Subject: MPC and Andeavor Combination to Create A Leading U.S. Refining, Midstream and Retail Company
From: Gary R. Heminger

Fellow employees,

Today Marathon Petroleum Corporation announced our agreement to enter into a strategic combination with Andeavor, formerly Tesoro, an independent refining, marketing and logistics business, to create a leading U.S. refining, marketing and midstream company.

It is important to remember that today's announcement is just the first step in the process. The transaction is subject to customary closing conditions, including regulatory and shareholder approvals. Until the transaction closes, Marathon Petroleum Corporation and Andeavor will continue to operate as separate companies. It is critical that we all stay focused on safety, environmental stewardship and doing our jobs with the same dedication that has made us the strong company we are today.

We believe this transaction will create significant shareholder value by expanding MPC's footprint into key refining and midstream markets, as well as creating new opportunities for our retail segment. At the close of this transaction, expected in the second half of this year, MPC will have operations coast to coast and will be the largest refiner by capacity in the United States.

This transaction is a milestone in MPC's 130-year history of providing the fuels and other products that make our modern lives possible. Please see this short video for additional information, and read the news release we published today for details of this exciting development.

Thank you for your continued hard work as we begin this next chapter in our company's growth.

Sincerely,

Gary R. Heminger
Chairman and CEO

In addition, we have based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. While our respective management considers these assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond our control.
