitive Feasibility Study, NI 43-101 Technical Report, Northwest Territories, Canada" prepared for the Gahcho Kue Joint Venture by JDS Energy and Mining Inc. by:

- Daniel D. Johnson, P.Eng. (JDS)
- Mike Makarenko, P.Eng. (JDS)
- Ken Meikle, P.Eng. (JDS)
- Bob Prince-Wright, P.Eng. (JDS)
- Jarek Jakubec, C.Eng. (SRK (Canada) Consulting Inc.)
- Kevin Jones, P.Eng. (EBA Engineering Consultants Inc.)

The details about the 2010 Technical Report were filed on EDGAR on December 3, 2010 under Form 6K. The full Technical Report was also filed with the relevant Securities Commissions in Canada on the System for Electronic Document Analysis and Retrieval ("SEDAR") on December 3, 2010. Portions of the following information are based on assumptions, qualifications and procedures which are not fully described herein. Reference should be made to the full text of the 2010 Technical Report.

Property Setting

The Gahcho Kué Project is located at the informally-named Kennady Lake, approximately 300 km east-northeast of Yellowknife in the Northwest Territories (NWT), Canada at the approximate latitude 63.26.16N and longitude 109.12.05W (NAD83 Zone 12 coordinates 7035620N, 589735E).

The Gahcho Kué Project is located 150 km south-southeast of the Diavik and Ekati diamond mines operated by Diavik Diamond Mines Inc. (Rio Tinto) and BHP Diamonds Inc. (BHP Billiton) respectively at Lac de Gras, and 80 km east-southeast of the De Beers Canada Snap Lake mine.

The Gahcho Kué Project consists Hearne North and South; 5034 West, Central and North-East; 5034 South Pipe; 5034 North Pipe; Wallace; Dunn Sheet and Tesla diamondiferous kimberlite pipes, sheets and dykes. Except for the northernmost part of 5034, the main kimberlite pipes all lie beneath Kennady Lake.

There are myriad lakes in the area. Kennady Lake, under which the kimberlite pipes lie, is a local headwater lake with a minimal catchment area, very pure water, and relatively low potential for aquatic life.

Physiography

The Gahcho Kué Project lies on the edge of the continuous permafrost zone in an area known as the “barren lands”, which are characterized by heath and tundra, with occasional knolls, bedrock outcrops, and localized surface depressions interspersed with lakes. Thin, discontinuous covers of organic and mineral soil and glacial till deposits overlie bedrock, which occurs typically within a few metres of surface. Some small stands of stunted spruce occur in the area.

Fauna includes red fox, arctic fox, sic sic, grizzly bear, wolf and caribou (during annual migration), ptarmigan, abundant migratory bird life in summer, and clouds of mosquitoes and black flies during the height of the summer months (mid-June to mid-August).

Vegetation in the area is characteristic of low arctic tundra. Shrubs of willow and birch occur in drainages, and in some areas may reach over 2 m in height. Heath tundra covers most upland areas. Conifer stands occur in patchy distribution north of the tree line in lowland, sheltered areas, and riparian habitats, and are found as far north as Kirk Lake.

Topographic elevations within the property range between 400 meters above sea level (“masl”) to 450 masl.

Accessibility

The Gahcho Kué Project occurs at the informally-named Kennady Lake, 20 km north of tree line with no permanent road access. Access to the Gahcho Kué Project is by float-equipped planes during summer months and ski- or wheel-equipped planes in winter. During winter, larger aircraft such as the Dash-7 and Super Hercules L100 Transport can operate from an artificially-thickened ice landing strip on Kennady Lake.

Helicopter pads are located within the base camp to support drilling and logistical operations. During the short ‘shoulder seasons’, access to the property is via a 1,000 ft long runway established on an esker at Kirk Lake Camp located approximately 26 km north of the Gahcho Kué Project; passengers and supplies are transferred to the site by helicopter.

During winter, a permitted 120 km winter ice road connecting the Gahcho Kué Project with the main Tibbitt Lake to Contwoyto Lake winter road is built, if required. The winter ice road supports shipment of fuel, heavy equipment, construction materials and bulk samples. The main winter ice road connects Yellowknife to the Snap Lake, Ekati, and Diavik mines from February to April each year to the extent that weather allows. The road is operated under a Licence of Occupation by the Joint Venture Partners who operate the Ekati (BHP Billiton), Snap Lake (De Beers Canada) and Diavik (Rio Tinto) mines.

Climate

As the Gahcho Kué Project is located 230 km south of the Arctic Circle, the climate is extreme and semi-arid. Temperatures range from -45°C to +25°C over a twelve-month period. Winter normally lasts from November to May

and has average temperatures of about -20°C. Summer temperatures prevail from early July to mid-September, and average about 18°C. Freeze-up and ice break-up occur in November and June, respectively. Activities are possible on-site year-round.

Daylight hours range from near zero in mid winter (Winter Solstice) to effectively 24 hours (Summer Solstice). The spring and fall equinox occur in March and September respectively, marking the period when length of daylight and darkness are equal.

Infrastructure

Camp – A 124-person exploration camp was erected on the shore of Kennady Lake near the southeast edge of the postulated future limits of the 5034 pit. Living quarters are a mixture of four-person soft-shell cabins and skid-mounted dorm units, clustered with other detached buildings, including kitchen and dining room; recreation building; office building; core storage; men’s and women’s dry; waterless toilet system; fuel storage; shops; and warehouses. The camp is currently on care-and-maintenance.

Transport – Regular shipments of consumables and materials can occur over an annual winter road and, for year-round access and deliveries, by aircraft.

Power – There is currently no local electrical grid or power plant for power supply to site. Power generation for any planned mining operation is likely to be produced by an on-site diesel generation plant.

Communications – Current site communications comprise a satellite phone and internet connection.

Water – Process water for any planned mining operation may be obtained from open-pit water collection, recycling of process water, water management ponds and from re-treatment of water from waste piles. Hydrogeological studies are required to confirm whether there is adequate process water from these sources. Kennady Lake is the current source of potable water.

Tenure History

The Gahcho Kué Project was part of a larger group of mining claims, known as the AK Property, which currently consists of four remaining mining leases. The AK Property was initially staked in 1992 by Inukshuk Capital Corp., and optioned to Mountain Province Mining, Inc. (now Mountain Province Diamonds Inc.) later the same year.

On staking, the AK Property covered about 520,000 ha, and included the AK and CJ claims. The CJ claims substantially lapsed in November 2001, and the remaining CJ claims lapsed on August 17, 2002, leaving only the AK claims as current.

Additional partners in the AK Property included Camphor Ventures Inc. (“Camphor Ventures”), and 444965 B.C. Ltd, a subsidiary company of Glenmore Highlands Inc. (“Glenmore Highlands”). At the time, Glenmore Highlands was a controlling shareholder of Mountain Province Mining Inc. as defined under the Securities Act of British Columbia. The Glenmore Highlands subsidiary amalgamated with MPV in 1997, and Camphor Venture’s interest in the AK Property was acquired by MPV during 2007.

In 1997, Monopros (now De Beers Canada) joint ventured the property.

Mineral Tenure

The Gahcho Kué Project comprises four mining leases, 4199, 4341, 4200, and 4201, covering a total area of 10,353 hectares. The mining leases are 100% owned by De Beers Canada who holds them on behalf of the Gahcho Kué Joint Venture. The participating interest of each of Gahcho Kué joint venture party is governed by the 2009 Gahcho Kué Joint Venture Agreement, which supersedes the (2002) Gahcho Kué Joint Venture Agreement. The (2002) Gahcho Kué Joint Venture Agreement is registered against the mineral leases. The 2009 Gahcho Kué Joint Venture Agreement provides for De Beers Canada’s participating interest to be 51% and MPV’s interest (including Camphor’s) to be 49% of the Gahcho Kué Project.

Annual lease payments, payable to the Receiver General Canada (Northwest Territories, c/o Mining Recorders Office), comprise \$1.00 per acre for the duration of the 21-year lease period (note that fees are payable on acres, not hectares, in the Northwest Territories and Nunavut). Payments increase to \$2.00 per acre if a second 21-year term is granted after application to the Northwest Territories Mining Recorder for the extension. Payments for the leases for 2007 totalled \$10,353, and a similar amount is expected for each succeeding year. All mining leases were legally surveyed by licensed surveyors.

Agreements

The Letter Agreement, dated March 6, 1997, was entered into between Monopros Ltd. (a wholly-owned Canadian subsidiary of De Beers Consolidated Mines and now known as De Beers Canada), MPV, and Camphor Ventures. The parties amended the Monopros Ltd. Joint Venture Agreement in 2000, as a result of agreements reached at a meeting on March 8, 2000.

The Gahcho Kué Joint Venture Agreement became effective on January 1, 2002, was signed October 24, 2002. This 2002 Agreement provided that De Beers Canada could earn up to a 55% interest in the Gahcho Kué Project by funding and completing a positive definitive feasibility study. The 2002 Agreement also provided that De Beers Canada could earn up to a 60% interest in the Gahcho Kué Project by funding development and construction of a commercial-scale mine.

MPV acquired Camphor Ventures' interest in the joint venture in 2007.

An updated and amended joint venture agreement between De Beers Canada and MPV was executed effective July 3, 2009. The 2009 Gahcho Kué Joint Venture Agreement superseded the previous joint venture agreements. The 2009 Gahcho Kué Joint Venture Agreement maintains the Gahcho Kué Project ownership at 51% De Beers Canada and 49% MPV. Each party is responsible for funding their respective share of the Gahcho Kué Project development costs from January 1, 2009 onward, and each party shall receive a proportional share of the diamond production.

The 2009 Gahcho Kué Joint Venture Agreement also sets forth the amount of "allowable" expenses of exploration work between March 8, 2000 and December 31, 2008 previously funded by De Beers Canada, and sets forth a repayment schedule by MPV to De Beers Canada for their 49% share of the allowable expenses. The repayment schedule is triggered by milestone events with the final payment required to be made 15 months after the start of commercial production.

Permits

Exploration Programs

Exploration programs to date were conducted under the permits obtained from the appropriate authority, including:

- Indian and Northern Affairs Canada – Class A Land Use Permit
- Indian and Northern Affairs Canada – Type B Water Licence
- Workers' Compensation Board (WCB), Mine Health and Safety – Drilling Authorization
 - Indian and Northern Affairs Canada – Quarry Permit
- Indian and Northern Affairs Canada – Registration of Fuel Storage Tanks

- Prince of Wales Northern Heritage Centre – Archaeology.

Future Development

The Gahcho Kué Project is being reviewed and permitted under the Mackenzie Valley Resource Management Act. A list of the permits that may be required for Gahcho Kué Project development is presented in the 2010 Technical Report.

Previous Work

There is no recorded exploration prior to 1992 for diamonds, base, or precious metals in the area covered by the Gahcho Kué Project. Exploration conducted on behalf of MPV by Canamera Geological Ltd. during 1995 resulted in the discovery of the 5034 kimberlite.

De Beers Canada became the operator of the property via a joint-venture agreement in 1997. Additional kimberlites, including Tesla, Hearne, and Tuzo were discovered the same year. Tesla, Tuzo, Hearne and 5034 form the main Gahcho Kué kimberlite cluster.

Summary of Exploration and Development Work Undertaken

Exploration and development work undertaken during 1997–2008 included:

- sediment sampling, including glacial till, sediment and outcrop sampling
- geological mapping
- airborne electromagnetic and ground geophysical surveys
- core drilling, including large diameter core mini-bulk sampling
- reverse circulation drilling, including mini-bulk and bulk sampling programs utilizing reverse-flood air-lift assist large diameter drill rigs
- geotechnical, hydrogeology, and civil engineering drilling
- micro- and macro-diamond sample processing and analysis
- diamond valuation and diamond breakage analysis
- bulk density determinations
- ore dressing studies
- construction of geological and micro-diamond grade models and Mineral Resource block models
- construction of density, geotechnical, and volume models
- conceptual mine plans
- conceptual process plant design.

A first-time Mineral Resource estimate was completed in 2003 to support a conceptual desktop study of the potential of these pipes. The study included Inferred Mineral Resources, considered too speculative geologically to have economic considerations applied to them. The study evaluated a conceptual open pit mining operation, using conventional truck and shovel equipment. A diamond recovery plant with a diamond recovery efficiency of not less than 98% by weight of free diamonds larger than the bottom cut-off size of 1.5 mm was designed, using established De Beers' diamond value management principles. The study indicated that the net present value and internal rate of return were likely to be positive and supported continuing exploration and evaluation work.

The 2009 Technical Report supersedes the 2003 mineral resource estimate. The new information was a combination of additional diamond and geotechnical drilling completed since 2003, conceptual open pit and underground design work, supplementary metallurgical testing and optimization studies.

From 2003 to 2008, a number of additional desktop studies were completed that consider aspects of conceptual mining studies. These have comprised conceptual mining and processing considerations, evaluation of different potential input factors and assumptions, and alternatives to and variations and iterations within such plans, including:

- changes to Mineral Resource estimation methodologies and strategies
 - changes to dilution and reconciliation strategies
 - changes to diamond prices
- changes in allocations of planned drilling, or drilling locations
 - changes to deposit sequencing
 - changes to production rates
- changes in mining equipment strategies
- alternate pit configurations, including laybacks or pit wall slope changes
 - changes to geotechnical or hydrological assumptions
 - changes in short-term production
- proposed mill design throughput reviews and potential mill modifications
 - process flowsheet development and flowsheet modifications
 - stockpile throughput, allocations, and planned depletion rates
 - review of different cash flow scenarios
- changes to allocations of capital expenditures to different years within conceptual mine plans
- modifications to sustaining capital and operating cost assumptions within conceptual mine plans
 - changes to accounting and taxation assumptions in conceptual mine plans.

None of the above desktop studies completed provided for a sufficiently economic robust project.

Between August 2009 and November 2010, JDS was engaged to provide a feasibility study that outlined a sufficiently robust mine development plan. On October 15, 2010, JDS delivered the Definitive Feasibility Study report to the Gahcho Kué Joint Venture from which a detailed summary is provided in the December 1, 2010 Technical Report. The 2010 Technical Report outlined a plan that exceeds the hurdle rate required by the 2009 Gahcho Kué Joint Venture Agreement to proceed with mine development.

Geology

This excerpt from the 2010 Technical Report was taken from the 2009 Technical Report. JDS reviewed the 2009 Technical Report and believes the information contained in this section to be accurate.

The Gahcho Kué kimberlite cluster occurs in the southeast Slave Craton.

Several kimberlite bodies were discovered and delineated by drilling. The 5034, Hearne North, Hearne South, and Tuzo pipes have the most attractive grades and tonnages delineated to date. Of the larger kimberlites on the property, the 5034 kimberlite is interpreted as forming an irregular hypabyssal root zone, Hearne and Tesla as transitional diatreme to root zones and Tuzo as the deeper part of a diatreme zone (Tesla is not included in the Gahcho Kué Mineral Resource because of its small size (0.4 ha) and relatively low-grade).

The 5034, Hearne, and Tuzo kimberlites have contrasting pipe shapes. The West Lobe, Centre Lobe, and eastern portion of the North-East Lobe of the 5034 kimberlite sub-crop below lake-bottom sediments; the northern portion of the 5034 North-East Lobe (referred to as the North Lobe) is a blind lobe overlain by approximately 80 m of in-situ country rock. The 5034 pipe is dominantly infilled with hypabyssal kimberlite (“HK”). Hearne South is a roughly circular pipe and smaller than Hearne North, which is a narrow elongated pipe. Hearne South is infilled predominantly with tuffisitic kimberlite breccia (“TK”); Hearne North is infilled with approximately equal amounts of HK and TK. Tuzo is characterized by smooth, steep-sided pipe walls and is predominantly infilled with TK with HK

at depth.

23

In most cases, the top of the kimberlites occur between 380 and 390 masl.. Except for the 5034 North Lobe, which intrudes 70 to 80 m below a peninsula, the kimberlites subcrop at the bottom of Kennady Lake, covered by 10 to 15 m of water and between 5 to 15 m of glacial lake sediments. The kimberlites are surrounded laterally by granite and granite-gneiss country rock.

In the 2009 Technical Report, AMEC Americas Limited determined that the geological understanding of the deposit setting, lithologies, and kimberlite type distributions was adequate to support Mineral Resource estimation. Understanding of diamond distributions within each kimberlite type, as well as the style of mineralization were sufficient to support Mineral Resource estimation.

Drilling and Sampling

Drilling completed to date on and surrounding the Gahcho Kué kimberlite cluster totals 504 drill holes (96,493 meters). An additional 50 drill holes were completed on exploration targets located away from the Gahcho Kué cluster. Core holes included PQ (985 mm), HQ (63.5 mm) and NQ (47.6 mm) core sizes, and 76 mm tricone drilling for overburden. RC drill diameters included 140 mm, 149 mm, 324 mm, 334 mm and 610 mm sizes.

Exploration drilling programs were performed during 1995-2003 around the Gahcho Kué kimberlite cluster to test geophysical anomalies, discover kimberlites, define pipe boundaries and morphology, delineate internal geology and provide large diameter reverse circulation (“RC”) drill (“LDD”) mini-bulk samples for value and grade evaluation purposes.

Drilling between 2004 and 2008 comprised LDD and large diameter core (“LDC”) mini-bulk sample, programs, core drilling to provide information to support advanced evaluation geology, Mineral Resource estimation and ore dressing studies, civil engineering, geotechnical, hydrological, and geothermal core drilling programs. These drill programs also provided core that was used to inform and support environmental baseline studies.

5034

Canamera Geological Ltd. (“Canamera”) conducted the earliest drilling and discovered the 5034 kimberlite. Drilling in 1995 included 39 delineation NQ core holes (6,522 m). Since then, small-diameter NQ core drilling was used extensively to test kimberlite indicator mineral trains and geophysical anomalies in addition to delineation of the 5034 kimberlite.

Large diameter core drilling was used to collect small mini-bulk samples from 5034. In 1996, Canamera obtained PQ-sized core samples (85 mm diameter), and in 2007, the Gahcho Kué Project obtained 149 mm diameter LDC samples. The LDC samples provide additional information (macro-diamonds) regarding the diamond content of the pipes.

Large diameter reverse circulation drilling was used to collect kimberlite mini-bulk samples. LDD programs have included smaller scale 140 mm (5.5-inch) diameter drillholes in 1998, 311 mm (12.25-inch) drill holes in 1999, to the largest employed, the 610 mm (24-inch) diameter drill holes in the 2001, 2002, and 2008 mini-bulk sampling programs. The LDD mini-bulk sample programs obtained macro-diamonds for grade and revenue estimation.

The 1998 and 1999 drilling focused on the 5034 West, Centre and East lobes; in 2001 the East Lobe and the west neck of the Centre Lobe were drilled; in 2002 work focused on the narrow corridor drilled previously in 1999 through the West and Centre lobes. There was one delineation NQ core hole drilled by Gahcho Kué Joint Venture at 5034 in 2003.

In 2004, 13 core holes drilled into the 5034 kimberlite as part of pit geotechnical, hydrogeology, and ore dressing studies (“ODS”). In 2005, a single core hole for hydrogeology studies drilled through the East Lobe of 5034, and two core holes were drilled at the North Lobe of 5034 to provide additional geological data. A substantial core program followed this in 2006 that comprised 13 HQ core holes for pit geotechnical, pipe volume delineation, and geological investigations. The last campaign of core drilling was conducted in 2007 with five HQ core holes being drilled to provide geological data from the 5034 East Lobe and 5 LDC holes (149 mm, 5.875-inch) drilled into the 5034 North Lobe to obtain a small parcel of macro-diamonds for comparative purposes.

Hearne

A total of 24 core holes were drilled in and around the Hearne kimberlite during 1997-2003 for delineation. In 1998, 19 LDD holes (140 mm diameter) were drilled into the Hearne kimberlite to test the diamond grade.

In 1999, 10 LDD (311 mm diameter) holes were drilled into Hearne to obtain macro-diamonds for initial revenue estimation. In 2001, 5 LDD (610 mm diameter) holes were drilled into Hearne North, and 6 more LDD (610 mm diameter) holes tested in 2002, to increase the parcel of macro-diamonds available for revenue estimation.

In 2004, 14 NQ core holes were drilled into the Hearne kimberlite as part of pit geotechnical and ODS programs. In 2005 a single core hole was drilled for hydrogeological studies, and in 2006 a single core hole was drilled to support pit geotechnical studies.

Tuzo

Between 1997 and 1999, 7 NQ and 3 NQ3 core holes were drilled into Tuzo. All of these were angle holes collared outside the kimberlite body and drilled into, and sometimes through, the kimberlite. In 2002, 7 vertical HQ core holes were drilled into the pipe. LDD mini-bulk sample drilling took place in 1998 and 1999. Drilling to a maximum depth of 166 m, 18 LDD holes (140 mm diameter) were completed in 1998, and an additional 11 LDD holes (311 mm diameter) were completed in 1999 to a maximum depth of 300 m.

In 2004, 2 HQ core holes were drilled at Tuzo as part of a pit geotechnical study. This was followed by a 16-hole HQ core program in 2006 to provide pipe delineation and geological data and pilot holes. Two 610 mm holes were drilled in 2006 to provide samples. In 2007, a grid of 27 HQ core holes was completed to provide additional geological and pipe volume delineation data. The final resource drilling at Tuzo was an LDD mini-bulk sample program conducted in 2008 with 9 holes (610 mm) completed to provide additional macro-diamonds for diamond revenue estimation.

AMEC's Assessment

This excerpt from the 2010 Technical Report was taken from the 2009 Technical Report. JDS reviewed the 2009 Technical Report and believes the information contained in this section to be accurate.

AMEC assessed the exploration results to be appropriate to the style of mineralization and adequate to support Mineral Resource estimation. Drill hole types and orientations were appropriate for the type of mineralization. Small-diameter core holes defined the limits of the kimberlite bodies. Large-diameter core and reverse circulation drilling provided mini-bulk samples of kimberlite material for macro-diamond extraction. Micro-diamonds extracted from the small-diameter cores drilled to define the limits of the deposit. Three diamond breakage studies indicated that breakage was about 10–15% that is typical for this type of drilling program. The diamond parcels obtained in 2007–2008 were not evaluated for diamond breakage.

AMEC also assessed that the sampling and sample lengths were appropriate for the type of mineralization. Core sample lengths were somewhat variable during the early years of the Gahcho Kué Project. Later in the Gahcho Kué Project, core sample lengths were standardized at 12 m. These standardized samples provided most of the data used for the Mineral Resource estimates reported in the 2009 Technical Report.

Core and cuttings logging met and typically significantly exceeded industry practices. Core was quick-logged on site, and the kimberlite intersections were transported to De Beers' core logging facility in Sudbury, Ontario where experienced geologists log kimberlite type, mineral and inclusion types and concentrations, and structures. AMEC assessed that geotechnical work to date was appropriate for the stage of the Gahcho Kué Project and type of mining planned. Geotechnical logging of exploration core is a routine procedure performed by geologists trained in the logging methods required. A number of core holes were drilled specifically to obtain geotechnical data. Collar and downhole surveys were performed using industry-standard methods and instruments.

AMEC determined that the analytical and diamond recovery procedures were adequate to support Mineral Resource estimation. Macro-diamond and micro-diamond extractions were performed using procedures standard to the industry. Micro-diamonds were recovered from core using either caustic fusion or acid dissolution procedures. Both are standard to the industry, although caustic fusion is the most common procedure. Macro-diamonds are extracted using small-scale diamond recovery plants. Geochemical samples were analyzed using standard procedures and instrumentation. Density determinations were performed using standard procedures, and the number of density data is adequate to support Mineral Resource estimation. Most of the density data were obtained using a water immersion procedure standard to the industry. Some of the data were obtained using geophysical methods, and some were obtained by water displacement methods. Quality control during drilling, sampling, and sample analysis is adequate and reflects industry best practices. Quality control of diamond extractions consists of spikes using marked diamonds and tailings audits of a portion of the samples.

Sample and diamond security throughout the exploration process was determined by AMEC to be excellent and consisted of rigorous chain-of-custody procedures, multiple locks requiring at least two persons to open critical areas or containers, cameras in all plants and processing areas, and dedicated security personnel at all plants and processing areas. Shipping of diamonds and diamond concentrates conforms to requirements of Kimberley Process chain-of-custody procedures.

Geological Setting

This excerpt from the 2010 Technical Report was taken from the 2009 Technical Report. JDS reviewed the 2009 Technical Report and believes the information contained in this section to be accurate.

Gahcho Kué Kimberlites

The main Gahcho Kué kimberlite cluster comprises four pipes; the Hearne, 5034, Tuzo, and Tesla bodies. The Hearne Pipe, most of the 5034 Pipe, and the Tuzo and Tesla pipes occur under Kennady Lake, which has an average depth of 8 m.

Gahcho Kué kimberlites are overlain by varying thickness of glacial boulder outwash and lake sediments (averaging 10 m thick), and have a combined water and sediment cover as much as 25 m thick.

Hearne Kimberlite

Two bodies comprise the Hearne kimberlite, Hearne South and Hearne North. The bodies have smooth, steep-sided walls, and cover an area of about 1.5 ha. Hearne South is a roughly circular pipe, whereas Hearne North is a narrow, elongate pipe trending north-south. The pipes may join at depth. The width of country rock between the two bodies varies from a minimum of approximately 20 m at the sub-crop to approximately 70 m at depth. Hearne North

measures a maximum of 250 m x 50 m north–south. Hearne South has a dimension of about 80 m x 90 m at surface.

The present pipe geological model for Hearne South extends to 225 masl; there is no drill information below this level. At Hearne North, the pipe narrows to less than 10 m wide in the centre of the body at approximately 130 m below lake-surface. There is also evidence at the north and south ends of the body that the pipe extends below 115 masl.

The distance from the south end of Hearne to Tuzo is about 2 km.

5034 Kimberlite

The 5034 kimberlite is a highly irregularly-shaped pipe and dyke complex, which is comparable to kimberlite root zones elsewhere and has a surface area of approximately 2.1 ha (West, Centre and East Lobe).

The 5034 kimberlite is modelled as a semi-continuous occurrence composed of five discrete kimberlite bodies, three of which are modelled as joined at the subcrop to form one main continuous body, with two small outlying satellite pipes.

The five modelled kimberlite bodies are referred to as follows:

- 5034 South Pipe (that occurs along an interpreted dyke, the “Southwest Corridor”, that is also modelled incorporating the Wallace and Tuffisitic Kimberlite BBB drill core intersections)

The main part of the 5034 occurrence that reaches the surface occurs under Kennady Lake and can be divided into three lobes: West, Centre, and East. These three lobes are joined at the surface, but separate at depth. The Centre and East lobes are modelled separately at shallow depth, but rejoin at greater depth producing what appears to be a window of granite within the kimberlite. The East and North lobes are joined at depth, geologically continuous, and are collectively referred to as the North-East Lobe. The surface measurements of the three lobes of the 5034 Main Pipe are approximately as follows:

- West Lobe – 125 m x 45 m
- Centre Lobe – 125 m x 80 m
- East Lobe – 85 m x 65 m.

The northern portion of the 5034 North-East lobe, the North Lobe, is blind, and occurs under 60 m to 90 m of country rock cap. Approximately half of this northern lobe lies below the lake bed and half beneath the main peninsula. The blind northern portion of the 5034 North-East Lobe measures 240 m long and varies from approximately 20 to 50 m wide, averaging 30 m wide. A combined internal geology model is developed for the 5034 North-East Lobes. There are four major kimberlite types, three of which occur across both lobes.

Tuzo Kimberlite

The overall surface area of the Tuzo Pipe is about 1.2 ha, which is covered by as much as 25 m of water of and glacial overburden. The kimberlite body comprises various fragmental and coherent kimberlites, and it contains abundant inclusions of the surrounding granitic country rock. The 2007 drill program improved the definition of the shape of the pipe, which is unusual as it widens towards depth from 125 m in diameter near the surface to about 225 m diameter at 300 m depth. Tuzo geology model commences about 25 m below lake level (lake level 420.9 masl) to 354 m below lake level (66.9 masl).

All bodies remain open at depth.

Data Verification

Independent data verifications were undertaken on a number of occasions between 1999 and 2008:

- 1999, 2004, 2007 – independent consultants made site visits to review quality assurance/quality control (“QA/QC”)
 - 1999 – external consultant audit of the 1999 evaluation program
 - 2000 – geology (petrological) peer review
- 2004 – geotechnical and hydrogeology consultants QA/QC site visit, internal and external Mineral Resource evaluation data base audits, geology (petrological) peer review, Gemcom® three-dimensional (“3D”) model peer review
- 2007 – internal and external petrological peer reviews; external verification of macro-diamond resource evaluation data set
 - 2008 – external review of 2003 Technical Report resource estimation and density (rock density) models.

Resource evaluation data base verification included:

- audits of drill collar locations and lengths
- down-hole survey data
- geological logs
- bulk density data
- macro-diamond data.

Diamond Valuations

The Qualified Persons are not able to apply quality control measures to the valuation process performed by either De Beers or WWW.

The reason for this is that diamond valuation is, at best, only partially analytical (in the way that a gold assay process can be termed analytical), as the diamonds are sieved and subjectively classified by colour, clarity, and other factors. The dollar per carat determinations for various stones, however, is ultimately governed by the valuator’s price-book. This part of the process is proprietary, governed by a given valuator’s view of the marketplace and can vary from valuator to valuator, particularly for larger stones. Even in larger parcels, valuers must then ‘model’ or extrapolate values in the larger stone size classes where there may be few representatives. The methodology for modelling is also proprietary.

These diamond valuation procedures do not lend themselves to quality control measures that a qualified person could apply as with a commercial assay laboratory. At every step, the QPs are relying on the valuator’s opinions of the diamond market and their subjective view of diamond values.

The Qualified Persons also rely on the valuers models which are heavily dependent on their view of the diamond market, their proprietary estimates of the likelihood of finding larger stones in the deposit because of sample-size support, and the perceived value of those larger stones.

The culmination of the process is the average prices for given zones, lobes or pipes. The heavy dependence of the process on economic market assessments, and the proprietary nature of the valuers’ assumptions and methods, materially affects the quality of, and confidence in, the Mineral Resource estimate. In this way, the valuations used in the Mineral Resource assessments are markedly different than the concept of analytical mineral assays in, for instance, a precious metal project. The proprietary nature of the processes employed for valuations limit any quantitative assessment of the added risk to the Gahcho Kué Project. Other than reviewing the De Beers Canada data and the WWW report for transcription errors in the transfer of the valuation figures into the database, no other data verification procedures can be applied.

Diamond valuers are experts, but not Qualified Persons, and the Qualified Persons preparing the Mineral Resource estimates and assessing the reasonable prospects for economic extraction have had to completely rely on the De Beers Canada and WWW diamond values provided.

Mineral Resource and Mineral Reserve Estimates

Mineral Resource Summary

This Mineral Resource Summary excerpt and summary from the 2010 Technical Report was taken from the 2009 Technical Report. JDS reviewed the 2009 Technical Report and believes the information contained in this section to be accurate.

Cautionary Note to U.S. Investors concerning estimates of Indicated and Inferred Resources. This section uses the terms "indicated" and "inferred resources." We advise U.S. investors that while those terms are recognized and required by Canadian regulations, the SEC does not recognize them. "Inferred resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases.

U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

U.S. investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally minable.

The estimation and classification of the mineral resources was completed by AMEC and are summarized in Table 1.

Table 1

Resource	Classification	Volume (Mm ³)	Tonnes (Mt)	Carats (Mct)	Grade (cpht)
5034	Indicated	5.1	12.7	23.9	188
	Inferred	0.3	0.8	1.2	150
Hearne	Indicated	2.3	5.3	11.9	223
	Inferred	0.7	1.6	2.9	180
Tuzo	Indicated	5.1	12.2	14.8	121
	Inferred	1.5	3.5	6.2	175
Summary	Indicated	12.4	30.2	50.5	167
	Inferred	2.5	6.0	10.3	173

Notes:

- 1) Mineral Resources are reported at a bottom cut-off of 1.0 mm; cpht = carats per hundred tonnes.
- 2) Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability
- 3) Volume, tonnes, and carats are rounded to the nearest 100,000
- 4) Tuzo volumes and tonnes exclude 0.6 Mt of a granite raft
- 5) Diamond price assumptions used to assess reasonable prospects of economic extraction reflect mid-2008 pricebooks with a 20% increase factor. The prices assumed, on a per pipe basis (in US\$), equate to \$113/ct for 5034, \$76/ct for Hearne and \$70/ct for Tuzo.

Mineral Reserves

Cautionary Note for U.S. Investors

The United States Securities and Exchange Commission, Industry Guide 7, defines the following with respect to mining operations:

Reserves. That part of a mineral deposit which could be economically and legally extracted or produced at the time of reserve determination.

Proven (Measured) Reserves. Reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes; grade and/or quality are computed from the results of detailed sampling and (b) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that size, shape, depth and mineral content of reserves is well-established.

Probable (Indicated) Reserves. Reserves for which quantity and grade and/or quality are computed from information similar to that used for proved (measured) reserves, but the sites for inspection, sampling, and measurements are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven (measured) reserves, is high enough to assume continuity between points of observation.

In Canada, a Mineral Reserve is the economically mineable part of a Measured or Indicated Mineral Resource demonstrated by at least a Preliminary Feasibility Study. This Feasibility Study includes adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified.

Mineral Reserves are those parts of Mineral Resources which, after the application of all mining factors, result in an estimated tonnage and grade which is the basis of an economically viable project. The project must take account of all relevant processing, metallurgical, economic, marketing, legal, environmental, socioeconomic and governmental factors. Mineral Reserves are inclusive of diluting material that will be mined in conjunction with the Mineral Reserves and delivered to the treatment plant or equivalent facility. The term 'Mineral Reserve' need not necessarily signify that extraction facilities are in place or operative or that all governmental approvals have been received. It does signify that there are reasonable expectations of such approvals.

Mineral Reserves are subdivided in order of increasing confidence into Probable Mineral Reserves and Proven Mineral Reserves. A Probable Mineral Reserve has a lower level of confidence than a Proven Mineral Reserve.

The reserve classifications used in this report conform to the Canadian Institute of Mining, Metallurgy and Petroleum (CIM) classification of National Instrument 43-101 ("NI 43-101") resource and reserve definitions and Companion Policy 43-101CP and are listed below.

A 'Proven Mineral Reserve' is the economically mineable part of a Measured Mineral Resource demonstrated by at least a Preliminary Feasibility Study. This Study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified. Application of the Proven Mineral Reserve category implies that the Qualified Person has the highest degree of confidence in the estimate with the consequent expectation in the minds of the readers of the report. The term should be restricted to that part of the deposit where production planning is taking place and for which any variation in the estimate would not significantly affect potential economic viability.

A 'Probable Mineral Reserve' is the economically mineable part of an Indicated Mineral Resource, and in some circumstances a Measured Mineral Resource, demonstrated by at least a Preliminary Feasibility Study. The study must include adequate information on mining, processing, metallurgical, economic, and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.

The information that follows is excerpted from the 2010 Technical Report as prepared by JDS.

Open Pit Mineral Reserves

The detailed pit designs determined the mineral reserve estimate for each pipe as summarized in Table 2. A mining recovery of 100% was used in mine design and planning to determine the mineral reserve estimate. The full mining recovery reflects 1.5 m of waste dilution being added to the circumference of the kimberlite pipes. Therefore, mining ore recovery is 100% because the plan mines an additional 1.5 m of material past the ore contact around the pipe on every bench.

Table 2

Pipe	Classification	Tonnes (Mt)	Carats (Mct)	Grade (cpt)
5034	Probable	13.2	23.3	1.77
Hearne	Probable	5.4	11.5	2.10
Tuzo	Probable	12.6	14.2	1.13
Total	Probable	31.3	49.0	1.57

The Mineral reserves identified in Table 2 comply with CIM definitions and standards for an NI 43-101 Feasibility Study. Detailed information on mining, processing, metallurgical, and other relevant factors are contained in the followings sections of this report and demonstrate, at the time of this report, that economic extraction is justified.

The economic viability of the Gahcho Kué Project is presented in the economic analysis section of the full 2010 Technical Report, and confirms the probable reserve estimates meet and comply with CIM definitions and NI 43-101 standards. At the time of this report, and currently, the Gahcho Kué Project is economically viable using current diamond prices and, JDS believes, prevailing long-term price estimates.

The 2010 Technical Report did not identify any mining, metallurgical, infrastructure or other relevant factors that may materially affect the estimates of the mineral reserves or potential production.

Data Interpretation

The Qualified Persons, as authors of the 2010 Technical Report, have reviewed the data for the Gahcho Kué Project and are of the opinion that:

- Mining tenure held by De Beers Canada on behalf of the Gahcho Kué Joint Venture is valid and sufficient to support Mineral Reserves and plans for mine development. The Gahcho Kué Joint Venture has taken appropriate steps to insure extension of the leases which will remain valid for several years. Surface rights have not, as yet, been acquired but this is not viewed by JDS as a significant obstacle to further development of the Gahcho Kué Project. Those rights can be obtained by application to the Crown and are part of the normal permitting processes.

- At this time, all permits required for ongoing exploration are in force. Permits required for construction and operation were identified and the process for obtaining those permits defined.
- The 2009 Technical Report which provided Mineral Resource estimations and resources models suitable for feasibility project work were completed to acceptable standards.
- Metallurgical testwork is appropriate for the stage of the Gahcho Kué Project and is adequate to support Mineral Reserve estimation, Gahcho Kué Project feasibility, and economic analysis.
- Estimates of Mineral Reserves conform to industry-standard practices. Mine plans, dilution and economic parameters applied to resource estimates have been prepared to industry standard practices.
- Pit slope stability analysis work has been done to industry standards and conclusions are supported by practices at similar sized operations in the area.
 - Mineral reserves support a 3M tonne per year operation with a mine life of 11 years.
 - Mine plans use traditional open pit mining utilizing proven equipment.
 - Process plant design has been adequately defined for cost estimating purposes.
 - Mine infrastructure has been adequately designed and estimated in the feasibility study.
 - Sound environmental management plans have been developed for the feasibility study.
 - Progressive reclamation plans are included in the feasibility study.
 - Mine closure plans have been developed.
- The Gahcho Kué Project is sufficiently robust for proceeding into a staged development program commencing with environmental permitting and detail design phases as precursors for mine construction and operations.

Feasibility Study Conclusions

The 2010 Technical Report represents an economically viable, technically credible and environmentally sound development plan for the Gahcho Kué Project. (All amounts, unless otherwise indicated, are in Canadian dollars.)

The Gahcho Kué Project is economically viable, generating \$4,143 million in realized value (“RV”) revenues over an 11-year mine life resulting in a 20.7% internal rate of return (“IRR”) (including agreed historic “sunk” costs) and a \$136 million net present value (“NPV”) at 15%. Excluding sunk costs, the Gahcho Kué Project yields a 33.9% IRR and a \$277 million NPV. Diamond values averaged US\$74.52 per carat over the life of the mine. Total life-of-mine capital costs are estimated at \$776.5 million consisting of \$141.5 million in sunk costs; \$549.5 million initial capital; \$49.4 million working capital; and \$36.1 million in sustaining and closure costs. Total life-of-mine pre-tax cash operating costs are estimated at \$1,522 million, which equates to \$48.68 per tonne processed or \$31.04 per carat recovered.

The Gahcho Kué Project is technically credible, utilizing designs and practices that are proven in the Canadian diamond industry. The Gahcho Kué Project design is based on open pit mining of the 5034, Hearne and Tuzo deposits in a sequential fashion. Mine plans call for the extraction of 234 metric tonnes (“Mt”) of waste and 31.3 Mt of ore over a 13-year period utilizing standard drill/blast - truck/shovel equipment and pit designs that are similar to other open pit diamond mines operating in the area. Ore will be fed to a 3.0 Mt per annum (“Mt/a”) processing plant with three stages of crushing, dense media separation and X-ray/grease belt diamond recovery circuits. Process plant designs and equipment selection are based on experience from other operations and utilize proven suppliers. Security designs are based on De Beers Canada’s standards and practices.

Supporting infrastructure includes a 14.1 megawatt packaged diesel power plant, 1,350 meter gravel airstrip, five-bay truckshop, emulsion plant, 40 million litres of fuel storage and a 432 bed accommodation/office complex. The primary facilities are interconnected by utilidors (enclosed corridors) providing interior access for personnel. These basic fit-for-purpose designs and plans are prepared by Feasibility Study project personnel that have designed, constructed and operated similar facilities at other diamond mines operating in the area. Likewise, the suppliers, contractors and service providers nominated in the Feasibility Study are providing similar services for other mines in the north. Cost estimates are built up from first principles and are benchmarked against relevant operations. Appropriate

contingencies have been applied. De Beers Canada operates the Snap Lake mine in the NWT and has provided estimates of general and administrative costs, payroll costs, licenses and fees. De Beers Canada has a trained workforce that can assist in the design, commissioning, training and operation of the Gahcho Kué mine.

The Gahcho Kué Project is environmentally sound, utilizing simple and proven management plans. Water management plans are adaptations of plans used successfully at other diamond mines. At Gahcho Kué, all potentially contaminated water is kept within a controlled management basin formed by natural drainage patterns. Excess storage capacity allowances provide for operational flexibility and contingencies. Normal mine operations incorporate a program of progressive reclamation that minimizes costs and allows time monitoring of performance. The mined out 5034 and Hearne pits are used for waste storage during the later years of the mine life providing ample time for the completion of reclamation of waste storage areas used in the earlier years. A viable plan for fish habitat compensation has been developed and provides for no-net-loss of habitat. New lake areas for fish habitat replacement are created at the beginning of operations providing ample time to monitor and measure effectiveness during the mine operation period.

The Gahcho Kué Project provides socioeconomic benefits. The mine will create close to 1,000 jobs during the two-year construction phase and some 400 permanent jobs during the 11-year operational phase. Additional employment will be created by service providers to operations. Territorial and Federal taxes and royalties are estimated to be close to \$800 million. In addition, property and payroll taxes will add significant tax revenues to the local municipality. Impact benefit agreements are planned for the First Nation groups in the area.

Risks for the Gahcho Kué Project are identified and considered reasonable. The greatest economic risk/opportunity is related to diamond values. Over the past several years, rough diamond demand/prices/sales have experienced unprecedented volatility as a result of the world economic crisis. Currently demand is strong, and the Gahcho Kué Joint Venture partners forecast a 1% real growth in diamond prices over the life of the Gahcho Kué Project.

The Gahcho Kué Project also faces environmental and regulatory risks, as the Gahcho Kué Project must proceed through the Mackenzie Valley Environmental Impact Review Board environmental screening process. There are risks that the permitting process might take longer than the scheduled 24 to 27 months, causing delays in construction start-up, and/or the regulatory authorities might require significant modifications to be made to the plans, which will affect designs and costs. In this event, a decision might even be taken to not proceed with the Gahcho Kué Project.

Economic Analysis - Summary

The financial evaluation of the Gahcho Kué Project has been undertaken on an after-tax, unleveraged, real rate of return to the Gahcho Kué Joint Venture partners as a whole. The analyses assumed that three kimberlite ore bodies will be developed, with production on the first pipe (5034) starting in January 2015. Only probable reserves (derived from indicated resources) were used in the 2010 Technical Report. Production for the base case ceases part way through the 11th year of production. All production, costs, and revenues are based on calendar fiscal years.

The Gahcho Kué Project is economically viable and the projected returns surpass the hurdle rates established by the 2009 Gahcho Kué Joint Venture Agreement. The Gahcho Kué Project provides a real rate of return to the partners of 20.7% and a real net present value at 15% of \$135.9 million in calendar 2010 Canadian dollars. After excluding sunk costs incurred to September 30, 2010, the Gahcho Kué Project provides a real rate of return of 33.9% and a real NPV of \$277.4 million at a discount rate of 15%. The Gahcho Kué Project is most sensitive to changes in diamond prices, with real dollar returns decreasing the IRR by 3.4% for a 10% reduction in prices and increasing the IRR by 3.0% for a 10% increase in prices. The Gahcho Kué Project shows a lesser sensitivity to capital with returns changing by 1.3% for a 10% change in either direction for capital. The sensitivity to operating cost is about 1.2% in the IRR rate for a 10% in operating costs.

Table 3 provides a summary of selected financial model inputs and the corresponding results. All costs are quoted in July 2010 Canadian dollars unless otherwise indicated.

Table 3

Description	3.0 Mt/a Case
Material Processed – Annual million tonnes (Mt)	3.0
Material Processed – Life-of-mine million tonnes (Mt)	31.3
Sunk Costs Exploration and Development pre-July 2009 (\$millions)	120.0
Sunk Costs Feasibility Study and Permitting– 2009-2010 (\$millions)	21.5
Initial Gahcho Kué Project Capital – 2011 to 2014 (\$millions)	549.5
Working Capital (4 months of operating costs) (\$millions)	49.4
Sustaining Capital including Mine Closure (\$millions)	36.1
Operating Costs – Average over life-of-mine (\$/tonne processed)	48.68
Real Diamond Price Escalation – 2010 forward (%/annum) [amount over U.S. Consumer Price Index]	1.00
Projected Mine Life (years)	11.0
Processing Diamond Cut-off Size (millimeter)	1.0
Inflation used for Escalation/De-escalation – (%/annum)	1.80
Total Carats Recovered (millions)	49.0
Diamond Price (RV life-of-mine Escalated, U.S.\$/carat)	102.48
Diamond Price (RV life-of-mine Un-Escalated, U.S.\$/carat)	74.52
Gahcho Kué Project IRR – Including sunk costs (%)	20.7
NPV @ 5% – Including sunk costs (\$millions)	650.5
Gahcho Kué Joint Venture Required IRR Hurdle Rate (%)	15.0
Gahcho Kué Project IRR – Sunk costs not included (%)	33.9
NPV @ 5% – Sunk costs not included (\$millions)	792.0

The Gahcho Kué Project is a joint venture. All of the numbers presented in this table are based upon 100% ownership and do not include any management fees or financing costs that are payable between the joint venture partners. Furthermore, the Gahcho Kué Project is evaluated on a 100% equity basis only, and excludes any financial leveraging effects, as well as any interest expense items that could impact taxable income and/or provide interest deduction tax shields.

One primary case has been considered, with variations from this base case model assessed as sensitivities. The base case uses an open pit mining operation with a processing throughput of 3.0 Mt/annum using probable reserves and is based on a nominal +1.00 mm carat cut-off size for the processing plant. The variations of the base case are as follows:

- project delay of one year due to permitting with the same throughput of 3.0 Mt/annum for base case
 - sensitivity analyses on diamond prices, capital costs, and operating costs.

The financial analysis is based on mineral reserves, with the objective of demonstrating economic viability; therefore, the analysis is classified as a “feasibility study” under NI 43-101. The feasibility study is a precursor to formal permit applications, definitive engineering design, formal commitment to construct, and includes mineral resources that are sufficiently defined geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves.

Information Prepared by the Company

The following information is prepared by the Company. The Company has issued press releases commenting upon recent results and activities for the Gahcho Kué Project. Such disclosure has been reviewed by Carl G. Verley, P.Geo., or Daniel D. Johnson from JDS (for disclosure relating to the Definitive Feasibility Study), who serve as the Qualified Persons in relation to such disclosures.

2010 Independent Diamond Valuation

The market for rough diamonds is subject to strong influence from demand in the United States, which is the largest market for polished diamonds, and supply from major producers such as Alrosa of Russia and Debswana of Botswana. The price of diamonds dropped sharply after September 11, 2001. Between 2003 and 2006, diamond prices increased on average by approximately 15%. In 2007, rough diamond prices increased by an average of 25%, and in the first five months of 2008, by a further 11%. From about mid-2008 to mid-April 2009, rough diamond prices fell sharply as a consequence of the global economic recession. Starting in mid-April 2009, rough diamond prices have started to recover, tempered by concerns of consumer buying confidence and behaviour. Regardless, continuing trends suggest an over demand for rough diamonds in the mid- to long-term.

On August 4, 2010, the Company announced the results of an updated independent diamond valuation of the diamonds recovered from the Gahcho Kué Project during the exploration phase. The valuation was conducted by WWW International Diamond Consultants Ltd. (“WWW”) and took place at the London offices of the Diamond Trading Company in early April 2010. All diamond values presented below are based on the WWW Price Book as at April 13, 2010.

The independent diamond valuation resulted in substantially the same actual price of the Gahcho Kué diamonds to US\$134 per carat compared to the 2008 independent diamond valuation done by WWW International Diamond Consultants Ltd. for the Company.

Table 4 below reflects the actual price per carat for the parcel of 8,243.56 carats of diamonds recovered from the Gahcho Kué Project.

Table 4

Pipe	Zone	Actual Price US\$/carat		Total Dollars
		Total Carats	\$/Carat	
5034	Centre Lobe	633.80	80.23	\$ 50,852
	West Lobe	1,119.40	79.63	89,134
	East Lobe	1,264.21	178.59	225,770
5034 Total		3,017.41	121.22	365,757
Hearne		2,906.45	60.44	175,654
Tuzo		2,319.70	243.03	563,750
Total		8,243.56	134.06	\$ 1,105,161

Table 5 below presents models of the average price per carat (US\$/carat) for each kimberlite lithology. The modeled price per carat is determined using statistical methods to estimate the average value of diamonds that will be recovered from potential future production from Gahcho Kué.

Table 5

Modeled Average Price US\$/carat

Pipe	+ 1.00mm			+1.50mm		
	High	Model	Low	High	Model	Low
5034 NE Lobe	131	107	96	143	116	104
5034 Centre	122	100	91	137	113	102
5034 West	141	114	103	157	127	114
Tuzo	81	67	61	93	77	70
Hearne	82	68	62	93	78	71

Note: 1.50mm prices provided for reference purposes only.

In their report to Mountain Province, WWW stated: "The Tuzo sample and the 5034 East sample both contained one high value large stone. For Tuzo there was a 25.14 carat stone valued at \$17,000 per carat and 5034 East had a 9.90 carat stone valued at \$15,000 per carat. It is encouraging that such high value stones were recovered in samples of this size. If they are found in the same frequency throughout the resource then the modelled APs [Average Prices'] will certainly be towards the 'high' values."

Definitive Feasibility Study

On September 1, 2009, the Company announced that the Gahcho Kué Joint Venture had appointed JDS, an independent engineering firm, to produce the Definitive Feasibility Study for the Gahcho Kué Joint Venture. The Definitive Feasibility Study was expected to take approximately twelve months to complete with a budget of approximately \$10 million.

On October 21, 2010, in a press release titled "Mountain Province Diamonds Announces Positive Gahcho Kué Independent Feasibility Study", Mountain Province announced the results of the independent feasibility study. JDS led and prepared the feasibility study dated October 15, 2010, which was presented to the Gahcho Kué Joint Venture. The Company filed the 2010 Technical Report, representing a detailed summary of the Feasibility Study, on SEDAR and provided notification of such filing under Form 6K on EDGAR on December 3, 2010. See Item 4.D, Property Plant and Equipment, for a full summary of the 2010 Technical Report.

The following are the financial and project highlights from the 2010 Technical Report:

- Project IRR including sunk costs 20.7%*
- Project IRR excluding sunk costs 33.9%
- Initial project capital \$549.5 million
- Working capital \$49.4 million
- Sustaining capital including mine closure \$36.1 million
- Operating costs \$48.68 per tonne
- Project mine life 11 years
- Average annual production 3 million tonnes
- Total diamond production 49 million carats
- Average annual diamond production 4.45 million carats
- Diamond price US\$102.48 per carat**

*After taxes/royalties and unleveraged

**The base case model uses an average realized diamond price of US\$102.48 per carat derived from the mean average between the modeled values of De Beers and WWW (based on their respective April 2010 price books) inclusive of a

real 1% escalation over LOM less an assumed 4% marketing fee.

Permitting

In November 2005, De Beers Canada, as operator of the Gahcho Kué Project, applied to the Mackenzie Valley Land and Water Board for a Land Use Permit and Water License to undertake the development of the Gahcho Kué diamond mine. On December 22, 2005, Environment Canada referred the applications to the Mackenzie Valley Environmental Impact Review Board ("MVEIRB"), which commenced an Environmental Assessment ("EA"). On June 12, 2006, the MVEIRB ordered that an Environment Impact Review ("EIR") of the applications should be conducted. The MVEIRB published draft Terms of Reference and a draft Work Plan for the Gahcho Kué Project in June 2007, and called for comments from interested parties by July 11, 2007.

The EIR is designed to identify all of the key environmental issues that will be impacted by the development of the Gahcho Kué diamond mine and to facilitate participation by key stakeholders in addressing these issues.

On December 17, 2007, the Company announced that the MVEIRB published the final terms of reference for the Gahcho Kué Environment Impact Statement ("EIS") on October 5, 2007. On May 9, 2008, the Project Operator, De Beers, advised the MVEIRB that the filing of the EIS will be deferred to the fall 2008.

The feasibility study commissioned in August 2009 was expected to impact the final project description and the Project Operator, De Beers Canada, had previously advised the MVEIRB that submission of the EIS would be further deferred pending the completion of an updated project description.

The final Gahcho Kué Project description was presented to the Gahcho Kué Joint Venture partners, and was incorporated into the EIS to be submitted to the MVEIRB before the end of 2010. Key elements of the project description include the following:

- Average annual production rate of approximately 3 million tonnes of ore;
- Life of mine from the open-pit resource of approximately 11 years; and
- Average annual production rate of approximately 4.45 million carats.

On November 5, 2010, the Company announced that the Operator of the Gahcho Kué Joint Venture, De Beers Canada, had notified the MVEIRB on November 3, 2010 that the Gahcho Kué EIS was on track for completion and submission before the end of 2010. The Company also announced that the submission of the EIS will result in the resumption of the environmental impact review by the independent administrative tribunal established under the Mackenzie Valley Environmental Resource Management Act.

On December 23, 2010, the Company, in a joint news release with De Beers Canada, announced that the EIS for the Gahcho Kué mine had been submitted to the Gahcho Kué Environmental Impact Review Panel (the "Panel") of the MVEIRB. The EIS details the construction and operation of the proposed mine to ensure it is sustainable. The EIS has been assembled to meet the rigorous Terms of Reference established by the Panel for the Gahcho Kué Project.

The Joint Venture partners further announced that the next step in the regulatory process will be for the Panel to review the Project's EIS submission and to confirm that the EIS conforms to the Terms of Reference. When this determination is made, the next steps in the Analytical Phase of the Environmental Impact Review will commence. Subsequent to the year-end, on March 17, 2011, the Panel wrote a letter to the Gahcho Kué Project operator, De Beers Canada, advising that while the EIS addressed the great majority of the items under the terms of reference, five items had not been adequately addressed, and the Panel requested responses in respect of these five items by May 2, 2011.

Project Costs to Date

The 2009 Gahcho Kué Joint Venture Agreement contains the following key terms with respect to the Gahcho Kué Project costs:

1. Each Joint Venture partner will contribute their proportionate share to the future project development costs;
2. The Joint Venture partners have agreed that the sunk historic costs to the period ending on December 31, 2008 will be reduced and limited to \$120 million;
3. Mountain Province will repay De Beers Canada \$59 million (representing 49% of an agreed sum of \$120 million) in settlement of the Company's share of the agreed historic sunk costs on the following schedule:
 - \$200,000 on execution of the 2009 Gahcho Kué Joint Venture Agreement (Mountain Province's contribution to the 2009 Joint Venture expenses to date of execution of the 2009 Gahcho Kué Joint Venture Agreement – paid);
 - Up to \$5.1 million in respect of De Beers Canada's share of the costs of the feasibility study commissioned in August 2009 (paid \$4,128,434 to December 31, 2010, recorded as "sunk cost repayment" in the Company's financial statements);
 - \$10 million upon the completion of the feasibility study with at least a 15% IRR and approval of the necessary development work for a mine (as defined in the 2009 Gahcho Kué Joint Venture Agreement);
 - \$10 million following the issuance of the construction and operating permits;
 - \$10 million following the commencement of commercial production; and
 - The balance within 18 months following commencement of commercial production.

Subsequent to the year end, the Company made a payment to De Beers Canada of \$10 million representing the payment required with the completion of the feasibility study with a 15% IRR, pending the Joint Venture's approval of the necessary development work for a mine.

The following table outlines the Project costs to date:

Period of Time	Amount (1)
Agreed historic sunk costs to December 31, 2008	\$ 120,000,000
Agreed expenses January 1, 2009 to December 31, 2009	1,654,383
Costs for Feasibility Study from August 2009 to December 2009 (of approved budget of \$10 million)	2,531,056
Total Costs to December 31, 2009	\$ 124,185,439
Agreed expenses January 1, 2010 to December 31, 2010	10,754,884
Costs for Feasibility Study from January 2010 to December 2010 (of approved budget of \$10 million)	5,593,913
Total Costs to December 31, 2010	\$ 140,534,236
Approved Budget January 1, 2011 to December 31, 2011	\$ 12,553,133

Other Properties

Kennady North

Mountain Province (outside of the Joint Venture with De Beers Canada) has the following five mining leases with their respective lease numbers – 4340, 4342, 4466, 4467, and 4468 – in the Kennady Lake area. These five mining leases represent about 12,555 acres. The Company also staked in late 2010 eight claims around Gahcho Kué – Kwezi 01 to Kwezi 08. These claims represent approximately 17,839 acres, and together with the five mining leases, comprise 30,394 acres – the Company's Kennady North Project. These mining leases and claims are not part of the 2009 Gahcho Kué Joint Venture Agreement with De Beers Canada and are not considered part of the Gahcho Kué

Project.

41

Historical exploration on the Kennady North Project was done starting in 1992, and continued until about 10 years ago when the Company and De Beers Canada focussed exploration efforts on the Gahcho Kué Project.

The Company is currently undertaking a desktop study of the exploration work done in the past on the Kennady North Project, and when the desktop study is completed, will be able to assess what further exploration work might be warranted.

Gahcho Kué Project and Kennady North Project Claims and Leases (2011)

Other

As well, the Company has a 50% interest (acquired pursuant to an option/joint venture agreement with Opus Minerals Inc., now known as First Strike Diamonds Inc. on July 13, 1998) in claims held by Opus Minerals Inc. in the northern end of the Baffin Island. The property values for these claims were written off in fiscal 2004, and the Baffin Island property is no longer of interest to the Company. Pursuant to the amalgamation of Mountain Glen and Glenmore, the Company's wholly-owned subsidiary, Mountain Glen, acquired mineral properties in Finland. These mineral properties were transferred to the Company when Mountain Glen wound up its affairs.

The Company had one non-material property in Finland, the Haveri Gold Property. An option was granted on October 10, 2002 to Northern Lion Gold Corp. (formerly Vision Gate Ventures Limited) for the acquisition of a 70% interest in the Haveri Property. On October 4, 2004, the Company agreed to exchange its remaining 30% interest in the Haveri Property for 4,000,000 shares of Northern Lion Gold Corp. The shares of Northern Lion Gold Corp. were sold in 2007.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

A. Operating results.

The following discussion of the financial condition and operating results of the Company should be read in conjunction with the consolidated financial statements and related notes to the financial statements which have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). Discussion and analysis set forth below covers the results obtained under GAAP in Canada. A significant difference between Canadian and U.S. GAAP exists with respect to accounting for mineral property exploration costs which have been capitalized under Canadian GAAP but are required to be expensed under U.S. GAAP when incurred until such time as commercially mineable deposits are determined to exist within a particular property. Material measurement differences between accounting principles generally accepted in Canada and the United States, applicable to the Company, are described in Note 9 to the consolidated financial statements.

Fiscal Period ended December 31, 2010 compared to Fiscal Year ended December 31, 2009.

The Company has changed its yearend to December 31, effective December 31, 2009, to align its fiscal yearend with that of De Beers Canada, the operator of the Gahcho Kué Project.

The Company's net loss for the year ended December 31, 2010 was \$1,566,715, or \$0.02 per share, compared with a net loss of \$1,458,338, or \$0.02 per share for the nine months ended December 31, 2009. Before the Company's tax recovery of \$498,745 for the year ended December 31, 2010 (nine months ended December 31, 2009 - \$509,686), the net loss was \$2,065,460 for the year ended December 31, 2010 (nine months to December 31, 2009 - \$1,968,024).

The net loss for the year ended December 31, 2010 includes the Company's proportional share of expenses of the Gahcho Kué Project in the amount of \$560,715 compared to \$210,789 for the nine months ended December 31, 2009. The increase is attributable not only to a longer fiscal period but also that the proportional share of costs for the 2010 fiscal year was for a full year, and increased Gahcho Kué activity compared to the nine months ended December 31, 2009 when the costs were only effective with the signing of the 2009 Gahcho Kué Joint Venture Agreement with De Beers Canada in mid-2009.

Operating expenses, excluding stock-based compensation (nil for the year ended December 31, 2010 and \$268,405 for the nine months ended December 31, 2009) and the expenses associated with the Project, totaled \$1,627,335 for the year ended December 31, 2010 compared to \$1,500,795 for the nine months ended December 31, 2009, reflecting only a small increase for the additional three months in 2010's fiscal year. Reductions in Promotion and Investor Relations (about \$75,000) and Salary and Benefits (about \$78,000) were offset by an increase in Travel (about \$75,000), and Consulting Fees (\$195,000) for increased marketing efforts for the Company.

Interest income of \$122,590 for the year ended December 31, 2010 increased over the prior fiscal period (nine months ended December 31, 2009 - \$11,965) as a result of significantly improved cash balances as a result of financings done in the second half of 2009 and through 2010.

Fiscal Nine-Month Period ended December 31, 2009 compared to Fiscal Year ended March 31, 2009

The Company's net loss for the nine months ended December 31, 2009 was \$1,458,338, or \$0.02 per share, compared with a net income of \$1,537,590, or \$0.03 per share for the twelve months ended March 31, 2009. Before the Company's tax recovery of \$509,686 (March 31, 2009 - \$222,796), the net loss was \$1,968,024 (March 31, 2009 - \$1,760,386) for the nine months ended December 31, 2009.

The net loss for the nine months ended December 31, 2009 includes stock-based compensation expense of \$268,405 compared to stock-based compensation expense for the twelve months ended March 31, 2009 of \$574,200. The options were granted in August 2009 to an officer of the Company, and vested with the approval of the Company's amended stock option plan by the shareholders at the annual and general meeting on September 10, 2009, and the receipt of regulatory approval of the Company's amended stock option plan in October 2009. They were granted for a five-year term.

The net loss for the nine months ended December 31, 2009 also includes the Company's proportional share of expenses of the Gahcho Kué Joint Venture in the amount of \$210,789. On July 3, 2009, as discussed under the section titled "Overall Performance", the Company entered into an amended and restated joint venture agreement with De Beers Canada relating to the Gahcho Kué Joint Venture. With the execution of the 2009 Gahcho Kué Joint Venture Agreement, the Company proportionately consolidates the assets, liabilities, revenues and expenses of the Gahcho Kué Joint Venture.

Operating expenses, excluding stock-based compensation and the expenses associated with the joint venture, totaled \$1,500,795 for the nine months ended December 31, 2009 compared to \$1,222,968 for the twelve months ended March 31, 2009. The most significant increase in the operating expenses is in Professional fees, which includes incremental legal and accounting fees associated with the amended and restated joint venture agreement. Professional fees increased from \$185,011 for the year ended March 31, 2009 to \$350,994 for the nine months ended December 31, 2009. Promotion and investor relations increased to \$154,029 at December 31, 2009 from \$82,816 as a result of increased marketing of the Company. Office and administration and salary and benefits increased from prior year as a result of capital and payroll taxes for prior year's not previously recorded by the Company.

B.Liquidity and capital resources.

Since inception, the Company's capital resources have been limited. The Company has had to rely upon the sale of equity securities to fund property acquisitions, exploration, capital investments and administrative expenses, among other things.

On May 17, 2010, the Company completed a non-brokered private placement of 5,476,177 common shares at a price of \$2.10 per share, to raise gross proceeds of approximately \$11.5 million. Proceeds from the private placement are being used to support the feasibility study and permitting for the Gahcho Kué Project, and for general corporate purposes.

On November 18, 2010, the Company completed a private placement of 4.6 million shares at a price of \$5.00 per share, to raise gross proceeds of \$23 million. The net proceeds of the Offering are being used to advance the Gahcho Kué Project and for general corporate purposes.

The Company reported working capital of \$29,451,180 at December 31, 2010 (\$8,315,371 as at December 31, 2009), and cash and cash equivalents and short-term investments of \$33,555,142 (\$9,942,277 at December 31, 2009). The short-term investments are guaranteed investment certificates held with a major Canadian financial institution, and the Company considers there to be no counter-party credit risk associated with the bank.

The Company had no long-term debt as at December 31, 2010 and December 31, 2009. The Company's contributions payable to De Beers Canada are contingent on certain events occurring such as a decision to build the mine, receipt of permits, and production. (See "Overall Performance" section above).

After December 31, 2010, 1,110,916 warrants were exercised for proceeds of \$2,289,032, and 120,000 options were exercised for proceeds of \$475,200.

In order to advance the Gahcho Kué Project and exploration of the Kennady North Project, the Company will be required to raise additional capital through equity and/or debt financings on terms that may be dilutive to its shareholders' interests in the Company and the value of their common shares. The Company may consider debt financing, joint ventures, production sharing arrangements, disposing of properties or other arrangements to meet its capital requirements in the future. Such arrangements may have a material adverse affect on the Company's business or results of operations. As well, there is no guarantee that the Company will be able to raise additional capital, or to raise additional capital on terms and conditions which it finds acceptable.

The Company expects to continue incurring annual losses until it receives revenue from production on the Gahcho Kué Project, if placed into production. There is no assurance that the property will be developed or placed into production.

C. Research and development, patents and licenses, etc.

The Company does not engage in any research and development activities and has no patents or licenses.

D. Trend information.

There are no major trends which are anticipated to have a material effect on the Company's financial condition and results of operations in the near future. The reduction of expenses has been achieved in most areas. Management will continue its efforts to reduce other expenses.

E. Off-balance sheet arrangements.

The Company has no off balance sheet arrangements.

F. Tabular disclosure of contractual obligations.

The Company has no contractual obligations relating to debt or lease obligations as at December 31, 2010.

Critical Accounting Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions are used in determining the application of the going concern concept, the continual deferral of costs incurred for mineral properties and exploration, assumptions used to determine the fair value of stock-based compensation, and impairment of the Company's interest in the Gahcho Kué Project. The Company evaluates its estimates on an ongoing basis and bases them on various assumptions that are believed to be reasonable under the circumstances. The Company's estimates form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The Company believes the policies for going concern and its interest in the Gahcho Kué Project are critical accounting policies that affect the significant judgments and estimates used in the preparation of the Company's financial statements.

The Company considers that its mineral properties have the characteristics of property, plant and equipment, and, accordingly defers acquisition and exploration costs under Canadian generally accepted accounting principles. The

recoverability of mineral property acquisition and deferred exploration expenditures is dependent upon the discovery of economically recoverable reserves and on the future profitable production, or proceeds from disposition, of the Company's properties. The Company is in the process of exploring its mineral properties and has not yet determined whether the properties contain mineral reserves that are economically recoverable. Development of any property may take years to complete and the amount of resulting income, if any, is difficult to determine with any certainty. The sales value of any mineralization discovered by the Company is largely dependent upon factors beyond the Company's control, such as the market value of the diamonds recovered.

Changes in circumstances in the future, many of which are outside of management's control, will impact on the Company's estimates of future recoverability of net amounts to be realized from their assets. Such factors include, but are not limited to, the availability of financing, the identification of economically recoverable reserves, co-venturer decisions and developments, market prices of minerals, the Company's plans and intentions with respect to its assets, and other industry and competitor developments.

While the Company believes that economically recoverable reserves will be identified, there is no assurance that this will occur. Failure to discover economically recoverable reserves will require the Company to write-off costs capitalized to date and will result in further reported losses.

The Company reviews its interest in the Gahcho Kué Project for impairment based on results to date and when events and changes in circumstances indicate that the carrying value of the assets may not be recoverable. Canadian GAAP requires the Company to make certain judgments, assumptions, and estimates in identifying such events and changes in circumstances, and in assessing their impact on the valuations of the affected assets. Impairments are recognized when the book values exceed management's estimate of the net recoverable amounts associated with the affected assets. The values shown on the balance sheet for the Company's interest in the Gahcho Kué Project represent the Company's assumption that the amounts are recoverable. Owing to the numerous variables associated with the Company's judgments and assumptions, the precision and accuracy of estimates of related impairment charges are subject to significant uncertainties, and may change significantly as additional information becomes known. The Company's assessment is that there were no indicators of impairment at December 31, 2010.

The consolidated financial statements have been prepared on a going concern basis in accordance with Canadian generally accepted accounting principles, which assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

The Company believes that it has the ability to obtain the necessary financing to meet commitments and liabilities as they become payable.

The Company uses the Black-Scholes option pricing model to determine the fair value of stock-based compensation recognized. Estimates and assumptions are required under the model, including those related to the Company's stock volatility, expected life of options granted, and the risk free interest rate. The Company believes that its estimates used in arriving at stock-based compensation are reasonable under the circumstances.

Effect of Inflation

In the Company's view, at no time during any of the last three fiscal years have inflation or changing prices had a material impact on the Company's sales, earnings or losses from operations, or net earnings.

U.S. Generally Accepted Accounting Principles

U.S. GAAP differs in some respects from Canadian GAAP, as applied to the Company. Reference should be made to "Item 3A - Selected Financial Data", and Note 9 to the Consolidated Financial Statements of the Company for a description and quantification of material measurement differences between Canadian GAAP and U.S. GAAP.

Item 6. Directors, Senior Management and Employees

A.Directors and senior management.

The following table lists, as of March 30, 2011, the names of the directors and senior management of the Company. The directors and senior management have served in their respective capacities since their election and/or appointment and will serve until the next Annual General Meeting of Shareholders or until a successor is duly elected, unless the office is vacated in accordance with the Company's Articles or unless there is a prior resignation or termination.

Name	Position with Company	Date of First Appointment
Jonathan Comerford	Chairman and Director(2)(3)	Chairman of the Company since May 11, 2006 and Director since September 21, 2001
Patrick Evans	President, Chief Executive Officer and Director	President and Director of the Company since November 15, 2005
Jennifer Dawson	Chief Financial Officer	Chief Financial Officer since May 11, 2006
D. Harry W. Dobson	Director(1)	Director since November 1, 1997
Elizabeth J. Kirkwood	Director(1)	Director since September 21, 2001
Peeyush Varshney	Director(2)	Director since April 13, 2007
Carl Verley	Director(1)(3)	Director of Old MPV since December 2, 1986 and Director of the Company since November 1, 1997
David E. Whittle	Director(2)(3)	Director since November 1, 1997

(1) Member of the Company's Corporate Governance Committee.

(2) Member of the Company's Audit Committee.

(3) Member of the Company's Compensation Committee.

The following is a description of the Company's directors and senior management. The information provided is not within the knowledge of the management of the Company and has been provided by the respective directors and senior officers.

Jonathan Christopher James Comerford, B.A. (Econ.), M.B.S. (Finance)

Mr. Jonathan Comerford has been a director of the Company since September 2001 and Chairman since April 2006. Mr. Comerford is resident in Dublin, Ireland. He obtained his Masters in Business from the Michael Smurfit Business School in 1993 and his Bachelor of Economics from University College, Dublin in 1992. Mr. Comerford has been Investment Manager at IIU Limited since August 1995. He serves as a director of Optimal Payment Plc.

Patrick C. Evans, B.A., B.Sc.

Mr. Patrick C. Evans has been President, CEO and a director of the Company since November 2005. He is a resident of Arizona, USA. Mr. Evans is a graduate of the University of Cape Town where he received his Bachelor of Arts degree in 1977 and Bachelor of Science degree in 1978. He was a career diplomat from 1979 to 1998. In 1999 he was appointed a Vice President of Placer Dome Inc. (a major gold mining company) and a non-executive director of SouthernEra Resources Ltd. (a diamond and platinum exploration, development and mining company). In 2001, he was appointed President and CEO of SouthernEra Resources Ltd. and Messina Limited (a platinum mining company). In 2004, he was appointed President, CEO and a director of Southern Platinum Corp (a platinum mining company), which was acquired by Lonmin Plc in June 2005. In September 2005, he was appointed President, CEO and a director of Weda Bay Minerals Inc. (a nickel exploration and development company), which was acquired by Eramet S.A. in May 2006. Mr. Evans was a non-executive director of First Uranium Corp. (a uranium and gold mining company)

from December 2006 to September 2010. Mr. Evans was appointed the CEO and a director of Norsemont Mining Inc. (a copper exploration and development company) in June 2007, which is now substantially owned by HudBay Minerals after a recent takeover, and he has been a non-executive director of Anvil Mining Limited (a copper mining company) since March 2009.

Jennifer M. Dawson, B.B.A.

Ms. Jennifer Dawson has been the Company's Chief Financial Officer and Corporate Secretary since May 2006. She is a resident of Ontario, Canada. Ms. Dawson is a graduate of St. Francis Xavier University where she received her Bachelor of Business Administration in 1984. Her work experience includes public accounting experience with Touche Ross & Co. (now Deloitte) from 1984 to 1989, and financial management experience with CCH Canadian Limited (1989 to 2000) and Genesis Media Inc. (from 2000 to 2004). She provided financial consulting services to SouthernEra Resources Ltd. in its corporate reorganization in 2004, and ongoing financial consulting services to both SouthernEra Diamonds Inc. and to Southern Platinum Corp. after the reorganization in 2004 through 2005. Since 2004, she has been a self-employed financial consultant, and in addition to her CFO and Corporate Secretary roles with the Company, she provided financial and administrative services to Arizona Star Resource Corp. as a consultant from 2005 to 2008 (now owned 100% by Barrick Gold Corporation), and to Blacksands Petroleum, Inc. (2007 to 2010).

D. Harry W. Dobson

Mr. Harry Dobson has been a director of the Company since November 1997 and is a resident of Monaco. Mr. Dobson was the founder and chairman of American Pacific Mining Company Inc. and a director of Breakwater Resources Ltd. until 1991. Subsequent to 1991, Mr. Dobson served as Deputy Chairman of the Board and a director of Lytton Minerals Limited. He is a former officer and director of 444965 B.C. Ltd., and served as a director and Chairman of Glenmore Highlands Inc. Since October 2001, he has been a director and the Chair of Kirkland Lake Gold Inc. He is also a director and Chair of Borders and Southern Petroleum plc since 2005. His other directorship is with Rambler Metals and Mining plc.

Elizabeth J. Kirkwood

Ms. Elizabeth J. Kirkwood has been an entrepreneur and independent business woman since February 1989 with a focus on the creation, financing and management of junior resource companies. She has been a director of the Company since September 2001 and was past Chairman of the Board of the Company from January 2003 until April 2006. She was also Chief Financial Officer of the Company from September 2003 until May 2006, and Corporate Secretary from November 2003 until May 2006. She is resident in Ontario, Canada, and a member of the Prospectors and Developers Association of Canada. Ms. Kirkwood was appointed the President and CEO of Match Capital Resources Corporation in July, 2010. Ms. Kirkwood was the President and CEO of First Nickel Inc. (November 2003 to June 2006). She has been a past director of Everbright Capital Corporation (June 2005 - July 2009), Canadian Shield Resources Inc. (June 2005-June 2007), Intrepid Minerals Corporation (April 1999 – July 2006), Investor Links.com (March 1993-May 2001), Canada's Choice Spring Water (July 1996-August 1999), Stroud Resources Ltd. (August, 2000 - March 2002), and a past director and officer of O.S.E Corp. (formerly Oil Springs Energy Corp. (July, 1993- June 2005), Hucamp Mines Limited (May 2001-May 2002), and First Strike Diamonds Inc. (October 1995 – March 2004). She is a director of Match Capital Resources Corporation.

Peeyush Varshney, LL.B.

A resident of British Columbia, Canada, Mr. Peeyush Varshney has been actively involved in the capital markets since 1996 and has been a principal of Varshney Capital Corp., a private merchant banking, venture capital and corporate advisory firm since 1996. Since September 2005, he has also been the Chief Executive Officer and a director of Canada Zinc Metals Corp., a resource exploration company listed on the TSX Venture Exchange. Mr. Varshney obtained a Bachelor of Commerce degree (Finance) in 1989 and a Bachelor of Laws in 1993, both from the University of British Columbia. He then articulated at Farris, Vaughan, Wills & Murphy, a law firm in Vancouver, British Columbia, from 1993 to 1994, and has been a member of the Law Society of British Columbia since

September 1994. Mr. Varshney is a director of Afrasia Mineral Fields Inc., Mexigold Corp., Trigen Resources Inc., Minaean International Corp., and Open Gold Corp.

Carl G. Verley, B.Sc., P. Geo.

Mr. Carl Verley was a director of Old MPV since its inception in December 1986 and has been a director of the Company since November 1997. He is a resident of British Columbia, Canada, and a graduate of the University of British Columbia where he received his Bachelor of Science Degree in May of 1974. He worked for Cordilleran Engineering Ltd. from 1975 to 1982. He has been a self-employed geologist since 1982. From August of 1990 to January 2002, he served on the Board of Directors of Gee-Ten Ventures Inc., and since July 2003, he has been a director of Alphamin Resources Corp. (formerly La Plata Gold Corporation) and a director of African Metals Corporation since October 2007. He has been the President of Amerlin Exploration Services Ltd., a private company providing exploration services to the mineral industry, since its inception in 1983. He is also a director of African Metals Corporation. He is a registered Professional Geoscientist with the British Columbia Association of Professional Engineers and Geoscientists.

David E. Whittle, B.Comm., C.A.

Mr. Whittle is a Chartered Accountant and is a resident of British Columbia, Canada. He has been a director of the Company since November 1997, and from November 1997 to April 1998 served as Secretary of the Company. From 1992 through 2004, Mr. Whittle served as operator or partner of a financial consulting and chartered accounting practice. From 1993 to June 2000, Mr. Whittle was President and a director of Glenmore Highlands Inc., a public company in the mineral exploration business. From 2004 to August 2007, Mr. Whittle was Chief Financial Officer of Hillsborough Resources Limited, a public company in the mining business. From 2004 to August 2007, Mr. Whittle was a director of Image Innovations Holdings Inc., a public company in the business of sports memorabilia and artwork. From October 2007 to the present, Mr. Whittle's principal occupation has been and is Chief Financial Officer of Alexco Resource Corp., a public company in the business of both undertaking mineral exploration and development and providing consulting services to third parties in respect of environmental remediation and permitting.

B.Compensation.

The Company has two executive officers (collectively, the "Executive Officers"): Patrick Evans, the President and CEO, and Jennifer Dawson, the Chief Financial Officer and Corporate Secretary. For particulars on these executive officers, reference should be made to "Item 6A - Directors and Senior Management".

The compensation paid to the executive officers and details of management contracts and incentive options granted to the two executive officers of the Company for the Company's most recently completed financial years is as follows:

- Patrick Evans, President and Chief Executive Officer, earned other annual compensation of \$423,446 in the most recent fiscal year ending December 31, 2010 including \$419,696 pursuant to a consulting agreement (as amended) for his services as President and CEO, as well as a director's fee of \$3,750 for the year ended December 31, 2010. He has 500,635 stock options as follows:

Grant date	Number	Vesting	Exercise Price	Term
November 24, 2008	100,635	Immediately	\$ 1.26	5 years
August 24, 2009	300,000	Immediately	\$ 1.72	5 years
January 10, 2011	100,000	Immediately	\$ 6.13	5 years

- Jennifer Dawson, Chief Financial Officer and Corporate Secretary, was paid \$265,407 pursuant to a consulting agreement for her services as CFO and Corporate Secretary for the year ended December 31, 2010. She has 140,000 stock options as follows:

Grant date	Number	Vesting	Exercise Price	Term
November 24, 2008	90,000	Immediately	\$ 1.26	5 years
January 10, 2011	50,000	Immediately	\$ 6.13	5 years

Compensation for the directors was approved effective April 1, 2005 at the following levels: the Chairman of the Board receives \$10,000 per annum, the Chairman of the Audit Committee receives \$7,500 per annum, and all other Directors receive \$5,000 per annum. All are paid semi-monthly, in advance.

Effective January 1, 2011, compensation for the directors has been approved at the following levels: Chairman of the Board to receive \$20,000 per annum, the Chairman of the Audit Committee to receive \$15,000 per annum, and all other Directors are to receive \$10,000 per annum. These amounts are to continue to be paid semi-annually, in advance.

During each of the years ended December 31, 2010, December 31, 2009 (nine months), and March 31, 2009, director fees were earned by the following directors:

Director/Position	December 31, 2010(1)	December 31, 2009(2)	March 31, 2009
Jonathan Comerford Chairman of the Board	\$ 7,500	\$ 10,000	\$ 10,000
David Whittle Chairman of the Audit Committee	\$ 5,625	\$ 7,500	\$ 7,500
Harry Dobson Director	\$ 3,750	\$ 5,000	\$ 5,000
Patrick Evans Director	\$ 3,750	\$ 5,000	\$ 5,000
Elizabeth Kirkwood Director	\$ 3,750	\$ 5,000	\$ 5,000
Carl Verley Director	\$ 3,750	\$ 5,000	\$ 5,000
Peeyush Varshney Director	\$ 3,750	\$ 3,750	\$ 3,750

(1) The Directors' Fees were prorated for the first semi-annual payment in 2010 to adjust for the payment, in advance, of the January 1, 2010-March 31, 2010 fees paid in October 2009 before the Company's change in year end.

(2) The Directors Fees were paid, in advance, in October 2009 for the period of October 1, 2009 to March 31, 2010. Subsequent to this payment, the Company changed its yearend to December 31, 2009, and adjusted the subsequent directors' fees for the required proration.

The Company has no Long-Term Incentive Plan ("LTIP") in place and therefore there were no awards made under any long-term incentive plan to the Executive Officers during the Company's most recently completed financial year. A "Long-Term Incentive Plan" is a plan providing compensation intended to motivate performance over a period of greater than one financial year, other than a plan for options, SARs (stock appreciation rights) or compensation through shares or units that are subject to restrictions on resale.

The following table sets out incentive stock options exercised by the Executive Officers during the most recently completed financial year, as well as the financial year end value of stock options held by the Executive Officers. During this period, no outstanding SARs were held by the Executive Officers.

Name	Securities, Acquired on Exercise (#)	Aggregate Value Realized \$(1)	Unexercised Options Financial Year-End Exercisable / Unexercisable (#)	Value of Unexercised In-the- Money Options at Financial Year-End Exercisable / Unexercisable \$(2)
Patrick Evans	Nil	Nil	500,635/0	\$ 2,161,327/0
Jennifer Dawson	Nil	Nil	90,000/0	\$ 471,600/0

(1) Based on the difference between the option exercise price and the closing market price of the Company's shares on the date of exercise.

(2) In-the-Money Options are those where the market value of the underlying securities as at the most recent financial year end exceeds the option exercise price. The closing market price of the Company's shares as at December 31, 2010, (ie. financial year end) was \$6.50.

There were no options or freestanding SARs held by the Executive Officers that were re-priced downward during the most recently completed financial year of the Company.

The Company does not have a defined benefit/actuarial plan, under which benefits are determined primarily by final compensation and years of service of the Company's officers and key employees.

In addition to the foregoing, some of the executive officers of the Company are also entitled to medical and dental benefits, reimbursement of all reasonable business expenses and, from time to time, the grant of stock options.

No plan exists, and no amount has been set aside or accrued by the Company or any of its subsidiaries, to provide pension, retirement or similar benefits for directors and officers of the Company, or any of its subsidiaries.

C. Board practices.

The directors of the Company are elected annually and hold office until the next annual general meeting of the shareholders of the Company or until their successors in office are duly elected or appointed. The Company does not have an executive committee. All directors are elected for a one-year term. All officers serve at the pleasure of the Board. None of the directors, with the exception of Patrick Evans, who serves as the Company's President and CEO, have any service agreements with the Company. Mr. Evans' agreement contains a termination clause that would provide him with 18 months of compensation if there is a change of control of the Company.

The next Annual General Meeting of the shareholders of the Company has been scheduled for June 15, 2011.

The Board has adopted a Charter under which it and the Board's committees operate. The Company's board of directors has three committees- the Audit Committee, the Nominating/Corporate Governance Committee and the Compensation Committee.

Audit Committee

The members of the Audit Committee do not have any fixed term for holding their positions and are appointed and replaced from time to time by resolution of the Board of Directors. It is composed of at least three directors, and the

Board has determined that David Whittle, C.A. of the Audit Committee meets the requirement of an "audit committee financial expert" as defined in Item 16A of Form 20-F. Each member of the Audit Committee has the financial ability to read and understand a balance sheet, an income statement and a cash flow statement. All three members of the Audit Committee are independent.

The current members of the Audit Committee are Jonathan Comerford, Peeyush Varshney and David Whittle. Except for the chairman, David Whittle, the Audit Committee members receive no separate remuneration for acting as such and their appointments are not for any fixed term.

The Audit Committee is appointed by the Board to assist the Board in fulfilling its oversight responsibilities. Its primary duties and responsibilities are to:

- a. identify and monitor the management of the principal risks that could impact the financial reporting of the Company;
- b. monitor the integrity of the Company's financial reporting process and system of internal controls regarding financial reporting and accounting compliance;
- c. make recommendations regarding the selection of the Company's external auditors (by shareholders) and monitor their independence and performance;
- d. provide an avenue of communication among the external auditors, management and the Board;
- e. handle complaints regarding the Company's accounting practices; and
- f. administer and monitor compliance with the Company's Ethics and Conflict of Interest Policy.

Corporate Governance Committee

The members of the Corporate Governance Committee are Elizabeth Kirkwood (Chair), Carl Verley and Harry Dobson, a majority of whom are unrelated.

The Corporate Governance Committee is responsible for assessing directors on an ongoing basis and for developing the Company's approach to governance issues and for the Company's response to the Sarbanes-Oxley Act of 2002, as implemented by the U.S. Securities and Exchange Commission, and the Toronto Stock Exchange's governance guidelines.

Compensation Committee

The Compensation Committee is composed of Carl Verley (Chair), David Whittle, and Jonathan Comerford, all of whom are independent. The Committee, in consultation with the Chairman and CEO of the Company, makes recommendations to the Board on the Company's framework of executive remuneration and its cost and on specific remuneration packages for each of the executives. The remuneration of non-executives, including members of the Compensation Committee, is determined by the Board.

D. Employees.

As at the end of the fiscal year ended December 31, 2010, the fiscal nine months ended December 31, 2009, and the year ended March 31, 2009, the Company had no full-time employees. Patrick Evans and Jennifer Dawson have consulting agreements with the Company. The Toronto administrative and executive office uses outsourced administrative assistance on an as-needed, part-time basis. De Beers Canada employs personnel who conduct the development, permitting and other activities for the Gahcho Kué Project.

E.Share ownership.

The following table sets forth, as of March 30, 2011, the number of the MPV Shares beneficially owned by (a) the directors and members of senior management of the Company, individually, and as a group, and (b) the percentage ownership of the outstanding common shares represented by such shares. The security holders listed below are deemed to be the beneficial owners of common shares underlying options and warrants which are exercisable within 60 days from the above date.

Name of Beneficial Owner (11)	Amount and Nature	Percentage(9)(10) of Class	
D. Harry Dobson(1)	1,282,510	1.6	%
Patrick C. Evans(2)	1,092,803	1.4	%
Carl G. Verley(3)	290,250	*	%
Jonathan Comerford(4)	190,000	*	%
Peeyush Varshney(5)	170,122	*	%
Elizabeth Kirkwood(6)	89,900	*	%
David E. Whittle(7)	130,600	*	%
Jennifer Dawson(8)	195,000	*	%
Officer and Directors as a Group(9)	3,441,185	4.4	%

* less than 1%

(1)Includes 1,208,510 MPV Shares and 74,000 options which are exercisable at a price of \$1.26 per MPV Share, and which expire on November 23, 2013.

(2)Includes 592,168 MPV Shares and 500,635 options. 100,635 options are exercisable at a price of \$1.26 per MPV Share and expire on November 23, 2013. 300,000 options are exercisable at a price of \$1.72 per MPV Share and expire on August 24, 2014. 100,000 options were granted January 10, 2011, are exercisable at a price of \$6.13 per MPV Share, and expire on January 9, 2016. Also includes 50,000 warrants exercisable at \$3.20 per MPV Share, expiring June 8, 2011.

(3)Includes 290,250 MPV Shares and nil options.

(4)Includes 10,000 MPV Shares and 180,000 options. The options are exercisable at a price of \$1.26 per MPV Share and expire on November 23, 2013.

(5)Includes 80,122 MPV Shares and 90,000 options. The options are exercisable at a price of \$1.26 per MPV Share, and expire on November 23, 2013.

(6)Includes 19,900 MPV Shares and 70,000 options. The options are exercisable at a price of \$1.26 per MPV Share and expire on November 23, 2013.

(7)Includes 70,600 MPV Shares, and 60,000 options. The options are exercisable at a price of \$1.26 per MPV Share and expire on November 23, 2013.

(8)Includes 55,000 MPV Shares, and 140,000 options,. 90,000 options are exercisable at \$1.26 per MPV Share, expiring November 23, 2013. 50,000 options are exercisable at \$6.13 per MPV Share and expire January 9, 2016.

(9)Includes 1,114,635 options (exercisable), and 50,000 warrants.. The calculation does not include stock options or warrants that are not exercisable presently or within 60 days (of which there are none)

(10) Total issued and outstanding capital as at the close of March 30, 2010 was 78,646,973 shares.

(11) The Company has no actual knowledge of the holdings of each individual. The above information was provided by the respective individuals to the Company.

The Company has a stock option plan pursuant to which stock options may be granted to its directors, officers and employees. Stock options are awarded by resolution of the board of directors.

Item 7. Major Shareholders and Related Party Transactions

A. Major shareholders.

A major shareholder is a shareholder beneficially owning more than 5% of the issued shares of the Company.

As at March 30, 2011, the Company's issued and outstanding capital was 78,646,973 MPV Shares.

The Company is a publicly-owned corporation the majority of the MPV Shares of which are owned by persons resident outside the United States. To the best of the Company's knowledge, the Company is not directly owned or controlled by another corporation or any foreign government. As at March 30, 2011, the Company believes that approximately 16,558,891 of the MPV Shares were held by 79 shareholders with addresses in the United States. A number of these shares are held in "street" name and may, therefore, be held by several beneficial owners.

The following table shows, to the best knowledge of the Company, the number (as at March 30, 2011) and percentage of MPV Shares, warrants and options held by the Company's major shareholders:

Name of Shareholder(1)	No. of MPV Shares, Options and Warrants Held	Percentage of issued and outstanding share capital of 78,646,973 shares (as at March 30, 2011)
Bottin (International) Investments Ltd.(2) (controlled by Dermot Desmond)	15,603,429	19.84 %
Desmond P. Sharkey(3) Dublin, Ireland	6,356,000	8.08 %
De Beers Canada Inc.	3,045,543	4.57 %

(1) The Company has no actual knowledge of the above shareholdings. The above information was provided to the Company by the named shareholders.

(2) Consists of 15,603,429 MPV Shares.

(3) Consists of 6,356,000 MPV Shares.

Major shareholders of the Company do not have any special voting rights.

B. Related party transactions.

The Company is not directly or indirectly controlled by any enterprise and does not control, directly or indirectly, any other enterprises other than its subsidiaries listed under "Item 4A. Bottin (International) Investments Ltd.", which is controlled by Dermot Desmond, has significant influence over the Company as its largest single shareholder: see "Item 7A - Major shareholders", above.

Key management personnel of the Company are Patrick Evans, who is President and CEO, and Jennifer Dawson, who is Chief Financial Officer and Corporate Secretary. Patrick Evans is also a director of the Company. See "Item 6B - Compensation".

Both Mr. Evans and Ms. Dawson have consulting agreements with the Company.

There are no debts owing directly or indirectly to the Company or its subsidiaries by any director or officer of the Company or vice versa.

There is no indebtedness between the directors and the Company.

C. Interests of experts and counsel.

Not Applicable

Item 8. Financial Information

A.Consolidated Statements and Other Financial Information

Listed in Item 19 hereto are audited consolidated financial statements as at December 31, 2010 and December 31, 2009 and for the year ended December 31, 2010, the nine month period ended December 31, 2009, and the fiscal year ended March 31, 2009, accompanied by the report of our independent registered accounting firm.

There are no legal proceedings currently pending.

The Company has not paid dividends in the past and does not expect to pay dividends in the near future.

B.Significant Changes.

There have been no significant changes to the Company since the end of last fiscal year, other than the exercise of options as disclosed in the financial statements included in this Form 20-F.

Item 9. The Offer and Listing.

A.Offer and listing details.

The MPV Shares were listed and posted for trading on TSX on January 22, 1999. The MPV Shares were delisted from the VSE on January 31, 2000, and from the Nasdaq Smallcap Market on September 29, 2000. The MPV Shares traded on the OTC-Bulletin Board ("OTCBB") under the symbol "MPVI" until June 1, 2005. Commencing on April 4, 2005, the MPV Shares were listed for trading on the NYSE AMEX under the symbol "MDM".

The following tables set forth the reported high and low prices of the MPV Shares on the TSX, and for the NYSE Amex, Nasdaq and/or OTCBB (combined for the period ended March 2006), for (a) the five most recent fiscal years; (b) each quarterly period for the past two fiscal years, and (c) for the most recent twelve months.

High and Low Prices for the Five Most Recent Fiscal Years

Fiscal Year Ended	TSX		NYSE AMEX / OTCBB(1)	
	High (CDN\$)	Low (CDN\$)	High (US\$)	Low (US\$)
December 31, 2010	\$ 6.65	\$ 2.02	\$ 6.64	\$ 1.96
December 31, 2009	\$ 3.07	\$ 0.86	\$ 2.90	\$ 0.69
March 31, 2009	\$ 5.05	\$ 0.75	\$ 4.95	\$ 0.58
March 31, 2008	\$ 5.93	\$ 3.79	\$ 5.49	\$ 3.54
March 31, 2007	\$ 5.05	\$ 3.05	\$ 4.40	\$ 2.70

The MPV Shares were listed on the Nasdaq Smallcap Market on May 1, 1996 and delisted from the Nasdaq Smallcap Market on September 29, 2000, at which time they commenced trading on the OTCBB and continued through April 1, 2005. On April 4, 2005, the MPV Shares began trading on the AMEX. AMEX was taken over by NYSE Euronext which then rebranded to NYSE Amex.

High and Low Prices for Each Quarterly Period for the
Past Two Fiscal Years

Period Ended:	TSX		NYSE Amex / OTCBB	
	High (CDN\$)	Low (CDN\$)	High (US\$)	Low (US\$)
December 31, 2010	\$ 6.65	\$ 4.17	\$ 6.64	\$ 4.06
September 30, 2010	\$ 4.71	\$ 2.56	\$ 4.60	\$ 2.40
June 30, 2010	\$ 2.87	\$ 2.07	\$ 2.88	\$ 2.02
March 31, 2010	\$ 2.67	\$ 2.02	\$ 2.59	\$ 1.96
December 31, 2009	\$ 3.05	\$ 2.16	\$ 2.90	\$ 2.06
September 30, 2009	\$ 2.79	\$ 1.57	\$ 2.58	\$ 1.34
June 30, 2009	\$ 1.85	\$ 0.86	\$ 1.68	\$ 0.69

High and Low Prices for the Most Recent Twelve Months

Month Ended	TSX (CDN\$)		NYSE AMEX(1)	
	High	Low	High	Low
February 2011	\$ 6.20	\$ 4.90	\$ 6.29	\$ 5.00
January 2011	\$ 6.50	\$ 5.66	\$ 6.74	\$ 5.68
December 2010	\$ 6.65	\$ 4.80	\$ 6.64	\$ 4.74
November 2010	\$ 5.47	\$ 4.83	\$ 5.47	\$ 4.72
October 2010	\$ 5.55	\$ 4.17	\$ 5.40	\$ 4.06
September 2010	\$ 4.71	\$ 3.68	\$ 4.60	\$ 3.50
August 2010	\$ 3.89	\$ 3.06	\$ 3.78	\$ 2.99
July 2010	\$ 3.11	\$ 2.56	\$ 2.95	\$ 2.40
June 2010	\$ 2.75	\$ 2.26	\$ 2.55	\$ 2.08
May 2010	\$ 2.77	\$ 2.21	\$ 2.70	\$ 2.02
April 2010	\$ 2.87	\$ 2.07	\$ 2.88	\$ 2.06
March 2010	\$ 2.25	\$ 2.02	\$ 2.59	\$ 1.99

(1) On April 4, 2005, the MPV Shares began trading on the American Stock Exchange. AMEX was taken over by NYSE, and rebranded as NYSE Amex. On December 31, 2010, the closing price of the MPV Shares on the TSX was \$6.50 and on March 30, 2011 was \$6.02. The closing price of MPV Shares on NYSE Amex on December 31, 2010 was US\$6.55 per share. The closing price on March 30, 2011 on the NYSE Amex was US\$6.23 per MPV Share.

B. Plan of distribution.

Not Applicable.

C. Markets.

The MPV Shares are listed on the TSX under the symbol "MPV" and were also quoted on the over-the-counter (OTC) Bulletin Board pursuant to Rule 6530(a) of the NASD's OTC Bulletin Board Rules under the symbol "MPVI.OB" until April 1, 2005. Commencing April 4, 2005, the Company's shares commenced trading on the AMEX (now NYSE

Amex) under the symbol "MDM". The Common Shares are not registered to trade in the United States in the form of American Depositary Receipts or similar certificates.

D. Selling shareholders.

Not Applicable.

E. Dilution.

Not Applicable.

F. Expenses of the issue.

Not Applicable.

Item 10. Additional Information.

A.Share capital.

This Form 20-F is being filed as an annual report and, as such, there is no requirement to provide information under this sub-item.

B.Memorandum and articles of association.

Incorporation

The Company was amalgamated in British Columbia under incorporation number 553442 on November 1, 1997 under the name of Mountain Province Mining Inc. The Company changed its name to Mountain Province Diamonds Inc. on October 16, 2000.

The Company is also registered as an extra-territorial corporation in the Northwest Territories (Registration no. E 6486, on February 25, 1998, amended October 16, 2000 for the name change).

The Company does not have any stated "objects" or "purposes" as such are not required by the corporate laws of the Province of British Columbia. Rather, the Company is, by such corporate laws, entitled to carry on any activities whatsoever, which are not specifically precluded by other statutory provisions of the Province of British Columbia.

The Company was amalgamated under the British Columbia Company Act, which has now been replaced by the Business Corporations Act (British Columbia) (the "BCA"). The BCA came into effect on March 29, 2004. The Company has completed its transition from the Company Act to the BCA and adopted new Articles which reflect the provisions of the BCA. The Company's Memorandum of Articles has been replaced by a Notice of Articles. Pursuant to the Shareholders special resolution on September 20, 2005 approving the continuance of the Company into Ontario, the Company continued under the laws of the Province of Ontario pursuant to Articles of Continuance dated May 8, 2006.

Powers, functions and qualifications of Directors

The powers and functions of directors are set forth in the Ontario Securities Act and in the Bylaws of the Company.

With respect to the voting powers of directors, the Ontario Securities Act provides that a director (or senior officer) has a disclosable interest in a contract or transaction if the contract or transaction is material to the Company and the director has a material interest in the contract.

The Bylaws provide that a director or senior officer who has, directly or indirectly, a material interest in an existing or proposed material contract or transaction of the Company or who holds any office or possesses any property whereby, directly or indirectly, a duty or interest might be created to conflict with his duty or interest as a director or senior officer, has to disclose the nature and extent of this interest or conflict with his duty and interest as a director or senior officer, in accordance with the provisions of the Ontario Securities Act. A director is also prohibited from voting in respect of any such proposed material contract or transaction and if he does so, his vote shall not be counted, but he shall be counted in the quorum at the meeting at which such vote is taken. Notwithstanding this, if all of the directors

have a material interest in a proposed material contract or transaction, any or all of those directors may vote on a resolution to approve the contract or transaction. However, in this case the directors must have the contract or transaction approved by special resolution of the shareholders to avoid accountability for any profits.

The Bylaws further provide that, subject to the provisions of the Ontario Securities Act, no disclosure is required of a director or senior officer, and a director need not refrain from voting in respect of the following types of contracts and transactions:

- a) A contract or transaction where both the Company and the other party to the contract or transaction are wholly owned subsidiaries of the same corporation;
- b) A contract or transaction where the Company is a wholly owned subsidiary of the other party to the contract or transaction;
- c) A contract or transaction where the other party to the contract or transaction is a wholly owned subsidiary of the Company;
- d) A contract or transaction where the director or senior officer is the sole shareholder of the Company or of a corporation of which the Company is a wholly owned subsidiary;
- e) An arrangement by way of security granted by the Company for money loaned to, or obligations undertaken by, the director or senior officer, or a person in whom the director or senior officer has a material interest, for the benefit of the Company or an affiliate of the Company;
- f) A loan to the Company, which a director or senior officer or a specified corporation or a specified firm in which he has a material interest has guaranteed or joined in guaranteeing the repayment of the loan or any part of the loan;
- g) Any contract or transaction made or to be made with, or for the benefit of a corporation that is affiliated with the Company and the director or senior officer is also a director or senior officer of that corporation or an affiliate of that corporation;
- h) Any contract by a director to subscribe for or underwrite shares or debentures to be issued by the Company or a subsidiary of the Company;
- i) Determining the remuneration of the director or senior officer in that person's capacity as director, officer, employee or agent of the Company or an affiliate of the Company;
- j) Purchasing and maintaining insurance to cover a director or senior officer against liability incurred by them as a director or senior officer; or
- k) The indemnification of any director or senior officer by the Company.

The Ontario Securities Act provides that a contract or transaction with a company is not invalid merely because a director or senior officer of the company has an interest, direct or indirect, in the contract or transaction, a director or senior officer of the company has not disclosed an interest he or she had in the contract or transaction, or because the directors or shareholders of the company have not approved the contract or transaction in which a director or senior officer of the company has an interest.

The Ontario Securities Act also provides that a director or senior officer with a "disclosable interest" in a contract or transaction with the Company is liable to account for any profit made from the contract or transaction unless disclosure of the director's interest in such contract or transaction had been made and the director abstained from voting on the approval of the transaction.

Subject to the provisions of the Ontario Securities Act, the directors may vote on compensation for themselves or any members of their body. A contract relating primarily to a fiduciary's remuneration as a director, officer, employee or agent of the Company or its affiliates is a permitted conflict of interest under the Company's Corporate Governance Policy.

There are no limitations on the exercise by the board of directors of the Company's borrowing powers.

There are no provisions for the retirement or non-retirement of directors under an age limit.

There is no requirement for any director to hold any shares in the Company.

Rights and Restrictions Attached to Shares

As all of the authorized and issued MPV Shares are of one class, there are no special rights or restrictions of any nature or kind attached to any of the shares. All authorized and issued shares rank equally in respect of the declaration and receipt of dividends, and the rights to share in any profits or surplus on liquidation, dissolution or winding up of the Company. Each MPV Share has attached to it one vote.

Alteration of Share Rights

To alter the rights of holders of issued shares of the Company, such alteration must be approved by a vote of not less than two-thirds of the shareholders voting in person or by proxy at a meeting of the shareholders of the Company.

Annual General Meetings

Annual general meetings are called and scheduled upon decision by the board of directors. The directors may also convene a general meeting of shareholders at any time. There are no provisions in the Company's Bylaws for the requisitioning of special meetings by shareholders. However, the Ontario Securities Act provides that the holders of not less than 5% of the issued shares of the Company may requisition the directors to call a general meeting of the shareholders for the purposes stated in the requisition. All meetings of the shareholders may be attended by registered shareholders or persons who hold powers of attorney or proxies given to them by registered shareholders.

Foreign Ownership Limitations

There are no limitations prohibiting shares being held by non-residents, foreigners or any other group.

Change of Control

There are no provisions in the Company's Bylaws that would have the effect of delaying, deferring or preventing a change in the control of the Company, or that would operate with respect to any proposed merger, acquisition or corporate re-structuring of the Company.

At the November 18, 2010 Annual and Special Meeting of the shareholders, a Shareholder Rights Plan dated September 9, 2010 (the "Shareholder Rights Plan") was approved, ratified, confirmed and adopted by the shareholders of the Company in accordance with and subject to its terms and conditions. The objectives of the Shareholder Rights Plan are to ensure, to the extent possible, that all shareholders of the Company are treated equally and fairly in connection with any take-over bid for the Company.

The Shareholder Rights Plan is designed to discourage discriminatory or unfair take-over bids for the Company and gives the Board of Directors time, if appropriate, to pursue alternatives to maximize shareholder value in the event of an unsolicited (or "hostile") take-over bid for the Company. The Shareholder Rights Plan will encourage a person proposing to make, or who has made, a take-over bid for the Company (an "Offeror") to proceed by way of a Permitted Bid or to approach the Board with a view to negotiation, by creating the potential for substantial dilution of the Offeror's position. The Permitted Bid provisions of the Shareholder Rights Plan are designed to ensure that, in any

take-over bid, all shareholders are treated equally, receive the maximum value for their investment and are given adequate time to properly assess the take-over bid on a fully informed basis.

The Shareholder Rights Plan may, however, increase the price to be paid by a potential Offeror to obtain control of the Company and may discourage certain transactions, including a take-over bid for less than all the common shares of the Company. Accordingly, the Shareholder Rights Plan may deter some take-over bids.

In addition, the Shareholder Rights Plan Agreement provides that the continued existence of the Shareholder Rights Plan must be ratified by a majority of the shareholders of the Company at a meeting of the shareholders at or prior to the annual meeting of the shareholders in the year 2013.

Share Ownership Reporting Obligations

There are no provisions in the Company's Bylaws requiring share ownership to be disclosed. The securities laws of the Province of Ontario and other provinces in Canada having jurisdiction over the Company require disclosure of shareholdings by:

- (a) insiders who are directors or senior officers of the Company; and
- (b) a person who has direct or indirect beneficial ownership of, control or direction over, or a combination of direct or indirect beneficial ownership of and of control or direction over securities of the Company carrying more than 10% of the voting rights attached to all the Company's outstanding voting securities.

The threshold of share ownership percentage requiring disclosure of ownership is higher in the home jurisdiction of Ontario than in the United States where United States law prescribes a 5% threshold for ownership disclosure.

C. Material contracts.

The Company entered into the following material contracts in the last two fiscal periods, up to the date of this Form 20-F: the 2009 Gahcho Kué Joint Venture Agreement between the Company and De Beers Canada; the contract between the Company, JDS and De Beers Canada relating to completion of the Gahcho Kué Feasibility Study; a revised consulting agreement with Patrick Evans, the Company's President and CEO, which was amended in August 2009 to increase his annual remuneration, to grant stock options to him, and to provide for future performance bonuses, and revision to the consulting agreement with Jennifer Dawson, the Company's CFO, which was amended in December 2010 for change of control provisions.

D. Exchange controls.

Exchange Controls and Investment Canada Act

Canada has no system of exchange controls. There are no exchange restrictions on borrowing from foreign countries nor on the remittance of dividends, interest, royalties and similar payments, management fees, loan repayments, settlement of trade debts, or the repatriation of capital. Any such remittances to United States residents, however, may be subject to a withholding tax pursuant to the Canadian Income Tax Act as modified by the reciprocal tax treaty between Canada and the United States. See "Item 10E, Taxation".

Subject to certain exemptions, every "acquisition of control"¹ by a "non-Canadian"² of a "Canadian business",³ even where such business is already controlled by a non-Canadian, requires either notification (essentially a post-closing administrative formality) or detailed review under the Investment Canada Act (the "ICA"). Whether a transaction is subject to notification or review depends upon whether certain asset thresholds are satisfied, which thresholds generally depend on (1) the transaction structure (direct or indirect acquisition),⁴ (2) whether the purchaser (referred to as the "investor" under the ICA) and/or current owner of the Canadian business is a "WTO investor"⁵, (3) whether the Canadian business is a "cultural business"⁶, and (4) whether the value of the Canadian assets and assets of the Canadian entities being acquired exceeds 50% of the value of all assets being acquired. The table below provides a summary of the relevant asset thresholds.

Transaction Structure	Status of Investor/ Vendor	Cultural Business	Threshold for Review
Direct	WTO Investor or Vendor	No	≥C\$312 million ⁷
		Yes	≥C\$5 million
	Non-WTO Investor and Non-WTO Vendor	No	(book value of assets)
		Yes	
Indirect	WTO Investor or Vendor	No	Exempt from review
		Yes	≥C\$50 million*
	Non-WTO Investor and Non-WTO Vendor	No	(book value of assets)
		Yes	

* Note that a C\$5 million threshold (rather than C\$50 million) applies to indirect acquisitions where the value of the assets of the entity carrying on the Canadian business and of all other entities in Canada being acquired exceeds 50% of the value of all the assets acquired.

Where the ICA applies and a transaction is not reviewable, a notification (containing certain prescribed information about the purchaser, the transaction and the Canadian business) is required to be filed by the investor with the Investment Review Division of Industry Canada any time prior to closing the transaction or within thirty (30) days thereafter. However, in the case of an investment in a Canadian business that has activities related to Canada's cultural heritage or national identity (as prescribed), the Governor in Council has the option of ordering a review, if notice of same is provided to the investor within 21 days of the filing of the completed notification. (Note that notification under the ICA is also required with respect to the establishment of a new Canadian business.)

Where a transaction is reviewable and is a direct acquisition, an application for review must be filed by the investor prior to closing and the parties are prohibited from closing until the Minister of Industry and/or, in the case of acquisitions of "cultural businesses", the Minister of Canadian Heritage, confirms to the purchaser that he/she is satisfied or is deemed to be satisfied that the investment is likely to be of "net benefit to Canada", based on certain prescribed factors set out in the ICA (set out below) and in view of any legally binding undertakings the purchaser is willing to make. Where a transaction is reviewable and is an indirect acquisition, an application for review must be filed by the investor within 30 days after closing.

¹ What constitutes an "acquisition of control" is set out in the ICA and includes the acquisition of all or substantially all of the assets used in carrying on the Canadian business, or the acquisition of a majority of the voting interests of an entity, whether the entity is of corporate or some other form (e.g., a partnership). The acquisition of less than one-third of the voting shares of a corporation is deemed not to be an acquisition of control of that corporation, while the acquisition of less than a majority but one-third or more of such shares is presumed to be an acquisition of control unless it can be established that the purchaser will not control the corporation in fact through the ownership of voting shares. The acquisition of less than a majority of the voting interests of a non-corporation is deemed not to be an acquisition of control.

2 A "non-Canadian" is a purchaser the ultimate control of which resides outside of Canada.

3 A "Canadian business" is defined as a business carried on in Canada that has (a) a place of business in Canada, (b) an individual or individuals in Canada who are employed or self-employed in connection with the business, and (c) assets in Canada used in carrying on the business.

4 A direct acquisition is the acquisition of assets or voting interests of an entity in Canada that carries on the Canadian business, while an indirect acquisition is the acquisition of the voting shares of a non-Canadian corporation that controls, directly or indirectly, an entity in Canada carrying on the Canadian business.

5 A "WTO investor" is a purchaser that is controlled ultimately by nationals or residents of a World Trade Organization ("WTO") member country.

6 A "cultural business" is one that (i) publishes, distributes or sells books, magazines, periodicals or newspapers, (ii) produces, distributes, sells or exhibits film or video recordings or audio or video music recordings, (iii) produces, distributes or sells music in print or machine readable form, or (iv) is a radio, television, cable television or satellite broadcast undertaking.

7 Note that the current C\$312 million threshold is based on the book value of assets of the Canadian business for the fiscal year immediately preceding implementation of the transaction. On a day that is to be fixed by order of the Governor in Council (the federal Cabinet), the threshold for direct acquisitions by WTO investors will change to one based on the "enterprise value" of the Canadian business. The enterprise value threshold will be established at C\$600 million for investments made in the first two-year period; and will increase to C\$800 million in the following two years and C\$1 billion thereafter, subject to indexation to Canada's GDP. The ICA does not define "enterprise value"; its manner of calculation will be set out in as yet to be promulgated regulations.

Once an application for review has been filed, whether pre-or post-closing, and has been certified to be complete, the responsible Minister has a 45-day period within which to make a "net benefit" determination, which period may be unilaterally extended once by the Minister for an additional 30 days, and thereafter extended with the consent of the investor. (Where notices related to a national security review are given to an investor (see below), the length of the initial 45-day review period and any subsequent extension periods are deemed to expire five days after the expiry of certain time periods or the issuance of certain notices related to the national security review.)

The Minister will determine whether the investment is likely to be of net benefit to Canada, taking into account the information provided and having regard to certain assessment factors. These factors include: (i) the effect of the investment on the level and nature of economic activity in Canada, including the effect on employment, on resource processing, and on the utilization of parts, components and services produced in Canada; (ii) the effect of the investment on exports from Canada; (iii) the degree and significance of participation by Canadians in the Canadian business and in any industry in Canada of which it forms a part; (iv) the effect of the investment on productivity, industrial efficiency, technological development, product innovation and product variety in Canada; (v) the effect of the investment on competition within any industry or industries in Canada; (vi) the compatibility of the investment with national industrial, economic and cultural policies taking into consideration industrial, economic and cultural objectives enunciated by the government or legislature of any province likely to be significantly affected by the investment; and (vii) the contribution of the investment to Canada's ability to compete in world markets.

Where the Minister has advised the investor that he is not satisfied that the investment is likely to be of net benefit to Canada, the investor has the right to make representations and submit undertakings within 30 days of the date of the notice (or any further period that is agreed upon between the investor and the Minister). Within a reasonable time after the expiration of this 30 day period (or the agreed extension), the Minister must notify the acquiror (i) that he is now satisfied that the investment is likely to be of net benefit to Canada or (ii) that he is not satisfied that the investment is likely to be of net benefit to Canada. In the latter case, the investor may not proceed with the investment or, if the investment has already been consummated, must divest itself of control of the Canadian business.

Effective February 6, 2009, every investment by a non-Canadian to (i) establish a new Canadian business, (ii) acquire control of a Canadian business, or (iii) acquire in whole or in part (e.g., a minority interest) or establish an entity carrying on all or any part of its operations in Canada (if the entity has a place of operations in Canada, employees or assets in Canada used in connection with its operations) may be subjected to a national security review under the ICA, regardless of the value of the investment. Investors that receive notice of a potential or actual national security review are prohibited from implementing a proposed investment pending the outcome of the review. Where the Minister of Industry, after consultation with the Minister of Public Safety and Emergency Preparedness, is satisfied that the investment would be "injurious to national security" (an undefined phrase), the Governor in Council may "take any measures it considers advisable" to protect national security, including: (i) prohibiting implementation of a proposed investment; (ii) authorizing the investment on terms and conditions or subject to written undertakings from the investor; and (iii) in the case of completed investments, requiring the investor to divest control of the Canadian business or its interest in the Canadian business.

Unless a transaction is otherwise subject to notification or to review under the ICA, an investor is not required to notify Industry Canada of transactions that may raise potential national security issues. Where, however, a national security review is ordered, an investor is afforded the right to make representations to the Minister, and is required to provide any information considered necessary by the Minister for purposes of the review. New National Security Review of Investments Regulations, in effect since September 2009, set out timelines for each step of the national security review process. If the maximum prescribed periods are fully utilized, a national security review could take 130 days (assuming a notice of possible review is issued), with the potential for the Minister of Industry to request from the investor an extension of the review period.

E.Taxation.

A brief description of certain provisions of the tax treaty between Canada and the United States, Canada-United States Tax Convention (1980), as amended, (the "Convention"), is included below, together with a brief outline of certain taxes, including withholding provisions, to which United States holders of common stock of the Company are subject under the Income Tax Act (Canada) and the regulations thereunder (the "Canadian Tax Act"). The consequences, if any, of provincial, territorial, state, local or foreign taxes (other than Canadian federal income taxes) are not considered.

The following information is of a general nature only and is not, and is not intended to be, legal or tax advice to any holder or prospective holder of common stock of the Company and no representations with respect to the income tax consequences to any such holder are made. Holders of common stock of the Company should seek the advice of their own tax advisors, tax counsel or accountants with respect to the applicability or effect on their own individual circumstances of the matters referred to herein.

Certain Canadian Federal Income Tax Consequences

The discussion under this heading is a general summary of the principal Canadian federal income tax consequences pursuant to the Canadian Tax Act of acquiring, holding and disposing of shares of common stock of the Company for a shareholder of the Company who, at all relevant times and for purposes of the Canadian Tax Act and the Convention, is not, and is not deemed to be, a resident of Canada, and is solely a resident of the United States, holds shares of common stock of the Company as capital property, deals at arm's length and is not affiliated with the Company, and, does not use or hold, is not deemed to use or hold shares of the common stock of the Company in, or in the course of, carrying on business in Canada. (a "U.S. Holder"). This summary is based on the current provisions of the Canadian Tax and on the Company's understanding of the administrative policies and assessing practices of Canada Revenue Agency, in effect as of the date hereof, and takes into account all specific proposals to amend the Canadian Tax Act and regulations to it publicly announced by the Minister of Finance of Canada prior to the date hereof. No assurances can be given that such proposed amendments will be enacted in the form proposed, or at all. This summary is not exhaustive of all potential Canadian federal income tax consequences to a U.S. Holder and does not take into account or anticipate any other changes in law or administrative policies or assessing practices, whether by judicial, governmental or legislative action or decision. This discussion is general only and is not a substitute for independent advice from a shareholder's own Canadian and U.S. tax advisors.

The provisions of the Canadian Tax Act are subject to income tax treaties to which Canada is a party, including the Convention.

Dividends on Common Shares and Other Income

Under the Canadian Tax Act, a non-resident of Canada is generally subject to Canadian non-resident tax at the rate of 25 percent on amounts that are paid or credited or deemed under the Canadian Tax Act to be paid or credited as, on account or in lieu of payment of, or in satisfaction of dividends to a U.S. Holder by a corporation resident in Canada. The Convention limits the rate to 15 percent if the shareholder is a resident of the United States entitled to all of the benefits of the Convention and the dividends are beneficially owned by and paid to such shareholder, and to 5 percent if the shareholder is a corporation entitled to all of the benefits of the Convention that beneficially owns at least 10 percent of the voting stock of the Canadian payor corporation.

The non-resident tax payable on dividends is to be withheld at source by the Company or people acting on its behalf.

Dispositions of Common Shares

Under the Canadian Tax Act, a U.S. Holder will generally not be subject to tax in respect of capital gains realized on the disposition or deemed disposition of shares of the common stock of the Company unless, at the time of disposition, the shares constitute "taxable Canadian property" (as defined in the Canadian Tax Act) of the U.S. Holder at the time of disposition and the U.S. Holder is not entitled to relief under the Convention.

Provided that shares are listed on a "designated stock exchange" (which includes the TSX) at the time of disposition, the shares of common stock of the Company will not constitute taxable Canadian property of a U.S. Holder at a particular time unless (i) at any time in the 60 months immediately preceding the disposition of such shares 25% or more of the issued shares of any class or series in the capital stock of the Company were owned by one or more persons in a group comprising the U.S. Holder and persons with whom the U.S. Holder did not deal at arm's length; and (ii) more than 50% of the fair market value of the common stock of the Company was derived directly or indirectly from one or any combination of: (a) real or immovable property situated in Canada; (b) "Canadian resource properties" (as defined in the Canadian Tax Act), (c) "timber resource properties" (as defined in the Canadian Tax Act), or (d) options in respect of, or interests in, or for civil law right in, any of the foregoing, whether or not the property exists.

The Convention generally relieves U.S. Holders from liability for Canadian tax on capital gains derived on a disposition of shares that are "taxable Canadian property" unless

- (c) the value of the shares is derived principally from "real property" situated in Canada, including the right to explore for or exploit natural resources and rights to amounts computed by reference to production, or
- (d) the shareholder was an individual resident in Canada for 120 months during any period of 20 consecutive years preceding the disposition of the shares, and at any time during the 10 years immediately preceding the disposition of the shares the individual was a resident of Canada, and the shares were owned by the individual when he or she ceased to be resident in Canada.

If a U.S. Holder realizes a capital gain or capital loss from a disposition of a share of common stock of the Company which constitutes taxable Canadian property for purposes of the Canadian Tax Act and is not otherwise exempt from Canadian tax under the Convention, then the capital gain or capital loss is the amount, if any, by which the U.S. Holder's proceeds of disposition exceed (or are exceeded by, respectively) the aggregate of the U.S. Holder's adjusted cost base of the share and reasonable expenses of disposition as determined under the Canadian Tax Act. The capital gain or loss must be computed in Canadian currency using a weighted average adjusted cost base for identical properties. Generally one-half of a capital gain ("taxable capital gain") is included in income for Canadian tax purposes in the year of the disposition, and one-half of a capital loss ("an allowable capital loss") must be deducted from taxable capital gains realized by the U.S. Holder in that year. Allowable capital losses in excess of taxable capital gains for that year may generally be carried back three years or forward indefinitely and deducted against net taxable capital gains in those years, in the manner permitted under the Canadian Tax Act.

United States Federal Income Tax Consequences

The following is a summary of certain U.S. federal income tax consequences to a U.S. Holder (as defined below) arising from and relating to the acquisition, ownership, and disposition of shares of common stock of the Company ("Common Shares").

This summary is for general information purposes only and does not purport to be a complete analysis or listing of all potential U.S. federal income tax consequences that may apply to a U.S. Holder as a result of the acquisition, ownership, and disposition of Common Shares. In addition, this summary does not take into account the individual

facts and circumstances of any particular U.S. Holder that may affect the U.S. federal income tax consequences of the acquisition, ownership, and disposition of Common Shares. This summary is not intended to be, and should not be construed as, legal or U.S. federal income tax advice with respect to any U.S. Holder. Each U.S. Holder should consult its own tax advisor regarding the U.S. federal, U.S. state and local, and foreign tax consequences of the acquisition, ownership, and disposition of Common Shares.

Circular 230 Disclosure

Any statement made herein regarding any U.S. federal tax is not intended or written to be used, and cannot be used, by any taxpayer for purposes of avoiding any penalties. Any such statement herein is written in connection with the marketing or promotion of the transaction to which the statement relates. Each taxpayer should seek advice based on the taxpayer's particular circumstances from an independent tax advisor.

Scope of this Disclosure

Authorities

This summary is based on the Internal Revenue Code of 1986, as amended (the "Code"), Treasury Regulations, published Internal Revenue Service ("IRS") rulings, published administrative positions of the IRS, the Convention Between Canada and the United States of America with Respect to Taxes on Income and on Capital, signed September 26, 1980, as amended (the "Canada-U.S. Tax Convention"), and U.S. court decisions that are applicable as of the date of this Annual Report. Any of the authorities on which this summary is based could be changed in a material and adverse manner at any time, and any such change could be applied on a retroactive basis. This summary does not discuss the potential effects, whether adverse or beneficial, of any proposed legislation or proposed changes to the Canada-U.S. Tax Convention.

U.S. Holders

For purposes of this summary, a "U.S. Holder" is a beneficial owner of Common Shares that, for U.S. federal income tax purposes, is (a) an individual who is a citizen or, or resident in, the U.S., (each as defined under U.S. tax laws), (b) a corporation, or other entity classified as a corporation for U.S. federal income tax purposes, that is created or organized in or under the laws of the U.S. or any state in the U.S., including the District of Columbia, (c) an estate if the income of such estate is subject to U.S. federal income tax regardless of the source of such income, or (d) a trust if (i) such trust has validly elected to be treated as a U.S. person for U.S. federal income tax purposes or (ii) a U.S. court is able to exercise primary supervision over the administration of such trust and one or more U.S. persons have the authority to control all substantial decisions of such trust.

Non-U.S. Holders

A "non-U.S. Holder" is a beneficial owner of Common Shares other than a U.S. Holder. This summary does not address the U.S. federal income tax consequences of the acquisition, ownership, and disposition of Common Shares to non-U.S. Holders.

U.S. Holders Subject to Special U.S. Federal Income Tax Rules Not Addressed

This summary does not address the U.S. federal income tax consequences of the acquisition, ownership, and disposition of Common Shares to U.S. Holders that are subject to special provisions under the Code, including but not limited to the following U.S. Holders: (a) U.S. Holders that are tax-exempt organizations, qualified retirement plans, individual retirement accounts, or other tax-deferred accounts; (b) U.S. Holders that are financial institutions, insurance companies, real estate investment trusts, regulated investment companies or broker-dealers or dealers in securities; (c) U.S. Holders that have a "functional currency" other than the U.S. dollar; (d) U.S. Holders that are subject to the alternative minimum tax provisions of the Code; (e) former U.S. citizens or former long-term residents of the United States as defined in Section 877 of the Code; (f) U.S. Holders that own Common Shares as part of a straddle, hedging transaction, conversion transaction, constructive sale, or other arrangement involving more than one position; (g) U.S. Holders that acquired Common Shares in connection with the exercise of employee stock options or

otherwise as compensation for services; (h) partners of partnerships that hold Common Shares or owners of other entities classified as partnerships or "pass-through" entities for U.S. federal income tax purposes that hold Common Shares, (i) U.S. Holders that hold Common Shares other than as a capital asset within the meaning of Section 1221 of the Code. U.S. Holders that are subject to special provisions under the Code, including U.S. Holders described immediately above, should consult their own tax advisors regarding the tax consequences of the acquisition, ownership, and disposition of Common Shares.

Tax Consequences Other than U.S. Federal Income Tax Consequences Not Addressed

This summary does not address U.S. state, local or foreign tax consequences to U.S. Holders of the acquisition, ownership, and disposition of Common Shares, nor does it address U.S. federal tax consequences other than income tax. Each U.S. Holder should consult its own tax advisors regarding these and other tax consequences of the acquisition, ownership, and disposition of Common Shares.

U.S. Federal Income Tax Consequences of the Acquisition, Ownership, and Disposition of Common Shares

Distributions on Common Shares

General Taxation of Distributions

Generally, and subject to the discussion below, concerning "passive foreign investment companies" ("PFICs"), a U.S. Holder that receives a distribution, including a constructive distribution, with respect to the Common Shares will be required to include the amount of such distribution in gross income as a dividend (without reduction for any Canadian income tax withheld from such distribution) to the extent of the current or accumulated "earnings and profits" of the Company (as determined under U.S. tax principles). To the extent that a distribution exceeds the current and accumulated "earnings and profits" of the Company, such distribution will be treated (a) first, as a tax-free return of capital to the extent of a U.S. Holder's tax basis in the Common Shares and, (b) thereafter, as gain from the sale or exchange of such Common Shares. (See more detailed discussion at "Disposition of Common Shares" below).

Reduced Tax Rates for Certain Dividends

A dividend paid by the Company on or before December 31, 2012 may be taxed at the preferential tax rates applicable to long-term capital gains (generally, a 15% federal tax rate) if (a) the Company is a "qualified foreign corporation" (as defined below), (b) the U.S. Holder receiving such dividend is an individual, estate, or trust, and (c) such dividend is paid on Common Shares that have been held by such U.S. Holder for at least 61 days during the 121-day period beginning 60 days before the "ex-dividend date" (i.e., the first date that a purchaser of such Common Shares will not be entitled to receive such dividend).

The Company generally will be a "qualified foreign corporation" under Section 1(h)(11) of the Code (a "QFC") if (a) the Company is incorporated in a possession of the U.S., (b) the Company is eligible for the benefits of the Canada-U.S. Tax Convention, or (c) the Common Shares are readily tradable on an established securities market in the U.S. However, even if the Company satisfies one or more of such requirements, the Company will not be treated as a QFC if the Company is a PFIC for the taxable year during which the Company pays a dividend or for the preceding taxable year.

As discussed below, the Company believes that it is a PFIC (see more detailed discussion at "Additional Rules that May Apply to U.S. Holders-Passive Foreign Investment Company" below). Accordingly, the Company does not believe that it will be a QFC. If the Company is not a QFC, a dividend paid by the Company to a U.S. Holder, including a U.S. Holder that is an individual, estate, or trust, generally will be taxed at ordinary income tax rates (and not at the preferential tax rates applicable to long-term capital gains). As discussed below, additional U.S. tax consequences may arise on such a dividend under the PFIC rules. The dividend rules are complex and each U.S. Holder should consult its own tax advisors regarding the dividend rules.

Distributions Paid in Foreign Currency

The amount of a distribution paid to a U.S. Holder in foreign currency generally will be equal to the U.S. dollar value of such distribution based on the exchange rate applicable on the date of receipt. A U.S. Holder that does not convert foreign currency received as a distribution into U.S. dollars on the date of receipt generally will have a tax basis in such foreign currency equal to the U.S. dollar value of such foreign currency on the date of receipt. Such a U.S. Holder generally will recognize ordinary income or loss on the subsequent sale or other taxable disposition of such foreign currency (including an exchange for U.S. dollars).

Dividends Received Deduction

Dividends paid on the Common Shares generally will not be eligible for the "dividends received deduction." The availability of the dividends received deduction is subject to complex limitations that are beyond the scope of this discussion, and a U.S. Holder that is a corporation should consult its own tax advisors regarding the dividends received deduction.

Disposition of Common Shares

Subject to the discussion of the PFIC rules, below, a U.S. Holder will recognize gain or loss on the sale or other taxable disposition of Common Shares in an amount equal to the difference, if any, between (a) the amount of cash plus the fair market value of any property received and (b) such U.S. Holder's tax basis in the Common Shares sold or otherwise disposed of. Any such gain or loss generally will be capital gain or loss, which will be long-term capital gain or loss if the Common Shares are held for more than one year.

Although preferential tax rates currently apply to long-term capital gains of a U.S. Holder that is an individual, estate, or trust, such preferential tax rates are not available if the Company is a PFIC, unless a "qualified electing fund" ("QEF") election is made, as described below. There are currently no preferential tax rates for long-term capital gains of a U.S. Holder that is a corporation. Deductions for capital losses and net capital losses are subject to complex limitations.

Foreign Tax Credit

A U.S. Holder who pays (whether directly or through withholding) Canadian income tax with respect to the Common Shares generally will be entitled, at the election of such U.S. Holder, to receive either a deduction or a credit for such Canadian income tax paid. Generally, a credit is more advantageous because it will reduce a U.S. Holder's U.S. federal income tax liability on a dollar-for-dollar basis, whereas a deduction will reduce a U.S. Holder's income subject to U.S. federal income tax. This election is made on a year-by-year basis and applies to all foreign taxes paid (whether directly or through withholding) by a U.S. Holder during a year.

Complex limitations apply to the foreign tax credit, including the general limitation that the credit cannot exceed the proportionate share of a U.S. Holder's U.S. federal income tax liability that such U.S. Holder's "foreign source" taxable income bears to such U.S. Holder's worldwide taxable income. In applying this limitation, a U.S. Holder's various items of income and deduction must be classified, under complex rules, as either "foreign source" or "U.S. source." In addition, this limitation is calculated separately with respect to specific categories of income known as "baskets", and there are limitations under the basket rules also. Unused foreign tax credits generally can be carried back one year and forward ten years. The foreign tax credit rules are complex, and each U.S. Holder should consult its own tax advisors regarding the foreign tax credit rules.

Information Reporting; Backup Withholding Tax

Payments of dividends made on, and proceeds arising from certain sales or other taxable dispositions of, Common Shares generally will be subject to information reporting and backup withholding tax, at the rate of 28%, if a U.S. Holder (a) fails to furnish such U.S. Holder's correct U.S. taxpayer identification number (generally on Form W-9), (b) furnishes an incorrect U.S. taxpayer identification number, (c) is notified by the IRS that such U.S. Holder has previously failed to properly report items subject to backup withholding tax, or (d) fails to certify, under penalty of perjury, that such U.S. Holder has furnished its correct U.S. taxpayer identification number and that the IRS has not notified such U.S. Holder that it is subject to backup withholding tax. However, U.S. Holders that are corporations generally are excluded from these information reporting and backup withholding tax rules. Any amounts withheld under the U.S. backup withholding tax rules will be allowed as a credit against a U.S. Holder's U.S. federal income tax

liability, if any, or will be refunded, if such U.S. Holder furnishes required information to the IRS. Each U.S. Holder should consult its own tax advisors regarding the information reporting and backup withholding tax rules.

Additional Rules that May Apply to U.S. Holders

If the Company is a "controlled foreign corporation" or a "passive foreign investment company" (each as defined below), the U.S. federal income tax consequences to U.S. Holders described above of the acquisition, ownership, and disposition of Common Shares are modified by special rules.

Controlled Foreign Corporation

The Company generally will be a "controlled foreign corporation" under Section 957 of the Code (a "CFC") if more than 50% of the total voting power or the total value of the outstanding shares of the Company is owned, directly or indirectly, by citizens or residents of the U.S., domestic partnerships, domestic corporations, domestic estates, or domestic trusts (each as defined in Section 7701(a)(31) of the Code), each of which own, directly or indirectly, 10% or more of the total voting power of the outstanding shares of the Company (a "10% Shareholder").

If the Company is a CFC, a 10% Shareholder generally will be subject to current U.S. federal income tax with respect to (a) such 10% Shareholder's pro rata share of the "subpart F income" (as defined in Section 952 of the Code) of the Company and (b) such 10% Shareholder's pro rata share of the earnings of the Company invested in "United States property" (as defined in Section 956 of the Code). In addition, under Section 1248 of the Code, any gain recognized on the sale or other taxable disposition of Common Shares by a U.S. Holder that was a 10% Shareholder at any time during the five-year period ending with such sale or other taxable disposition generally will be treated as a dividend to the extent of the "earnings and profits" of the Company that are attributable to such Common Shares.

The Company does not believe that it has previously been, or currently is, a CFC. However, there can be no assurance that the Company will not be a CFC for the current or any future taxable year.

Passive Foreign Investment Company

The Company generally will be a "passive foreign investment company" under Section 1297 of the Code (a "PFIC") if, for a taxable year, (a) 75% or more of the gross income of the Company for such taxable year is passive income or (b) 50% or more of the assets held by the Company either produce passive income or are held for the production of passive income. "Passive income" includes, for example, dividends, interest, certain rents and royalties, certain gains from the sale of stock and securities, and certain gains from commodities transactions.

For purposes of the PFIC income and asset test described above, if the Company owns, directly or indirectly, 25% or more of the total value of the outstanding shares of another foreign corporation, the Company will be treated as if it (a) held a proportionate share of the assets of such other foreign corporation and (b) received directly a proportionate share of the income of such other foreign corporation. If the Company is a PFIC, in addition to the rules discussed below, U.S. Holders generally may be required to file certain information returns with the IRS. The PFIC rules are extremely complex, and U.S. Holders should consult their own U.S. tax advisors concerning the application of the PFIC rules.

The Company believes that it was a PFIC for the taxable year ended December 31, 2009 and that it will be a PFIC for the taxable year ending December 31, 2010. There can be no assurance, however, that the IRS will agree with a determination made by the Company concerning its PFIC status.

Default PFIC Rules Under Section 1291 of the Code

If the Company is a PFIC, the U.S. federal income tax consequences to a U.S. Holder of the acquisition, ownership, and disposition of Common Shares will depend on whether such U.S. Holder makes an election to treat the Company

as a "qualified electing fund" or "QEF" under Section 1295 of the Code (a "QEF Election") or makes a mark-to-market election under Section 1296 of the Code (a "Mark-to-Market Election"). A U.S. Holder that does not make either a QEF Election or a Mark-to-Market Election will be referred to in this summary as a "Non-Electing U.S. Holder."

A Non-Electing U.S. Holder will be subject to the rules of Section 1291 of the Code with respect to (a) any gain on the disposition of Common Shares and any “excess” distribution paid on the Common Shares.

Under Section 1291 of the Code, any gain recognized on the sale or other disposition of Common Shares, and any excess distribution paid on the Common Shares, must be rateably allocated to each day in a Non-Electing U.S. Holder's holding period for the Common Shares. The amount of any such gain or excess distribution allocated to prior years of such Non-Electing U.S. Holder's holding period for the Common Shares will be subject to U.S. federal income tax at the highest tax applicable to ordinary income in each such prior year. A Non-Electing U.S. Holder will be required to pay interest on the resulting tax liability for each such prior year, calculated as if such tax liability had been due in each such prior year. The amount of any such gain or excess distribution allocated to the current year of such Non-Electing U.S. Holder's holding period for the Common Shares will be treated as ordinary income in the current year (but will not qualify for the preferential dividend rate previously discussed), and no interest charge will be incurred with respect to the resulting tax liability for the current year.

If the Company is a PFIC for any taxable year during which a Non-Electing U.S. Holder holds Common Shares, the Company will continue to be treated as a PFIC with respect to such Non-Electing U.S. Holder, regardless of whether the Company ceases to be a PFIC in one or more subsequent years. A Non-Electing U.S. Holder may terminate this deemed PFIC status by electing to recognize gain (which will be taxed under the rules of Section 1291 of the Code discussed above) as if such Common Shares were sold on the last day of the last taxable year for which the Company was a PFIC.

QEF Election

A U.S. Holder that makes a QEF Election generally will not be subject to the rules of Section 1291 of the Code discussed above. However, a U.S. Holder that makes a QEF Election will be subject to U.S. federal income tax annually on such U.S. Holder's pro rata share of (a) “net capital gain” of the Company, which will be taxed as capital gain to such U.S. Holder, and (b) the “ordinary earnings” of the Company, which will be taxed as ordinary income to such U.S. Holder, regardless of whether such amounts are actually distributed to such U.S. Holder by the Company. However, a U.S. Holder that makes a QEF Election may, subject to certain limitations, elect to defer payment of current U.S. federal income tax on such amounts, subject to an interest charge. In addition, a U.S. Holder that makes a QEF Election generally will recognize capital gain or loss on the sale or other taxable disposition of Common Shares, as long as the U.S. Holder always had a QEF election in effect.

Each U.S. Holder should consult its own U.S. tax advisors regarding the advisability of, and procedure for making, a QEF Election. U.S. Holders should be aware that there can be no assurance that the Company will satisfy record keeping requirements so that a U.S. Holder may make certain information returns to the IRS, or that the Company will supply U.S. Holders with information that such U.S. Holders are required to report under the QEF rules, in the event that the Company is a PFIC and a U.S. Holder wishes to make a QEF Election.

Mark-to-Market Election

As an alternative to the foregoing rules, a U.S. Holder may make a Mark-to-Market. A U.S. Holder that makes a Mark-to-Market Election generally will not be subject to the rules of Section 1291 of the Code discussed above. However, if a U.S. Holder makes a Mark-to-Market Election after the beginning of such U.S. Holder's holding period for the Common Shares and such U.S. Holder has not made a timely QEF Election, the rules of Section 1291 of the Code discussed above will apply to dispositions of, and certain distributions on, the Common Shares.

A U.S. Holder that makes a Mark-to-Market Election will include as ordinary income, for each taxable year in which the Company is a PFIC, an amount equal to the excess, if any, of (a) the fair market value of the Common Shares as of the close of such taxable year over (b) such U.S. Holder's tax basis in such Common Shares. A U.S. Holder that makes a Mark-to-Market Election will be allowed a deduction in an amount equal to the lesser of (a) the excess, if any, of (i) such U.S. Holder's adjusted tax basis in the Common Shares over (ii) the fair market value of such Common Shares as of the close of such taxable year or (b) the excess, if any, of (i) the amount included in ordinary income because of such Mark-to-Market Election for prior taxable years over (ii) the amount allowed as a deduction because of such Mark-to-Market Election for prior taxable years.

A U.S. Holder that makes a Mark-to-Market Election generally also will adjust such U.S. Holder's tax basis in the Common Shares to reflect the amount included in gross income or allowed as a deduction because of such Mark-to-Market Election. In addition, upon a sale or other taxable disposition of Common Shares, a U.S. Holder that makes a Mark-to-Market Election will recognize ordinary income or loss (not to exceed the excess, if any, of (a) the amount included in ordinary income because of such Mark-to-Market Election for prior taxable years over (b) the amount allowed as a deduction because of such Mark-to-Market Election for prior taxable years).

Each U.S. Holder should consult its own tax advisors regarding the advisability of, and procedure for making, a Mark-to-Market Election.

Other PFIC Rules

Under Section 1291(f) of the Code, the IRS has issued proposed Treasury Regulations that, subject to certain exceptions, would cause a U.S. Holder that had not made a timely QEF Election to recognize gain (but not loss) upon certain transfers of Common Shares that would otherwise be tax-deferred (e.g., gifts and exchanges pursuant to corporate reorganizations).

An individual U.S. Holder's estate may not receive a step-up in basis in the Common Shares at the U.S. Holder's death, if the Company is or was a PFIC during the U.S. Holder's period of ownership of the Common Shares.

Certain additional adverse rules will apply with respect to a U.S. Holder if the Company is a PFIC, regardless of whether such U.S. Holder makes a QEF Election. For example under Section 1298(b)(6) of the Code, a U.S. Holder that uses Common Shares as security for a loan will, except as may be provided in Treasury Regulations, be treated as having made a taxable disposition of such Common Shares.

The PFIC rules are complex, and each U.S. Holder should consult its own financial advisor, legal counsel, or accountant regarding the PFIC rules and how the PFIC rules may affect the U.S. federal income tax consequences of the acquisition, ownership, and disposition of Common Shares.

Newly Enacted Legislation

Newly enacted legislation requires certain U.S. Holders that are individuals, estates or trusts to pay up to an additional 3.8% tax on, among other things, dividends and capital gains for taxable years beginning after December 31, 2012. In addition, the Company may require U.S. Holders to provide certain tax and reporting information necessary for the Corporation to comply with new reporting obligations. If a U.S. Holder does not provide such information, the U.S. Holder will generally be subject to U.S. withholding tax on payments made by the Company on or after January 1, 2013, in accordance with this new legislation.

H.Documents on display.

Any statement in this Annual Report about any of the Company's contracts or other documents is not necessarily complete. If the contract or document is filed as an exhibit to this Annual Report, the contract or document is deemed to modify the description contained in this Annual Report. Readers must review the exhibits themselves for a complete description of the contract or document.

Readers may review a copy of the Company's filings with the U.S. Securities and Exchange Commission ("the SEC"), including exhibits and schedules filed with it, at the SEC's public reference facilities at 100 F Street, N.E., Washington, D.C. 20549. Readers may call the SEC at 1-800-SEC-0330 for further information on the public reference rooms. The SEC maintains a Web site (<http://www.sec.gov>) that contains reports, submissions and other information regarding registrants that file electronically with the SEC. The Company has only recently become subject to the requirement to file electronically through the EDGAR system most of its securities documents, including registration statements under the Securities Act of 1933, as amended and registration statements, reports and other documents under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

Readers may read and copy any reports, statements or other information that the Company files with the SEC at the address indicated above and may also access them electronically at the Web site set forth above. These SEC filings are also available to the public from commercial document retrieval services.

The Company is required to file reports and other information with the SEC under the Exchange Act. Reports and other information filed by the Company with the SEC may be inspected and copied at the SEC's public reference facilities described above. As a foreign private issuer, the Company is exempt from the rules under the Exchange Act prescribing the furnishing and content of proxy statements and the Company's officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in section 16 of the Exchange Act. Under the Exchange Act, as a foreign private issuer, the Company is not required to publish financial statements as frequently or as promptly as United States companies.

Any of the documents referred to above can also be viewed at the offices of the Company's attorneys, Hodgson Russ LLP, 150 King Street West, Suite 2309, Toronto, Ontario M5H 1J9. All of the documents referred to above are in English.

I.Subsidiary Information.

Not applicable.

Item 11. Quantitative and Qualitative Disclosures About Market Risk.

The Company owns shares of other listed companies. Certain of these shares are listed under current assets on the Company's balance sheet as at December 31, 2010 as "Marketable Securities" at an amount of \$23,062, which is their quoted market value. Market risk represents the risk of loss that may impact the financial position, results of operations, or cash flows of the Company due to adverse changes in financial market prices, including interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market or price risks.

As the Company is in the feasibility and permitting stage, it presently has no activities related to derivative financial instruments or derivative commodity instruments.

The financial results are quantified in Canadian dollars. In the past, the Company has raised equity funding through the sale of securities denominated in Canadian dollars, and the Company may in the future raise additional equity

funding or financing denominated in Canadian dollars. The Company currently does not believe it currently has any materially significant market risks relating to operations resulting from foreign exchange rates. However, if the Company enters into financing or other business arrangements denominated in currency other than the Canadian or United States dollar, variations in the exchange rate may give rise to foreign exchange gains or losses that may be significant.

The Company currently has no long-term debt obligations. The Company does not use financial instruments for trading purposes and is not a party to any leverage derivatives. In the event the Company experiences substantial growth in the future, the Company's business and results of operations may be materially affected by changes in interest rates and certain other credit risk associated with the Company's operations.

Item 12. Description of Securities Other than Equity Securities

Not Applicable.

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies.

There are none.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds.

Not Applicable.

Item 15. Controls and Procedures.

(a) Disclosure Controls and Procedures.

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13(a)-15(e) and 15(d)-15(e) under the "Exchange Act" as of the end of the period covered by this annual report (the "Evaluation Date"). Based on such evaluation, such officers have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures are effective in (i) alerting them with reasonable assurance that the information required to be disclosed by the Company in reports that it files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms, and (ii) alerting them on a timely basis to material information relating to the Company required to be included in our reports filed or submitted under the Exchange Act.

(b) Management's Annual Report on Internal Control Over Financial Reporting.

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Management has designed such internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian GAAP, and reconciled to U.S. GAAP, as applicable.

Because of its inherent limitations, the Company's internal control over financial reporting may not prevent or detect all possible misstatements or frauds. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

To evaluate the effectiveness of the Company's internal control over financial reporting, Management has used the Internal Control – Integrated Framework, which is a suitable, recognized control framework established by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Management has assessed the effectiveness of the Company's internal control over financial reporting and concluded that such internal control over

financial reporting is effective as of December 31, 2010.

(c) Attestation Report of the Company's Registered Accounting Firm.

The Registrant's independent registered public accounting firm, KPMG LLP, has issued an attestation report expressing an opinion on the Company's internal control over financial reporting as of December 31, 2010. For KPMG LLP's report, see Item 19 of this Annual Report on Form 20-F.

(d) Changes in Internal Controls over Financial Reporting.

There have not been any changes in the Company's internal controls over financial reporting or in other factors that have been identified in connection with the evaluation described above that occurred during the period covered by this Annual Report that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

Item 16A. Audit Committee Financial Expert.

The Company's Board of Directors has determined that there is at least one audit committee financial expert, as defined under Item 16A of Form 20-F, serving on its audit committee, namely, David Whittle, whose qualifications are set out in Item 6, above. Mr. Whittle is independent, as such term is defined by the listing standards of the NYSE Amex. All other members of the Audit Committee are also independent as defined by the listing standards of the NYSE Amex.

Item 16B. Code of Ethics.

The Board of Directors, on February 2, 2003, adopted a Code of Ethics (the "Code") entitled "Ethics and Conflict of Interest Policy" which applies to each of the directors and officers of the Company and its affiliates. A copy of the 2003 Code has been previously filed. On May 29, 2006 the Board of Directors adopted an updated and expanded set of Corporate Governance Policies, which replaced the 2003 Code. On September 7, 2010, the Board of Directors approved an updated set of the 2006 Corporate Governance Policies. A copy of the updated 2006 Corporate Governance Policies is included as Exhibit 11.1 to this Annual Report.

The Corporate Governance Policy governs the actions of and is applicable to all of the directors and officers of the Company and its subsidiaries, and their affiliates. The updated 2006 Corporate Governance Policies address the following:

- compliance with all the laws and regulations identified therein and with the requirements of the U.S. Securities and Exchange Commission as mandated by the Sarbanes-Oxley Act of 2002, and the requirements of the Toronto Stock Exchange;
- corporate opportunities and potential conflicts of interest;
- the quality of public disclosures;
- the protection and appropriate use of the Company's assets and resources;
- the protection of confidential information;
 - insider trading;
 - fair behaviour; and

- reporting violations of the Policy or Board Directives.

The Company has also adopted an Insider Trading Policy which applies to all employees of the Company.

The Company will provide a copy of the updated 2006 Corporate Governance Policies to any person, without charge. To obtain a copy without charge, send a request, in writing, to the Company at Mountain Province Diamonds Inc., Attention: Corporate Secretary, 401 Bay Street, Suite 2700, PO Box 152, Toronto, Ontario, Canada M5H 2Y4.

Item 16C. Principal Accountant Fees and Services.

A. Audit Fees

"Audit Fees" are the aggregate fees billed by KPMG LLP ("KPMG") for the audit of the Company's consolidated annual financial statements, assistance with interim financial statements, attestation services that are provided in connection with statutory and regulatory filings or engagements, services associated with registration statements, prospectuses, periodic reports and other documents filed with securities regulatory bodies and stock exchanges and other documents issued in connection with securities offerings and admissions to trading, and assistance in responding to comment letters from securities regulatory bodies, and consultations with the Company's management as to accounting or disclosure treatment of transactions or events and/or the actual or potential impact of final or proposed rules, standards or interpretations by the securities regulatory authorities, accounting standard setting bodies, or other regulatory or standard setting bodies.

Aggregate audit fees billed in fiscal December 31, 2010 by KPMG were \$182,500 including fees for reviews of March 31, 2010, June 30, 2010 and September 30, 2010 and comparative quarters. The Company was billed \$128,950 in the fiscal nine month period ending December 31, 2009. All such fees were approved by the Audit Committee.

B. Audit-Related Fees

"Audit-Related Fees" are fees that are or would be charged by KPMG for presentations or training on accounting or regulatory pronouncements including IFRS, due diligence services related to accounting and tax matters in connection with potential acquisitions/dispositions, advice and documentation assistance with respect to internal controls over financial reporting and disclosure controls and procedures of the Company, and if applicable, audits of financial statements of a company's employee benefit plan. "Audit Related Fees" charged by KPMG during the fiscal period ended December 31, 2010 were \$30,000 and \$70,000 for the fiscal nine-month period ending December 31, 2009. All such services were approved by the Audit Committee.

C. Tax Fees

"Tax Fees" are fees for professional services rendered by KPMG for tax compliance, tax advice on actual or contemplated transactions.

Aggregate tax fees billed in fiscal December 2010 by KPMG were \$12,000 (fiscal nine-month period ending December 31, 2009 - \$13,900) pertaining to tax compliance. These services were approved by the Audit Committee.

D. All Other Fees

In the fiscal year ending December 31, 2010, aggregate fees billed by KPMG were \$nil for advice. KPMG charged \$7,200 for advice pertaining to the amended and restated Joint Venture in the nine-month period ended December 31, 2009.

The Audit Committee pre-approves all audit services to be provided to the Company by its independent auditors. The Audit Committee's policy regarding the pre-approval of non-audit services to be provided to the Company by its independent auditors is that all such services shall be pre-approved by the Audit Committee. Non-audit services that

are prohibited to be provided to the Company by its independent auditors may not be pre-approved. In addition, prior to the granting of any pre-approval, the Audit Committee must be satisfied that the performance of the services in question will not compromise the independence of the independent auditors. All non-audit services, performed by the Company's auditor, for the fiscal year ended December 31, 2010, have been pre-approved by the Audit Committee of the Company. No non-audit services were approved pursuant to the de minimis exemption to the pre-approval requirement.

Item 16D. Exemptions from the Listing Standards for Audit Committees.

Not Applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

There were no purchases made by or on behalf of the Company or any affiliated purchaser of shares or other units of the Company's equity securities.

Item 16F. Change in Registrant's Certifying Accountant.

Not Applicable.

Item 16G. Corporate Governance.

NYSE Amex Corporate Governance Matters

The MPV Shares are listed on NYSE Amex. Section 110 of the NYSE Amex Company Guide permits the NYSE Amex to consider the laws, customs and practices of the foreign issuer's country of domicile in relaxing certain NYSE Amex listing criteria. A description of the significant ways in which the Company's governance practices differ from those followed by domestic companies pursuant to NYSE Amex standards is as follows:

¶ Shareholder Meeting Quorum Requirement: The NYSE Amex minimum quorum requirement for a shareholder meeting is one-third of the outstanding common shares. In addition, a company listed on NYSE Amex is required to state its quorum requirement in its bylaws. The Company's quorum requirement (set forth in its Articles) is two persons who are, or who represent by proxy, shareholders who, in the aggregate, hold at least 5% of the issued shares entitled to be voted at the meeting.

- Proxy Delivery Requirement: NYSE Amex requires the solicitation of proxies and delivery of proxy statements for all shareholder meetings, and requires that these proxies shall be solicited pursuant to a proxy statement that conforms to SEC proxy rules. The Company is a "foreign private issuer" as defined in Rule 3b-4 under the Exchange Act and Rule 405 under the Securities Act and the equity securities of the Company are accordingly exempt from the proxy rules set forth in Sections 14(a), 14(b), 14(c) and 14(f) of the Exchange Act. The Company solicits proxies in accordance with applicable rules and regulations in Canada.

¶ Shareholder Approval Requirement: The Company will follow the Canadian securities regulatory authorities and TSX rules for shareholder approval of new issuances of its common shares. Following securities and exchange rules, shareholder approval is required for certain issuances of shares that: (i) materially affect control of the Company; or (ii) provide consideration to insiders in aggregate of 10% or greater of the market capitalization of the listed issuer and have not been negotiated at arm's length. Shareholder approval is also required, pursuant to TSX rules, in the case of most private placements: (x) for an aggregate number of listed securities issuable greater than 25% of the number of securities of the listed issuer which are outstanding, on a non-diluted basis, prior to the date of closing of the transaction if the price per security is less than the market price; or (y) that during any six month period are to insiders for listed securities or options, rights or other entitlements to listed securities greater than 10% of the number of securities of the listed issuer which are outstanding, on a non-diluted basis, prior to the date of the closing of the first private placement to an insider during the six month period.

- Board of Director Nomination Requirements: the NYSE Amex requires Board of Director nominations must be either selected, or recommended for the Board's selection, by either a nominating committee comprised solely of independent directors or by a majority of the independent directors. The Company currently does not have a nominating committee and follows the Canadian securities regulatory authority and Toronto Stock Exchange rules with respect to the nomination and selection of directors. The directors of the Company are elected annually and hold office until the next annual general meeting of the shareholders of the Company or until their successors in office are duly elected or appointed.

Executive Sessions: the NYSE Amex requires the Company to hold meetings of its Board of Directors on at least a quarterly basis. The independent directors should meet on a regular basis as often as necessary to fulfill their responsibilities, including at least annually in executive session without the presence of non-independent directors and management. The Company follows the Canadian securities regulatory authority and Toronto Stock Exchange rules. The Company is not required to, and currently does not, conduct executive sessions without the presence of non-independent directors and management.

PART III

Item 17. Financial Statements.

The Company's consolidated financial statements are stated in Canadian dollars and are prepared in accordance with Canadian Generally Accepted Accounting Principles (GAAP). Material measurement differences between GAAP in Canada and GAAP in the United States applicable to the Company are described in Note 9 to the Consolidated Financial Statements.

The financial statements and notes thereto as required under Item 17 are attached hereto and filed as part of this Annual Report, are individually listed under Item 19, and are found immediately following the text of this Annual Report. The audit report of KPMG LLP, independent registered public accounting firm, is included herein immediately preceding the financial statements.

For audited financial statements for the year ended December 31, 2010, the nine months ended December 31, 2009, and the year ended March 31, 2009, please see Item 19 below.

Item 18. Financial Statements.

Not Applicable.

Item 19. Exhibits

Financial Statements

The Consolidated Financial Statements of the Company and exhibits listed below are filed with this annual report on Form 20-F in the United States. This report is also filed in Canada as an Annual Information Form and the Canadian filing includes the Consolidated Financial Statements and exhibits listed below. Canadian investors should refer to the audited Financial Statements of the Company for the year ended December 31, 2010, the fiscal nine months ended December 31, 2009 and the year ended March 31, 2009 filed with Canadian Securities Regulators on SEDAR under "Audited Annual Financial Statements - English" and incorporated herein by reference.

The following financial statements are attached to and form a part of this report filed with the SEC (see Appendix):

Consolidated Financial Statements of the Company:

- Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting.
- Report of Independent Registered Public Accounting Firm on Consolidated Financial Statements.
- Consolidated Balance Sheets as of December 31, 2010 and December 31, 2009.

- Consolidated Statements of Operations and Deficit for the year ended December 31, 2010, the fiscal nine-month period ended December 31, 2009, and the year ended March 31, 2009.

- Consolidated Statements of Comprehensive Income and Accumulated Other Comprehensive Income for the year ended December 31, 2010, the fiscal nine-month period ended December 31, 2009, and the year ended March 31, 2009.
- Consolidated Statements of Cash Flows for the year ended December 31, 2010, the fiscal nine-month period ended December 31, 2009, and the year ended March 31, 2009.

- Notes to the Consolidated Financial Statements

Mountain Province Diamonds Inc.

For the year ended December 31, 2010, the nine-month period ended December 31, 2009 and the year ended March 31, 2009

REPORT OF MANAGEMENT

The accompanying consolidated financial statements are the responsibility of management. These statements have been prepared in accordance with generally accepted accounting principles in Canada, and reflect management's best estimates and judgments based on currently available information.

Management has developed and maintains systems of internal accounting controls in order to ensure, on a reasonable and cost effective basis, the reliability of its financial information and the safeguarding of assets.

The Board of Directors is responsible for ensuring that management fulfils its responsibilities through the Audit Committee of three independent directors which meets with management and the auditors during the year, to review reporting and control issues and to satisfy itself that each party has properly discharged its responsibilities. The Committee reviews the financial statements before they are presented to the Board of Directors for approval and considers the independence of the auditors.

The consolidated financial statements have been audited by KPMG LLP, an independent firm of chartered accountants appointed by the shareholders at the Company's last annual meeting. Their report outlines the scope of their examination and opinion on the consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of Mountain Province Diamonds Inc.

We have audited the accompanying consolidated balance sheets of Mountain Province Diamonds Inc. as of December 31, 2010 and December 31, 2009 and the consolidated statements of operations and deficit, comprehensive income, accumulated other comprehensive income and cash flows for the year ended December 31, 2010, the nine-month period ended December 31, 2009, and the year ended March 31, 2009. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Mountain Province Diamonds Inc. as of December 31, 2010 and December 31, 2009 and its consolidated results of operations and its consolidated cash flows for the year ended December 31, 2010, the nine-month period ended December 31, 2009 and the year ended March 31, 2009 in conformity with Canadian generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2010, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 30, 2011 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors of Mountain Province Diamonds Inc.

We have audited Mountain Province Diamonds Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Mountain Province Diamonds Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in Management's Annual Report on Internal Control over Financial Reporting within its Form 20-F. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

KPMG LLP is a Canadian limited liability partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative (“KPMG International”), a Swiss entity. KPMG Canada provides services to KPMG LLP.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as at December 31, 2010 and 2009, and the consolidated statements of operations and deficit, comprehensive income, accumulated other comprehensive income and cash flows for the year ended December 31, 2010, the nine-month period ended December 31, 2009, and the year ended March 31, 2009, and our report dated March 30, 2011 expressed an unqualified opinion on those consolidated financial statements.

MOUNTAIN PROVINCE DIAMONDS INC.

Notes to Consolidated Financial Statements

For the year ended December 31, 2010

(In Canadian dollars)

1. Nature of Operations:

Mountain Province Diamonds Inc. (the “Company”) was incorporated on December 2, 1986 under the British Columbia Company Act. The Company amended its articles and continued incorporation under the Ontario Business Corporation Act effective May 8, 2006. The Company is involved in the discovery and development of diamond properties in Canada’s Northwest Territories.

The Company is in the process of developing and permitting its mineral properties primarily in conjunction with De Beers Canada Inc. (“De Beers Canada”) (Note 5), and has completed a feasibility study indicating that its Gahcho Kué property contains mineral reserves that are economically recoverable. The underlying value and recoverability of the amounts shown as “Interest In Gahcho Kué Joint Venture” is dependent upon the ability of the Company and/or its mineral property partner to develop economically recoverable reserves, to have successful permitting and development, and upon future profitable production or proceeds from disposition of the Company’s mineral properties. Failure to develop economically recoverable reserves will require the Company to write-off costs capitalized to date.

These consolidated financial statements have been prepared on a going concern basis in accordance with Canadian Generally Accepted Accounting Principles (“GAAP”). The Company’s ability to continue as a going concern and to realize the carrying value of its assets and discharge its liabilities is dependent on the discovery of economically recoverable mineral reserves, the ability of the Company to obtain necessary financing to fund its operations, and the future production or proceeds from developed properties.

The Company changed its year-end from March 31 to December 31, effective December 31, 2009, to align its fiscal year-end with that of De Beers Canada, the operator of the Gahcho Kué Project.

Certain of the prior years’ figures have been reclassified to conform to the current year’s presentation.

2. Significant Accounting Policies and Future Accounting Policy Changes:

Significant Accounting Policies

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles.

(a) Basis of consolidation:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany amounts and transactions have been eliminated on consolidation. The Company’s interest in the Gahcho Kué joint venture has been proportionally consolidated (see Note 5).

(b) Cash and cash equivalents and short-term investments:

Cash and cash equivalents consists of balances with banks and highly liquid short-term investments that are readily convertible to known amounts of cash with

original maturities of three months or less when acquired. Short-term investments are investments with original maturities of greater than three months when acquired (see Note 4).

(c) Marketable securities:

Marketable securities are considered to be available-for-sale securities and are carried at market value, which is also considered to be fair value. The market values of investments are determined based on the closing prices reported on recognized securities exchanges and over-the-counter markets. Such individual market values do not necessarily represent the realizable value of the total holding of any security, which may be more or less than that indicated by market quotations. The changes in fair market value are recorded within the Statement of Accumulated Other Comprehensive Income. When there has been a loss in the value of an investment in marketable securities that is determined to be other than a temporary decline, the investment is written down to recognize the loss.

MOUNTAIN PROVINCE DIAMONDS INC.
Notes to Consolidated Financial Statements
For the year ended December 31, 2010
(In Canadian dollars)

2. Significant Accounting Policies and Future Accounting Policy Changes (continued):

Significant Accounting Policies (continued):

(d) Interest In Gahcho Kué Joint Venture:

The Company considers its interest in the Gahcho Kué Project to be an investment in mineral properties, in accordance with CICA Handbook Section 3061, "Property, Plant and Equipment", and additional Canadian accounting pronouncements and guidance.

Specifically, direct property acquisition costs, advance royalties, holding costs, field exploration, valuation work, and field supervisory costs to the extent they are incurred by the Company or the Gahcho Kué joint venture are deferred until the property is brought into production, at which time, the deferred costs will be amortized on a unit-of-production basis, or until the property is abandoned, sold or considered to be impaired in value, at which time an appropriate charge will be made. The recovery of costs of mining claims and deferred exploration costs is dependent upon successful permitting, the ability of the Company and its partner De Beers Canada Inc. to obtain the necessary financing to complete development, and future profitable production or proceeds from disposition of the property.

The Emerging Issues Committee of the CICA issued EIC-174 - "Mining Exploration Costs" which interprets how Accounting Guideline No. 11 entitled "Enterprises in the Development Stage" ("AcG-11") affects mining companies with respect to the deferral of exploration costs. EIC-174 refers to CICA Handbook Section 3061. "Property, Plant and Equipment", paragraph .21, which states that for a mining property, the cost of the asset includes exploration costs if the enterprise considers that such costs have the characteristics of property, plant and equipment. EIC-174 then states that a mining enterprise that has not established mineral reserves objectively, and therefore does not have a basis for preparing a projection of the estimated cash flow from the property, is not precluded from considering the exploration costs to have the characteristics of property, plant and equipment.

EIC-174 also sets forth the Committee's consensus that a mining enterprise in the development stage is required to test the carrying value of a property for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. EIC-174 and AcG-11 then provide additional guidance as to the need for an assessment to determine whether a write-down is required. With respect to impairment of capitalized exploration costs, EIC-174 sets forth the Committee's consensus that a mining enterprise in the development stage that has not established mineral reserves objectively, and therefore does not have a basis for preparing a projection of the estimated cash flow from the property, is not obliged to conclude that capitalized costs have been impaired. However, such an enterprise should consider the conditions set forth in AcG-11 and CICA Handbook sections relating to long-lived assets in determining whether subsequent write-down of capitalized exploration costs related to mining properties is required. Any resulting write-downs are to be charged to the statement of operations.

The Company considers that costs in the nature of exploration costs incurred with respect to its investment in the Gahcho Kué Project have the characteristics of property, plant and equipment, and, accordingly, defers such costs. Furthermore, pursuant to EIC-174, deferred exploration costs would not automatically be subject to regular assessment of recoverability, unless conditions, such as those discussed in AcG 11, exist.

MOUNTAIN PROVINCE DIAMONDS INC.
Notes to Consolidated Financial Statements
For the year ended December 31, 2010
(In Canadian dollars)

2. Significant Accounting Policies and Future Accounting Policy Changes (continued):

Significant Accounting Policies (continued):

(d) Interest In Gahcho Kué Joint Venture (continued):

The Company's interest in Gahcho Kué Project is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the interest may not be recoverable. The net recoverable amount is based on estimates of undiscounted future net cash flows expected to be recovered from specific assets or groups of assets through use or future disposition.

The Company's interest in the Gahcho Kué joint venture has been proportionally consolidated (see Note 5).

(e) Asset retirement obligations:

The fair value of a liability for an asset retirement obligation, such as site reclamation costs, is recognized in the period in which it is incurred if a reasonable estimate of the fair value of the costs to be incurred can be made. The Company is required to record the estimated present value of future cash flows associated with site reclamation as a liability when the liability is incurred and increase the carrying value of the related assets for that amount. Subsequently, these capitalized asset retirement costs will be amortized to expense over the life of the related assets using the units-of-production method. At the end of each period, the liability is increased to reflect the passage of time (accretion expense) and changes in the estimated future cash flows underlying any initial fair value measurements (additional or reduced asset retirement costs).

The Company has consolidated its proportional interest in the asset retirement obligation of the Gahcho Kué joint venture (see Note 5).

(f) Stock-based compensation:

The Company applies the fair value method for stock-based compensation and other stock-based payments, and expenses the fair value of all stock options awarded, calculated using the Black-Scholes option pricing model, over the vesting period. Direct awards of stock are expensed based on the market price of the shares at the time of granting of the award. The Company estimates forfeitures of options on an ongoing basis.

The Company has consolidated its proportional interest in the asset retirement obligation of the Gahcho Kué joint venture (see Note 5).

(g) Income taxes:

The Company accounts for income taxes using the asset and liability method. Under the asset and liability method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in

the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The amount of future income tax assets recognized is limited to the amount that is more likely than not to be realized.

MOUNTAIN PROVINCE DIAMONDS INC.
Notes to Consolidated Financial Statements
For the year ended December 31, 2010
(In Canadian dollars)

2. Significant Accounting Policies and Future Accounting Policy Changes (continued):

Significant Accounting Policies (continued):

(h) Basic loss per share:

Basic (loss) earnings per share is calculated by dividing the loss attributable to common shareholders by the weighted average number of common shares outstanding during the year. The Company uses the treasury stock method to compute the dilutive effect of options. Diluted loss per share is similar to basic loss per share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential dilutive common shares had been issued. The treasury stock method assumes that the proceeds received on exercise of stock options is used to repurchase common shares at the average market value for the period.

(i) Foreign currency translation:

The functional currency of the Company and its subsidiaries is considered to be the Canadian dollar. Foreign currency transactions entered into by the Company and financial statements of integrated foreign operations are translated using the temporal method. Under this method, monetary assets and liabilities denominated in a currency other than the Canadian dollar are translated at rates of exchange in effect at the balance sheet date, non-monetary assets and liabilities are translated at historic rates of exchange, and statement of operations items are translated at the average exchange rates prevailing during the year. Exchange gains and losses on foreign currency transactions and foreign currency denominated balances are included in the statement of operations.

Financial instruments:

(j)

The fair values of the Company's cash, short-term investments, amounts receivable, advances and accounts payable and accrued liabilities approximate their carrying values because of the immediate or short-term to maturity of these financial instruments. The fair value of marketable securities is disclosed in Note 3.

Use of estimates:

(k)

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of the assets, liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Significant areas requiring the use of management estimates relate to the determination of impairment of mineral properties, deferred exploration if capitalization criteria are met, asset retirement obligations, the assumptions used in determining the fair value of stock options and warrants, and the calculations of future income tax assets and liabilities. Actual results could materially differ from these estimates.

MOUNTAIN PROVINCE DIAMONDS INC.

Notes to Consolidated Financial Statements

For the year ended December 31, 2010

(In Canadian dollars)

2. Significant Accounting Policies and Future Accounting Policy Changes (continued):

Future Accounting Policy Changes:

Business combinations, consolidated financial statements, non-controlling interests and comprehensive revaluation of assets and liabilities:

For interim and annual financial statements relating to its fiscal year commencing January 1, 2011, the Company will be required to adopt The Canadian Institute of Chartered Accountants' ("CICA") new Handbook Section 1582, Business Combinations ("Section 1582") (replacing Section 1581 Business Combinations), Section 1601, Consolidated Financial Statements ("Section 1601"), Section 1602, Non-Controlling Interests ("Section 1602") and Section 1625, Comprehensive Revaluation of Assets and Liabilities "Section 1625").

Section 1582 establishes standards for the accounting of a business combination for which the acquisition date is after the Company's fiscal year ended December 31, 2010.

Section 1601, with the new Section 1602, replaces the former Section 1600, Consolidated Financial Statements, and establishes standards for the preparation of consolidated financial statements. Section 1602 establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. Section 1625 is amended as a result of Section 1582, Section 1601 and Section 1602, and applies prospectively.

International Financial Reporting Standards ("IFRS"):

In February 2008, the Canadian Accounting Standards Board confirmed that IFRS will be mandatory in Canada for profit-oriented publicly accountable entities for fiscal periods beginning on or after January 1, 2011. The Company's first annual IFRS financial statements will be for the year ending December 31, 2011 and will include the comparative period of 2010. Starting in the first quarter of 2011, the Company will provide unaudited consolidated financial information in accordance with IFRS including comparative figures for 2010.

3. Marketable Securities:

The quoted market value of marketable securities at December 31, 2010 was \$23,062 (December 31, 2009 - \$13,431). The original cost of these marketable securities at December 31, 2010 was \$4,632 (December 31, 2009 - \$4,632).

4. Financial Instruments:

Fair Value Estimation

During 2009, CICA Handbook Section 3862, Financial Instruments - Disclosures, was amended to require disclosures about the inputs to fair value measurements, including their classification within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets and liabilities

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - Inputs that are not based on observable market data

The Company's financial assets as at December 31, 2010 measured at fair value consist of cash and cash equivalents, short-term investments and marketable securities which are classified as Level 1.

Financial Assets and Liabilities

Information regarding the Company's financial assets and liabilities at December 31, 2010 and December 31, 2009 is summarized as follows:

	Fair Value	2010 Carrying Value	Fair Value	2009 Carrying Value
Held-for-trading -				
Cash and cash equivalents	\$ 23,778,053	\$ 23,778,053	\$ 208,559	\$ 208,559
Short-term investments	9,777,089	9,777,089	9,733,718	9,733,718
	\$ 33,555,142	\$ 33,555,142	\$ 9,942,277	\$ 9,942,277
Available-for-sale				
Marketable securities	\$ 23,062	\$ 23,062	\$ 13,431	\$ 13,431
Loans and receivables				
Amounts receivable	\$ 499,192	\$ 499,192	\$ 269,979	\$ 269,979
Other liabilities				
Accounts payable and accrued liabilities	\$ 4,760,390	\$ 4,760,390	\$ 1,949,489	\$ 1,949,489

The short-term investments at December 31, 2010 are cashable guaranteed investment certificates ("GICs") held with a major Canadian financial institution purchased with original maturities between January and June 2011. The GICs held at December 31, 2010 are carried at fair market value. Given the GICs' low risk and the ability to cash them at any time, the fair market value recorded is estimated to be reasonably approximated by the amount of cost plus accrued interest. There is no restriction on the use of the short-term investments.

The fair values of the amounts receivable, and accounts payable and accrued liabilities approximate their carrying values due to the relatively short-term maturity of these financial instruments.

4. Financial Instruments (continued):

Financial Instrument Risk Exposure

Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligations. The Company's maximum exposure to credit risk at December 31, 2010 and December 31, 2009 under its financial instruments is summarized as follows:

	2010	2009
Amounts receivable:		
Currently due	\$ 131,903	\$ 269,979
Past due by 90 days or less, not impaired	126,048	-
Past due by greater than 90 days, not impaired	241,241	-
	\$ 499,192	\$ 269,979
Cash and cash equivalents	\$ 23,778,053	\$ 208,559
Short-term investments	9,777,089	9,733,718
	\$ 33,555,142	\$ 9,942,277

All of the Company's cash and cash equivalents and short-term investments are held with a major Canadian financial institution and thus the exposure to credit risk is considered insignificant. The short-term investments are cashable in whole or in part, generally with interest, at any time to maturity. Management actively monitors the Company's exposure to credit risk under its financial instruments, including with respect to amounts receivable. The Company considers the risk of loss for its amounts receivable to be remote and significantly mitigated due to the financial strength of the party from whom the receivables are due - the Canadian government for goods and services tax refunds receivable in the amount of approximately \$499,000.

The Company's current policy is to invest excess cash in Canadian bank guaranteed notes. It periodically monitors the investments it makes and is satisfied with the credit ratings of its bank.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities. The Company has a planning and budgeting process in place by which it anticipates and determines the funds required to support its normal operating requirements. The Company coordinates this planning and budgeting process with its financing activities through its capital management process. The Company's financial liabilities comprise its accounts payable and accrued liabilities, all of which are due within the next 12 month period. Other than minimal office space rental commitments, there are no other operating lease commitments.

MOUNTAIN PROVINCE DIAMONDS INC.

Notes to Consolidated Financial Statements

For the year ended December 31, 2010

(In Canadian dollars)

4. Financial Instruments (continued):

Financial Instrument Risk Exposure (continued)

Market Risk

The Company's marketable securities are classified as available-for-sale, and are subject to changes in the market prices. They are recorded at fair value in the Company's financial statements, based on the closing market value at the end of the period for each security included. The original cost of the marketable securities is \$4,632. The Company's exposure to market risk is not considered to be material.

Foreign Currency Risk

The Company is exposed to foreign currency risk at the balance sheet date through its U.S. denominated accounts payable and cash. A 10% depreciation or appreciation of the U.S. dollar against the Canadian dollar would result in an approximate \$16,000 decrease or increase, respectively, in both net and comprehensive loss. The Company currently has only limited exposure to fluctuations in exchange rates between the Canadian and U.S. dollar as almost all of its operations are located in Canada. Accordingly, the Company has not employed any currency hedging programs during the current period.

Interest Rate Risk

The Company has no significant exposure at December 31, 2010 to interest rate risk through its financial instruments. The short-term investments are at fixed rates of interest that do not fluctuate during the remaining term. The Company has no interest-bearing debt.

5. Interest in Gahcho Kué Joint Venture:

	2010	2009
Balance, beginning of period	\$ 73,437,586	\$ 65,161,533
Changes in the year		
Change in asset retirement obligation relating to Gahcho Kué		
Joint Venture	(2,220,762)	4,913,811
Change in proportionate share of Gahcho Kué		
net capitalized costs for the period	1,022,371	57,441
Technical consulting	100,410	18,384
Sunk cost repayment	2,837,596	1,290,838
Company portion of feasibility study costs	3,107,775	1,339,304
Company portion of project costs	4,718,350	646,735
Mining claims and lease costs(a)	47,993	9,540
Total change in period	9,613,733	8,276,053
Balance, end of period	\$ 83,051,319	\$ 73,437,586

The Company holds a 49% interest in the Gahcho Kué Project (the “Project”) located in the Northwest Territories, Canada, and De Beers Canada Inc. (“De Beers Canada”) holds the remaining 51% interest. The joint venture between the Company and De Beers Canada is governed by an agreement entered into on July 3, 2009 (the “2009 Agreement”). The Company considers that the Gahcho Kué joint venture is a related party under CICA Handbook Section 3840, “Related Party Transactions”.

Under a previous agreement (the “2002 Agreement”) in effect until July 3, 2009, De Beers Canada carried all costs incurred by the Project, and De Beers Canada had no recourse to the Company for repayment of funds until, and unless, the Project was built, in production, and generating net cash flows.

On July 3, 2009, the Company entered the 2009 Agreement with De Beers Canada (jointly, the “Participants”) under which:

- (a) The Participants’ continuing interests in the Gahcho Kué Project will be Mountain Province 49% and De Beers Canada 51%, with the Company’s interest no longer subject to the dilution provisions in the 2002 Agreement except for normal dilution provisions which are applicable to both Participants;
- (b) Each Participant will market their own proportionate share of diamond production in accordance with their participating interest;
- (c) Each Participant will contribute their proportionate share to the future project development costs;

- (d) Material strategic and operating decisions will be made by consensus of the Participants as long as each Participant has a participating interest of 40% or more;
- (e) The Participants have agreed that the sunk historic costs to the period ending on December 31, 2008 will be reduced and limited to \$120,000,000;

MOUNTAIN PROVINCE DIAMONDS INC.

Notes to Consolidated Financial Statements

For the year ended December 31, 2010

(In Canadian dollars)

5. Interest in Gahcho Kué Joint Venture (continued):

(f) The Company will repay De Beers Canada \$59 million (representing 49% of an agreed sum of \$120,000,000) in settlement of the Company's share of the agreed historic sunk costs on the following schedule:

\$200,000 on execution of the 2009 Agreement (the Company's contribution to the 2009 Joint Venture expenses to date of execution of the 2009 Agreement - paid; recorded as "company portion of project costs");

• Up to \$5,100,000 in respect of De Beers Canada's share of the costs of the feasibility study; (\$4,128,434 to December 31, 2010, recorded as "sunk cost repayment");

\$10 million upon the completion of a feasibility study with at least a 15% IRR and approval of the necessary development work for a mine (as defined in the 2009 Agreement);

- \$10,000,000 following the issuance of the construction and operating permits;
- \$10,000,000 following the commencement of commercial production; and
- The balance within 18 months following commencement of commercial production.

Since these payments are contingent on certain events occurring, and/or work being completed, they will be recorded as the payments become due or are made.

Subsequent to the year end, the Company made a payment to De Beers Canada of \$10 million representing the payment required with the completion of the feasibility study with a 15% IRR, pending the Joint Venture Management Committee's approval for the necessary development work.

The Company has agreed that its marketing rights under the 2009 Agreement may be diluted if the Company defaults on certain of the repayments described above if and when such payments become due.

The 2009 Agreement's provision for consensus decision-making for material strategic and operating decisions provides the Company with joint control for the Gahcho Kué Project with De Beers Canada, and the Company accounts for the Project as a joint venture. Accordingly, the Company has determined its proportionate share (49%) of the assets, liabilities, revenues and expenses of the joint venture, and recorded them in its consolidated financial statements effective July 4, 2009.

5. Interest in Gahcho Kué Joint Venture (continued):

Asset Retirement Obligation

The fair value of the Gahcho Kué asset retirement obligation was calculated using the total undiscounted cash flows required to settle estimated obligations (estimated to be approximately \$18.7 million), expected timing of cash flow payments required to settle the obligations between 2011 and 2028, a credit-adjusted risk-free discount rate of 7.8%, and an inflation rate of 2.25%.

The balance of the asset retirement obligation at December 31, 2010 and 2009 is as follows:

	2010	2009
Balance, beginning of period	\$ 5,103,875	\$ -
Asset retirement obligation recorded as a result of the 2009 Agreement	-	4,913,811
Change in estimate of discounted cash flows for the year	(2,220,762)	-
Accretion recorded during the period	398,102	190,064
Balance, end of period	\$ 3,281,215	\$ 5,103,875

There is no security posted against the Asset Retirement Obligation as at December 31, 2010.

Balance, December 31, 2010	77,416,057	\$ 133,054,164

On August 4, 2009, the Company completed a private placement. An aggregate of 3,000,000 Units of the Company were issued at a price of \$1.50 per Unit for aggregate gross proceeds of \$4,500,000. Each Unit was comprised of one common share of the Company and one-half of one common share purchase warrant. Each whole warrant entitles the holder to acquire one additional common share at an exercise price of \$2.00 for a period of 18 months. (See also Note 6(d) for the value assigned to the warrants). Two related parties, a director and an officer, participated in the private placement for a total of 40,000 Units.

On December 8, 2009, the Company announced that it had closed a bought deal financing (the "Offering") under which the Company issued 3,334,000 Units in consideration for \$2.70 per Unit to raise gross proceeds of \$9,001,800. Each Unit was comprised of one common share and one-half of a common share purchase warrant, with each whole warrant entitling the holder to acquire one additional common share at an exercise price of \$3.20 per common share for a period of 18 months. As well, the underwriters of the Offering subscribed to 50,000 common share purchase warrants for \$0.268 each for gross proceeds of \$13,400. (See also Note 6(d) for the value assigned to the warrants).

On May 17, 2010, the Company completed a non-brokered private placement of 5,476,177 common shares at a price of \$2.10 per common share, to raise gross proceeds of \$11,499,972.

On November 18, 2010, the Company completed a private placement financing of 4,600,000 common shares at \$5.00 per share for gross proceeds of \$23,000,000.

6. Share Capital and Contributed Surplus (continued):

(c) Stock options:

The Company, through its Board of Directors and shareholders, adopted a stock option plan (the "Plan") which, among other things, allows for the maximum number of shares that may be reserved for issuance under the Plan to be 10% of the Company's issued and outstanding shares at the time of the grant. The Board of Directors has the authority and discretion to grant stock option awards within the limits identified in the Plan, which includes provisions limiting the issuance of options to insiders and significant shareholders to maximums identified in the Plan.

The aggregate maximum number of shares pursuant to options granted under the Plan will not exceed 6,309,774 shares, and as at December 31, 2010, there were 5,075,139 shares available to be issued under the Plan.

The following presents the continuity of stock options outstanding:

	Number of Options	Weighted Average Exercise Price
Balance, March 31, 2009	1,300,000	1.72
Granted	300,000	1.72
Exercised	(365,365)	1.64
Balance, December 31, 2009	1,234,635	\$ 1.75
Exercised	(150,000)	2.17
Balance, December 31, 2010	1,084,635	\$ 1.69

During the year ended December 31, 2010, 150,000 options were exercised for proceeds of \$326,000 (2009 - \$600,360).

The following are the stock options outstanding and exercisable at December 31, 2010.

Expiry Date	Black- Scholes Value	Number of Options	Weighted Average Exercise Price
January 30, 2011	\$ 321,100	100,000	0.01 years \$ 4.50
November 23, 2013	436,797	684,635	1.83 years \$ 1.26
August 25, 2014	268,405	300,000	1.01 years \$ 1.72

(In Canadian dollars)

6. Share Capital and Contributed Surplus (continued):

(c) Stock options (continued):

Subsequent to the year end, 120,000 options were exercised for proceeds of \$475,200.

As well, subsequent to the year end, the Board of Directors approved a grant of 100,000 options to the President and Chief Executive Officer, and 50,000 options to the Chief Financial Officer. The grant date was January 10, 2011, the exercise price is \$6.13, and the options have a five year term expiring January 9, 2016. The options vested immediately. The Company has valued these options at \$487,084 using the Black-Scholes options pricing model with assumptions as noted below, and expensed them in January 2011.

Dividend yield	0%
Expected volatility	60.22%
Risk-free interest rate	2.46%
Expected life	5 years
Weighted average fair value of options issued	\$3.247

(d) Warrants:

The Company's financing, which closed on August 4, 2009, involved an aggregate of 3,000,000 Units of the Company at a price of \$1.50 per Unit. Each Unit comprises one common share of the Company and one-half of one common share purchase warrant. Each whole warrant entitles the holder to acquire one additional common share at an exercise price of \$2.00 per common share for a period of 18 months.

The Company's Offering, which closed on December 8, 2009, involved an aggregate of 3,334,000 Units at a price of \$2.70 per Unit. Each Unit comprises one common share of the Company and one-half of a common share purchase warrant. Each whole warrant entitles the holder to acquire one additional common share at an exercise price of \$3.20 per common share for a period of 18 months. In addition, the underwriters of the bought deal financing were issued 50,000 common share purchase warrants for consideration of \$0.268 each with the same exercise price of \$3.20 per common share and the same period of 18 months.

The following presents the continuity of warrants outstanding:

	Number of Warrants	Amount
