LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS,

A challenging year has passed, and we have entered an opportunity filled 2010. The worldwide semiconductor industry grew above expectations in the first half of 2010 with sales increasing more than 50% year-on-year. SMIC was able to ride on this opportunity and increased its revenue for the first half of 2010 to more than 77% compared to the same period last year. The Company's gross margin has turned positive since the fourth quarter of 2009 and maintained double-digits with continued growth for two consecutive quarters. Utilization has climbed from 35% in the first quarter of 2009 to 94.3% in the second quarter of 2010. Also in the first half of 2010, the book-to-bill ratio was above 1.0 for six consecutive months.

Since our new management came on board they have implemented various initiatives, which produced positive results. We are gradually narrowing the technology gap on advanced nodes with industry leaders. Our 45 and 40 nanometer technology development is ahead of schedule and will be qualified by the end of this year and enter volume production next year. We are also working to speed up our 32 nanometer process development. Internally, we are strengthening our professionalism and accountability, and at the same time, we are simplifying internal processes, improving departmental operating efficiency. In the recent placing of new shares, we have successfully raised US\$100 million for our Beijing fab's advanced technology capacity expansion. We have also reorganized our sales force with an emphasis on key customers and those with high-potential. By strengthening existing key partnerships and selectively cultivating new customers and new products with high potential, we will improve our product mix and average selling price to achieve profitability. As Mainland China's most advanced semiconductor manufacturer, our 90-nanometer and below revenue contribution increased to 23.6% in the second quarter of this year, and total 65-nanometer shipments have already exceeded 10,000 wafers. Revenue from Mainland China contributed 28.7% to our total revenue in the second quarter of 2010, compared to 20.0% in 2009.

Since the beginning of this year, we have streamlined the organization to reduce costs and increase the efficiency and output of SMIC. Additionally, more than 100 key managers attended our first global management meeting. The meeting communicated the corporate message and strategies to bolster organizational effectiveness, employee cohesiveness, teamwork spirit and execution. The new management will continue to work together to build a solid foundation for leading SMIC to a successful future.

Looking back on the past six months, we have already taken solid steps to pave our way to sustainable profitability. We will continue to work step by step, to maximize the interests of our shareholders and customers.

Thank you again for your continuous support for SMIC.

The number of wafers the Company shipped increased by 86.6%, from 509,943 8-inch wafer equivalents to 951,776 8-inch wafer equivalents, between these two periods. The simplified average selling price of total revenue during this period decreased by 5% from US\$812 per wafer to US\$770 per wafer.

COST OF SALES AND GROSS PROFIT (LOSS)

Cost of sales increased by 11.8% from US\$556.2 million for the six months ended June 30, 2009 to US\$622.0 million for the six months ended June 30, 2010, primarily due to increased wafer shipments.

The Company had a gross profit of US\$110.8 million for the six months ended June 30, 2010 compared to a gross loss of US\$142.3 million for the six months ended June 30, 2009. Any of the following in respect of SMIC Tianjin would constitute an event of default during the term of the facility:

1. $[\text{Net profit} + \text{depreciation} + \text{amortization} + \text{financial expenses} - (\text{increase of accounts receivable and advanced payments} + \text{increase of inventory} - \text{increase in accounts payable and advanced receipts})] / \text{financial expenses} < 1$; and
2. The ratio of total debt to total assets is more than 60% during the ramp up period of SMIC Tianjin and more than 40% after the facility is at full capacity.

SMIC Tianjin has complied with these covenants as of June 30, 2010.

Short-term Credit Agreements. As of June 30, 2010, the Company had short-term credit agreements that provided total credit facilities up to approximately US\$394.2 million on a revolving credit basis. As of June 30, 2010, the Company had drawn down approximately US\$357.4 million under these credit agreements and approximately US\$36.8 million is available for future borrowings. The outstanding borrowings under the credit agreements are unsecured, except for the amount of US\$17.0 million, which is secured by term deposits.

CAPITALIZED INTEREST

Interest cost incurred on funds used to construct plant and equipment during the active construction period is capitalized, net of government subsidies received. The interest capitalized is determined by applying the borrowing interest rate to the average amount of accumulated capital expenditures for the assets under construction during the period. Capitalized interest is added to the cost of the underlying assets and is amortized over the useful life of the assets. Capitalized interest of US\$3.1 million and US\$2.2 million have been added to the cost of the underlying assets during the six months ended June 30, 2010 and June 30, 2009, respectively, and is amortized over the respective useful life of the assets. For the six months ended June 30, 2010 and June 30, 2009, the Company recorded amortization expenses relating to the capitalized interest of US\$3.6million and US\$4.5 million, respectively.

Contents

COMMITMENTS

As of June 30, 2010, the Company had commitments of US\$63 million for facilities construction obligations in Chengdu, Beijing, Tianjin, Shanghai and Shenzhen and US\$705 million to purchase machinery and equipment mainly for the Beijing, Tianjin and Shanghai fabs in the coming 18 months. The Company plans to fund these commitments through funds generate from the placing of new shares of US\$100 million in July this year, the upcoming subscription of shares of US\$102 million from its major shareholder, Datang, and also the Company's ongoing operations.

DEBT TO EQUITY RATIO

As of June 30, 2010, the Company's debt to equity ratio was 58% calculated by dividing the sum of the short-term borrowings, current portion of long-term debt, and long-term debt by total shareholders' equity.

CONTINGENT LIABILITIES

The Company recorded a contingent liability in relation to claims from an unrelated semiconductor manufacturer based on its best estimate of the probable amount of its liability as of December 31, 2009. For the six months ended June 30, 2010, the Company believes that the recorded amount still reflects its best estimate of the probable amount of the liability.

FOREIGN EXCHANGE RATE FLUCTUATION RISK

The Company's revenues, expenses, and capital expenditure are primarily transacted in United States Dollars. However, since the Company has operations consisting of manufacturing, sales activities and capital purchasing conducted in currencies other than U.S. dollar, the Company is primarily exposed to changes in exchange rates for the EURO, Japanese Yen, and Chinese Renminbi.

To minimize these risks, the Company purchases foreign-currency forward exchange contracts with contract terms normally lasting less than twelve months to protect against the adverse effect that exchange rate fluctuations may have on foreign currency denominated activities. These forward exchange contracts are principally denominated in Chinese Renminbi, Japanese Yen or EURO and do not qualify for hedge accounting in accordance with ASC 815. As of June 30, 2010, the Company had outstanding foreign currency forward exchange contracts with a notional amount of US\$4.2 million all of which matured before April 2011. Notional amounts are stated in U.S. dollar equivalent spot market exchange rates, as of the respective dates.

As of June 30, 2010, the fair value of foreign currency forward exchange contracts was a loss of approximately US\$0.05 million. The Company does not enter into foreign currency exchange contracts for speculative purposes.

Contents

CROSS CURRENCY SWAP FLUCTUATION RISK

At June 30, 2010, the Company had a long-term loan facility agreement outstanding in the aggregate principal amount of EUR27.1 million. The company is primarily exposed to changes in exchange rate for the EURO.

To minimize the risk, the company entered into a cross currency swap contract with contract terms fully matching the repayment schedule of the long-term loan to protect against the adverse effect of exchange rate fluctuations arising from the foreign-currency denominated loan. The cross currency swap contract does not qualify for hedge accounting in accordance with ASC 815.

As of June 30, 2010, the Company had outstanding cross currency swap contracts with a notional amount of US\$15.7 million all of which will mature before May 2012. Notional amounts are stated in U.S. dollar equivalent spot market exchange rates, as of the respective dates.

As of June 30, 2010, the fair value of foreign currency forward exchange contracts was a loss of approximately US\$2.6 million. The Company does not enter into foreign currency exchange contracts for speculative purposes.

INTEREST RATE RISK

The Company's exposure to interest rate risks relates primarily to the Company's long-term debt obligations, which the Company generally assumes to fund capital expenditures and working capital requirements. The Company's long-term debt obligations are all subject to variable interest rates. The interest rates on the Company's U.S. dollar-denominated loans are linked to the LIBOR. The interest on the Company's EURO denominated loans are linked to the EURIBOR. As a result, the interest on the Company's loans are subject to fluctuations in the underlying interest rates to which they are linked.

The Company has entered into interest rate hedging contracts commencing from May 2009. The interest rate swap contract qualified for hedge accounting in accordance with ASC 815.

As of June 30, 2010, the Company had outstanding interest rate swap contracts with a notional amount of US\$80 million all of which will mature before December 2012.

Full year capital expenditure for 2010 is expected to be \$700 to \$750 million. We continue to focus on turning the Company around and target sustainable profitability while carefully increasing scale to match our customers' demand.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended June 30, 2010 and 2009
(unaudited, in US\$ thousands)

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements include the results of Semiconductor Manufacturing International Corporation and subsidiaries (the "Company"). All inter-company accounts and transactions have been eliminated in consolidation. The interim condensed consolidated financial statement apply the same accounting policy of annual consolidated financial statements. The interim condensed consolidated financial statements included herein are unaudited and have been prepared in accordance with accounting principles generally accepted in the United State of America, or GAAP and applicable rules and regulations of the Securities and Exchange Commission, regarding interim financial reporting and Appendix 16, "Disclosure of financial information," of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. They do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Accordingly, these interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes thereto contained in the Company's Annual Report for the year ended December 31, 2009 dated on April 26, 2010. The December 31, 2009 condensed consolidated balance sheet included herein was derived from the audited financial statements as of that date, but does not include all other statements and disclosures required by GAAP. In the opinion of management, these interim consolidated financial statements reflect all adjustments of a normal recurring nature necessary to present fairly the Company's results for the interim periods. The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amount of revenue and expenses during the reporting periods. Actual results could differ from those estimates. In addition, the Company's operating results for the six months ended June 30, 2010 may not be indicative of the operating results for the full fiscal year or any other future period.

We have evaluated subsequent events, through the date that the financial statements were issued on August 27, 2010.

2. FAIR VALUE

The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, we consider the principal or most advantageous market in which we would transact and we consider assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of non-performance.

Contents

2. FAIR VALUE (CONTINUED)

The Company utilizes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs are obtained from independent sources and can be validated by a third party, whereas unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company establishes three levels of inputs that may be used to measure fair value that gives the highest priority to observable inputs and the lowest priority to unobservable inputs as follows:

Level 1 —Quoted prices in active markets for identical assets or liabilities.

Level 2 —Inputs other than quoted market prices in active markets that are observable, either directly or indirectly.

Level 3 —Unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities.

The Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The Company performs a thorough analysis of its assets and liabilities that are subject to fair value measurements and disclosures to determine the appropriate level based on the observability of the inputs used in the valuation techniques. Assets and liabilities carried at fair value are classified in the categories described above based on the lowest level input that is significant to the fair value measurement in its entirety.

3. REVENUE RECOGNITION

The Company manufactures semiconductor wafers for its customers based on the customers' designs and specifications pursuant to manufacturing agreements and/or purchase orders. The Company also sells certain semiconductor standard products to customers. Revenue is recognized when persuasive evidence of an arrangement exists, service has been performed, the fee is fixed or determinable and collectability is reasonably assured. Sales to customers are recognized upon shipment and title transfer, if all other criteria have been met. The Company also provides certain services, such as mask making, testing and probing. Revenue is recognized when the services are completed or upon shipment of semiconductor products, if all other criteria have been met.

Customers have the right of return within one year pursuant to warranty and sales return provisions. The Company typically performs tests of its products prior to shipment to identify yield rate per wafer. Occasionally, product tests performed after shipment identify yields below the level agreed with the customer. In those circumstances, the customer arrangement may provide for a reduction to the price paid by the customer or for the costs to return products and to ship replacement products to the customer. The Company estimates the amount of sales returns and the cost of replacement products based on the historical trend of returns and warranty replacements relative to sales as well as a consideration of any current information regarding specific known product defects that may exceed historical trends.

For the six months ended June 30, 2010, the Company believes that the recorded amount still reflects its best estimate of the probable amount of the liability.

21. SETTLEMENT

The Company settled all pending litigation with TSMC on November 9, 2009, including the legal action filed in California for which a verdict was returned by the jury against SMIC on November 4, 2009, with a Settlement Agreement (the “2009 Settlement Agreement”) which replaced the 2005 Settlement Agreement. The 2009 Settlement Agreement resolved all pending lawsuits between the parties and the parties have since dismissed all pending litigation between them. The terms of the 2009 Settlement Agreement include the following:

- 1) Entry of judgment and mutual release of all claims that were or could have been brought in the pending lawsuits;
- 2) Termination of SMIC’s obligation to make remaining payments under the 2005 Settlement Agreement between the parties (approximately US\$40 million);
- 3) Payment to TSMC of an aggregate of US\$200 million (with US\$15 million paid upon execution, funded from SMIC’s existing cash balances, and the remainder to be paid in installments over a period of four years);
- 4) Commitment to grant to TSMC of 1,789,493,218 shares of SMIC (representing approximately 8% of SMIC’s issued share capital as of October 31, 2009) and a warrant exercisable within three years of issuance to subscribe for 695,914,030 shares of SMIC, at a purchase price of HK\$1.30 per share Both the shares and the warrant would allow TSMC to obtain total ownership of approximately 10% of SMIC’s issued share capital after giving effect to the share issuances and are subject to receipt of required government and regulatory approvals. The 1,789,493,218 ordinary shares and the Warrant were issued on July 5, 2010, pursuant to the Share and Warrant Issuance Agreement; and
- 5) Certain remedies in the event of breach of this settlement.

21. SETTLEMENT (CONTINUED)

Accounting Treatment for the 2009 Settlement Agreement:

In accounting for the 2009 Settlement Agreement, the Company determined that there were three components of the 2009 Settlement Agreement:

- 1) Settlement of litigation via entry of judgment and mutual release of all claims in connection with pending litigation;
- 2) TSMC's covenant not-to-sue with respect to alleged misappropriation of trade secrets; and
- 3) Termination of payment obligation of the remaining payments to TSMC under the 2005 Settlement Agreement of approximately \$40 million.

The Company does not believe that any of the aforementioned qualify as assets under US GAAP. Accordingly, all such items were expensed as of the settlement date. Further, all previously recorded Deferred Cost associated with the 2005 Settlement Agreement were immediately impaired and the commitment to grant shares and warrants was initially measured at fair value and is being accounted for as a derivative with all subsequent changes in fair value being reflected in the consolidated statements of operations. On July 5, 2010, the Company issued shares and warrant to TSMC according to the 2009 Settlement Agreement.
