NOTE ABOUT FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements include, among other things, statements regarding:

- the growth of our business and revenues and our expectations about the factors that influence our success and trends in our business;
- our plans to continue to invest in new businesses, products and technologies, systems, facilities, and infrastructure, to continue to hire aggressively and provide competitive compensation programs, as well as to continue to invest in acquisitions;
- seasonal fluctuations in internet usage and advertiser expenditures, traditional retail seasonality and macroeconomic conditions, which are likely to cause fluctuations in our quarterly results;
- the potential for declines in our revenue growth rate;
- our expectation that growth in advertising revenues from our websites will continue to exceed that from our Google Network Members' websites, which will have a positive impact on our operating margins;
- our expectation that we will continue to take steps to improve the relevance of the ads we deliver and to reduce the number of accidental clicks;
- fluctuations in aggregate paid clicks and average cost-per-click;
- our belief that our foreign exchange risk management program will not fully offset our net exposure to fluctuations in foreign currency exchange rates;
- the expected increase of costs related to hedging activities under our foreign exchange risk management program;
- our expectation that our cost of revenues, research and development expenses, sales and marketing expenses, and general and administrative expenses will increase in dollars and may increase as a percentage of revenues;
- our potential exposure in connection with pending investigations, proceedings, and other contingencies;
- our expectation that our traffic acquisition costs will fluctuate in the future;
- our continued investments in international markets;
 - estimates of our future compensation expenses;
- fluctuations in our effective tax rate;
- the sufficiency of our sources of funding;
- our payment terms to certain advertisers, which may increase our working capital requirements;
- fluctuations in our capital expenditures;

as well as other statements regarding our future operations, financial condition and prospects, and business strategies.

Forward-looking statements may appear throughout this report and other documents we file with the Securities and Exchange Commission (SEC), including without limitation, Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014, as may be updated in our subsequent Quarterly Reports on Form 10-Q.

Forward-looking statements generally can be identified by words such as "anticipates," "believes," "estimates," "expects," "intends," "plans," "predicts," "projects," "will be," "will continue," "will likely result," and similar expressions. These forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties, which could cause our actual results to differ materially from those reflected in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this Quarterly Report on Form 10-Q, and in particular, the risks discussed in Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014, and those discussed in other documents we file with the SEC. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

Google Inc.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Google Inc. and Summary of Significant Accounting Policies

We were incorporated in California in September 1998 and re-incorporated in the State of Delaware in August 2003. We generate revenues primarily by delivering relevant, cost-effective online advertising.

On October 29, 2014, we sold the Motorola Mobile business (Motorola Mobile) to Lenovo Group Limited (Lenovo). The financial results of Motorola Mobile are presented as Net loss from discontinued operations on the Consolidated Statements of Income for the three months ended March 31, 2014. See Note 8 for further discussion of the sale.

Basis of Consolidation

The consolidated financial statements include the accounts of Google Inc. and our subsidiaries. All intercompany balances and transactions have been eliminated.

Unaudited Interim Financial Information

The accompanying Consolidated Balance Sheet as of March 31, 2015, the Consolidated Statements of Income for the three months ended March 31, 2014 and 2015, the Consolidated Statements of Comprehensive Income for the three months ended March 31, 2014 and 2015, and the Consolidated Statements of Cash Flows for the three months ended March 31, 2014 and 2015 are unaudited. These unaudited interim consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (GAAP). In our opinion, the unaudited interim consolidated financial statements include all adjustments of a normal recurring nature necessary for the fair presentation of our financial position as of March 31, 2015, our results of operations for the three months ended March 31, 2014 and 2015, and our cash flows for the three months ended March 31, 2014 and 2015. The results of operations for the three months ended March 31, 2015 are not necessarily indicative of the results to be expected for the year ending December 31, 2015.

These unaudited interim consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, filed with the SEC on February 6, 2015.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the amounts reported and disclosed in the financial statements and the accompanying notes. Actual results could differ materially from these estimates. On an ongoing basis, we evaluate our estimates, including those related to the accounts receivable and sales allowances, fair values of financial instruments, intangible assets and goodwill, useful lives of intangible assets and property and equipment, income taxes, and contingent liabilities, among others. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2014-09 (ASU 2014-09) "Revenue from Contracts with Customers." ASU 2014-09 supersedes the revenue recognition requirements in "Revenue Recognition (Topic 605)", and requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. As currently issued, ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period, and early adoption is not permitted. We are currently in the process of evaluating the impact of the adoption of ASU 2014-09 on our consolidated financial statements.

In June 2014, the FASB issued Accounting Standards Update No. 2014-10 (ASU 2014-10) "Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements, Including an Amendment to Variable Interest Entities Guidance in Topic 810, Consolidation". ASU 2014-10 removes the definition of a development stage entity from the Master Glossary of the ASC thereby removing the financial reporting distinction between development stage entities and other reporting entities. The amendment eliminating the exception to the

sufficiency-of-equity-at-risk criterion for development stage entities will be applied retrospectively for annual reporting periods beginning after December 15, 2015, and interim periods therein. Early application of these amendments is permitted. We are

7

Table of Contents

currently in the process of evaluating the impact of the adoption of ASU 2014-10 on our consolidated financial statements.

In June 2014, the FASB issued Accounting Standards Update No. 2014-11 (ASU 2014-11) "Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures." ASU 2014-11 requires entities to account for repurchase-to-maturity transactions and repurchase financing arrangements as secured borrowings. ASU 2014-11 also expands disclosure requirements for these transactions to include the nature of the collateral being pledged and the time to maturity. The accounting changes are effective for the first interim or annual period beginning after December 15, 2014 and certain disclosure requirements are effective for interim periods beginning after March 15, 2015. In the first quarter of 2015, we adopted the amended accounting requirements and it did not have a material impact on the consolidated financial statements. We will adopt the additional disclosure requirements in the second quarter of 2015.

In February 2015, the FASB issued Accounting Standards Update No. 2015-02 (ASU 2015-02) "Consolidation (Topic 810): Amendments to the Consolidation Analysis." ASU 2015-02 changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. It is effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. We are currently in the process of evaluating the impact of the adoption of ASU 2015-02 on our consolidated financial statements.

Note 2. Financial Instruments

Fair Value Measurements

We measure our cash equivalents, marketable securities, foreign currency and interest rate derivative contracts, and non-marketable debt securities at fair value on a recurring basis. Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that is determined based on assumptions that market participants would use in pricing an asset or a liability. Assets and liabilities recorded at fair value are measured and classified in accordance with a three-tier fair value hierarchy based on the observability of the inputs available in the market used to measure fair value:

Level 1 - Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Inputs that are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant inputs are observable in the market or can be derived from observable market data. Where applicable, these models project future cash flows and discount the future amounts to a present value using market-based observable inputs including interest rate curves, foreign exchange rates, and credit ratings.

Level 3 - Unobservable inputs that are supported by little or no market activities.

The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

We classify our cash equivalents and marketable securities within Level 1 or Level 2 because we use quoted market prices or alternative pricing sources and models utilizing market observable inputs to determine their fair value. We classify our foreign currency and interest rate derivative contracts primarily within Level 2 as the valuation inputs are based on quoted prices and market observable data of similar instruments. We classify our non-marketable debt securities within Level 3 as the valuation inputs are not observable in an active market.

Cash, Cash Equivalents and Marketable Securities

The following tables summarize our cash, cash equivalents and marketable securities by significant investment categories as of December 31, 2014 and March 31, 2015 (in millions):

Table of Contents

	35,970	393	(148) 36,215	3,588	32,627
Total	\$64,719	\$865	\$(148) \$65,436	\$16,976	\$48,460

(1) The majority of our time deposits are foreign deposits.

(2)

The balances as of December 31, 2014 and March 31, 2015 were related to cash collateral received in connection with our securities lending program, which was invested in reverse repurchase agreements maturing within three months. See section titled "Securities Lending Program" below for further discussion of this program.

⁽³⁾ Fixed-income bond funds consist of mutual funds that primarily invest in corporate and government bonds.

Table of Contents

We determine realized gains or losses on the sale of marketable securities on a specific identification method. We recognized gross realized gains of \$98 million and \$77 million for the three months ended March 31, 2014 and 2015. We recognized gross realized losses of \$24 million and \$45 million for the three months ended March 31, 2014 and 2015. We reflect these gains and losses as a component of Interest and other income, net in the accompanying Consolidated Statements of Income.

The following table summarizes the estimated fair value of our investments in marketable debt securities, accounted for as available-for-sale securities and classified by the contractual maturity date of the securities (in millions):

	As of March 31, 2015 (unaudited)
Due in 1 year	\$6,279
Due in 1 year through 5 years	24,805
Due in 5 years through 10 years	6,943
Due after 10 years	8,751
Total	\$46,778

Non-marketable Investments

We included \$90 million and \$998 million of available-for-sale debt securities in our non-marketable investments as of December 31, 2014 and March 31, 2015. These debt securities are primarily preferred stock with certain features and convertible notes issued by private companies that do not have readily determinable market values and are categorized accordingly as Level 3 in the fair value hierarchy. To estimate the fair value of these securities, we used a combination of valuation methodologies, including market and income approaches based on prior transaction prices, estimated timing, probability and amount of cash flows, and illiquidity considerations. Financial information of the private companies may not be available to us due to the nature of those companies, and consequently we will estimate the value based on the best available information available to us at the measurement date. As of December 31, 2014 and March 31, 2015, the estimated fair value of these securities approximated their carrying value. In addition, since these securities do not have contractual maturity dates and we do not intend to liquidate them in the next 12 months, we have classified them as non-current assets on the accompanying Consolidated Balance Sheet as of December 31, 2014 and March 31, 2015.

The following table presents reconciliations for our assets measured and recorded at fair value on a recurring basis, using significant unobservable inputs (Level 3) (in millions, unaudited):

	Level 3
Balance at January 1, 2015	\$90
Purchases of securities ⁽¹⁾	908
Balance at March 31, 2015	\$998

⁽¹⁾ Purchases of securities included our \$900 million investment in SpaceX, a space exploration and space transport company, made during January 2015.

Impairment Considerations for Available-for-sale Investments

The following tables present gross unrealized losses and fair values for those marketable investments that were in an unrealized loss position as of December 31, 2014 and March 31, 2015, aggregated by investment category and the length of time that individual securities have been in a continuous loss position (in millions):

Table of Contents

	As of December 31, 2014					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss

Total	\$16,337	\$(234)	\$2,784	\$(58)	\$19,121	\$(292)
	As of March 31, 2015					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
			(unaudited)			
Foreign government bonds	\$366	\$(4)	\$23	\$(1)	\$389	\$(5)
Municipal securities	930	(3)	19	(1)	949	(4)
Corporate debt securities	3,266	(59)	126	(5)	3,392	(64)
Agency residential mortgage-backed securities	798	(3)	1,246	(19)	2,044	(22)
Asset-backed securities	1,941	(2)	0	0	1,941	(2)
Fixed-income bond funds	319	(51)	0	0	319	(51)
Total	\$7,620	\$(122)	\$1,414	\$(26)	\$9,034	\$(148)

We periodically review our available-for-sale debt and equity securities for other-than-temporary impairment. We consider factors such as the duration, severity and the reason for the decline in value, the potential recovery period and our intent to sell. For debt securities, we also consider whether (i) it is more likely than not that we will be required to sell the debt securities before recovery of their amortized cost basis, and (ii) the amortized cost basis cannot be recovered as a result of credit losses. During the three months ended March 31, 2014 and 2015, we did not recognize any other-than-temporary impairment loss.

Securities Lending Program

From time to time, we enter into securities lending agreements with financial institutions to enhance investment income. We loan selected securities which are collateralized in the form of cash or securities. Cash collateral is invested in reverse repurchase agreements which are collateralized in the form of securities.

We classify loaned securities as cash equivalents or marketable securities and record the cash collateral as an asset with a corresponding liability in the accompanying Consolidated Balance Sheets. We classify reverse repurchase agreements maturing within three months as cash equivalents and those longer than three months as receivable under reverse repurchase agreements in the accompanying Consolidated Balance Sheets. For security collateral received, we do not record an asset or liability except in the event of counterparty default.

Derivative Financial Instruments

We recognize derivative instruments as either assets or liabilities in the accompanying Consolidated Balance Sheets at fair value. We record changes in the fair value (i.e. gains or losses) of the derivatives in the accompanying Consolidated Statements of Income as Interest and other income, net, as part of revenues, or as a component of accumulated other comprehensive income (AOCI) in the accompanying Consolidated Balance Sheets, as discussed below.

We enter into foreign currency contracts with financial institutions to reduce the risk that our cash flows and earnings will be adversely affected by foreign currency exchange rate fluctuations. We use certain interest rate derivative

Table of Contents

contracts to hedge interest rate exposures on our fixed income securities and our anticipated debt issuance. Our program is not used for trading or speculative purposes.

We enter into master netting arrangements, which reduce credit risk by permitting net settlement of transactions with the same counterparty. To further reduce credit risk, we enter into collateral security arrangements under which the counterparty is required to provide collateral when the net fair value of certain financial instruments fluctuates from contractually established thresholds. We can take possession of the collateral in the event of counterparty default. As of December 31, 2014 and March 31, 2015, we received cash collateral related to the derivative instruments under our collateral security arrangements of \$268 million and \$311 million.

Cash Flow Hedges

We use options designated as cash flow hedges to hedge certain forecasted revenue transactions denominated in currencies other than the U.S. dollar. The notional principal of these contracts was approximately \$13.6 billion and \$13.5 billion as of December 31, 2014 and March 31, 2015. These foreign exchange contracts have maturities of 36 months or less.

In 2012, we entered into forward-starting interest rate swaps, with a total notional amount of \$1.0 billion and terms calling for us to receive interest at a variable rate and to pay interest at a fixed rate, that effectively locked in an interest rate on our anticipated debt issuance of \$1.0 billion in 2014. We issued \$1.0 billion of unsecured senior notes in February 2014 (See details in Note 3). As a result, we terminated the forward-starting interest rate swaps upon the debt issuance. The gain associated with the termination is reported within operating activities in the Consolidated Statement of Cash Flows for the three months ended March 31, 2014, consistent with the impact of the hedged item. We reflect gains or losses on the effective portion of a cash flow hedge as a component of AOCI and subsequently reclassify cumulative gains and losses to revenues or interest expense when the hedged transactions are recorded. If the hedged transactions become probable of not occurring, the corresponding amounts in AOCI would be immediately reclassified to Interest and other income, net. Further, we exclude the change in the time value of the options from our assessment of hedge effectiveness. We record the premium paid or time value of an option on the date of purchase as an asset. Thereafter, we recognize changes to this time value in Interest and other income, net.

As of March 31, 2015, the effective portion of our cash flow hedges before tax effect was \$1.3 billion, of which \$1.1 billion is expected to be reclassified from AOCI into earnings within the next 12 months.

Fair Value Hedges

We use forward contracts designated as fair value hedges to hedge foreign currency risks for our investments denominated in currencies other than the U.S. dollar. We exclude changes in the time value for these forward contracts from the assessment of hedge effectiveness. The notional principal of these contracts was \$1.5 billion as of December 31, 2014 and March 31, 2015.

We use interest rate swaps designated as fair value hedges to hedge interest rate risk for certain fixed rate securities. The notional principal of these contracts was \$175 million and \$200 million as of December 31, 2014 and March 31, 2015.

Gains and losses on these forward contracts and interest rate swaps are recognized in Interest and other income, net along with the offsetting losses and gains of the related hedged items. Realized gains and losses on these forward contracts and interest rate swaps are reported within investment activities in the Consolidated Statement of Cash Flows, consistent with the impact of the hedged items.

Other Derivatives

Other derivatives not designated as hedging instruments consist of forward contracts that we use to hedge intercompany transactions and other monetary assets or liabilities denominated in currencies other than the local currency of a subsidiary. We recognize gains and losses on these contracts, as well as the related costs in Interest and other income, net along with the foreign currency gains and losses on monetary assets and liabilities. The notional principal of foreign exchange contracts outstanding was \$6.2 billion as of December 31, 2014 and March 31, 2015. We also use exchange-traded interest rate futures contracts and "To Be Announced" (TBA) forward purchase commitments of mortgage-backed assets to hedge interest rate risks on certain fixed income securities. The TBA contracts meet the definition of derivative instruments in cases where physical delivery of the assets is not taken at the earliest available delivery date. Our interest rate futures and TBA contracts (together interest rate contracts) are not

designated as hedging instruments. We recognize gains and losses on these contracts, as well as the related costs, in Interest and other income, net. The gains and losses are generally economically offset by unrealized gains and losses in the underlying available-for-sale securities, which are recorded as a component of AOCI until the securities

Table of Contents

are sold or other-than-temporarily impaired, at which time the amounts are moved from AOCI into Interest and other income, net. The total notional amounts of interest rate contracts outstanding were \$150 million as of December 31, 2014 and \$250 million as of March 31, 2015.

The fair values of our outstanding derivative instruments were as follows (in millions):

		As of December 31, 2014		
	Balance Sheet Location	Fair Value of Derivatives Designated as Hedging Instruments	Fair Value of Derivatives Not Designated as Hedging Instruments	Total Fair Value
Derivative Assets:				
Level 2:				
Foreign exchange contracts	Prepaid revenue share, expenses and other assets, current and non-current	\$851	\$0	\$851

Total		\$(36) \$150

Offsetting of Derivatives, Securities Lending and Reverse Repurchase Agreements

We present our derivatives, securities lending and reverse repurchase agreements at gross fair values in the Consolidated Balance Sheets. However, our master netting and other similar arrangements allow net settlements under certain conditions. As of December 31, 2014 and March 31, 2015, information related to these offsetting arrangements was as follows (in millions):

Table of Contents

Offsetting of Assets

As of December 31, 2014

Note 3. Debt

Short-Term Debt

We have a debt financing program of up to \$3.0 billion through the issuance of commercial paper. Net proceeds from this program are used for general corporate purposes. As of December 31, 2014 and March 31, 2015, we had \$2.0 billion of outstanding commercial paper recorded as short-term debt with weighted-average interest rates of 0.1%. In conjunction with this program, we have a \$3.0 billion revolving credit facility which expires in July 2016. The interest rate for the credit facility is determined based on a formula using certain market rates. As of December 31, 2014 and March 31, 2015, we were in compliance with the financial covenants in the credit facility, and no amounts were outstanding under the credit facility at December 31, 2014 and March 31, 2015. The estimated fair value of the commercial paper approximated its carrying value as of December 31, 2014 and March 31, 2015.

Long-Term Debt

We issued \$1.0 billion of unsecured senior notes (the "2014 Notes") in February 2014 and \$3.0 billion of unsecured senior notes in three tranches (collectively, the "2011 Notes") in May 2011. We used the net proceeds from the issuance of the 2011 Notes to repay a portion of our outstanding commercial paper and for general corporate purposes. We used the net proceeds from the issuance of the 2014 Notes for the repayment of the portion of the principal amount of our 2011 Notes which matured on May 19, 2014 and for general corporate purposes. The total outstanding Notes are summarized below:

	As of December 31, 2014	As of March 31, 2015 (unaudited)
Short-Term Portion of Long-Term Debt		
Capital Lease Obligation	\$ 10	\$ 9
Total	\$ 10	\$ 9
Long-Term Debt		
2.125% Notes due on May 19, 2016	\$ 1,000	\$ 1,000
3.625% Notes due on May 19, 2021	1,000	1,000
3.375% Notes due on February 25, 2024	1,000	1,000
Unamortized discount for the Notes above	(8) (7
Subtotal	2,992	2,993
Capital Lease Obligation	236	233
Total	\$3,228	\$3,226

The effective interest yields of the Notes due in 2016, 2021, and 2024 were 2.241%, 3.734% and 3.377%, respectively. Interest on the 2011 and 2014 Notes is payable semi-annually. The 2011 and 2014 Notes rank equally with each other and with all of our other senior unsecured and unsubordinated indebtedness from time to time outstanding. We may redeem the 2011 and 2014 Notes at any time in whole or in part at specified redemption prices. We are not subject to any financial covenants under the 2011 Notes or the 2014 Notes. The total estimated fair value of the outstanding 2011 and 2014 Notes was approximately \$3.1 billion and \$3.2 billion as of December 31, 2014 and March 31, 2015. The fair value of the outstanding 2011 and 2014 Notes was determined based on observable market prices of identical instruments in less active markets and is categorized accordingly as Level 2 in the fair value hierarchy.

In August 2013, we entered into a capital lease obligation on certain property which expires in 2028 with an option to purchase the property in 2016. The effective rate of the capital lease obligation approximates the market rate. The estimated fair value of the capital lease obligation approximated its carrying value as of December 31, 2014 and March 31, 2015.

Table of Contents

Note 4. Balance Sheet Components

Property and Equipment

Property and equipment consisted of the following (in millions):

	As of December 31, 2014	As of March 31, 2015 (unaudited)
Information technology assets	\$ 10,918	\$ 11,855
Land and buildings	13,326	13,479
Construction in progress	6,555	7,415
Leasehold improvements	1,868	2,016
Furniture and fixtures	79	78
Property and equipment, gross	32,746	34,843
Less: accumulated depreciation and amortization	(8,863) (9,395
Property and equipment, net	\$ 23,883	\$ 25,448

Property under capital lease with a cost basis of \$258 million was included in land and buildings and construction in progress as of March 31, 2015.

Prepaid Revenue Share, Expenses and Other Assets, Non-Current

Note Receivable

In connection with the sale of our Motorola Mobile business on October 29, 2014 (see Note 8 for additional information), we received an interest-free, three-year prepayable promissory note (the "Note Receivable") due October 2017 from Lenovo. The Note Receivable is included in prepaid revenue share, expenses and other assets, non-current on our Consolidated Balance Sheets. Based on the general market conditions and the credit quality of Lenovo, we discounted the Note Receivable at an effective interest rate of 4.5% as shown in the table below (in millions):

	As of December 31, 2014	As of March 31, 2015 (unaudited)
Principal of the Note Receivable	\$ 1,500	\$ 1,500
Less: unamortized discount for the Note Receivable	(175) (160
Total	\$ 1,325	\$ 1,340

As of December 31, 2014 and March 31, 2015, we did not recognize any valuation allowance on the Note Receivable.

Accumulated Other Comprehensive Income (Loss)

The components of AOCI, net of tax, were as follows (in millions, unaudited):

	Foreign Currency Translation Adjustments	Unrealized Gains (Losses) on Available-for-Sale Investments	Unrealized Gains on Cash Flow Hedges	Total
Balance as of December 31, 2013	\$ 16	\$ 50	\$ 59	\$ 125
Other comprehensive income before reclassifications	65	217	10	292
Amounts reclassified from AOCI	0	(67) (5) (72
Other comprehensive income	65	150	5	220
Balance as of March 31, 2014	\$ 81	\$ 200	\$ 64	\$ 345

Table of Contents

	Foreign Currency Translation Adjustments	Unrealized Gains (Losses) on Available-for-Sale Investments	Unrealized Gains on Cash Flow Hedges	Total
Balance as of December 31, 2014	\$(980) \$ 421	\$586	\$27
Other comprehensive income (loss) before reclassifications	(923) 221	562	(140

Balance as of March 31, 2015	\$(1,903) \$ 615	\$917	\$(371

The effects on net income of amounts reclassified from AOCI were as follows (in millions, unaudited):

AOCI Components	Location	Gains (Losses) Reclassified from AOCI to the Consolidated Statement of Income Three Months Ended March 31,	
		2014	2015
Unrealized gains on available-for-sale investments	Interest and other income, net	\$74	\$32
	Provision for income taxes	(7) (5
	Net of tax	\$67	\$27
Unrealized gains on cash flow hedges	Revenue	\$8	\$311
Foreign exchange contracts	Interest and other income, net	0	1
Interest rate contracts	Provision for income taxes	(3) (81
	Net of tax	\$5	\$231
Total amount reclassified, net of tax		\$72	\$258

Note 5. Acquisitions

During the three months ended March 31, 2015, we completed various acquisitions and purchases of intangible assets for total consideration of approximately \$64 million. In aggregate, \$26 million was attributed to intangible assets, \$17 million was attributed to goodwill, and \$21 million was attributed to net assets acquired. These acquisitions generally enhance the breadth and depth of our offerings and expand our expertise in engineering and other functional areas. The amount of goodwill expected to be deductible for tax purposes is approximately \$6 million.

Pro forma results of operations for these acquisitions have not been presented because they are not material to the consolidated results of operations, either individually or in aggregate.

For all acquisitions completed during the three months ended March 31, 2015, patents and developed technology have a weighted-average useful life of 4.1 years and trade names and other have a weighted-average useful life of 3.0 years.

Note 6. Collaboration Agreement

On September 18, 2013, we announced the formation of Calico, a life science company with a mission to harness advanced technologies to increase our understanding of the biology that controls lifespan. Calico's results of operations and statement of financial position are included in our consolidated financial statements. As of March 31, 2015, Google has contributed \$240 million to Calico in exchange for Calico convertible preferred units. As of March 31, 2015, Google has also committed to fund an additional \$490 million on an as-needed basis.

In September 2014, AbbVie Inc. (AbbVie) and Calico announced a research and development collaboration intended to help both companies discover, develop, and bring to market new therapies for patients with age-related diseases, including neurodegeneration and cancer. As of March 31, 2015, AbbVie has contributed \$750 million to fund

Table of Contents

the collaboration pursuant to the agreement, which reflects its total commitment. As of March 31, 2015, Calico has contributed \$250 million and committed up to an additional \$500 million.

Calico will use its scientific expertise to establish a world-class research and development facility, with a focus on drug discovery and early drug development; and AbbVie will provide scientific and clinical development support and its commercial expertise to bring new discoveries to market. Both companies will share costs and profits equally. AbbVie's contribution has been recorded as a liability on Calico's financial statements, which is reduced and reflected as a reduction to research and development expense as eligible research and development costs are incurred by Calico over the next few years.

Note 7. Goodwill and Other Intangible Assets

Goodwill

The changes in the carrying amount of goodwill for the three months ended March 31, 2015 were as follows (in millions, unaudited):

Balance as of December 31, 2014	\$15,599	
Goodwill acquired	17	
Goodwill adjustment	(43)
Balance as of March 31, 2015	\$15,573	

Other Intangible Assets

Information regarding our purchased intangible assets was as follows (in millions):

	As of December 31, 2014		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
Patents and developed technology	\$6,547	\$2,513	\$4,034
Customer relationships	1,410	1,168	242
Trade names and other	696	365	331
Total	\$8,653	\$4,046	\$4,607

	As of March 31, 2015		
	Gross Carrying Amount (unaudited)	Accumulated Amortization	Net Carrying Value
Patents and developed technology	\$6,510	\$2,697	\$3,813
Customer relationships	1,396	1,199	197
Trade names and other	729	359	370
Total	\$8,635	\$4,255	\$4,380

Amortization expense relating to our purchased intangible assets was \$270 million and \$239 million for the three months ended March 31, 2014 and 2015. For the three months ended March 31, 2014, amortization expense related to Motorola Mobile was included in net loss from discontinued operations.

As of March 31, 2015, expected amortization expense relating to purchased intangible assets for each of the next five years and thereafter was as follows (in millions, unaudited):

Remainder of 2015	\$649
2016	791
2017	714
2018	631
2019	522
Thereafter	1,073
	\$4,380

Table of Contents

Note 8. Discontinued Operations

On October 29, 2014, we closed the sale of the Motorola Mobile business to Lenovo. We maintain ownership of the vast majority of the Motorola Mobile patent portfolio, including pre-closing patent applications and invention disclosures, which we licensed to Motorola Mobile for its continued operations. Additionally, in connection with the sale, we agreed to indemnify Lenovo for certain potential liabilities of the Motorola Mobile business, for which we recorded a liability of \$130 million at the time of close.

The following table presents financial results of the Motorola Mobile business for the three months ended March 31, 2014, which were presented as Net loss from discontinued operations (in millions, unaudited):

	Three Months Ended March 31, 2014	
Revenues	\$1,377	
Loss from discontinued operations before income taxes	(274)
Benefits from income taxes	76	
Net loss from discontinued operations	\$(198)

Note 9. Interest and Other Income, Net

The components of Interest and other income, net, were as follows (in millions, unaudited):

	Three Months Ended March 31,	
	2014	2015
Interest income	\$168	\$226
Interest expense	(24) (26
Realized gains on available-for-sale investments, net	74	32
Foreign currency exchange losses, net	(109) (62
Realized gain on equity interest	103	0
Realized gain on non-marketable investments	117	0
Other income (expense), net	28	(13
Interest and other income, net	\$357	\$157

Note 10. Contingencies

Legal Matters

Antitrust Investigations

On November 30, 2010, the European Commission's (EC) Directorate General for Competition opened an investigation into various antitrust-related complaints against us. On April 15, 2015, the EC issued a Statement of Objections (SO) regarding the display and ranking of shopping search results. The EC also opened a formal investigation into Android. We will respond to the SO and will continue to cooperate with the EC.

The Comision Nacional de Defensa de la Competencia in Argentina, the Competition Commission of India, the Taiwan Fair Trade Commission, Brazil's Council for Economic Defense, the Canadian Competition Bureau and the Federal Antimonopoly Service of the Russian Federation have also opened investigations into certain of our business practices.

The state attorney general from Mississippi issued subpoenas in 2011 and 2012 in an antitrust investigation of our business practices. We have responded to those subpoenas, and we remain willing to cooperate with them if they have any further information requests.

Patent and Intellectual Property Claims

We have had patent, copyright, and trademark infringement lawsuits filed against us claiming that certain of our products, services, and technologies infringe the intellectual property rights of others. Adverse results in these lawsuits may include awards of substantial monetary damages, costly royalty or licensing agreements, or orders preventing

Table of Contents

us from offering certain features, functionalities, products, or services, and may also cause us to change our business practices, and require development of non-infringing products or technologies, which could result in a loss of revenues for us and otherwise harm our business. In addition, the U.S. International Trade Commission (ITC) has increasingly become an important forum to litigate intellectual property disputes because an ultimate loss for a company or its suppliers in an ITC action could result in a prohibition on importing infringing products into the U.S. Since the U.S. is an important market, a prohibition on importation could have an adverse effect on us, including preventing us from importing many important products into the U.S. or necessitating workarounds that may limit certain features of our products.

Furthermore, many of our agreements with our customers and partners require us to indemnify them for certain intellectual property infringement claims against them, which would increase our costs as a result of defending such claims, and may require that we pay significant damages if there were an adverse ruling in any such claims. Our customers and partners may discontinue the use of our products, services, and technologies, as a result of injunctions or otherwise, which could result in loss of revenues and adversely impact our business.

Other

We are also regularly subject to claims, suits, government investigations, and other proceedings involving competition (such as the pending EC investigations described above), intellectual property, privacy, tax, labor and employment, commercial disputes, content generated by our users, goods and services offered by advertisers or publishers using our platforms, personal injury, consumer protection, and other matters. Such claims, suits, government investigations, and other proceedings could result in fines, civil or criminal penalties, or other adverse consequences.

Certain of our outstanding legal matters include speculative claims for substantial or indeterminate amounts of damages. We record a liability when we believe that it is probable that a loss has been incurred and the amount can be reasonably estimated. If we determine that a loss is possible and a range of the loss can be reasonably estimated, we disclose the range of the possible loss. We evaluate, on a monthly basis, developments in our legal matters that could affect the amount of liability that has been previously accrued, and the matters and related ranges of possible losses disclosed, and make adjustments as appropriate. Significant judgment is required to determine both likelihood of there being and the estimated amount of a loss related to such matters.

With respect to our outstanding legal matters, based on our current knowledge, we believe that the amount or range of reasonably possible loss will not, either individually or in the aggregate, have a material adverse effect on our business, consolidated financial position, results of operations, or cash flows. However, the outcome of such legal matters is inherently unpredictable and subject to significant uncertainties.

We expense legal fees in the period in which they are incurred.

Taxes

We are under audit by the Internal Revenue Service (IRS) and various other domestic and foreign tax authorities with regards to income tax and indirect tax matters. We have reserved for potential adjustments to our provision for income taxes and accrual of indirect taxes that may result from examinations by, or any negotiated agreements with, these tax authorities, and we believe that the final outcome of these examinations or agreements will not have a material effect on our results of operations. If events occur which indicate payment of these amounts is unnecessary, the reversal of the liabilities would result in the recognition of benefits in the period we determine the liabilities are no longer necessary. If our estimates of the federal, state, and foreign income tax liabilities and indirect tax liabilities are less than the ultimate assessment, it would result in a further charge to expense.

Please see Note 13 for additional information regarding contingencies related to our income taxes.

Note 11. Net Income Per Share

The following table sets forth the computation of basic and diluted net income per share of Class A and Class B common stock and Class C capital stock (in millions, except share amounts which are reflected in thousands and per share amounts):

Table of Contents

	Three Months Ended March 31,					
	2014			2015		
	(unaudited)					
	Class A	Class B	Class C	Class A	Class B	Class C
Basic net income (loss) per share:						
Numerator						
Allocation of undistributed earnings - continuing operations	\$ 1,521	\$ 304	\$ 1,825	\$ 1,512	\$ 278	\$ 1,796
Allocation of undistributed earnings - discontinued operations	(83)	(16)	(99)	—	—	—
Total	\$ 1,438	\$ 288	\$ 1,726	\$ 1,512	\$ 278	\$ 1,796
Denominator						
Number of shares used in per share computation	280,202	56,091	336,293	287,043	52,846	341,026

Continuing operations	\$5.42	\$5.42	\$5.42	\$5.27	\$5.27	\$5.27
Discontinued operations	(0.29)	(0.29)	(0.29)	—	—	—
Basic net income per share	\$5.13	\$5.13	\$5.13	\$5.27	\$5.27	\$5.27
Diluted net income (loss) per share:						
Numerator						
Allocation of undistributed earnings for basic computation - continuing operations	\$ 1,521	\$ 304	\$ 1,825	\$ 1,512	\$ 278	\$ 1,796
Reallocation of undistributed earnings as a result of conversion of Class B to Class A shares	304	—	—	278	—	—
Reallocation of undistributed earnings	—	(5)	—	(8)	(3)	8
Allocation of undistributed earnings - continuing operations	\$ 1,825	\$ 299	\$ 1,825	\$ 1,782	\$ 275	\$ 1,804
Allocation of undistributed earnings for basic computation - discontinued operations	\$(83)	\$(16)	\$(99)	\$—	\$—	\$—
Reallocation of undistributed earnings as a result of conversion of Class B to Class A shares	(16)	—	—	—	—	—
Reallocation of undistributed earnings	—	—	—	—	—	—
Allocation of undistributed earnings - discontinued operations	\$(99)	\$(16)	\$(99)	\$—	\$—	\$—
Denominator						
Number of shares used in basic computation	280,202	56,091	336,293	287,043	52,846	341,026
Weighted-average effect of dilutive securities						
Add:						
Conversion of Class B to Class A common shares outstanding	56,091	—	—	52,846	—	—
Employee stock options	2,419	—	2,419	1,694	—	1,650
Restricted stock units and other contingently issuable shares	3,894	—	3,894	1,045	—	4,194
Number of shares used in per share computation	342,606	56,091	342,606	342,628	52,846	346,870
Diluted net income (loss) per share:						
Continuing operations	\$5.33	\$5.33	\$5.33	\$5.20	\$5.20	\$5.20
Discontinued operations	(0.29)	(0.29)	(0.29)	—	—	—
Diluted net income per share	\$5.04	\$5.04	\$5.04	\$5.20	\$5.20	\$5.20
For the periods presented above, the net income per share amounts are the same for Class A and Class B common stock and Class C capital stock because the holders of each class are legally entitled to equal per share distributions						

whether through dividends or in liquidation in accordance with our Fourth Amended and Restated Certificate of Incorporation.

Note 12. Stockholders' Equity

Stock Split Effected In Form of Stock Dividend

In January 2014, our board of directors approved the distribution of shares of Class C capital stock as a dividend to our holders of Class A and Class B common stock (the Stock Split). The Stock Split had a record date of March 27, 2014 and a payment date of April 2, 2014.

In accordance with a settlement of litigation involving the authorization to distribute Class C capital stock, at the close of trading on April 2, 2015, the last trading day of the 365 day period following the first date the Class C shares traded on NASDAQ (Lookback Period), we determined that a payment (the Adjustment Payment) in the amount of

Table of Contents

\$522 million was due. The amount of the Adjustment Payment was based on the percentage difference that developed between the volume-weighted average price of Class A and Class C shares during the Lookback Period, as supplied by NASDAQ Data-on-Demand, and was payable to holders of Class C capital stock as of the end of the Lookback Period in cash, Class A common stock, Class C capital stock, or a combination thereof, at the discretion of our board of directors. On April 22, 2015, our board of directors approved the Adjustment Payment to be paid on or about May 4, 2015 in shares of Class C capital stock, and cash in lieu of any fractional shares of Class C capital stock.

In the quarter ending June 30, 2015, the Adjustment Payment will be allocated to the numerator for calculating net income per share of Class C capital stock from net income available to shareholders and any remaining undistributed earnings will be allocated on a pro rata basis to Class A and Class B common stock and Class C capital stock based on the number of shares used in the per share computation for each class of stock. The dilutive impact of the Adjustment Payment is included in the weighted-average effect of dilutive securities for Class C capital stock in the three months ended March 31, 2015.

Stock-Based Award Activities

The following table summarizes the activities for our stock options for the three months ended March 31, 2015:

	Options Outstanding		Weighted-	Aggregate
	Number of	Weighted-	Average	Intrinsic
	Shares	Average	Remaining	Value
		Exercise Price	Contractual	(in millions) ⁽¹⁾
			Term	
			(in years)	
	(unaudited)			
Balance as of December 31, 2014	7,240,419	\$215.56		
Granted	0	N/A		
Exercised	(619,179)	\$179.33		
Forfeited/canceled	(4,153)	\$312.03		
Balance as of March 31, 2015	6,617,087	\$218.88	4.2	\$ 2,200
Exercisable as of March 31, 2015	5,681,295	\$203.22	3.8	\$ 1,978
Exercisable as of March 31, 2015 and expected to vest thereafter ⁽²⁾	5,901,780	\$217.40	4.2	\$ 2,176

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards ⁽¹⁾ and the closing stock price of \$554.70 and \$548.00 for our Class A common stock and Class C capital stock, respectively, on March 31, 2015.

⁽²⁾ Options expected to vest reflect an estimated forfeiture rate.

As of March 31, 2015, there was \$38 million of unrecognized compensation cost related to outstanding Google employee stock options. This amount is expected to be recognized over a weighted-average period of 1.1 years. To the extent the actual forfeiture rate is different from what we have estimated, stock-based compensation expense related to these awards will be different from our expectations.

The following table summarizes the activities for our unvested restricted stock units (RSUs) for the three months ended March 31, 2015:

	Unvested Restricted Stock Units	
	Number of	Weighted-
	Shares	Average
		Grant-Date
		Fair Value
	(unaudited)	
Unvested as of December 31, 2014	24,619,549	\$487.80
Granted	1,233,138	\$527.84
Vested	(2,617,997)	\$434.04

Edgar Filing: Google Inc. - Form 10-Q

Forfeited/canceled	(378,918)	\$479.95
Unvested as of March 31, 2015	22,855,772		\$496.25
Expected to vest after March 31, 2015 ⁽¹⁾	20,385,063		\$496.25

⁽¹⁾ RSUs expected to vest reflect an estimated forfeiture rate.

Table of Contents

As of March 31, 2015, there was \$9.1 billion of unrecognized compensation cost related to unvested Google employee RSUs. This amount is expected to be recognized over a weighted-average period of 2.7 years. To the extent the actual forfeiture rate is different from what we have estimated, stock-based compensation expense related to these awards will be different from our expectations.

Note 13. Income Taxes

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. Our total unrecognized tax benefits were \$3,412 million and \$3,683 million as of December 31, 2014 and March 31, 2015. Our total unrecognized tax benefits that, if recognized, would affect our effective tax rate were \$3,026 million and \$3,268 million as of December 31, 2014 and March 31, 2015. Our existing tax positions will continue to generate an increase in liabilities for unrecognized tax benefits.

Our provision for income taxes and effective tax rate increased from the three months ended March 31, 2014 to the three months ended March 31, 2015 primarily due to more capital loss utilized in prior year and increase in tax reserves, offset by more federal investment tax credits received in the current year.

Our effective tax rate could fluctuate significantly on a quarterly basis and could be adversely affected to the extent earnings are lower than anticipated in countries that have lower statutory rates and higher than anticipated in countries that have higher statutory rates. Our effective tax rate could also fluctuate due to the net gains and losses recognized by legal entities on certain hedges and related hedged intercompany and other transactions under our foreign exchange risk management program, by changes in the valuation of our deferred tax assets or liabilities, or by changes in tax laws, regulations, or accounting principles, as well as certain discrete items. In addition, we are subject to the continuous examination of our income tax returns by the IRS and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes.

We have received tax assessments in multiple foreign jurisdictions asserting transfer pricing adjustments or permanent establishment. We continue to defend any and all such claims as presented. While we believe it is more likely than not that our tax position will be sustained, it is reasonably possible that we will have future obligations related to these matters.

Note 14. Information about Segments and Geographic Areas

Subsequent to the completion of our sale of the Motorola Mobile business on October 29, 2014, we operate as a single operating segment. Our chief operating decision maker reviews financial information presented on a consolidated basis for purposes of allocating resources and evaluating financial performance.

Revenues by geography are based on the billing addresses of our customers. The following tables set forth revenues and long-lived assets by geographic area (in millions):

	Three Months Ended March 31, 2014		2015 (unaudited)
Revenues:			
United States	\$6,656		\$7,388
United Kingdom	1,583		1,675
Rest of the world	7,181		8,195
Total revenues	\$15,420		\$17,258
	As of December 31, 2014	As of March 31, 2015	(unaudited)
Long-lived assets:			
United States	\$37,355		\$40,136
International	13,093		12,951

Total long-lived assets	\$50,448	\$53,087
-------------------------	----------	----------

25

Table of Contents

Note 15. Subsequent Event

On October 30, 2014, we entered into a lease agreement which, as amended, became effective and commenced on April 1, 2015, pursuant to which Google will lease and manage Moffett Federal Airfield in Mountain View, California for a 60-year term, with unilateral break options that may be exercised at each 15-year period. The total lease payments over the 60-year term are \$1.2 billion.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Please read the following discussion and analysis of our financial condition and results of operations together with our consolidated financial statements and related notes included under Part I, Item 1 of this Quarterly Report on Form 10-Q.

Executive Overview of Results

Here are our key financial results for the three months ended March 31, 2015:

Consolidated revenues increased 11.9% from the first quarter ended March 31, 2014 to \$17.3 billion, primarily driven by an increase in advertising revenues generated by Google websites and an increase in other revenues, and to a lesser extent, an increase in advertising revenues generated by Google Network Members' websites.

Revenues from the United States, the United Kingdom, and Rest of World were \$7.4 billion, \$1.7 billion, and \$8.2 billion, respectively.

Cost of revenues was \$6.4 billion, consisting of traffic acquisition costs of \$3.3 billion and other cost of revenues of \$3.1 billion. Our traffic acquisition costs as a percentage of advertising revenues was 21.6%.

Operating expenses (excluding cost of revenues) were \$6.5 billion, primarily consisting of labor and facilities-related costs for our research and development and sales and marketing functions, advertising and promotional expenses, and stock-based compensation expense.

Income from operations was \$4.4 billion.

The effective tax rate was 22.1%.

Net income was \$3.6 billion with diluted earnings per share of \$5.20.

Operating cash flow was \$6.6 billion.

Capital expenditures were \$2.9 billion.

Headcount increased to 55,419 as of March 31, 2015.

Table of Contents

Results of Operations

The following table presents our operating results as a percentage of revenues for the periods presented:

	Three Months Ended March 31,		
	2014 ⁽¹⁾	2015	
	(unaudited)		
Consolidated Statements of Income Data:			
Revenues	100	% 100	%
Costs and expenses:			
Cost of revenues	38.7	36.8	
Research and development	13.8	16.0	
Sales and marketing	11.2	12.0	
General and administrative	9.6	9.4	
Total costs and expenses	73.3	74.2	
Income from operations	26.7	25.8	
Interest and other income, net	2.3	0.9	
Income from continuing operations before income taxes	29.0	26.7	
Provision for income taxes	5.3	5.9	
Net income from continuing operations	23.7	20.8	
Net loss from discontinued operations	(1.3) 0.0	
Net income	22.4	% 20.8	%

(1) The financial results of Motorola Mobile are presented as net loss from discontinued operations on the Consolidated Statements of Income for the three months ended March 31, 2014.

Revenues

The following table presents our revenues, by revenue source, for the periods presented (in millions):

	Three Months Ended March 31,	
	2014	2015
	(unaudited)	
Advertising revenues:		
Google websites ⁽¹⁾	\$ 10,469	\$ 11,932
Google Network Members' websites ⁽²⁾⁽³⁾	3,528	3,576
Total advertising revenues	13,997	15,508
Other revenues ⁽²⁾	1,423	1,750
Revenues	\$ 15,420	\$ 17,258

(1) Our revenues from Google websites include monetized searches on Google.com and other owned and operated properties, including traffic via distribution partners.

(2) Prior period amounts have been adjusted to reflect the reclassification primarily related to DoubleClick ad serving software revenues from Other Revenues to Advertising Revenues from Google Network Members' websites to conform with our current period presentation.

(3) Our revenues from Google Network Members' websites, which include monetized searches from third party websites, are generated primarily through advertising programs including AdSense for search, AdSense for content, AdExchange, AdMob, and the DoubleClick platform.

Table of Contents

The following table presents our revenues, by revenue source, as a percentage of revenues for the periods presented:

	Three Months Ended March 31,			
	2014		2015	
	(unaudited)			
Advertising revenues:				
Google websites	67.9	%	69.1	%
Google Network Members' websites ⁽¹⁾	22.9		20.7	
Total advertising revenues	90.8	%	89.8	%
Other revenues ⁽¹⁾	9.2		10.2	
Revenues	100.0	%	100.0	%
Google websites as % of advertising revenues	74.8	%	76.9	%
Google Network Members' websites as % of advertising revenues	25.2	%	23.1	%

(1) Prior period amounts have been adjusted to reflect the reclassification primarily related to DoubleClick ad serving software revenues from Other Revenues to Advertising Revenues from Google Network Members' websites to conform with our current period presentation.

Advertising Revenues and Monetization Metrics

Our advertising revenues increased \$1,511 million from three months ended March 31, 2014 to three months ended March 31, 2015 primarily from an increase in advertising revenues generated by both Google websites and Google Network Members' websites. Our advertising revenues growth was driven primarily by an increase in the number of aggregate paid clicks through our advertising programs of 13% from three months ended March 31, 2014 to three months ended March 31, 2015. The increase in the number of paid clicks generated through our advertising programs was due to certain monetization improvements including new and richer ad formats, an increase in aggregate traffic across all platforms and properties including YouTube engagement ads like TrueView, the continued global expansion of our products, advertisers and user base across multiple devices, and an increase in the number of Google Network Members, partially offset by certain advertising policy changes. The positive impact of our revenues from paid clicks was partially offset by a decrease in the average cost-per-click paid by our advertisers of 7% from three months ended March 31, 2014 to three months ended March 31, 2015. The decrease was due to various factors, such as the general strengthening of the U.S. dollar compared to certain foreign currencies, ongoing product and policy changes, the geographic mix, device mix, as well as the property mix partially impacted by YouTube engagement ads like TrueView.

Our revenue growth rate has generally declined over time as a result of a number of factors, including increasing competition, query growth rates, challenges in maintaining our growth rate as our revenues increase to higher levels, the evolution of the online advertising market, our investments in new business strategies, changes in our product mix, and shifts in the geographic mix of our revenues. We also expect that our revenue growth rate will continue to be affected by evolving user preferences, advertising trends, the acceptance by users of our products and services as they are delivered on diverse devices, and our ability to create a seamless experience for both users and advertisers.

Table of Contents

The following table presents the changes in our paid clicks and cost-per-click for the periods presented (in percentage terms):

	Change from Q1 2014 to Q1 2015 (Year over Year)	
Aggregate paid clicks	13	%
Paid clicks on Google websites ⁽¹⁾	25	%
Paid clicks on Google Network Members' websites ⁽²⁾	(12))%
Aggregate cost-per-click	(7)%
Cost-per-click on Google websites	(13)%
Cost-per-click on Google Network Members' websites	2	%

(1) Paid clicks on Google websites include clicks related to ads served on Google owned and operated properties across different geographies and devices, including search, YouTube engagement ads like TrueView, and other owned and operated properties including Maps and Finance.

(2) Paid clicks on Google Network Members' websites include clicks related to ads served on non-Google properties participating in our AdSense for Search, AdSense for Content, and AdMob businesses.

The rate of change in revenues, as well as the rate of change in paid clicks and average cost-per-click on Google websites and Google Network Members' websites and their correlation with the rate of change in revenues, has fluctuated and may fluctuate in the future because of various factors, including:

- growth rates of our revenues from Google websites compared to those of our revenues from Google Network Members' websites;
- advertiser competition for keywords;
- changes in foreign currency exchange rates;
- seasonality;
- the fees advertisers are willing to pay based on how they manage their advertising costs;
- changes in advertising quality or formats;
- traffic growth in emerging markets compared to more mature markets and across various advertising verticals and channels;
- a shift in the proportion of non-click based revenue generated in Google websites and Google Network Members' websites; and
- general economic conditions.

Changes in aggregate paid clicks and average cost-per-click on Google websites and Google Network Members' websites may not reflect our performance or advertiser experiences in any specific geographic market, vertical, or industry.

Other Revenues

Other revenues increased \$327 million from three months ended March 31, 2014 to the three months ended March 31, 2015 and also increased as a percentage of total revenues. The increase was primarily due to growth of our sales of digital content products in the Google Play store, primarily apps (revenues for which we recognize net of payout to partners). This increase is partially offset by the decrease in sales of our hardware products including Nexus devices, and the general strengthening of the US dollar compared to certain foreign currencies.

Revenues by Geography

The following table presents our domestic and international revenues as a percentage of total revenues, determined based on the billing addresses of our customers:

Three Months Ended March 31,	
2014	2015
(unaudited)	

Edgar Filing: Google Inc. - Form 10-Q

United States	43	%	43	%
United Kingdom	10	%	10	%
Rest of the world	47	%	47	%

29

Table of Contents

For the amounts of revenues by geography, please refer to Note 14 of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Foreign Exchange Impact on Revenues

Our international revenues are favorably impacted as the U.S. dollar weakens relative to other foreign currencies, and unfavorably impacted as the U.S. dollar strengthens relative to other foreign currencies. For the purposes of determining the impact of foreign currency exchange rate fluctuations on our revenues, we take the U.S. dollar equivalent of foreign currency-denominated revenues of a particular period translated at the current period exchange rates minus the same revenues translated at corresponding comparable period rates.

We use foreign currency options to hedge certain foreign exchange impacts on our forecasted earnings. To the extent these derivatives are effective in managing our foreign exchange risk, we will reflect the hedge benefit in revenues in the period the hedged revenues are recorded. We pay a premium reflecting the time value of the option on the date of purchase. The changes in the time value of the option are reflected in interest and other income, net, over the life of the option, in the period incurred.

The following table presents our foreign exchange impact on revenues for the periods presented (in millions):

	Three Months Ended March 31,	
	2014	2015
	(unaudited)	
United Kingdom revenues	\$ 1,583	\$ 1,675
Foreign exchange impact on current year revenues using corresponding prior year exchange rates -- (revenues would be higher)/revenues would be lower	71	(116)
Hedging gains recognized in current year	0	20
Rest of the world revenues	\$ 7,181	\$ 8,195
Foreign exchange impact on current year revenues using corresponding prior year exchange rates -- (revenues would be higher)/revenues would be lower	(234)	(990)
Hedging gains recognized in current year	8	291

For the three months ended March 31, 2015, our revenues from the United Kingdom were unfavorably impacted by changes in foreign currency exchange rates over the three months ended March 31, 2014, primarily as the U.S. dollar strengthened relative to certain currencies, most notably the British pound. Our revenues from the rest of the world (excluding the United Kingdom) were unfavorably impacted by changes in foreign currency exchange rates over the the three months ended March 31, 2014, as the U.S. dollar strengthened relative to most currencies, most notably the Euro and Japanese yen.

Costs and ExpensesCost of Revenues

Cost of revenues consists of traffic acquisition costs which are the advertising revenues shared with our Google Network Members and the amounts paid to our distribution partners who distribute our browser or otherwise direct search queries to our website.

Additionally, other cost of revenues (which is the cost of revenues minus traffic acquisition costs) includes the following:

- The expenses associated with the operation of our data centers (including depreciation, labor, energy, and bandwidth costs);

- Content acquisition costs primarily related to payments to certain content providers from whom we license their video and other content for distribution on YouTube and Google Play (we share most of the fees these sales generate with content providers or pay a fixed fee to these content providers);

- Credit card and other transaction fees related to processing customer transactions;

- Stock-based compensation paid to our employees;

Table of Contents

Revenue share payments to mobile carriers and original equipment manufacturers (OEM's);
 Inventory costs for hardware we sell; and
 Amortization of certain intangible assets.

The following tables present our cost of revenues and cost of revenues as a percentage of revenues, and our traffic acquisition costs and traffic acquisition costs as a percentage of advertising revenues, for the periods presented (dollars in millions):

	Three Months Ended March 31,			
	2014	2015		
	(unaudited)			
Traffic acquisition costs	\$3,232	\$3,345		
Other cost of revenues	2,729	3,011		
Total cost of revenues	\$5,961	\$6,356		
Cost of revenues as a percentage of revenues	38.7	%	36.8	%
	Three Months Ended March 31,			
	2014	2015		
	(unaudited)			
Traffic acquisition costs related to AdSense arrangements	\$2,387	\$2,432		
Traffic acquisition costs related to distribution arrangements	845	913		
Traffic acquisition costs	\$3,232	\$3,345		
Traffic acquisition costs as a percentage of advertising revenues	23.1	%	21.6	%

The cost of revenues that we incur related to revenues generated from ads placed through our AdSense program on the websites of our Google Network Members, which is the network of third parties that use our advertising programs to deliver relevant ads with their search results and content, are significantly higher than the costs of revenues we incur related to revenues generated from ads placed on Google websites because most of the advertiser fees from ads served on Google Network Members' websites are shared with our Google Network Members. For the past five years, growth in advertising revenues from Google websites has generally exceeded that from our Google Network Members' websites. This had a positive impact on our income from operations during this period.

Cost of revenues increased \$395 million from the three months ended March 31, 2014 to the three months ended March 31, 2015. The increase was partially due to increases in traffic acquisition costs of \$113 million from the three months ended March 31, 2014 to the three months ended March 31, 2015 resulting from more advertiser fees generated through our AdSense program driven primarily by an increase in advertising revenues, as well as more distribution fees paid and more fees paid for additional traffic directed to our websites. The remaining increase was primarily driven by an increase in content acquisition costs as a result of increased activities related to YouTube and digital content and an increase in data center costs, partially offset by the decrease in hardware inventory cost due to decrease in sales of our hardware products including Nexus devices. The decrease in aggregate traffic acquisition costs as a percentage of advertising revenues was primarily a result of a shift of mix from Google Network Members' websites revenue to Google website revenue.

We expect cost of revenues will increase in dollar amount and may increase as a percentage of total revenues in the remainder of 2015 and future periods, based on a number of factors, including the following:

- The relative growth rates of revenues from Google websites and from our Google Network Members' websites;
- The growth rates of expenses associated with our data center operations, as well as our hardware inventory costs;
- The increased proportion of other non-advertising revenues as part of our total revenues;

Whether we are able to enter into more revenue share arrangements with Google Network Members and distribution partners that provide for lower revenue share obligations or whether increased competition for arrangements with existing and potential Google Network Members and distribution partners results in less favorable revenue share arrangements;

Whether we are able to continue to improve the monetization of traffic on Google websites and our Google Network Members' websites; and

31

Table of Contents

¶The relative growth rates of expenses associated with distribution arrangements and the related revenues generated.

Research and Development

The following table presents our R&D expenses, and those expenses as a percentage of revenues, for the periods presented (dollars in millions):

	Three Months Ended March 31,			
	2014	2015		
	(unaudited)			
Research and development expenses	\$2,126	\$2,753		
Research and development expenses as a percentage of revenues	13.8	% 16.0	%	

R&D expenses consist primarily of:

• Labor and facilities-related costs for employees responsible for R&D in our existing businesses as well as new products and services;

• Depreciation and equipment-related expenses; and

• Stock-based compensation expense for employees responsible for R&D.

R&D expenses increased \$627 million and increased as a percentage of revenues from the three months ended March 31, 2014 to the three months ended March 31, 2015. The increase was primarily due to an increase in labor and facilities-related costs of \$320 million and an increase in stock-based compensation expense of \$159 million, both largely as a result of a 24% increase in R&D headcount. In addition, there was an increase in depreciation and equipment-related expenses of \$84 million and an increase in professional services of \$57 million due to additional expenses incurred for consulting and outsourced services. R&D expenses increased as a percentage of revenues primarily due to a higher increase in labor and facilities-related costs relative to the increase in revenues.

We expect that R&D expenses will increase in dollar amount and may increase as a percentage of revenues in the remainder of 2015 and future periods.

Sales and Marketing

The following table presents our sales and marketing expenses, and those expenses as a percentage of revenues, for the periods presented (dollars in millions):

	Three Months Ended March 31,			
	2014	2015		
	(unaudited)			
Sales and marketing expenses	\$1,729	\$2,065		
Sales and marketing expenses as a percentage of revenues	11.2	% 12.0	%	

Sales and marketing expenses consist primarily of:

• Labor and facilities-related costs for our personnel engaged in sales and marketing, sales support, and certain customer service functions;

• Advertising and promotional expenditures related to our products and services; and

• Stock-based compensation expense for our employees engaged in sales and marketing, sales support, and certain customer service functions.

Sales and marketing expenses increased \$336 million and increased slightly as a percentage of revenues from the three months ended March 31, 2014 to the three months ended March 31, 2015. The increase was primarily due to an increase in labor and facilities-related costs of \$120 million and an increase in stock-based compensation expense of \$58 million, both largely resulting from a 15% increase in sales and marketing headcount. In addition, there was an increase in advertising and promotional expenses of \$100 million. Sales and marketing expenses increased slightly as a percentage of revenues primarily due to an increase in advertising and promotional expenses as well as stock-based compensation expense relative to the increase in revenues.

We expect that sales and marketing expenses will increase in dollar amount and may increase as a percentage of revenues in the remainder of 2015 and future periods.

Table of Contents

General and Administrative

The following table presents our general and administrative expenses, and those expenses as a percentage of revenues, for the periods presented (dollars in millions):

	Three Months Ended March 31,			
	2014	2015		
	(unaudited)			
General and administrative expenses	\$ 1,489	\$ 1,637		
General and administrative expenses as a percentage of revenues	9.6	% 9.4		%
General and administrative expenses consist primarily of:				
• Labor and facilities-related costs for personnel in our facilities, finance, human resources, information technology, and legal organizations;				
• Professional services fees primarily related to outside legal, audit, information technology consulting, and outsourcing services;				
• Amortization of certain intangible assets; and				
• Stock-based compensation expense.				

General and administrative expenses increased \$148 million and remained relatively flat as a percentage of revenues from the three months ended March 31, 2014 to the three months ended March 31, 2015. The increase was primarily due to an increase in labor and facilities-related costs of \$51 million and an increase in stock-based compensation expense of \$82 million, both largely resulting from a 17% increase in general and administrative headcount. In addition, there was an increase in depreciation and equipment related expense and amortization of intangibles of \$64 million.

We expect general and administrative expenses will increase in dollar amount and may fluctuate as a percentage of revenues in the remainder of 2015 and in future periods.

Stock-Based Compensation

The following table presents our aggregate stock-based compensation expense, and stock-based compensation as a percentage of revenues, as reflected in our consolidated results from continuing operations for the periods presented (dollars in millions):

	Three Months Ended March 31,			
	2014	2015		
	(unaudited)			
Stock-based compensation	\$ 839	\$ 1,203		
Stock-based compensation as a percentage of revenues	5.4	% 7.0		%

Stock-based compensation increased \$364 million from the three months ended March 31, 2014 to the three months ended March 31, 2015. This increase was primarily due to additional stock awards issued to existing and new employees.

We estimate stock-based compensation expense to be approximately \$4.4 billion in 2015 and \$5.9 billion thereafter related to stock awards outstanding as of March 31, 2015. This estimate does not include expenses to be recognized related to stock-based awards granted after March 31, 2015. Additionally, if forfeiture rates are different from what we have anticipated, stock-based compensation related to these awards will be different from our expectations.

Table of Contents

Interest and Other Income, Net

The following table presents the components included in Interest and Other Income, Net, as reflected in our consolidated results from continuing operations for the periods presented (dollars in millions):

	Three Months Ended March 31,		
	2014	2015	
	(unaudited)		
Interest and other income, net	\$357	\$157	
Interest and other income, net as a percentage of revenues	2.3	% 0.9	%

Interest and other income, net, decreased \$200 million from the three months ended March 31, 2014 to the three months ended March 31, 2015. This decrease was primarily driven by a decrease in realized gains on non-marketable investments of \$117 million and realized gains on equity interest of \$103 million, as well as a decrease in realized gains on available-for-sale investments of \$42 million. These decreases were partially offset by an increase in interest income of \$58 million and a decrease in foreign currency exchange loss of \$47 million.

The costs of our foreign exchange hedging activities recognized to interest and other income, net, are primarily a function of the notional amount of the option and forward contracts and their related duration, the movement of the foreign exchange rates relative to the strike prices of the contracts, and the volatility of foreign exchange rates.

As we expand our international business, we believe costs related to hedging activities under our foreign exchange risk management program may increase in the remainder of 2015 and future periods.

Provision for Income Taxes

The following table presents our provision for income taxes, and effective tax rate for the periods presented (dollars in millions):

	Three Months Ended March 31,		
	2014	2015	
	(unaudited)		
Provision for income taxes	\$822	\$1,018	
Effective tax rate	18.4	% 22.1	%

Our provision for income taxes and effective tax rate increased from the three months ended March 31, 2014 to the three months ended March 31, 2015, primarily due to more capital loss utilized in prior year and increases in tax reserves, offset by more federal investment tax credits received in the current year.

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries that have lower statutory rates and higher than anticipated in countries that have higher statutory rates, the net gains and losses recognized by legal entities on certain hedges and related hedged intercompany and other transactions under our foreign exchange risk management program, changes in the valuation of our deferred tax assets or liabilities, or changes in tax laws, regulations, or accounting principles, as well as certain discrete items.

We are subject to the continuous examination of our income tax returns by the Internal Revenue Service (IRS) and other domestic and foreign tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. We continue to monitor the progress of ongoing discussions with tax authorities and the impact, if any, of the expected expiration of the statute of limitations in various taxing jurisdictions.

See Critical Accounting Policies and Estimates below for additional information about our provision for income taxes.

Net Loss from Discontinued Operations

On October 29, 2014, we closed the sale of the Motorola Mobile business to Lenovo. We maintain ownership of the vast majority of the Motorola Mobile patent portfolio, including pre-closing patent applications and invention disclosures, which we licensed to Motorola Mobile for its continued operations. Additionally, in connection with the sale,

Table of Contents

we agreed to indemnify Lenovo for certain potential liabilities of the Motorola Mobile business, for which we recorded a liability of \$130 million at the time of close.

The financial results of Motorola Mobile through the date of divestiture are presented as net loss from discontinued operations on the Consolidated Statements of Income. The following table presents financial results of the Motorola Mobile business included in net income (loss) from discontinued operations for the three months ended March 31, 2014 (in millions, unaudited):

	Three Months Ended March 31, 2014	
Revenues	\$1,377	
Loss from discontinued operations before income taxes	(274)
Benefits from income taxes	76	
Net loss from discontinued operations	\$(198)
Capital Resources and Liquidity		

Capital Resources

As of March 31, 2015, we had \$65.4 billion of cash, cash equivalents, and marketable securities. Cash equivalents and marketable securities are comprised of time deposits, money market and other funds, including cash collateral received related to our securities lending program, fixed-income bond funds, highly liquid debt instruments of the U.S. government and its agencies, debt instruments issued by foreign governments, debt instruments issued by municipalities in the U.S., corporate debt securities, mortgage-backed securities, and asset-backed securities. From time to time, we may hold marketable equity securities obtained through acquisitions or strategic investments in private companies that subsequently go public, which we generally dispose of when restrictions are lifted.

As of March 31, 2015, \$37.6 billion of the \$65.4 billion of cash, cash equivalents, and marketable securities was held by our foreign subsidiaries. If these funds were needed for our operations in the U.S., we would be required to accrue and pay U.S. taxes to repatriate these funds. However, our intent is to permanently reinvest these funds outside of the U.S. and our current plans do not demonstrate a need to repatriate them to fund our U.S. operations.

Our principal sources of liquidity are our cash, cash equivalents, and marketable securities, as well as the cash flow that we generate from our operations. As of March 31, 2015, we had unused letters of credit of approximately \$802 million. We believe that our sources of funding will be sufficient to satisfy our currently anticipated cash requirements through at least the next 12 months. Our liquidity could be negatively affected by a decrease in demand for our products and services. In addition, we may make acquisitions, increase our capital expenditures, or license products and technologies complementary to our business and may need to raise additional capital through future debt or equity financing to provide for greater flexibility to fund these activities. Additional financing may not be available or on terms favorable to us.

We have a debt financing program of up to \$3.0 billion through the issuance of commercial paper. Net proceeds from this program are used for general corporate purposes. As of March 31, 2015, we had \$2.0 billion of commercial paper outstanding recorded as short-term debt, with a weighted-average interest rate of 0.1% that matures at various dates through July 2015. Average commercial paper borrowings during the quarter were \$2.0 billion and the maximum amount outstanding during the quarter was \$2.0 billion. In conjunction with this program, we have a \$3.0 billion revolving credit facility expiring in July 2016. The interest rate for the credit facility is determined based on a formula using certain market rates. As of March 31, 2015, we were in compliance with the financial covenants in the credit facility and no amounts were outstanding.

In May 2011, we issued \$3.0 billion of unsecured senior notes (2011 Notes) in three equal tranches, due in 2014, 2016, and 2021. The net proceeds from the sale of the 2011 Notes were used to repay a portion of our outstanding commercial paper and for general corporate purposes. In February 2014, we issued \$1.0 billion of unsecured senior notes (2014 Notes) due in 2024, which was used to repay \$1.0 billion of the first tranche of our 2011 Notes that matured in May 2014 and for general corporate purposes.

As of March 31, 2015, the 2011 and 2014 notes had a total carrying value of \$3.0 billion and a total estimated fair value of \$3.2 billion. We are not subject to any financial covenants under the notes.

Table of Contents

In August 2013, we entered into a \$258 million capital lease obligation on certain property expiring in 2028 with an option to purchase in 2016. The effective rate of the capital lease obligation approximates the market rate. The estimated fair value of the capital lease obligation approximated its carrying value as of March 31, 2015.

Liquidity

For the three months ended March 31, 2014 and 2015, our cash flows were as follows (in millions):

	Three Months Ended	
	March 31,	
	2014	2015
	(unaudited)	
Net cash provided by operating activities	\$4,391	\$6,617
Net cash used in investing activities	(7,307) (7,304
Net cash provided by (used in) financing activities	822	(391
Cash Provided by Operating Activities)

Our largest source of cash provided by our operations is advertising revenues generated by Google websites and Google Network Members' websites. Additionally, we generate cash through sales of digital content products, hardware sales, and licensing. Prior to its divestiture, we also generated cash from sales of hardware products related to the Motorola Mobile business.

The primary uses of cash from our operating activities include payments to our Google Network Members and distribution partners, payments for content acquisition costs and payments for hardware and inventory-related costs. Prior to the sale of the Motorola Mobile business, our use of cash also included payment for manufacturing and inventory-related costs in the Motorola Mobile business. In addition, uses of cash from operating activities include compensation and related costs, other general corporate expenditures, and income taxes.

Net cash provided by operating activities increased from the three months ended March 31, 2014 to the three months ended March 31, 2015 primarily due to increased net income adjusted for depreciation expense and impairment of property and equipment and stock-based compensation expense, and a net increase in cash from changes in working capital primarily driven by changes in accrued expenses and other liabilities, accounts receivable, income taxes and prepaid revenue share, expenses, and other assets.

Cash Used in Investing Activities

Cash provided by or used in investing activities primarily consists of purchases of property and equipment, as well as acquisitions and divestitures of businesses and intangible assets. Our cash provided or used in investing activities includes purchases, maturities, and sales of marketable and non-marketable securities in our investment portfolio and our investments in reverse repurchase agreements and the cash collateral received or returned from our securities lending program.

Cash used in investing activities remained relatively constant from the three months ended March 31, 2014 to the three months ended March 31, 2015. This was primarily due to lower spend related to acquisitions and intangibles and other assets which was offset by activity in securities lending and increases in purchases of non-marketable investments.

Cash Provided by (Used in) Financing Activities

Cash used in financing activities consists primarily of net proceeds or payments from issuance or repayments of debt and net proceeds or payments and excess tax benefits from stock-based award activities.

Cash used in financing activities increased from the three months ended March 31, 2014 to the three months ended March 31, 2015 primarily driven by an increase in net cash payments related to debt and net payments related to stock-based award activities.

Contractual Obligations

We had long-term taxes payable of \$3.7 billion as of March 31, 2015 primarily related to tax positions for which the timing of the ultimate resolution is uncertain. At this time, we are unable to make a reasonably reliable estimate of the timing of payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes.

Table of Contents

Critical Accounting Policies and Estimates

We prepare our consolidated financial statements in accordance with U.S. Generally Accepted Accounting Principles (GAAP). In doing so, we have to make estimates and assumptions that affect our reported amounts of assets, liabilities, revenues, and expenses, as well as related disclosure of contingent assets and liabilities. In some cases, we could reasonably have used different accounting policies and estimates. In some cases, changes in the accounting estimates are reasonably likely to occur from period to period. Accordingly, actual results could differ materially from our estimates. To the extent that there are material differences between these estimates and actual results, our financial condition or results of operations will be affected. We base our estimates on past experience and other assumptions that we believe are reasonable under the circumstances, and we evaluate these estimates on an ongoing basis. We refer to accounting estimates of this type as critical accounting policies and estimates, which we discuss further below. We have reviewed our critical accounting policies and estimates with the audit committee of our board of directors. Please see Note 1 of Part I, Item 1 of this Quarterly Report on Form 10-Q for the summary of significant accounting policies. In addition, please see Part I, Item 7, "Critical Accounting Policies and Estimates" in our Annual Report on Form 10-K for the year ended December 31, 2014. There have been no material changes to our critical accounting policies and estimates since our Annual Report on Form 10-K for the year ended December 31, 2014.

Available Information

Our website is located at www.google.com, and our investor relations website is located at <http://investor.google.com>. The following filings are available through our investor relations website after we file them with the SEC: Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and our Proxy Statements for our annual meetings of stockholders, for the last three years, and are also available for download free of charge. We also provide a link to the section of the SEC's website at www.sec.gov that has all of our public filings, including Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, all amendments to those reports, our Proxy Statements, and other ownership related filings. Further, a copy of this Quarterly Report on Form 10-Q is located at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

We webcast our earnings calls and certain events we participate in or host with members of the investment community on our investor relations website. Additionally, we provide notifications of news or announcements regarding our financial performance, including SEC filings, investor events, press and earnings releases, and blogs as part of our investor relations website as well as on our investor relations Google+ page (<https://plus.google.com/+GoogleInvestorRelations/posts>). Investors and others can receive notifications of new information posted on our investor relations website in real time by signing up for email alerts and RSS feeds. Further corporate governance information, including our certificate of incorporation, bylaws, governance guidelines, board committee charters, and code of conduct, is also available on our investor relations website under the heading "Corporate Governance." The content of our websites are not incorporated by reference into this Quarterly Report on Form 10-Q or in any other report or document we file with the SEC, and any references to our websites are intended to be inactive textual references only.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to financial market risks, including changes in currency exchange rates and interest rates.

Foreign Currency Exchange Risk

We transact business globally in multiple currencies. Our international revenues, as well as costs and expenses denominated in foreign currencies, expose us to the risk of fluctuations in foreign currency exchange rates against the US dollar. Our most significant currency exposures are the British Pound, Euro, and Japanese yen. We are a net receiver of foreign currencies and therefore benefit from a weakening of the U.S. dollar and are adversely affected by a strengthening of the U.S. dollar relative to the foreign currency.

We use foreign exchange option contracts to protect our forecasted U.S. dollar-equivalent earnings from adverse changes in foreign currency exchange rates. These hedging contracts reduce, but do not entirely eliminate the impact of adverse currency exchange rate movements. We designate these option contracts as cash flow hedges for accounting purposes. The fair value of the option contract is separated into its intrinsic and time values. Changes in the time value are recorded in Interest and other income, net. Changes in the intrinsic value are recorded as a component of AOCI and subsequently reclassified into revenues to offset the hedged exposures as they occur.

We considered the historical trends in currency exchange rates and determined that it was reasonably possible that changes in exchange rates of 20% for our foreign currency options could be experienced in the near term. If the U.S. dollar weakened by 20%, the amount recorded in AOCI before tax effect would have been approximately \$1 billion lower as of March 31, 2015, and the total amount of expense recorded as Interest and other income, net, would have been approximately \$24 million higher as of March 31, 2015. If the U.S. dollar strengthened by 20%, the amount recorded in accumulated AOCI before tax effect would have been approximately \$2.4 billion higher as of March 31, 2015, and the total amount of expense recorded as Interest and other income, net, would have been approximately \$157 million higher at March 31, 2015. The impact in AOCI would offset our hedged exposures as they occur.

In addition, we use foreign exchange forward contracts to offset the foreign exchange risk on our assets and liabilities denominated in currencies other than the local currency of the subsidiary. These forward contracts reduce, but do not entirely eliminate the impact of currency exchange rate movements on our assets and liabilities. The foreign currency gains and losses on the assets and liabilities are recorded in Interest and other income, net, which are offset by the gains and losses on the forward contracts.

We considered the historical trends in currency exchange rates and determined that it was reasonably possible that adverse changes in exchange rates of 20% for all currencies could be experienced in the near term. These changes would have resulted in an adverse impact on income before income taxes of approximately \$48 million as of March 31, 2015. The adverse impact as of March 31, 2015 is after consideration of the offsetting effect of approximately \$1.1 billion from foreign exchange contracts in place for the month of March 31, 2015. These reasonably possible adverse changes in exchange rates of 20% were applied to total monetary assets and liabilities denominated in currencies other than the local currencies at the balance sheet dates to compute the adverse impact these changes would have had on our income before income taxes in the near term.

Interest Rate Risk

Our investment strategy is to achieve a return that will allow us to preserve capital and maintain liquidity requirements. We invest primarily in U.S. government and its agency securities, money market and other funds, fixed-income bond funds, corporate debt securities, mortgage-backed securities, debt instruments issued by foreign governments, municipal securities, time deposits, and asset backed securities. By policy, we limit the amount of credit exposure to any one issuer. Our investments in both fixed rate and floating rate interest earning securities carry a degree of interest rate risk. Fixed rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than predicted if interest rates fall. As of March 31, 2015, unrealized losses on our marketable debt securities were primarily due to temporary interest rate fluctuations as a result of higher market interest rates compared to the fixed interest rates on our debt securities. We account for both fixed and variable rate securities at fair value with changes on gains and losses recorded in AOCI until the securities are sold. We use interest rate derivative contracts to hedge realized gains and losses on our securities. These derivative contracts are accounted for at fair value with changes in fair value recorded in Interest and other income, net.

We considered the historical volatility of interest rates and determined that it was reasonably possible that an adverse change of 100 basis points could be experienced in the near term. A hypothetical 1.00% (100 basis points) increase in interest rates would have resulted in a decrease in the fair values of our marketable securities and interest rate derivative contracts of approximately \$1.1 billion as of March 31, 2015.

ITEM 4.CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (Exchange Act), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer concluded that, as of March 31, 2015, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a description of our material pending legal proceedings, please refer to Note 10 "Contingencies - Legal Matters" of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, which is incorporated herein by reference.

ITEM 1A. RISK FACTORS

Our operations and financial results are subject to various risks and uncertainties, including those described in Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014, which could adversely affect our business, financial condition, results of operations, cash flows, and the trading price of our common and capital stock. There have been no material changes to our risk factors since our Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 6. EXHIBITS

See the Exhibit Index following the signature page to this Quarterly Report on Form 10-Q for a list of exhibits filed or furnished with this report, which Exhibit Index is incorporated herein by reference.
