Amounts in thousand reais

1. OPERATIONS

Companhia de Saneamento Básico do Estado de São Paulo (SABESP or Company) operates public water and sewage systems in the State of São Paulo, Brazil, providing water and sewage services to a broad range of residential, commercial, industrial and government customers. The Company also supplies water on a bulk basis to certain municipalities in the São Paulo Metropolitan Region which do not operate water systems.

SABESP provides water and sewage services in 368 municipalities of the State of São Paulo, in almost of them through concessions granted by the municipalities. Most of these concessions have 30-year terms, expiring between 2005 and 2034. Each of these concessions may be automatically renewed for a period equal to its initial term, unless the municipality or SABESP exercises the right to terminate the concession, upon notice to either party, at least six months prior to its expiration date.

The Company does not have a formal concession to provide water and sewage services in the City of São Paulo, which accounts for a substantial majority of the sales and services rendered. In Santos, a municipality located in the Baixada Santista region, which has a significant population, SABESP operates under public deed of authorization, the same occurring with some other municipalities in the Baixada Santista and in Vale do Ribeira regions, where the Company started operating after the merger of companies which resulted in the organization of SABESP.

2. PRESENTATION OF THE FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with accounting practices adopted in Brazil and with the Brazilian Securities Commission (CVM) regulations.

3. SIGNIFICANT ACCOUNTING PRACTICES

(a) Determination of results of operations

(i) Gross revenue from sales and services

Revenues are recorded as the services are rendered. Water supply and sewage services rendered but not billed by the balance sheet date are measured and recorded as a contra entry to accounts receivable from customers so that costs can be matched against revenues for each period. Said revenues are recorded net from the bonus referring to the Water Consumption Reduction Incentive Program (note 18).

(ii) Financial income and expenses

Reimbursement of supplementary pension and retirement	548,814	527,620

In accordance with Federal Law no. 9430/96, SABESP may not write-off or record a provision for doubtful accounts against any amounts owed thereto by the State Government or state-owned entities.

(i) Water and sewage services

The Company renders services of water supply and sewage collection to the State Government and other companies related thereto, under conditions deemed by the Management to be usual market conditions, except as for the settlement of credits, which may be effected in the below mentioned terms.

(ii) Reimbursement of supplementary pensions paid

The amounts relate to supplementary pensions and paid leave benefits paid by the Company, on the State Government's behalf, to former employees of the state-owned companies which merged to form SABESP. The relevant amounts are to be reimbursed by the State Government, which is the primary obligor thereof, and do not bear interests. The budget proposal of the State of São Paulo Government, as approved by the State House of Representatives, includes funds referring to such obligation.

(iii) GESP Agreement

On December 11, 2001, the Company entered into an agreement with the State Government (GESP Agreement), under which the State Government acknowledged a debt, among others, for services rendered by the Company of water supply and sewage collection to agencies, independent entities and foundations owned by the State Government, totaling R\$358,207 on that date, representing services rendered until December 01, 2001, having further agreed to pay the amounts due. Additionally, the State Government acknowledged and agreed to pay amounts owed to the Company in connection with supplementary pensions and paid leave benefits paid by the Company, on its behalf, in the amount of R\$ 320,623 on that date. The Management believes that the amounts owed by the State Government shall be received and does not estimate losses to be incurred out of such receivables

The GESP Agreement sets forth that the Water and Electric Power Department DAEE will transfer, as partial payment to the Company, the title to the Taiaçupeba, Jundiá, Biritiba, Paraitinga and Ponte Nova reservoirs, which make up the Alto Tietê System, and the amount of such assets will reduce the amounts owed to the Company. The asset value of these reservoirs was ascertained based on the arithmetic average of independent evaluations carried out by CPOS Companhia de Obras e Serviços (a state-owned building company selected by the State Government) and by ENGEVAL Engenharia de Avaliação (an independent appraisal company selected by the Company). The payment of the amounts owed in excess to the fair market value of the reservoirs, as agreed upon between the parties, shall be effected by the State of São Paulo Government in 114 monthly successive installments, monthly adjusted by the IGP-M index, added by interests of 6% per annum, beginning from the maturity date of the first installment. Under the terms of the Agreement, the first original payment should have been effected in July 2002, however it was postponed because the parties did not reach an agreement as for the fair value of the reservoirs and the audit and specific analysis of the amounts due ascertained by the experts appointed by the State Government were not concluded. The arithmetic average of the market value of the reservoirs at June 30, 2002 was R\$300,880, based on the discounted cash flow, reflecting the Company's investments in such reservoirs.

Additionally, pursuant to the memorandum of understanding and the GESP Agreement, the State Government may, in certain circumstances, authorize the Company to use dividends, including interests on net equity stated by the Company and any other obligation payable to the State Government, for offsetting against accounts receivable for services of water supply and sewage collection rendered to the State Government or to its controlled companies.

(iv) First Amendment to the GESP Agreement

On March 22, 2004, the Company and the State Government entered into an amendment to the original GESP Agreement, (1) restating and acknowledging amounts owed by the State Government for the services of water supply and sewage collection services rendered until the end of February 2004, which were adjusted for inflation until February 2004; (2) formally authorizing the offsetting of amounts payable by the State Government against interest on net equity stated by SABESP and any other debt owed to the State Government at December 31, 2003, which were adjusted for inflation until February 2004 (as set forth in the original GESP Agreement); and (3) establishing the payment conditions related to the remaining obligations for the State Government for water supply and sewage collection services rendered to it.

Among the terms set forth in the Amendment, the State Government acknowledged amounts payable to the Company for services of water supply and sewage collection rendered until February 2004, totaling R\$581,779, and the Company acknowledged amounts payable to the State

Government relating to interests on net equity in the amount of R\$518,732.

The Company and the State Government agreed upon the netting of R\$404,889 (adjusted for inflation until February 2004), of which R\$231,365 of the corresponding amounts receivable and payable by the end of 2004 were settled up to September 30, 2004. The remaining obligations, of R\$176,890, at September 30, 2004, of which R\$158,464 are recorded in long term assets and R\$18,426 are recorded in current liabilities, shall be paid in monthly installments until May 2009.

The remainder of the settlement of accounts referring to interests on net equity payable to the State Government, in the amount of R\$ 113,843, has been adjusted to inflation and, pursuant to article five of the 1st amendment, amortized the balance of overdue and unpaid invoices referring to services of water supply and sewage collection provided by SABESP to the State Government.

The Management believes that the amounts owed by the State Government shall be received and it is not estimated that losses will be incurred with such accounts receivable.

(b) Cash

The Company's balance of bank accounts and financial investments with financial entities controlled by the State Government was R\$ 262,982 at September 30, 2004 (R\$70,641 at June 30, 2004). The financial income generated by such investments was R\$ 17,830 and R\$ 52,607, respectively in the periods ended on September 30, 2004 and 2003.

(c) Agreement for use of reservoirs

The Company uses the Guarapiranga and Billings reservoirs and part of some reservoirs of the Alto Tietê System, which are owned by another company controlled by the State of São Paulo Government. The Company does not pay any fee whatsoever for the use of such reservoirs, however is responsible for their operating and maintenance costs.

The Company has been granted the right to use water and exploit the reservoirs for a period of 30 years, counted as from 1997.

The estimate by SABESP's legal department of the compensation to be paid as from the fourth quarter of 2004, without a date set for the actual disbursement, amounts to approximately R\$ 279,500 (not reviewed by the independent auditors), which will be paid with Company funds. 16. COMPENSATION FOR CONCESSION TERMINATION

The Municipalities of Diadema and Mauá terminated the concessions of water supply and sewage collection at the beginning of 1995.

In December 1996, the Company filed claims to seek compensation for investments made during the terms of the concession agreements.

Even though the Company has not yet been compensated for these investments, water is still supplied on a bulk basis to these municipalities, which currently operate own water distribution and sewage collection systems.

The residual net book value of property, plant and equipment relating to the Municipality of Diadema, written-off in December 1996 amounted to R\$ 75,231, and the claim balance and other receivables from the municipality amounting to R\$ 62,876 are recorded under long-term receivables in Compensation for concession termination .

The residual value of property, plant and equipment relating to the Municipality of Mauá, written off in fiscal year 1999, amounted to R\$103,763, and the claim balance, in the amount of R\$85,918, is recorded in long term assets, under Compensation for concession termination.

Both claims are pending court decision but the legal advisor conducting the litigation expects a favorable outcome.

In relation to the Municipality of Mauá, a legal expert report has been presented, as well as explanations have been prepared by the technical staff of both parties. After conclusion of the discovery phase of the proceeding, having in consideration that the parties did not request new production of evidence, the term started for presentation of the parties' allegations. Therefore, SABESP presented its closing arguments and the case records were remitted to the judge on May 13, 2004, and are awaiting judgment.

In relation to the Municipality of Diadema, the court determined the attachment to and judgment of the declaratory action for non-demandability of trade acceptances together with the public civil action. The court has further ordered an accounting expert examination to be carried out and the parties submitted their questions to the court expert.

SABESP filed an appeal against the court decision for joint judgment of the actions, however no judgment has been rendered up to this time. Therefore, the attachment of the declaratory action and the preparation of the expert report are awaited.

18. WATER CONSUMPTION REDUCTION INCENTIVE PROGRAM

SABESP has implanted the Water Consumption Reduction Incentive Program with the purpose of stimulating São Paulo's metropolitan region population to reduce consumption, thus cooperating to mitigate the supply crisis caused by rain shortage and low water level in the reservoirs that supply the region.

The program was extended to municipalities of the metropolitan region of São Paulo that are supplied by the metropolitan water supply system and was effective for 6 months as from March 15, 2004, having consisted of prizes, by way of a 20% discount on the water and sewage bills, granted to users that reduced their water consumption by 20% or more, in relation to the same period in the previous year.

As for the results achieved in the period from March 15 to September 15, 2004, they represent:

- R\$71,250 reduction, about 4.7% of the amount invoiced for water supply and sewage collection, in the metropolitan region of São Paulo;
- In September, about 1,228,131 users managed achieved consumption reductions, which represents 38.3% of the customers served in the metropolitan region of São Paulo.

20. SUBSEQUENT EVENTS

- Transfer of common shares

On October 8 and 11, 2004, the State Finance Department transferred 5,802,967,065 common shares to Companhia Paulista de Parcerias (CPP), a company controlled by the State Treasury Department.

- Global Offer of Shares Issued by SABESP.

A Notice of Initial Public Offering was published on October 29, 2004, for public distribution both in the Brazilian market and in the international market, of 5,272,314,946 book-entry common shares, with no face value, issued by SABESP and owned by the State of São Paulo Government and by Companhia Paulista de Parcerias - CPP. The Notice of Closing of Global Offering showing the final distribution prices will be timely published.

- Court Decision - GESP Agreement

In October 2004, a lower court judge rendered a decision favorable to the State of São Paulo Public Prosecutor's Office, declaring the transfer to the Company of the ownership of the reservoirs making up the Alto Tietê System from the State Water and Electric Power Department, as provided for in the GESP Agreement and discussed in Note 5, to be unlawful, which judgment the Company believes to refer solely to the unlawfulness of the transfer of the reservoirs. The Company and the State Government filed an appeal against the decision requesting the effects of the lower court judgment to be stayed until a final decision is rendered by the State of São Paulo Court of Appeals. On October 19, 2004 the request was granted and the judgment was stayed. The Company and the State Government are not able to estimate whether they will be successful in the referred appeal; however, it is the opinion of the State of São Paulo Government that all the obligations undertaken by the State Government to SABESP in the new 2004 agreement remain valid and enforceable, as mentioned in note 5, regardless of the outcome of the referred appeal.

(*) Earnings before interests, taxes, depreciation and amortization

SABESP recorded net operating revenue of R\$ 1,086.8 million, with EBITDA of R\$ 503.8 million in the 3Q04. The final result for the period, a profit of R\$ 235.5 million, reflected the positive effect of the 8.0% appreciation of Brazilian real in relation to North-American dollar, as well as the 6.78% tariff adjustment on August 29, 2004.

2. Gross operating revenue 6.2% growth

The 6.2% growth in the gross operating revenue is due to an ongoing recovery of the retail segment. The effect of the 6.78% tariff adjustment as from August 29, 2004 caused a 1.95% impact in September, generating a slight growth in the operating revenues. The full adjustment shall be entirely incorporated into the revenue by November.

The revenue was also influenced by the reduction in water consumption, with migration of part of the consumers to a lower tariff, and by the bonus granted in the quarter in the amount of R\$36.3 million, which represented 3.2% of the gross operating revenue.

Water and sewage values billed to the retail market recorded a 3.1% growth. The charts below show volumes of water and sewage services billed to the retail market broken down by user category and region in the third quarters of 2003 and 2004 (unaudited):

16.01 OTHER INFORMATION DEEMED BY THE COMPANY TO BE RELEVANT

Supplementary Information

In order to improve the information provided to the market, the Company is presenting, as supplementary information, the financial statements in a constant purchasing power currency.

1. SUPPLEMENTARY INFORMATION IN CONSTANT PURCHASING POWER CURRENCY

(a) Monetary indexation

The monetary indexation of the operations relating to the permanent assets, shareholders' equity, income statement accounts and ascertainment of profits and losses in monetary items was measured based on the variation of the Accounting Monetary Unit - UMC, taking for basis the variation of the General Market Prices Index - IGP-M in the 3rd quarter, of 3.26%, and year-to-date, of 10.26%.

(b) Balance sheet accounts

Amounts related to monetary assets and liabilities presented in constant purchasing power currency are identical to those presented in accordance with the corporate legislation, except for accounts receivable from customers, accounts payable to suppliers and contractors, deferred income tax and social contribution in long-term liabilities, which are adjusted to reflect the purchasing power or currency realization at September 30, 2004, taking for basis the rate determined by the National Association of Investment Banks - ANBID.

Permanent assets and shareholders' equity were adjusted based on the monthly variation of the UMC, updated by the IGP-M up to September 30, 2004.

(c) Income statement accounts

All the income statement accounts were indexed for inflation based on the variation of the UMC, as from the month when they were booked, adjusted in accordance with inflation gains and losses ascertained on the balances at the beginning and end of every month for monetary assets and liabilities, and which generated financial or nominal inflationary expenses and income, which were considered to reduce the respective income statement accounts to which they were attached.

(d) Deferred taxes and contributions

Deferred income tax and social contribution were calculated based on the rates of 15% plus additional 10% and 9%, respectively, on the surplus value of the properties and rights in the permanent assets generated by the result of their monetary adjustment, in conformity with the instructions of the CVM, as provided for in Communication no. 99/006 issued by the IBRACON - Brazilian Institute of Independent Accountants.
