|---------------------------------|---------------------|
| Delaware | 27-1204330 |
| (State or other jurisdiction of | (I.R.S. Employer |
| incorporation or organization) | Identification No.) |
| 1 Primerica Parkway | |
| Duluth, Georgia | 30099 |

Edgar Filing: Primerica, Inc. - Form 10-K

(Address of principal executive offices) (ZIP Code)

Registrant's telephone number, including area code: (770) 381-1000

Securities registered pursuant to Section 12(b) of the Act:

| Title of each class | Name of each exchange on which registered |
|--------------------------------|---|
| Common Stock, \$0.01 Par Value | New York Stock Exchange |

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: Primerica, Inc. - Form 10-K

The aggregate market value of the voting common equity held by non-affiliates of the registrant as of June 30, 2017, was \$3,395,813,718. The number of shares of the registrant's Common Stock outstanding at January 31, 2018, with \$0.01 par value, was 44,311,634.

Documents Incorporated By Reference

Certain information contained in the Proxy Statement for the Company's Annual Meeting of Stockholders to be held on May 16, 2018 is incorporated by reference into Part III hereof.

CAUTIONARY STATEMENT CONCERNING FORWARD-LOOKING STATEMENTS

Investors are cautioned that certain statements contained in this report as well as some statements in periodic press releases and some oral statements made by our officials during our presentations are “forward-looking” statements. Forward-looking statements include, without limitation, any statement that may project, indicate or imply future results, events, performance or achievements, and may contain the words “expect”, “intend”, “plan”, “anticipate”, “estimate”, “believe”, “will be”, “will continue”, “will likely result”, and similar expressions, or future conditional verbs such as “may”, “should”, “would”, and “could.” In addition, any statement concerning future financial performance (including future revenues, earnings or growth rates), ongoing business strategies or prospects, and possible actions taken by us or our subsidiaries are also forward-looking statements. These forward-looking statements involve external risks and uncertainties, including, but not limited to, those described under the section entitled “Risk Factors” included herein.

Forward-looking statements are based on current expectations and projections about future events and are inherently subject to a variety of risks and uncertainties, many of which are beyond the control of our management team. All forward-looking statements in this report and subsequent written and oral forward-looking statements attributable to us, or to persons acting on our behalf, are expressly qualified in their entirety by these risks and uncertainties. These risks and uncertainties include, among others:

- our failure to continue to attract new recruits, retain sales representatives or license or maintain the licensing of our sales representatives would materially adversely affect our business, financial condition and results of operations;
- there are a number of laws and regulations that could apply to our distribution model, which could require us to modify our distribution structure;
- there may be adverse tax, legal or financial consequences if the independent contractor status of our sales representatives is overturned;
- the Company’s or its independent sales representatives’ violation of, or non-compliance with, laws and regulations and related claims and proceedings could expose us to material liabilities;
- any failure to protect the confidentiality of client information could adversely affect our reputation and have a material adverse effect on our business, financial condition and results of operations;
- we may face significant losses if our actual experience differs from our expectations regarding mortality or persistency;
- the occurrence of a catastrophic event could materially adversely affect our business, financial condition and results of operations;
- our insurance business is highly regulated, and statutory and regulatory changes may materially adversely affect our business, financial condition and results of operations;
- a decline in the regulatory capital ratios of our insurance subsidiaries could result in increased scrutiny by insurance regulators and ratings agencies and have a material adverse effect on our business, financial condition and results of operations;
- a significant ratings downgrade by a ratings organization could materially adversely affect our business, financial condition and results of operations;
- the failure by any of our reinsurers or reserve financing counterparties to perform its obligations to us could have a material adverse effect on our business, financial condition and results of operations;
- our Investment and Savings Products segment is heavily dependent on mutual fund and annuity products offered by a relatively small number of companies, and, if these products fail to remain competitive with other investment options or we lose our relationship with one or more of these companies, our business, financial condition and results of operations may be materially adversely affected;
- the Company’s or its securities-licensed sales representatives’ violations of, or non-compliance with, laws and regulations could expose us to material liabilities;
- if heightened standards of conduct or more stringent licensing requirements, such as those proposed by the Securities and Exchange Commission and those adopted by the Department of Labor, are imposed on us or our sales representatives, or selling compensation is reduced as a result of new legislation or regulations, it could have a material adverse effect on our business, financial condition and results of operations;

- if our suitability policies and procedures, or our policies and procedures for compliance with the Department of Labor's fiduciary duty rule, were deemed inadequate, it could have a material adverse effect on our business, financial condition and results of operations;
- our sales force support tools may fail to appropriately identify financial needs or suitable investment products;
- non-compliance with applicable regulations could lead to revocation of our subsidiary's status as a non-bank custodian;
- as our securities sales increase, we become more sensitive to performance of the equity markets;
- if one of our significant information technology systems fails, if its security is compromised, or if the Internet becomes disabled or unavailable, our business, financial condition and results of operations may be materially adversely affected;
- the current legislative and regulatory climate with regard to cybersecurity may adversely affect our business, financial condition, and results of operations;
- in the event of a disaster, our business continuity plan may not be sufficient, which could have a material adverse effect on our business, financial condition and results of operations;
- credit deterioration in, and the effects of interest rate fluctuations on, our invested asset portfolio and other assets that are subject to changes in credit quality and interest rates could materially adversely affect our business, financial condition and results of operations;
- valuation of our investments and the determination of whether a decline in the fair value of our invested assets is other-than-temporary are based on estimates that may prove to be incorrect;

- changes in accounting standards can be difficult to predict and could adversely impact how we record and report our financial condition and results of operations;
- the effects of economic down cycles could materially adversely affect our business, financial condition and results of operations;
- we are subject to various federal, state and provincial laws and regulations in the United States and Canada, changes in which or violations of which may require us to alter our business practices and could materially adversely affect our business, financial condition and results of operations;
- litigation and regulatory investigations and actions may result in financial losses and harm our reputation;
- the current legislative and regulatory climate with regard to financial services may adversely affect our business, financial condition, and results of operations;
- the inability of our subsidiaries to pay dividends or make distributions or other payments to us in sufficient amounts would impede our ability to meet our obligations and return capital to our stockholders;
- a significant change in the competitive environment in which we operate could negatively affect our ability to maintain or increase our market share and profitability;
- the loss of key employees and sales force leaders could negatively affect our financial results and impair our ability to implement our business strategy;
- we may be materially adversely affected by currency fluctuations in the United States dollar versus the Canadian dollar; and
- the market price of our common stock may fluctuate.

Developments in any of these areas could cause actual results to differ materially from those anticipated or projected or cause a significant reduction in the market price of our common stock.

The foregoing list of risks and uncertainties may not contain all of the risks and uncertainties that could affect us. In addition, in light of these risks and uncertainties, the matters referred to in the forward-looking statements contained in this report may not in fact occur. Accordingly, undue reliance should not be placed on these statements. We undertake no obligation to publicly update or revise any forward-looking statements as a result of new information, future events or otherwise, except as otherwise required by law.

PART I

ITEM 1. BUSINESS.

Primerica, Inc. (“Primerica”, “we”, “us” or the “Parent Company”) is a leading distributor of financial products to middle-income households in the United States and Canada with 126,121 licensed sales representatives at December 31, 2017. We assist our clients in meeting their needs for term life insurance, which we underwrite, and mutual funds, annuities, managed investments and other financial products, which we distribute primarily on behalf of third parties. We insured approximately five million lives and have over two million client investment accounts at December 31, 2017. Our distribution model uniquely positions us to reach underserved middle-income consumers in a cost-effective manner and has proven itself in both favorable and challenging economic environments.

Our mission is to serve middle-income families by helping them make informed financial decisions and providing them with a strategy and means to gain financial independence. Our distribution model is designed to:

- Address our clients’ financial needs. Our licensed sales representatives primarily use our proprietary financial needs analysis tool (“FNA”) and an educational approach to demonstrate how our product offerings can assist clients to provide financial protection for their families, save for their retirement and other needs, and manage their debt. Typically, our clients are the friends, family members and personal acquaintances of our sales representatives. Meetings are generally held in informal, face-to-face settings, usually in the clients’ homes.

- Provide a business opportunity. We provide an entrepreneurial business opportunity for individuals to distribute financial products. Low entry fees as well as the ability to select their own schedules and time commitments allow our sales representatives to supplement their income by starting their own independent businesses without leaving their current jobs. Our unique compensation structure, technology, sales support and back-office processing are designed to enable our sales representatives to successfully grow their independent businesses.

We believe there is significant opportunity to meet the increasing array of financial services needs of our clients. We intend to leverage our sales force to provide additional products and services that meet such client needs, which will drive long-term value for all of our stakeholders. Our strategy is organized across four primary areas:

- Maximizing sales force growth, leadership and productivity;
- Broadening our protection product portfolio;
- Providing offerings that enhance our Investment and Savings Products (“ISP”) business; and
- Developing digital capabilities to deepen our client relationships.

Corporate Structure

We conduct our core business activities in the United States through three principal entities, all of which are direct or indirect wholly owned subsidiaries of the Parent Company:

- Primerica Financial Services, Inc. (“PFS”), our general agency and marketing company;
- Primerica Life Insurance Company (“Primerica Life”), our principal life insurance underwriting company; and
- PFS Investments Inc. (“PFS Investments”), our investment and savings products company, broker-dealer and registered investment advisor.

Primerica Life is domiciled in Tennessee, and its wholly owned subsidiary, National Benefit Life Insurance Company (“NBLIC”), is a New York-domiciled life insurance underwriting company. Prior to Primerica Life’s redomestication to Tennessee in December 2017, Primerica Life was a Massachusetts-domiciled life insurance underwriting company.

We conduct our core business activities in Canada through three principal entities, all of which are indirect wholly owned subsidiaries of the Parent Company:

- Primerica Life Insurance Company of Canada (“Primerica Life Canada”), our Canadian life insurance underwriting company;
- PFSL Investments Canada Ltd. (“PFSL Investments Canada”), our Canadian licensed mutual fund dealer; and

PFSL Fund Management Ltd. (“PFSL Fund Management”), our Canadian investment funds manager.

Primerica was incorporated in the United States as a Delaware corporation in October 2009 to serve as a holding company for the Primerica businesses (collectively, the “Company”). Our businesses, which prior to April 1, 2010, were wholly owned indirect subsidiaries of Citigroup Inc. (“Citigroup”), were transferred to us by Citigroup on April 1, 2010 in a reorganization pursuant to which we completed an initial public offering in April 2010 (the “IPO”). On March 31, 2010, we entered into certain coinsurance transactions to cede between 80% and 90% of the risks and rewards of our term life insurance policies that were in force at year-end 2009. We continue to administer all policies subject to these coinsurance agreements.

Our Clients

Our clients are generally middle-income consumers, which we define as households with \$30,000 to \$100,000 of annual income. According to the 2016 U.S. Census Bureau Current Population Survey, the latest period for which data is available, almost 50% of U.S. households fall in this range. We believe that we understand the financial needs of the middle-income segment which include:

• Many have inadequate or no life insurance coverage. Individual life insurance sales in the United States declined from 12.5 million policy sales in 1975 to 10.2 million policy sales in 2016, the latest period for which data is available, according to the Life Insurance Marketing and Research Association International, Inc. (“LIMRA”), a worldwide association of insurance and financial services companies. We believe that term life insurance, which we have provided to middle-income clients for many years, is generally the best option for them to meet their life insurance needs.

• Many need help saving for retirement and other personal goals. Many middle-income families continually find it challenging to save for retirement and other goals. By developing personalized savings programs for our clients using our proprietary FNA and offering a wide range of mutual funds, annuities, managed investments and segregated fund products sponsored and managed by established firms, our sales representatives are well equipped to help clients develop long-term savings plans to address their financial needs.

• Many need to reduce their consumer debt. Many middle-income families have numerous debt obligations from credit cards, auto loans, and home mortgages. We help our clients address these financial burdens by providing personalized and client-driven debt resolution techniques.

• Many prefer to meet face-to-face when considering financial products. Historically, many middle-income consumers have indicated a preference to meet face-to-face when considering financial products or services. As such, we have designed our business model to address this preference in a cost-effective manner.

Our Distribution Model

Our distribution model, which is based on a traditional insurance agency model and borrows aspects from franchising and direct sales, is designed to reach and serve middle-income consumers efficiently by selling to customers through our sales representatives. Key characteristics of our unique distribution model include:

• Independent entrepreneurs: Our sales representatives are independent contractors building and operating their own businesses. This business-within-a-business approach means that our sales representatives are entrepreneurs who take responsibility for selling products, recruiting and developing sales representatives, setting their own schedules and managing and paying the administrative expenses associated with their sales activities.

• Flexible time commitment: By offering a flexible time commitment opportunity, we are able to attract a significant number of recruits who desire to earn supplemental income and generally concentrate on smaller-sized transactions typical of middle-income consumers. Our sales representatives are able to start their independent businesses for low entry fees, for which they receive technological support, pre-licensing training and access to licensing examination preparation programs. Our sales representatives sell or refer products directly to consumers, and therefore our business opportunity does not require recruits to purchase and resell our products. Most of our sales representatives begin selling products on a part-time basis, which enables them to hold jobs while exploring an entrepreneurial business opportunity with us.

• Incentive to build distribution: When a sale is made, the selling representative receives a commission, as does the licensed representative who recruited him or her in most cases. Sales commissions are paid through several levels of the selling representative’s recruitment organization. This structure motivates existing sales representatives to grow our sales force and provides them with commission income from the sales completed by representatives in their sales organization.

- Sales force leadership: A sales representative who has built a successful organization and has obtained his or her life insurance and securities licenses can achieve the sales designation of Regional Vice President (“RVP”), which qualifies him or her to a higher commission schedule. RVPs are independent contractors who open and operate offices for their sales organizations and devote their full-time attention to their

businesses. RVPs also support and monitor the sales representatives, on whose sales they earn commissions, in achieving compliance with applicable regulatory requirements. RVPs' efforts to expand their businesses are a primary driver of our success.

Innovative compensation structure: We have developed an innovative system for compensating our independent sales force that is contingent upon product sales. We advance to our sales representatives a significant portion of their insurance commissions upon their submission of an insurance application and the first month's premium payment. In addition to being a source of motivation, this advance provides our sales representatives with immediate cash flow to offset costs associated with originating the business. In addition, monthly production bonuses are paid to RVPs whose sales organizations meet certain sales levels. With compensation tied to sales activity, our compensation approach accommodates varying degrees of individual productivity, which allows us to effectively use a large group of part-time sales representatives while providing a variable cost structure. In addition, we incentivize our RVPs with quarterly restricted stock units based largely on sales production ("equity-based compensation"), which aligns their interests with those of our stockholders.

Large, dynamic sales force: Members of our sales force primarily serve their friends, family members and personal acquaintances through individually driven networking activities. We believe that this warm market approach is an effective way to distribute our product offerings because it facilitates face-to-face interaction initiated by a trusted acquaintance of the prospective client, which is difficult to replicate using other distribution approaches. Due to the large size of our sales force and

the active recruiting of new sales representatives, our sales force is able to continually access an expanding base of prospective clients without engaging costly media channels.

Motivational culture: In addition to the motivation for our sales representatives to achieve financial success, we seek to create a culture that inspires and rewards our sales representatives for their personal successes and those of their sales organizations through sales force recognition events and contests. We also use Intranet-streamed broadcasts and local, regional and national meetings to inform and teach our sales representatives, as well as facilitate camaraderie and the exchange of ideas across the sales force organization. These initiatives encourage and empower our sales representatives to develop their own successful sales organizations.

Inclusive culture: Building and maintaining an ethnically and demographically diverse sales force is important to us, as we believe our sales force reflects the middle market communities we serve. As the communities we serve become more diverse, our sales force does as well.

Structure and Scalability of Our Sales Force

New sales representatives are recruited by existing sales representatives. When these new recruits join our sales force, they become part of the sales organization of the sales representative who recruited them as well as the sales organizations to which the recruiting sales representative belongs. We encourage our sales representatives to bring in new recruits to build their own sales organizations, enabling them to earn commissions on sales made by members of their sales organizations.

RVPs establish and maintain their own offices, which we refer to as field offices. Additionally, they are responsible for funding the costs of their administrative staff, marketing materials, travel, and training and certain recognition events for the sales representatives in their respective sales organizations. Field offices provide a location for our representatives to conduct recruiting meetings, training events and sales-related meetings, disseminate our Intranet-streamed broadcasts, conduct compliance functions, and house field office business records. Some business locations house more than one field office. At December 31, 2017, approximately 5,000 field offices in approximately 2,860 locations were managed by sales representatives that served as full-time RVPs.

RVPs play a major role in training, motivating and monitoring their sales representatives. Because the sales representative's compensation grows with the productivity of his or her sales organization, our distribution model provides financial rewards to sales representatives who successfully develop, support and monitor productive sales representatives. In addition to our commission structure, we offer the Primerica Ownership Program. This program provides qualifying RVPs a contractual right, upon meeting certain criteria, to transfer their Primerica businesses to another RVP or a qualifying family member at such time as they desire. Furthermore, we have developed proprietary tools and technology to enable our RVPs to reduce the time spent on administrative responsibilities associated with their sales organizations so they can devote more time to the sales, recruiting and training activities that drive our growth. We believe that our tools and technology, coupled with our sales compensation programs, further incentivize our sales representatives to become RVPs.

Both the structure of our sales force and the capacity of our support capabilities provide us with a high degree of scalability as we grow our business. Our support systems and technology are capable of supporting a large sales force and a high volume of transactions. In addition, by sharing training and compliance activities with our RVPs, we are able to grow without incurring proportionate overhead expenses.

Recruitment of Sales Representatives

The recruitment of sales representatives is undertaken by our existing sales representatives, who identify prospects and share with them the benefits of associating with our organization. Our sales representatives showcase our organization as dynamic and capable of improving the lives of middle-income families.

After the initial contact, prospective recruits typically are invited to an opportunity meeting, which is conducted by an RVP. The objective of an opportunity meeting is to inform prospective recruits about our mission and their

opportunity to start their own business by becoming sales representatives. At the conclusion of each opportunity meeting, prospective recruits are asked to complete an application and pay a nominal fee to commence their pre-licensing training and licensing examination preparation programs and, depending on the state or province, to cover their licensing exam registration costs, which are provided by the Company generally at no additional charge. Recruits are not obligated to purchase any of the products we offer in order to become sales representatives, though they may elect to make such purchases.

Recruits may become our clients or provide us with access to their friends, family members and personal acquaintances. As a result, we continually work to improve our systematic approach to recruiting and training new sales representatives.

Similar to other distribution systems that rely upon part-time sales representatives and typical of the life insurance industry in general, we experience wide disparities in the productivity of individual sales representatives. Many new recruits do not get licensed, often due to the time commitment required to obtain licenses and various regulatory and licensing hurdles. Many of our licensed sales representatives are only marginally active, as there are no minimum life insurance production requirements. As a result, we plan for this disparate level of productivity and view a continuous recruiting cycle as a key component of our distribution model. Our distribution model is designed to address the varying productivity associated with our sales representatives by paying production-based compensation, emphasizing recruiting, and developing initiatives to address barriers to licensing new recruits. By providing

commissions to sales representatives on the sales generated by their sales organization, our compensation structure aligns the interests of our sales representatives with our interests in recruiting new representatives and creating sustainable sales production.

The following table provides information on new recruits and life insurance-licensed sales representatives:

| | Year ended December 31, | | |
|--|-------------------------|---------|---------|
| | 2017 | 2016 | 2015 |
| Number of new recruits | 303,867 | 262,732 | 228,115 |
| Number of newly life insurance-licensed sales representatives | 48,535 | 44,724 | 39,632 |
| Number of life insurance-licensed sales representatives, at period end | 126,121 | 116,827 | 106,710 |
| Average number of life insurance-licensed sales representatives during period | 121,291 | 111,843 | 101,660 |

We define new recruits as individuals who have submitted an application to join our sales force together with payment of the nominal fee to commence their pre-licensing training. Certain recruits may not meet the compliance standards to join our sales force, and others elect to withdraw prior to becoming active in our business.

On average, it requires approximately three months for our sales representatives to complete the necessary applications and pre-licensing coursework and to pass the applicable state or provincial examinations to obtain a license to sell our term life insurance products. As a result, individuals recruited to join our sales force within a given fiscal period may not become licensed sales representatives or meet compliance standards until a subsequent period.

Sales Force Motivation, Training, Communication and Sales Support Tools

Motivating, training and communicating with our sales force are critical to our success and that of our sales force.

Motivation: Through our proven system of sales force recognition events, contests and communications, we provide incentives that drive our results. Motivation is driven in part by our sales representatives' desire to achieve higher levels of financial success by building their own businesses as Primerica sales representatives. The opportunity to help underserved middle-income households address financial challenges is also a significant source of motivation for many of our sales representatives, as well as for our management and home office employees.

We motivate our sales representatives to succeed in their businesses by:

- compensating our sales representatives for product sales made by them and their sales organizations;
- training our sales representatives on financial fundamentals so they can confidently and effectively assist our clients;
- reducing the administrative burden on our sales force, which allows them to devote more of their time to building a sales organization and selling products; and
- creating a culture in which sales representatives are encouraged to achieve goals through the recognition of their sales and recruiting achievements, as well as those of their sales organizations.

We conduct numerous local, regional and national meetings to help inform and motivate our sales force. In June 2017, we hosted our biennial international convention and associated meetings at the Indianapolis Convention Center and Lucas Oil Stadium in Indianapolis, Indiana, which was attended by approximately 40,000 people from the United States, Canada and Puerto Rico. Most of our new recruits and sales representatives who attended our biennial international convention did so at their own expense, which we believe further demonstrates their commitment to our organization and mission.

Training, Communication and Sales Support Tools: Primerica Online ("POL"), delivered through a secure Intranet website and a cross-platform mobile application ("Primerica App"), is our primary tool designed to support a sales and distribution model that relies on a large group of predominantly part-time sales representatives and assist them in

building their own businesses. We provide our sales representatives with communication, training, and sales support tools on POL that allow both new and experienced sales representatives to offer financial information and products to their clients. POL provides sales representatives with access to various business tracking and management tools, licensing support tools, product-specific training, and sales procedures and tools. Additionally, POL provides access to internal training programs and videos covering sales, management skills, business ownership, and compliance. We also use POL to provide real-time recognition of sales representatives' successes and scoreboards for sales force production, contests and trips. In addition, POL is a gateway to our product providers and product support. Subscribers generally pay a small monthly fee to subscribe to POL, which helps cover the cost of developing new resources and maintaining this support system. A limited version of POL that provides access to Primerica e-mail, compliance and compensation information, newsletters and bulletins is available at no cost.

The primary features and tools available on POL include:

• **Training and Licensing Tools:** POL provides sales representatives with access to study tools for life insurance and securities licensing examinations such as pre-licensing study materials, on-demand videos, personalized licensing study plans, exam simulators, progress tracking, and exam and license registration. POL also provides access to obtain online certifications to sell certain other distributed products.

4

Communication Tools: POL provides access to marketing materials for our product offerings, Company news and events, live streaming shows, on-demand videos, home office bulletins, Primerica e-mail, contact lists, and a hosted professional business website for our sales representatives. We broadcast and deliver video content on POL through our own digital video channel, PFN TV. We create original broadcasts and videos that enable senior management to provide business updates to our sales force as well as training and motivational presentations. We broadcast live programs hosted by home office management and selected RVPs that focus on new developments and provide motivational messages to our sales force. We also broadcast a training-oriented program to our sales force on a weekly basis and profile successful sales representatives, allowing these individuals to educate and train other sales representatives by sharing their methods for success.

Sales Support and Client Management Tools:

- Our Financial Needs Analysis: Our FNA is a proprietary, needs-based analysis tool. The FNA gives our sales representatives the ability to collect and synthesize client financial data and develop a financial analysis for the client that is easily understood. The FNA helps our clients understand their financial needs in the areas of debt, financial protection, and savings as well as introduces prudent financial concepts, such as regular saving and accelerating the repayment of high cost credit card debt to help them reach their financial goals. The FNA also provides clients with a snapshot of their current financial position and identifies their life insurance, savings and debt resolution needs.
- Our Point-of-Sale Application Tool: Our point-of-sale technology, TurboApps, is an internally developed system that streamlines the application process for our insurance and investment products. These applications populate client information from the FNA to eliminate redundant data collection and provide real-time feedback to eliminate incomplete and illegible applications. Integrated with our paperless field office management system described below and with our home office systems, TurboApps allows our RVPs and us to realize the efficiencies of straight-through-processing of application data and other information collected on our sales representatives' mobile devices, which results in expedited processing of product sales.
- Virtual Base Shop: In an effort to ease the administrative burden on RVPs and simplify sales force operations, we make available to RVPs a secure Intranet-based paperless field office management system as part of the POL subscription. This virtual office is designed to automate the RVP's administrative responsibilities and can be accessed by subscribing sales representatives in an RVP's immediate sales organization, which we refer to as his or her base shop.
- Shareholder Account Manager ("SAM"): SAM is a web-based tool that allows our investment-licensed representatives to service client investments in mutual funds accessed through our transfer agent platform.
- Client Relationship Manager ("CRM"): Our CRM tool allows sales representatives and their upline RVPs to organize client information, such as personal contact info, product relationships, account details, notes, appointments and follow-ups, in one place to enable fast and convenient access for managing client relationships.
- Primerica App: In 2018, we plan to launch a sales tool that will allow representatives to seamlessly move from a mobile life insurance application to a pre-filled investment application, streamlining the investment discussion. We expect this tool to help our sales representatives guide clients through the investment decision process and ultimately provide investment alternatives based on the client's individual situation. Further, we believe the new technology will create efficiencies and drive long-term productivity as well as make the ISP business more attractive to sales representatives who are considering obtaining a securities license.

In addition, our publications department produces materials to support, motivate and inform our sales force. We sell recruiting materials, sales brochures, business cards and stationery and provide communications services that include web design, print presentations, graphic design and script writing. We also produce a weekly mailing that includes materials promoting our current incentives, as well as the latest news about our product offerings.

Performance-Based Compensation Structure

Our commission structure is rooted in our origin as an insurance agency. Our sales representatives can receive compensation in multiple ways, including:

- sales commissions and fees based on their personal sales, referrals, and client assets under management;

sales commissions based on sales and referrals by sales representatives in their sales organizations and fees based on client assets under management in their sales organizations;
bonuses and other compensation, including equity-based compensation, generated by their own sales performance, the aggregate sales performance of their sales organizations and other criteria; and
participation in our contests and other incentive programs.

Our compensation structure pays a commission to the sales representative who sells the product and to several representatives above the selling representative within their sales organization. With respect to term life insurance sales, commissions are calculated based on the total first-year premium (excluding the policy fee) for all policies and riders up to a maximum premium. To motivate our sales force, we compensate sales representatives for term life insurance product sales as quickly as possible. We advance a majority of the insurance commission upon the submission of a completed application and the first month's premium payment. As the client makes his or her premium payments, the commission is earned by the sales representative and the commission advance is recovered by the Company. If premium payments are not made by the client and the policy terminates, any outstanding advance commission is charged

back to the sales representative. The chargeback, which only occurs in the first year of a policy, would equal that portion of the advance that was made, but not earned, by the sales representative because the client did not pay the full premium for the period of time for which the advance was made to the sales representative. Chargebacks, which occur in the normal course of business, may be recovered by reducing any cash amounts otherwise payable to the sales representative.

Sales representatives and representatives above them in their sales organizations are contractually obligated to repay us any commission advances that are ultimately not earned due to the underlying policy lapsing prior to the full commission being earned. Additionally, we hold back a portion of the commissions earned by our sales representatives as a reserve out of which we may recover chargebacks. The amounts held back are referred to as deferred compensation account commissions (“DCA commissions”). DCA commissions are available to reduce amounts owed to the Company by sales representatives. DCA commissions also provide a sales representative with a cushion against the chargeback obligations of representatives in their sales organization. DCA commissions, unless applied to amounts owed, are ultimately released to sales representatives.

We pay most term life insurance commissions during the first policy year. One of our term riders provides for coverage increases after the first year. For such riders, we pay first-year and renewal commissions only for premium increases related to the increased coverage. Additionally, we pay renewal commissions on some older in-force policies. At the end of the policy durations, we pay compensation on policy continuations and exchanges.

For most mutual funds (non-managed investments) and annuity products, commissions are paid both on the sale and on the value of assets under management and are calculated based on the dealer reallowance and trail compensation actually paid to us. For managed investment products, fees earned are primarily based on the assets under management and represent the fee we receive as compensation for as long as we retain the account. For our Canadian segregated fund investment product, we pay our sales representatives a sales commission based on the amount invested and a monthly fee based on clients’ asset values.

We also pay compensation to our sales force with respect to sales of prepaid legal services subscriptions and referrals for customers purchasing other distributed products. Prepaid legal services commissions are paid in fixed amounts on the sale of the respective subscription. Commissions related to other distributed products are calculated based on the type of product sold or referred.

We pay bonuses and other incentive compensation for the sale of certain products. Bonuses are paid to the sales representatives and RVPs for achieving specified production levels for the sale of term life insurance, investment and savings products and other distributed products.

In addition to these methods of compensation, we use a quarterly compensation program under which RVPs can earn equity-based compensation based largely on sales production.

Sales Force Licensing and Support

The states, provinces and territories in which our sales representatives operate generally require our sales representatives to obtain and maintain licenses to sell our insurance and securities products, requiring our sales representatives to pass applicable examinations. Our sales representatives may also be required to maintain licenses to sell certain of our other distributed products. To encourage new recruits to obtain their life insurance licenses, we either pay directly or reimburse the sales representative for certain licensing-related fees and expenses once he or she passes the applicable exam and obtains the applicable life insurance license.

To sell insurance products, our sales representatives must be licensed by their resident state, province or territory and by any other state, province or territory in which they do business. In most states, our sales representatives must be appointed by our applicable insurance subsidiary. Our in-house life insurance licensing program offers new recruits a

significant number of classroom life insurance pre-licensing courses to meet applicable state and provincial licensing requirements and prepares recruits to pass applicable licensing exams.

To sell mutual funds and variable annuity products, our U.S. sales representatives must be registered with the Financial Industry Regulatory Authority (“FINRA”) and hold the appropriate license(s) designated by each state in which they sell securities products, as well as be appointed by the annuity underwriter in the states in which they market annuity products. Our sales representatives must meet all state and regulatory requirements and be designated as an investment advisor representative in order to sell our managed investment products. We contract with third-party training firms to conduct securities license exam preparation for our sales representatives, and we also offer supplemental training tools.

Our Canadian sales representatives selling mutual fund products are required to be licensed by the securities regulators in the provinces and territories in which they sell mutual fund products. Our Canadian sales representatives who are licensed to sell our insurance products do not need any further licensing to sell our segregated funds products.

For sales of our other distributed products, appropriate state, provincial and territorial licensing may be required.

Supervision and Compliance

To ensure compliance with various federal, state, provincial and territorial legal requirements, we along with the RVPs share responsibility for maintaining an overall compliance program that involves compliance training and supporting as well as monitoring

the activities of our sales representatives. We work with the RVPs to develop and maintain appropriate compliance procedures and systems.

Generally, all RVPs must obtain a principal license (FINRA Series 26 in the United States and Branch Manager license in Canada), and, as a result, they assume responsibility over the activities of their sales organizations. Additional supervision is provided by approximately 500 Offices of Supervisory Jurisdiction (“OSJs”), which are run by select RVPs who receive additional compensation for assuming responsibility for supervision and compliance monitoring across all product lines. OSJs are required to periodically inspect sales force field offices and report to us any compliance issues they observe. Our Field Supervision Department regularly assists the OSJs and communicates compliance requirements to them to ensure they properly discharge their responsibilities. In addition, our Compliance Department regularly runs surveillance reports designed to monitor the activity of our sales force and investigates any unusual or suspicious activity identified during these reviews or during periodic inspections of RVP offices.

All of our sales representatives are required to participate in our annual regulatory-required compliance meeting, a program administered by our senior management and our legal and compliance staff at which we provide a compliance training overview across all product lines and require the completion of compliance checklists by each of our licensed sales representatives for each product he or she offers. Additionally, our sales representatives receive periodic compliance communications regarding new compliance developments and issues of special significance. Furthermore, the OSJs are required to complete an annual training program that focuses on securities compliance and field supervision.

Our Field Audit Department regularly conducts audits of all sales representative offices, including scheduled and no-notice audits. The Field Audit Department reviews all regulatory-required records that are not maintained at our home office. Any compliance deficiencies noted in the audit must be corrected, and we carefully monitor all corrective action. Audit deficiencies are addressed through fines, reprimands, probations and contract terminations.

Our Product Offerings

Reflecting our philosophy of helping middle-income clients with their financial product needs and ensuring compatibility with our distribution model, our product offerings generally meet the following criteria:

- ◆ Consistent with sound individual finance principles: Products must be consistent with good personal finance principles for middle-income consumers, such as financial protection, minimizing expenses, encouraging long-term savings and reducing debt.
- ◆ Designed to support multiple client goals: Products are designed to address and support a broad range of financial goals rather than compete with or cannibalize each other. For example, term life insurance does not compete with mutual funds because term life insurance has no cash value or investment element.
- ◆ Ongoing needs based: Products are generally designed to meet the ongoing financial needs of many middle-income consumers. This long-term approach bolsters our relationship with our clients by allowing us to continue to serve them as their financial needs evolve.

We use three operating segments to organize, evaluate and manage our business: Term Life Insurance; Investment and Savings Products; and Corporate and Other Distributed Products. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations” and Note 3 (Segment and Geographical Information) to our consolidated financial statements included elsewhere in this report for certain financial information regarding our operating segments and the geographic areas in which we operate.

Edgar Filing: Primerica, Inc. - Form 10-K

The following table provides information on our principal product offerings and the principal sources thereof by operating segment as of December 31, 2017.

| Operating Segment | Principal Product Offerings | Principal Sources of Products (Applicable Geographic Territory) | |

⁽²⁾ Brighthouse Financial, Inc. consists of the U.S. retail annuity business formerly owned and branded by MetLife, Inc. prior to its becoming an independent, publicly traded company on August 4, 2017.

Term Life Insurance

Through our three life insurance subsidiaries – Primerica Life, NBLIC and Primerica Life Canada – we offer term life insurance to clients in the United States, its territories, the District of Columbia and Canada. In 2016, the latest period for which data is available from LIMRA, we ranked as a leading provider of individual term life insurance in the United States.

We believe that term life insurance is generally a better alternative for middle-income clients than cash value life insurance. Term life insurance provides a guaranteed death benefit if the insured dies during the fixed coverage period of an in-force policy, thereby providing financial protection for his or her named beneficiaries in return for the periodic payment of premiums. Term insurance products, which are sometimes referred to as pure protection products, have no savings or investment features. By buying term life insurance rather than cash value life insurance, a policyholder initially pays a lower premium and, as a result, may have funds

available to invest for retirement and other needs. We also believe that a person's need for life insurance is inversely proportional to that person's need for retirement savings, a concept we refer to as the theory of decreasing responsibility. Young adults with children, new mortgages and other obligations need to buy higher amounts of insurance to protect their family from the loss of future income resulting from the death of a primary bread winner. With its lower initial premium, term life insurance lets young families buy more coverage for their premium dollar when their needs are greatest and still have the ability to have funds for their retirement and other savings goals.

We design our term life insurance products to be easily understood by, and meet the needs of, our clients. Clients purchasing our term life insurance products generally seek stable, longer-term income protection products for themselves and their families. In response to this demand, we offer term life insurance products with level-premium coverage periods that range from 10 to 35 years and a wide range of coverage face amounts. Additionally, certain term life insurance policies may be customized through the addition of riders to provide coverage for specific protection needs, such as mortgage and college expense protection. Policies remain in force until the expiration of the coverage period or until the policyholder ceases to make premium payments and terminates the policy. Premiums are guaranteed for policies issued in the United States for the initial term period, up to a maximum of 20 years. After 20 years, we have the right to raise the premium, subject to limits provided for in the applicable policy. In Canada, the amount of the premium is guaranteed for the entire term of the policy.

One of the innovative term life insurance products that we offer is TermNow, our rapid issue term life product that provides for face amounts of \$300,000 (local currency) and below. TermNow allows a sales representative to accept an application online or through the Primerica App and, with the client's permission, allows the Company to access databases, including Medical Information Bureau ("MIB") data in the United States and Canada and prescription drug and motor vehicle records in the United States, as part of the underwriting process. The Company uses this data and the client's responses to application questions to determine any additional underwriting requirements. Results of these processes are reported in real time to our underwriting system, which then determines whether or not we should rapidly issue a policy.

The average face amount of our in-force policies issued in 2017 was approximately \$244,800. The following table sets forth selected information regarding our term life insurance product portfolio:

| | Year ended December 31, | | |
|------------------------------------|-------------------------|-----------|-----------|
| | 2017 | 2016 | 2015 |
| Life insurance issued: | | | |
| Number of policies issued | 312,799 | 298,244 | 260,059 |
| Face amount issued (in millions) | \$95,635 | \$89,869 | \$79,111 |
| | December 31, | | |
| | 2017 | 2016 | 2015 |
| Life insurance in force: | | | |
| Number of policies in force | 2,560,334 | 2,489,493 | 2,403,713 |
| Face amount in force (in millions) | \$763,831 | \$728,385 | \$693,194 |

Pricing and Underwriting. We believe that effective pricing and underwriting are significant drivers of the profitability of our life insurance business and we have established our pricing assumptions to be consistent with our underwriting practices. We set pricing assumptions for expected claims, lapses and expenses based on our experience and other factors while also considering the competitive environment. These other factors include:

- expected changes from relevant experience due to changes in circumstances, such as (i) revised underwriting procedures affecting future mortality and reinsurance rates, (ii) new product features, and (iii) revised administrative programs affecting sales levels, expenses, and client continuation or termination of policies; and
- observed trends in experience that we expect to continue, such as general mortality improvement in the general population and better or worse policy persistency (the period over which a policy remains in force) due to changing

economic conditions.

Under our current underwriting guidelines, we individually assess each insurable adult applicant and place each applicant into a risk classification based on current health, medical history and other factors. Each classification (generally preferred plus, preferred, non-tobacco and tobacco) has specific health criteria. We may decline an applicant's request for coverage if his or her health or activities create unacceptable risks for us.

Our sales representatives ask applicants a series of "yes" or "no" questions regarding the applicant's medical history. We may also consider information about the applicant from third-party sources, such as MIB, prescription drug databases, motor vehicle records and physician statements. If we believe that follow up regarding an applicant's medical history is warranted, we use a third-party provider and its trained personnel to contact the applicant by telephone to obtain a more detailed medical history. Additionally, we may require copies of applicants' medical information from their attending physicians. The report resulting from this process is electronically transmitted to us and is evaluated in our underwriting process. For higher issued face amount applications, paramedical requirements are also needed.

To accommodate the significant volume of insurance business that we process, we and our sales force use technology to make our operations more efficient. We offer our sales representatives an electronic life insurance application that supports TermNow and other term life insurance products. Approximately 94% of the life insurance applications we received in 2017 were submitted electronically via TurboApps. Our electronic life insurance application reduces errors in submitted applications, collects the applicant's electronic signatures and populates the RVP's sales log. For paper applications, we use our proprietary review and screening system to automatically screen that an application meets regulatory and other requirements, as well as alert our application processing staff to any deficiencies with the application. If any deficiencies are noted, our application processing staff contacts the sales representative to obtain the necessary information. Once an application is complete, the pertinent application data is uploaded to our life insurance administrative systems, which manage the underwriting process by electronically analyzing data, recommending underwriting decisions, identifying requirements for higher face amounts or older ages and communicating with the sales representative and third-party service providers.

Claims Management. Our insurance subsidiaries processed over 15,600 life insurance benefit claims in 2017 on policies underwritten by us and sold by our sales representatives. These claims fall into three categories: death, waiver of premium (applicable to disabled policyholders who purchased a rider pursuant to which Primerica agrees to waive remaining life insurance premiums during a qualifying disability), or terminal illness. The claim may be reported by our sales representative, a beneficiary or, in the case of qualifying disability or terminal illness, the policyholder. Following are the benefits paid by us for each category of claim:

| | Year ended December 31, | | |
|---------------------------------|-------------------------|-------------|-------------|
| | 2017 | 2016 | 2015 |
| | (In thousands) | | |
| Death | \$1,388,027 | \$1,238,393 | \$1,204,629 |
| Waiver of premium | 45,146 | 43,168 | 40,528 |
| Terminal illness ⁽¹⁾ | 16,389 | 14,232 | 13,716 |

⁽¹⁾ We consider claims paid for terminal illness to be loans made to the beneficiary that are repaid to us upon death of the beneficiary from the death benefit.

In the United States, after coverage has been in force for two years, we may not contest the policy for misrepresentations in the application or the suicide of the insured. In Canada, we have a similar two-year contestability period, but we are permitted to contest insurance fraud at any time. As a matter of policy, we do not contest any coverage issued by us to replace the face amount of another insurance company's individual coverage to the extent the replaced coverage would not be contestable by the replaced company. We believe this approach helps our sales representatives sell replacement policies, as it reassures clients that claims made under their replacement policies are not more likely to be contested as to the face amount replaced. Through our claims administration system, we record, process and pay the appropriate benefit for any reported claim. Our claims system is used by our home office investigators to order medical and investigative reports from third-party providers, calculate amounts due to the beneficiary (including interest), and report payments to the appropriate reinsurance providers.

Primerica Life and NBLIC regularly consult the Social Security Administration's Death Master File ("Death Master File") in accordance with applicable state requirements. These processes help identify potential deceased policyholders for whom claims have not been presented in the normal course of business. If unreported deaths are identified, Primerica Life and NBLIC attempt to determine if a valid claim exists, to locate beneficiaries, and to pay benefits accordingly. Prior to 2011, the Company did not use the Death Master File in any aspect of its business.

Reinsurance. We use reinsurance primarily to reduce the volatility risk with respect to mortality. Since 1994, we have reinsured death benefits in the United States on a first dollar quota share yearly renewable term ("YRT") basis. We pay premiums to each reinsurer based on rates in the applicable agreement.

We generally reinsure 90% of the mortality risk for all term life insurance policies sold in the United States, excluding coverage under certain riders. For policies sold in Canada, we utilize a YRT reinsurance arrangement similar to our U.S. program. Prior to 2012, we reinsured a smaller proportion of the face amount for policies sold in Canada. We also reinsure substandard cases on a facultative basis to capitalize on the extensive experience some of our reinsurers have with substandard cases. A substandard case has a level of risk that is acceptable to us, but at higher premium rates than a standard case because of the health, habits or occupation of the applicant.

While our reinsurance agreements have indefinite terms, both we and our reinsurers are entitled to discontinue any reinsurance agreement as to future policies by giving advance notice of 90 days to the other. Each reinsurer's ability to terminate coverage for existing policies is limited to circumstances such as a material breach of contract or nonpayment of premiums by us. Each reinsurer has the right to increase rates with certain restrictions. If a reinsurer increases rates, we have the right to immediately recapture the business. Either party may offset any balance due from the other party. For additional information on our reinsurance, see Note 1 (Description of Business, Basis of Presentation, and Summary of Significant Accounting Policies) and Note 6 (Reinsurance) to our consolidated financial statements included elsewhere in this report.

Financial Strength Ratings. Ratings with respect to financial strength are an important factor in establishing our competitive position and maintaining public confidence in us and our ability to market products. Ratings organizations review the financial performance and condition of most insurers and provide opinions regarding financial strength, operating performance and ability to meet

obligations to policyholders. For additional information, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Financial Ratings.”

Investment and Savings Products

We believe that many middle-income families have significant unmet retirement and savings needs. Using our FNA tool, our sales representatives help our clients understand their current financial situation and how they can use time-tested financial principles, such as prioritizing personal savings, to reach their savings goals. Our product offerings comprise saving and investment vehicles that seek to meet the needs of clients in all stages of life.

Through PFS, PFS Investments, Primerica Life Canada, PFS Investments Canada, and our licensed sales representatives, we distribute and sell to our clients a variety of mutual funds, managed investments, variable and fixed annuities, fixed indexed annuities and segregated funds. As of December 31, 2017, approximately 24,340 of our sales representatives were licensed to distribute mutual funds in the United States (including Puerto Rico) and Canada. As of December 31, 2017, approximately 13,610 of our sales representatives were licensed and appointed to distribute annuities in the United States and approximately 11,380 of our sales representatives were licensed to sell segregated funds in Canada.

In the United States, clients acquire securities products from PFS Investments in either a brokerage or advisory relationship. In a brokerage relationship, a PFS Investments registered representative is required pursuant to FINRA rules to make a suitable recommendation for the client, but provides no ongoing monitoring of the client’s investments. In addition, certain recommendations may be subject to the fiduciary rules established by the Department of Labor (“DOL”) governing client investments in qualified retirement plans. For its services, PFS Investments receives an upfront commission in connection with the sale, and a trail commission or 12b-1 fee for the continued servicing of the account. PFS Investments markets mutual funds and variable annuities on a brokerage basis. In an advisory relationship, namely our managed investment offerings, PFS Investments and its investment advisory representative have a fiduciary obligation to provide suitable initial recommendations to the client and ongoing monitoring of the client’s investments.

Mutual Funds. In the United States, our licensed sales representatives primarily distribute mutual funds from the following select asset management firms: American Century Investments, American Funds, Franklin Templeton, Invesco, Legg Mason and Pioneer. These firms have diversified product offerings, including domestic and international equity, fixed-income and money market funds. Each firm continually evaluates its fund offerings and adds new funds on a regular basis. Additionally, their product offerings reflect diversified asset classes and varied investment styles. We have selling agreements with a number of other fund companies and we believe that, collectively, these asset management firms provide funds that meet the investment needs of our clients.

During 2017, four of these fund families (Legg Mason, Invesco, American Funds and Franklin Templeton) accounted for approximately 95% of our mutual fund sales in the United States. Legg Mason and Invesco each have large wholesaling teams that support our sales force in distributing their mutual fund products. Our selling agreements with these firms all have indefinite terms and provide for termination at will.

An affiliate of PFS Investments, Primerica Shareholder Services, Inc. (“PSS”), provides transfer agent services to investors who purchase shares of mutual funds offered by American Century Investments, Franklin Templeton, Invesco, or Pioneer Investments through PFS Investments. Beginning in 2018, PSS will also provide transfer agent services to investors who purchase shares of mutual funds offered by Legg Mason. In exchange for these services, PSS receives recordkeeping and account maintenance fees from the applicable fund company. PSS has retained BNY Mellon Asset Servicing to perform the necessary transfer agent services for these accounts on its proprietary SuRPASS system. PFS Investments serves as the Internal Revenue Service (“IRS”) approved non-bank custodian for customers that open individual retirement accounts (“IRA”) (or certain other retirement accounts) with PFS Investments and invest in shares of mutual funds offered by American Century Investments, Franklin Templeton, Invesco, Legg

Mason or Pioneer Investments. For these services, PFS Investments receives an annual custodian fee.

In Canada, our sales representatives offer Primerica-branded Concert™ Series funds, which accounted for approximately 38% of our Canadian mutual fund product sales in 2017. Our Concert™ Series funds consist of six different asset allocation funds with varying investment objectives ranging from fixed income to aggressive growth. Each Concert™ Series fund is a fund of funds that allocates fund assets among equity and income mutual funds of AGF Investments, a leading asset management firm in Canada. The asset allocation within each Concert™ Series fund is determined on an advisory contract basis by Morneau Shepell Asset and Risk Management Ltd. The principal non-proprietary funds that we offer our clients in Canada are funds of AGF Investments, Mackenzie Investments, and Fidelity Investments. Sales of these non-proprietary funds accounted for approximately 54% of mutual fund product sales in Canada in 2017. Like our U.S. fund family list, the asset management partners we have chosen in Canada have a diversified offering of equity, fixed-income and money market funds, including domestic and international funds with a variety of investment styles.

A key part of our investment philosophy for our clients is the long-term benefits of dollar cost averaging through systematic investing. To accomplish this, we assist our clients by facilitating monthly contributions to their investment account by bank draft against their checking accounts. During the year ended December 31, 2017, average client assets held in individual retirement accounts in the United States and Canada accounted for an estimated 74% and 72% of total average client account assets, respectively. Our individual retirement accounts in Canada are considered registered retirement savings plans (“RRSP”). An RRSP is similar to a traditional IRA, in the United States in that contributions are made to the RRSP on a pre-tax basis and income is earned on a tax-deferred basis. Our

high concentration of retirement plan accounts and our systematic savings philosophy are beneficial to us as these accounts tend to have lower redemption rates than the industry and, therefore, generate more recurring asset-based revenues.

Managed Investments. PFS Investments is a registered investment advisor in the United States, and currently offers two managed investments programs: the Freedom Portfolios and the Lifetime Investments Platform. The Freedom Portfolios is a mutual fund wrap fee advisory program with a \$25,000 minimum initial investment offering asset allocation models managed by Lockwood Advisors, a unit of Bank of New York Mellon. Lockwood Advisors has discretionary authority over clients' accounts and provides ongoing investment advice. As a co-sponsor of the program, PFS Investments and its investment advisory representatives provide the initial investment advice and receive part of the advisory fee, which is assessed as a percentage of the value of the assets in the account. During 2017, we closed the Freedom Portfolios to new accounts and we intend to close the Freedom Portfolios to new investments in 2018.

In 2017, PFS Investments launched an expanded managed investments platform called the Primerica Advisors Lifetime Investments Platform. This new platform is a robust advisory offering designed for clients who have at least \$25,000 of investable assets, which significantly expanded our client service capabilities and replaced the Freedom Portfolios product line. It provides our customers access to mutual fund and exchange-traded fund investment models designed and managed by several unaffiliated investment advisers. PFS Investments, as sponsor and portfolio manager of the program, evaluates models for inclusion in the program and conducts ongoing due diligence of the models and unaffiliated investment advisers made available through the program. TD Ameritrade Institutional, an unaffiliated broker-dealer, provides custody, trade execution, clearing, settlement and other services for customer assets invested through Lifetime Investments Platform.

Variable Annuities. Our U.S. licensed sales representatives also distribute variable annuities underwritten and provided by American General Life Insurance Company and its affiliates ("AIG"), AXA Distributors, LLC, Lincoln National Life Insurance Company and its affiliates ("Lincoln National"), and Brighthouse Financial, Inc. ("Brighthouse"). Variable annuities are insurance products that enable our clients to invest in accounts with attributes similar to mutual funds, but also have benefits not found in mutual funds, including death benefits that protect beneficiaries from losses due to a market downturn and income benefits that guarantee future income payments for the life of the policyholder(s). Each of these companies bears the insurance risk on its variable annuities that we distribute.

Segregated Funds. In Canada, we offer segregated fund products, branded as our Common Sense Funds™, that have some of the characteristics of our variable annuity products distributed in the United States. Our Common Sense Funds™ are underwritten by Primerica Life Canada and offer our clients the ability to participate in a diversified managed investments program that can be opened for as little as \$25. While the assets and corresponding liability (reserves) are recognized on our consolidated balance sheets, the assets are held in trust for the benefit of the segregated fund contract owners and are not commingled with the general assets of the Company.

There are two fund products within our segregated funds offerings: the Asset Builder Funds and the Strategic Retirement Income Funds ("SRIF"). The investment objective of Asset Builder Funds is long-term capital appreciation combined with some guarantee of principal. Unlike mutual funds, our Asset Builder Funds product guarantees clients at least 75% of their net contributions (net of withdrawals) at the earlier of the date of their death or at the Asset Builder Funds' maturity date, which is selected by the client. The portfolio consists of both equities and fixed-income securities with the equity component consisting of a pool of primarily large cap Canadian and U.S. equities and the fixed-income component consisting of Canadian federal government zero coupon treasuries and government-backed floating rate notes. The portion of the Asset Builder Funds' portfolio allocated to zero coupon treasuries are held in sufficient quantity to satisfy the guarantees payable at the maturity date of each Asset Builder Fund. As a result, our potential loss exposure is very low as it comes from the guarantees payable upon the death of the client prior to the maturity date.

The investment objective of the SRIF is to provide income during retirement plus the opportunity for modest capital appreciation. The SRIF product guarantees clients 75% of their net contributions (net of withdrawals) at the earlier of the date of their death or age 100. The portfolio consists of both equities and fixed-income securities, with the equities consisting of a pool of primarily large cap Canadian and U.S. equities that are capped at 25% of the portfolio. The balance is a fixed-income portfolio consisting of investment-grade government and corporate bonds. The high quality of the investments and the percentage cap on equities results in a relatively low potential loss exposure. All accounts in the SRIF are held as Registered Retirement Income Funds which carry government-mandated minimum annual withdrawals. Similar to the Asset Builder Funds, our potential exposure for loss associated with the SRIF is very low as its investment allocations are conservatively aligned with the risks of the client contracts.

With the guarantee level at 75% and in light of the time until the scheduled maturity of our segregated funds contracts, we currently do not believe it is necessary to allocate any corporate capital as reserves for segregated fund contract benefits.

Fixed Indexed Annuities. We offer fixed indexed annuity products in the U.S. through Lincoln National, AIG, and Universal Life Insurance Company (“Universal Life”) (Puerto Rico). These products combine safety of principal and guaranteed rates of return with additional investment options tied to equity market indices that allow for returns that move based on the performance of an index. We believe these and other fixed annuity products give both our life and securities representatives more ways to assist our clients with their retirement planning needs.

Fixed Annuities. We sell fixed annuities underwritten by Brighthouse in the U.S. Our current offering includes a fixed premium deferred annuity and a single premium immediate annuity. The fixed premium deferred annuity allows our clients to accumulate savings on a tax deferred basis with safety of principal and a guaranteed rate of return. The single premium immediate annuity provides clients with an immediate income alternative. In Puerto Rico, we currently offer two annuity products: a fixed annuity and a fixed bonus annuity underwritten by Universal Life. These products provide guarantees against loss with several income options.

Investment and Savings Products Revenue. In the United States, we earn revenue from our investment and savings products business in three ways: commissions and payments earned on the sale of such products; fees and payments earned based upon client asset values; and account-based revenue. On the sale of mutual funds (not including managed investments) and annuities, we earn a dealer reallowance or commission on new purchases as well as trail commissions on the assets held in our clients' accounts. We also receive marketing and support fees from most of our mutual fund and annuity providers. These payments are typically a percentage of sales or a percentage of the clients' total asset values, or a combination of both. For investments into the Freedom Portfolios, we receive an asset-based fee from the customer as compensation for advisory services, as well as recordkeeping and account maintenance fees, and marketing and support fees from the mutual funds involved in the program. For investments into Lifetime Investments Platform, we receive an asset-based fee as compensation for the advisory and other services we provide to the program.

As the IRS approved non-bank custodian for the funds noted above, PFS Investments receives annual fees on a per-account basis for as long as it services the account. As explained above, PSS receives recordkeeping and account maintenance fees for the transfer agent services it provides to the five fund families noted in the "Mutual Funds" section above. An individual client account may include multiple fund positions for which we earn recordkeeping fees.

Because the total amount of these fees fluctuates with the number of such accounts and positions within those accounts, the opening or closing of accounts has a direct impact on our revenues. From time to time, the fund companies for whom we provide these services request that accounts or positions with small balances be closed.

In Canada, we earn revenue from the sales of our investment and savings products in two ways: commissions (or dealer reallowance) on mutual fund sales and fees paid based upon clients' asset values (mutual fund trail commissions and advisory fees from segregated funds and Concert™ Series funds). On segregated funds, we also earn deferred sales charges for early withdrawals at an annual declining rate within seven years of an investor's original contribution.

Other Distributed Products

We distribute other products, including prepaid legal services, auto and homeowners' insurance referrals, long-term care insurance, and home automation solutions. In Canada, we also offer mortgage loan referrals and insurance offerings for small businesses. While some of these products are Primerica-branded, all of them are underwritten or otherwise provided by a third party.

We offer our U.S. and Canadian clients a Primerica-branded prepaid legal services program on a subscription basis that is underwritten and provided by LegalShield. The prepaid legal services program offers a network of attorneys in each state, province or territory to assist subscribers with legal matters such as drafting wills, living wills and powers of attorney, trial defense and motor vehicle-related matters. We receive a commission based on our sales of these subscriptions.

We have an arrangement with Answer Financial, Inc. ("Answer Financial"), an independent insurance agency, whereby our U.S. sales representatives refer clients to Answer Financial to receive multiple, competitive auto and homeowners' insurance quotes. Answer Financial's comparative quote process allows clients to easily identify the underwriter that is most competitively priced for their type of risk. We receive commissions based on completed auto and homeowners' placement of insurance and pay our sales representatives a flat referral fee for each completed application.

We have an arrangement with LTCI Partners, LLC (“LTCI Partners”), an independent brokerage general agency specializing in long-term care insurance, whereby our U.S. sales representatives refer clients to LTCI Partners to receive a long-term care insurance quote. Many of these policies are underwritten and provided by Genworth Life Insurance Company and its affiliates and some by various other insurance providers. We receive commissions based on the annualized premium of placed and taken policies.

We have an arrangement with Vivint, Inc. (“Vivint”), a company that offers homeowners in the U.S. and many provinces in Canada a comprehensive suite of products and services to protect and remotely control, monitor and manage their homes using any Internet-connected smart device. We receive commissions based on referrals that result in a subscription to Vivint’s home services and pay our sales representatives a referral fee for each such subscription.

In Canada, we have a referral program for mortgage loan products offered by a third-party lender, B2B Bank. Due to regulatory requirements, our sales representatives in Canada only refer clients to the lender and are not involved in the loan application and closing process. We receive referral fees based on the funded loan amount and, in turn, pay a commission to our sales representatives.

In Canada, we offer insurance products, including supplemental medical and dental, accidental death, and disability, to small businesses. These insurance products are underwritten and provided by The Edge Benefits Inc. and its affiliates. We receive a commission based on our sales of these policies.

Prior to 2015, we offered student life insurance underwritten through NBLIC, which was distributed solely by outside third parties. In 2014, NBLIC ceased the marketing and underwriting of new student life insurance policies. NBLIC continues to administer the existing block of student life business, as well as other closed blocks of insurance that were discontinued several years ago.

Regulation

Our business is subject to extensive laws and governmental regulations, including administrative determinations, court decisions and similar constraints. The purpose of the laws and regulations affecting our business is primarily to protect our clients and other consumers. Many of the laws and regulations to which we are subject are regularly re-examined, and existing or future laws and regulations may become more restrictive or otherwise adversely affect our operations.

Regulatory authorities periodically make inquiries regarding compliance by us and our subsidiaries with insurance, securities and other laws and regulations regarding the conduct of our insurance and securities businesses. At any given time, a number of financial or market conduct examinations of our subsidiaries may be ongoing. We cooperate with such inquiries and take corrective action when warranted.

Regulation of Our Insurance Business. Primerica Life, as a Tennessee-domiciled insurer, is regulated by the Tennessee Department of Commerce and Insurance and is licensed to transact business in the United States (except New York), the District of Columbia and certain U.S. territories. Prior to Primerica Life's re-domestication to Tennessee in December 2017, Primerica Life was a Massachusetts-domiciled life insurance underwriting company. NBLIC, as a New York domestic insurer and a wholly owned subsidiary of Primerica Life, is regulated by the New York State Department of Financial Services ("NYDFS") and is licensed to transact business in all 50 U.S. states, the District of Columbia and the U.S. Virgin Islands.

State insurance laws and regulations regulate all aspects of our U.S. insurance business. Such regulation is vested in state agencies having broad administrative and, in some instances, discretionary power dealing with many aspects of our business, which may include, among other things, premium rates and increases thereto, reserve requirements, marketing practices, advertising, privacy, policy forms, reinsurance reserve requirements, acquisitions, mergers, and capital adequacy.

Our U.S. insurance subsidiaries are required to file certain annual, quarterly and periodic reports with the supervisory agencies in the jurisdictions in which they do business, and their business and accounts are subject to examination by such agencies at any time. These examinations generally are conducted under National Association of Insurance Commissioners ("NAIC") guidelines. Under the rules of these jurisdictions, insurance companies are examined periodically (generally every three to five years) by one or more of the supervisory agencies on behalf of the states in which they do business. Our most recent examinations of the financial condition and affairs of Primerica Life and NBLIC, as well as Peach Re, Inc. ("Peach Re") and Vidalia Re, Inc. ("Vidalia Re"), special purpose financial captive insurance companies and wholly owned subsidiaries of Primerica Life, performed by the respective domiciliary state insurance department at the time of the exams, were completed during 2016 with no material findings or recommendations noted.

Primerica Life Canada is federally incorporated and provincially licensed and is required to file periodic reports with Canadian regulatory agencies. It transacts business in all Canadian provinces and territories. Primerica Life Canada is regulated federally by the Office of the Superintendent of Financial Institutions Canada ("OSFI") and provincially by the Superintendents of Insurance for each province and territory. Canadian federal and provincial insurance laws regulate all aspects of our Canadian insurance business. OSFI regulates insurers' corporate governance, financial and prudential oversight, and regulatory compliance, while provincial and territorial regulators oversee insurers' market conduct practices and related compliance.

Our Canadian insurance subsidiary files quarterly and annual financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”) and other locally accepted standards with OSFI in compliance with legal and regulatory requirements. OSFI conducts periodic detailed examinations of insurers’ business and financial practices, including the control environment, internal and external auditing and minimum capital adequacy, surpluses and related testing, legislative compliance and appointed actuary requirements. These examinations also address regulatory compliance with anti-money laundering practices, outsourcing, related-party transactions, privacy and corporate governance. Provincial regulators conduct periodic market conduct examinations of insurers doing business in their jurisdiction.

In addition to federal and provincial oversight, Primerica Life Canada is also subject to the guidelines set out by the Canadian Life and Health Insurance Association (“CLHIA”). CLHIA is an industry association that works closely with federal and provincial regulators to establish market conduct guidelines and sound business and financial practices addressing matters such as sales representative suitability and screening, insurance illustrations and partially guaranteed savings products.

The laws and regulations governing our U.S. and Canadian insurance businesses include numerous provisions governing the marketplace activities of insurers, including policy filings, payment of insurance commissions, disclosures, advertising, product replacement, sales and underwriting practices and complaints and claims handling. The state insurance regulatory authorities in the United States and the federal and provincial regulators in Canada generally enforce these provisions through periodic market conduct examinations.

In addition, most U.S. states and Canadian provinces and territories, as well as the Canadian federal government, have laws and regulations governing the financial condition of insurers, including standards of solvency, types and concentration of investments,

establishment and maintenance of reserves, reinsurance and requirements of capital adequacy. As discussed previously, U.S. state insurance law and Canadian provincial insurance law also require certain licensing of insurers and their agents.

Insurance Holding Company Regulation; Limitations on Dividends. The states in which our U.S. insurance subsidiaries are domiciled have enacted legislation and adopted regulations regarding insurance holding company systems. These laws require registration of, and periodic reporting by, insurance companies domiciled within the jurisdiction that control, or are controlled by, other corporations or persons so as to constitute an insurance holding company system. These laws also affect the acquisition of control of insurance companies as well as transactions between insurance companies and companies controlling them.

The Parent Company is a holding company that has no significant operations. Our primary asset is the capital stock of our subsidiaries, and our primary liability is \$375.0 million in principal amount of senior unsecured notes (the “Senior Notes”). As a result, we depend on dividends or other distributions from our insurance and other subsidiaries as the principal source of cash to meet our obligations, including the payment of interest on, and repayment of, principal of any debt obligations.

The states in which our U.S. insurance subsidiaries are domiciled impose certain restrictions on our insurance subsidiaries’ ability to pay dividends to us. In Canada, dividends can be paid subject to the paying insurance company’s continuing compliance with regulatory requirements and upon notice to OSFI. We determine the dividend capacity of our insurance subsidiaries using statutory accounting principles (“SAP”) promulgated by the NAIC in the United States and using IFRS in Canada.

The following table sets forth the amount of cash and securities dividends paid or payable by our insurance subsidiaries:

| | Year ended December 31, | | |
|-----------------------|-------------------------|----------|----------|
| | 2017 | 2016 | 2015 |
| | (In thousands) | | |
| Primerica Life | \$138,000 | \$94,700 | \$45,600 |
| Primerica Life Canada | 22,924 | 22,342 | 16,950 |

For additional information on dividend capacity and restrictions, see Note 15 (Statutory Accounting and Dividend Restrictions) to our consolidated financial statements included elsewhere in this report.

Policy and Contract Reserve Sufficiency Analysis. Under the laws and regulations of their jurisdictions of domicile, our U.S. insurance subsidiaries are required to conduct annual analyses of the sufficiency of their life insurance statutory reserves. In addition, other U.S. jurisdictions in which our U.S. subsidiaries are licensed may have certain reserve requirements that differ from those of their domiciliary jurisdictions. In each case, a qualified actuary must submit an opinion that states that the aggregate statutory reserves, when considered in light of the assets held with respect to such reserves, make good and sufficient provision for the associated contractual obligations and related expenses of the insurer. If such an opinion cannot be provided, then the affected insurer must set up additional reserves by moving funds from surplus. Our U.S. insurance subsidiaries most recently submitted these opinions without qualification to applicable insurance regulatory authorities.

Primerica Life Canada is also required to conduct regular analyses of the sufficiency of its life insurance statutory reserves. Life insurance reserving and reporting requirements are completed by Primerica Life Canada’s appointed actuary. Materials provided by the appointed actuary are filed with OSFI as part of our annual filing and are subject to OSFI’s review. Based upon this review, OSFI may institute remedial action against Primerica Life Canada as OSFI deems necessary. Primerica Life Canada has not been subject to any such remediation or enforcement by OSFI.

Surplus and Capital Requirements. U.S. insurance regulators have the discretionary authority, in connection with the ongoing licensing of our U.S. insurance subsidiaries, to limit or prohibit the ability of an insurer to issue new policies if, in the regulators' judgment, the insurer is not maintaining a minimum amount of surplus or is in hazardous financial condition. Insurance regulators may also limit the ability of an insurer to issue new life insurance policies and annuity contracts above an amount based upon the face amount and premiums of policies of a similar type issued in the prior year. We do not believe that the current or anticipated levels of statutory surplus of our U.S. insurance subsidiaries present a material risk that any such regulator would limit the amount of new policies that our U.S. insurance subsidiaries may issue.

The NAIC has established risk-based capital ("RBC") standards for U.S. life insurance companies, as well as a model act to be applied at the state level. The model act provides that life insurance companies must submit an annual RBC report to state regulators reporting their RBC based upon four categories of risk: asset risk, insurance risk, interest rate risk and business risk. For each category, the capital requirement is determined by applying factors to various asset, premium and reserve items, with the factor being higher for those items with greater underlying risk and lower for less risky items. The formula is intended to be used by insurance regulators as an early warning tool to identify possible weakly capitalized companies for purposes of initiating further regulatory action. If an insurer's RBC falls below specified levels, then the insurer would be subject to different degrees of regulatory action depending upon the level. These actions range from requiring the insurer to propose actions to correct the capital deficiency to placing the insurer under regulatory control.

In Canada, OSFI has authority to request an insurer to enter into a prudential agreement implementing measures to maintain or improve the insurer's safety and soundness. OSFI also may issue orders to an insurer directing it to refrain from unsafe or unsound

practices or to take action to remedy financial concerns. OSFI has neither requested that Primerica Life Canada enter into any prudential agreement nor has OSFI issued any order against Primerica Life Canada.

In Canada, OSFI oversees an insurer's minimum capital requirement and determines the sum of capital requirements for five categories of risk: asset default risk, mortality/morbidity/lapse risks, changes in interest rate environment risk, segregated funds risk and foreign exchange risk.

NAIC Pronouncements and Reviews. The NAIC promulgates model insurance laws and regulations for adoption by the states in order to standardize insurance industry accounting and reporting guidance. Although many state regulations emanate from NAIC model statutes and pronouncements, SAPs continue to be established by individual state laws, regulations and permitted practices. Certain changes to NAIC model statutes and pronouncements, particularly as they affect accounting issues, may take effect automatically without affirmative action by a given state. With respect to some financial regulations and guidelines, non-domiciliary states sometimes defer to the interpretation of the insurance department of the state of domicile. However, neither the action of the domiciliary state nor the action of the NAIC is binding on a non-domiciliary state. Accordingly, a non-domiciliary state could choose to follow a different interpretation.

The NAIC has established guidelines to assess the financial strength of insurance companies for U.S. state regulatory purposes. The NAIC conducts annual reviews of the financial data of insurance companies primarily through the application of 12 financial ratios prepared on a statutory basis. The annual statements are submitted to state insurance departments to assist them in monitoring insurance companies in their state.

Statutory Accounting Principles. SAP is a basis of accounting developed by U.S. insurance regulators to monitor and regulate the solvency of insurance companies. In developing SAP, insurance regulators were primarily concerned with evaluating an insurer's ability to pay all of its current and future obligations to policyholders. As a result, statutory accounting focuses on conservatively valuing the assets and liabilities of insurers, generally in accordance with standards specified by the insurer's domiciliary jurisdiction. Uniform statutory accounting practices are established by the NAIC and generally adopted by regulators in the various U.S. jurisdictions. These accounting principles and related regulations determine, among other things, the amounts our insurance subsidiaries may ultimately pay to us as dividends, and they differ in many instances from U.S. generally accepted accounting principles ("U.S. GAAP"), which are designed to measure a business on a going-concern basis. Under U.S. GAAP, certain expenses are capitalized when incurred and then amortized over the life of the associated policies. The valuation of assets and liabilities under U.S. GAAP is based in part upon best estimate assumptions made by the insurer. U.S. GAAP-basis stockholders' equity represents the ownership interest in the U.S. GAAP-measured net assets held by stockholders. As a result, the values for assets, liabilities and equity reflected in financial statements prepared in accordance with U.S. GAAP will be different from those reflected in financial statements prepared under SAP.

State Insurance Guaranty Funds Laws. Under most state insurance guaranty fund laws, insurance companies doing business therein can be assessed up to prescribed limits for policyholder losses incurred by insolvent companies. Most insurance guaranty fund laws currently provide that an assessment may be excused or deferred if it would threaten an insurer's own financial strength. In addition, assessments may be partially offset by credits against future state premium taxes.

Other Regulatory Changes. From time to time, various jurisdictions make changes to the state or provincial licensing examination process that may make it more difficult for our sales representatives to obtain their life insurance licenses. Likewise, FINRA is restructuring its representative-level qualification examination program that marks a conceptual change from FINRA's current securities examination program. The new exam structure is scheduled to go into effect in October 2018. While the objective of the new program is to improve efficiencies, if the changes create barriers to entry that are not relevant to assessing an applicant's competence, the costs significantly increase, or the program is implemented without an adequate period, the restructured program could result in a decrease in the number of registrants obtaining their securities licenses in the United States. For more information, see "Risk Factors."

Regulation of Our Investment and Savings Products Business. PFS Investments is registered with, and regulated by, FINRA and the Securities and Exchange Commission (“SEC”). It is subject to regulation by the Municipal Securities Rulemaking Board (the “MSRB”) with respect to 529 plans, by the DOL with respect to certain retirement plans, and by state securities agencies. PFS Investments operates as an introducing broker-dealer and is registered in all 50 U.S. states and certain territories and with the SEC. As such, it performs a review of investment recommendations made by our representatives in the account opening process, in accordance with FINRA requirements, but it does not hold client accounts.

PFS Investments is required to file monthly reports as well as annual audited financial statements with the SEC pursuant to Section 17 of the Securities Exchange Act of 1934, as amended (“Exchange Act”), and Rule 17a-5 thereunder. As part of filing these reports, PFS Investments is subject to minimum net capital requirements, as mandated by Rule 15c3-1 of the Exchange Act.

The SEC rules and regulations that currently apply to PFS Investments and our registered representatives generally require that we make suitable investment recommendations to our customers and disclose conflicts of interest that might affect the recommendations or advice we provide. The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) gave the SEC the power to impose on broker-dealers a heightened standard of conduct (fiduciary duty) that is currently applicable only to

investment advisors. As required by the Dodd-Frank Act, in January 2011, the SEC staff submitted a report to Congress in which it recommended that the SEC adopt a fiduciary standard of conduct for broker-dealers that is uniform with that of investment advisors. The SEC has announced that it is working on a proposed rule with respect to a uniform standard of conduct.

PFS Investments is also approved as a non-bank custodian under IRS regulations and, in that capacity, may act as a custodian or trustee for certain retirement accounts. Our sales representatives who sell securities products through PFS Investments are required to be registered representatives of PFS Investments. All aspects of PFS Investments' business are regulated, including sales methods and charges, trade practices, the use and safeguarding of customer securities, capital structure, recordkeeping, conduct and supervision of its independent salespeople.

PFS Investments is also an SEC-registered investment advisor and, under the name Primerica Advisors, offers managed investment programs. In most states, our representatives are required to obtain an additional license to offer these programs.

PSS is registered with the SEC as a transfer agent and, accordingly, is subject to SEC rules and examinations. Acting in this capacity, PSS and third-party vendors employed by PSS are responsible for certain client investment account shareholder services.

On April 8, 2016, the DOL published a final regulation ("the DOL Fiduciary Rule"), which more broadly defines the circumstances under which a person or entity may be considered a fiduciary for purposes of the prohibited transaction rules of the Employee Retirement Income Security Act ("ERISA") and the Internal Revenue Code ("IRC"). In connection with the DOL Fiduciary Rule, the DOL also issued new exemptions and amended several existing exemptions. On February 3, 2017, the President of the United States issued a memorandum directing the DOL to review the DOL Fiduciary Rule and the exemptions to determine whether they should be revised or rescinded. The DOL Fiduciary Rule and transitional exemptions became applicable on June 9, 2017, with the final exemptions scheduled to go into effect on July 1, 2019. The period from June 9, 2017 to July 1, 2019 is referred to as the "Transition Period." The DOL has stated that it is conducting the mandated review and will make the determinations directed by the President's memorandum during the Transition Period.

PFSL Investments Canada is a mutual fund dealer registered with and regulated by the Mutual Fund Dealers Association of Canada (the "MFDA"), the national self-regulatory organization for the distribution side for the Canadian mutual fund industry. It is also registered with provincial and territorial securities commissions throughout Canada. As a registered mutual fund dealer, PFSL Investments Canada performs the suitability review of mutual fund investment recommendations, and like our U.S. broker-dealer, it does not hold client accounts.

PFSL Investments Canada is required to file monthly and annual financial statements and reports with the MFDA that are prepared to comply with the prescribed MFDA reporting requirements. The MFDA has established a risk adjusted capital standard for mutual fund dealers. Its formula is designed to provide advance warning of a member encountering difficulties. If a mutual fund dealer falls below specified levels then restrictions would apply until rectified, including not being able to act on certain matters without prior written consent from the MFDA.

PFSL Investments Canada sales representatives are required to be registered in the provinces and territories in which they do business, including regulation by the Autorité des marchés financiers in Quebec, and are also subject to regulation by the MFDA. These regulators have broad administrative powers, including the power to limit or restrict the conduct of our business and impose censures or fines for failure to comply with the law or regulations.

PFSL Fund Management in Canada is registered as an Investment Fund Manager in connection with our Concert™ Series mutual funds and is regulated by provincial securities commissions.

PFSL Fund Management is required to file quarterly and annual financial statements with the Ontario Securities Commission (“OSC”) prepared to meet the requirements of National Instrument 31-103, Registration Requirements, Exemptions and Ongoing Registrant Obligations, based on the financial reporting framework specified in National Instrument 52-107, Acceptable Accounting Principles and Auditing Standards. PFSL Fund Management is required to maintain a minimum level of capital and file its quarterly and annual calculation of excess working capital with the OSC. As an investment fund manager, PFSL Fund Management is required to file periodic reports with provincial and territorial securities commissions throughout Canada for its Concert™ Series mutual funds. Such reports include semi-annual and annual financial statements prepared in accordance with IFRS.

As the segregated funds are separate accounts of Primerica Life Canada, the segregated funds are also regulated by OSFI and included as part of the quarterly and annual financial statement filings for Primerica Life Canada. In addition, the segregated funds are also subject to the guidelines set out by the CLHIA.

Other Laws and Regulations. The USA Patriot Act of 2001 (the “Patriot Act”) contains anti-money laundering and financial transparency laws and mandates the implementation of various regulations applicable to broker-dealers and other financial services companies, including insurance companies. The Patriot Act seeks to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering.

U.S. federal and state laws and regulations require financial institutions, including insurance companies, to protect the security and confidentiality of consumer financial information and to notify consumers about their policies and practices relating to their collection and disclosure of consumer information and their policies relating to protecting the security and confidentiality of that information.

Similarly, federal and state laws and regulations also govern the disclosure and security of consumer health information. In particular, regulations promulgated by the U.S. Department of Health and Human Services regulate the disclosure and use of protected health information by health insurers and others (including certain life insurers), the physical and procedural safeguards employed to protect the security of that information and the electronic storage and transmission of such information. Congress and state legislatures are expected to consider additional legislation relating to privacy and other aspects of consumer information.

The Financial Consumer Agency of Canada (“FCAC”), a Canadian federal regulatory body, is responsible for ensuring that federally regulated financial institutions, which include Primerica Life Canada and PFSL Investments Canada, comply with federal consumer protection laws and regulations, voluntary codes of conduct and their own public commitments. The Financial Transactions and Reports Analysis Centre of Canada (“FINTRAC”) is Canada’s financial intelligence unit. Its mandate includes ensuring that entities subject to the Proceeds of Crime (Money Laundering) and Terrorist Financing Act comply with reporting, recordkeeping and other obligations under that act. We are also subject to privacy laws under the jurisdiction of federal and provincial privacy commissioners, anti-money laundering laws enforced by FINTRAC and OSFI, and the consumer complaints provisions of federal insurance laws under the mandate of the FCAC, which requires insurers to belong to a complaints ombud-service and file a copy of their complaints handling policy with the FCAC.

Segment Financial and Geographic Disclosures

We have two primary operating segments — Term Life Insurance and Investment and Savings Products. The Term Life Insurance segment includes underwriting profits on our in-force book of term life insurance policies, net of reinsurance, which are underwritten by our life insurance company subsidiaries. The Investment and Savings Products segment includes mutual funds, managed investments and annuities distributed through licensed broker-dealer subsidiaries and includes segregated funds, an individual annuity savings product that we underwrite in Canada through Primerica Life Canada. We also have a Corporate and Other Distributed Products segment, which consists of the majority of net investment income earned by our invested asset portfolio, realized gains and losses on invested assets, interest expense on notes payable, redundant reserve financing transactions and our revolving credit facility, and revenues and expenses related to the distribution of non-core products.

See “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations” and Note 3 (Segment and Geographical Information) to our consolidated financial statements included elsewhere in this report for more information concerning our domestic and international operations and our operating segments.

For information on risks relating to our Canadian operations, see “Risk Factors” and “Quantitative and Qualitative Information About Market Risks – Canadian Currency Risk.”

Competition

We operate in a highly competitive environment with respect to the sale of financial products and for retaining our more productive sales representatives. Because we offer several different financial products, we compete directly with a variety of financial institutions, such as insurance companies and brokers, banks, finance companies, credit unions, broker-dealers, mutual fund companies and other financial products and services companies.

Competitors with respect to our term life insurance products consist both of stock and mutual insurance companies, as well as other financial intermediaries. Competitive factors affecting the sale of life insurance products include the level of premium rates, benefit features, risk selection practices, compensation of sales representatives and financial strength ratings from ratings agencies such as A.M. Best.

In offering our securities products, our sales representatives compete with a range of other advisors, broker-dealers and direct channels, including wirehouses, regional broker-dealers, independent broker-dealers, insurers, banks, asset

managers, registered investment advisors, mutual fund companies and other direct distributors. The mutual funds that we offer face competition from other mutual fund families and alternative investment products, such as exchange-traded funds, while our managed investment programs compete with other fee-based advisory services offered by financial services firms. Our annuity products compete with products from numerous other companies. Competitive factors affecting the sale of annuity products include price, product features, investment performance, commission structure, perceived financial strength, claims-paying ratings, service, and distribution capabilities.

Information Technology and Information Security

Primerica has built a sophisticated set of information technology platforms to support our clients, operations and sales force. Located at our main campus in Duluth, Georgia, our data center houses an enterprise-class IBM mainframe that serves as the repository for all client and sales force data and operates as a database server for our distributed environment. This infrastructure also supports a combination of local and remote recovery solutions that are continually tested to ensure the Company can resume business in the event of a disaster. Our business applications, many of which are proprietary, are supported by experienced application developers and data center staff at our main campus. Our information security teams provide internal services that include project consulting, threat assessments and management, application and infrastructure assessments, secure configuration management, and information security administration.

The Company has developed a comprehensive information security risk management program and policies governing privacy and data protection that apply to all business lines and subsidiaries. The Company performs recurring internal and external audits, and has arranged for regular professional penetration tests of our cybersecurity and information security programs. Employees receive regular alerts advising them of the most relevant data security risks as well as privacy-related risks and procedures and they are subject to quarterly phishing tests followed by further training as needed. The reporting of these risks and assessments is ongoing to senior management and to our Board of Directors. In connection with new cybersecurity regulations issued by the NYDFS, we developed a special cybersecurity program for New York licensees that includes information security, compliance training, and incident response planning. As part of the program, we completed a comprehensive cybersecurity risk assessment, which we will update annually.

We adopted a new Incident Response Plan (“Plan”) in August 2016. Under this Plan, our Incident Response Team consists of employees from our information security, legal, compliance, public relations, and business teams. This Plan is designed to help Primerica identify and promptly respond to information security incidents, contain, eradicate and recover from such incidents, notify affected parties and, where appropriate, notify government and regulatory authorities. This plan documents the roles and responsibilities of Primerica personnel and third-party vendors in responding to information security incidents, including when and to whom incidents should be reported based on level of severity. On a semi-annual basis, the team undertakes facilitator-led trainings and simulations of information security incidents. We have also purchased cyber insurance coverage, which became effective in January 2017.

Employees

As of December 31, 2017, we had 1,856 full-time employees in the United States and 248 full-time employees in Canada. In addition, as of December 31, 2017, we had 534 on-call employees in the United States and 80 on-call employees in Canada who provided services on an as-needed hourly basis. None of our employees is a member of any labor union, and we have never experienced any business interruption as a result of any labor disputes.

Available Information

We make available free of charge on our website (www.primerica.com) our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable upon filing such information with, or furnishing it to, the SEC. Information included on our website is not incorporated by reference into this report. The Company’s reports are also available at the SEC’s Public Reference Room at 100 F. Street, NE, Washington, DC 20549, on the SEC’s website at www.sec.gov, or by calling the SEC at 1-800-SEC-0330.

ITEM 1A.RISK FACTORS.

Risks Related to Our Distribution Structure

Our failure to continue to attract new recruits, retain sales representatives or license or maintain the licensing of our sales representatives would materially adversely affect our business, financial condition and results of operations.

New sales representatives provide us with access to new clients, enable us to increase sales and provide the next generation of successful sales representatives. As is typical with distribution businesses, we experience a high rate of turnover among our part-time sales representatives, which requires us to attract, retain and motivate a large number of sales representatives. Recruiting is performed by our current sales representatives, and the effectiveness of recruiting is generally dependent upon our reputation as a provider of a rewarding and potentially lucrative income opportunity, as well as the general competitive and economic environment. Whether recruits are motivated to complete their

training and licensing requirements and commit to selling our products is largely dependent upon the effectiveness of our compensation and promotional programs, as well as the competitiveness of such programs compared with other companies, including other part-time business opportunities and our recruits' desire to help middle-income families in their communities become educated about their finances and assist them in identifying products that provide income protection and savings opportunities.

If our new business opportunities and products do not generate sufficient interest to attract new recruits, motivate them to become licensed sales representatives and maintain their licenses, and incentivize them to sell our products and recruit other new sales representatives, our business would be materially adversely affected.

Certain key RVPs have large sales organizations that include thousands of sales representatives. These key RVPs are responsible for attracting, motivating, supporting and assisting the sales representatives in their sales organizations. The loss of one or more key RVPs together with a substantial number of their sales representatives for any reason could materially adversely affect our financial results and could impair our ability to attract new sales representatives.

Furthermore, if we or any other businesses with a similar distribution structure engage in practices resulting in increased negative public attention for our business model, the resulting reputational challenges could adversely affect our ability to attract new recruits. Companies such as ours that use independent agents to sell directly to customers can be the subject of negative commentary on

website postings, social media and other non-traditional media. This negative commentary can spread inaccurate or incomplete information about distribution companies in general or our company in particular, which can make our recruiting more difficult.

From time to time, various jurisdictions make changes to the state or provincial licensing examination process that may make it more difficult for our sales representatives to obtain their life insurance licenses. Likewise, FINRA has announced a restructuring of its representative-level qualification examination program set for implementation in October 2018 that marks a conceptual change from FINRA's current securities examination program. While the objective of the new program is to improve efficiencies, if the changes create barriers to entry that are not relevant to assessing an applicant's competence, the costs significantly increase, or the program is implemented without adequate transitions, the restructured program could result in a decrease in the number of registrants obtaining their securities licenses in the United States.

There are a number of laws and regulations that could apply to our distribution model, which could require us to modify our distribution structure.

In the past, certain distribution models that use independent agents to sell directly to customers have been subject to challenge under various laws, including laws relating to business opportunities, franchising and unfair or deceptive trade practices.

In general, state business opportunity and franchise laws in the United States prohibit sales of business opportunities or franchises unless the seller provides potential purchasers with a pre-sale disclosure document that has first been filed with a designated state agency and grants purchasers certain legal recourse against sellers of business opportunities and franchises. Certain Canadian provinces have enacted legislation dealing with franchising, which typically requires mandatory disclosure to prospective franchisees.

We have not been, and are not currently, subject to business opportunity laws because the amounts paid by our new representatives to us: (i) are less than the minimum thresholds set by many state and provincial statutes and (ii) are not fees paid for the right to participate in a business, but rather are for bona fide expenses such as state and provincial-required insurance examinations and pre-licensing training. We have not been, and are not currently, subject to franchise laws for similar reasons. However, there is a risk that a governmental agency or court could disagree with our assessment or that these laws and regulations could change. In addition, although we do not believe that the Federal Trade Commission ("FTC")'s Business Opportunity Rule applies to our company, it could be interpreted in a manner inconsistent with our interpretation. Becoming subject to business opportunity or franchise laws or regulations could require us to provide additional disclosures and regulate the manner in which we recruit our sales representatives that may increase the expense of, or adversely impact our recruitment of new sales representatives.

There are various laws and regulations that prohibit fraudulent or deceptive schemes known as pyramid schemes. In general, a pyramid scheme is defined as an arrangement in which new participants are required to pay a fee to participate in the organization and then receive compensation primarily for recruiting other persons to participate, either directly or through sales of goods or services that are merely disguised payments for recruiting others. The application of these laws and regulations to a given set of business practices is inherently fact-based and, therefore, is subject to interpretation by applicable enforcement authorities. Our sales representatives are paid commissions and other remuneration based on sales of our products and services to bona fide purchasers, and for this and other reasons we do not believe that we are subject to laws regulating pyramid schemes. Moreover, our sales representatives are not required to purchase any of the products marketed by us. However, even though we believe that our distribution practices are currently in compliance with, or exempt from, these laws and regulations, there is a risk that a governmental agency or court could disagree with our assessment or that these laws and regulations could change, which could require us to restructure our operations in certain jurisdictions or result in other costs or fines.

There are also federal, state and provincial laws of general application, such as the Federal Trade Commission Act (the “FTC Act”), and state or provincial unfair and deceptive trade practices laws that could potentially be invoked to challenge aspects of our recruiting of sales representatives. In particular, our recruiting efforts include promotional materials for recruits that describe the potential business opportunity available to them if they join our sales force. These materials, as well as our other recruiting efforts and those of our sales representatives, are subject to scrutiny by the FTC and state and provincial enforcement authorities with respect to misleading statements, including misleading earnings or lifestyle claims made to encourage potential new recruits to join our sales force. If claims made by us or by our sales representatives are deemed to be unfair, deceptive, or misleading, it could result in violations of the FTC Act or similar state and provincial statutes prohibiting unfair or deceptive trade practices or result in reputational harm.

Being subject to, or out of compliance with, the aforementioned laws and regulations could require us to change our distribution structure, which could materially adversely affect our business, financial condition and results of operations.

There may be adverse tax, legal or financial consequences if the independent contractor status of our sales representatives is overturned.

Our sales representatives are independent contractors who operate their own businesses. In the past, we have been successful in defending our company in various contexts before courts and governmental agencies against claims that our sales representatives should be treated like employees. Although we believe that we have properly classified our representatives as independent contractors, there is nevertheless a risk that the IRS, the Canada Revenue Agency, a court or other authority will take a different view.

Furthermore, the tests governing the determination of whether an individual is considered to be an independent contractor or an employee are typically fact-sensitive and vary from jurisdiction to jurisdiction. Laws and regulations that govern the status and misclassification of independent sales representatives are subject to change or interpretation.

The classification of workers as independent contractors has been the subject of federal, state and provincial legislative and regulatory interest over the last several years, with proposals being made that call for greater scrutiny of independent contractor classifications and greater penalties for companies who wrongly classify workers as independent contractors instead of employees. We cannot predict the outcome of these legislative and regulatory efforts.

If there is an adverse determination with respect to the classification of some or all of our independent contractors by a court or governmental agency, we could incur significant costs in complying with such laws and regulations, including in respect of tax withholding, social security payments, retirement plan contributions and recordkeeping, employee benefits, payment of wages or modification of our business model, any of which could have a material adverse effect on our business, financial condition and results of operations. In addition, there is the risk that we may be subject to significant monetary liabilities arising from fines or judgments as a result of any such actual or alleged non-compliance with federal, state, or provincial laws.

The Company's or its independent sales representatives' violation of, or non-compliance with, laws and regulations and related claims and proceedings could expose us to material liabilities.

Extensive federal, state, provincial and territorial laws regulate our product offerings and our relationships with our clients, imposing certain requirements that our sales representatives must follow. At any given time, we may have pending state, federal or provincial examinations or inquiries of our investment and savings products and insurance businesses. In addition to imposing requirements that sales representatives must follow in their dealings with clients, these laws and regulations generally require us to maintain a system of supervision reasonably designed to ensure that our sales representatives comply with the requirements to which they are subject. We have policies and procedures to comply with these laws and regulations. However, despite these compliance and supervisory efforts, the breadth of our operations and the broad regulatory requirements could result in oversight failures and instances of non-compliance or misconduct on the part of our sales representatives.

From time to time, we are subject to private litigation as a result of alleged misconduct by our sales representatives. Examples include claims that a sales representative's failure to disclose underwriting-related information regarding the insured on an insurance application resulted in the denial of a life insurance policy claim, and with respect to investment and savings products sales, errors or omissions that a sales representative made in connection with the purchase or sale of a securities product. Non-compliance with laws or regulations by our sales representatives could result in adverse findings in either examinations or litigation and could subject us to sanctions, monetary liabilities, restrictions on or the loss of the operation of our business, or reputational harm, any of which could have a material adverse effect on our business, financial condition and results of operations.

Any failure to protect the confidentiality of client information could adversely affect our reputation and have a material adverse effect on our business, financial condition and results of operations.

Pursuant to federal, state and provincial laws, various government agencies have established rules protecting the privacy and security of personal information, which vary significantly from jurisdiction to jurisdiction. Many of our sales representatives, employees, and third-party service providers have access to, and routinely process, personal information of clients on paper and on personal and company-owned hardware, the Cloud and mobile devices through a variety of media, including the Internet and software applications. We rely on various internal processes and controls to protect the confidentiality of client information that is accessible to, or in the possession of, our company, our employees and our sales representatives. If a sales representative, employee, or third-party service provider intentionally or unintentionally discloses or misappropriates confidential client information or our data is the subject

of a cybersecurity attack, or if we fail to maintain adequate internal controls or our sales representatives, employees, or service providers fail to comply with our policies and procedures, misappropriation or intentional or unintentional inappropriate disclosure or misuse of client information could occur. Such internal control inadequacies or non-compliance could materially damage our reputation or lead to civil or criminal penalties, which, in turn, could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to Our Insurance Business and Reinsurance

We may face significant losses if our actual experience differs from our expectations regarding mortality or persistency.

We set prices for life insurance policies based upon expected claim payment patterns derived from assumptions we make about the mortality rates, or likelihood of death, of our policyholders in any given year. The long-term profitability of these products depends upon how our actual mortality rates compare to our pricing assumptions. For example, if mortality rates are higher than those assumed in our pricing assumptions, we could be required to make more death benefit payments under our life insurance policies or to make such payments sooner than we had projected, which may decrease the profitability of our term life insurance products and result in an increase in the cost of our subsequent reinsurance transactions.

The prices and expected future profitability of our life insurance products are also based, in part, upon assumptions related to persistency. Actual persistency that is lower than our persistency assumptions could have an adverse effect on profitability, especially

in the early years of a policy, primarily because we would be required to accelerate the amortization of expenses we deferred in connection with the acquisition of the policy. Actual persistency that is higher than our persistency assumptions could have an adverse effect on profitability in the later years of a block of policies because the anticipated claims experience is higher in these later years. If actual persistency is significantly different from that assumed in our pricing assumptions, our reserves for future policy benefits may prove to be inadequate. We are precluded from adjusting premiums on our in-force business during the initial term of the policies, and our ability to adjust premiums on in-force business after the initial policy term is limited to the maximum premium rates in the policy.

Our assumptions and estimates regarding mortality and persistency require us to make numerous judgments and, therefore, are inherently uncertain. We cannot determine with precision the actual persistency or ultimate amounts that we will pay for actual claim payments on a block of policies, the timing of those payments, or whether the assets supporting these contingent future payment obligations will increase to the levels we estimate before payment of claims. If we conclude that our future policy benefit reserves, together with future premiums, are insufficient to cover actual or expected claims payments and the scheduled amortization of our deferred policy acquisition costs ("DAC"), we would be required to first accelerate our amortization of DAC and then increase our future policy benefit reserves in the period in which we make the determination, which could materially adversely affect our business, financial condition and results of operations.

The occurrence of a catastrophic event could materially adversely affect our business, financial condition and results of operations.

Our insurance operations are exposed to the risk of catastrophic events, which could cause a large number of premature deaths of our insureds. A catastrophic event could also cause significant volatility in global financial markets and disrupt the economy. Although we have ceded a significant majority of our mortality risk to reinsurers, a catastrophic event could cause a material adverse effect on our business, financial condition and results of operations. Claims resulting from a catastrophic event could cause substantial volatility in our financial results for any quarter or year and could also materially harm the financial condition of our reinsurers, which would increase the probability of default on reinsurance recoveries. Our ability to write new business could also be adversely affected.

In addition, most of the jurisdictions in which our insurance subsidiaries are licensed to transact business require life insurers to participate in guaranty associations, which raise funds to pay contractual benefits owed pursuant to insurance policies issued by impaired, insolvent or failed issuers. It is possible that a catastrophic event could require extraordinary assessments on our insurance companies, which could have a material adverse effect on our business, financial condition and results of operations.

Our insurance business is highly regulated, and statutory and regulatory changes may materially adversely affect our business, financial condition and results of operations.

Life insurance statutes and regulations are generally designed to protect the interests of the public and policyholders. Those interests may conflict with the interests of our stockholders. Currently, in the United States, the power to regulate insurance resides almost exclusively with the states. The laws of the various U.S. jurisdictions grant state insurance regulators broad powers to regulate almost all aspects of our insurance business. Much of this state regulation follows model statutes or regulations developed or amended by the NAIC, which is composed of the insurance commissioners of each U.S. jurisdiction. The NAIC re-examines and amends existing model laws and regulations (including holding company regulations) in addition to determining whether new ones are needed.

The Dodd-Frank Act created the Federal Insurance Office and authorized it to, among other things, study methods to modernize and improve insurance regulation. We cannot predict with certainty whether, or in what form, reforms will be enacted and, if so, whether the enacted reforms will materially affect our business. Changes in federal statutes, including the Gramm-Leach-Bliley Act and the McCarran-Ferguson Act, financial services regulation and federal

taxation, in addition to changes to state statutes and regulations, may be more restrictive than current requirements or may result in higher costs, and could materially adversely affect our business, financial condition and results of operations.

Federal and provincial insurance laws regulate all aspects of our Canadian insurance business. Changes to federal or provincial statutes and regulations may be more restrictive than current requirements or may result in higher costs, which could materially adversely affect our business, financial condition and results of operations. If OSFI determines that our corporate actions do not comply with applicable Canadian law, Primerica Life Canada could face sanctions or fines, and Primerica Life Canada could be subject to increased capital requirements or other requirements deemed appropriate by OSFI.

We received approval from the Minister of Finance (Canada) under the Insurance Companies Act (Canada) in connection with our indirect acquisition of Primerica Life Canada. The Minister expects that a person controlling a federal insurance company will provide ongoing financial, managerial or operational support to its subsidiary should such support prove necessary, and has required us to sign a support principle letter to that effect. This ongoing support may take the form of additional capital, the provision of managerial expertise or the provision of support in such areas as risk management, internal control systems and training. However, the letter does not create a legal obligation on the part of the person to provide the support. In the event that OSFI determines Primerica Life Canada is not receiving adequate support from the Parent Company under applicable Canadian law, Primerica Life Canada may be subject to increased capital requirements or other requirements deemed appropriate by OSFI.

If there were to be extraordinary changes to statutory or regulatory requirements in the United States or Canada, we may be unable to fully comply with or maintain all required insurance licenses and approvals. Regulatory authorities have relatively broad discretion to

grant, renew and revoke licenses and approvals. If we do not have all requisite licenses and approvals, or do not comply with applicable statutory and regulatory requirements, the regulatory authorities could preclude or temporarily suspend us from carrying on some or all of our insurance activities or impose fines or penalties on us, which could materially adversely affect our business, financial condition and results of operations. We cannot predict with certainty the effect any proposed or future legislation or regulatory initiatives may have on the conduct of our business.

A decline in the regulatory capital ratios of our insurance subsidiaries could result in increased scrutiny by insurance regulators and ratings agencies and have a material adverse effect on our business, financial condition and results of operations.

Each of our U.S. insurance subsidiaries is subject to RBC standards (imposed under the laws of its respective jurisdiction of domicile). The RBC formula for U.S. life insurance companies generally establishes capital requirements relating to asset, insurance, interest rate and business risks. Our U.S. insurance subsidiaries are required to report their results of RBC calculations annually to the applicable state department of insurance and the NAIC. Our Canadian life insurance subsidiary is subject to minimum continuing capital and surplus requirements (“MCCSR”), and Tier 1 capital ratio requirements, and is required to provide its MCCSR and Tier 1 capital ratio calculations to the Canadian regulators. Beginning in 2018, the Life Insurance Capital Adequacy Test Guideline (“LICAT”) has replaced the MCCSR guidelines. The capitalization of our insurance subsidiaries is maintained at levels in excess of the effective minimum requirements of the NAIC in the United States and OSFI in Canada. In any particular year, statutory capital and surplus amounts and RBC and LICAT ratios may increase or decrease depending on a variety of factors, including the amount of statutory income or losses generated by our insurance subsidiaries, the amount of additional capital our insurance subsidiaries must hold to support business growth, changes in their reserve requirements, the value of securities in their investment portfolios, the credit ratings of investments held in their portfolios, changes in interest rates, credit market volatility, changes in consumer behavior, as well as changes to the NAIC's RBC formula or the LICAT calculation of OSFI. Many of these factors are outside of our control.

Our financial strength and credit ratings are significantly influenced by the statutory surplus amounts and RBC and LICAT ratios of our insurance company subsidiaries. Ratings agencies may change their internal models, effectively increasing or decreasing the amount of statutory capital our insurance subsidiaries must hold to maintain their current ratings. In addition, recently enacted tax reform in the United States could lower our RBC ratio, which could adversely affect the ratings agencies’ assessment of the financial strength of our insurance subsidiaries. Ratings agencies also may downgrade the ratings of securities held in our insurance subsidiaries’ portfolios, which could result in a reduction of our insurance subsidiaries’ statutory capital and surplus and RBC. There is no assurance that our insurance subsidiaries will not need additional capital or, if needed, that we will be able to provide it to maintain the targeted RBC and LICAT levels to support their business operations.

The failure of any of our insurance subsidiaries to meet its applicable RBC and LICAT requirements or minimum capital and surplus requirements could subject it to further examination or corrective action imposed by insurance regulators, including limitations on its ability to write additional business, supervision by regulators or seizure or liquidation. Any corrective action imposed could have a material adverse effect on our business, financial condition and results of operations. A decline in RBC or LICAT also limits the ability of our insurance subsidiaries to pay dividends or make distributions and could be a factor in causing ratings agencies to downgrade the financial strength ratings of all our insurance subsidiaries. Such downgrades would have an adverse effect on our ability to write new insurance policies and, therefore, could have a material adverse effect on our business, financial condition and results of operations.

A significant ratings downgrade by a ratings organization could materially adversely affect our business, financial condition and results of operations.

Each of our insurance subsidiaries, with the exception of Peach Re and Vidalia Re, has been assigned a financial strength rating by A.M. Best. Primerica Life currently also has an insurer financial strength rating from each of Standard & Poor's and Moody's.

The financial strength ratings of our insurance subsidiaries are subject to periodic review using, among other things, the ratings agencies' proprietary capital adequacy models, and are subject to revision or withdrawal at any time. Insurance financial strength ratings are directed toward the concerns of policyholders and are not intended for the protection of stockholders or as a recommendation to buy, hold or sell securities. Our financial strength ratings will affect our competitive position relative to other insurance companies. If the financial strength ratings of our insurance subsidiaries fall below certain levels, some of our policyholders may move their business to our competitors. In addition, the models used by ratings agencies to determine financial strength are different from the capital requirements set by insurance regulators.

Ratings organizations review the financial performance and financial conditions of insurance companies, and provide opinions regarding financial strength, operating performance and ability to meet obligations to policyholders. A significant downgrade in the financial strength ratings of any of our insurance subsidiaries, or the announced potential for a downgrade, could have a material adverse effect on our business, financial condition and results of operations by, among other things:

- reducing sales of insurance products;
- adversely affecting our relationships with our sales representatives;
- materially increasing the amount of policy cancellations by our policyholders;
- requiring us to reduce prices to remain competitive; and
- adversely affecting our ability to obtain reinsurance at reasonable prices or at all.

If the rating agencies or regulators change their approach to financial strength ratings and statutory capital requirements, we may need to take action to maintain current ratings and capital adequacy ratios, which could have a material adverse effect on our business, financial condition and results of operations.

In addition to financial strength ratings of our insurance subsidiaries, the Parent Company currently has investment grade credit ratings from Standard & Poor's, Moody's, and A.M. Best. These ratings are indicators of a debt issuer's ability to meet the terms of debt obligations and are important factors in its ability to access liquidity in the debt markets. A rating downgrade by a rating agency can occur at any time if the rating agency perceives an adverse change in our financial condition, results of operations or ability to service debt. If such a downgrade occurs, it could have a material adverse effect on our financial condition and results of operations in many ways, including adversely limiting our access to capital in the unsecured debt market and potentially increasing the cost of such debt.

The failure by any of our reinsurers or reserve financing counterparties to perform its obligations to us could have a material adverse effect on our business, financial condition and results of operations.

We extensively use reinsurance in the United States to diversify our risk and to manage our loss exposure to mortality risk. Reinsurance does not relieve us of our direct liability to our policyholders, even when the reinsurer is liable to us. We, as the insurer, are required to pay the full amount of death benefits even in circumstances where we are entitled to receive payments from the reinsurer. Due to factors such as insolvency, adverse underwriting results or inadequate investment returns, our reinsurers may not be able to pay the amounts they owe us on a timely basis or at all. Further, reinsurers might refuse or fail to pay losses that we cede to them or might delay payment. Since death benefit claims may be paid long after a policy is issued, we bear credit risk with respect to our reinsurers. The creditworthiness of our reinsurers may change before we can recover amounts to which we are entitled. Any such failure to pay by our reinsurers could have a material adverse effect on our business, financial condition and results of operations.

We also have in place coinsurance agreements that we originally entered into at the time of our IPO, pursuant to which we ceded between 80% and 90% of the risks and rewards of our term life insurance policies that were in force at year-end 2009. Under this arrangement, our existing reinsurance agreements remain in place. Each coinsurer entered into trust agreements with our respective insurance subsidiaries and a trustee pursuant to which the coinsurer placed assets (primarily treasury and fixed-income securities) in trust for such subsidiary's benefit to secure the coinsurer's obligations to such subsidiary. Each such coinsurance agreement requires each coinsurer to maintain assets in trust, which amount will not be less than the amount of the reserves for the coinsured liabilities. In Canada, the IPO reinsurer must hold pledged assets in a Canadian financial institution, not affiliated with the IPO reinsurer, with our Canadian insurance company having an enforceable security interest that has priority over any other security interest for the pledged assets. Furthermore, our insurance subsidiaries have the right to recapture the business upon the occurrence of an event of default under their respective coinsurance agreement subject to any applicable cure periods. While any such recapture would be at no cost to us, such recapture would result in a substantial increase in our insurance exposure and require us to be fully responsible for the management of the assets set aside to support statutory reserves. The type of assets we might obtain as a result of a recapture may not be as liquid as our current invested asset portfolio and could result in an unfavorable impact on our risk profile.

There can be no assurance that the relevant coinsurer will pay the coinsurance obligations owed to us now or in the future or that it will pay these obligations on a timely basis. If any of the coinsurers becomes insolvent, the trust account to support the obligations of such coinsurer is insufficient to pay such coinsurer's obligations to us and we fail to enforce our right to recapture the business, it could have a material adverse effect on our business, financial condition and results of operations.

We have entered into transactions by which we finance redundant statutory reserves of certain issue years of our Term Life business. Under these transactions, we pay a fee to financial counterparties for their commitment to support redundant reserves and provide corresponding statutory reinsurance credit, allowing us to more efficiently manage our capital. While we monitor the credit quality and financial strength of these counterparties, if their financial strength

was significantly impaired to the extent that their support of our redundant reserves could no longer be relied upon, it could have a material adverse effect on our business, financial condition, and results of operations.

Risks Related to Our Investments and Savings Products Business

Our Investment and Savings Products segment is heavily dependent on mutual fund and annuity products offered by a relatively small number of companies, and, if these products fail to remain competitive with other investment options or we lose our relationship with one or more of these companies, our business, financial condition and results of operations may be materially adversely affected.

We earn a significant portion of our earnings through our relationships with a small group of mutual fund and annuity companies. A decision by one or more of these companies to alter or discontinue their current arrangements or product offerings with us, or a change in law or regulation that compels us to alter or discontinue such arrangements, could materially adversely affect our business, financial condition and results of operations. If any of our investment and savings products fail to achieve satisfactory investment performance, our clients may seek higher yielding alternative investment products, and we could experience higher redemption rates. In addition, we earn a growing portion of our earnings through our asset-based advisory platform. A mix shift of new investments to our advisory platform could materially impact cash flows to our business, financial condition and results of operations.

In recent years there has been an increase in the popularity of alternative investments such as exchange traded funds (ETFs), which we do not currently offer on our brokerage platform, but which are available indirectly to our clients on our advisory platform. These investment options typically have low fee structures and provide some of the attributes of mutual funds, such as risk diversification. If these products continue to gain traction among our client base as viable alternatives to mutual fund investments, or if other product innovations not offered by us gain traction, our investment and savings products revenues could decline.

In addition to sales commissions and asset-based compensation, a portion of our earnings from investment and savings products comes from recordkeeping services that we provide to mutual fund companies and from fees earned for custodial services that we provide to clients with retirement plan accounts in the funds of these mutual fund companies. We also receive marketing and support fees from each of these mutual fund companies. A decision by one or more of these fund companies to alter or discontinue their current arrangements with us, or a change in law or regulation that compels us to alter or discontinue such arrangements, would materially adversely affect our business, financial condition and results of operations.

The Company's or its securities-licensed sales representatives' violations of, or non-compliance with, laws and regulations could expose us to material liabilities.

Our subsidiary broker-dealer and registered investment advisor, PFS Investments, and its sales representatives, are subject to federal and state regulation of its securities business. These regulations cover sales practices, trade suitability, supervision of registered representatives, recordkeeping, the conduct and qualification of officers and employees, net capital requirements, business operations, the rules and regulations of the MSRB and state blue sky regulation. Investment advisory representatives are generally held to a higher standard of conduct than registered representatives. Our subsidiary, PSS, is a registered transfer agent engaged in the recordkeeping business and is subject to SEC regulation. Violations of laws or regulations applicable to the activities of PFS Investments or PSS, or violations by a third party with which PFS Investments or PSS contracts, could subject us to disciplinary actions and litigation and could result in the imposition of cease and desist orders, fines or censures, restitution to clients, suspension or revocation of SEC registration, suspension or expulsion from FINRA, reputational damage and legal expense, any of which could materially adversely affect our business, financial condition and results of operations.

Our Canadian broker-dealer subsidiary, PFSL Investments Canada and its sales representatives are subject to the securities laws of the provinces and territories of Canada in which we sell our mutual fund products and to the rules of the MFDA, the self-regulatory organization governing mutual fund dealers. PFSL Investments Canada is subject to periodic review by both the MFDA and the provincial and territorial securities commissions to assess its compliance with, among other things, applicable capital requirements and sales practices and procedures. These regulators have broad administrative powers, including the power to limit or restrict the conduct of our business for failure to comply with applicable laws or regulations. Possible sanctions that could be imposed include the suspension of individual sales representatives, limitations on the activities in which the dealer may engage, suspension or revocation of the dealer registration, the ability to withhold licenses or to impose restrictive terms and conditions on the licenses of sales representatives, censure or fines, any of which could materially adversely affect our business, financial condition and results of operations.

If heightened standards of conduct or more stringent licensing requirements, such as those proposed by the SEC and those adopted by the DOL, are imposed on us or our sales representatives, or selling compensation is reduced as a result of new legislation or regulations, it could have a material adverse effect on our business, financial condition and results of operations.

Our U.S. sales representatives are subject to federal and state regulation as well as state licensing requirements. PFS Investments, which is regulated as a broker-dealer, and our U.S. sales representatives are currently subject to general anti-fraud limitations under the Exchange Act and SEC rules and regulations, as well as other conduct standards prescribed by FINRA. These standards generally require that broker-dealers and their sales representatives disclose

conflicts of interest that might affect the advice or recommendations they provide and require them to make suitable investment recommendations to their customers. In January 2011 under the authority of the Dodd-Frank Act, which gives the SEC the power to impose on broker-dealers a heightened standard of conduct that is currently applicable only to investment advisers, the SEC recommended to Congress that the SEC adopt a fiduciary standard of conduct for broker-dealers that is uniform with that of investment advisors. The SEC has announced that it has begun work on such a rule proposal (the “SEC Rule”).

On April 8, 2016, the DOL published a final rule (the “DOL Fiduciary Rule”), which more broadly defines the circumstances under which a person or entity may be considered a fiduciary for purposes of the prohibited transaction rules of the ERISA and IRC Section 4975. Simultaneously with publication of the DOL Fiduciary Rule, the DOL issued new, and amended existing, exemptions intended, among other things, to allow advisers and their firms to continue to receive common forms of compensation that would otherwise be prohibited due to the DOL Fiduciary Rule. On February 3, 2017, the President of the United States issued a memorandum directing the DOL to review the DOL Fiduciary Rule to determine, based on certain factors, whether the rule should be revised or rescinded. The DOL Fiduciary Rule and transitional exemptions became applicable on June 9, 2017, with the final exemptions scheduled to go into effect at the end of the Transition Period on July 1, 2019. The DOL has stated that it is conducting the review and will make the determinations directed by the President’s memorandum during the Transition Period.

If the DOL Fiduciary Rule, including the final exemptions, were to become applicable in its current form, we believe that certain changes to our qualified plan business would be necessary in order for us to continue to help investors save for retirement. Because of

the uncertainty of the status of the DOL Fiduciary Rule or an SEC Rule, and because of the unsettled nature of the Transition Period, we have not determined the extent to which we would make necessitated compensation, product or other changes to our qualified investment and savings plan business, nor whether we would make such changes consistent across our non-qualified investment and savings business. While we have incurred, and would expect to continue to incur, increased costs associated with the DOL Fiduciary Rule, we cannot quantify the collective impact of those costs and other changes on the Company. Changes resulting from the DOL Fiduciary Rule or an SEC Rule could make it more difficult for us and our sales representatives to profitably serve the middle-income market, which could materially adversely affect our business, financial condition, and results of operations.

Heightened standards of conduct as a result of either of the above items or another similar proposed rule or regulation could also increase the compliance and regulatory burdens on our representatives, and could lead to increased litigation and regulatory risks, changes to our business model, a decrease in the number of our securities-licensed representatives and a reduction in the products we offer to our clients, any of which could have a material adverse effect on our business, financial condition and results of operations.

If our suitability policies and procedures, or our policies and procedures for compliance with the DOL Fiduciary Rule, were deemed inadequate, it could have a material adverse effect on our business, financial condition and results of operations.

We review the account applications that we receive for our investment and savings products for suitability and, in the case of certain applications for retirement products, for compliance with the DOL Fiduciary Rule. While we believe that the policies and procedures we implement to help our sales representatives assist clients in making appropriate and suitable investment choices, and in some cases choices that will satisfy the DOL Fiduciary Rule requirements and exemptions, are reasonably designed to achieve compliance with applicable securities laws and regulations, it is possible that the SEC, FINRA, the DOL, the IRS, state securities and insurance regulators or MFDA may not agree. Further, we could be subject to regulatory actions or private litigation, which could materially adversely affect our business, financial condition and results of operations.

Our sales force support tools may fail to appropriately identify financial needs or suitable investment products.

Our support tools are designed to educate potential and existing clients, help identify their financial needs, generally introduce the potential benefits of our product offerings, and identify suitable investment products. The assumptions and methods of analyses embedded in our support tools could be challenged and subject us to regulatory action by the SEC, the DOL, FINRA or other regulators, or private litigation, which could materially adversely affect our business, financial condition and results of operations.

Non-compliance with applicable regulations could lead to revocation of our subsidiary's status as a non-bank custodian.

PFS Investments is a non-bank custodian of retirement accounts, as permitted under Treasury Regulation 1.408-2. A non-bank custodian is an entity that is not a bank and that is permitted by the IRS to act as a custodian for retirement plan account assets of our clients. The IRS retains authority to revoke or suspend that status if it finds that PFS Investments is unwilling or unable to administer retirement accounts in a manner consistent with the requirements of the applicable regulations. Revocation of PFS Investments' non-bank custodian status would affect its ability to earn revenue for providing such services and, consequently, could materially adversely affect our business, financial condition and results of operations.

As our securities sales increase, we become more sensitive to performance of the equity markets.

A significant portion of our investment sales and assets under management are comprised of North American equity-based products. The multi-year growth in equity valuations has increased proportionally the Company's revenue

and product income derived from the sale of these products. A significant correction in the North American equity markets that decreases the company's assets under management, or a protracted long-term downturn in equity market performance that has a negative effect on the Company's sales of securities products, could have an adverse effect on our business, financial condition and results of operations.

Other Risks Related to Our Business

If one of our significant information technology systems fails, if its security is compromised, or if the Internet becomes disabled or unavailable, our business, financial condition and results of operations may be materially adversely affected.

Our business is highly dependent upon the effective operation of our information technology systems and third-party technology systems, networks and clouds to record, process, transmit and store information, including sensitive customer and proprietary information. We rely on these systems throughout our business for a variety of functions including to conduct many of our business activities and transactions with our customers, representatives, vendors and other third parties, to prepare our financial statements and to communicate with our Board of Directors. Our information technology systems and applications run a variety of third-party and proprietary software, including POL (our secure intranet website designed to be a support system for our sales force), the Primerica App, our insurance administration system, Virtual Base Shop (our secure intranet-based paperless field office management system for RVPs), TurboApps (our point-of-sale tool that streamlines the application process for our insurance product), our FNA tool, our licensing decision and support system, and our compensation system. Our business also relies on the use by employees, representatives and other third parties of electronic mobile devices, such as laptops, tablets and smartphones, which are particularly vulnerable to loss and theft.

Maintaining the integrity of these systems and networks is critical to the success of our business operations, including the retention of our representatives and customers, and to the protection of our proprietary information and our customers' confidential and personal information. We could experience a failure of one or more of these systems or could fail to complete all necessary data reconciliation or other conversion controls when implementing new software systems. In addition, despite the implementation of security and back-up measures, our information technology systems may be vulnerable to physical or electronic intrusions, viruses or other attacks, programming errors and similar disruptions.

We are subject to international, federal and state regulations, and in some cases contractual obligations, that require us to establish and maintain policies and procedures designed to protect sensitive customer, employee, sales representative and third-party information. We have implemented and maintain security measures, including industry-standard commercial technology, designed to protect against breaches of security sales and other interference with our systems and networks resulting from attacks by third parties, including hackers, and from employee or representative error or malfeasance. We continually assess our ability to monitor, respond to, and recover from such threats. We also require third-party vendors, who in the provision of services to us are provided with or process information pertaining to our business or our customers, to meet certain information security standards. Despite the measures we have taken and may in the future take to address and mitigate cybersecurity and technology risks, we cannot assure that our systems and networks will not be subject to breaches or interference. Any such breaches or interference by third parties or by our sales representatives or employees that may occur in the future including the failure of any one of these systems for any reason, could cause significant interruptions to our operations, which could have a material adverse effect on our business, financial condition and results of operations.

Anyone who is able to circumvent our security measures and penetrate our information technology systems could access, view, misappropriate, alter, or delete information in the systems, including personally-identifiable client information and proprietary business information. In addition, an increasing number of jurisdictions require that regulators and clients be notified if a security breach results in the disclosure of personally-identifiable client information, which could exacerbate the harm to our business, financial condition or results of operations. We cannot be certain that advances in criminal capabilities, discovery of new vulnerabilities, attempts to exploit vulnerabilities in our systems, data thefts, physical system or network break-ins or inappropriate access, or other developments will not compromise or breach the technology or other security measures protecting the networks and systems used in connection with our business.

Operating system failures, ineffective system implementation, loss of the Internet or the compromise of security with respect to internal, external or third-party operating systems or portable electronic devices could subject us to significant civil and criminal liability, harm our reputation, interrupt our business operations, deter people from purchasing our products, require us to incur significant technical, legal and other expenses, and adversely affect our internal control over financial reporting, business, financial condition, or results of operations.

The current legislative and regulatory climate with regard to cybersecurity may adversely affect our business, financial condition, and results of operations.

Various international, federal and state legislative and regulatory bodies are considering or have considered, proposed, or adopted new standards and rules regarding protection of personally-identifiable information. Such laws or regulations could require us to implement new technologies or revise and maintain policies and procedures designed to protect sensitive customer, employee, representative and third-party information. Being subject to, or out of compliance with, the aforementioned laws and regulations could result in material costs, fines, penalties or litigation, which could materially adversely affect our business, financial condition and results of operations.

In the event of a disaster, our business continuity plan may not be sufficient, which could have a material adverse effect on our business, financial condition and results of operations.

Our infrastructure supports a combination of local and remote recovery solutions for business resumption in the event of a disaster, including a security incident. In the event of either a campus-wide destruction or the inability to access our data center or main campus in Duluth, Georgia, our business recovery plan provides for a limited number of our employees to perform their work functions via a dedicated business backup/recovery site located around 20 miles from our main campus or by remote access from an employee's home. However, in the event of campus-wide destruction, our business recovery plan may be inadequate, and our employees and sales representatives may be unable to carry out their work, which could have a material adverse effect on our business, financial condition and results of operations.

Credit deterioration in, and the effects of interest rate fluctuations on, our invested asset portfolio and other assets that are subject to changes in credit quality and interest rates could materially adversely affect our business, financial condition and results of operations.

A large percentage of our invested asset portfolio is invested in fixed-income securities. As a result, credit deterioration and interest rate fluctuations could materially affect the value of and earnings generated by our invested asset portfolio. Fixed-income securities decline in value if there is no active trading market for the securities or the market's impression of, or the ratings agencies' views on, the credit quality of an issuer worsens. During periods of declining market interest rates, we must invest the cash we receive as

interest, return of principal on our investments and cash from operations in lower-yielding, high-grade instruments or in lower-credit instruments to maintain comparable returns. Issuers of fixed-income securities could also decide to prepay their obligations to borrow at lower market rates, which would increase our reinvestment risk. If interest rates generally increase, the fair value of our fixed rate income portfolio decreases. Additionally, if the fair value of any security in our invested asset portfolio decreases, we may realize losses if we deem the value of the security to be other-than-temporarily impaired. We also have an asset on deposit with a coinsurer backing a 10% coinsurance agreement entered into at the time of our IPO. The fair value of this asset is influenced by fluctuation in credit spreads and interest rates, and changes in fair value are recognized in income. To the extent that any fluctuations in fair value or interest rates are significant or we recognize impairments that are material, it could have a material adverse effect on our business, financial condition and results of operations.

Valuation of our investments and the determination of whether a decline in the fair value of our invested assets is other-than-temporary are based on estimates that may prove to be incorrect.

U.S. GAAP requires that when the fair value of any of our invested assets declines and such decline is deemed to be other-than-temporary, we recognize a loss in either our statement of income or in other comprehensive income based on certain criteria in the period that such determination is made. The determination of the fair value of certain invested assets, particularly those that do not trade on a regular basis, requires an assessment of available data and the use of assumptions and estimates. Once it is determined that the fair value of an asset is below its carrying value, we must determine whether the decline in fair value is other-than-temporary, which is based on subjective factors and involves a variety of assumptions and estimates.

There are certain risks and uncertainties associated with determining whether declines in fair value are other-than-temporary. These include significant changes in general economic conditions and business markets, trends in certain industry segments, interest rate fluctuations, rating agency actions, changes in significant accounting estimates and assumptions and legislative actions. In the case of mortgage- and asset-backed securities, there is added uncertainty as to the performance of the underlying collateral assets. To the extent that we are incorrect in our determination of the fair value of our investment securities or our determination that a decline in their value is other-than-temporary, we may realize losses that never actually materialize or may fail to recognize losses within the appropriate reporting period.

Changes in accounting standards can be difficult to predict and could adversely impact how we record and report our financial condition and results of operations.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. U.S. GAAP continues to evolve and, as a result, will change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be hard to anticipate and implement and can materially impact how we record and report our financial condition and results of operations. For example, the Financial Accounting Standards Board ("FASB") is in the process of re-deliberating its exposure draft that proposes significant changes in the methodology for measuring future policy benefits and deferred acquisition costs on our consolidated balance sheets as well as the timing of when we recognize the impact from changes in insurance contract assumptions in our statement of income and statement of other comprehensive income. This proposed accounting standard, in addition to other financial reporting standard changes being discussed by the FASB and the SEC, could adversely impact both our financial condition and results of operations as reported on a U.S. GAAP basis.

Additionally, the Company's insurance company subsidiaries prepare statutory financial statements in accordance with accounting principles designated by regulators in the jurisdictions in which they are domiciled. The financial statements of our U.S. insurance subsidiaries are prepared in accordance with statutory accounting principles prescribed or permitted by state insurance departments and the NAIC. Statutory accounting principles, including actuarial methodologies for estimating reserves, are subject to continuous evaluation by the NAIC and state insurance

departments. Similarly, our Canadian life insurance subsidiary is required to prepare statutory financial statements in accordance with IFRS, as prescribed by the Office of the Superintendent of Financial Institutions in Canada. In 2017, the International Accounting Standards Board finalized a new IFRS standard that will significantly overhaul our Canadian life insurance subsidiary's accounting for insurance contracts for statutory reporting purposes beginning in 2021. The statutory financial statements of our insurance company subsidiaries, which are used to determine dividend capacity and risk-based capital, could be adversely affected by these and other future changes implemented by jurisdictional insurance departments. Therefore, the ability of our insurance companies to comply with regulatory minimum capital requirements and ultimately pay dividends to the Parent Company could be adversely impacted.

The effects of economic down cycles could materially adversely affect our business, financial condition and results of operations.

Our business, financial condition and results of operations have been materially adversely affected by economic downturns in the United States and Canada, as well as issues in the global economy that may have repercussions on our local markets. Economic downturns, which are often characterized by higher unemployment, lower family income, lower valuation of retirement savings accounts, lower corporate earnings, lower business investment and lower consumer spending, have adversely affected the demand for the term life insurance, investment and savings and other financial products that we sell. Future economic down cycles could adversely affect new sales and cause clients to liquidate mutual funds and other investments sold by our sales representatives. This could cause a decrease in the asset value of client accounts, reduce our trailing commission revenues and result in a decline in the fair

value of our invested asset portfolio. In addition, we may experience an elevated incidence of lapses or surrenders of insurance policies, and some of our policyholders may choose to defer paying insurance premiums or stop paying insurance premiums altogether. Further, volatility in equity markets or downturns could discourage purchases of the investment products that we distribute and could have a materially adverse effect on our business, including our ability to recruit and retain sales representatives.

We are subject to various federal, state and provincial laws and regulations in the United States and Canada, changes in which or violations of which may require us to alter our business practices and could materially adversely affect our business, financial condition and results of operations.

In the United States, we are subject to many regulations, including the Gramm-Leach-Bliley Act and its implementing regulations, including Regulation S-P, the Fair Credit Reporting Act, the Right to Financial Privacy Act, the Foreign Corrupt Practices Act, the Sarbanes-Oxley Act, the Telemarketing and Consumer Fraud and Abuse Prevention Act, the Telephone Consumer Protection Act, the FTC Act, the Health Insurance Portability and Accountability Act (HIPAA), the Electronic Funds Transfer Act, and the Interlink Network Inc. Operating Regulations. We are also subject to anti-money laundering laws and regulations, including the Bank Secrecy Act, as amended by the Patriot Act, which requires us to develop and implement customer identification and risk-based anti-money laundering programs, report suspicious activity and maintain certain records. Further, we are required to follow certain economic and trade sanctions programs that are administered by the Office of Foreign Asset Control that prohibit or restrict transactions with suspected countries, their governments, and in certain circumstances, their nationals.

In Canada, we are subject to provincial and territorial regulations, including consumer protection legislation that pertains to unfair and misleading business practices, provincial and territorial credit reporting legislation that provides requirements in respect of obtaining credit bureau reports and providing notices of decline, the Personal Information Protection and Electronic Documents Act, the Competition Act, the Corruption of Foreign Public Officials Act, the Telecommunications Act and certain Canadian Radio-television and Telecommunications Commission Telecom Decisions in respect of unsolicited telecommunications. We are also subject to the Proceeds of Crime (Money Laundering) and Terrorist Financing Act and its accompanying regulations, which require us to develop and implement anti-money laundering policies and procedures relating to customer indemnification, reporting and recordkeeping, develop and maintain ongoing training programs for employees, perform a risk assessment on our business and clients and institute and document a third-party independent review of our anti-money laundering program at least once every two years. We are also required to follow certain economic and trade sanctions and legislation that prohibit us from, among other things, engaging in transactions with, and providing services to, persons on lists created under various federal statutes and regulations and blocked persons and foreign countries and territories subject to Canadian sanctions administered by Foreign Affairs and International Trade Canada and the Department of Public Safety Canada.

Changes in, or violations of, any of these laws or regulations may require additional compliance procedures, or result in enforcement proceedings, sanctions or penalties, which could have a material adverse effect on our business, financial condition and results of operations.

Litigation and regulatory investigations and actions may result in financial losses and harm our reputation.

We face a risk of litigation and regulatory investigations and actions in the ordinary course of operating our businesses. From time to time, we are subject to private litigation as a result of alleged sales representative misconduct or alleged failure of the Company to follow applicable insurance, securities or other laws or regulations. For example, we may become subject to lawsuits alleging, among other things, issues relating to sales or underwriting practices, product design and disclosure, delay of benefits, and product pricing. In addition, we are subject to litigation arising out of our general business activities. For example, we have a large sales force and we could face claims by current or former sales representatives arising out of their relationship with us as independent contractors or regarding compensation-related issues. If we become subject to any such litigation, the associated legal expense and any

judgment or settlement of the claims could have a material adverse effect on our business, financial condition and results of operations.

We are undergoing multi-state treasurer unclaimed property audits by 30 jurisdictions currently focused on the life insurance claims paying practices of our subsidiaries, Primerica Life and NBLIC. Other jurisdictions may pursue similar audits and litigation. The potential outcome of such actions is difficult to predict but could subject us to adverse consequences, including, but not limited to, settlement payments, additional payments to beneficiaries, and additional escheatment of funds deemed abandoned under state laws. We cannot reasonably estimate the likelihood or the impact of additional costs or liabilities that could result from resolution of these matters, or the effect these matters may have on the conduct of our business, financial condition and results of operations.

We are also routinely subject to regulatory inquiries, such as information requests, subpoenas and books and record examinations, from state, provincial and federal regulators and other authorities and from time to time, regulatory investigations as a result of alleged sales representative misconduct or alleged failure of the Company to follow applicable laws or regulations. A substantial legal liability or a significant regulatory action against us could have a material adverse effect on our business, financial condition and results of operations.

Moreover, even if we ultimately prevail in any litigation, regulatory action or investigation, we could suffer significant reputational harm and we could incur significant legal expenses, either of which could have a material adverse effect on our business, financial condition and results of operations. In addition, increased regulatory scrutiny and any resulting investigations or proceedings could

result in new legal precedents and industry-wide regulations or practices that could materially adversely affect our business, financial condition and results of operations.

The current legislative and regulatory climate with regard to financial services may adversely affect our business, financial condition, and results of operations.

The volume of legislative and regulatory activity relating to financial services has increased substantially in recent years, and the level of enforcement actions and investigations by federal, state and provincial regulators may increase correspondingly. Legislative, regulatory and enforcement activity at the federal level may contribute to heightened activity at the state and provincial level. If we or our sales representatives become subject to new requirements or regulations, it could result in increased litigation, regulatory risks, changes to our business model, a decrease in the number of our securities-licensed representatives or a reduction in the products we offer to our clients or the profits we earn, which could have a material adverse effect on our business, financial condition and results of operations.

Regulators could adopt laws or interpret existing laws in a way that would require retroactive changes to our business, accounting practices, or redundant reserve financing structures. Any such retroactive changes could have a material adverse effect on our business, financial condition and results of operations.

The inability of our subsidiaries to pay dividends or make distributions or other payments to us in sufficient amounts would impede our ability to meet our obligations and return capital to our stockholders.

Operations of the Company are conducted by its subsidiaries. As such, Primerica, Inc. is a holding company that has no significant operations. Our primary asset is the capital stock of our subsidiaries and our primary liability is our Senior Notes. We rely primarily on dividends and other payments from our subsidiaries to meet our operating costs, other corporate expenses, Senior Note obligations, as well as to return capital to our stockholders. The ability of our subsidiaries to pay dividends to us depends on their earnings, covenants contained in existing and future financing or other agreements and on regulatory restrictions. The ability of our insurance subsidiaries to pay dividends will further depend on their statutory income and surplus. If the cash we receive from our subsidiaries pursuant to dividend payments and tax sharing arrangements is insufficient for us to fund our obligations or if a subsidiary is unable to pay dividends to us, we may be required to raise cash through the incurrence of debt, the issuance of equity or the sale of assets. However, given the historic volatility in the capital markets, there is no assurance that we would be able to raise cash by these means.

The jurisdictions in which our insurance subsidiaries are domiciled impose certain restrictions on their ability to pay dividends to us. In the United States, these restrictions are based, in part, on the prior year's statutory income and surplus. In general, dividends up to specified levels are considered ordinary and may be paid without prior approval. Dividends in larger amounts are subject to approval by the insurance commissioner of the state of domicile. In Canada, dividends can be paid, subject to the paying insurance company continuing to meet the regulatory requirements for capital adequacy and liquidity and upon 15 days' minimum notice to OSFI. No assurance is given that more stringent restrictions will not be adopted from time to time by jurisdictions in which our insurance subsidiaries are domiciled, and such restrictions could have the effect, under certain circumstances, of significantly reducing dividends or other amounts payable to us by our subsidiaries without prior approval by regulatory authorities. In addition, in the future, we may become subject to debt covenants or other agreements that limit our ability to return capital to our stockholders. The ability of our insurance subsidiaries to pay dividends to us is also limited by our need to maintain the financial strength ratings assigned to us by the ratings agencies.

If any of our subsidiaries were to become insolvent, liquidate or otherwise reorganize, we, as sole stockholder, will have no right to proceed against the assets of that subsidiary. Furthermore, with respect to our insurance subsidiaries, we, as sole stockholder, will have no right to cause the liquidation, bankruptcy or winding-up of the subsidiary under the applicable liquidation, bankruptcy or winding-up laws, although, in Canada, we could apply for permission to cause liquidation. The applicable insurance laws of the jurisdictions in which each of our insurance subsidiaries is

domiciled would govern any proceedings relating to that subsidiary. The insurance authority of that jurisdiction would act as a liquidator or rehabilitator for the subsidiary. Both creditors of the subsidiary and policyholders (if an insurance subsidiary) would be entitled to payment in full from the subsidiary's assets before we, as the sole stockholder, would be entitled to receive any distribution from the subsidiary.

If the ability of our insurance or non-insurance subsidiaries to pay dividends or make other distributions or payments to us is materially restricted by regulatory requirements, bankruptcy or insolvency, or our need to maintain our financial strength ratings, or is limited due to operating results or other factors, it could materially adversely affect our ability to fund our obligations and return capital to our stockholders.

A significant change in the competitive environment in which we operate could negatively affect our ability to maintain or increase our market share and profitability.

We face competition in all of our business lines. Our competitors include financial services companies, banks, investment management firms, broker-dealers, insurance companies, insurance brokers and direct sales companies. In many of our product offerings, we face competition from competitors that may have greater market share or breadth of distribution, offer a broader range of products, services or features, assume a greater level of risk, have lower profitability expectations, have lower fee and expense ratios, have higher financial strength ratings or offer more robust digital tools and self-service capabilities than we do. More recently,

significant capital has been invested in direct-to-consumer offerings, including wealth management, retirement and life insurance products. In addition, regulatory changes and competitive factors are leading to innovations in product offerings. To the extent these entrants create a significant change in the competitive environment, our ability to maintain or increase our market share and profitability could be materially adversely affected.

The loss of key employees and sales force leaders could negatively affect our financial results and impair our ability to implement our business strategy.

Our success substantially depends on our ability to attract and retain key members of our senior management team. The efforts, personality and leadership of our senior management team have been, and will continue to be, critical to our success. The loss of service of our senior management team due to disability, death, retirement or some other cause could reduce our ability to successfully motivate our sales representatives, or implement our business plan which could have a material adverse effect on our business, financial condition and results of operations. Although our senior executive officers have entered into employment agreements with us, there is no assurance that they will complete the term of their employment agreements or that they or the Company will renew them upon expiration.

In addition, the loss of key RVPs for any reason could negatively affect our financial results, impair our ability to attract new sales representatives and hinder future growth.

We may be materially adversely affected by currency fluctuations in the United States dollar versus the Canadian dollar.

The Canadian dollar is the functional currency for our Canadian subsidiaries and our financial results, reported in U.S. dollars, are affected by changes in the currency exchange rate. The assets, liabilities, revenues, and expenses of our Canadian subsidiaries are generally all denominated in Canadian dollars. However, the Canadian dollar financial statements of our Canadian subsidiaries are translated into U.S. dollars in our consolidated financial statements. Therefore, significant exchange rate fluctuations between the U.S. dollar and the Canadian dollar could have a material adverse effect on our financial condition and results of operations. A weaker Canadian dollar relative to the U.S. dollar would result in lower levels of reported revenues, expenses, net income, assets, liabilities and accumulated other comprehensive income as translated in our U.S. dollar reporting currency financial statements. In addition, our net investment in our Canadian subsidiaries is significantly affected by fluctuations in the exchange rate between the U.S. dollar and the Canadian dollar.

The market price of our common stock may fluctuate.

The stock market in general, and the market for companies in the financial services industry in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of these companies. Also, broad market and industry factors may negatively affect the market price of our common stock, regardless of our actual operating performance. Our stock could be subject to wide fluctuations in price in response to various factors, many of which are beyond our control, that include the following:

- fluctuations in stock market prices and trading volumes of similar companies, and general market conditions and overall fluctuations in U.S. equity markets;
- low trading volume and short interest positions in our common stock;
- our ability to meet or exceed our own forecasts or expectations of analysts or investors;
- changes in our securities analysts' estimates of our future financial performance;
- variations in our quarterly operating results;
 - changes, or the expectation of changes in federal and state law, policy and regulation, or changes in the ways that laws and regulations are interpreted and applied;
- the initiation, pendency or outcome of litigation, regulatory reviews and investigations, and any adverse publicity related thereto;

- actions by the New York Stock Exchange (“NYSE”), or uncertainty related to possible actions by the NYSE, related to the continued listing of our common stock;
- negative media reports with respect to us and/or our industry;
- the loss of key personnel;
- general economic conditions; and
- other risks and uncertainties described in these risk factors.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

Not applicable.

ITEM 2. PROPERTIES.

We lease all of our office, warehouse, printing, and distribution properties. Our executive and home office operations for substantially all of our domestic U.S. operations (except New York) are located in Duluth, Georgia, in a build-to-suit facility completed in 2013. The initial lease term for the facility is 15 years.

We also lease continuation of business, print/distribution, and warehouse space in or around Duluth, Georgia, under leases expiring in February 2020, June 2028 and June 2023, respectively.

NBLIC subleases general office space in Long Island City, New York, under a sublease expiring in March 2020.

In Canada, we lease general office space in Mississauga, Ontario, under a lease expiring in October 2030 and warehouse and printing operation space in Mississauga, Ontario, under a separate lease also expiring in October 2018.

Each of these leased properties is used by both of our operating segments, with the exception of our NBLIC office space, which is not used by our Investment and Savings Products segment.

We believe that our existing facilities in the U.S. and Canada are adequate for our current requirements and for our operations in the foreseeable future.

For additional details on our operating leases, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Contractual Obligations.”

ITEM 3. LEGAL PROCEEDINGS.

We are involved from time to time in legal disputes, regulatory inquiries and arbitration proceedings in the normal course of business. Additional information regarding certain legal proceedings to which we are a party is described under “Contingent Liabilities” in Note 16 (Commitments and Contingent Liabilities) to our consolidated financial statements included elsewhere in this report, and such information is incorporated herein by reference. As of the date of this report, we do not believe any pending legal proceeding to which Primerica or any of its subsidiaries is a party is required to be disclosed pursuant to this item.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM X. EXECUTIVE OFFICERS AND CERTAIN SIGNIFICANT EMPLOYEES OF THE REGISTRANT

Our executive officers are elected or appointed by our Board of Directors.

The name, age at February 26, 2018, and position of each of our executive officers and certain significant employees are presented below. These officers comprise our senior management team.

| Name | Age | Position |
|--------------------|-----|---|
| Glenn J. Williams | 58 | Chief Executive Officer |
| Peter W. Schneider | 61 | President |
| Alison S. Rand | 50 | Executive Vice President and Chief Financial Officer |
| Gregory C. Pitts | 55 | Executive Vice President and Chief Operating Officer |
| William A. Kelly | 62 | President of PFS Investments |
| John A. Adams | 59 | Chief Executive Officer, Primerica Life Insurance Company of Canada |
| Michael C. Adams | 61 | Executive Vice President and Chief Business Technology Officer |

Edgar Filing: Primerica, Inc. - Form 10-K

| | | |
|-------------------------|----|--|
| Chess E. Britt | 61 | Executive Vice President and Chief Marketing Officer |
| Jeffrey S. Fendler | 61 | Executive Vice President and Chief Compliance and Risk Officer |
| Alexis P. Ginn | 70 | Executive Vice President and General Counsel |
| Robert H. Peterman, Jr. | 52 | President, Primerica Distribution |

Set forth below is biographical information concerning our executive officers.

Glenn J. Williams has served as Chief Executive Officer since April 2015. He served as President from 2005 to April 2015, as Executive Vice President from 2000 to 2005, and in various capacities at the Company since 1981. Mr. Williams earned his B.S. in education from Baptist University of America in 1981.

Peter W. Schneider has served as President since April 2015. He served as Executive Vice President, General Counsel, and Chief Administrative Officer from 2000 to April 2015 and as Corporate Secretary from 2000 through January 2014. He worked at the law firm of Rogers & Hardin LLP as a partner from 1988 to 2000. Mr. Schneider earned both his B.S. in political science and industrial relations in 1978 and his J.D. in 1981 from the University of North Carolina at Chapel Hill. He serves on the boards of directors of the Securities Industry and Financial Markets Association (SIFMA), the Northwest YMCA, the Carolina Center for Jewish Studies, and the Anti-Defamation League Southeast Region.

Alison S. Rand has served as Executive Vice President and Chief Financial Officer since 2000 and in various capacities at the Company since 1995. Prior to 1995, Ms. Rand worked in the audit department of KPMG LLP. Ms. Rand earned her B.S. in accounting from the University of Florida in 1990 and is a certified public accountant. She is a board member of Cool Girls, Inc., Junior Achievement of Georgia and the University of Florida National Foundation. She also serves on the Terry College of Business Executive Education CFO Roundtable Advisory Board.

Gregory C. Pitts has served as Executive Vice President and Chief Operating Officer since December 2009, as Executive Vice President since 1995 with responsibilities within the Term Life Insurance and Investment and Savings Products segments and information technology division and in various capacities at the Company since 1985. Mr. Pitts earned his B.S.B.A. in general business from the University of Arkansas in 1985. He serves on the Boy Scouts of America Atlanta Area Council.

William A. Kelly has served as President of PFS Investments since 2005 and in various capacities at the Company since 1985. Mr. Kelly graduated from the University of Georgia in 1979 with a B.B.A. in accounting.

Set forth below is biographical information concerning certain significant employees.

John A. Adams has served as the Chief Executive Officer of Primerica Life Insurance Company of Canada (“Primerica Life Canada”) since 2003. He previously served Primerica Life Canada as Chief Financial Officer and before that as Vice President of Finance. Before joining Primerica, Mr. Adams served as the Director of Finance of a major Canadian university and Treasurer of an insurance group of companies. He began his career in 1980 with KPMG LLP. He graduated from Trinity College at the University of Toronto in 1980 with a Bachelor of Commerce, and is a Chartered Accountant and Chartered Professional Accountant. John has provided industry leadership as a board member of the Investment Funds Institute of Canada (the mutual fund industry association) since 2005, and has just completed a two-year term as its Board Chairman. He is also a board member of the Federation of Mutual Fund Dealers.

Michael C. Adams has served as Chief Business Technology Officer since April 2010, as Executive Vice President responsible for business technology since 1998 and in various capacities at the Company since 1980. Mr. Adams earned his B.A. in business and economics from Hendrix College in 1978.

Chess E. Britt has served as Chief Marketing Officer since April 2010, as Executive Vice President responsible for marketing administration and field communication since 1995 and in various capacities at the Company since 1982. Mr. Britt earned his B.A. in business administration from the University of Georgia in 1978. He serves on the board of directors of the Gwinnett Chamber of Commerce.

Jeffrey S. Fendler has served as Executive Vice President and Chief Compliance and Risk Officer of the Company since February 2014. He served as President of Primerica Life from 2005 through January 2014 and in various capacities at the Company since 1980. Mr. Fendler received a B.A. in economics from Tulane University.

Alexis P. Ginn has served as our Executive Vice President and General Counsel since May 2015 and as Executive Vice President and Deputy General Counsel from July 1998 to May 2015. She has served in various legal capacities with Primerica since 1991. Ms. Ginn began her career as a trial attorney in the Civil Division of the Department of Justice. She received her B.S. with honors from Tufts University and her J.D. from George Washington University Law School where she was on the law review and a member of the Order of the Coif.

Robert H. Peterman, Jr. has served since December 2013 as President of Primerica Distribution, where he is responsible for recruiting, licensing, licensing education, field compensation, field equity, and decision support. In 2005, he became Executive Vice President and was given responsibility for the Company’s Grow the Sales Force

initiative. He has also been responsible for Primerica's New York life insurance company since December 2013, serving as Chief Executive Officer since January 2017. Mr. Peterman joined the Company in October 1984 and has served in many varying roles throughout the business.

PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND
5. ISSUER PURCHASES OF EQUITY SECURITIES.

Quarterly Common Stock Prices and Dividends

The common stock of Primerica, Inc. ("Primerica", "we", "us" or the "Parent Company") is listed for trading on the New York Stock Exchange ("NYSE") under the symbol "PRI." The quarterly high and low sales prices for our common stock as reported on the NYSE and the dividends paid per quarter for the periods indicated were as follows:

| | High | Low | Dividend |
|-------------------------|-----------|----------|----------|
| 2017 | | | |
| 4 th quarter | \$ 106.40 | \$ 81.40 | \$ 0.20 |
| 3 rd quarter | 84.90 | 71.60 | 0.20 |
| 2 nd quarter | 86.45 | 70.00 | 0.19 |
| 1 st quarter | 84.15 | 69.00 | 0.19 |
| 2016 | | | |
| 4 th quarter | \$ 73.05 | \$ 52.75 | \$ 0.18 |
| 3 rd quarter | 59.34 | 49.69 | 0.18 |
| 2 nd quarter | 58.81 | 42.74 | 0.17 |
| 1 st quarter | 46.86 | 37.09 | 0.17 |

Dividends

We paid quarterly dividends to our stockholders totaling approximately \$35.8 million and \$33.4 million in 2017 and 2016, respectively.

As of January 31, 2018, we had 100 holders of record of our common stock. In the first quarter of 2018, we declared a quarterly dividend to stockholders of \$0.25 per share. We currently expect to continue to pay quarterly cash dividends to holders of our common stock. Our payment of cash dividends is at the discretion of our Board of Directors in accordance with applicable law after taking into account various factors, including our financial condition, operating results, current and anticipated cash needs and plans for growth. Under Delaware law, we can only pay dividends either out of surplus or out of the current or the immediately preceding year's earnings. Therefore, no assurance is given that we will continue to pay any dividends to our common stockholders, or as to the amount of any such dividends.

We are a holding company and have no operations. Our primary asset is the capital stock of our operating subsidiaries. The states in which our U.S. insurance company subsidiaries are domiciled impose certain restrictions on our insurance subsidiaries' ability to pay dividends to us. Our Canadian subsidiary can pay dividends subject to meeting regulatory requirements for capital adequacy and liquidity with appropriate minimum notice to the Office of the Superintendent of Financial Institutions Canada. In addition, in the future, we may become subject to agreements that limit our ability to pay dividends. For more information regarding dividend restrictions on our insurance subsidiaries, see Note 15 (Statutory Accounting and Dividend Restrictions) to our consolidated financial statements included elsewhere in this report.

Issuer Purchases of Equity Securities

Depending on market conditions, shares of our common stock may be repurchased from time to time at prevailing market prices through open market or privately negotiated transactions. On November 17, 2016, our Board of Directors authorized a share repurchase program for up to \$200.0 million of our outstanding common stock for purchases through June 30, 2018. We have repurchased \$150.0 million of shares under this program through December 31, 2017. On February 6, 2018, our Board of Directors authorized a new share repurchase program for up

to \$275.0 million of our outstanding common stock (including \$50.0 million remaining from the prior repurchase program) for purchases through June 30, 2019.

The Parent Company has no obligation to repurchase any shares. Subject to applicable corporate securities laws, repurchases may be made at such times and in such amounts as management deems appropriate. Repurchases under a publicly announced program can be discontinued at any time if management believes additional repurchases are not warranted.

During the quarter ended December 31, 2017, we repurchased shares of our common stock as follows:

| Period | Total number of shares purchased | Average price paid per share | Total number of shares purchased as part of publicly announced plans or programs | Approximate dollar value of shares that may yet be purchased under the plans or programs ⁽¹⁾ |
|-----------------------|----------------------------------|------------------------------|--|---|
| October 1 - 31, 2017 | 202,956 | \$ 85.15 | 202,956 | \$50,000,630 |
| November 1 - 30, 2017 | - | - | - | 50,000,630 |
| December 1 - 31, 2017 | - | - | - | 50,000,630 |
| Total | 202,956 | \$ 85.15 | 202,956 | \$50,000,630 |

⁽¹⁾In November 2016, our Board of Directors authorized \$200.0 million of share repurchases through June 30, 2018. On February 6, 2018, our Board of Directors authorized a new share repurchase program for up to \$275.0 million of our outstanding common stock (including \$50.0 million remaining from the prior repurchase program) for purchases through June 30, 2019.

For more information on our share repurchases, see Note 12 (Stockholders' Equity) to our consolidated financial statements included elsewhere in this report.

Securities Authorized for Issuance under Equity Compensation Plans

We have two compensation plans under which our equity securities are authorized for issuance. The Primerica, Inc. Second Amended and Restated 2010 Omnibus Incentive Plan was approved by our stockholders in May 2017. The Primerica, Inc. Stock Purchase Plan for Agents and Employees was approved by our sole stockholder in March 2010. The following table sets forth certain information relating to these equity compensation plans at December 31, 2017.

| | Number of securities to be issued upon exercise of outstanding options, warrants and rights | Weighted average exercise price of outstanding options, warrants and rights | Number of securities remaining available for future issuance |
|--|---|---|---|
| Equity compensation plans approved by stockholders: | | | |
| Primerica, Inc. Second Amended and Restated 2010 Omnibus | | | |
| Incentive Plan | 504,684 | ⁽¹⁾ \$ 45.15 | ⁽²⁾ 1,976,953 ⁽³⁾ |
| Primerica, Inc. Stock Purchase Plan for Agents and Employees | - | - | 1,935,673 ⁽⁴⁾ |
| Total | 504,684 | \$ 45.15 | 3,912,626 |
| Equity compensation plans not approved by stockholders | | | |
| | n/a | n/a | n/a |

⁽¹⁾ Consists of 343,583 and 106,670 shares to be issued in connection with unvested restricted stock units and outstanding stock options, respectively. Also includes 54,431 of shares to be issued to certain executive officers in connection with outstanding performance stock units if the Company achieves the targeted level of performance specified in the award agreement over a three-year period. See Note 12 (Stockholders Equity) and Note 14 (Share-Based Transactions) to our consolidated financial statements included elsewhere in this report for more information on the equity awards outstanding.

⁽²⁾ Represents the weighted average exercise price of the 106,670 stock options outstanding.

⁽³⁾ The number of shares of our common stock available for future issuance is 12,200,000 less the cumulative number of awards granted under the plan plus the cumulative number of awards canceled under the plan.

- (4) Represents shares of our common stock, which have already been issued and are outstanding, available to be purchased by employees and agents under the plan. The number of outstanding shares available to be purchased is 2,500,000 less the cumulative number of outstanding shares purchased to date under the plan.

Stock Performance Table ⁽¹⁾

The following graph compares the performance of our common stock to the Standard & Poor's ("S&P") MidCap 400 Index and the S&P 500 Insurance Index by assuming \$100 was invested in each investment option as of December 31, 2012 and the reinvestment of all dividends. The S&P MidCap 400 Index measures the performance of the United States middle market capitalization ("mid-cap") equities sector. The S&P 500 Insurance Index is a capitalization-weighted index of domestic equities of insurance companies traded on the NYSE and NASDAQ. Our common stock is included in the S&P MidCap 400 index.

| Index | Period Ended | | | | | |
|-------------------|--------------|------------|------------|------------|------------|------------|
| | 12/31/2012 | 12/31/2013 | 12/31/2014 | 12/31/2015 | 12/31/2016 | 12/31/2017 |
| Primerica, Inc. | \$ 100.00 | \$ 144.73 | \$ 184.90 | \$ 163.07 | \$ 241.89 | \$ 358.56 |
| S&P 500 Insurance | 100.00 | 146.71 | 158.87 | 162.57 | 191.14 | 222.09 |
| S&P MidCap 400 | 100.00 | 133.50 | 146.54 | 143.35 | 173.08 | 201.19 |

(1) The stock performance table is not deemed "soliciting material" or subject to Section 18 of the Securities Exchange Act of 1934.

ITEM 6. SELECTED FINANCIAL DATA.
