OCLARO, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1. BASIS OF PREPARATION

Basis of Presentation

Oclaro, Inc., a Delaware corporation, is sometimes referred to in this Quarterly Report on Form 10-Q as “Oclaro,” “we,” “us” or “our.”

On August 5, 2014, we entered into a separation agreement to sell our industrial and consumer business of Oclaro Japan located at our Komoro, Japan facility to Ushio Opto Semiconductors, Inc. ("Ushio Opto"). On October 27, 2014, the sale was completed. The transaction is more fully discussed in Note 5, Business Combinations and Dispositions.

On November 1, 2013, we sold our optical amplifier and micro-optics business (the “Amplifier Business”) to II-VI Incorporated (II-VI). The sale is more fully discussed in Note 5, Business Combinations and Dispositions. On September 12, 2013, we sold our Oclaro Switzerland GmbH subsidiary and associated laser diodes and pump business (the “Zurich Business”) to II-VI. The sale is more fully discussed in Note 5, Business Combinations and Dispositions. These sales are reported as discontinued operations, which require retrospective restatement of prior periods to classify the results of operations as discontinued operations. The notes to our condensed consolidated financial statements relate to our continuing operations only, unless otherwise indicated.

The accompanying unaudited condensed consolidated financial statements of Oclaro as of March 28, 2015 and for the three and nine months ended March 28, 2015 and March 29, 2014 have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the instructions to Article 10 of Securities and Exchange Commission ("SEC") Regulation S-X, and include the accounts of Oclaro and all of our subsidiaries. Accordingly, they do not include all of the information and footnotes required by such accounting principles for annual financial statements. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of our consolidated financial position and results of operations have been included. The condensed consolidated results of operations for the three and nine months ended March 28, 2015 are not necessarily indicative of results that may be expected for any other interim period or for the full fiscal year ending June 27, 2015.

The condensed consolidated balance sheet as of June 28, 2014 has been derived from our audited financial statements as of such date, but does not include all disclosures required by U.S. GAAP. These unaudited condensed consolidated financial statements should be read in conjunction with our audited financial statements included in our Annual Report on Form 10-K for the year ended June 28, 2014 ("2014 Form 10-K").

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reported periods. Examples of significant estimates and assumptions made by management involve the fair value of other intangible assets and long-lived assets, valuation allowances for deferred tax assets, the fair value of stock-based compensation, estimates used to determine facility lease loss liabilities, estimates for allowances for doubtful accounts and valuation of excess and obsolete inventories. These judgments can be subjective and complex and consequently actual results could differ materially from those estimates and assumptions. Descriptions of the key estimates and assumptions are included in our 2014 Form 10-K.

Out-of-Period Adjustment

In the first quarter of fiscal year 2015, we recorded out-of-period adjustments of approximately \$2.0 million in cost of goods sold in our condensed consolidated statements of operations. The adjustments, which increased cost of goods sold, also increased accrued liabilities and decreased inventory, and were made to correct our inventory valuation and the value of our purchase commitment accrual. We determined that the adjustments did not have a material impact to our current or prior period consolidated financial statements.

Table of Contents

Fiscal Years

We operate on a 52/53 week year ending on the Saturday closest to June 30. Our fiscal year ending June 27, 2015 will be a 52 week year, with the quarter ended March 28, 2015 being a 13 week quarterly period. Our fiscal year ended June 28, 2014 was a 52 week year, with the quarter ended March 29, 2014 being a 13 week quarterly period.

Reclassifications

For presentation purposes, we have reclassified certain prior period amounts to conform to the current period financial statement presentation. These reclassifications did not affect our consolidated revenues, net income (loss), cash flows, cash and cash equivalents or stockholders' equity as previously reported.

NOTE 2. RECENT ACCOUNTING STANDARDS

In April 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2015-03, Simplifying the Presentation of Debt Issuance Costs. Under ASU 2015-03, debt issuance costs are required to be presented as a direct deduction of debt balances on the balance sheet. This new standard does not affect the recognition and measurement of debt issuance costs. ASU 2015-03 will be effective on a retrospective basis, as a change in accounting principle, for years beginning after December 15, 2015 and interim periods within annual periods beginning after December 15, 2016. We are currently evaluating the impact that the implementation of this standard will have on our financial statements.

In January 2015, the FASB issued ASU No. 2015-01, Income Statement - Extraordinary and Unusual Items. This ASU eliminates from U.S. GAAP the concept of extraordinary items. Eliminating the extraordinary classification simplifies income statement presentation by altogether removing the concept of extraordinary items from consideration. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. This guidance is effective for us prospectively in the first quarter of fiscal year 2017. We are currently evaluating the impact that the implementation of this standard will have on our financial statements.

In August 2014, the FASB issued ASU No. 2014-15, Presentation of Financial Statements—Going Concern. The update provides U.S. GAAP guidance on management's responsibility in evaluating whether there is substantial doubt about a company's ability to continue as a going concern and about related footnote disclosures. For each reporting period, management will be required to evaluate whether there are conditions or events that raise substantial doubt about a company's ability to continue as a going concern within one year from the date the financial statements are issued. This guidance is effective for us beginning with our annual financial statements for the fiscal year ended July 1, 2017, and interim periods thereafter. We are currently evaluating the impact that the implementation of this standard will have on our financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers. This update clarifies the principles for recognizing revenue and develops a common revenue standard for GAAP and International Financial Reporting Standards. The standard outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance. This guidance is effective for fiscal years and interim periods within those years beginning after December 15, 2016. This guidance is effective for us prospectively in the first quarter of fiscal year 2018. We are currently evaluating the impact that the implementation of this standard will have on our financial statements.

In April 2014, the FASB issued ASU No. 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. This update requires that a disposal representing a strategic shift that has (or will have) a major effect on an entity's financial results be reported as discontinued operations. The standard also expands the disclosures for discontinued operations and requires new disclosures related to individually material disposals that do not meet the definition of a discontinued operation. The provisions of this ASU are effective for interim and annual periods beginning after December 15, 2014. We early adopted this guidance in our first quarter of fiscal year 2015. In accordance with this guidance, our sale of the Komoro Business does not meet the definition of a discontinued operation. We consider this sale as an individually material disposal and have expanded our disclosures related to this transaction, including presenting the pre-tax profit (loss) of the Komoro Business for the nine months ended March 28, 2015 and the three and nine months ended March 29, 2014, respectively.

Table of Contents

NOTE 3. BALANCE SHEET DETAILS

The following table provides details regarding our cash and cash equivalents at the dates indicated:

	March 28, 2015	June 28, 2014
	(Thousands)	
Cash and cash equivalents:		
Cash-in-bank	\$118,594	\$97,759
Money market funds	1,215	1,214
	\$119,809	\$98,973

As of March 28, 2015, we had restricted cash of \$4.3 million, including \$0.2 million in other non-current assets, consisting of collateral for the performance of our obligations under certain lease facility agreements and \$2.4 million (equivalent to RMB 15 million) of cash held in Oclaro Shenzhen's bank account in China that was frozen by the Xi'an Court in connection with our litigation with Xi'an Raysung Photonics Inc. (see Note 8, Commitments and Contingencies, for additional details regarding this litigation.)

The following table provides details regarding our inventories at the dates indicated:

	March 28, 2015	June 28, 2014
	(Thousands)	
Inventories:		
Raw materials	\$17,210	\$20,036
Work-in-process	19,987	20,505
Finished goods	28,149	30,558
	\$65,346	\$71,099

In connection with our sale of the Komoro Business, we transferred approximately \$4.6 million in inventories to Ushio Opto during the second quarter of fiscal year 2015.

The following table provides details regarding our property and equipment, net at the dates indicated:

	March 28, 2015	June 28, 2014
	(Thousands)	
Property and equipment, net:		
Buildings and improvements	\$11,489	\$12,989
Plant and machinery	30,055	47,247
Fixtures, fittings and equipment	5,623	9,701
Computer equipment	12,110	13,723
	59,277	83,660
Less: Accumulated depreciation	(17,876)	(32,892)
	\$41,401	\$50,768

In connection with our sale of the Komoro Business, we transferred approximately \$3.7 million in property and equipment to Ushio Opto during the second quarter of fiscal year 2015.

Property and equipment includes assets under capital leases of \$5.6 million at March 28, 2015 and \$9.9 million at June 28, 2014, respectively. Amortization associated with assets under capital leases is recorded in depreciation expense.

Table of Contents

The following table summarizes the activity related to our other intangible assets for the nine months ended March 28, 2015:

	Core and Current Technology (Thousands)	Development and Supply Agreements	Customer Relationships	Patent Portfolio	Other Intangibles	Amortization	Total
Balance at June 28, 2014	\$8,267	\$ 4,660	\$ 5,143	\$915	\$3,338	\$ (13,787)	\$8,536
Sale of Komoro Business	(1,904)	—	(2,545)	—	—	—	(4,449)
Amortization	—	—	—	—	—	(881)	(881)
Translations and adjustments	(110)	(107)	(197)	—	—	—	(414)
Balance at March 28, 2015	\$6,253	\$ 4,553	\$ 2,401	\$915	\$3,338	\$ (14,668)	\$2,792

In connection with the sale of our Komoro Business, we transferred other intangible assets with a book value of \$4.4 million to Ushio Opto during the second quarter of fiscal year 2015.

With the sale of our Komoro Business, we expect the amortization of intangible assets to be \$1.0 million for fiscal year 2015, \$0.8 million for each fiscal year 2016 through 2017, \$0.7 million for fiscal year 2018, \$0.1 million for fiscal year 2019 and \$0.1 million thereafter, based on the current level of our other intangible assets as of March 28, 2015.

The following table presents details regarding our accrued expenses and other liabilities at the dates indicated:

	March 28, 2015 (Thousands)	June 28, 2014
Accrued expenses and other liabilities:		
Trade payables	\$5,342	\$18,612
Compensation and benefits related accruals	9,399	10,242
Warranty accrual	3,270	4,672
Accrued restructuring, current	2,459	2,220
Purchase commitments in excess of future demand, current	4,180	—
Other accruals	11,610	15,746
	\$36,260	\$51,492

In connection with our sale of the Komoro Business, we transferred approximately \$2.4 million in accrued expenses and other liabilities to Ushio Opto during the second quarter of fiscal year 2015.

The following table summarizes the activity related to our accrued restructuring charges for the nine months ended March 28, 2015:

	Lease Cancellations, Commitments and Other Charges (Thousands)	Termination Payments to Employees and Related Costs	Total Accrued Restructuring Charges
Balance at June 28, 2014	\$1,881	\$962	\$2,843
Charged to restructuring costs	(121)	4,385	4,264
Paid or other adjustments	(1,491)	(3,157)	(4,648)
Balance at March 28, 2015	\$269	\$2,190	\$2,459
Current portion	269	2,190	2,459
Non-current portion	—	—	—

The current portion of accrued restructuring liabilities is included in the caption accrued expenses and other liabilities in the condensed consolidated balance sheet.

During the first quarter of fiscal year 2014, we initiated a restructuring plan to simplify our operating footprint, reduce our cost structure and focus our research and development investment in the optical communications market where we can leverage our core competencies. During the three and nine months ended March 28, 2015, we recorded restructuring charges of \$1.5 million and \$1.7 million, respectively, in connection with this restructuring plan. The restructuring charges for the three months ended

Table of Contents

March 28, 2015 relate to workforce reductions. The restructuring charges for the nine months ended March 28, 2015 include \$1.8 million related to workforce reductions and a \$0.1 million reversal of restructuring charges related to revised estimates for lease cancellations and commitments. During the three and nine months ended March 28, 2015, we made scheduled payments of \$0.3 million and \$2.0 million, respectively. During the three and nine months ended March 29, 2014, we recorded restructuring charges of \$2.2 million and \$8.0 million, respectively, in connection with this restructuring plan. The restructuring charges during the three and nine months ended March 29, 2014 related primarily to workforce reductions. During the three and nine months ended March 29, 2014, we made scheduled payments of \$4.2 million and \$7.3 million, respectively, to settle a portion of these restructuring liabilities. As of March 28, 2015, we had \$1.7 million in accrued restructuring liabilities related to this restructuring plan.

In connection with the acquisition of Opnext, we initiated a restructuring plan to integrate our acquisition of Opnext. We recorded no restructuring charges related to this plan during the current year. During the three and nine months ended March 29, 2014, we recorded restructuring charges of zero and \$1.1 million, respectively, in connection with this restructuring plan. The restructuring charges recorded in fiscal year 2014 included \$0.9 million in external consulting charges and professional fees associated with reorganizing the infrastructure and \$0.1 million in revised estimates related to lease cancellations and commitments. During the three and nine months ended March 29, 2014, we made scheduled payments of \$0.2 million and \$2.2 million, respectively, to settle these restructuring liabilities. As of March 28, 2015, we had no further accrued restructuring liabilities related to this restructuring plan.

During fiscal year 2012, we initiated a restructuring plan in connection with the transfer of a portion of our Shenzhen, China manufacturing operations to Venture Corporation Limited ("Venture"). This transition occurred in a phased and gradual transfer of certain products and was recently completed. In connection with this transition, during the three and nine months ended March 28, 2015, we recorded restructuring charges related to employee separation charges of \$0.8 million and \$2.6 million, respectively. During the three and nine months ended March 28, 2015, we made scheduled payments of \$0.2 million and \$2.3 million, respectively, to settle a portion of these restructuring liabilities. During the three and nine months ended March 29, 2014, we recorded restructuring charges related to employee separation charges of \$0.9 million and \$2.7 million, respectively. During the three and nine months ended March 29, 2014, we made scheduled payments of \$1.5 million and \$3.8 million, respectively, to settle a portion of these restructuring liabilities. As of March 28, 2015, we had \$0.7 million in accrued restructuring liabilities related to this restructuring plan.

We expect to incur an additional \$3.0 million to \$5.0 million, in aggregate, in restructuring charges in the fourth quarter of fiscal year 2015 in connection with these restructuring plans.

The following table presents the components of accumulated other comprehensive income at the dates indicated:

	March 28, 2015 (Thousands)	June 28, 2014
Accumulated other comprehensive income:		
Currency translation adjustments	\$37,962	\$46,490
Unrealized loss on marketable securities	—	(209)
Japan defined benefit plan	173	(417)
	\$38,135	\$45,864

NOTE 4. FAIR VALUE

We define fair value as the estimated price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining fair value measurements for assets and liabilities which are required to be recorded at fair value, we consider the principal or most advantageous market in which we would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as inherent risk, transfer restrictions and credit risk. We apply the following fair value hierarchy, which ranks the quality and reliability of the information used to determine fair values:

Level 1-Quoted prices in active markets for identical assets or liabilities.

Level 2-

Inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices of identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets), or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

11

Table of Contents

Level 3- Unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

Our cash equivalents are generally classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. The types of instruments valued based on quoted market prices in active markets include most marketable securities and money market securities.

The contingent obligation related to the make-whole premium on our 6.00% Convertible Senior Notes was valued using a binomial lattice valuation model which estimated the value based on the probability and timing of conversion. As of February 19, 2015, the date of the debt issuance, and as of March 28, 2015, the fair value of this contingent obligation is estimated at 0. The contingent obligation will continue to be revalued each reporting period and classified within Level 3 of the fair value hierarchy.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis are shown in the table below by their corresponding balance sheet caption and consisted of the following types of instruments at March 28, 2015:

	Fair Value Measurement at Reporting Date Using			Total
	Quoted Prices in Active Markets for Identical Assets (Level 1) (Thousands)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Cash and cash equivalents: ⁽¹⁾				
Money market funds	\$1,215	\$—	\$—	\$1,215
Total assets measured at fair value	\$1,215	\$—	\$—	\$1,215

⁽¹⁾ Excludes \$118.6 million in cash held in our bank accounts at March 28, 2015.

NOTE 5. BUSINESS COMBINATIONS AND DISPOSITIONS

Sale of Komoro, Japan Industrial and Consumer Business ("Komoro Business")

On August 5, 2014, Oclaro Japan, Inc., our wholly-owned subsidiary ("Oclaro Japan"), entered into a Master Separation Agreement ("MSA") with Ushio Opto and Ushio, Inc. ("Ushio"), whereby Ushio Opto agreed to acquire the industrial and consumer business of Oclaro Japan located at its Komoro, Japan facility (the "Komoro Business"), by means of an absorption-type demerger under the Japanese Companies Act. On October 27, 2014, the sale was completed. Initial consideration for this transaction consisted of 1.85 billion Japanese yen (approximately \$17.1 million based on the exchange rate on October 27, 2014) in cash, of which 1.6 billion Japanese yen (approximately \$14.8 million based on the exchange rate on October 27, 2014) was paid at the closing and 250 million Japanese yen (approximately \$2.1 million based on the exchange rate on April 24, 2015) was paid into escrow and was released to Oclaro Japan on April 24, 2015. In addition, under the MSA, we are subject to a post-closing net asset valuation adjustment. We determined that based on the net assets transferred to Ushio Opto during the second quarter of fiscal year 2015, we owed Ushio Opto a post-closing net asset valuation adjustment of \$1.4 million, which was paid to Ushio Opto in the third quarter of fiscal year 2015.

In connection with the sale of the Komoro Business, we transferred net assets with a book value of \$6.3 million to Ushio Opto, consisting of \$3.4 million in accounts receivable, \$4.6 million in inventories, \$0.9 million in prepaid expenses and other current assets, \$3.7 million in property, plant and equipment, \$4.4 million in other intangible assets, \$5.9 million in accounts payable, \$2.9 million in accrued expenses, other liabilities and capital lease obligations, and \$1.9 million in other non-current liabilities. We also incurred \$1.0 million in legal fees and other administrative costs related to this transaction. During the second quarter of fiscal year 2015, the transfer of net assets

was complete and we recognized a gain of \$8.3 million within restructuring, acquisition and related (income) expense, net in the condensed consolidated statements of operations.

At the closing of the transaction, Oclaro Japan and Ushio Opto entered into certain transition services and reciprocal services agreements to allow the Komoro Business to continue operations during the ownership transition, as well as an intellectual

Table of Contents

property agreement. Ushio has guaranteed the performance of Ushio Opto's obligations under the MSA. Oclaro Japan, Ushio Opto and Ushio each provided customary and reciprocal representations, warranties and covenants in the MSA. Income from continuing operations before income taxes attributable to the Komoro Business was \$1.3 million for the nine months ended March 28, 2015 (up through October 27, 2014, the date the sale was completed), and \$1.6 million and \$4.4 million for the three and nine months ended March 29, 2014, respectively.

Sale of Amplifier Business

On October 10, 2013, Oclaro Technology Limited entered into an Asset Purchase Agreement with II-VI, whereby Oclaro Technology Limited agreed to sell to II-VI and certain of its affiliates its Amplifier Business for \$88.6 million in cash. The transaction closed on November 1, 2013. Consideration, valued initially at \$88.6 million, consisted of \$79.6 million in cash, which was received on November 1, 2013, \$4.0 million which was subject to hold-back by II-VI until December 31, 2014 to address any post-closing claims and \$5.0 million related to the exclusive option, which was received on September 12, 2013 and was credited against the purchase price upon closing of the sale. On December 30, 2014, Oclaro Technology Limited entered into a Settlement Agreement with II-VI and II-VI Holdings B.V. regarding disposition of the amounts held back by the II-VI parties pursuant to the Asset Purchase Agreement. Of the \$4.0 million subject to hold-back until December 31, 2014, we received \$0.9 million in January 2015 and we released II-VI from the remaining \$3.1 million. We recorded the \$3.1 million release of the hold-back as a loss from discontinued operations within the condensed consolidated statement of operations during the second quarter of fiscal year 2015. In connection with the Settlement Agreement, we also agreed with the II-VI parties to a mutual release of certain claims related to the Asset Purchase Agreement, and certain related documents and transactions.

We classified the sale of our Amplifier Business as a discontinued operation as of September 12, 2013, the date we committed to sell the business.

The following table presents the statements of operations for the discontinued operations of the Amplifier Business:

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
	(Thousands)			
Revenues	\$—	\$—	\$—	\$35,185
Cost of revenues	—	—	—	26,243
Gross profit	—	—	—	8,942
Operating expenses	—	—	161	5,576
Other income (expense), net	—	(636) (3,060) 69,069
Income (loss) from discontinued operations before income taxes	—	(636) (3,221) 72,435
Income tax provision	—	—	—	—
Income (loss) from discontinued operations	\$—	\$(636) \$(3,221) \$72,435

This acquisition is more fully discussed in Note 3, Business Combinations and Dispositions, to our consolidated financial statements included in our 2014 Form 10-K.

Sale of Zurich Business

On September 12, 2013, we completed a Share and Asset Purchase Agreement with II-VI, pursuant to which we sold our Oclaro Switzerland GmbH subsidiary and associated laser diodes and pump business to II-VI. Also, as part of the agreement, II-VI purchased certain pieces of equipment which are located in our Caswell facility. We continue to operate this equipment on behalf of II-VI, and provide certain wafer processing services in Caswell as part of an ongoing manufacturing services agreement.

We received proceeds of \$90.6 million in cash on September 12, 2013, and \$2.9 million in cash during the third quarter of fiscal year 2014 which related to a final settlement of the post-closing working capital adjustment. We were also scheduled to receive an additional \$6.0 million subject to hold-back by II-VI until December 31, 2014 to address any post-closing adjustments or claims. On December 30, 2014, we entered into a Settlement Agreement with II-VI

and II-VI Holdings B.V. regarding disposition of the amounts held back by the II-VI parties pursuant to the Share and Asset Purchase Agreement. Of the \$6.0 million subject to hold-back until December 31, 2014, we received \$1.4 million in January 2015 and we released II-VI from the remaining \$4.6 million. We recorded the \$4.6 million release of the hold-back as a loss from discontinued operations within the condensed consolidated statement of operations during the second quarter of fiscal year 2015. In connection with the

Table of Contents

Settlement Agreement, we also agreed with the II-VI parties to a mutual release of certain claims related to the Share and Asset Purchase Agreement, and certain related documents and transactions.

We classified the sale of our Zurich Business as a discontinued operation as of September 12, 2013.

The following table presents the statements of operations for the discontinued operations of the Zurich Business:

	Three Months Ended		Nine Months Ended	
	March 28, 2015 (Thousands)	March 29, 2014	March 28, 2015 (Thousands)	March 29, 2014
Revenues	\$—	\$—	\$—	\$ 13,896
Cost of revenues	—	—	163	11,593
Gross profit	—	—	(163) 2,303
Operating expenses	—	—	484	3,416
Other income (expense), net	—	884	(4,590) 62,034
Income (loss) from discontinued operations before income taxes	—	884	(5,237) 60,921
Income tax provision	—	500	—	663
Income (loss) from discontinued operations	\$—	\$384	\$(5,237) \$60,258

This acquisition is more fully discussed in Note 3, Business Combinations and Dispositions, to our consolidated financial statements included in our 2014 Annual Report on Form 10-K.

NOTE 6. CREDIT LINE AND NOTES

6.00% Convertible Senior Notes due 2020 ("6.00% Notes")

On February 12, 2015, we entered into a Purchase Agreement (the "Purchase Agreement"), with Jefferies LLC (the "Initial Purchaser"), pursuant to which we agreed to issue and sell to the Initial Purchaser up to \$65.0 million in aggregate principal Convertible Senior Notes due 2020 (the "6.00% Notes"). On February 19, 2015, we closed the private placement of \$65.0 million aggregate principal amount of the 6.00% Notes. The 6.00% Notes were sold at 100 percent of par, resulting in net proceeds of approximately \$61.6 million, after deducting the Initial Purchaser's discounts of \$3.4 million. We also incurred offering expenses of \$0.6 million. The net proceeds of this offering will be used for general corporate purposes, including working capital for, among other things, investing in development of new products and technologies.

The Notes will mature on February 15, 2020 and will bear interest at a fixed rate of 6.00 percent per year, payable semi-annually in arrears on February 15 and August 15 of each year, beginning on August 15, 2015. During the three and nine months ended March 28, 2015, we recorded \$0.5 million in interest expense related to these 6.00% Notes. The Purchase Agreement contains customary representations and warranties of the parties and indemnification and contribution provisions under which we, on the one hand, and the Initial Purchaser, on the other, have agreed to indemnify each other against certain liabilities, including liabilities under the Securities Act of 1933, as amended (the "Securities Act").

The 6.00% Notes are governed by an Indenture, dated February 19, 2015 (the "Indenture"), entered into between us and U.S. Bank National Association, as trustee (the "Trustee"). The Indenture contains affirmative and negative covenants that, among other things, limits our ability to incur, assume or guarantee additional indebtedness; create liens; sell or otherwise dispose of substantially all of our assets; and enter into mergers and consolidations. The Indenture also contains customary events of default. Upon the occurrence of certain events of default, the Trustee or the holders of the 6.00% Notes may declare all outstanding 6.00% Notes to be due and payable immediately.

Prior to February 15, 2018, in the event that the last reported sale price of our common stock for 20 or more trading days (whether or not consecutive) in a period of 30 consecutive trading days ending within five trading days immediately prior to the date we receive a notice of conversion exceeds the conversion price in effect on each such trading day, we will, in addition to delivering shares upon conversion by the holder of 6.00% Notes, together with

cash in lieu of fractional shares, make an interest make-whole payment in cash equal to the sum of the remaining scheduled payments of interest on the 6.00% Notes to be converted through February 15, 2018.

Any holder that converts its 6.00% Notes in connection with a make-whole fundamental change, as defined in the Indenture, will not receive the interest make-whole payment but will instead receive the additional shares set forth in the Indenture.

Prior to February 15, 2018, we may not redeem the 6.00% Notes. On or after February 15, 2018, we may redeem for cash all of the 6.00% Notes if the last reported sale price per share of our common stock has been at least 130 percent of the conversion

Table of Contents

price then in effect for at least 20 trading days (whether or not consecutive) during any 30 consecutive trading-day period ending within five trading days prior to the date on which we provide notice of redemption. The redemption price will equal (i) 100 percent of the principal amount of the Notes being redeemed, plus (ii) accrued and unpaid interest, including additional interest, if any, to, but excluding, the redemption date plus (iii) the sum of the present values of each of the remaining scheduled payments of interest that would have been made on the 6.00% Notes to be redeemed had such 6.00% Notes remained outstanding from the redemption date to the maturity date (excluding interest accrued to, but excluding, the redemption date that is otherwise paid pursuant to the immediately preceding clause (ii)).

Upon the occurrence of a fundamental change, subject to certain conditions, each holder of the 6.00% Notes will have the option to require that we purchase all or a portion of such holder's Notes in cash at a purchase price equal to 100 percent of the principal amount of the 6.00% Notes to be purchased plus any accrued and unpaid interest, including additional interest, if any, to, but excluding, the fundamental change purchase date.

Our contingent obligation to make a make-whole payment in the event of an early conversion by the holders of the 6.00% Notes, or at our election to redeem the 6.00% Notes for cash, are both considered embedded derivatives. As of February 19, 2015, the date of the debt issuance, and as of March 28, 2015, the fair value of the embedded derivatives is estimated at zero. The estimated fair value of the embedded derivatives was determined by using a binomial lattice approach to determine the probability and timing of a conversion or redemption.

On February 19, 2015, we also entered into a Registration Rights Agreement (the "Registration Rights Agreement") with the Initial Purchaser to provide the holders of the 6.00% Notes with registration rights with respect to shares of common stock that have been issued upon conversion of the 6.00% Notes and are then outstanding, but only if Rule 144 under the Securities Act is unavailable to holders of the 6.00% Notes who are not affiliates of ours on and following the date that is six months after the original issuance date of the 6.00% Notes.

On February 19, 2015, we entered into a Consent and First Loan Modification Agreement (the "Amendment") with Silicon Valley Bank ("SVB"). The Amendment modifies the Loan and Security Agreement, dated as of March 28, 2014, by and among us, Oclaro Technology Limited and SVB to allow the cash payments provided for in the Indenture and the 6.00% Notes and include the 6.00% Notes as permitted indebtedness.

The following table sets forth balance sheet information related to the 6.00% Notes at March 28, 2015:

	March 28, 2015 (Thousands)
Principal value of the liability component	\$65,000
Unamortized value of the debt discount	(3,327)
Net carrying value of the liability component	\$61,673

At March 28, 2015, the \$3.3 million debt discount is recorded in convertible notes payable and the \$0.6 million issuance costs are recorded within other non-current assets within the condensed consolidated balance sheet.

Silicon Valley Bank Credit Facility

On March 28, 2014, we entered into a loan and security agreement (the "Loan Agreement") with Silicon Valley Bank (the "Bank") pursuant to which the Bank provided us with a three-year revolving credit facility of up to \$40.0 million. Under the Loan Agreement, advances are available based on up to 80 percent of "eligible accounts" as defined in the Loan Agreement. The Loan Agreement has a \$10.0 million sub-facility for letters of credit, foreign exchange contracts and cash management services.

Borrowings made under the Loan Agreement bear interest at a rate based on either the London Interbank Offered Rate plus 2.25 percent or Wall Street Journal's prime rate plus 1.00 percent. If the sum of (a) our unrestricted cash and cash equivalents that are subject to the Bank's liens less (b) the amount outstanding to the Bank under the Loan Agreement (such sum being "Net Cash") is less than \$15.0 million, then the interest rates are increased by 0.75 percent until net cash exceeds \$15.0 million for a calendar month. If interest paid under the Loan Agreement is less than \$45,000 in any fiscal quarter, we are required to pay the Bank an additional amount equal to the difference between \$45,000 and the actual interest paid during such fiscal quarter. The minimum interest payment is in lieu of a stand-by charge.

If the Loan Agreement terminates prior to its maturity date, we will pay a termination fee equal to 1.00 percent of the total credit facility if such termination occurs in the first year after closing, 0.75 percent of the total credit facility if such termination occurs in the second year after closing and 0.50 percent of the total credit facility if such termination occurs in the third year after closing. The maturity date of the Loan Agreement is March 28, 2017. At March 28, 2015, there were no amounts outstanding under the Loan Agreement.

Table of Contents

The Loan Agreement is more fully discussed in Note 7, Credit Line and Notes, to our consolidated financial statements included in our 2014 Form 10-K.

Wells Fargo Credit Line and Term Loan

On August 2, 2006, we entered into a Credit Agreement with Wells Fargo Capital Finance, Inc. ("Wells Fargo") and certain other lenders (the "Credit Agreement").

From time to time, we amended and restated the Credit Agreement, before terminating the agreement on March 14, 2014. The Credit Agreement is more fully discussed in Note 7, Credit Line and Notes, to our consolidated financial statements included in our 2014 Form 10-K.

7.50% Exchangeable Senior Secured Second Lien Notes ("7.50% Notes")

On December 14, 2012, we closed the private placement of \$25.0 million aggregate principal amount 7.50 percent Exchangeable Senior Secured Second Lien Notes due 2018 ("7.50% Notes"). The sale of the 7.50% Notes resulted in net proceeds of approximately \$22.8 million. The private placement was completed pursuant to a purchase agreement, dated December 14, 2012 entered into by us, certain of our domestic and foreign subsidiaries (the "Guarantors") and Morgan Stanley & Co. LLC, which is more fully discussed in Note 7, Credit Line and Notes, to our consolidated financial statements included in our 2014 Form 10-K.

On December 19, 2013, the holders exercised their rights to exchange the 7.50% Notes for our common stock. The exchange rate for the exchanges was 541.7118 shares of common stock per \$1,000 in principal amount of convertible notes. We issued 13,542,791 shares of common stock in connection with the exchange, with cash payable in lieu of fractional shares. In addition, pursuant to the terms of the indenture governing the convertible notes, we made a redemption exchange make-whole payment of \$8.3 million during the second quarter of fiscal year 2014.

Upon exchange of the convertible notes during the second quarter of fiscal year 2014, we recorded the remaining unamortized debt discount and issuance costs of \$1.8 million in additional paid-in capital.

NOTE 7. POST-RETIREMENT BENEFITS

Switzerland Defined Benefit Plan

During the first quarter of fiscal year 2014, we sold our Zurich Business, and as part of the sale transferred our pension plan covering employees of our Swiss subsidiary (the "Swiss Plan") to II-VI. At the end of our first quarter of fiscal year 2014, we had no remaining obligations under the Swiss Plan.

Japan Defined Contribution and Benefit Plan

In connection with our acquisition of Opnext, we assumed a defined contribution plan and a defined benefit plan that provides retirement benefits to our employees in Japan.

Under the defined contribution plan, contributions are provided based on grade level and totaled \$0.1 million and \$0.4 million for the three and nine months ended March 28, 2015, respectively, and \$0.2 million and \$0.6 million for the three and nine months ended March 29, 2014, respectively. Employees can elect to receive the benefit as additional salary or contribute the benefit to the plan on a tax-deferred basis.

Table of Contents

Under the defined benefit plan in Japan (the “Japan Plan”), we calculate benefits based on an employee’s individual grade level and years of service. Employees are entitled to a lump sum benefit upon retirement or upon certain instances of termination. During the second quarter of fiscal year 2015, we sold our Komoro Business, and as part of the sale transferred a portion of our Japan Plan covering employees of the Komoro Business to Ushio Opto. As of March 28, 2015, there were no plan assets associated with the Japan Plan. As of March 28, 2015, there was \$0.2 million in accrued expenses and other liabilities and \$5.1 million in other non-current liabilities in our condensed consolidated balance sheet as of March 28, 2015, to account for the projected benefit obligations under the Japan Plan. Net periodic pension costs for the Japan Plan included the following:

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
	(Thousands)			
Service cost	\$177	\$239	\$553	\$720
Interest cost	18	23	56	70
Net amortization	10	17	37	48
Net periodic pension costs	\$205	\$279	\$646	\$838

During the first quarter of fiscal year 2015, we recorded an adjustment of \$0.5 million in accumulated other comprehensive income in connection with revising our methodology for estimating the actuarial present value of accumulated plan benefits under the Japan Plan.

We made benefit payments under the Japan Plan of \$0.1 million and \$0.2 million during the three and nine months ended March 28, 2015, respectively, and \$0.3 million and \$0.4 million during the three and nine months ended March 29, 2014, respectively.

NOTE 8. COMMITMENTS AND CONTINGENCIES**Loss Contingencies**

We are involved in various lawsuits, claims, and proceedings that arise in the ordinary course of business. We record a loss provision when we believe it is both probable that a liability has been incurred and the amount can be reasonably estimated.

Guarantees

We indemnify our directors and certain employees as permitted by law, and have entered into indemnification agreements with our directors and executive officers. We have not recorded a liability associated with these indemnification arrangements, as we historically have not incurred any material costs associated with such indemnification obligations. Costs associated with such indemnification obligations may be mitigated by insurance coverage that we maintain, however, such insurance may not cover any, or may cover only a portion of, the amounts we may be required to pay. In addition, we may not be able to maintain such insurance coverage in the future. We also have indemnification clauses in various contracts that we enter into in the normal course of business, such as indemnifications in favor of customers in respect of liabilities they may incur as a result of purchasing our products should such products infringe the intellectual property rights of a third party. We have not historically paid out any material amounts related to these indemnifications; therefore, no accrual has been made for these indemnifications.

Warranty Accrual

We generally provide a warranty for our products for twelve months to thirty-six months from the date of sale, although warranties for certain of our products may be longer. We accrue for the estimated costs to provide warranty services at the time revenue is recognized. Our estimate of costs to service our warranty obligations is based on historical experience and expectation of future conditions. To the extent we experience increased warranty claim activity or increased costs associated with servicing those claims, our warranty costs would increase, resulting in a decrease in gross profit.

The following table summarizes movements in the warranty accrual for the periods indicated:

Table of Contents

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
	(Thousands)			
Warranty provision—beginning of period	\$3,474	\$5,487	\$4,672	\$4,670
Warranties issued	185	466	1,078	1,967
Warranties utilized or expired	(377) (849) (2,236) (2,863
Currency translation and other adjustments	(12) 33	(244) 1,363
Warranty provision—end of period	\$3,270	\$5,137	\$3,270	\$5,137

Capital Leases

In connection with our acquisition of Opnext, we assumed certain capital leases with Hitachi Capital Corporation, a related party, for certain equipment. The terms of the leases generally range from one to five years and the equipment can be purchased at the residual value upon expiration. We can terminate the leases at our discretion in return for a penalty payment as stated in the lease contracts.

The following table shows the future minimum lease payments due under non-cancelable capital leases with Hitachi Capital Corporation at March 28, 2015:

	Capital Leases (Thousands)
Fiscal Year Ending:	
2015 (remaining)	\$1,232
2016	3,379
2017	1,097
2018	42
2019	28
Thereafter	75
Total minimum lease payments	5,853
Less amount representing interest	(242
Present value of capitalized payments	5,611
Less: current portion	(3,923
Long-term portion	\$1,688

In connection with our sale of the Komoro Business, during the second quarter of fiscal year 2015, we transferred \$0.5 million in capital leases with Hitachi Corporation to Ushio Opto.

Litigation**Overview**

In the ordinary course of business, we are involved in various legal proceedings, and we anticipate that additional actions will be brought against us in the future. The most significant of these proceedings are described below. These legal proceedings, as well as other matters, involve various aspects of our business and a variety of claims in various jurisdictions. Complex legal proceedings frequently extend for several years, and a number of the matters pending against us are at very early stages of the legal process. As a result, some pending matters have not yet progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to determine whether the proceeding is material to us or to estimate a range of possible loss, if any. Unless otherwise disclosed, we are unable to estimate the possible loss or range of loss for the legal proceedings described below. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these items currently pending could have a material effect on our results of operations, financial position or cash flows.

Raysung Commercial Litigation

On October 23, 2013, Xi'an Raysung Photonics Inc., or Raysung, filed a civil suit against our wholly-owned subsidiary, Oclaro Technology (Shenzhen) Co., Ltd. (formerly known as Bookham Technology (Shenzhen) Co., Ltd.),

or Oclaro Shenzhen, in the Xi'an Intermediate People's Court in Shaanxi Province of the People's Republic of China, or the Xi'an Court. The complaint

18

Table of Contents

filed by Raysung alleges that Oclaro Shenzhen terminated its purchase order pursuant to which Raysung had supplied certain products and was to supply certain products to Oclaro Shenzhen.

Raysung initially requested that the court award damages of RMB 4,796,531 (equivalent to approximately \$0.8 million at the exchange rate in effect March 28, 2015), and requested that Oclaro Shenzhen take the finished products that are now stored in Raysung's warehouse (the value of the finished product is RMB 13,505,162 (equivalent to approximately \$2.2 million at the exchange rate in effect March 28, 2015)) and requested that Oclaro Shenzhen pay its court fees in connection with this suit.

The Xi'an Court delivered an Asset Preservation Order which was served on Oclaro Shenzhen and the local Customs office. According to the Asset Preservation Order, Oclaro Shenzhen was ordered to maintain RMB 15,000,000 (equivalent to approximately \$2.4 million at the exchange rate in effect March 28, 2015) or assets equivalent to the said amount during the litigation process, and the Customs office was ordered to restrict Oclaro Shenzhen's equipment from being exported before the Asset Preservation Order is lifted. On November 11, 2013, Oclaro Shenzhen entered into a settlement agreement. Under the terms of this settlement agreement, Oclaro Shenzhen agreed to pay \$500,000 in payment of invoices for certain materials to Raysung and to work with Raysung to requalify it as a vendor for certain Oclaro Shenzhen manufacturing requirements, in consideration of which Raysung agreed to submit the settlement agreement to the Xi'an Court so it could issue a civil mediation agreement, apply for a discharge of the Asset Preservation Order and waive the right to bring any legal actions against Oclaro Shenzhen relating to these matters. Oclaro Shenzhen performed its obligations under the settlement agreement, however, on January 15, 2014, Raysung applied to the Xi'an Court to terminate the settlement agreement and add Oclaro, Inc. as a co-defendant in the original civil suit.

On March 26, 2014, the Xi'an Court froze RMB 15.0 million (equivalent to approximately \$2.4 million at the exchange rate in effect March 28, 2015) of cash held in Oclaro Shenzhen's bank account in China. On April 30, 2014, Oclaro Shenzhen submitted a challenge to the jurisdiction of the Xi'an Court. On May 26, 2014, the Xi'an Court overruled the jurisdictional challenge. On June 4, 2014, Oclaro Shenzhen filed an appeal with the Shaanxi High Court to revoke the civil order of the Xi'an Court overruling Oclaro Shenzhen's jurisdictional challenge. The Shaanxi High Court held hearings on July 15, 2014 and July 30, 2014, and on August 20, 2014 sustained the Xi'an Court's civil order on jurisdiction and transferred the case back to the Xi'an Court for substantive proceedings. On September 22, 2014, Raysung amended its complaint in the Xi'an Court proceeding by increasing its claims to RMB 36.2 million (equivalent to approximately \$5.9 million at the exchange rate in effect on March 28, 2015). On October 22, 2014, the Xi'an Court conducted a hearing on the substantive elements of Raysung's claims. At the same hearing, Oclaro Shenzhen filed counterclaims against Raysung for RMB 7.4 million (equivalent to approximately \$1.2 million at the exchange rate in effect on March 28, 2015) of losses resulting from supply of products with unqualified materials. On December 17, 2014, the Xi'an Court conducted a hearing on the substantive elements of each party's claims against the other party.

On April 2, 2015, the Xi'an Court released RMB 5.0 million of cash (equivalent to approximately \$0.8 million at the exchange rate in effect March 28, 2015) previously frozen in Oclaro Shenzhen's bank account in exchange for a new lien on physical assets located at Oclaro Shenzhen's facility with an equivalent appraised value. The Asset Preservation Order is currently in effect until March 2016. On April 10, 2015, the Xi'an Court issued a decision, ruling that Oclaro Shenzhen should pay Raysung RMB 11.4 million (equivalent to approximately \$1.9 million at the exchange rate in effect March 28, 2015). The Xi'an Court also dismissed Raysung's other claims and each of Oclaro Shenzhen's counterclaims. On April 24, 2015, Oclaro Shenzhen filed an appeal of the Xi'an Court decision with the Shaanxi High Court, on the basis of both factual and legal error in the underlying decision. As of May 7, 2015, no judge has been assigned to the appellate case and no hearing dates have been established. Oclaro, Inc. and Oclaro Shenzhen continue to believe that they have meritorious defenses to the claims made by Raysung and intend to defend this litigation vigorously.

NOTE 9. EMPLOYEE STOCK PLANS

Stock Incentive Plans

On July 23, 2013, our board of directors approved the Fourth Amended and Restated 2001 Long-Term Stock Incentive Plan and on January 14, 2014, our shareholders ratified this plan, establishing it as our primary equity incentive plan at that time. This plan (i) revised the eligibility section to allow us to make grants to all our employees, non-employee directors and consultants, (ii) allowed us to grant incentive stock options and awards which may be able to qualify as qualified performance-based compensation under Section 162(m) of the Internal Revenue Code, (iii) extended the term of the plan to ten years from the effective date of the plan (the plan expires in July 2023), and (iv) conformed the share counting provisions of the plan to provide that full value awards count as 1.25 shares for purposes of the plan.

On July 30, 2014, our board of directors approved the Fifth Amended and Restated 2001 Long-Term Stock Incentive Plan (the “Plan”) and on November 14, 2014, our shareholders ratified the Plan. The Plan amends and restates in its entirety the Fourth Amended and Restated 2001 Long-Term Stock Incentive Plan. The Plan (i) increases the number of shares of common stock

Table of Contents

available for issuance by 6.0 million shares, (ii) consolidates the share reserve of the Plan with the share reserve of the Amended and Restated 2004 Stock Incentive Plan ("2004 Plan"), such that from November 14, 2014, no additional awards will be granted under the 2004 Plan, and (iii) establishes that full value awards count as 1.40 shares of common stock for purposes of the Plan.

As of March 28, 2015, there were 9.0 million shares of our common stock available for grant under the Plan.

We generally grant stock options that vest over a two to four year service period, and restricted stock awards and units that vest over a one to four year service period, and in certain cases each may vest earlier based upon the achievement of specific performance-based objectives as set by our board of directors or the compensation committee of our board of directors.

In July 2011, our board of directors approved the grant of 0.2 million performance stock units ("PSUs") to certain executive officers with an aggregate estimated grant date fair value of \$0.9 million. In October 2013, the board of directors determined that achievement of the performance conditions was reached at the 100 percent target level. Approximately 0.1 million of the grants outstanding, or 50 percent, vested on October 22, 2013, with the remaining 50 percent scheduled to vest upon a two-year service condition through August 2015. As of March 28, 2015, there were minimal PSUs outstanding, after adjustments for forfeitures due to terminations, related to this grant, with a de minimis aggregate estimated grant date fair value.

In July 2012, our board of directors approved a grant of 0.6 million PSUs to certain executive officers, subject to shareholder approval of an amendment to our Plan. Prior to shareholder approval, approximately 0.4 million of the PSUs were forfeited as a result of certain executive officer departures. On January 14, 2014, shareholder approval was obtained at our annual general meeting of stockholders. These PSUs were scheduled to vest upon the achievement of certain adjusted earnings before interest, taxes, depreciation and amortization targets through June 30, 2014. During the first quarter of fiscal year 2015, it was determined that the performance conditions were not achieved, and the corresponding PSUs were forfeited.

In February 2014, our board of directors granted our chief executive officer 0.8 million restricted stock units ("RSUs") in satisfaction of the terms set forth in his employment agreement dated September 11, 2013. The RSUs vested in full on the date of grant, and settled on August 15, 2014. The RSUs had an aggregate grant date fair value of \$2.0 million, which was recorded in the third quarter of fiscal year 2014.

In March 2014, our board of directors approved a grant of 0.2 million PSUs to certain executive officers with an aggregate estimated grant date fair value of \$0.5 million. These PSUs vest upon the achievement of non-GAAP operating income break-even for calendar year 2015. Vesting is also contingent upon service conditions being met through February 2018. If the performance condition is not achieved, then the corresponding PSUs will be forfeited in the third quarter of fiscal year 2016. As of March 28, 2015, there were 0.1 million PSUs outstanding, after adjustments for forfeitures due to terminations, related to this grant, with an aggregate estimated grant date fair value of \$0.4 million. During the second quarter of fiscal year 2015, we determined that the achievement of the performance conditions associated with these PSUs was improbable. In the second quarter of fiscal year 2015, we reversed approximately \$0.1 million in previously recognized stock-based compensation expense related to these PSUs.

In August 2014, our board of directors approved a grant of 0.5 million PSUs to certain executive officers with an aggregate estimated grant date fair value of \$0.9 million. These PSUs will vest at 100 percent upon the achievement of two consecutive quarters with positive earnings before interest, taxes, depreciation and amortization on or before the end of our fiscal year 2017. If the performance condition is not achieved, then the corresponding PSUs will be forfeited in the first quarter of fiscal year 2018.

In August 2014, our board of directors approved a retention grant of 0.4 million RSUs to certain of our executives, which vest over three years. In September 2014, our board of directors also approved a retention grant of 1.4 million RSUs to other employees, which vest over two years.

Table of Contents

The following table summarizes the combined activity under all of our equity incentive plans for the nine months ended March 28, 2015:

	Shares Available For Grant	Stock Options / SARs Outstanding	Weighted-Average Exercise Price	Restricted Stock Awards / Units Outstanding	Weighted-Average Grant Date Fair Value
	(Thousands)	(Thousands)		(Thousands)	
Balance at June 28, 2014	5,703	4,156	\$8.43	4,273	\$2.59
Increase in share reserve	6,000	—	—	—	—
Granted	(3,910)) 164	1.79	2,953	1.45
Exercised or released	—	(8) 0.84	(2,335) 2.66
Forfeited or expired	1,218	(792) 13.54	(337) 2.87
Balance at March 28, 2015	9,011	3,520	7.05	4,554	1.82

Supplemental disclosure information about our stock options and stock appreciation rights ("SARs") outstanding as of March 28, 2015 is as follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life	Aggregate Intrinsic Value
	(Thousands)		(Years)	(Thousands)
Options and SARs exercisable	2,988	\$7.87	4.2	\$41
Options and SARs outstanding	3,520	7.05	4.9	92

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value, based on the closing price of our common stock of \$1.95 on March 27, 2015, which would have been received by the option holders had all option holders exercised their options as of that date. There were less than 0.1 million shares of common stock subject to in-the-money options which were exercisable as of March 28, 2015. We settle employee stock option exercises with newly issued shares of common stock.

NOTE 10. STOCK-BASED COMPENSATION

We recognize stock-based compensation expense in our condensed consolidated statement of operations related to all share-based awards, including grants of stock options, based on the grant date fair value of such share-based awards. Estimating the grant date fair value of such share-based awards requires us to make judgments in the determination of inputs into the Black-Scholes stock option pricing model which we use to arrive at an estimate of the grant date fair value for such awards. The assumptions used in this model to value stock option grants were as follows:

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
Stock options:				
Expected life	N/A	5.3 years	5.3 years	5.3 years
Risk-free interest rate	N/A	1.6	% 1.6	% 1.5
Volatility	N/A	84.8	% 76.9	% 83.9
Dividend yield	N/A	—	—	—

Table of Contents

The amounts included in cost of revenues and operating expenses for stock-based compensation were as follows:

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
	(Thousands)			
Stock-based compensation by category of expense:				
Cost of revenues	\$434	\$244	\$1,340	\$746
Research and development	396	249	1,138	701
Selling, general and administrative	745	2,492	2,139	3,347
	\$1,575	\$2,985	\$4,617	\$4,794
Stock-based compensation by type of award:				
Stock options	\$87	\$210	\$317	\$803
Restricted stock awards	1,497	2,810	4,233	4,034
Inventory adjustment to cost of revenues	(9) (35) 67	(43
	\$1,575	\$2,985	\$4,617	\$4,794

As of March 28, 2015 and June 28, 2014, we had capitalized approximately \$0.5 million and \$0.4 million, respectively, of stock-based compensation as inventory.

Included in stock based-compensation for the three and nine months ended March 29, 2014, is approximately \$2.0 million in compensation cost related to the grant of 0.8 million RSUs to our chief executive officer on February 10, 2014, which vested in full on the grant date.

As of March 28, 2015, we had \$0.5 million in unrecognized stock-based compensation expense related to unvested stock options, net of estimated forfeitures, that will be recognized over a weighted-average period of 2.7 years, and \$6.1 million in unrecognized stock-based compensation expense related to unvested restricted stock awards, net of estimated forfeitures, that will be recognized over a weighted-average period of 1.5 years.

The amount of stock-based compensation expense recognized in any one period related to PSUs can vary based on the achievement or anticipated achievement of the performance conditions. If the performance conditions are not met or not expected to be met, no compensation cost would be recognized on the underlying PSUs, and any previously recognized compensation expense related to those PSUs would be reversed. During the second quarter of fiscal year 2015, we determined that the achievement of the performance conditions associated with the PSUs granted in March 2014 was improbable. We reversed approximately \$0.1 million in previously recognized stock-based compensation expense related to these PSUs.

During the three and nine months ended March 28, 2015, we recorded \$0.1 million and \$0.2 million in stock-based compensation in connection with the issuance of the PSUs from July 2011, March 2014 and August 2014. During the three and nine months ended March 29, 2014, we recorded minimal stock-based compensation expense in connection with the issuance of the PSUs from July 2011 and March 2014.

NOTE 11. INCOME TAXES

The income tax benefit of \$0.5 million and income tax provision of \$0.4 million for the three and nine months ended March 28, 2015, respectively, and the income tax provision of \$0.7 million and \$2.5 million for the three and nine months ended March 29, 2014, respectively, relates primarily to our foreign operations.

The total amount of our unrecognized tax benefits as of March 28, 2015 and June 28, 2014 were approximately \$3.6 million and \$4.2 million, respectively. As of March 28, 2015, we had \$3.0 million of unrecognized tax benefits that, if recognized, would affect our effective tax rate. While it is often difficult to predict the final outcome of any particular uncertain tax position, we believe that unrecognized tax benefits could decrease by approximately \$1.0 million in the next twelve months.

On December 19, 2014, the President of the U.S. signed into law The Tax Increase Prevention Act of 2014, which retroactively extends more than 50 expired tax provisions through 2014. Among the extended provisions is the Sec. 41 research credit for qualified research expenditures incurred through the end of 2014. The benefit of the reinstated

credit did not impact the condensed consolidated statement of operations in the period of enactment, which was the second quarter of fiscal year 2015, as the research and development credit carryforwards are offset by a full valuation allowance.

Table of Contents

NOTE 12. NET INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed using only the weighted-average number of shares of common stock outstanding for the applicable period, while diluted net income (loss) per share is computed assuming conversion of all potentially dilutive securities, such as stock options, unvested restricted stock awards, warrants and convertible notes during such period.

For the three and nine months ended March 28, 2015, we excluded 22.4 million and 13.5 million, respectively, of outstanding stock options, stock appreciation rights, unvested restricted stock awards and shares issuable in connection with convertible notes from the calculation of diluted net loss per share because their effect would have been anti-dilutive.

For the three and nine months ended March 29, 2014, we excluded 10.6 million and 13.5 million, respectively, of outstanding stock options, stock appreciation rights, warrants, shares issuable in connections with convertible notes and unvested restricted stock awards from the calculation of diluted net income (loss) per share because their effect would have been anti-dilutive.

NOTE 13. GEOGRAPHIC INFORMATION, PRODUCT GROUPS AND CUSTOMER CONCENTRATION INFORMATION

Geographic Information

The following table shows revenues by geographic area based on the delivery locations of our products:

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
	(Thousands)			
China	\$29,433	\$26,609	\$75,686	\$75,065
United States	12,429	7,097	40,352	23,028
Malaysia	10,845	11,230	40,306	34,658
Mexico	8,139	5,073	31,029	26,338
Germany	5,781	21,511	20,168	56,525
Italy	6,429	3,625	17,332	15,125
Japan	2,189	7,822	7,637	29,263
Thailand	540	2,798	3,262	8,182
Rest of world	7,238	9,633	23,312	26,776
	\$83,023	\$95,398	\$259,084	\$294,960

Product Groups

The following table sets forth revenues by product group:

	Three Months Ended		Nine Months Ended	
	March 28, 2015	March 29, 2014	March 28, 2015	March 29, 2014
	(Thousands)			
100 Gb/s transmission	\$30,221	\$18,989	\$85,221	\$54,293
40 Gb/s transmission	18,962	25,156	60,428	74,410
10 Gb/s and lower transmission	33,840	43,675	104,071	144,077
Industrial and consumer	—	7,578	9,364	22,180
	\$83,023	\$95,398	\$259,084	\$294,960

During the second quarter of fiscal year 2015, we sold our Komoro Business, which included the industrial and consumer product group of Oclaro Japan.

Table of Contents

Significant Customers and Concentration of Credit Risk

For the three months ended March 28, 2015, four customers accounted for 10 percent or more of our revenues, representing approximately 19 percent, 16 percent, 11 percent and 10 percent of our revenues, respectively. For the nine months ended March 28, 2015, three customers accounted for 10 percent or more of our revenues, representing approximately 22 percent, 14 percent and 10 percent of our revenues, respectively.

For the three months ended March 29, 2014, three customers accounted for 10 percent or more of our revenues, representing approximately 21 percent, 12 percent and 11 percent of our revenues, respectively. For the nine months ended March 29, 2014, three customers accounted for 10 percent or more of our revenues, representing approximately 18 percent, 13 percent and 10 percent of our revenues, respectively.

As of March 28, 2015, two customers accounted for 10 percent or more of our accounts receivable, representing approximately 28 percent and 10 percent of our accounts receivable, respectively. As of June 28, 2014, two customers accounted for 10 percent of our accounts receivable, representing approximately 19 percent and 13 percent of our accounts receivable, respectively.

NOTE 14. RELATED PARTY TRANSACTIONS

As a result of our acquisition of Opnext on July 23, 2012, Hitachi, Ltd. (Hitachi) holds approximately 11 percent of our outstanding common stock as of March 28, 2015 based on Hitachi's most recent Schedule 13G filed with the Securities and Exchange Commission on February 12, 2014.

We continue to enter into transactions with Hitachi in the normal course of business. Sales to Hitachi were \$1.2 million and \$3.1 million for the three and nine months ended March 28, 2015, respectively, and \$1.8 million and \$6.5 million for the three and nine months ended March 29, 2014, respectively. Purchases from Hitachi were \$4.2 million and \$11.5 million for the three and nine months ended March 28, 2015, respectively, and were \$2.9 million and \$9.5 million for the three and nine months ended March 29, 2014, respectively. At March 28, 2015, we had \$0.8 million accounts receivable due from Hitachi and \$4.3 million accounts payable due to Hitachi. At June 28, 2014 we had \$2.7 million accounts receivable due from Hitachi and \$4.5 million accounts payable due to Hitachi. We also have certain capital equipment leases with Hitachi Capital Corporation as described in Note 8, Commitments and Contingencies. We are party to a research and development agreement and intellectual property license agreements with Hitachi.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q and the documents incorporated herein by reference contain forward-looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended, about our future expectations, plans or prospects and our business. You can identify these statements by the fact that they do not relate strictly to historical or current events, and contain words such as "anticipate," "estimate," "expect," "project," "intend," "will," "plan," "believe," "should," "outlook," "could," "target," other words of similar meaning in connection with discussion of future operating or financial performance. We have based our forward looking statements on our management's beliefs and assumptions based on information available to our management at the time the statements are made. There are a number of important factors that could cause our actual results or events to differ materially from those indicated by such forward-looking statements, including (i) our ability to timely develop, commercialize and ramp the production of new products, (ii) our ability to increase the percentage of sales associated with our new products, (iii) our ability to respond to evolving technologies, customer requirements and demands, and product design challenges, (iv) our dependence on a limited number of customers for a significant percentage of our revenues, (v) our ability to maintain strong relationships with certain customers, (vi) the effects of fluctuating product mix on our results, (vii) competition and pricing pressure, (viii) our ability to effectively manage our inventory, (ix) our ability to meet or exceed our gross margin expectations, (x) the effects of fluctuations in foreign currency exchange rates, (xi) our ability to maintain or increase our cash reserves and obtain debt or equity-based financing on acceptable terms or at all, (xii) our future performance and our ability to effectively restructure our operations and business, (xiii) our ability to effectively compete with companies that have greater

name recognition, broader customer relationships and substantially greater financial, technical and marketing resources, (xiv) our ability to timely capitalize on any increase in market demand, (xv) our ability to service and repay our outstanding indebtedness pursuant to the terms of the applicable agreements (xvi) the potential inability to realize the expected benefits of asset dispositions, (xvii) the sale of businesses which may or may not arise in connection with executing our restructuring plans, (xviii) our ability to reduce costs and operating expenses, (xix) increased costs related to downsizing and compliance with regulatory and legal requirements in connection with such downsizing, (xx) the risks associated with our international operations, (xxi) the impact of continued uncertainty in world financial markets and any resulting reduction in demand for our

Table of Contents

products, (xxii) the outcome of tax audits or similar proceedings, (xxiii) the outcome of pending litigation against us, and (xxiv) other factors described in other documents we periodically file with the SEC. We cannot guarantee any future results, levels of activity, performance or achievements. You should not place undue reliance on forward-looking statements. Moreover, we assume no obligation to update forward-looking statements or update the reasons actual results could differ materially from those anticipated in forward-looking statements. Several of the important factors that may cause our actual results to differ materially from the expectations we describe in forward-looking statements are identified in the sections captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Risk Factors" in this Quarterly Report on Form 10-Q and the documents incorporated herein by reference.

As used herein, "Oclaro," "we," "our," and similar terms include Oclaro, Inc. and its subsidiaries, unless the context indicates otherwise.

OVERVIEW

We are one of the leading providers of optical components, modules and subsystems for the core optical transport, service provider, wireless backhaul, enterprise and data center markets. Leveraging over three decades of laser technology innovation, photonic integration, and subsystem design, we provide differentiated solutions for optical networks and high-speed interconnects driving the next wave of streaming video, cloud computing, voice over IP, Software as a Service ("SaaS") and other bandwidth-intensive and high-speed applications.

We have research and development ("R&D") and chip fabrication facilities in the U.K., Italy and Japan. We have in-house and contract manufacturing sites in the U.S., China, Malaysia and Thailand, with design, sales and service organizations in most of the major regions around the world.

Our customers include ADVA Optical Networking ("ADVA"); Alcatel-Lucent; Ciena Corporation ("Ciena"); Cisco Systems, Inc. ("Cisco"); Coriant GmbH ("Coriant"); Fiberhome Networks ("Fiberhome"); Huawei Technologies Co. Ltd ("Huawei"); Juniper Networks, Inc. ("Juniper"); Telefonaktiebolaget LM Ericsson ("Ericsson") and ZTE Corporation ("ZTE").

RECENT DEVELOPMENTS

On February 19, 2015, we closed the private placement of \$65.0 million aggregate principal amount of Convertible Senior Notes ("6.00% Notes"). The 6.00% Notes were sold at 100 percent of par, resulting in net proceeds of approximately \$61.6 million, after deducting the Initial Purchaser's discounts. We also incurred offering expenses of \$0.6 million. We intend to use the net proceeds of the offering for general corporate purposes, including working capital for, among other things, investing in development of new products and technologies.

On December 30, 2014, we entered into a Settlement Agreement with II-VI Incorporated, a Pennsylvania corporation ("II-VI") and II-VI Holdings B.V., a Netherlands corporation ("II-VI B.V.," and together with II-VI, the "II-VI Parties"), a wholly-owned subsidiary of II-VI, regarding disposition of the amounts held back by the II-VI Parties pursuant to the Share and Asset Purchase Agreement between Oclaro Technology and II-VI B.V. (as previously disclosed in our Current Report on Form 8-K filed on September 17, 2013) and pursuant to the Asset Purchase Agreement between Oclaro Technology and II-VI (as previously disclosed in our Current Report on Form 8-K filed on October 11, 2013) (the "Settlement Agreement"). Of the \$10.0 million aggregate holdback, a total of \$2.35 million was paid to us in January 2015 and a total of \$7.65 million was released to II-VI Holdings B.V. We and the II-VI Parties also agreed to a mutual release of certain claims related to the Share and Asset Purchase Agreement, the Asset Purchase Agreement and certain related documents and transactions. This transaction is more fully discussed in Note 5, Business Combinations and Dispositions.

RESULTS OF OPERATIONS

On September 12, 2013 we completed a Share and Asset Purchase Agreement with II-VI for the sale of our Zurich Business. On October 10, 2013, we entered into an Asset Purchase Agreement with II-VI for the sale of our Amplifier Business, which subsequently closed on November 1, 2013. We have classified the financial results of the Zurich and

Amplifier Businesses as discontinued operations for all periods presented. The following presentations relate to continuing operations only and accordingly excludes the financial results of the Zurich and Amplifier Businesses, unless otherwise indicated.

Table of Contents

The following tables sets forth our condensed consolidated results of operations for the periods indicated, along with amounts expressed as a percentage of revenues, and comparative information regarding the absolute and percentage changes in these amounts:

	Three Months Ended				Change (Thousands)	Increase (Decrease)	
	March 28, 2015 (Thousands) %		March 29, 2014 (Thousands) %			% (Decrease)

Revenues

Revenues for the three months ended March 28, 2015 decreased by \$12.4 million, or 13 percent, compared to the three months ended March 29, 2014. Compared to the three months ended March 29, 2014, revenues from sales of our 100 Gb/s transmission modules increased by \$11.2 million, or 59 percent; revenues from sales of our 40 Gb/s transmission modules decreased by \$6.2 million, or 25 percent; revenues from sales of our 10 Gb/s transmission modules decreased by \$9.8 million, or 23 percent; and revenues from sales of our industrial and consumer products decreased by \$7.6 million, or 100 percent, which related to our sale of the Komoro Business. This product mix shift reflects the continued focus on the market for higher speed products that are smaller in size and have lower power consumption. For the three months ended March 28, 2015, four customers accounted for 10 percent or more of our revenues, representing approximately 19 percent, 16 percent, 11 percent and 10 percent of our revenues, respectively. For the three months ended March 29, 2014, three customers accounted for 10 percent or more of our revenues, representing approximately 21 percent, 12 percent and 11 percent of our revenues, respectively.

Revenues for the nine months ended March 28, 2015 decreased by \$35.9 million, or 12 percent, compared to the nine months ended March 29, 2014. Compared to the nine months ended March 29, 2014, revenues from sales of our 100 Gb/s transmission modules increased by \$30.9 million, or 57 percent; revenues from sales of our 40 Gb/s transmission modules decreased by \$14.0 million, or 19 percent; revenues from sales of our 10 Gb/s transmission modules decreased by \$40.0 million, or 28 percent; and revenues from sales of our industrial and consumer products decreased by \$12.8 million, or 58 percent, which related to our sale of the Komoro Business. This product mix shift reflects the continued focus on the market for higher speed products that are smaller in size and have lower power consumption.

Table of Contents

For the nine months ended March 28, 2015, three customers accounted for 10 percent or more of our revenues, representing approximately 22 percent, 14 percent and 10 percent of our revenues, respectively. For the nine months ended March 29, 2014, three customers accounted for 10 percent or more of our revenues, representing approximately 18 percent, 13 percent and 10 percent of our revenues, respectively.

Gross Profit

Gross profit is calculated as revenues less cost of revenues. Gross margin rate is gross profit reflected as a percentage of revenues.

Our cost of revenues consists of the costs associated with manufacturing our products, and includes the purchase of raw materials, labor costs and related overhead, including stock-based compensation charges and the costs charged by our contract manufacturers for the products they manufacture for us. Charges for excess and obsolete inventory are also included in cost of revenues. Costs and expenses related to our manufacturing resources incurred in connection with the development of new products are included in research and development expenses.

Our gross margin rate increased to approximately 15 percent for the three months ended March 28, 2015, compared to 12 percent for the three months ended March 29, 2014. A better product mix of higher margin 100 Gb/s products and favorable foreign currency exchange movements contributed approximately 7 percentage points of improvement. This improvement was partially offset by a 4 percentage point decrease due to the absence of relatively higher margin industrial and consumer products as a result of the sale of our Komoro Business in the second quarter of fiscal year 2015.

Our gross margin rate increased to approximately 16 percent for the nine months ended March 28, 2015, compared to 13 percent for the nine months ended March 29, 2014. A better product mix of higher margin 100 Gb/s products and favorable foreign currency exchange movements contributed approximately 5 percentage points of improvement. These improvements were offset by a 1 percentage point decrease resulting from out-of-period adjustments made to correct our inventory valuation and purchase commitment accrual, and a 1 percentage point decrease due to the absence of relatively higher margin industrial and consumer products as a result of the sale of our Komoro Business in the second quarter of fiscal year 2015.

Research and Development Expenses

Research and development expenses consist primarily of salaries and related costs of employees engaged in research and design activities, including stock-based compensation charges related to those employees, costs of design tools and computer hardware, costs related to prototyping and facilities costs for certain research and development focused sites.

Research and development expenses decreased to \$11.7 million for the three months ended March 28, 2015, from \$14.6 million for the three months ended March 29, 2014. The decline was primarily related to a decrease of \$1.3 million from the sale of our Komoro Business in the second quarter of fiscal year 2015, a decrease of \$1.2 million related to the impact of the Japanese yen, British pound, and Euro weakening relative to the U.S. dollar, and a decrease of \$0.8 million as a result of our restructuring plan which was initiated during the first quarter of fiscal year 2014. These decreases were partially offset by an increase of \$0.4 million in stock compensation charges and variable compensation.

Research and development expenses decreased to \$37.4 million for the nine months ended March 28, 2015 from \$49.1 million for the nine months ended March 29, 2014. The decline was primarily related to a decrease of \$6.7 million as a result of our restructuring plan which was initiated during the first quarter of fiscal year 2014, a decrease of \$2.1 million related to the impact of the Japanese yen, British pound, and Euro weakening relative to the U.S. dollar, a decrease of \$1.9 million related to the sale of our Komoro Business in the first month of the second quarter of fiscal year 2015, and a decrease of \$1.4 million related to our decision to no longer develop the WSS product line. These decreases were partially offset by an increase of \$0.4 million in stock compensation charges and variable compensation.

Selling, General and Administrative Expenses

Selling, general and administrative expenses consist primarily of personnel-related expenses, including stock-based compensation charges related to employees engaged in sales, general and administrative functions, legal and professional fees, facilities expenses, insurance expenses and certain information technology costs.

Selling, general and administrative expenses decreased to \$12.0 million for the three months ended March 28, 2015, from \$17.4 million for the three months ended March 29, 2014. The decline was primarily related to a decrease of \$1.7 million in stock compensation costs compared to the prior year primarily due to a grant of 0.8 million RSUs to our chief executive officer in fiscal year 2014 that vested in full on grant date, a decrease of \$1.2 million related to the impact of the Japanese yen, British pound and Euro weakening relative to the U.S. dollar, a decrease of \$0.7 million related to the sale of our Komoro Business in the the second quarter of fiscal year 2015, a decrease of \$0.6 million as a result of our restructuring plan which was initiated

Table of Contents

during the first quarter of fiscal year 2014, a decrease of \$0.6 million in audit and legal costs, and a decrease of \$0.5 million related to variable compensation.

Selling, general and administrative expenses decreased to \$41.1 million for the nine months ended March 28, 2015, from \$56.9 million for the nine months ended March 29, 2014. The decline was primarily related to a decrease of \$7.5 million as a result of our restructuring plan which was initiated during the first quarter of fiscal year 2014, a decrease of \$3.3 million in audit and legal costs, a decrease of \$1.5 million related to the impact of the Japanese yen, British pound and Euro weakening relative to the U.S. dollar, a decrease of \$1.3 million in stock compensation costs compared to the prior year primarily related to a grant of 0.8 million RSUs to our chief executive officer in fiscal year 2014 that vested in full on grant date, a decrease of \$1.1 million related to the sale of our Komoro Business in the first month of the second quarter of fiscal year 2015, and a decrease of \$0.8 million related to variable compensation.

Amortization of Other Intangible Assets

Amortization of other intangible assets declined during the three and nine months ended March 28, 2015 as compared to the three and nine months ended March 29, 2014, mostly due to the sale of our Komoro business.

With the sale of our Komoro Business, we expect the amortization of intangible assets to be \$1.0 million for fiscal year 2015, \$0.8 million for each fiscal year 2016 through 2017, \$0.7 million for fiscal year 2018, \$0.1 million for fiscal year 2019 and \$0.1 million thereafter, based on the current level of our other intangible assets as of March 28, 2015.

Restructuring, Acquisition and Related Costs

In the second quarter of fiscal year 2015, we completed the sale of our Komoro Business to Ushio Opto, and recognized a gain of \$8.3 million within restructuring, acquisition and related (income) expense, net in the condensed consolidated statements of operations.

During the first quarter of fiscal year 2014, we initiated a restructuring plan to simplify our operating footprint, reduce our cost structure and focus our research and development investment in the optical communications market where we can leverage our core competencies. During the three and nine months ended March 28, 2015, we recorded restructuring charges of \$1.5 million and \$1.7 million, respectively, in connection with this restructuring plan. The restructuring charges for the three months ended March 28, 2015 relate to workforce reductions. The restructuring charges for the nine months ended March 28, 2015 include \$1.8 million related to workforce reductions and a \$0.1 million reversal of restructuring charges related to revised estimates for lease cancellations and commitments. During the three and nine months ended March 28, 2015, we made scheduled payments of \$0.3 million and \$2.0 million, respectively. During the three and nine months ended March 29, 2014, we recorded restructuring charges of \$2.2 million and \$8.0 million, respectively, in connection with this restructuring plan. The restructuring charges during the three and nine months ended March 29, 2014 related primarily to workforce reductions. During the three and nine months ended March 29, 2014, we made scheduled payments of \$4.2 million and \$7.3 million, respectively, to settle a portion of these restructuring liabilities. As of March 28, 2015, we had \$1.7 million in accrued restructuring liabilities related to this restructuring plan.

In connection with the acquisition of Opnext, we initiated a restructuring plan to integrate our acquisition of Opnext. We recorded no restructuring charges related to this plan during the current year. During the three and nine months ended March 29, 2014, we recorded restructuring charges of zero and \$1.1 million, respectively, in connection with this restructuring plan. The restructuring charges recorded in fiscal year 2014 included \$0.9 million in external consulting charges and professional fees associated with reorganizing the infrastructure and \$0.1 million in revised estimates related to lease cancellations and commitments. During the three and nine months ended March 29, 2014, we made scheduled payments of \$0.2 million and \$2.2 million, respectively, to settle these restructuring liabilities. As of March 28, 2015, we had no further accrued restructuring liabilities related to this restructuring plan.

During fiscal year 2012, we initiated a restructuring plan in connection with the transfer of a portion of our Shenzhen, China manufacturing operations to Venture Corporation Limited ("Venture"). This transition occurred in a phased and gradual transfer of certain products and was recently completed. In connection with this transition, during the three

and nine months ended March 28, 2015, we recorded restructuring charges related to employee separation charges of \$0.8 million and \$2.6 million, respectively. During the three and nine months ended March 28, 2015, we made scheduled payments of \$0.2 million and \$2.3 million, respectively, to settle a portion of these restructuring liabilities. During the three and nine months ended March 29, 2014, we recorded restructuring charges related to employee separation charges of \$0.9 million and \$2.7 million, respectively. During the three and nine months ended March 29, 2014, we made scheduled payments of \$1.5 million and \$3.8 million, respectively, to settle a portion of these restructuring liabilities. As of March 28, 2015, we had \$0.7 million in accrued restructuring liabilities related to this restructuring plan.

Table of Contents

We expect to incur an additional \$3.0 million to \$5.0 million, in aggregate, in restructuring charges in the fourth quarter of fiscal year 2015 in connection with these restructuring plans.

Flood-related (Income) Expense, Net

In October 2011, certain areas in Thailand suffered major flooding as a result of monsoons. This flooding had a material and adverse impact on our business. During the three months ended March 29, 2014, we recorded \$1.7 million in flood-related income in our condensed consolidated statement of operations, primarily relating to insurance settlement proceeds received in the third quarter of fiscal year 2014. During the nine months ended March 29, 2014, we recorded \$1.8 million in flood-related income in our condensed consolidated statement of operations, primarily consisting of \$3.7 million in insurance settlement proceeds received in the second and third quarters of fiscal year 2014, partially offset by an out-of-period adjustment of \$2.0 million related to the impairment of leased assets assumed pursuant to the Opnext merger that had been damaged by the flooding.

Other Income (Expense)

Other income (expense) was \$2.7 million in income for the three months ended March 28, 2015 as compared to \$0.5 million in income for the three months ended March 29, 2014. This change in other income (expense) primarily related to a \$2.3 million increase in foreign currency transaction gains during the three months ended March 28, 2015, as compared to the three months ended March 29, 2014, related to the revaluation of our U.S. dollar denominated balances in our U.K. and Japan subsidiaries. Also, other income increased by \$0.4 million mainly due to the receipt of a royalty settlement in the third quarter of fiscal year 2015. These increases were partially offset by a \$0.6 million increase in interest expense mainly related to the issuance of our convertible notes in the third quarter of fiscal 2015. Other income (expense) was \$0.7 million in income for the nine months ended March 28, 2015 as compared to \$9.1 million in expense for the nine months ended March 29, 2014. This change in other income (expense) primarily related to a \$8.3 million decrease in interest expense related to the redemption exchange make-whole payment for the conversion of the convertible notes into common stock in the second quarter of fiscal year 2014. The change in other income (expense) also included a \$0.7 million improvement in foreign currency transaction gains during the nine months ended March 28, 2015, as compared to the nine months ended March 29, 2014, related to the revaluation of our U.S. dollar denominated balances in our U.K. and Japan subsidiaries.

Income Tax (Benefit) Provision

The income tax benefit of \$0.5 million and income tax provision of \$0.4 million for the three and nine months ended March 28, 2015, respectively, and the income tax provision of \$0.7 million and \$2.5 million for the three and nine months ended March 29, 2014, respectively, relates primarily to our foreign operations.

The total amount of our unrecognized tax benefits as of March 28, 2015 and June 28, 2014 were approximately \$3.6 million and \$4.2 million, respectively. As of March 28, 2015, we had \$3.0 million of unrecognized tax benefits that, if recognized, would affect our effective tax rate. While it is often difficult to predict the final outcome of any particular uncertain tax position, we believe that unrecognized tax benefits could decrease by approximately \$1.0 million in the next twelve months.

On December 19, 2014, the President of the United States signed into law The Tax Increase Prevention Act of 2014, which retroactively extends more than 50 expired tax provisions through 2014. Among the extended provisions is the Sec. 41 research credit for qualified research expenditures incurred through the end of 2014. The benefit of the reinstated credit did not impact the condensed consolidated statement of operations in the period of enactment, which was the second quarter of fiscal year 2015, as the research and development credit carryforwards are offset by a full valuation allowance.

Table of Contents**Income (Loss) from Discontinued Operations, Net of Tax**

During the nine months ended March 28, 2015, we recorded a loss from discontinued operations of \$8.5 million related to the sale of the Zurich and Amplifier Businesses. This loss primarily related to the release of hold-back payments due from II-VI and II-VI Holdings B.V. On December 30, 2014, we entered into a Settlement Agreement with II-VI and II-VI Holdings B.V. regarding disposition of the amounts held back by the II-VI parties pursuant to the Share and Asset Purchase Agreements. Of the \$10.0 million subject to hold-back until December 31, 2014, we received \$2.35 million in January 2015 and we released II-VI from the remaining \$7.65 million. We recorded the \$7.65 million release of the hold-backs as a loss from discontinued operations within the condensed consolidated statement of operations during the nine months ended March 28, 2015. In connection with the Settlement Agreement, we also agreed with the II-VI parties to a mutual release of certain claims related to the Share and Asset Purchase Agreements, and certain related documents and transactions.

During the three and nine months ended March 29, 2014, we recorded a loss of \$0.6 million and a gain of \$69.1 million, respectively, related to the sale of the Amplifier Business. During the three and nine months ended March 29, 2014, we recorded a gain on the sale of the Zurich Business of \$0.4 million and \$63.2 million, respectively. During the three months ended March 29, 2014, we recorded a loss from discontinued operations of the Zurich and Amplifier Businesses of \$0.3 million and during the nine months ended March 29, 2014, we recorded income from discontinued operations of \$132.7 million.

The following table sets forth the results of the discontinued operations of our Zurich and Amplifier Businesses and the year-over-year increases (decreases) in our results:

	Three Months Ended			Nine Months Ended		
	March 28, 2015 (Thousands)	March 29, 2014	Change	March 28, 2015 (Thousands)	March 29, 2014	Change

RECENT ACCOUNTING STANDARDS

See Note 2, Recent Accounting Standards, to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for information regarding the effect of new accounting pronouncements on our condensed consolidated financial statements.

APPLICATION OF CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial condition and results of operations is based on our condensed consolidated financial statements contained elsewhere in this Quarterly Report on Form 10-Q, which have been prepared in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”). The preparation of our financial statements requires us to make estimates and judgments that affect our reported assets and liabilities, revenues and expenses and other financial information. Actual results may differ significantly from those based on our estimates and judgments or could be materially different if we used different assumptions, estimates or

conditions. In addition, our financial condition and results of operations could vary due to a change in the application of a particular accounting policy.

We identified our critical accounting policies in our Annual Report on Form 10-K for the year ended June 28, 2014 (2014 Form 10-K) related to revenue recognition and sales returns, inventory valuation, business combinations, impairment of goodwill and other intangible assets, accounting for stock-based compensation and income taxes. It is important that the discussion of our operating results be read in conjunction with the critical accounting policies discussed in our 2014 Form 10-K.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

The condensed consolidated statement of cash flows and the discussion below on cash flows from operating, investing and financing activities have not been adjusted for the effects of the discontinued operations.

Cash Flows from Operating Activities

Net cash used in operating activities for the nine months ended March 28, 2015 was \$39.3 million, primarily resulting from a net loss of \$42.8 million and a \$14.3 million decrease in cash due to changes in operating assets and liabilities, partially offset by non-cash adjustments of \$17.9 million. The \$14.3 million decrease in cash due to changes in operating assets and liabilities was comprised of a \$7.9 million increase in accounts receivable attributable to timing of payments from a significant customer, \$8.4 million decrease in accrued expenses and other liabilities, a \$4.6 million increase in inventories resulting from the receipt of inventory intended for sale in future quarters, and a \$0.9 million increase in other non-current assets, partially offset by a \$7.0 million decrease in prepaid expenses and other current assets and a \$0.5 million increase in accounts payable largely attributable to the timing of purchases and payments to vendors. The \$17.9 million increase in cash resulting from non-cash adjustments primarily consisted of \$14.1 million in depreciation and amortization, a \$7.7 million loss from discontinued operations related to a Settlement Agreement that releases II-VI and II-VI Holdings B.V. from making certain hold-back payments due in connection with the sale of the Zurich and Amplifier Businesses, \$4.6 million of expense related to stock-based compensation, partially offset by an \$8.3 million gain in connection with the sale of the Komoro Business in the second quarter of fiscal year 2015 and \$0.7 million from the amortization of a deferred gain from a sales-leaseback transaction in Caswell, U.K.

Net cash used in operating activities for the nine months ended March 29, 2014 was \$65.4 million, primarily resulting from non-cash adjustments of \$100.3 million and a \$7.0 million decrease in cash due to changes in operating assets and liabilities, partially offset by net income of \$41.8 million. The \$100.3 million decrease in cash resulting from non-cash adjustments primarily consisted of a \$69.1 million gain on the sale of the Amplifier Business, a \$63.2 million gain on the sale of the Zurich Business, \$1.6 million from the amortization of deferred gain from sales-leaseback transactions, partially offset by \$21.6 million in depreciation and amortization, \$5.0 million of expense related to stock-based compensation, \$4.3 million related to the amortization and write-off of the issuance costs of the term loan and \$2.0 million related to non-cash flood-related impairments. The \$7.0 million decrease in cash due to changes in operating assets and liabilities was comprised of a \$20.8 million increase in prepaid expenses and other current assets, a \$15.2 million decrease in accrued expenses and other liabilities, a \$8.3 million decrease in accounts payable, partially offset by a \$32.1 million decrease in accounts receivable, a \$4.1 million decrease in inventories and a \$1.3 million decrease in other non-current assets.

Cash Flows from Investing Activities

Net cash provided by investing activities for the nine months ended March 28, 2015 was \$2.0 million, primarily consisting of proceeds from the sale of the Komoro Business of \$12.3 million, net of deal related costs, \$2.4 million related to the receipt of hold-back payments from II-VI in connection with the sale of the Amplifier and Zurich Businesses, \$0.9 million reduction in restricted cash and \$0.1 million related to the sale of short-term investments, partially offset by \$13.8 million used in capital expenditures.

Net cash provided by investing activities for the nine months ended March 29, 2014 was \$172.3 million, primarily consisting of \$93.5 million proceeds from the sale of Zurich Business, \$84.6 million from the sale of the Amplifier Business, and \$2.1 million from the sale of certain assets, which were partially offset by \$6.1 million used in capital expenditures and a \$1.9 million increase in restricted cash.

Cash Flows from Financing Activities

Net cash provided by financing activities for the nine months ended March 28, 2015 was \$58.7 million, primarily consisting of \$61.6 million proceeds from the sale of convertible notes, partially offset by \$3.0 million in payments on capital lease obligations.

Net cash used in financing activities for the nine months ended March 29, 2014 was \$71.1 million, primarily consisting of \$65.0 million in repayments on a term loan and our revolving credit facility, and \$6.1 million in payments on capital lease obligations.

Credit Line and Notes

On February 19, 2015, we closed a private placement of \$65.0 million in aggregate principal Convertible Senior Notes due 2020 (the “6.00% Notes”). The sale of the 6.00% Notes resulted in proceeds of approximately \$61.6 million, after deducting the discount. We also incurred offering costs of \$0.6 million in connection with the 6% Notes. As of March 28, 2015, the net carrying value of the liability component was \$61.7 million and the unamortized value of the discount was \$3.3 million. Interest on the 6.00% Notes is payable semi-annually in arrears on February 15 and August 15 of each year, beginning on

Table of Contents

August 15, 2015. During the three and nine months ended March 28, 2015, we recorded \$0.5 million in interest expense related to these 6.00% Notes. See Note 6, Credit Line and Notes, for additional information regarding the 6.00% Notes.

As of March 28, 2015, we had a \$40.0 million revolving credit facility with Silicon Valley Bank. As of March 28, 2015, there were no amounts outstanding under this credit facility. See Note 6, Credit Line and Notes, for additional information regarding this credit facility.

Future Cash Requirements

As of March 28, 2015, we held \$123.9 million in cash, cash equivalents and restricted cash, comprised of \$119.8 million in cash and cash equivalents and \$4.1 million in restricted cash (excluding \$0.2 million of restricted cash in other non-current assets); and we had working capital of \$197.1 million.

On October 27, 2014, we completed the sale of our Komoro Business. We received 1.6 billion Japanese yen (approximately \$14.8 million based on the exchange rate on October 27, 2014) at the closing and expect to receive an additional 250 million Japanese yen (approximately \$2.1 million), which was paid into escrow and released to Oclaro Japan on April 24, 2015.

Based on our current cash and cash equivalent balances, together with our existing credit facility, we believe that we have sufficient funds to support our operations through the next 12 months, including costs associated with the implementation of our restructuring activities.

In the event we need additional liquidity beyond our current expectations, such as to fund future growth or strengthen our balance sheet or to fund the cost of restructuring activities, we may find it necessary to lower our operating income break-even level and undertake additional cost cutting measures. We will continue to explore other sources of additional liquidity. These additional sources of liquidity could include one, or a combination, of the following:

(i) issuing equity securities, (ii) incurring indebtedness secured by our assets, (iii) issuing debt and/or convertible debt securities, or (iv) selling product lines, other assets and/or portions of our business. There can be no guarantee that we will be able to raise additional funds on terms acceptable to us, or at all.

We have incurred significant operating losses from continuing operations and generated negative cash flows from operations for fiscal year 2014 and for the nine months ended March 28, 2015. Recoverability of a major portion of the recorded asset amounts shown in the accompanying balance sheet is dependent upon us having sufficient resources to operate our business. In addition to the availability of our cash resources as of March 28, 2015, the continued operation of our business is dependent upon our achieving cash flows expected to be generated from the execution of our current operating plan, including anticipated restructuring plans, together with amounts expected to be available under our Credit Agreement. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should we be unable to continue in existence.

In addition, we have been operating in China for an extended period of time and have accumulated significant intercompany balances with our related entities. Our ability to repay or collect these balances may be restricted by Chinese laws and, as a result, we may be unable to successfully pay down or collect on these balances. As a consequence, we may be assessed additional taxes in China if we are unable to claim bad debt deductions or incur debt forgiveness income from the cancellation of these intercompany balances. Additionally, if we are found not to have complied with the various local laws surrounding cross border payments, we may incur penalties and fines for non-compliance. Any such taxes, penalties and/or fines could be significant in amount and, as a result, could have a material adverse effect on our financial condition, including our cash and cash equivalent balances.

For additional information on the risks we face related to future cash requirements, see Item 1A. Risk Factors under “— Risks Related to Our Business — We have a history of large operating losses and we may not be able to achieve profitability in the future and maintain sufficient levels of liquidity,” included elsewhere in this Quarterly Report on Form 10-Q.

As of March 28, 2015, \$43.8 million of the \$123.9 million of our cash, cash equivalents and restricted cash was held by our foreign subsidiaries. If these funds are needed for our operations in the United States, we could be required to accrue and pay foreign withholding taxes to repatriate these funds. However, our intent is to permanently reinvest

these funds outside of the U.S., except for our Shanghai, China; Korean; Swiss, Luxembourg, Israel and Japanese entities where closure follows our decision to exit certain businesses in fiscal year 2015.

Off-Balance Sheet Arrangements

We indemnify our directors and certain employees as permitted by law, and have entered into indemnification agreements with our directors and executive officers. We have not recorded a liability associated with these indemnification arrangements, as we historically have not incurred any material costs associated with such indemnification obligations. Costs associated with such indemnification obligations may be mitigated by insurance coverage that we maintain, however, such insurance may not cover any, or may cover only a portion of, the amounts we may be required to pay. In addition, we may not be able to maintain such insurance coverage in the future.

Table of Contents

We also have indemnification clauses in various contracts that we enter into in the normal course of business, such as indemnification in favor of customers in respect of liabilities they may incur as a result of purchasing our products should such products infringe the intellectual property rights of a third party. We have not historically paid out any material amounts related to these indemnifications; therefore, no accrual has been made for these indemnifications.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For quantitative and qualitative disclosures about market risk affecting us, see “Quantitative and Qualitative Disclosures About Market Risk” in Item 7A of Part II of our Annual Report on Form 10-K for the fiscal year ended June 28, 2014, which is incorporated herein by reference. Our exposure to market risk has not changed materially since June 28, 2014.

INTEREST RATES

We finance our operations through a mixture of issuances of equity securities, finance leases, working capital and by drawing on our Credit Agreement. We have exposure to interest rate fluctuations on our cash deposits and for amounts borrowed under our Credit Agreement, convertible notes and through our capital leases. At March 28, 2015, there were no amounts outstanding under our credit facility, \$65.0 million of convertible notes with an interest rate of 6.0 percent and \$5.6 million outstanding under capital leases. An increase in our average interest rate by 1.0 percent would increase our annual interest expense by approximately \$0.7 million.

We monitor our interest rate risk on cash balances primarily through cash flow forecasting. Cash that is surplus to immediate requirements is invested in short-term deposits with banks accessible with one day’s notice and invested in overnight money market accounts. We believe our current interest rate risk is immaterial.

FOREIGN CURRENCY

As our business is multinational in scope, we are subject to fluctuations based upon changes in the exchange rates between the currencies in which we collect revenues and pay expenses. We expect that a majority of our revenues will continue to be denominated in U.S. dollars, while a significant portion of our expenses will continue to be denominated in U.K. pounds sterling and the Japanese yen. Fluctuations in the exchange rate between the U.S. dollar, the U.K. pound sterling, the Japanese yen and, to a lesser extent, other currencies in which we collect revenues and pay expenses could affect our operating results. This includes the Chinese yuan and the Euro in which we pay expenses in connection with operating our facilities in Shenzhen and Shanghai, China; and San Donato, Italy. To the extent the exchange rate between the U.S. dollar and these currencies were to fluctuate more significantly than experienced to date, our exposure would increase.

As of March 28, 2015, our U.K. subsidiary had \$2.0 million, net, in U.S. dollar denominated operating intercompany payables, \$27.8 million in U.S. dollar denominated accounts receivable, net of accounts payable, related to sales to external customers and purchases from suppliers, and \$8.0 million in U.S. dollar denominated cash accounts. It is estimated that a 10 percent fluctuation in the U.S. dollar relative to the U.K. pound sterling would lead to a profit of \$3.4 million (U.S. dollar strengthening), or loss of \$3.4 million (U.S. dollar weakening) on the translation of these receivables and other cash balances, which would be recorded as gain (loss) on foreign currency transactions, net, in our condensed consolidated statement of operations.

As of March 28, 2015, our Japan subsidiary had \$47.5 million, net, in U.S. dollar denominated operating intercompany payables, \$7.5 million in U.S. dollar denominated accounts payable, net of accounts receivable, related to sales to external customers and purchases from suppliers, and \$21.1 million in U.S. dollar denominated cash accounts. It is estimated that a 10 percent fluctuation in the U.S. dollar relative to the Japanese yen would lead to a profit of \$3.4 million (U.S. dollar weakening), or loss of \$3.4 million (U.S. dollar strengthening) on the translation of these balances, which would be recorded as gain (loss) on foreign currency transactions, net, in our condensed consolidated statement of operations.

BANK LIQUIDITY RISK

As of March 28, 2015, we have approximately \$119.8 million in operating accounts that are held with domestic and international financial institutions. These cash balances could be lost or become inaccessible if the underlying financial institutions fail or if they are unable to meet the liquidity requirements of their depositors and they are not supported by the national government of the country in which such financial institution is located. Notwithstanding, we have not incurred any losses and have had full access to our operating accounts to date. See Note 3, Balance Sheet Details. We believe any failures of domestic and international financial institutions could impact our ability to fund our operations in the short term.

HEDGING PROGRAM

We are currently party to foreign currency forward contracts in an effort to mitigate a portion of our exposure to fluctuations between the U.S. dollar and the Japanese yen and between the U.S. dollar and the U.K. pound sterling. We do not currently hedge our exposure to the Chinese yuan or the Euro, but we may in the future if conditions warrant. We also do not currently hedge our exposure related to our U.S. dollar denominated intercompany payables and receivables. We may be required to convert currencies to meet our obligations. Under certain circumstances, foreign currency forward contracts can have an adverse effect on our financial condition. During the three and nine months ended March 28, 2015, we entered into foreign currency forward exchange contracts, which expired in the same fiscal quarter in which they were opened. In connection with these hedges, during the three and nine

Table of Contents

months ended March 28, 2015, we recorded a \$0.1 million loss and a \$0.6 million loss, respectively, in gain (loss) in foreign currency transactions, net within our condensed consolidated statement of operations. As of March 28, 2015, we did not have any outstanding foreign currency forward contracts.

ITEM 4. CONTROLS AND PROCEDURES

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of March 28, 2015. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, or the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by the company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of March 28, 2015, our Chief Executive Officer and Chief Financial Officer have concluded that, as of such date, our disclosure controls and procedures were not effective at the reasonable assurance level.

As disclosed in our Annual Report on Form 10-K for the year ended June 28, 2014, we identified a material weakness in our internal control over financial reporting such that our processes, procedures, and controls related to the review and analysis of inventory and property and equipment were not effective to ensure that certain amounts related to these financial statement accounts were accurately reported in a timely manner. Over the past three quarters, we have implemented several measures, including new comprehensive global inventory policies and procedures to ensure inventory is valued timely and accurately. We have also assigned new personnel to inventory accounting roles that have the experience and expertise to ensure control deficiencies do not reoccur. In addition, we have developed a global fixed asset policy which established requirements and guidelines for the performance of physical counts and valuation of fixed assets. Pursuant to this new policy, we will perform a full fixed asset count in fiscal year 2015. We have also taken steps to ensure that personnel assigned to fixed asset accounting roles have the experience and expertise to ensure control deficiencies do not reoccur. Our remediation efforts, including the testing of these controls, will continue throughout our fiscal year 2015. We expect that the material weakness will be remediated during fiscal year 2015 once these controls have been operational for a sufficient period of time to allow management to conclude that these controls are operating effectively.

Notwithstanding the ineffectiveness of our disclosure controls and procedures as of March 28, 2015 and the material weakness in our internal control over financial reporting that existed as of that date as described above, management believes that (i) this Form 10-Q does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which they were made, not misleading with respect to the periods covered by this report and (ii) the condensed consolidated financial statements, and other financial information, included in this report fairly present in all material respects in accordance with U.S. GAAP our financial condition, results of operations and cash flows as of, and for, the dates and periods presented.

Except as noted in the preceding paragraphs of this Item 4, there was no change in our internal control over financial reporting during the three months ended March 28, 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Overview

In the ordinary course of business, we are involved in various legal proceedings, and we anticipate that additional actions will be brought against us in the future. The most significant of these proceedings are described below. These legal proceedings, as well as other matters, involve various aspects of our business and a variety of claims in various jurisdictions. Complex legal proceedings frequently extend for several years, and a number of the matters pending against us are at very early stages of the legal process. As a result, some pending matters have not yet progressed sufficiently through discovery and/or development of important factual information and legal issues to enable us to determine whether the proceeding is material to us or to estimate a range of possible loss, if any. Unless otherwise disclosed, we are unable to estimate the possible loss or range of loss for the legal proceedings described below. While it is not possible to accurately predict or determine the eventual outcomes of these items, an adverse determination in one or more of these items currently pending could have a material effect on our results of operations, financial position or cash flows.

Raysung Commercial Litigation

On October 23, 2013, Xi'an Raysung Photonics Inc., or Raysung, filed a civil suit against our wholly-owned subsidiary, Oclaro Technology (Shenzhen) Co., Ltd. (formerly known as Bookham Technology (Shenzhen) Co., Ltd.), or Oclaro Shenzhen, in the Xi'an Intermediate People's Court in Shaanxi Province of the People's Republic of China, or the Xi'an Court. The complaint filed by Raysung alleges that Oclaro Shenzhen terminated its purchase order pursuant to which Raysung had supplied certain products and was to supply certain products to Oclaro Shenzhen.

Raysung initially requested that the court award damages of RMB 4,796,531 (equivalent to approximately \$0.8 million at the exchange rate in effect March 28, 2015), and requested that Oclaro Shenzhen take the finished products that are now stored in Raysung's warehouse (the value of the finished product is RMB 13,505,162 (equivalent to approximately \$2.2 million at the exchange rate in effect March 28, 2015)) and requested that Oclaro Shenzhen pay its court fees in connection with this suit.

The Xi'an Court delivered an Asset Preservation Order which was served on Oclaro Shenzhen and the local Customs office. According to the Asset Preservation Order, Oclaro Shenzhen was ordered to maintain RMB 15,000,000 (equivalent to approximately \$2.4 million at the exchange rate in effect March 28, 2015) or assets equivalent to the said amount during the litigation process, and the Customs office was ordered to restrict Oclaro Shenzhen's equipment from being exported before the Asset Preservation Order is lifted. On November 11, 2013, Oclaro Shenzhen entered into a settlement agreement. Under the terms of this settlement agreement, Oclaro Shenzhen agreed to pay \$500,000 in payment of invoices for certain materials to Raysung and to work with Raysung to requalify it as a vendor for certain Oclaro Shenzhen manufacturing requirements, in consideration of which Raysung agreed to submit the settlement agreement to the Xi'an Court so it could issue a civil mediation agreement, apply for a discharge of the Asset Preservation Order and waive the right to bring any legal actions against Oclaro Shenzhen relating to these matters. Oclaro Shenzhen performed its obligations under the settlement agreement, however, on January 15, 2014, Raysung applied to the Xi'an Court to terminate the settlement agreement and add Oclaro, Inc. as a co-defendant in the original civil suit.

On March 26, 2014, the Xi'an Court froze RMB 15,000,000 (equivalent to approximately \$2.4 million at the exchange rate in effect March 28, 2015) of cash held in Oclaro Shenzhen's bank account in China. On April 30, 2014, Oclaro Shenzhen submitted a challenge to the jurisdiction of the Xi'an Court. On May 26, 2014, the Xi'an Court overruled the jurisdictional challenge. On June 4, 2014, Oclaro Shenzhen filed an appeal with the Shaanxi High Court to revoke the civil order of the Xi'an Court overruling Oclaro Shenzhen's jurisdictional challenge. The Shaanxi High Court held hearings on July 15, 2014 and July 30, 2014, and on August 20, 2014 sustained the Xi'an Court's civil order on jurisdiction and transferred the case back to the Xi'an Court for substantive proceedings. On September 22, 2014, Raysung amended its complaint in the Xi'an Court proceeding by increasing its claims to RMB 36.2 million (equivalent to approximately \$5.9 million at the exchange rate in effect on March 28, 2015). On October 22, 2014, the Xi'an Court conducted a hearing on the substantive elements of Raysung's claims. At the same hearing, Oclaro

Shenzhen filed counterclaims against Raysung for RMB 7.4 million (equivalent to approximately \$1.2 million at the exchange rate in effect on March 28, 2015) of losses resulting from supply of products with unqualified materials. On December 17, 2014, the Xi'an Court conducted a hearing on the substantive elements of each party's claims against the other party.

On April 2, 2015, the Xi'an Court released RMB 5,000,000 of cash (equivalent to approximately \$0.8 million at the exchange rate in effect March 28, 2015) previously frozen in Oclaro Shenzhen's bank account in exchange for a new lien on physical assets located at Oclaro Shenzhen's facility with an equivalent appraised value. The Asset Preservation Order is currently in effect until March 2016. On April 10, 2015, the Xi'an Court issued a decision, ruling that Oclaro Shenzhen should pay Raysung RMB 11.4 million (equivalent to approximately \$1.9 million at the exchange rate in effect March 28, 2015). The Xi'an

Table of Contents

Court also dismissed Raysung's other claims and each of Oclaro Shenzhen's counterclaims. On April 24, 2015, Oclaro Shenzhen filed an appeal of the Xi'an Court decision with the Shaanxi High Court, on the basis of both factual and legal error in the underlying decision. As of May 7, 2015, no judge has been assigned to the appellate case and no hearing dates have been established. Oclaro, Inc. and Oclaro Shenzhen continue to believe that they have meritorious defenses to the claims made by Raysung and intend to defend this litigation vigorously.

ITEM 1A. RISK FACTORS

Investing in our securities involves a high degree of risk. The risks described below are not the only ones facing us. Additional risks not currently known to us or that we currently believe are immaterial also may impair our business, operations, liquidity and stock price materially and adversely. You should carefully consider the risks and uncertainties described below in addition to the other information included or incorporated by reference in this Quarterly Report on Form 10-Q. If any of the following risks actually occur, our business, financial condition or results of operations would likely suffer. In that case, the trading price of our common stock could fall and you could lose all or part of your investment.

We may not be able to ramp the production of our new products to customer required volumes, which could result in delayed or lost revenue.

Many of our new product samples for metro and long haul 100 GHz communication applications have been well received by potential customers of these products. As a result, we anticipate significant backlog for these new generation products. These newer generation products typically will have greater functionality and a smaller footprint, resulting in more complexity in the manufacturing process. This increased complexity will result in lower manufacturing yields or more difficult production to manufacture in volume. If we experience large demand for these products and are unable to manufacture them in sufficient volume, we would fall short of the planned output and revenue targets as we move from low volume sampling to manufacturing for commercial production. In addition, a production ramp for certain products can include a manufacturing transition between two or more locations which carries an inherent risk of delay. Our failure to satisfy our customers' demand for these products could result in our customers postponing or canceling orders or seeking alternative suppliers for these products, which would adversely affect our results of operations.

Sales of older legacy products continue to represent a significant percentage of our total revenues and, if we do not increase the percentage of sales associated with new products, our revenues may not grow in the future or could decline.

The markets for our products are characterized by changing technology and continuing process development. The future of our business will depend in large part upon the continuing relevance of our technological capabilities, and our ability to introduce new products that address our customers' requirements for more cost-effective and higher bandwidth solutions. Our inability to successfully launch or sustain new or next generation programs or product features that anticipate or adequately address future market trends and market transitions in a timely manner could materially adversely affect our revenues and financial results. We may also encounter competition from new or revised technologies that render our products less profitable or obsolete in our chosen markets, and our operating results may suffer. Furthermore, we cannot assure you that we will introduce new or next generation products in a timely manner, that these products will gain market acceptance, or that new product revenues will increase at a rate sufficient to replace declining legacy product revenues, and failure to do so could materially affect our operating results.

Customer requirements for new products are increasingly challenging, which could lead to significant executional risk in designing such products.

Across the entire network, our customers are demanding increased performance from our products, at lower prices and in smaller and lower power designs. These requirements stretch the capabilities of our optical chips, packages and electronics to the limit of technical feasibility. In addition these demands are often customer specific, leading to numerous product variations. We enter our new product introduction, or NPI, process with clear performance and cost goals. Because of the complexity of design requirements, executing on these goals is becoming increasingly difficult

and less predictable. These difficulties could result in product sampling delays and/or missing targets on key specifications and customer requirements, leading to design losses. Our failure to meet our customers' technical and performance requirements for these products could result in our customers seeking alternative suppliers for these products, which would adversely affect our results of operations.

We have a history of large operating losses. We may not be able to achieve profitability in the future and as a result we may not be able to maintain sufficient levels of liquidity.

We have historically incurred losses and negative cash flows from operations since our inception. As of March 28, 2015, we had an accumulated deficit of \$1,340.3 million. We incurred a loss from continuing operations of \$34.4 million and negative

Table of Contents

cash flows from operations of \$39.3 million during the nine months ended March 28, 2015, and we incurred losses from continuing operations for the years ended June 28, 2014 and June 29, 2013 of \$102.1 million and \$120.3 million, respectively.

As of March 28, 2015, we held \$123.9 million in cash and restricted cash, comprised of \$119.8 million in cash and cash equivalents and \$4.1 million in restricted cash; and we had working capital, including cash, of \$197.1 million. At March 28, 2015, we had debt of \$67.3 million, consisting of capital leases and convertible notes.

During fiscal year 2013, 2014 and 2015, we executed a number of financing transactions in order to generate funds to help sustain our operations: we sold our interleaver and thin film filter business, executed two convertible debt transactions, and executed sales of product lines in order to generate additional capital. On May 6, 2013, we secured a short term loan from Providence Equity of \$25.0 million (with net proceeds to us of \$20.5 million after discounts and expenses) as a bridge to the conclusion of certain asset sales. In order to obtain the short term loan, we amended our Credit Agreement to add Providence as a term lender. In connection with this amendment, we agreed to complete certain asset sales and use the proceeds to repay amounts we have borrowed under the Credit Agreement by July 15, 2013. On August 21, 2013, we amended our Credit Agreement to extend the time frame within which we must complete such asset sales to make such repayments to September 2, 2013. The corresponding sale of our Zurich Business to II-VI Incorporated ("II-VI") was closed on September 12, 2013. We received proceeds of \$90.6 million in cash on September 12, 2013 and an additional \$2.9 million subject to a potential post-closing working capital adjustment, which was calculated based on the level of working capital in the Oclaro Switzerland GmbH subsidiary at the September 12, 2013 close versus a target based on working capital at June 29, 2013. We also received \$1.4 million in January 2015 that had been held back from the purchase price by II-VI. We also received \$5.0 million for a 30 day option to sell our Amplifier Business. On November 1, 2013, the sale of our Amplifier Business to II-VI and certain of its affiliates closed and we received \$79.6 million in cash from II-VI. We also received \$0.9 million in January 2015 that had been held back from the purchase price by II-VI.

Following the sale of the Zurich Business, we repaid all amounts outstanding under the Credit Agreement as required, and terminated the Credit Agreement on March 14, 2014. On March 28, 2014, we entered into a loan and security agreement (the "Loan Agreement") with Silicon Valley Bank (the "Bank") pursuant to which the Bank provided us with a three-year revolving credit facility of up to \$40.0 million. Under the Loan Agreement, advances are available based on up to 80 percent of "eligible accounts" as defined in the Loan Agreement.

The optical communications industry is subject to significant operational fluctuations. In order to remain competitive we incur substantial costs associated with research and development, qualification, production capacity and sales and marketing activities in connection with products that may be purchased, if at all, long after we have incurred such costs. In addition, the rapidly changing industry in which we operate, the length of time between developing and introducing a product to market, frequent changing customer specifications for products, customer cancellations of products and general down cycles in the industry, among other things, make our prospects difficult to evaluate. We are not generating positive cash flow from operations, and it is possible that we may not (i) generate sufficient positive cash flow from operations; (ii) raise funds through the issuance of equity, equity-linked or convertible debt securities; (iii) be able to draw advances under our Loan Agreement in the future or repay any such amounts; (iv) conclude additional strategic dispositions or similar transactions; or (v) otherwise have sufficient capital resources to meet our future capital or liquidity needs. We believe it is prudent to undertake additional restructuring activities to reduce our cost base and lower our operating income break-even level, and these activities will also be financed from our existing financial resources. There are no guarantees we will be able to generate additional financial resources beyond our existing balances.

We depend on a limited number of customers for a significant percentage of our revenues and the loss of a major customer could have a materially adverse impact on our financial condition.

Historically, we have generated most of our revenues from a limited number of customers. Our dependence on a limited number of customers is due to the fact that the optical telecommunications systems industry is dominated by a small number of large companies. These companies in turn depend primarily on a limited number of major telecommunications carrier customers to purchase their products that incorporate our optical components. For

example, during the nine months ended March 28, 2015 and during the fiscal years ended June 28, 2014 and June 29, 2013, our three largest customers accounted for 46 percent, 43 percent and 38 percent of our revenues, respectively. Because we rely on a limited number of customers for significant percentages of our revenues, a decrease in demand for our products from any of our major customers for any reason (including due to market conditions, catastrophic events or otherwise) could have a materially adverse impact on our financial conditions and results of operations. For example, during the second half of fiscal 2012, our revenues were adversely impacted by a significant change in demand expectations from a particular major customer. Further, the industry in which our customers operate is subject to a trend of consolidation. To the extent this trend continues, we may become dependent on even fewer customers to maintain and grow our revenues.

Table of Contents

The majority of our long-term customer contracts do not commit customers to specified buying levels, and our customers may decrease, cancel or delay their buying levels at any time with little or no advance notice to us.

The majority of our customers typically purchase our products pursuant to individual purchase orders or contracts that do not contain purchase commitments. Some customers provide us with their expected forecasts for our products several months in advance, but these customers may decrease, cancel or delay purchase orders already in place, and the impact of any such actions may be intensified given our dependence on a small number of large customers. If any of our major customers decrease, stop or delay purchasing our products for any reason, our business and results of operations would be harmed. Cancellation or delays of such orders may cause us to fail to achieve our short-term and long-term financial and operating goals and result in excess and obsolete inventory.

Our results of operations may suffer if we do not effectively manage our inventory, and we may continue to incur inventory-related charges.

We need to manage our inventory of component parts and finished goods effectively to meet changing customer requirements. Accurately forecasting customers' product needs is difficult. Some of our products and supplies have in the past, and may in the future, become obsolete or be deemed excess while in inventory due to rapidly changing customer specifications or a decrease in customer demand. For example, following our acquisition of Opnext in July 2012, we reviewed the inventory we acquired from Opnext in the acquisition and, when we added that Opnext inventory to our preexisting inventory, we reduced the value of the Opnext inventory on our balance sheet by approximately \$43.5 million (compared to its value on Opnext's financial records as of the closing of the acquisition) to reflect our review. This reduced value was reflected in the inventory we reported in our financial statements for the quarter ended September 29, 2012. We also have exposure to contractual liabilities to our contract manufacturers for inventories purchased by them on our behalf, based on our forecasted requirements, which may become excess or obsolete. Our inventory balances also represent an investment of cash. To the extent our inventory turns are slower than we anticipate based on historical practice, our cash conversion cycle extends and more of our cash remains invested in working capital. If we are not able to manage our inventory effectively, we may need to write down the value of some of our existing inventory or write off non-saleable or obsolete inventory. We have from time to time incurred significant inventory-related charges. Any such charges we incur in future periods could materially and adversely affect our results of operations and our cash flow.

We may not be able to maintain or improve gross margin levels.

We may not be able to maintain or improve our gross margins, due to slow introductions of new products, pricing pressure from increased competition, the failure to effectively reduce the cost of existing products, the failure to improve our product mix, the potential for future macroeconomic or market volatility reducing sales volumes, changes in customer demand (including a change in product mix between different areas of our business) or other factors. Our gross margins can also be adversely impacted for reasons including, but not limited to, fixed manufacturing costs that would not be expected to decrease in proportion to any decrease in revenues; unfavorable production yields or variances; increases in costs of input parts and materials; the timing of movements in our inventory balances; warranty costs and related returns; changes in foreign currency exchange rates; possible exposure to inventory valuation reserves; the sale of our Komoro, Zurich and Amplifier Businesses, including procuring certain parts that were previously internally sourced but that we must now purchase externally; and failure to realize benefits of the recently completed transfer of certain manufacturing functions to Venture Corporation Limited ("Venture"). Any failure to maintain, or improve, our gross margins will adversely affect our financial results, including our goal to achieve profitability and sustainable cash flow from operations.

We may experience low manufacturing yields.

Manufacturing yields depend on a number of factors, including the volume of production due to customer demand and the nature and extent of changes in specifications required by customers for which we perform design-in work. Higher volumes due to demand for a fixed, rather than continually changing, design generally results in higher manufacturing yields, whereas lower volume production generally results in lower yields. In addition, lower yields may result, and have in the past resulted, from commercial shipments of products prior to full manufacturing qualification to the applicable specifications. Changes in manufacturing processes required as a result of changes in product

specifications, changing customer needs, introduction of new product lines and changes in contract manufacturers have historically caused, and may in the future cause, significantly reduced manufacturing yields, resulting in low or negative margins on those products. Moreover, an increase in the rejection rate of products during the quality control process, before, during or after manufacture, results in lower yields and margins. Finally, manufacturing yields and margins can also be lower if we receive or inadvertently use defective or contaminated materials from our suppliers. Any reduction in our manufacturing yields will adversely affect our gross margins and could have a material impact on our operating results.

Table of Contents

The markets in which we operate are highly competitive, which could result in lost sales and lower revenues.

The market for optical components and modules is highly competitive and this competition could result in our existing customers moving their orders to our competitors. We are aware of a number of companies that have developed or are developing optical component products, including tunable lasers, pluggable components, modulators and subsystems, among others, that compete directly with our current and proposed product offerings.

Certain of our competitors may be able to more quickly and effectively:

- develop or respond to new technologies or technical standards;
- react to changing customer requirements and expectations;
- devote needed resources to the development, production, promotion and sale of products;
- attain high manufacturing yields on new product designs; and
- deliver competitive products at lower prices.

Some of our current competitors, as well as some of our potential competitors, have longer operating histories, greater name recognition, broader customer relationships and industry alliances and substantially greater financial, technical and marketing resources than we do. In addition, market leaders in industries such as semiconductor and data communications, who may also have significantly more resources than we do, may in the future enter our market with competing products. Our competitors and new Chinese companies are establishing manufacturing operations in China to take advantage of comparatively low manufacturing costs. All of these risks may be increased if the market were to further consolidate through mergers or other business combinations between our competitors.

We may not be able to compete successfully with our competitors and aggressive competition in the market may result in lower prices for our products and/or decreased gross margins. Any such development could have a material adverse effect on our business, financial condition and results of operations.

In order to remain competitive, we have been in the past and may be in the future required to agree to customer terms and conditions that may have an adverse effect on our financial condition and operating results.

Many of our customers have significant purchasing power and, accordingly, have requested more favorable terms and conditions, including extended payment terms, than we typically provide. In order for us to remain competitive, we may be required to accommodate these requests, which may include granting terms that affect the timing of our receipt of cash. As a result, these more favorable customer terms may have a material adverse effect on our financial condition and results of operations.

As a result of our global operations, our business is subject to currency fluctuations that have adversely affected our results of operations in recent quarters and may continue to do so in the future.

Our financial results have been and will continue to be materially impacted by foreign currency fluctuations. At certain times in our history, declines in the value of the U.S. dollar versus the U.K. pound sterling and the Japanese yen have had a major negative effect on our margins and our cash flow. A significant portion of our expenses are denominated in U.K. pounds sterling and Japanese yen and substantially all of our revenues are denominated in U.S. dollars.

Fluctuations in the exchange rate between these currencies and, to a lesser extent, other currencies in which we collect revenues and/or pay expenses could have a material effect on our future operating results. For example during the first nine months of fiscal 2015, the Japanese yen depreciated approximately 17 percent relative to the U.S. dollar, impacting our manufacturing overhead and operating expenses. If the U.S. dollar stays the same or depreciates relative to the U.K. pound sterling and/or Japanese yen in the future, our future operating results may be materially impacted. Additional exposure could also result should the exchange rate between the U.S. dollar and the Chinese yuan or the Euro vary more significantly than they have to date.

We periodically engage in currency hedging transactions in an effort to cover some of our exposure to U.S. dollar to U.K. pound sterling and Japanese Yen currency fluctuations, and we may be required to convert currencies to meet our obligations. These transactions may not operate to fully hedge our exposure to currency fluctuations, and under certain circumstances, these transactions could have an adverse effect on our financial condition.

Delays, disruptions or quality control problems in manufacturing could result in delays in product shipments to customers and could adversely affect our business.

We may experience delays, disruptions or quality control problems in our manufacturing operations or the manufacturing operations of our subcontractors. As a result, we could incur additional costs that would adversely affect our gross margins, and

41

Table of Contents

our product shipments to our customers could be delayed beyond the shipment schedules requested by our customers, which would negatively affect our revenues, competitive position and reputation. Furthermore, even if we are able to deliver products to our customers on a timely basis, we may be unable to recognize revenues at the time of delivery based on our revenue recognition policies.

A lack of effective internal controls over our financial reporting could result in an inability to report our financial results accurately, which could lead to a loss of investor confidence in our financial reports and have an adverse effect on our stock price.

In fiscal year 2013, in connection with establishing the fair values of certain assets and liabilities associated with our acquisition of Opnext, we identified a material weakness over controls related to our recording of the purchase under Accounting Standards Codification Topic 805, Business Combinations. In the fourth quarter of fiscal year 2013, we made adjustments to the fair value of certain items, including property and equipment, capital leases and intangible assets. As a result of these adjustments, management concluded that we did not maintain effective internal controls over financial reporting as of June 29, 2013, because the potential impact of these adjustments could have been material to our financial position and results of operations. During the year ended June 28, 2014, we hired new finance personnel and added oversight for the accounting of acquisitions and dispositions. Our remediation efforts, including the testing of these controls, continued throughout fiscal year 2014. This material weakness was considered remediated in the fourth quarter of fiscal year 2014, once these controls were shown to be operational for a sufficient period of time to allow management to conclude that these controls were operating effectively.

In fiscal year 2014, we also identified control deficiencies relating to inventory and property and equipment, which in the aggregate constituted a material weakness. We determined that our processes, procedures and controls related to the review and analysis of inventory and property and equipment were not effective to ensure that certain amounts related to these financial statement accounts were accurately reported in a timely manner. As a result of these adjustments, management concluded that we did not maintain effective internal controls over financial reporting as of June 28, 2014. Our remediation efforts, including the testing of these controls, are expected to continue throughout our fiscal year 2015.

In addition, we have in the past, and may in the future, acquire companies that have either experienced material weaknesses in their internal controls over financial reporting or have had no previous reporting obligations under Sarbanes-Oxley. Failure to integrate acquired businesses into our internal controls over financial reporting could cause those controls to fail.

We cannot assure you that similar material weaknesses will not recur in the future. If additional material weaknesses or significant deficiencies in our internal control are discovered or occur in the future, our consolidated financial statements may contain material misstatements and we could be required to restate our financial results.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports. Our failure to implement and maintain effective internal control over financial reporting could result in a material misstatement of our financial statements or otherwise cause us to fail to meet our financial reporting obligations. This, in turn, could result in a loss of investor confidence in the accuracy and completeness of our financial reports, which could have an adverse effect on our business, financial condition, operating results and our stock price, and we could be subject to stockholder litigation and our common stock may be delisted as a result. Even if we are able to implement and maintain effective internal control over financial reporting, the costs of doing business may increase and our management may be required to dedicate greater time and resources to that effort.

We have a large amount of intercompany balances with our China entities which may be subject to taxes and penalties when we try to pay them down or collect them.

Payments for goods and services into and out of China are subject to numerous and over-lapping government regulation with respect to foreign exchange controls, banking controls, import and export controls, and taxes. We have been operating in China for an extended period of time and have accumulated significant intercompany balances with our related entities. Our ability to repay or collect these balances may be restricted by Chinese laws and, as a result, we may be unable to successfully pay down or collect on these balances. As a consequence, we may be assessed additional taxes in China if we are unable to claim bad debt deductions or incur debt forgiveness income from the

cancellation of these intercompany balances. Additionally, if we are found not to have complied with the various local laws surrounding cross border payments, we may incur penalties and fines for non-compliance. Any such taxes, penalties and/or fines could be significant in amount and, as a result, could have a material adverse effect on our financial condition, including our cash and cash equivalent balances.

Table of Contents

We depend on a limited number of suppliers and key contract manufacturers who could disrupt our business if they stopped, decreased, delayed or were unable to meet our demand for shipments of their products or manufacturing of our products.

We depend on a limited number of suppliers of raw materials and equipment used to manufacture our products. We currently also depend on a limited number of contract manufacturers, principally Fabrinet in Thailand, to manufacture certain of our products. We will also increasingly depend on Venture, having transferred portions of our Shenzhen assembly and test operations to Venture. Some of these suppliers are sole sources. We typically have not entered into long-term agreements with our suppliers other than Fabrinet and Venture. As a result, these suppliers generally may stop supplying us materials and equipment at any time. Our reliance on a sole supplier or limited number of suppliers could result in delivery problems, reduced control over product pricing and quality, and an inability to identify and qualify another supplier in a timely manner. Some of our suppliers that may be small or under-capitalized may experience financial difficulties that could prevent them from supplying us materials and equipment. In addition, our suppliers, including our sole source suppliers, may experience manufacturing delays or shut downs due to circumstances beyond their control such as earthquakes, floods, fires, labor unrest, political unrest or other natural disasters.

Fabrinet's manufacturing operations are located in Thailand. In October 2011, due to flooding in Thailand, Fabrinet suspended operations at both of its factories that supply us with finished goods. Thailand has also been subject to political unrest in the recent past, including the temporary interruption of service at one of its international airports, and may again experience such political unrest in the future. If Fabrinet is unable to supply us with materials or equipment, or if it is unable to ship our materials or equipment out of Thailand due to future flooding or political unrest, this could materially adversely affect our ability to fulfill customer orders and our results of operations. Any supply deficiencies relating to the quality or quantities of materials or equipment we use to manufacture our products could materially and adversely affect our ability to fulfill customer orders and our results of operations. Lead times for the purchase of certain materials and equipment from suppliers have increased and in some cases have limited our ability to rapidly respond to increased demand, and may continue to do so in the future. To the extent we introduce additional contract manufacturing partners, introduce new products with new partners and/or move existing internal or external production lines to new partners, we could experience supply disruptions during the transition process. In addition, due to our customers' requirements relating to the qualification of our suppliers and contract manufacturing facilities and operations, we cannot quickly enter into alternative supplier relationships, which prevents us from being able to respond immediately to adverse events affecting our suppliers.

We will incur significant additional restructuring charges that will adversely affect our results of operations.

We expect to incur significant restructuring expenses for incremental actions going forward, including restructuring actions we announced in the first half of fiscal year 2014 to reduce our complexity and to simplify our operating footprint subsequent to the sale of the Zurich and Amplifier Businesses.

We have previously enacted a series of restructuring plans and cost reduction plans designed to reduce our manufacturing overhead and our operating expenses that have resulted in significant restructuring charges. Such charges have adversely affected, and will continue to adversely affect, our results of operations for the periods in which such charges have been, or will be, incurred. Additionally, actual costs have in the past, and may in the future, exceed the amounts estimated and provided for in our financial statements. Significant additional charges could materially and adversely affect our results of operations in the periods that they are incurred and recognized. In addition, certain restructuring activities will require significant cash commitments and will adversely affect our cash balances.

For instance, during fiscal years 2014 and 2013, we incurred \$3.5 million and \$5.1 million in restructuring charges, respectively, in connection with the transition of certain portions of our Shenzhen, China assembly and test operations to Venture. During the year ended June 28, 2014, we also incurred \$13.2 million in restructuring charges in connection with the restructuring plan we initiated in the first quarter of fiscal year 2014 to simplify our operating footprint, reduce our cost structure and focus our research and development investment in the optical communications market where we can leverage our core competencies. We expect to incur an additional \$3.0 million to \$5.0 million, in

aggregate, in restructuring charges during the fourth quarter of fiscal year 2015 in connection with these restructuring plans.

Our business and results of operations may continue to be negatively impacted by general economic, financial market conditions and market conditions in the industries in which we operate, and such conditions may increase the other risks that affect our business.

Over the past few years, the world's financial markets have experienced significant turmoil, resulting in reductions in available credit, increased costs of credit, extreme volatility in security prices, potential changes to existing credit terms, and rating downgrades of investments. In light of these economic conditions, many of our customers reduced their spending plans, leading them to draw down their existing inventory and reduce orders for our products. It is possible that economic conditions could

Table of Contents

result in further setbacks, and that these customers, or others, could as a result significantly reduce their capital expenditures, draw down their inventories, reduce production levels of existing products, defer introduction of new products or place orders and accept delivery for products for which they do not pay us due to their economic difficulties or other reasons. These conditions have materially and adversely affected the market conditions in the industries in which we operate, and have had a material adverse impact on our revenues. In addition, the financial downturn affected the financial strength of certain of our customers, including their ability to obtain credit to finance purchases of our products, and could adversely affect additional customers in the future. Our suppliers may also be adversely affected by economic conditions that may impact their ability to provide important components used in our manufacturing processes on a timely basis, or at all. To a large degree, orders from our customers are dependent on demand from telecom carriers around the world. Telecom carrier capital expenditure plans and execution can also be adversely impacted, both in terms of total spend and in determination of areas of investment within network infrastructures, by global and regional macroeconomic conditions.

These conditions could also result in reduced capital resources because of the potential lack of credit availability, higher costs of credit and the stretching of payables by creditors seeking to preserve their own cash resources. We are unable to predict the likely duration, severity and potential continuation of any disruption in financial markets and adverse economic conditions in the U.S. and other countries, but the longer the duration the greater the risks we face in operating our business.

If we fail to attract and retain key personnel, our business could suffer.

Our future success depends, in part, on our ability to attract and retain key personnel. Competition for highly skilled technical personnel is extremely intense and we continue to face difficulty identifying and hiring qualified engineers in many areas of our business. We may not be able to hire and retain such personnel at compensation levels consistent with our existing compensation and salary structure. Our future success also depends on the continued contributions of our executive management team and other key management and technical personnel, each of whom would be difficult to replace. The loss of services of these or other executive officers or key personnel or the inability to continue to attract qualified personnel could have a material adverse effect on our business.

We have recently announced significant changes at Oclaro relating to our operations, strategic plan and management team. The operation of our business could be adversely affected by the transition of key personnel as we rebuild our executive leadership team and make additional organizational changes.

Beginning in June 2013, we have announced a series of events, transactions and restructuring plans, which have had a significant impact on our business. Among other things, we sold our Komoro, Zurich and Amplifier Businesses and announced a restructuring plan to focus our business on our core competencies. While we believe these events, transactions and plans will have a positive impact on our financial condition and results of operations, these changes will result in at least a significant near-term reduction in our revenues, could lead to a disruption in our operations and employee morale, could lead to unplanned attrition of employees, and adversely affect our ability to attract highly skilled employees. In addition, many of our senior management are relatively new. Since June 2013, we have appointed a new Chief Executive Officer, Chief Financial Officer and Chief Operating Officer, and have hired a new Chief Commercial Officer, a new General Counsel, a new Principal Accounting Officer, a new Executive Vice President of Human Resources and a new President of our Integrated Photonics Division. We have also decreased the size of our Board of Directors from nine to seven. It is important to our success that our Chief Executive Officer continues building an effective management team and global organization. It may take some time for each of the new members of our management team to become fully integrated into our business. Our failure to manage these transitions, or to find and retain experienced management personnel, could adversely affect our ability to compete effectively and could adversely affect our operating results. If we experience these or other adverse consequences, fail to manage these transitions, do not find and retain experienced management personnel, or are otherwise unable to realize the expected benefits of our restructuring plan, our business, results of operations and financial condition would be materially and adversely affected and we may not be able to continue as a going concern over the long term. In the future we may need to access the capital markets to raise additional equity, which could dilute our shareholder base.

We may need additional liquidity beyond our current expectations, such as to fund future growth, strengthen our balance sheet or to fund the cost of restructuring activities, and will continue to explore other sources of additional liquidity. These additional sources of liquidity could include one, or a combination, of the following: (i) issuing equity securities, (ii) incurring indebtedness secured by our assets, (iii) issuing debt and/or convertible debt securities, or (iv) selling product lines, other assets and/or portions of our business. There can be no guarantee that we will be able to raise additional funds on terms acceptable to us, or at all.

If we raise funds through the issuance of equity, equity-linked or convertible debt securities, our stockholders may be significantly diluted, and these newly-issued securities may have rights, preferences or privileges senior to those of securities held by existing stockholders. If we raise funds through the issuance of debt instruments, such as we did in February 2015 when we issued convertible notes and December 2012 when we issued exchangeable bonds, the agreements governing such

Table of Contents

debt instruments may contain covenant restrictions that limit our ability to, among other things: (i) incur additional debt, assume obligations in connection with letters of credit, or issue guarantees; (ii) create liens; (iii) make certain investments or acquisitions; (iv) enter into transactions with our affiliates; (v) sell certain assets; (vi) redeem capital stock or make other restricted payments; (vii) declare or pay dividends or make other distributions to stockholders; and (viii) merge or consolidate with any entity. (See Note 6, Credit Line and Notes, elsewhere in this Quarterly Report on Form 10-Q, for further details). The exchangeable bonds issued in 2012 were subsequently exchanged for common stock. We cannot assure you that additional financing will be available on terms favorable to us, or at all. If adequate funds are not available or are not available on acceptable terms, if and when needed, our ability to fund our operations, develop or enhance our products, or otherwise respond to competitive pressures and operate effectively could be significantly limited.

We may have to incur substantially more debt in the future, which may subject us to restrictive covenants that could limit our ability to operate our business.

In the future, we may incur additional indebtedness through arrangements such as credit agreements or term loans that may impose restrictions and covenants that limit our ability to respond appropriately to market conditions, make capital investments or take advantage of business opportunities. In addition, any debt arrangements we may enter into would likely require us to make regular interest payments, which would adversely affect our results of operations. If our customers do not qualify our manufacturing lines or the manufacturing lines of our subcontractors for volume shipments, our operating results could suffer.

Most of our customers do not purchase products, other than limited numbers of evaluation units, prior to qualification of the manufacturing line for volume production. Our existing manufacturing lines, as well as each new manufacturing line, must pass through varying levels of qualification with our customers. Our manufacturing lines have passed our qualification standards, as well as our technical standards. However, our customers also require that our manufacturing lines pass their specific qualification standards and that we, and any subcontractors that we may use, be registered under international quality standards. In addition, we have in the past, and may in the future, encounter quality control issues as a result of relocating our manufacturing lines or introducing new products to fill production. We may be unable to obtain customer qualification of our manufacturing lines or we may experience delays in obtaining customer qualification of our manufacturing lines. Such delays or failure to obtain qualifications would harm our operating results and customer relationships. If we introduce new contract manufacturing partners and move any production lines from existing internal or external facilities, the new production lines will likely need to be re-qualified with our customers. Exposures to these risks could increase materially as a result of the transition of certain of our Shenzhen product lines to Venture in Malaysia.

We may undertake divestitures of portions of our business, such as the divestiture of our Komoro Business, Zurich Business and our Amplifier Business, that require us to continue providing substantial post-divestiture transition services and support, which may cause us to incur unanticipated costs and liabilities and adversely affect our financial condition and results of operations.

From time to time, we consider divestitures of product lines or portions of our assets in order to streamline our business, focus on our core operations and raise cash. For example, on October 27, 2014, we sold our Komoro Business to Ushio Opto Semiconductors, Inc. ("Ushio"). In addition, on September 12, 2013, we sold our Zurich Business to II-VI and on November 1, 2013, we sold our Amplifier Business to II-VI (See Note 5, Business Combinations and Dispositions, elsewhere in this Quarterly Report on Form 10-Q, for further details). In connection with these divestitures, we entered into transition service, manufacturing service and supply agreements with both Ushio and II-VI to facilitate the ownership transition, collectively referred to as "transition agreements." Pursuant to these transition agreements, we continue to manufacture certain products for II-VI and perform certain administrative functions for both Ushio and II-VI. From time to time, substantial amounts of executive resources have been diverted from our core ongoing business to manage these transitions. For each of these divestitures, a material portion of the purchase price was held back to address post-closing claims, including claims related to our performance of the transition agreements. We received a portion of the hold-back from the sale of the Zurich Business during the third quarter of fiscal year 2014. We expected to receive an additional \$10.0 million which was subject to hold-back by

II-VI until December 31, 2014 to address any post-closing adjustments or claims related to the sale of the Zurich and Amplifier Businesses. On December 30, 2014, we entered into a Settlement Agreement with II-VI and II-VI Holdings B.V. regarding disposition of the amounts held back by the II-VI parties. Of the \$10.0 million subject to hold-back until December 31, 2014, we received \$2.35 million in January 2015 and we released the remaining \$7.65 million to II-VI Holdings B.V. In order to perform under these transition agreements, on an interim basis, we have been required to retain certain employees and contractors, continue operating certain facilities, dedicate certain manufacturing capacity and maintain certain supplier agreements that have added additional costs and delayed our ability to fully restructure our operations to efficiently focus on our core ongoing business. If we fail to perform under any of these transition agreements, or if we do not successfully execute the restructuring of our operations after our transition agreement obligations have been fulfilled, our financial condition and results of operations could be harmed.

Table of Contents

We may undertake acquisitions or mergers, that do not prove successful, which would materially and adversely affect our business, prospects, financial condition and results of operations.

From time to time, we consider acquisitions or mergers, collectively referred to as “acquisitions,” of other businesses, assets or companies that would complement our current product offerings, enhance our intellectual property rights or offer other competitive opportunities. For example, on March 26, 2012, we entered into an Agreement and Plan of Merger and Reorganization with Opnext, which was completed on July 23, 2012. However, in the future, we may not be able to identify suitable acquisition candidates at prices we consider appropriate. In addition, we are in an industry that is actively consolidating and, as a result, there is no guarantee that we will successfully and satisfactorily bid against third parties, including competitors, when we identify a critical target we want to acquire.

We cannot readily predict the timing or size of our future acquisitions, or the success of our recent or future acquisitions. Failure to successfully implement our future acquisition plans could have a material adverse effect on our business, prospects, financial condition and results of operations. Even successful acquisitions could have the effect of reducing our cash balances, diluting the ownership interests of existing stockholders or increasing our indebtedness. For example, in our acquisition of Opnext we issued approximately 38.4 million newly issued shares of our common stock to the former stockholders of Opnext.

In connection with the acquisition of Xtellus, Inc. (“Xtellus”) in 2009, during the first quarter of fiscal year 2012, we issued 0.9 million shares of our common stock related to the settlement of our Xtellus escrow liability. In October 2011, we paid \$0.5 million in cash and issued 0.8 million shares of our common stock to pay earnout obligations related to our acquisition of Mintera Corporation (“Mintera”). In the fourth quarter of fiscal year 2012, we paid \$2.2 million to settle a portion of our Mintera earnout obligations, and settled the remaining \$8.6 million obligation in cash in the first quarter of fiscal year 2013.

All acquisitions involve potential risks and uncertainties, including the following, any of which could harm our business and adversely affect our results of operations:

- failure to realize the potential financial or strategic benefits of the acquisition;
- increased costs associated with merged or acquired operations;
- increased indebtedness obligations;
- economic dilution to gross and operating profit (loss) and earnings (loss) per share;
- failure to successfully further develop the combined, acquired or remaining technology, which could, among other things, result in the impairment of amounts recorded as goodwill or other intangible assets;
- unanticipated costs and liabilities and unforeseen accounting charges;
- difficulty in integrating product offerings;
- difficulty in coordinating and rationalizing research and development activities to enhance introduction of new products and technologies with reduced cost;
- difficulty in coordinating and integrating the manufacturing activities, including with respect to third-party manufacturers, including coordination, integration or transfers of any manufacturing activities associated with our acquisition of Opnext in 2012;
- delays and difficulties in delivery of products and services;
- failure to effectively integrate or separate management information systems, personnel, research and development, marketing, sales and support operations;
- difficulty in maintaining internal control procedures and disclosure controls that comply with the requirements of the Sarbanes-Oxley Act of 2002, or poor integration of a target’s procedures and controls;
- difficulty in preserving important relationships of our acquired businesses and resolving potential conflicts between business cultures;
- uncertainty on the part of our existing customers, or the customers of an acquired company, about our ability to operate effectively after a transaction, and the potential loss of such customers;
- loss of key employees;
- difficulty in coordinating the international activities of our acquired businesses, including Opnext, which has substantial operations in Japan as well as the United States, and which uses contract manufacturing suppliers in

Southeast Asia;

the effect of tax laws and other legal and regulatory regimes due to increasing complexities of our global operating structure;

46

Table of Contents

- greater exposure to the impact of foreign currency changes on our business;
- the effect of employment law or regulations or other limitations in foreign jurisdictions that could have an impact on timing, amounts or costs of achieving expected synergies; and
- substantial demands on our management as a result of these transactions that may limit their time to attend to other operational, financial, business and strategic issues.

Our integration with acquired businesses has been and will continue to be a complex, time-consuming and expensive process. We cannot assure you that we will be able to successfully integrate these businesses in a timely manner, or at all, or that any of the anticipated benefits from our previous or future acquisitions will be realized. There are inherent challenges in integrating the operations of geographically diverse companies. We may have difficulty, and may incur unanticipated expenses related to, integrating management and personnel from our acquisitions. Our failure to achieve the strategic objectives of our past and future acquisitions could have a material adverse effect on our revenues, expenses and our other operating results and cash resources, and could result in us not achieving the anticipated potential benefits of these transactions. In addition, we cannot assure you that the growth rate of the combined company will equal the historical growth rate experienced by any of the companies that we have acquired.

Comparable risks would accompany any divestiture of businesses or assets we might undertake.

In addition, even if we successfully integrate the operations of Opnext and other companies that we acquire in the future, we cannot predict with certainty which strategic, financial or operating synergies or other benefits, if any, will actually be achieved from our acquisition, the timing of any such benefits, or whether those benefits which have been achieved will be sustainable on a long-term basis. Our failure to successfully integrate the operations of companies that we acquire would likely have a material and adverse impact on our business, prospects, financial condition and results of operations.

We have a complex multinational tax structure, and changes in effective tax rates or adverse outcomes resulting from examination of our income tax returns could adversely affect our results.

We have a complex multinational tax structure with multiple types of intercompany transactions, and our allocation of profits and losses among us and our subsidiaries through our intercompany transfer pricing agreements is subject to review by the Internal Revenue Service and other tax authorities. Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, by changes in the valuation of our deferred tax assets and liabilities, or by changes in tax laws, regulations, accounting principles or interpretations thereof. In addition, we are also subject to periodic examination of our income tax returns and related transfer pricing documentation by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these examinations will not have an adverse effect on our operating results and financial condition. Our intellectual property rights may not be adequately protected.

Our future success will depend, in large part, upon our intellectual property rights, including patents, copyrights, design rights, trade secrets, trademarks and know-how. We maintain an active program of identifying technology appropriate for patent protection. Our practice is to require employees and consultants to execute non-disclosure and proprietary rights agreements upon commencement of employment or consulting arrangements. These agreements acknowledge our exclusive ownership of all intellectual property developed by the individuals during their work for us and require that all proprietary information disclosed will remain confidential. Although such agreements may be binding, they may not be enforceable in full or in part in all jurisdictions and any breach of a confidentiality obligation could have a negative effect on our business and our remedy for such breach may be limited.

Our intellectual property portfolio is an important corporate asset. The steps we have taken and may take in the future to protect our intellectual property may not adequately prevent misappropriation or ensure that others will not develop competitive technologies or products. We cannot assure you that our competitors will not successfully challenge the validity of our patents or design products that avoid infringement of our proprietary rights with respect to our technology. There can be no assurance that other companies are not investigating or developing other similar technologies, that any patents will be issued from any application pending or filed by us, or that, if patents are issued,

that the claims allowed will be sufficiently broad to deter or prohibit others from marketing similar products. In addition, we cannot assure you that any patents issued to us will not be challenged, invalidated or circumvented, or that the rights under those patents will provide a competitive advantage to us or that our products and technology will be adequately covered by our patents and other intellectual property. Further, the laws of certain regions in which our products are or may be developed, manufactured or sold, including Asia-Pacific, Southeast Asia and Latin America, may not be enforceable to protect our products and intellectual property rights to the same extent as the laws of the United States, the United Kingdom and continental European countries. This is especially relevant since we have transferred our assembly and test operations and chip-on-carrier operations, including certain engineering-related functions, to

Table of Contents

Shenzhen, China, and have recently completed the transition of portions of these assembly and test operations to Venture in Malaysia.

Opnext historically relied on Hitachi, one of our major shareholders, for assistance with the research and development efforts related to Opnext's product portfolio. Any failure of Hitachi to continue to provide these services could have a material adverse effect on our business. Opnext's product expertise is based on the research ability developed within their Hitachi heritage and through joint research and development in lasers and optical technologies. A key factor to Opnext's business success and strategy is fundamental laser research. Opnext relied on access to Hitachi's research laboratories pursuant to a research and development agreement with Hitachi, which includes access to Hitachi's research facilities and engineers, to conduct research and development activities that are important to the establishment of new technologies and products vital to their current and future business. Should access to Hitachi's research laboratories become unavailable or available at less attractive terms in the future, this may impede development of new technologies and products, and our financial condition and operating results could be materially adversely affected.

Our revenues and operating results are likely to fluctuate significantly as a result of factors that are outside our control.

Our revenues and operating results are likely to fluctuate significantly in the future as a result of factors that are outside our control. The timing of order placement, size of orders and satisfaction of contractual customer acceptance criteria, changes in the pricing of our products due to competitive pressures as well as order or shipment delays or deferrals, with respect to our products, may cause material fluctuations in revenues. Our lengthy sales cycle, which may extend to more than one year, may cause our revenues and operating results to vary from period to period and it may be difficult to predict the timing and amount of any variation. Delays or deferrals in purchasing decisions by our customers may increase as we develop new or enhanced products for new markets, including data communications, industrial, research, consumer and biotechnology markets. Purchase decisions by our customers are also impacted by the capital expenditure plans of the global telecom carriers, which tend to be the primary customers of our customers. Our current and anticipated future dependence on a small number of customers increases the revenue impact of each such customer's decision to delay or defer purchases from us, or decision not to purchase products from us. For example, during the second half of fiscal 2012, our revenues were adversely impacted by a significant change in demand expectations from a particular major customer. Our expense levels in the future will be based, in large part, on our expectations regarding future revenue sources and, as a result, operating results for any quarterly period in which material orders fail to occur, or are delayed or deferred, could vary significantly. Because our business is capital intensive, significant fluctuations in our revenues, without a corresponding decrease in expenses, can have a significant adverse impact on our operating results.

We have significant operations in China, which exposes us to risks inherent in doing business in China.

A significant portion of our assembly and test operations, chip-on-carrier operations and manufacturing and supply chain management operations are concentrated in our facility in Shenzhen, China. In addition, we have research and development related activities in Shenzhen, China. To be successful in China we will need to:

- qualify our manufacturing lines and the products we produce in Shenzhen, as required by our customers; and
- attract and retain qualified personnel to operate our Shenzhen facility.

We cannot assure you that we will be able to achieve these objectives.

Employee turnover in China is high due to the intensely competitive and fluid market for skilled labor. To operate our Shenzhen facility under these conditions, we need to continue to hire direct manufacturing personnel, administrative personnel and technical personnel; obtain and retain required legal authorization to hire such personnel; and incur the time and expense to hire and train such personnel. On March 28, 2012, shortly after announcing our agreement with Venture to transition certain manufacturing operations, certain of our employees in Shenzhen initiated a work stoppage. The work stoppage impacted our Shenzhen manufacturing capabilities temporarily up to and including April 4, 2012. Revenues for the three months ended March 31, 2012 were adversely impacted by approximately \$4.0 million due to the work stoppage.

Inflation rates in China are higher than in most jurisdictions in which we operate. We believe that salary inflation rates for the skilled personnel we hire and seek to retain in Shenzhen are likely to be higher than overall inflation rates. Operations in China are subject to greater political, legal and economic risks than our operations in other countries. In particular, the political, legal and economic climate in China, both nationally and regionally, is fluid and unpredictable. For example, we have been subject to commercial litigation in China initiated by a former supplier. For a description of this lawsuit, see Part II, Item 1, Legal Proceedings, "Raysung Commercial Litigation," in this Quarterly Report on Form 10-Q. Our ability to operate in China may be adversely affected by changes in Chinese laws and regulations such as those related to, among other things, taxation, import and export tariffs, environmental regulations, land use rights, intellectual property, currency controls, employee benefits and other matters. In addition, we may not obtain or retain the requisite legal permits to

Table of Contents

continue to operate in China, and costs or operational limitations may be imposed in connection with obtaining and complying with such permits.

We intend to continue to export the products manufactured at our Shenzhen facility. Under current regulations, upon application and approval by the relevant governmental authorities, we will not be subject to certain Chinese taxes and will be exempt from certain duties on imported materials that are used in the manufacturing process and subsequently exported from China as finished products. However, Chinese trade regulations are in a state of flux, and we may become subject to other forms of taxation and duties in China or may be required to pay export fees in the future. In the event that we become subject to new forms of taxation or export fees in China, our business and results of operations could be materially adversely affected. We may also be required to expend greater amounts than we currently anticipate in connection with increasing production at our Shenzhen facility. Any one of the factors cited above, or a combination of them, could result in unanticipated costs or interruptions in production, which could materially and adversely affect our business.

Our products may infringe the intellectual property rights of others, which could result in expensive litigation or require us to obtain a license to use the technology from third parties, or we may be prohibited from selling certain products in the future.

Companies in the industry in which we operate frequently are sued or receive informal claims of patent infringement or infringement of other intellectual property rights. We have, from time to time, received such claims, including from competitors and from companies that have substantially more resources than us. For example, see Part I, Item 3, Legal Proceedings, "Furukawa Patent Litigation," in our 2014 Annual Report on Form 10-K.

Third parties may in the future assert claims against us concerning our existing products or with respect to future products under development, or with respect to products that we may acquire through acquisitions. We have entered into and may in the future enter into indemnification obligations in favor of some customers that could be triggered upon an allegation or finding that we are infringing other parties' proprietary rights. If we do infringe a third party's rights, we may need to negotiate with holders of those rights in order to obtain a license to those rights or otherwise settle any infringement claim. We have from time to time received notices from third parties alleging infringement of their intellectual property and where appropriate have entered into license agreements with those third parties with respect to that intellectual property. Any license agreements that we wish to enter into the future with respect to intellectual property rights may not be available to us on commercially reasonable terms, or at all. We may not in all cases be able to resolve allegations of infringement through licensing arrangements, settlement, alternative designs or otherwise. We may take legal action to determine the validity and scope of the third-party rights or to defend against any allegations of infringement. Holders of intellectual property rights could become more aggressive in alleging infringement of their intellectual property rights and we may be the subject of such claims asserted by a third party. In the course of pursuing any of these means or defending against any lawsuits filed against us, we could incur significant costs and diversion of our resources and our management's attention. Due to the competitive nature of our industry, it is unlikely that we could increase our prices to cover such costs. In addition, such claims could result in significant penalties or injunctions that could prevent us from selling some of our products in certain markets or result in settlements or judgments that require payment of significant royalties or damages.

Fluctuations in our operating results could adversely affect the market price of our common stock.

Our revenues and other operating results are likely to fluctuate significantly in the future. The timing of order placement, size of orders and satisfaction of contractual customer acceptance criteria, changes in the pricing of our products due to competitive pressures as well as order or shipment delays or deferrals, with respect to our products, acquisitions and asset sales may cause material fluctuations in revenues. Our lengthy sales cycle, which may extend to more than one year, may cause our revenues and operating results to vary from period to period and it may be difficult to predict the timing and amount of any variation. Delays or deferrals in purchasing decisions by our customers may increase as we develop new or enhanced products for new markets, including data communications, industrial, research, consumer and biotechnology markets. Our current and anticipated future dependence on a small number of customers increases the revenue impact of each such customer's decision to delay or defer purchases from us, or decision not to purchase products from us. Our expense levels in the future will be based, in large part, on our

expectations regarding future revenue sources and, as a result, operating results for any quarterly period in which material orders fail to occur, or are delayed or deferred, could vary significantly.

Because of these and other factors, quarter-to-quarter comparisons of our results of operations may not be indicative of our future performance. In future periods, our results of operations may differ, in some cases materially, from the estimates of public market analysts and investors. Such a discrepancy, or our failure to meet published financial projections, could cause the market price of our common stock to decline.

Table of Contents

We sold our Komoro, Zurich and Amplifier Businesses and may pursue other strategic dispositions or a further reduction in the number of our locations which could be difficult to implement, disrupt our business or further change our business profile significantly.

The sale of our Komoro Business in 2014, the sale of our Zurich and Amplifier Businesses in 2013, and any future strategic disposition of assets or businesses or reduction in the number of our locations, each involve numerous risks. These risks include: (i) potential disruption of our ongoing business and distraction of management; (ii) difficulty segregating assets or businesses to be disposed of or consolidated; (iii) exposure to unknown, contingent or other liabilities, including litigation arising in connection with the disposition; (iv) changing our business profile in ways that could have unintended negative consequences; (v) the failure to achieve anticipated benefits; (vi) accounting charges that may affect our financial condition and results of operations; (vii) significant fluctuations in our revenues and operating results; (viii) our ability to support manufacturing services and transition services and the risk to the rest of our business resulting from resources focusing on those services. These asset sales contributed to a decrease in our total revenues during 2014 compared to 2013, and may contribute to a further decrease of revenues during 2015 compared to 2014. These decreases have and may continue to adversely impact our operating results. Additional asset sales that we may consider in the future could cause us to face similar risks, which could weaken our financial condition and adversely impact our operating results.

If we fail to obtain the right to use the intellectual property rights of others necessary to operate our business, our business and results of operations will be materially and adversely affected.

Certain companies in the telecommunications and optical components markets in which we sell our products have experienced frequent litigation regarding patent and other intellectual property rights. Numerous patents in these industries are held by others, including academic institutions and our competitors. Optical component suppliers may seek to gain a competitive advantage or other third parties, inside or outside our market, may seek an economic return on their intellectual property portfolios by making infringement claims against us. We currently in-license certain intellectual property of third parties, and in the future, we may need to obtain license rights to patents or other intellectual property held by others to the extent necessary for our business. Unless we are able to obtain such licenses on commercially reasonable terms, patents or other intellectual property held by others could be used to inhibit or prohibit our production and sale of existing products and our development of new products for our markets. Licenses granting us the right to use third-party technology may not be available on commercially reasonable terms, or at all. Generally, a license, if granted, would include payments of up-front fees, ongoing royalties or both. These payments or other terms could have a significant adverse impact on our operating results. In addition, in the event we are granted such a license, it is likely such license would be non-exclusive and other parties, including competitors, may be able to utilize such technology. Our larger competitors may be able to obtain licenses or cross-license their technology on better terms than we can, which could put us at a competitive disadvantage. In addition, our larger competitors may be able to buy such technology and preclude us from licensing or using such technology.

We generate a significant portion of our revenues internationally and therefore are subject to additional risks associated with the extent of our international operations.

For fiscal years ended June 28, 2014, June 29, 2013 and June 30, 2012, 11 percent, 9 percent and 11 percent of our revenues, respectively, were derived from sales to customers located in the United States and 89 percent, 91 percent and 89 percent of our revenues, respectively, were derived from sales to customers located outside the United States.

We are subject to additional risks related to operating in foreign countries, including:

- currency fluctuations, which could result in increased operating expenses and reduced revenues;
- greater difficulty in accounts receivable collection and longer collection periods;
- difficulty in enforcing or adequately protecting our intellectual property;
- ability to hire qualified candidates;
- foreign taxes;
- political, legal and economic instability in foreign markets;
- foreign regulations;
- changes in, or impositions of, legislative or regulatory requirements;

trade restrictions, including restrictions imposed by the United States government on trading with parties in foreign countries;
transportation delays;
epidemics and illnesses;

50

Table of Contents

terrorism and threats of terrorism;
work stoppages and infrastructure problems due to adverse weather conditions or natural disasters;
work stoppages related to employee dissatisfaction;
changes in import/export regulations, tariffs, and freight rates; and
the effective protections of, and the ability to enforce, contractual arrangements.

Any of these risks, or any other risks related to our foreign operations, could materially adversely affect our business, financial condition and results of operations.

We may face product liability claims.

Despite quality assurance measures, defects may occur in our products. The occurrence of any defects in our products could give rise to liability for damages caused by such defects, including consequential damages. Such defects could, moreover, impair market acceptance of our products. Both could have a material adverse effect on our business and financial condition. In addition, we may assume product warranty liabilities related to companies we acquire, which could have a material adverse effect on our business and financial condition. In order to mitigate the risk of liability for damages, we carry product liability insurance with a \$25.0 million aggregate annual limit and errors and omissions insurance with a \$5.0 million annual limit. We cannot assure you that this insurance would adequately cover our costs arising from any defects in our products or otherwise.

At times, the market price of our common stock has fluctuated significantly.

The market price of our common stock has been, and is likely to continue to be, highly volatile. For example, between June 30, 2013 and June 28, 2014, the market price of our common stock ranged from a low of \$0.88 per share to a high of \$3.57 per share. Many factors could cause the market price of our common stock to rise and fall.

In addition to the matters discussed in other risk factors included in our public filings, some of the events that could impact our stock price are:

fluctuations in our financial condition and results of operations, including our gross margins and cash flow;
changes in our business, operations or prospects;
hiring or departure of key personnel;
new contractual relationships with key suppliers or customers by us or our competitors;
proposed acquisitions and dispositions by us or our competitors;
financial results or projections that fail to meet public market analysts' expectations and changes in stock market analysts' recommendations regarding us, other optical technology companies or the telecommunication industry in general;
future sales of common stock, or securities convertible into, exchangeable or exercisable for common stock;
adverse judgments or settlements obligating us to pay damages;
future issuances of common stock in connection with acquisitions or other transactions;
acts of war, terrorism, or natural disasters;
industry, domestic and international market and economic conditions, including the global macroeconomic downturn over the last three years and related sovereign debt issues in certain parts of the world;
low trading volume in our stock;
developments relating to patents or property rights; and
government regulatory changes.

In connection with our acquisition of Xtellus, during the first quarter of fiscal year 2012 we issued 0.9 million shares of our common stock to settle our escrow liability. In connection with our acquisition of Mintera, during the second quarter of fiscal year 2012, we issued 0.8 million shares of our common stock to pay portions of the 12 month earnout obligations. In connection with our acquisition of Opnext, during the first quarter of fiscal year 2013, we issued 38.4 million shares of our common stock. In addition, during the second quarter of fiscal year 2014, we issued 13.5 million shares of our common stock in connection with the conversion of the convertible notes issued in December, 2012. We also have \$65 million of convertible notes outstanding, which if converted, would result in us issuing up to 44.5 million shares of our common stock. In May 2013, we also issued 1.8 million warrants to purchase our common stock at an exercise price of \$1.50 per share in connection with

Table of Contents

the Term Loan we received in May 2013 (See Note 6, Credit Line and Notes, in this Quarterly Report on Form 10-Q, for further details). On May 2, 2014, these warrants were exercised, resulting in the issuance of 978,457 shares of our common stock. The issuance of these shares and their subsequent sale will dilute our existing stockholders and could potentially have a negative impact on our stock price.

Our shares of common stock have experienced substantial price and volume fluctuations, in many cases without any direct relationship to our operating performance. An outgrowth of this market volatility is the significant vulnerability of our stock price to any actual or perceived fluctuation in the strength of the markets we serve, regardless of the actual consequence of such fluctuations. As a result, the market price for our stock is highly volatile. These broad market and industry factors have caused the market price of our common stock to fluctuate, and may in the future cause the market price of our common stock to fluctuate, regardless of our actual operating performance.

We are not restricted from issuing additional shares of our common stock, including securities that are convertible into or exchangeable for, or that represent the right to receive, shares of our common stock. Issuances of shares of our common stock or convertible securities, including outstanding options and warrants, will dilute the ownership interest of our stockholders.

We have been named as a party to derivative action lawsuits in the past, and we may be named in additional litigation in the future, all of which would require significant management time and attention and result in significant legal expenses and could result in an unfavorable outcome which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

When the market price of a stock experiences a sharp decline, as has happened to us in the past, holders of that stock have often brought securities class action litigation against the company that issued the stock. Several securities class action lawsuits have been filed against us and certain of our current and former officers and directors. Other class action lawsuits have been initiated in the past against Opnext, us and certain of our respective current and former officers and directors as purported derivative actions. The securities class action complaints alleged violations of section 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated by the Securities and Exchange Commission. Each purported derivative complaint alleged, among other things, counts for breaches of fiduciary duty, waste, and unjust enrichment. The courts recently approved the settlement of these lawsuits and the settlements became final. For a description of these lawsuits, see Part II, Item 1, Legal Proceedings, "Class Action and Derivative Litigation" in this Quarterly Report on Form 10-Q. If new litigation of this type were to be initiated in the future, such litigation would likely divert the time and attention of our management and could cause us to incur significant expense in defending against the litigation. In addition, if any such suits were resolved in a manner adverse to us, the damages we could be required to pay may be substantial and could have an adverse impact on our results of operations and our ability to operate our business.

Because we do not intend to pay dividends, stockholders will benefit from an investment in our common stock only if it appreciates in value.

We have never declared or paid any dividends on our common stock. We anticipate that we will retain any future earnings to support operations and to finance the development of our business and do not expect to pay cash dividends in the foreseeable future. As a result, the success of an investment in our common stock will depend entirely upon any future appreciation in its value. There is no guarantee that our common stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

We are subject to anti-corruption laws in the jurisdictions in which we operate, including the U.S. Foreign Corrupt Practices Act, or the FCPA. Our failure to comply with these laws could result in penalties which could harm our reputation and have a material adverse effect on our business, results of operations and financial condition.

We are subject to the FCPA, which generally prohibits companies and their intermediaries from making improper payments to foreign officials for the purpose of obtaining or keeping business and/or other benefits, along with various other anti-corruption laws. Although we have implemented policies and procedures designed to ensure that we, our employees and other intermediaries comply with the FCPA and other anti-corruption laws to which we are subject, there is no assurance that such policies or procedures will work effectively all of the time or protect us against liability under the FCPA or other laws for actions taken by our employees and other intermediaries with respect to our

business or any businesses that we may acquire. We have manufacturing operations in China and other jurisdictions, many of which pose elevated risks of anti-corruption violations, and we export our products for sale internationally. This puts us in frequent contact with persons who may be considered “foreign officials” under the FCPA, resulting in an elevated risk of potential FCPA violations. If we are not in compliance with the FCPA and other laws governing the conduct of business with government entities (including local laws), we may be subject to criminal and civil penalties and other remedial measures, which could have an adverse impact on our business, financial condition, results of operations and liquidity. Any investigation of any potential violations of the FCPA or other anti-corruption laws by U.S. or foreign authorities could harm our reputation and have an adverse impact on our business, financial condition and results of operations.

Table of Contents

Litigation may substantially increase our costs and harm our business.

We are a party to numerous lawsuits and will continue to incur legal fees and other costs related thereto, including potentially expenses for the reimbursement of legal fees of officers and directors under indemnification obligations. The expense of continuing to defend such litigation may be significant. In addition, there can be no assurance that we will be successful in any defense. Further, the amount of time that will be required to resolve these lawsuits is unpredictable and these actions may divert management's attention from the day-to-day operations of our business, which could adversely affect our business, results of operations and cash flows. Litigation is subject to inherent uncertainties, and an adverse result in these or other matters that may arise from time to time could have a material adverse effect on our business, results of operations and financial condition.

For a description of our current material litigation, see Part II, Item 1 – Legal Proceedings of this Quarterly Report on Form 10-Q.

In addition, from time to time, we have been a party to certain intellectual property infringement litigation as more fully described above under “Risks Related to Our Business — Our products may infringe the intellectual property rights of others, which could result in expensive litigation or require us to obtain a license to use the technology from third parties, or we may be prohibited from selling certain products in the future.”

The inability to obtain government licenses and approvals for desired international trading activities or technology transfers may prevent the profitable operation of our business.

Many of our present and future business activities are subject to licensing by the United States government under the Export Administration Act, the Export Administration Regulations and other laws, regulations and requirements governing international trade and technology transfer. We presently manufacture products in China and Thailand that require such licenses. The profitable operations of our business may require the continuity of these licenses and may require further licenses and approvals for future products in these and other countries. However, there is no certainty to the continuity of these licenses, nor that further desired licenses and approvals may be obtained.

Prior to our acquisition of Opnext, Opnext licensed its intellectual property to Hitachi and its wholly owned subsidiaries without restriction. In addition, Hitachi is free to license certain of Hitachi's intellectual property that Opnext used in its business to any third party, including competitors, which could harm our business and operating results.

Opnext was initially created as a stand-alone entity by acquiring certain assets of Hitachi through various transactions. In connection with these transactions, Opnext acquired a number of patents and know-how from Hitachi, but also granted Hitachi and its wholly owned subsidiaries a perpetual right to continue to use those patents and know-how, as well as other patents and know-how that Opnext developed during a period which ended in July 2011 (or October 2012 in certain cases). This license back to Hitachi is broad and permits Hitachi to use this intellectual property for any products or services anywhere in the world, including licensing this intellectual property to our competitors. Additionally, while significant intellectual property owned by Hitachi was assigned to Opnext when Opnext was formed, Hitachi retained and only licensed to Opnext the intellectual property rights to underlying technologies used in both Opnext products and the products of Hitachi. Under the agreement, Hitachi remains free to license these intellectual property rights to the underlying technologies to any party, including competitors. The intellectual property that has been retained by Hitachi and that can be licensed in this manner does not relate solely or primarily to one or more of Opnext's products, or groups of products; rather, the intellectual property that is licensed to Opnext by Hitachi is generally used broadly across Opnext's entire product portfolio. Competition by third parties using the underlying technologies retained by Hitachi could harm the Opnext business, financial condition and results of operations.

We may record additional impairment charges that will adversely impact our results of operations.

As of March 28, 2015, we had \$2.8 million in other intangible assets and \$41.4 million of property and equipment, net on our condensed consolidated balance sheet. If we make changes in our business strategy or if market or other conditions adversely affect our business operations, we may be forced to record an impairment charge related to these assets, which would adversely impact our results of operations. If impairment has occurred, we will be required to

record an impairment charge for the difference between the carrying value of the other intangible assets and the implied fair value of the other intangible assets in the period in which such determination is made. The testing of other intangible assets for impairment requires us to make significant estimates about the future performance and cash flows of our business, as well as other assumptions. These estimates can be affected by numerous factors, including changes in economic, industry, or market conditions, changes in underlying business operations, future reporting unit operating performance, changes in competition, or changes in technologies. Any changes in key assumptions, or actual performance compared with those assumptions, about our business and its future prospects or other assumptions could affect the fair value of one or more reporting units, and result in an impairment charge.

Table of Contents

During the fourth quarter of fiscal year 2013 we completed our annual analysis for potential impairment of our goodwill, which included examining, based on factors and conditions then existing, the impact of current general economic conditions on our future prospects and the current level of our market capitalization. Based on this analysis, we determined that the goodwill related to our Mintera reporting unit was fully impaired. This resulted in a \$10.9 million impairment charge in our statement of operations for fiscal year 2013. In addition, during the first quarter of fiscal year 2013, we recorded \$0.9 million in impairment charges related to the impairment of certain technology that is now considered redundant following the acquisition of Opnext. In the fourth quarter of fiscal year 2013, we recorded an additional \$13.7 million impairment charge related to the impairment of intangible assets related to certain technologies and we recorded impairment charges of \$1.7 million related to other long-lived assets.

Our business and operating results may be adversely affected by natural disasters or other catastrophic events beyond our control.

Our business and operating results are vulnerable to natural disasters, such as earthquakes, fires, tsunami, volcanic activity and floods, as well as other events beyond our control such as power loss, telecommunications failures and uncertainties arising out of terrorist attacks in the United States and armed conflicts overseas. For example, in the latter three quarters of fiscal year 2012, our results of operations were materially and adversely impacted by the flooding in Thailand. Additionally, our corporate headquarters and a portion of our research and development and manufacturing operations are located in Silicon Valley, California, and select manufacturing facilities are located in Japan. These regions in particular have been vulnerable to natural disasters, such as the 2011 earthquake and subsequent tsunami that occurred in Japan. The occurrence of any of these events could pose physical risks to our property and personnel, which may adversely affect our ability to produce and deliver products to our customers. Although we presently maintain insurance against certain of these events, we cannot be certain that our insurance will be adequate to cover any damage sustained by us or by our customers.

Our business involves the use of hazardous materials, and we are subject to environmental and import/export laws and regulations that may expose us to liability and increase our costs.

We handle hazardous materials as part of our manufacturing activities. Consequently, our operations are subject to environmental laws and regulations governing, among other things, the use and handling of hazardous substances and waste disposal. We may incur costs to comply with current or future environmental laws. As with other companies engaged in manufacturing activities that involve hazardous materials, a risk of environmental liability is inherent in our manufacturing activities, as is the risk that our facilities will be shut down in the event of a release of hazardous waste, or that we would be subject to extensive monetary liabilities. The costs associated with environmental compliance or remediation efforts or other environmental liabilities could adversely affect our business. Under applicable European Union regulations, we, along with other electronics component manufacturers, are prohibited from using lead and certain other hazardous materials in our products. We could lose business or face product returns if we fail to maintain these requirements properly.

In addition, the sale and manufacture of certain of our products require on-going compliance with governmental security and import/export regulations. We may, in the future, be subject to investigation which may result in fines for violations of security and import/export regulations. Furthermore, any disruptions of our product shipments in the future, including disruptions as a result of efforts to comply with governmental regulations, could adversely affect our revenues, gross margins and results of operations.

The new disclosure requirements related to the “conflict minerals” provision of the Dodd-Frank Act may limit our supply and increase our costs for certain metals used in our products and could affect our reputation with customers or shareholders.

Under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act), the Securities and Exchange Commission (SEC) adopted a new rule requiring public companies to disclose the use of specified minerals, known as conflict minerals, that are necessary to the functionality or production of products manufactured or contracted to be manufactured. The new rule, which went into effect for calendar year 2013 and required a disclosure report to be filed with the SEC by June 2, 2014, requires companies to perform due diligence, disclose and report whether or not such minerals originate from the Democratic Republic of Congo (DRC) or an adjoining country.

Portions of the new rule have been challenged in the courts and may be subject to further interpretation and amendment either of which could impose additional or different obligations on us. The new rule could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals used in the manufacturing of our products. The number of suppliers who provide conflict-free minerals may be limited. In addition, there may be material costs associated with complying with the disclosure requirements, such as costs related to the due diligence process of determining the source of certain minerals used in our products, as well as costs of possible changes to products, processes, or sources of supply as a consequence of such verification activities. As our supply chain is complex and we use contract manufacturers for some of our products, we may not be able to sufficiently verify the origins of the relevant minerals used in our products through the due diligence procedures that we implement, which may harm our reputation. If we cannot determine that our products exclude conflict minerals sourced from the DRC or adjoining

Table of Contents

countries, some of our customers may discontinue, or materially reduce, purchases of our products, which could negatively affect our results of operations.

We can issue shares of preferred stock that may adversely affect your rights as a stockholder of our common stock. Our certificate of incorporation authorizes us to issue up to 1.0 million shares of preferred stock with designations, rights and preferences determined from time-to-time by our board of directors. Accordingly, our board of directors is empowered, without stockholder approval, to issue preferred stock with dividend, liquidation, conversion, voting or other rights superior to those of holders of our common stock. For example, an issuance of shares of preferred stock could:

- adversely affect the voting power of the holders of our common stock;
- make it more difficult for a third-party to gain control of us;
- discourage bids for our common stock at a premium;
- limit or eliminate any payments that the holders of our common stock could expect to receive upon our liquidation; or
- otherwise adversely affect the market price of our common stock.

We may in the future issue shares of authorized preferred stock at any time.

Delaware law and our charter documents contain provisions that could discourage or prevent a potential takeover, even if such a transaction would be beneficial to our stockholders.

Some provisions of our certificate of incorporation and bylaws, as well as provisions of Delaware law, may discourage, delay or prevent a merger or acquisition that a stockholder may consider favorable. These include provisions:

- authorizing the board of directors to issue preferred stock;
- prohibiting cumulative voting in the election of directors;
- limiting the persons who may call special meetings of stockholders;
- prohibiting stockholder actions by written consent;
- creating a classified board of directors pursuant to which our directors are elected for staggered three-year terms;
- permitting the board of directors to increase the size of the board and to fill vacancies;
- requiring a super-majority vote of our stockholders to amend our bylaws and certain provisions of our certificate of incorporation; and
- establishing advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted on by stockholders at stockholder meetings.

We are subject to the provisions of Section 203 of the Delaware General Corporation Law which limit the right of a corporation to engage in a business combination with a holder of 15 percent or more of the corporation's outstanding voting securities, or certain affiliated persons. We do not currently have a stockholder rights plan in place.

Although we believe that these charter and bylaw provisions, and provisions of Delaware law, provide an opportunity for the board to assure that our stockholders realize full value for their investment, they could have the effect of delaying or preventing a change of control, even under circumstances that some stockholders may consider beneficial.

ITEM 6. EXHIBITS

The exhibits filed as part of this Quarterly Report on Form 10-Q, or incorporated by reference, are listed on the Exhibit Index immediately preceding such exhibits, which Exhibit Index is incorporated herein by reference.
