1. OPERATIONS

Companhia de Saneamento Básico do Estado de São Paulo - Sabesp (the Sabesp or Company) is a mixed-capital company headquartered in São Paulo, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services, as well as supplying treated water on a bulk basis and providing sewage treatment services for another six municipalities of the Greater São Paulo Metropolitan Area.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. The new Sabesp vision sets forth as its objective to be recognized as the company that has universalized the Sanitation services in its area of operation, with focus on the customer, in a sustainable and competitive way, with excellence in environmental solutions.

The Company provides water and sewage services in 365 municipalities in the State of São Paulo. It should be highlighted noted that the operations of the municipalities of Itapira, Araçoiaba da Serra, Iperó and Cajobi have ceased temporarily due to judicial orders still in progress. On June 30, 2010, the assets referring to these four municipalities were R\$16,470. Nearly all of these assets are result of concessions granted by the municipalities which most of them

have a 30-year term. Up to June 30, 2010, 78 concessions were expired and all of them are being negotiated with the municipalities. Between 2010 and 2030, 65 concessions will expire. The remaining concessions are for undetermined period. Up to June 30, 2010 198 program contracts were signed.

Management expects that the referred concessions will be renewed or extended, thus there will not be a discontinuity of the water supply and sewage collection in these municipalities. On June 30, 2010 the net book value of the property, plant and equipment used in the 78 municipalities where the concessions are under negotiation totals R\$2,086 million and the net revenues for the period ended on June 30, 2010 totals R\$463 million.

In the municipality of Santos, in the Santista lowland region, which has a significant population, the Company operates supported by a public authorization deed. A similar situation occurs in other municipalities in that region as well as the Ribeira valley region. The Company started to operate after the merger of the companies that formed it.

The important changes in regulation of the sanitation sector occurred in 2007 and generated new challenges and opportunities for Sabesp. The regulatory milestone has consolidated the integration between the investments of the service provider and the priorities set forth by the holder of the services, it made the provision of accounts more effective and transparent and increased the security for investments.

The Company's shares have been listed on the Novo Mercado (New Market) segment of the BOVESPA (São Paulo Stock Exchange) since April 2002, and on the New York Stock Exchange (NYSE) as ADRs since May 2002.

All information about areas of concession, number of municipalities, water and sewage volume and other related data disclosed in this report, which does not arise from the accounting and/or financial statements, have not been examined by the independent auditors.

(ii) Reimbursement of additional retirement and pension benefits paid

It refers to amounts of supplemental benefits of retirement and pension plan provided by State of Sao Paulo s Law nr. 4819/58 (Benefits) paid by the Company to former employees or retirees.

(iii) Second Amendment to the Gesp Agreement

On December 28, 2007, the Company and the State of São Paulo, by means of the Secretary of Treasury signed the second amendment to the terms of the original Gesp agreement, (1) agreeing with the payment of the remaining balance of the First Amendment, (R\$133,709 as at November 30, 2007) to be paid in 60 equal, monthly and consecutive installments, the first one maturing on January 02, 2008. The value of the installments is monetarily adjusted according to the variation of the IPCA-IBGE, added by simple interests of 0.5% per month. Within the balance of this agreement, which installments have been paid monthly up to this point, there is an amount of R\$46,244 that the State does not recognize as due. Sabesp has an understanding different from the State regarding this amount, and is not admitting the review of these previously agreed upon values, without the substantiated unequivocal demonstration, of the lack of correspondence between the amounts presented by Sabesp and the services effectively provided. (2) with regards to the overdue and unpaid accounts in the period from March, 2004 to October, 2007, resulting from the provision of water and collection of sewage services in the total of R\$256,608, R\$236,126 have been received with R\$8,093 were transferred to Other Debtors and R\$12,389, object of discrepancies about the validation were submitted to ARSESP and are under analysis. At present, differences as to the debtor have been identified, although not regarding the amount of the debt. In case of reclassification of the person responsible for

paying the bill, Sabesp transferred the collection to the corresponding Entity. (3) the interests on shareholders' equity due by Sabesp to the State, referring to the period from March, 2004 to December,

2006, in the amount of R\$400,823, restated from June, 2007 to November, 2007 by the Selic rate, were paid in the period from January to March, 2008, (4) the State and Sabesp agreed upon the prompt resumption of the fulfillment of their reciprocal obligations, under the new premises: (a) implementation of the electronic accounts management system to facilitate and speed up the follow-up of the payment processes and the procures of budgeting management; (b) structuring of the Programa de Uso Racional de Agua - PURA, to rationalize the consumption of water and the amount of the water and sewage bills of the responsibility of the State; (c) the establishment, by the State, of criteria in the budgeting of a way to avoid the displacement of amounts in the specific line of water and sewage bills as of 2008; (d) possibility of registration of state entities and bodies in a default system or master file; (e) possibility of interruption of the supply of water to the state entities in case of default in the payment of water and sewage bills.

Out of the invoicing of the months of November, 2007 to March, 2010, approximately 95% of the accounts have already been paid by the State Government.

(iv) Third Amendment to Gesp Agreement

Gesp, Sabesp and DAEE, on November 17, 2008, entered into the Third Amendment to the Term of Agreement of Payment Commitment, and Other Agreements, where the State confesses to owe Sabesp the amount of R\$915,251, monetarily adjusted until September, 2008 by the IPCA-IBGE, corresponding to the Uncontroversial Amount, calculated by FIPECAFI. Sabesp accepts temporarily the Reservoirs as part of the payment of the Uncontroversial Amount and offers to the State a temporary settlement, constituting a financial credit of R\$696,283, corresponding to the value of the Reservoirs. The definitive settlement will only occur with the effective transfer of property in the relevant real estate notary. The remaining balance of R\$218,967 is being paid in 114 monthly and consecutive installments, in the amount of R\$1,920 each, restated annually by the IPCA/FIPE, added by interests of 0.5% p.m., the first installment became due on November 25, 2008.

Sabesp and the State are working together on obtaining a legislative authorization in order to make viable the transfer of the Reservoirs to Sabesp, thus overcoming the juridical uncertainty caused by the Public Civil Action, mentioned in item (iii). After publication of the legislative authorization, the transfer of the Reservoirs to Sabesp will occur.

The Third Amendment also provides for the regularization of the monthly flow of benefits. While Sabesp is responsible for the monthly payments, by judicial decision, the State reimburses the Company based on criteria identical to those applied to the Uncontroversial Amount. In the absence of an impeditive judicial decision, the State will directly assume the flow of the portion of monthly payments of the part considered uncontroversial.

(v) As mentioned before, on November 17, 2008 the Company and the State executed the 3rd Amendment to GESP Agreement, in such occasion that the amounts called controversial and uncontroversial have been quantified. In such Amendment, efforts have been made to resolve what was called the Controversial Amount of Benefits. According to the fourth clause of this instrument, the Controversial Amount is represented by the difference between the Uncontroversial Amount and the amount effectively paid by the Company as supplemental retirement and pension benefits provided for Law 4819/58, under the original responsibility of the State of Sao Paulo, in the Company's understanding, although paid by Sabesp until May, 2008, due to judicial order.

In executing the Third Amendment, an appreciation of the differences that gave rise to the Controversial Amount of the Benefits provided by Law 4819/58 has been provided. Such expectation was, at that time,

based on the PGE's will to reanalyze the matter and also, in the Company's understanding, to the reimbursement based on external legal opinions.

However, recent opinions issued by PGE and received on September 4th and 22nd, 2009 and on January 4th, 2010, once again denied the reimbursement of the larger portion of this amount. As a consequence, the management's understanding has been changed about receiving the Controversial Amount upon a direct negotiation with the State.

Although the negotiations with the State are still underway, it is no longer possible to ensure that the Company will recover, in an entirely amicable way, the debts related to the Controversial Amount.

Sabesp will not waive the debt that it considers to be legitimately held against the State. In this sense, it shall exhaust all possibilities to resolve the question at a technical and legal level. If the difference persists, the Company shall adopt all necessary measures to safeguard the Company's interests.

In this context, the Company's management decided to recognize in the 2008 results a provision for losses on the outstanding balance of the controversial amount. This provision, in June 30, 2010 was R\$496,084. As a consequence of the recognition of this provision, it was also recorded the obligation related to the actuarial commitment kept with the beneficial owners, which right has been denied by the State, under the way it is paid by Sabesp. On June 30, 2010, the amount of this obligation was R\$507,772 (March 31, 2010 - R\$520,055). The details of the actuarial obligation are presented in the explanatory note nr. 13.

(b) Cash and cash equivalents

The financial income from such investments was R\$28,517 and R\$47,308 in the first quarter of 2010 and 2009, respectively. The Company, due to State Decree n° 55,357 of January 18, 2010, must invest its excess resources with financial institutions controlled by the State Government.

(c) Agreement for the use of reservoirs

In its operations, the Company uses the Guarapiranga and Billings reservoirs; should these reservoirs not be available for use to the Company, there could be the need to collect water in more distant places. The Company does not pay any fee for the use of these reservoirs but it is responsible for their maintenance and operating costs.

(d) Agreements with lower tariffs with State and Municipal Government Entities that joined the Rational Water Use Program (PURA).

The Company has contracts signed with public entities linked to the State Government and to the municipalities served involving approximately 6.500 properties, which are benefited with a 25% reduction in the tariffs of the services of water supply and sewage collection, when not in default. The contracts provide for the implementation of the rational use of water program, which considers a reduction in the consumption of water.

(e) Guarantees

The State Government grants guarantees for some loans and financings of the Company and does not charge any fee related thereto.

(f) Sesamm

6. INDEMNIFICATIONS RECEIVABLE

Indemnities receivable are a non-current asset that represents amounts receivable from the Municipalities of Diadema and Mauá as an indemnity for their unilateral termination of the concessions for water supply and sewage collection services of the Company in 1995. As of June 30, 2010 and March 31, 2010, this asset amounted to R\$146,213 (nominal amounts).

Due to these concession agreements, the Company invested in the construction of water and sewage systems in those municipalities in order to meet its concession service commitments. For the unilateral termination of the Diadema and Mauá concessions, the municipalities assumed the responsibility of supplying water and sewage services in those regions. At that time, the Company reclassified the balances of property, plant and equipment related to the assets used in those municipalities to non-current assets (indemnities receivable).

The net book value of the items of property, plant and equipment related to the Municipality of Diadema, reclassified in December, 1996, was R\$75,231, and the balance of the indemnifications receivable from the Municipality was R\$60,295.

The net book value of the items of property, plant and equipment related to the Municipality of Maua, reclassified in December, 1999, was R\$103,763, and the balance of the indemnifications receivable from the Municipality was R\$85,918.

The Company's rights to the recovery of these amounts are being judicially discussed by the municipalities.

Sabesp filed lawsuits to collect the amounts due by the municipalities. With regards to Diadema, the execution of the agreement entered with Diadema's Mayor Office and the Companhia de Saneamento de Diadema - Saned, has started for the payment of the indemnification, the judge of first level accepted the appeals of the Mayor's Office and extinguished the execution. Sabesp filed an appeal against such sentence and, in December, 2005, partial approval to this appeal was granted to declare the validity of the agreement and determine that the appeals to the execution were once again judged in first level. On December 2007, the decision that accepted the execution of the Saned was rendered, ordering this company to be summoned to pay the full amount of the debt within 15 days under the penalty of fine. The realization of the pledge in cash was approved on Saned's bank accounts and financial investments (online pledge) up to 10% of the restated amount of the debit, being blocked and withdrawn the amount of R\$2,919 in March 3rd, 2009. Later, the Court of Justice determined that the pledge be made upon weekly deposit by Saned of the amount corresponding to 20% on all it receives in its bank accounts and financial investments, such decision still being subject of appeal. Regarding Diadema Mayor's Office, a new sentence was given to the appeals to the execution, on October, 2009, recognizing the existence of the right to claim the debt, and affirming that the execution against the Municipality shall be made upon precatory notes (and not by pledge). Sabesp and the Mayor's Office have appealed against such judgment.

On December 29, 2008, Saned and the municipality of Diadema entered into, with the State of Sao Paulo and Sabesp, a Memorandum of Intent with the purpose to prepare studies and conduct negotiations to instruct decisions of Diadema and Sabesp, aiming at the exclusive provision of water and sewage services in the municipality of Diadema.

The parties agreed that the search for a negotiated solution for the currently existing conflicts among the companies is fundamental so that the public service of water supply, sewage collection and treatment have their proper development in Diadema.

On January, 2009 the parties presented joint petition requesting the suspension of new pledges for the period of three months in order to try to make an agreement viable. The suspension was granted by the Judge of Public Treasury and, successively renewed, being the last renewal occurred on April, 2010 in face of negotiations for agreement.

With regards to Mauá, a first level decision was given determining that the Municipality pays the amount of R\$153.2 million as compensation for the damages caused and for loss of profits. The Maua s City Hall appealed against this decision. On July 2006, the decision was converted in diligence consisting of an expert clarification on the amount of the indemnity for loss of profits and the expert confirmed the amount of the loss of profits determined by the lower court. In August, 2008, the appeal was judged, having fully maintained the conviction imposed in the first level. The Maua Mayor s Office filed special and extraordinary appeals against the sentence that confirmed its conviction to indemnify Sabesp. Both appeals were not accepted by the Court of Justice, causing the filing of appeals to the Superior Court of Justice and to the Supreme Court. Superior Court of Justice has already denied acceptance to the appeal and confirmed the non admissibility of the special appeal.

Based on the opinion of the legal counsels, Management continues to affirm that the Company has legal right to receive the amounts corresponding the indemnification and it continues to monitor the situation of the lawsuits.

17. FINANCIAL INSTRUMENTS AND RISK

(a) Identification and valuation of the financial instruments

The Company operates with several financial instruments with emphasis in cash and cash equivalents, including financial investments and loans and financings, described as follows.

The Company did not perform transactions with derivatives in 2010 and 2009.

- (i) Cash & cash equivalents, accounts receivable, other current assets and accounts payable

The amounts recorded approximate the realization amounts.

Cash equivalents correspond to the financial investments expressed in reais and have immediate liquidity.

- (ii) Investments

These consist, mainly, of the equity interest in the company Sesamm (pursuant Note 7) recorded by the equity method of accounting, in which the Company has strategic interest. Considerations of market value of the shares held are not applicable.

- (iii) Loans and Financings

In accordance with accounting standards related to the financial instruments, the market values of the projected cash flows, at fair value, of loans and financings on June 30, 2010 are as follows:

	<u>Jun/10</u>		<u>Mar/10</u>	
	Equity amount	Market value	Equity amount	Market value
Banking Loans				
Foreign Currency (iv)	1,788,904	2,313,570	1,777,499	2,472,689
Debentures (i)	2,977,350	3,342,763	1,232,120	1,495,001
BNDES (ii)	470,914	470,914	382,906	382,906
Others (iii)	<u>2,195,242</u>	<u>2,417,560</u>	<u>3,173,347</u>	<u>3,409,554</u>
	7,432,410	8,544,807	6,565,872	7,760,150

In order to obtain the market values of Financial Instruments, the following criteria have been adopted:

(i) Debentures are financings considered by the nominal amount restated up to the maturity date, discounted to present value at the forward interest market rates, disclosed by Anbima in the secondary market, having as basis June 30, 2010 and the Company's security traded in the domestic market.

(ii) Financings - BNDES, those are instruments considered by the nominal amount restated up to the maturity date, that have as characteristics the indexation to the TJLP, which is a specific modality, not being compared to any other market rate.

Therefore, the Company's choice was to publish as market value the amount accounted as of June 30, 2010.

(iii) Other financings in national currency are considered by the nominal amount restated up to the maturity date, discounted to present value at the forward interest market rates. The forward rates used were obtained at the BM&F website.

(iv) Foreign currency financings are controlled in the original currency, converted at the foreign exchange rate at the date of the balance sheet, discounted to present value using the forward market rate obtained in the Bloomberg, based on the Company's title in the external market.

Additionally, the Company has an instrument indexed to the YEN [JICA (Note 10)], which, in addition of the premises above, was considered in the conversion to present value the parity of the original currency of the instrument related to the dollar.

(b) Market risks

(i) Foreign exchange rate risk

This risk results from the possibility of the Company incurring losses due to fluctuations in the foreign exchange rates that impact the balances of loans and financings in foreign currency funded in the market and, consequently, the financial expenses. The Company does not maintain hedge or swap operations, however, the company performs an active management of the debt, seeking to reduce the exposure in foreign currency, taking advantage of the windows of opportunity, to exchange expensive debts to cheaper debts, reducing the cost by means of anticipation of the maturity dates.

A significant portion of the Company's financial debt was linked to the US dollar and to the Yen, in the total amount of R\$1,788,904 (Note 10). The table below summarizes the Company's exposure to exchange rates at June 30, 2010.

	In thousands	
	US\$	Japanese Yen
Loans and financing	744,579	21,316,000

(ii) Interest rate risk

This risk arises from the possibility that the Company may incur losses due to interest rate fluctuations and indices that increase their interest expenses on loans and financing. The Company has not entered into any derivative contract to hedge against this risk; however, it continually monitors market interest rates, in order to evaluate the possible need to replace its debt. As of June 30, 2010, the Company had R\$2,093,971 in loans and financing which were obtained at

variable interest rates (CDI and TJLP).

Another risk faced by the Company is the lack of correlation between the monetary adjustment indices of its debt and those of its receivables. Water supply and sewage treatment tariffs do not necessarily follow the increases in the interest rates affecting the Company's debt.

(iii) Credit risk

Credit risk is mitigated by selling to a geographically dispersed customer base.

(c) Sensitivity analysis

Bellow is presented the table demonstrating the sensitivity analysis of the financial instruments that may generate significant impacts to the Company.

Under the terms of CVM instruction nr. 475/08, in order to demonstrate the amounts of the main financial liabilities converted at a projected rate for final settlement of each contract, converted to fair value (Scenario I) with 25% appreciation (Scenario II) and 50% appreciation (Scenario III).

Financial Instruments	Risk	2010		
		Scenario I	Scenario II	Scenario III
		R\$	R\$	R\$
Financial Liability				
Loans and Financings				
Banco do Brasil, CEF	Increase in UPR	1,216,546	1,222,369	1,228,191
Debentures	Increase in IGPM	648,451	810,564	972,677
Debentures	Increase in IPCA	140,573	175,716	210,860
BID and Eurobonds	Increase in the US\$	793,926	992,407	1,190,888
JICA	Increase in the Yen	99,200	124,000	148,800

The indices used for each scenario are based on the number of days to elapse for each contract, the amounts expressed above have been summarized.

The rates were projected based on the settlement dates of each financial instrument; the information was obtained out of BM&F website.

These sensitivity analysis have the objective to measure the impact of the changes in the market variables on the Company's financial instruments. Such amounts, when settled, may present values different from those demonstrated above, due to the estimates used in their preparation process.

4.1. Salaries and payroll charges

In 2Q10 salaries and payroll charges increased by R\$1.6 million or 0.4%, going from R\$360.9 million to R\$359.3 million as a result of the following factors:

- Reduction in headcount in function of the layoffs (TAC + 2% of the headcount) occurred from April/09 to June/10 with 2,387 dismissals; and
- This reduction was partially offset by 6.69% salary adjustment since May, 2009 and 5.05% since May, 2010.

In the 1st semester of 2010, there was a reduction of R\$167.4 million, caused by the provision made in the 1Q09, that did not occur in 2010. Even excluding the effect of the TAC of R\$146.6 million, there was a decrease of R\$20.8 million, or 3.0%.

4.2. General Supplies

In the 2Q10 there was a decrease of R\$4.5 million, or 12.2%, when compared to the same period previous year, from R\$36.8 million to R\$32.3 million. The main factors that caused this variance were: i) lower expenses with maintenance materials in the adductor systems, water and sewage treatment stations and elevation stations in the Metropolitan Region of Sao Paulo - RMSP, in the amount of R\$3.1 million; and ii) expenditures with fuels and lubricants of vehicles in the amount of R\$1.2 million, as a consequence of lower consumption of fuels in function of the reallocation of new vehicles and increase in demand of outsourced services like the Global R and Global Sourcing.

4.3. Treatment Materials

The expenditures in 2Q10 were lower than 2Q09 by R\$2.0 million, or 6.0%, going from R\$33.1 million to R\$31.1 million. This variance is related to the following factors:

- Decrease of R\$4.5 million in function of lower consumption of aluminum poly-chloride by approximately 45% and replacement of aluminum sulfide. Despite the consumption of aluminum sulfide has grown approximately 30%, the average cost of the product dropped 54%, which contributed significantly in the reduction of the expenditures for the period; and
- Increase of R\$2.6 million as a result of the price adjustment of chlorine and ferric chlorite since November, 2009 and increase in the consumption of some products such as: i) activate charcoal, in function of the climatic and water source conditions, as well as the proliferation of algae in the Reservoirs that serve Alto Tiete Producer System; ii) beginning of the use of hydrogen peroxide in Santos, Praia Grande and Sao Vicente; iii) poly-electrolytes, in function of the entrance into operations of the centrifuges in the Barueri system.

4.4. Services

In the 2Q10, this item presented a decrease of R\$1.7 million, or 0.6%, from R\$276.3 million to R\$274.6 million. The main factors that contributed to this variance were:

- Decrease of R\$26.8 million in the provision made in the 2Q09, referring to the actions set forth in the agreement signed between Sabesp and the PMSP; and
- Appropriation of the expenditures incurred in two quarters, made in the 2Q09, when the accounting for the public private partnership PPP of Alto Tiete started, as opposed to the recognition of the expenditures of only one quarter in the 2Q10, resulting in a reduction of R\$6.1 million.

Disregarding the effects of these provisions, the third party services account would have presented a growth of R\$31.2 million, that is, a 11.3% increase.

The following services presented increase:

- Broadcasting of advertising campaigns focused in social environmental actions, such as: Planeta Sustentavel, Jornal SPTV Globo, TV Record Media Project, among others, in the amount of R\$8.5 million, recurring for upcoming quarters;
- Maintenance of networks and connections of water and sewage in the amount of R\$8.2 million, in function of the increase in demand and contractual amounts based on the Global Sourcing of the municipalities of the Regional Systems and the increase in the executions of services of the maintenances in the RMSP, in addition to the enhancement of the actions to meet the demands of the Corrego Limpo Program with the Sao Paulo Municipal Hall PMSP and actions to optimize the systems of sanitation sewage in Santos Lowlands;
- Contracting of consulting firms, advisory and specialized services in the amount of R\$4.1 million comprising: supply of information and hydrological forecasts in real time, fauna and flora survey for obtaining environmental permits of Rio Taiacupeba basin, tele-service in the municipalities that comprise the Regional Systems Contact Center R, development services of the new virtual agency and bills management system, update of the technical registry of the geographic information system SIGNOS (inventory of distributions networks, adduction, collection and treatment), among others;

- Reading of hydrometers and delivery of bills in the amount of R\$3.8 million, resulting from the increase in the number of connections and use of new technologies, that allow higher safety and agility in the system of issuance and reading of bills, in addition to the delivery of water bills in some Business Units by postage in the mails;
- Pavement services and replacement of sidewalks in the amount of R\$3.2 million;
- Lease of vehicles in the amount of R\$1.1 million, with large concentration of delivery of vehicle since the 2nd semester of 2009 in replacement to the own fleet;
- Expenditures with freights and transportations in the amount of R\$1.1 million due to the outsourcing of the transportation of chemical products, recurring for upcoming quarters; and
- Expenses of R\$1.0 million with the implementation of the Program of Rational Use of Water - PURA in the municipal schools in function of the agreement signed between Sabesp and PMSP.

4.5 Electric Energy

In the 2Q10, this item presented increase of R\$8.1 million or 6.7%, from R\$121.7 million to R\$129.8 million.

This result is associated to the following factors:

- Tariff adjustment with impact to the average price of 5.6% in the tariff of the captive market, which represents 77% of the installed capacity with electric energy, influencing in the weighted average tariff increase between the captive market and the free market around 5.8%; and
- Increase in cost between the markets with weighted average of 6.7%.

4.6. General Expenses

In the 2Q10 there was a decrease of R\$6.3 million or 14.9%, from R\$42.3 million to R\$36.0 million, in function of the decrease in the provision for judicial contingencies, institutional support, among others.

4.7. Depreciation and Amortization

This item presented a decrease of R\$10.5 million or 6.5%, from R\$161.5 million to R\$151.0 million. This variance is due mainly to the review of the estimate, with increase in the useful life of assets, recurring for upcoming quarters.

4.8. Credit Write-offs

In the 2Q10, the write-offs of credits presented an increase of R\$42.0 million, or 55.5%, from R\$75.7 million to R\$117.7 million, mainly for the need for supplement occurred in the 2Q10 of past due debts of PMSP.
