São Paulo, Brazil, November 13, 2007 Grupo Pão de Açúcar (BOVESPA: PCAR4; NYSE: CBD), announces the results of the 3rd quarter of 2007. The Company's operating and financial information, as well as the comparison referring to the same period of 2006 unless otherwise indicated are presented in a consolidated basis and denominated in Reais, in accordance with the Brazilian Corporate Law.

Income before Income Tax grew 232.4%

Income before Income Tax grew 232.4% over pro forma figure of 3Q06, reaching R\$ 27.4 million in the period.

EBITDA⁽²⁾ reached R\$ 238.3 million in the quarter, with a margin of 6.8%. Considering the previous criterion (before taxes and charges) this margin would have been 7.5%.

Sendas Distribuidora presented significant recovery in relation to the gross margin and to operating expenses, in the comparison with 3Q06.

Consequently, the EBITDA margin went up from 0.9% in the previous year to 3.5% in 3Q07.

Net sales grew 6.0% in the 3rd quarter of 2007, totaling R\$ 3,496.5 million, while in the same stores concept, growth was 2.3% in the period.

Among the formats, the highlight was the Pão de Açúcar banner, which for the 4th quarter in a row presented significant growth in sales in the same stores concept.

Food products grew 3.3% in 3Q07 in the same stores concept, leveraged by the increase of 5.4% of the category of perishable goods.

The Shrinkage Reduction Campaign presented positive results in the period and was one of the factors that contributed toward the growth of the gross margin, which went from 28.0% in 3Q06 to 28.7% in 3Q07.

Grupo Pão de Açúcar operates 546 stores in 14 states and in the Federal District, and recorded gross sales of R\$ 16.5 billion in 2006. The Group's multi-format structure is formed by supermarkets (**Pão de Açúcar, Extra Perto, CompreBem and Sendas**), hypermarkets (**Extra**), stores of electronic products/household appliances (**Extra-Eleto**), convenience stores (**Extra Fácil**) and an extensive distribution network. The Group maintains differentiated consumer service and strong positioning in the main markets of the country.

Sales Performance
Net Sales grew 6.0% in the 3rd quarter

(R\$ million)	3Q07	3Q06	Chg.	9M07	9M06	Chg.
Gross Sales	4,132	3,915	5.5%	12,505	11,817	5.8%
Net Sales	3,497	3,299	6.0%	10,574	9,937	6.4%

The gross revenue of Grupo Pão de Açúcar in the third quarter of 2007 reached R\$ 4,131.7 million, up 5.5% over the same prior-year period. Net revenue was up 6.0% in the quarter in comparison with the same period of 2006, reaching R\$ 3,496.5 million.

Gross sales in the same stores concept recorded growth of 1.8% in the quarter, while net sales grew 2.3%. The performance of the perishables category once again stood out with growth above 5%, contributing positively to enable the performance of food products to record an uptrend of 3.3% in the period. The non-food category recorded a downtrend of 2.4% in 3Q07, once again under the impact of the strong basis of comparison (growth of 17.0% in 3Q06

World Cup effect) and of the deflation of products from the entertainment category. Among the sub-categories of non-food products, those that suffered most with the World Cup effect were those of audio and video. Disregarding the performance of these sub-categories, with the objective of analyzing the performance of the non-food category without the impact of the World Cup, the growth of sales would have been 0.8%. Likewise, the growth of gross sales in the same stores concept would have been 2.3% in the quarter.

The difference between total sales and sales in the same stores concept reflects the expansion plan put into practice, with the opening of 38 stores (2 Pão de Açúcar, 8 Extra, 12 CompreBem, 5 Extra Perto and 11 Extra Fácil) in the last 12 months.

Among the formats, the highlight was the Pão de Açúcar banner, which for the 4th quarter in a row presented significant growth in sales in the same stores concept, above the average of the Group. The Sendas and CompreBem banners recorded performances in line with the average of the Company, while the hypermarkets Extra and Extra Eletro were affected by the performance of the non-food category, with growths lower than average for the Group.

Operating Performance

The comments presented below about 3rd quarter of 2006, refer to the pro forma result. This result does not reflect the effects of the payment of tax assessment notices referring to the purchase, processing and sale transactions for export of soybean and by-products on October 31, 2006. This payment caused a negative impact on the results of 3Q06 of R\$ 94.4 million. Of this sum, R\$ 51.9 million produced an impact on the Cost of Goods Sold (COGS) and R\$ 42.4 million affected financial expenses (part relating to fines and interest). The net impact after income tax on net income was R\$ 74.9 million in the 3rd quarter of 2006. The comments presented below were prepared in order to reflect the Company's operating performance and its results in the quarter and therefore do not include the adjustment of this provision, as it represents a non-recurrent item that affected the results for the period. The complete pro forma income statement is presented in the table on page 11.

In the 3rd quarter of 2007, the gross margin was 28.7%, growth of 60 basis points (bps) in relation to the previous quarter (28.1%). In comparison with 3Q06 the gross margin of the Company grew 70 bps. The gross income in 3Q07 totaled R\$ 1,003.0 million, representing growth of 8.5%.

The main impact on the gross margin occurred due to the Shrinkage Reduction Campaign, which contributed with a gain of R\$ 13.5 million, equivalent to 40 bps of the gross margin. In addition, this result is explained by the assortment review, which resulted in better negotiations with suppliers and by the new pricing policy, which aims at a better balance between special offers and regular prices.

(3) basis points

The following comments refer to operating expenses before taxes and charges.

Operating expenses in the 3Q07 totaled R\$ 741.9 million, 7.4% up year-on-year. This increase occurred mainly due to the opening of new stores in the last 12 months, which added around R\$ 38.4 million to expenses during the quarter. Restructuring expenses amounted to R\$ 7.9 million, R\$ 1.9 million of which in selling expenses and the remaining R\$ 6.0 million in general and administrative expenses. The collective bargaining agreement, which had an impact throughout the last 12 months, totaled around R\$ 12.5 million, R\$ 10.6 million in selling expenses and R\$ 1.9 million in G&A expenses. It is worth pointing out that operating expenses were impacted by the Company's strategic projects, including convenience stores, drug stores, international trade, loss prevention and e-commerce, among others. These

projects totaled close to R\$ 4.4 million in the third quarter.

Excluding the impacts above mentioned, the reduction would have reached 20.4% of net sales, lower than the level achieved in the 3Q06 (20.6%):

(R\$ million) ⁽¹⁾	3Q07	Chg.	3Q06	Chg.
Operating Expenses	741.9	21.2%	691.0	20.9%

Selling expenses, in the year-on-year comparison, were strongly impacted by the opening of new stores mentioned above. If the effects of restructuring and the wage agreement are ignored, they moved up 6.3%, keeping pace with sales growth and, chiefly, with the 6.1% increase in sales area, in turn reflecting the interim store inaugurations. Compared to the 2Q07, operating expenses fell by R\$ 10.0 million, totaling R\$ 617.3 million.

G&A expenses in the 3Q07 stood at R\$ 124.7 million, equivalent to 3.6% of net sales (3.3% excluding the restructuring and wage agreement impact).

As a percentage of net sales, year-to-date operating expenses before taxes and charges fell by 30 bps year-on-year, from 21.2% to 20.9%. Net of the restructuring and of the annual wage agreement, the ratios would have come to 20.4% in the 9M07 and 20.9% in the 9M06.

In the 3rd quarter of 2007, EBITDA totaled R\$ 238.3 million versus R\$ 208.4 million of 3Q06, up 14.4% over the pro forma EBITDA of the same prior-year period. The EBITDA margin was 6.8% in 3Q07 as opposed to 6.3% in 3Q06, an increase of 50 bps, explained by the improvement of the gross margin in the period.

Excluding expenditures with restructuring, the EBITDA margin in the 3rd quarter of 2007 was 7.0% as opposed to 6.7% in the same period of the previous year.

Financial Income

Net Financial Income	(54)	(37)	46.3%	(168)	(162)	3.7%

(1) Totals may not tally as the figures are rounded off

Financial revenue reached R\$ 68.5 million in the quarter, 14.1% lower than the R\$ 79.7 million recorded in 3Q06. This difference is explained by the lower interest rate of the period and by the reduction of 27.9% of the average cash of the 3rd quarter of 2007 in relation to that of 3Q06.

In spite of the reduction of the average funding cost, financial expenses went up from R\$ 116.5 million (pro-forma) in the prior year to R\$ 122.2 million this quarter. This increase of 4.9% is related to the increase of 13.7% in the Group's average gross indebtedness in the period.

The net financial income was negative by R\$ 53.7 million in the quarter, as opposed to a negative pro-forma result of R\$ 36.7 million in 3Q06.

At the end of the period, the Group's gross indebtedness presented a reduction of R\$ 361.9 million in relation to the previous quarter due to the payment of the 5th issue of debentures. In relation to the same prior year period, the gross indebtedness had an increase of R\$ 90.1 million.

The payment of the remaining debentures of the 5th issuance, as well as R\$330 million in loans during the quarter, brought a reduction of R\$ 499.0 million in cash and financial investments compared to the previous quarter and a reduction of R\$ 652.9 million compared to 3Q06.

The net debt increased by R\$ 137.1 million in relation to the previous quarter, driven chiefly by the reduction in Working Capital generated by the financing of receivables, and also increased by R\$ 743.1 million in comparison to the 3Q06. The Net Debt/EBITDA ratio (12 months) ended the quarter at 1.3x.

Equity Income

FIC's portfolio reaches R\$ 1.2 billion at the end of the quarter

With a 12% share of the Group's sales in the 3rd quarter of 2007, the operations of FIC (Financeira Itaú CBD) announced a negative result of equity income of R\$ 9.9 million for the period, a 34.1% improvement on the results for the 3rd quarter of 2006.

The total portfolio reached R\$ 1.2 billion at the end of the quarter, with 57% growth in relation to the same period of the previous year. Part of this growth is attributed to the absorption of the portfolio of co-branded credit cards (credit cards of Itaucard which are co-branded with Pão de Açúcar and Extra, previously belonging to Credicard) in the second quarter of this year, as well as the continuing growth in levels of activation and to the private label portfolio.

FIC's total client portfolio reached 5.6 million, which is constant in relation to the number registered for the previous quarter.

The results did not represent a growth in the improvement trend for this quarter, due to the lower volume of credit (both in terms of sales and portfolio size) and extended guarantees. The improvement trend in the results continues, and for the next quarter is expected a growth in portfolios of payments by installments, in co-branded operations, and a migration from the credit cards of the best clients from private label to co-branded, maintaining forecasts of break even point.

Minority Interest: Sendas Distribuidora
Gains in gross margin and in expenses contribute to bring about a significant improvement of the EBITDA margin

The gross revenue from operations in Rio de Janeiro was accountable for 18.4% of the total gross sales of the Group and reached R\$ 760.9 million in the quarter. Net revenue totaled R\$ 660.4 million.

Due to the reduction of shrinkage, the assortment review and the new pricing policy adopted in Rio de Janeiro, which aims at a better balance between special offers and regular prices, the gross margin of Sendas Distribuidora was 26.7% in 3Q07, 140 bps above the 25.3% recorded in 3Q06.

Operating expenses before taxes and charges as a percentage of the net sales came to 22.1% in the 3rd quarter of 2007, a reduction of 150 bps in relation to the same prior-year period. This downslide is a result of the ongoing work developed in Rio de Janeiro and includes the adoption of initiatives such as productivity programs in the stores, the reduction of promotion-related expenses and the creation of an expense committee to impose tighter controls over in-store-expenses.

In this manner, the EBITDA margin of the quarter was 3.5%, up 260 bps over the 0.9% recorded in 3Q06. By the criterion previously reported by the Company (EBITDA before taxes and charges) this indicator was 4.6%, in line with the objective of reaching a margin of 5% at the end of the year. This recovery is a consequence of a better gross margin and of lower expenses, as explained above

The financial income of this quarter presented an improvement of 34.4% in relation to 3Q06, totaling R\$ -24.2 million. This recovery is due mainly to the reduction of R\$ 9.4 million in the financial expense of this quarter in relation to the same prior-year period. Among the factors that contributed to this reduction, there is the lower interest rate verified in the period and the 6.5% decrease of the Company's total debt.

Due to the satisfactory operating results presented by Sendas Distribuidora, Management and the auditors reviewed a projection of income, and in this manner, the Company was able to resume the use of income tax credits accumulated at Sendas Distribuidora. These credits brought a fiscal benefit of R\$ 34.9 million in the quarter.

As a consequence of the recover of operating income, the improvement of financial income and the resumption of Income Tax credits, the result of Sendas Distribuidora was reverted and the company recorded income of R\$ 10.6 million in the period, as opposed to loss of R\$ 42.2 million recorded in the same quarter of last year. This income of R\$ 10.6 million generated minority interest of R\$ 6.1 million negative for the Group.

Income before income tax grows 232.4%

Income Tax	17	2	741.8%	(28)	(20)	36.9%

(1) Totals may not tally as the figures are rounded off

Income before income tax totaled R\$ 27.4 million, a growth of 232.4% in relation to the pro forma Income before income tax of the prior year. This significant improvement was mainly due to the increase of the gross margin and on account of the recovery of the results of Sendas Distribuidora.

Income tax was positive by R\$ 17.0 million in the quarter. This difference in relation to the previous quarter is explained by the recovery of the results of Sendas Distribuidora, which reflected on the resumption of constitution of deferred income tax credit in the period.

(3) basis points

Net income in the quarter, for the reasons already mentioned before, grew 10.2% in relation to the pro forma net income for the same prior-year period, amounting to R\$ 34.7 million.

In the quarter, it is worth emphasizing that net income was affected by R\$ 42.7 million of expenses with amortization of goodwill. This is a non-cash expense, which has a positive effect for the Company from the point of view of fiscal benefit.

Investments reached R\$ 227.4 million in the quarter

In the 3rd quarter of 2007, investments reached R\$ 227.4 million versus R\$ 226.9 million recorded in the same prior-year period. Investments in the period were mainly concentrated in the construction of new stores, with openings planned for the 4th quarter of 2007, when most of the openings scheduled for this year will take place.

The main highlights of the quarter were:

- R\$ 118.3 million in the opening and construction of new stores;
- R\$ 8.9 million in the acquisition of strategic land;
- R\$ 56.9 million in the renovation of stores;
- R\$ 43.2 million in infrastructure (technology, logistics and others).

In the nine months of 2007, investments accumulated R\$ 648.3 million in comparison with R\$ 520.5 million in the same prior-year period. Growth of the sales area in relation to the prior year was 6.1% . During the period, nine store were opened and other five units were leased from the Rossi Monza chain.

Extra Three hypermarkets were opened in the quarter. In addition, the company built the Maceió store, opened in October, and another two stores, with openings scheduled for November. There will also be the conversion of a Pão de Açúcar store into an Extra store in João Pessoa. During the year, five new stores were opened by October.

Pão de Açúcar Construction of one store in the period, with opening scheduled for November.

CompreBem Two new stores were opened (one in the country side and the other on the coast of São Paulo). Moreover, a store was leased from the Rossi Monza chain, converted into the CompreBem format. The group is planning to open yet another store currently under construction in Campinas by the end of the year.

Extra Perto A new store was opened in Campinas, and another store was converted from Pão de Açúcar into Extra Perto. Another four stores were also leased from the Rossi Monza chain, converted into the Extra Perto Format. Another five stores are to be opened in 4Q06, in the country side of São Paulo. Furthermore, the group is planning to perform three conversions from Pão de Açúcar to Extra Perto by the year-end.

Extra Fácil Three new stores were opened in the quarter in the city of São Paulo. Other seven stores will be opened in the 4Q07, besides three conversions from CompreBem to Extra Fácil, which will also take place in the last quarter of 2007.

Subsequent Events Joint venture with Assai chain and Purchasing Group

Assai

On November 2, 2007, Grupo Pão de Açúcar and the partners of the company Assai Comercial e Importadora Ltda announced the creation of a joint venture controlled by Grupo Pão de Açúcar, which hold stake of 60%. By means of this venture, the Group is now also operating into the cash-and-carry segment, the so called "atacarejo" (wholesale + retail in Portuguese), one of the country's fastest-growing retail areas.

With 33 years of activities in the sector, Assai has 2,700 employees and 14 stores located in the state of São Paulo, with six in the capital city and the others in Santos, Sorocaba, Jundiaí, Osasco, São Bernardo, Guarulhos (2) and Ribeirão Preto. There are more than 34 thousand m² of sales area, with a significant sale per square meter of more than R\$ 2,650, per month, which represents more than double the average sale per square meter of in the Brazilian food retail sector, according to ABRAS - Brazilian Association of Supermarkets.

The investment of Grupo Pão de Açúcar was R\$ 208.0 million, 60% of the total value of the business, which is equivalent to 30% of the gross sales verified in the last twelve (12) months by Assai (R\$ 1.15 billion).

In a separate, autonomous manner, the business operation will continue under the responsibility of the original partners that have profound experience, the main reason why Assai has become one of the largest and most important chains in the cash & carry format in Brazil.

The stores will continue operating under the Assai banner and will maintain their main differentials: low operating cost, competitive prices, mix of goods and communication.

Under the Shareholders Agreement of the new company, the Board of Directors will be comprised of a total seven members, four appointed by Grupo Pão de Açúcar and three by the original partners. The structure implemented will permit the full consolidation of the results of the new company in the financial statements of Grupo Pão de Açúcar.

The agreement also stipulates the exit conditions for the original partners, who hold the remaining 40% of the capital. The acquisition price is set according to the 2 following criteria:

1) The larger between 7x EBITDA multiple and 35.16% of net sales (last 12 months), net of net indebtedness and possible contingencies. In case the EBITDA margin is lower than 4.6%, only the 7x EBITDA criterion will be taken into account;

2) Amount of the Initial Purchase, indexed by IPCA (Extended Consumer Price Index) + 6.5%, net of distributed dividend indexed by IPCA + 6.5% per year.

Grupo Pão de Açúcar may acquire the total remaining stake from the original partners (40%) through the exercise of a call option, according to the following cases:

1) In the event GPA requires the chairman to be dismissed due to low performance, at 100% of criterion 1 of the acquisition price;

2) In case the chairman resigns or is absent during more than 1/3 of the board's meetings called during certain fiscal year, for the lower amount between criterion 1 or 80% of criterion 2;

3) At any moment up to December 31, 2011, for the higher amount between criterion 1 or 125% of criterion 2;

4) In January 2012, January 2013 and January 2014, for the higher amount between criterion 1 and criterion 2;

5) At any moment in the event Mr. Rodolfo (JV's chairman) becomes incapable or deceases, for criterion 1 of acquisition price.

Assai's original partners hold a put option over its total 40% stake, exercisable in the first fortnight of January 2012, January 2013 and January 2014, for criterion 1 of the acquisition price.

In any of the cases described above, payment will be made in cash.

The operation is subject to certain resolutive conditions and determinations of amounts provided in the instruments executed on the date the agreement is signed. Furthermore, the operation will be submitted to the approval of the authorities of the competition defense system and to the board members and stockholders of Grupo Pão de Açúcar, according to the terms of the by-laws.

Purchasing Group

In the month of October, Grupo Pão de Açúcar announced a partnership with União Brasil and started its pilot project of activity in the Purchasing Group segment.

Without the need for investments in assets, the Group offered its commercial and logistic knowledge with the objective of increasing its profitability by means of a retail segment that is growing at high levels in Brazil: smaller stores, with up to ten check-outs, which are supplied through Purchasing Groups.

Under the agreement, Grupo Pão de Açúcar, which already operates with different store formats, can get to know a new business segment and new markets where it is not yet present, as is the case of the state of Espírito Santo, where the project is to be executed.

In this initial stage, the partnership will exclusively serve Multishow (purchasing group affiliated to União Brasil), with 52 associated stores and annual sales of R\$ 200 million. The expectation of the agreement is that in six months time, 70% of the grocery products sold by Multishow will be supplied by Grupo Pão de Açúcar. The other 30% basically refer to products from regional suppliers that are traded directly by União Brasil.

The initial sales of the Purchasing Group of Grupo Pão de Açúcar are estimated at R\$ 3.0 million/month and should double after the first six months of 2008. By the end of next year, the amount traded should be equivalent to the average amount of a hypermarket store.

The information presented in the following tables was not revised by external auditors.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
