Notes to the Financial Statements

NOTE 1 - ORGANIZATION AND BUSINESS OPERATIONS

Interdom, Corp. (the Company) was incorporated in the State of Nevada on December 8, 2009. The Company is in the business of real estate consulting and evaluation. Interdom, Corp. is in the development stage as defined under Accounting Codification Standard, Development Stage Entities (ASC-915). The Company has not generated any revenue to date and consequently its operations are subject to all risks inherent in the establishment of a new business enterprise. For the period from inception, (December 8, 2009) through October 31, 2010 the Company has accumulated losses of \$8,264 and further losses are anticipated.

NOTE 2 - GOING CONCERN

The financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception resulting in an accumulated deficit of \$8,264 as of October 31, 2010 and further losses are anticipated in the development of its business raising substantial doubt about the Company s ability to continue as a going concern. The ability to continue as a going concern is dependent upon the Company generating profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. Management intends to finance operating costs over the next twelve months with existing cash on hand and loans from directors and/or private placement of common stock. These financials do not include any adjustments relating to the recoverability and reclassification of recorded asset amounts, or amounts and classifications of liabilities that might result from this uncertainty.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America and are presented in US dollars. In the opinion of management, all adjustments, consisting of normal recurring accruals considered necessary for a fair presentation, have been included.

Operating results for the six months ended October 31, 2010 are not necessarily indicative of the results that may be expected for the year ending April 30, 2011. For further information, refer to the financial statements and footnotes thereto included in the Form S1 Registration Statement filed with SEC.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Foreign Currency Translation

The financial statements are presented in United States dollars. In accordance with Accounting Standards Codification (ASC-830), Foreign Currency Matters , foreign denominated monetary assets and liabilities are translated into their United States dollar equivalents using foreign exchange rates which prevailed at the balance sheet date. Non monetary assets and liabilities are translated at the exchange rates prevailing on the transaction date. Revenue and expenses are translated at average rates of exchange during the year. Gains or losses resulting from foreign currency transactions are included in results of operations.

Financial Instruments

The carrying value of the Company's financial instruments approximates their fair value because of the short maturity of these instruments.

Stock-based Compensation

The Company records stock based compensation in accordance with the guidance in ASC Topic 718 which requires the Company to recognize expenses related to the fair value of its employee stock option awards. This eliminates accounting for share-based compensation transactions using the intrinsic value and requires instead that such transactions be accounted for using a fair-value-based method. The Company recognizes the cost of all share-based

awards on a graded vesting basis over the vesting period of the award.

Income Taxes

Income taxes are accounted for under the assets and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled.

Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Basic and Diluted Net Loss per Share

The Company computes loss per share in accordance with ASC-260 , Earnings per Share which requires presentation of both basic and diluted earnings per share on the face of the statement of operations. Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of outstanding common shares during the period. Diluted loss per share gives effect to all dilutive potential common shares outstanding during the period. Dilutive loss per share excludes all potential common shares if their effect is anti-dilutive.

The Company has no potential dilutive instruments and accordingly basic loss and diluted loss per share are the same.

Fiscal Periods

The Company's fiscal year end is April 30.

We expect we will require additional capital to meet our long term operating requirements. We expect to raise additional capital through, among other things, the sale of equity or debt securities.

Six Month Period Ended October 31, 2010 Compared to the period from Inception (December 8, 2009) to October 31, 2010

Our net loss for the six month period ended October 31, 2010 was \$1,548 compared to a net loss of \$8,264 during the period from inception (December 8, 2009) to October 31, 2010. During the six month period ended October 31, 2010, we did not generate any revenue.

Liquidity and Capital Resources

Six Month Period Ended October 31, 2010

As at October 31, 2010, our current assets were \$382 compared to \$430 in current assets at April 30, 2010. As at the six month period ended October 31, 2010, current assets were comprised of \$382 in cash. As at October 31, 2010, our current liabilities were \$5,146. Current liabilities were comprised of \$5,146 in advances from director.

Stockholders' deficit increased from (\$3,216) as of April 30, 2010 to (\$4,764) as of October 31, 2010.

Cash Flows from Operating Activities

We have not generated positive cash flows from operating activities. For the six month period ended October 31, 2010, net cash flows used in operating activities was \$1,548 consisting of a net loss of \$1,548. Net cash flows used in operating activities was \$8,264 for the period from inception (December 8, 2009) to October 31, 2010.

Cash Flows from Financing Activities

We have financed our operations primarily from either advancements or the issuance of equity and debt instruments. For the six month period ended October 31, 2010, cash provided by financing activities was \$1,500 consisting entirely of \$1,500 in advances from director. For the period from inception (December 8, 2009) to October 31, 2010, net cash provided by financing activities was \$8,646 received from proceeds from issuance of common stock and loan from director.

Plan of Operation and Funding

We expect that working capital requirements will continue to be funded through a combination of our existing funds and further issuances of securities. Our working capital requirements are expected to increase in line with the growth of our business.

Existing working capital, further advances and debt instruments, and anticipated cash flow are expected to be adequate to fund our operations over the next six months. We have no lines of credit or other bank financing arrangements. Generally, we have financed operations to date through the proceeds of the private placement of equity and debt instruments. In connection with our business plan, management anticipates additional increases in operating expenses and capital expenditures relating to: (i) acquisition of inventory; (ii) developmental expenses associated with a start-up business; and (iii) marketing expenses. We intend to finance these expenses with further issuances of securities, and debt issuances. Thereafter, we expect we will need to raise additional capital and generate revenues to meet long-term operating requirements. Additional issuances of equity or convertible debt securities will result in dilution to our current shareholders. Further, such securities might have rights, preferences or privileges senior to our common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, we may not be able to take advantage of prospective new business endeavors or opportunities, which could significantly and materially restrict our business operations. We will have to raise additional funds in the next twelve months in order to sustain and expand our operations. We currently do not have a specific plan of how we will obtain such funding; however, we anticipate that additional funding will be in the form of equity financing from the sale of our common stock. We have and will continue to seek to obtain short-term loans from our directors, although no future arrangement for additional loans has been made. We do not have any agreements with our directors concerning these loans. We do not have any arrangements in place for any future equity financing.

Off-Balance Sheet Arrangements

As of the date of this Quarterly Report, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.
