Notes to the Condensed Consolidated Financial Statements (Unaudited)

A. Financial Statements

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and with the requirements of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by United States GAAP for complete financial statements. In the opinion of management, these statements include all adjustments (consisting of only normal recurring accruals, unless otherwise disclosed in this Form 10-Q) necessary for a fair presentation of the financial position of EQT Corporation and subsidiaries as of June 30, 2017 and December 31, 2016, the results of its operations for the three and six month periods ended June 30, 2017 and 2016 and its cash flows and equity for the six month periods ended June 30, 2017 and 2016. In this Quarterly Report on Form 10-Q, references to “we,” “us,” “our,” “EQT,” “EQT Corporation,” and the “Company” refer collectively to EQT Corporation and its consolidated subsidiaries.

As of December 31, 2016, the Company reports its results of operations through three business segments: EQT Production, EQT Gathering and EQT Transmission. The segment disclosures and discussions contained in this Quarterly Report on Form 10-Q have been recast to reflect the current reporting structure for all periods presented. Certain previously reported amounts have been reclassified to conform to the current year presentation under the current segment reporting structure.

The balance sheet at December 31, 2016 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by United States GAAP for complete financial statements.

For further information on the Company, refer to the consolidated financial statements and footnotes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2016 as well as “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 22 of this Quarterly Report on Form 10-Q.

B. EQT GP Holdings, LP

In January 2015, the Company formed EQT GP Holdings, LP (EQGP) (NYSE: EQGP), a Delaware limited partnership, to own the Company’s partnership interests in EQT Midstream Partners, LP (EQM) (NYSE: EQM). EQGP owned the following EQM partnership interests as of June 30, 2017, which represent EQGP’s only cash-generating assets: 21,811,643 EQM common units, representing a 26.6% limited partner interest in EQM; 1,443,015 EQM general partner units, representing a 1.8% general partner interest in EQM; and all of EQM’s incentive distribution rights, or IDRs, which entitle EQGP to receive up to 48.0% of all incremental cash distributed in a quarter after \$0.5250 has been distributed in respect of each common unit and general partner unit of EQM for that quarter. The Company is the ultimate parent company of EQGP and EQM.

The Company consolidates the results of EQGP but records an income tax provision only on its ownership percentage of EQGP earnings. The Company records the noncontrolling interest of the EQGP and EQM public limited partners (i.e., the EQGP limited partner interests not owned by the Company and the EQM limited partner interests not owned by EQGP) in its financial statements.

On July 25, 2017, the Board of Directors of EQGP’s general partner declared a cash distribution to EQGP’s unitholders for the second quarter of 2017 of \$0.21 per common unit, or approximately \$55.9 million. The distribution will be paid on August 23, 2017 to unitholders of record, including the Company, at the close of business on August 4, 2017.

C. EQT Midstream Partners, LP

In January 2012, the Company formed EQM to own, operate, acquire and develop midstream assets in the Appalachian Basin. EQM provides midstream services to the Company and other third parties. EQM is consolidated in the Company's financial statements. The Company records the noncontrolling interest of the EQM public limited partners in its financial statements.

On July 25, 2017, the Board of Directors of EQM's general partner declared a cash distribution to EQM's unitholders for the second quarter of 2017 of \$0.935 per common unit. The cash distribution will be paid on August 14, 2017 to unitholders of record, including EQGP, at the close of business on August 4, 2017. Based on the 80,581,758 EQM common units outstanding on July 27, 2017, the aggregate cash distributions by EQM to EQGP for the second quarter 2017 will be approximately \$56.5 million consisting of: \$20.4 million in respect of its limited partner interest, \$1.9 million in respect of its general partner interest and \$34.2 million in respect of its IDRs. These distribution amounts to EQGP related to its general partner interest and IDRs in EQM are subject to change if EQM issues additional common units on or prior to the record date for the second quarter 2017 distribution.

Table of Contents

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

D. Investment in Nonconsolidated Entity

As of June 30, 2017, EQM owned a 45.5% interest (the MVP Interest) in Mountain Valley Pipeline, LLC (MVP Joint Venture). The MVP Joint Venture plans to construct the Mountain Valley Pipeline (MVP), an estimated 300-mile natural gas interstate pipeline spanning from northern West Virginia to southern Virginia. The MVP Joint Venture has secured a total of 2.0 Bcf per day of 20-year firm capacity commitments, including a 1.29 Bcf per day firm capacity commitment by the Company. On June 23, 2017, the Federal Energy Regulatory Commission (FERC) issued the Final Environmental Impact Statement for the project, and the MVP Joint Venture anticipates receiving the FERC certificate by the fourth quarter of 2017. The pipeline is targeted to be placed in-service during the fourth quarter of 2018.

The MVP Joint Venture has been determined to be a variable interest entity because it has insufficient equity to finance its activities during the construction stage of the project. EQM is not the primary beneficiary because it does not have the power to direct the activities of the MVP Joint Venture that most significantly impact its economic performance. Certain business decisions require the approval of owners holding more than a 66 2/3% interest in the MVP Joint Venture and no one member owns more than a 66 2/3% interest. The Company, through its ownership interest in EQM, accounts for the interest in the MVP Joint Venture as an equity method investment as EQM has the ability to exercise significant influence over operating and financial policies of the MVP Joint Venture.

In May 2017, the MVP Joint Venture issued a capital call notice to MVP Holdco, LLC (MVP Holdco), a direct wholly owned subsidiary of EQM, for \$18.3 million, of which \$5.5 million was paid on July 13, 2017 and the remaining \$12.8 million is expected to be paid on August 15, 2017. The capital contribution payable has been reflected on the Condensed Consolidated Balance Sheet as of June 30, 2017 with a corresponding increase to the Company's investment in the MVP Joint Venture.

The Company's ownership share of the earnings for the three months ended June 30, 2017 and 2016 related to the MVP Joint Venture was \$5.1 million and \$1.9 million, respectively. The Company's ownership share of the earnings for the six months ended June 30, 2017 and 2016 related to the MVP Joint Venture was \$9.4 million and \$3.4 million, respectively. These earnings are reported in other income on the Statements of Consolidated Operations for the periods presented.

As of June 30, 2017, EQM had issued a \$91 million performance guarantee in favor of the MVP Joint Venture to provide performance assurances for MVP Holdco's obligations to fund its proportionate share of the construction budget for the MVP. Upon the FERC's initial release to begin construction of the MVP, EQM's guarantee will terminate; EQM will then be obligated to issue a new guarantee in an amount equal to 33% of MVP Holdco's remaining obligations to make capital contributions to the MVP Joint Venture in connection with the then remaining construction budget, less, subject to certain limits, any credit assurances issued by any affiliate of EQM under such affiliate's precedent agreement with the MVP Joint Venture.

As of June 30, 2017, EQM's maximum financial statement exposure related to the MVP Joint Venture was approximately \$352 million, which included the investment in nonconsolidated entity balance on the Condensed Consolidated Balance Sheet as of June 30, 2017 and amounts which could have become due under the performance guarantee as of that date.

E. Consolidated Variable Interest Entities

The Company determined EQGP and EQM to be variable interest entities. Through EQT's ownership and control of EQGP's general partner and control of EQM's general partner, EQT has the power to direct the activities that most significantly impact their economic performance. In addition, through EQT's limited partner interest in EQGP and EQGP's general partner interest, limited partner interest and IDRs in EQM, EQT has the obligation to absorb the losses of EQGP and EQM and the right to receive benefits from EQGP and EQM, in accordance with such interests. As EQT has a controlling financial interest in EQGP, and is the primary beneficiary of EQGP, EQT consolidates EQGP who consolidates EQM. See Note 12 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2016 for additional information related to the consolidated variable interest entities.

The risks associated with the operations of EQGP and EQM are discussed in their respective Annual Reports on Form 10-K for the year ended December 31, 2016, as updated by any Quarterly Reports on Form 10-Q. See further discussion of the impact that EQT's ownership and control of EQGP and EQM have on EQT's financial position, results of operations and cash flows included in EQT's Annual Report on Form 10-K for the year ended December 31, 2016, including in the section captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations" contained therein. See Notes B and C for further discussion of EQGP and EQM, respectively.

Net cash (used in) provided by financing activities	(63,255)	137,883	(160,022)	(214,821)

F. Financial Information by Business Segment

Operating segments are revenue-producing components of the enterprise for which separate financial information is produced internally and which are subject to evaluation by the Company's chief operating decision maker in deciding how to allocate resources.

The Company reports its operations in three segments, which reflect its lines of business: EQT Production, EQT Gathering and EQT Transmission. The EQT Production segment includes the Company's exploration for, and development and production of, natural gas, natural gas liquids (NGLs) and a limited amount of crude oil, primarily in the Appalachian Basin. The EQT Production segment also includes the marketing activities of the Company. The operations of EQT Gathering include the natural gas gathering activities of the Company, consisting solely of assets that are owned and operated by EQM. The operations of EQT Transmission include the natural gas transmission and

storage activities of the Company, consisting solely of assets that are owned and operated by EQM.

Operating segments are evaluated on their contribution to the Company's consolidated results based on operating income. Other income, interest and income taxes are managed on a consolidated basis. Headquarters' costs are billed to the operating segments based upon an allocation of the headquarters' annual operating budget. Differences between budget and actual headquarters' expenses are not allocated to the operating segments.

Substantially all of the Company's operating revenues, income from operations and assets are generated or located in the United States.

(b) Includes the capitalized portion of non-cash stock-based compensation expense and the impact of capital accruals.

(c) Expenditures for segment assets in the EQT Production segment included \$49.6 million and \$34.8 million for general leasing activity during the three months ended June 30, 2017 and 2016, respectively, and \$94.9 million and \$68.1 million for general leasing activity during the six months ended June 30, 2017 and 2016, respectively. The three and six months ended June 30, 2017 also includes \$141.7 million and \$811.2 million of cash capital expenditures, respectively, for the acquisitions discussed in Note M. During the six months ended June 30, 2017,

the Company also incurred \$9.7 million of non-cash capital expenditures for the acquisitions discussed in Note M.

Notes to the Condensed Consolidated Financial Statements (Unaudited)

G. Derivative Instruments

The Company's primary market risk exposure is the volatility of future prices for natural gas and NGLs, which can affect the operating results of the Company primarily at EQT Production. The Company's overall objective in its hedging program is to protect cash flows from undue exposure to the risk of changing commodity prices.

The Company uses over the counter (OTC) derivative commodity instruments, primarily swap and collar agreements that are typically placed with financial institutions. The creditworthiness of all counterparties is regularly monitored. Swap agreements involve payments to or receipts from counterparties based on the differential between two prices for the commodity. Collar agreements require the counterparty to pay the Company if the index price falls below the floor price and the Company to pay the counterparty if the index price rises above the cap price. The Company also sells call options that require the Company to pay the counterparty if the index price rises above the strike price. The Company engages in basis swaps to protect earnings from undue exposure to the risk of geographic disparities in commodity prices and interest rate swaps to hedge exposure to interest rate fluctuations on potential debt issuances. The Company has also engaged in a limited number of swaptions and power-indexed natural gas sales and swaps that are accounted for as derivative commodity instruments.

The Company recognizes all derivative instruments as either assets or liabilities at fair value on a gross basis. These derivative instruments are reported as either current assets or current liabilities due to their highly liquid nature. The Company can net settle its derivative instruments at any time.

The Company discontinued cash flow hedge accounting in 2014; therefore, all changes in fair value of the Company's derivative instruments are recognized within operating revenues in the Statements of Consolidated Operations.

In prior periods, derivative commodity instruments used by the Company to hedge its exposure to variability in expected future cash flows associated with the fluctuations in the price of natural gas related to the Company's forecasted sale of EQT Production's produced volumes and forecasted natural gas purchases and sales were designated and qualified as cash flow hedges. As of June 30, 2017 and December 31, 2016, the forecasted transactions that were hedged as of December 31, 2014 remained probable of occurring and as such, the amounts in accumulated other comprehensive income (OCI) will continue to be reported in accumulated OCI and will be reclassified into earnings in future periods when the underlying hedged transactions occur. The forecasted transactions extend through December 2018. As of June 30, 2017 and December 31, 2016, the Company deferred net gains of \$7.0 million and \$9.6 million, respectively, in accumulated OCI, net of tax, related to the effective portion of the change in fair value of its derivative commodity instruments designated as cash flow hedges. The Company estimates that approximately \$3.0 million of net gains on its derivative commodity instruments reflected in accumulated OCI, net of tax, as of June 30, 2017 will be recognized in earnings during the next twelve months due to the settlement of hedged transactions.

Contracts which result in physical delivery of a commodity expected to be used or sold by the Company in the normal course of business are designated as normal purchases and sales and are exempt from derivative accounting.

OTC arrangements require settlement in cash. Settlements of derivative commodity instruments are reported as a component of cash flows from operations in the accompanying Statements of Condensed Consolidated Cash Flows.

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

With respect to the derivative commodity instruments held by the Company, the Company hedged portions of expected sales of equity production and portions of its basis exposure covering approximately 614 Bcf of natural gas and 735 Mbbls of NGLs as of June 30, 2017, and 646 Bcf of natural gas and 1,095 Mbbls of NGLs as of December 31, 2016. The open positions at June 30, 2017 and December 31, 2016 had maturities extending through December 2020.

The Company has netting agreements with financial institutions and its brokers that permit net settlement of gross commodity derivative assets against gross commodity derivative liabilities. The table below reflects the impact of netting agreements and margin deposits on gross derivative assets and liabilities as of June 30, 2017 and December 31, 2016.

	Derivative instruments, recorded in the Condensed Consolidated Balance Sheet, gross (Thousands)	Derivative instruments subject to master netting agreements	Margin deposits remitted to counterparties	Derivative instruments, net
As of June 30, 2017				
Asset derivatives:				
Derivative instruments, at fair value	\$85,442	\$(49,465)	\$	—\$ 35,977
Liability derivatives:				
Derivative instruments, at fair value	\$107,880	\$(49,465)	\$	—\$ 58,415
As of December 31, 2016				
Asset derivatives:				
Derivative instruments, at fair value	\$33,053	\$(23,373)	\$	—\$ 9,680
Liability derivatives:				
Derivative instruments, at fair value	\$257,943	\$(23,373)	\$	—\$ 234,570

Certain of the Company's derivative instrument contracts provide that if the Company's credit ratings by Standard & Poor's Rating Service (S&P) or Moody's Investors Service (Moody's) are lowered below investment grade, additional collateral must be deposited with the counterparty if the amounts outstanding on those contracts exceed certain thresholds. The additional collateral can be up to 100% of the derivative liability. As of June 30, 2017, the aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a net liability position was \$12.2 million, for which the Company had no collateral posted on June 30, 2017. If the Company's credit rating by S&P or Moody's had been downgraded below investment grade on June 30, 2017, the Company would not have been required to post any additional collateral under the agreements with the respective counterparties. The required margin on the Company's derivative instruments is subject to significant change as a result of factors other than credit rating, such as gas prices and credit thresholds set forth in agreements between the hedging counterparties and the Company. Investment grade refers to the quality of the Company's credit as assessed by one or more credit rating

agencies. The Company's senior unsecured debt was rated BBB by S&P and Baa3 by Moody's at June 30, 2017. In order to be considered investment grade, the Company must be rated BBB- or higher by S&P and Baa3 or higher by Moody's. Anything below these ratings is considered non-investment grade. See also "Security Ratings and Financing Triggers" under Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

H. Fair Value Measurements

The Company records its financial instruments, principally derivative instruments, at fair value in its Condensed Consolidated Balance Sheets. The Company estimates the fair value using quoted market prices, where available. If quoted market prices are not available, fair value is based upon models that use market-based parameters as inputs, including forward curves, discount rates, volatilities and nonperformance risk. Nonperformance risk considers the effect of the Company's credit standing on the fair value of liabilities and the effect of the counterparty's credit standing on the fair value of assets. The Company estimates nonperformance risk by analyzing publicly available market information, including a comparison of the yield on debt instruments with credit ratings

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

similar to the Company's or counterparty's credit rating and the yield of a risk-free instrument and credit default swaps rates where available.

The Company has categorized its assets and liabilities recorded at fair value into a three-level fair value hierarchy, based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Assets and liabilities in Level 2 primarily include the Company's swap and collar agreements.

The fair value of the commodity swaps included in Level 2 is based on standard industry income approach models that use significant observable inputs, including but not limited to New York Mercantile Exchange (NYMEX) natural gas and propane forward curves, LIBOR-based discount rates and basis forward curves. The Company's collars, options and swaptions are valued using standard industry income approach option models. The significant observable inputs utilized by the option pricing models include NYMEX forward curves, natural gas volatilities and LIBOR-based discount rates. The NYMEX natural gas and propane forward curves, LIBOR-based discount rates, natural gas volatilities and basis forward curves are validated to external sources at least monthly.

The following assets and liabilities were measured at fair value on a recurring basis during the applicable period:

Description	As of June 30, 2017	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
(Thousands)				
Assets				
Derivative instruments, at fair value	\$85,442	\$ —	\$ 85,442	\$ —
Liabilities				
Derivative instruments, at fair value	\$107,880	\$ —	\$ 107,880	\$ —

Description	As of December 31, 2016	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
(Thousands)				
Assets				
Trading securities	\$286,396	\$ —	\$ 286,396	\$ —
Derivative instruments, at fair value	\$33,053	\$ —	\$ 33,053	\$ —
Liabilities				
Derivative instruments, at fair value	\$257,943	\$ —	\$ 257,943	\$ —

The carrying values of cash equivalents, restricted cash, accounts receivable and accounts payable approximate fair value due to the short-term maturity of the instruments. The carrying values of borrowings under EQM's credit facilities approximate fair value as the interest rates are based on prevailing market rates.

The fair values of trading securities classified as Level 2 are priced using nonbinding market prices that are corroborated by observable market data. Inputs into these valuation techniques include actual trade data, broker/dealer quotes and other similar data. As of March 31, 2017, the Company closed its positions on all trading securities. As of December 31, 2016, the Company reflected its investment in trading securities as Level 2 fair value measurements.

The Company estimates the fair value of its debt using its established fair value methodology. Because not all of the Company's debt is actively traded, the fair value of the debt is a Level 2 fair value measurement. Fair value for non-traded debt obligations is estimated using a standard industry income approach model which utilizes a discount rate based on market rates for debt with similar remaining time to maturity and credit risk. The estimated fair value of total debt (including EQM's long-term debt) on the Condensed Consolidated Balance Sheets was approximately \$3.5 billion at June 30, 2017 and December 31, 2016. The carrying

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

value of total debt (including EQM's long-term debt) on the Condensed Consolidated Balance Sheets was approximately \$3.3 billion at June 30, 2017 and December 31, 2016.

The Company recognizes transfers between Levels as of the actual date of the event or change in circumstances that caused the transfer. There were no transfers between Levels 1, 2 and 3 during the periods presented.

I. Income Taxes

For the six months ended June 30, 2017, the Company calculated the provision for income taxes by applying the annual effective tax rate for the full fiscal year to "ordinary" income or loss (pre-tax income or loss excluding unusual or infrequently occurring items) for the quarter. The Company determined small fluctuations in estimated "ordinary" income would result in significant changes in the estimated annual effective tax rate and thus an estimated annual effective tax rate would not provide a reliable estimate for the six months ended June 30, 2016. As a consequence, the Company used a discrete effective tax rate method to calculate taxes for the six months ended June 30, 2016.

All of EQGP's income is included in the Company's pre-tax income. However, the Company is not required to record income tax expense with respect to the portion of EQGP's income allocated to the noncontrolling public limited partners of EQGP and EQM, which reduces the Company's effective tax rate in periods when the Company has consolidated pre-tax income and increases the Company's effective tax rate in periods when the Company has consolidated pre-tax loss.

The Company had consolidated pre-tax income for the six months ended June 30, 2017, compared to a consolidated pre-tax loss for the six months ended June 30, 2016. The Company's effective tax rate for the six months ended June 30, 2017 was 25.9% compared to 64.1% for the six months ended June 30, 2016. The decrease in the effective income tax rate was attributable to the Company's consolidated pre-tax income for the six months ended June 30, 2017, for which EQGP's income allocated to the noncontrolling limited partners reduced the effective tax rate. The Company's pre-tax income increased primarily due to an increase in EQT Production segment operating income during the period resulting primarily from a higher average realized price and gains on derivatives not designated as hedges for the six months ended June 30, 2017.

There were no material changes to the Company's methodology for determining unrecognized tax benefits during the three months ended June 30, 2017.

J. Revolving Credit Facilities

The Company has a \$1.5 billion unsecured revolving credit facility that expires in February 2019. The Company had no borrowings or letters of credit outstanding under its revolving credit facility as of June 30, 2017 or December 31, 2016 or at any time during the three and six months ended June 30, 2017 and 2016.

EQM has a \$750 million credit facility that expires in February 2019. EQM had no borrowings and no letters of credit outstanding under the \$750 million credit facility as of June 30, 2017 or December 31, 2016. There were no borrowings outstanding at any time during the three and six months ended June 30, 2017. During the three and six months ended June 30, 2016, the maximum amount of EQM's outstanding borrowings under the credit facility at any time was \$128 million and \$299 million, respectively, and the average daily balance was approximately \$33 million and \$83 million, respectively. Interest was incurred at a weighted average annual interest rate of approximately 1.9% for the three and six months ended June 30, 2016.

See "Capital Resources and Liquidity" in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" for description of the proposed amendments to the Company's \$1.5 billion revolving credit facility and EQM's \$750 million credit facility.

K. Earnings Per Share

Potentially dilutive securities (options and restricted stock awards) included in the calculation of diluted earnings per share totaled 120,228 and 204,430 for the three and six months ended June 30, 2017, respectively. Options to purchase common stock excluded from potentially dilutive securities because they were anti-dilutive totaled 713,800 and 473,700 for the three and six months ended June 30, 2017, respectively. In periods when the Company reports a net loss, all options and restricted stock awards are excluded from the calculation of diluted weighted average shares outstanding because of their anti-dilutive effect on loss per share. Due to the Company's net loss for the three and six months ended June 30, 2016, all outstanding options and restricted stock awards were excluded from the calculation of diluted earnings per share. The excluded options and restricted stock awards totaled 1,760,780

Table of Contents

EQT Corporation and Subsidiaries

Notes to the Condensed Consolidated Financial Statements (Unaudited)

and 1,859,890 for the three and six months ended June 30, 2016, respectively. The impact of EQM's and EQGP's dilutive units did not have a material impact on the Company's earnings per share calculations for any of the periods presented.

L. Changes in Accumulated Other Comprehensive Income by Component

The following tables explain the changes in accumulated OCI by component during the applicable period:

	Three Months Ended June 30, 2017			
	Natural gas cash flow hedges, net of tax (Thousands)	Interest rate cash flow hedges, net of tax	Other post- retirement benefit liability adjustment, net of tax	Accumulated OCI, net of tax
Accumulated OCI (loss), net of tax, as of April 1, 2017	\$8,719	\$(663)	\$(6,790)	\$ 1,266
(Gains) losses reclassified from accumulated OCI, net of tax	(1,672)	(a)36	(a)77	(b)(1,559)
Accumulated OCI (loss), net of tax, as of June 30, 2017	\$7,047	\$(627)	\$(6,713)	\$(293)
	Three Months Ended June 30, 2016			
	Natural gas cash flow hedges, net of tax (Thousands)	Interest rate cash flow hedges, net of tax	Pension and other post- retirement benefits liability adjustment, net of tax	Accumulated OCI, net of tax
Accumulated OCI (loss), net of tax, as of April 1, 2016	\$52,338	\$(807)	\$(17,328)	\$ 34,203
(Gains) losses reclassified from accumulated OCI, net of tax	(15,940)	(a)36	(a)9,622	(b)(6,282)
Accumulated OCI (loss), net of tax, as of June 30, 2016	\$36,398	\$(771)	\$(7,706)	\$ 27,921
	Six Months Ended June 30, 2017			
	Natural gas cash flow hedges, net of tax (Thousands)	Interest rate cash flow hedges, net of tax	Other post- retirement benefit liability adjustment, net of tax	Accumulated OCI, net of tax
Accumulated OCI (loss), net of tax, as of January 1, 2017	\$9,607	\$(699)	\$(6,866)	\$ 2,042
(Gains) losses reclassified from accumulated OCI, net of tax	(2,560)	(a)72	(a)153	(b)(2,335)
Accumulated OCI (loss), net of tax, as of June 30, 2017	\$7,047	\$(627)	\$(6,713)	\$(293)
	Six Months Ended June 30, 2016

Edgar Filing: EQT Corp - Form 10-Q

	flow hedges, net of tax	cash flow hedges, net of tax	other post- retirement benefits liability adjustment, net of tax	OCI, net of tax
	(Thousands)			
Accumulated OCI (loss), net of tax, as of January 1, 2016	\$64,762	\$(843)	\$(17,541)	\$ 46,378
(Gains) losses reclassified from accumulated OCI, net of tax	(28,364)	(a)72	(a)9,835	(b)(18,457)
Accumulated OCI (loss), net of tax, as of June 30, 2016	\$36,398	\$(771)	\$(7,706)	\$ 27,921

(a) See Note G for additional information.

(b) The accumulated OCI reclassification for the three and six months ended June 30, 2017 is attributable to the net actuarial loss and net prior service cost related to the Company's post-retirement benefit plans. The accumulated OCI reclassification for the three and six months ended June 30, 2016 is attributable to the net actuarial loss and net prior service cost related to the Company's defined benefit pension plans and other post-retirement benefit plans. See Note 15 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2016 for additional information.

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

M. Acquisitions

On February 1, 2017, the Company acquired approximately 14,000 net Marcellus acres located in Marion, Monongalia and Wetzel Counties of West Virginia from a third-party for \$130 million.

On February 27, 2017, the Company acquired approximately 85,000 net Marcellus acres, including drilling rights on approximately 44,000 net Utica acres and current natural gas production of approximately 110 MMcfe per day, from Stone Energy Corporation for \$522.5 million. The acquired acres are primarily located in Wetzel, Marshall, Tyler and Marion Counties of West Virginia. The acquired assets also include 174 operated Marcellus wells and 20 miles of gathering pipeline.

On June 30, 2017, the Company acquired approximately 11,000 net Marcellus acres, and the associated Utica drilling rights, from a third-party for \$83.5 million. The acquired acres are primarily located within Allegheny, Washington and Westmoreland Counties of Pennsylvania.

In connection with the acquisitions which occurred during the six months ended June 30, 2017, the Company paid net cash of \$736.0 million. The purchase prices remain subject to customary post-closing adjustments as of June 30, 2017. The preliminary fair value assigned to the acquired property, plant and equipment as of the opening balance sheet dates totaled \$747.9 million. In connection with the 2017 acquisitions, the Company assumed approximately \$7.2 million of net current liabilities and \$4.7 million of non-current liabilities. The amounts presented in the financial statements represent the Company's estimates based on preliminary valuations of acquired assets and liabilities and are subject to change based on the Company's finalization of asset and liability valuations.

As a result of post-closing adjustments on its 2016 acquisitions, the Company paid \$75.2 million for additional undeveloped acreage and recorded other non-cash adjustments which reduced the preliminary fair values assigned to the acquired property, plant and equipment by \$2.2 million during the six months ended June 30, 2017. The purchase prices for the Company's 2016 acquisitions, as well as the fair values assigned to the acquired assets and assumed liabilities, remain preliminary as of June 30, 2017.

N. Rice Merger

On June 19, 2017, the Company entered into an Agreement and Plan of Merger (the Rice Merger Agreement) with Rice Energy Inc. (Rice) (NYSE: RICE), pursuant to which Rice will merge with and into a wholly owned indirect subsidiary of EQT through a series of transactions (the Rice Merger). If the Rice Merger is completed, each share of the common stock of Rice (Rice Common Stock) issued and outstanding immediately prior to the effective time (the Effective Time) of the Rice Merger (other than shares excluded by the Rice Merger Agreement) will be converted into the right to receive 0.37 of a share of the common stock of the Company (EQT Common Stock) and \$5.30 in cash (collectively, the Merger Consideration).

Based on the closing price of EQT Common Stock on the New York Stock Exchange on June 16, 2017, the last trading day before the public announcement of the Rice Merger, the aggregate value of the Merger Consideration payable to Rice stockholders was approximately \$6.7 billion. The Company will also assume or refinance approximately \$1.5 billion of net debt and preferred equity of Rice and its subsidiaries and will assume other assets and liabilities of Rice at the Effective Time. Based on the estimated number of shares of EQT Common Stock and

Rice Common Stock that will be outstanding immediately prior to the Effective Time, the Company estimates that, upon the closing of the Rice Merger, existing EQT shareholders and former Rice stockholders will own approximately 65% and 35%, respectively, of the Company's outstanding shares.

The waiting period applicable to the Rice Merger under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 was terminated by the Federal Trade Commission on July 18, 2017. The Rice Merger is expected to close in the fourth quarter of 2017, subject to certain customary closing conditions, including the approval by the Company's shareholders of the issuance of shares of EQT Common Stock as Merger Consideration and the adoption of the Rice Merger Agreement by Rice stockholders.

On June 19, 2017, in connection with its entry into the Rice Merger Agreement, the Company also entered into a commitment letter (the Commitment Letter) with Citigroup Global Markets Inc. (Citi), pursuant to which Citi and its affiliates committed to provide, subject to the terms and conditions set forth therein, up to \$1.4 billion of senior unsecured bridge loans (the Bridge Facility), the proceeds of which may be used to pay the cash portion of the Merger Consideration, to refinance certain existing indebtedness of the Company, Rice and their respective subsidiaries, and to pay fees and expenses in connection with the Rice Merger and related transactions. On July 14, 2017, the Company entered into a joinder letter to the Commitment Letter, pursuant to which 16 additional banks assumed a portion of Citi's commitment under the Bridge Facility. The Company capitalized \$7.4

Table of Contents

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

million in debt issuance costs paid to Citi for structuring and related fees for the Bridge Facility in June 2017. The Company is amortizing these debt issuance costs through the expected date of issuance of permanent financing for the Rice Merger. The Company amortized approximately \$0.8 million of the Bridge Facility debt issuance costs during the three months ended June 30, 2017.

The Rice Merger Agreement provides for certain termination rights for both the Company and Rice, including the right of either party to terminate the Rice Merger Agreement if the Rice Merger is not consummated by February 19, 2018 (which may be extended by either party to May 19, 2018 under certain circumstances). Upon termination of the Rice Merger Agreement under certain specified circumstances, the Company may be required to pay Rice, or Rice may be required to pay the Company, a termination fee of \$255.0 million. In addition, if the Rice Merger Agreement is terminated because of a failure of a party's shareholders to approve the proposals required to complete the Rice Merger, that party may be required to reimburse the other party for its transaction expenses in an amount equal to \$67.0 million.

The Company expects to finance the cash portion of the Merger Consideration and the transactions related to the Rice Merger with cash on hand and proceeds from Company debt offerings, borrowings under the Company's \$1.5 billion credit facility and/or borrowings under the Bridge Facility.

O. Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU No. 2014-09, Revenue from Contracts with Customers. The standard requires an entity to recognize revenue in a manner that depicts the transfer of goods or services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers - Deferral of the Effective Date which approved a one year deferral of ASU No. 2014-09 for annual reporting periods beginning after December 15, 2017. The Company expects to adopt the ASUs using the modified retrospective method of adoption on January 1, 2018. During 2016, the Company completed an analysis of the impact of the standard on its broad contract types. As a result, the Company anticipates that this standard will not have a material impact on net income. The Company has made significant progress in a detailed review of the impact of the standard on each of its contracts, which it expects to complete in the third quarter of 2017. The Company is evaluating the impact of the standard on its related disclosures.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities. The changes primarily affect the accounting for equity investments, financial liabilities under the fair value option and the presentation and disclosure requirements for financial instruments. This standard will eliminate the cost method of accounting for equity investments. The ASU will be effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period, with early adoption of certain provisions permitted. The Company will adopt this standard in the first quarter of 2018 and does not expect that the adoption will have a material impact on its financial statements and related disclosures.

In February 2016, the FASB issued ASU No. 2016-02, Leases. The ASU requires, among other things, that lessees recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis;

and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessees and lessors must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The ASU will be effective for annual reporting periods beginning after December 15, 2018, including interim periods within that reporting period, with early adoption permitted. The primary effect of adopting the new standard will be to record assets and obligations for contracts currently recognized as operating leases. The Company has completed a high level identification of agreements covered by this standard and will continue to evaluate the impact this standard will have on its financial statements and related disclosures.

In March 2016, the FASB issued ASU No. 2016-09, Compensation-Stock Compensation: Improvements to Employee Share-Based Payment Accounting. This ASU is part of the FASB initiative to reduce complexity in accounting standards. The areas for simplification in this ASU involve several aspects of the accounting for employee share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. The Company adopted this standard in the first quarter of 2017 with no significant impact on its reported results or disclosures.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments-Credit Losses: Measurement of Credit Losses on Financial Instruments. This ASU amends guidance on reporting credit losses for assets held at amortized cost basis and available for sale

Table of Contents

EQT Corporation and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

debt securities. For assets held at amortized cost basis, this ASU eliminates the probable initial recognition threshold in current GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses. The amendments affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The ASU will be effective for annual reporting periods beginning after December 15, 2019, including interim periods within that reporting period. The Company is currently evaluating the impact this standard will have on its financial statements and related disclosures.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This ASU addresses the presentation and classification of eight specific cash flow issues. The amendments in the ASU will be effective for public business entities for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, with early adoption permitted. The Company adopted this standard in the second quarter of 2017 with no material impact on its financial statements and related disclosures.

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business. This ASU clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The ASU will be effective for public business entities for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, with early adoption permitted. The Company anticipates this standard will not have a material impact on its financial statements and related disclosures.

In March 2017, the FASB issued ASU No. 2017-07, Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. This ASU provides additional guidance on the presentation of net benefit cost in the income statement and on the components eligible for capitalization in assets. The ASU will be effective for public business entities for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, with early adoption permitted. The Company anticipates this standard will not have a material impact on its financial statements and related disclosures.

In May 2017, the FASB issued ASU No. 2017-09, Compensation - Stock Compensation (Topic 718): Scope of Modification Accounting. This ASU provides guidance regarding which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. The ASU will be effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period, with early adoption permitted. The Company is currently evaluating the impact this standard will have on its financial statements and related disclosures.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of financial condition and results of operations in conjunction with the Condensed Consolidated Financial Statements, and the notes thereto, included elsewhere in this report.

CAUTIONARY STATEMENTS

Disclosures in this Quarterly Report on Form 10-Q contain certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. Statements that do not relate strictly to historical or current facts are forward-looking and usually identified by the use of words such as "anticipate," "estimate," "could," "would," "will," "may," "forecast," "approximate," "expect," "plan," "intend," "believe" and other words of similar meaning in connection with any discussion of future operating or financial matters. Without limiting the generality of the foregoing, forward-looking statements contained in this Quarterly Report on Form 10-Q include the matters discussed in the section captioned "Outlook" in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and the expectations of plans, strategies, objectives and growth and anticipated financial and operational performance of the Company and its subsidiaries, including guidance regarding the Company's strategy to develop its Marcellus, Utica, Upper Devonian and other reserves; drilling plans and programs (including the number, type, feet of pay and location of wells to be drilled and the availability of capital to complete these plans and programs); production sales volumes (including liquids volumes) and growth rates; gathering and transmission volumes; infrastructure programs (including the timing, cost and capacity of the gathering and transmission expansion projects); the cost, capacity, timing of regulatory approval, and anticipated in-service date of the Mountain Valley Pipeline (MVP) project; technology (including drilling and completion techniques); monetization transactions, including asset sales, joint ventures or other transactions involving the Company's assets; acquisition transactions; the Company's ability to complete, the timing of, and the Company's financing of the funds required for, the Rice Merger (as defined in Note N to the Condensed Consolidated Financial Statements); natural gas prices, changes in basis and the impact of commodity prices on the Company's business; reserves; potential future impairments of the Company's assets; projected capital expenditures and capital contributions; the amount and timing of any repurchases under the Company's share repurchase authorization; liquidity and financing requirements, including funding sources and availability; hedging strategy; the effects of government regulation and litigation; and tax position. The forward-looking statements included in this Quarterly Report on Form 10-Q involve risks and uncertainties that could cause actual results to differ materially from projected results. Accordingly, investors should not place undue reliance on forward-looking statements as a prediction of actual results. The Company has based these forward-looking statements on current expectations and assumptions about future events. While the Company considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks and uncertainties, many of which are difficult to predict and beyond the Company's control. The risks and uncertainties that may affect the operations, performance and results of the Company's business and forward-looking statements include, but are not limited to, those set forth under Item 1A, "Risk Factors", and elsewhere in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, as updated by Part II, Item 1A, "Risk Factors" in this Quarterly Report on Form 10-Q.

Any forward-looking statement speaks only as of the date on which such statement is made, and the Company does not intend to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise.

In reviewing any agreements incorporated by reference in or filed with this Quarterly Report on Form 10-Q, please remember such agreements are included to provide information regarding the terms of such agreements and are not

intended to provide any other factual or disclosure information about the Company. The agreements may contain representations and warranties by the Company, which should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties to such agreements should those statements prove to be inaccurate. The representations and warranties were made only as of the date of the relevant agreement or such other date or dates as may be specified in such agreement and are subject to more recent developments. Accordingly, these representations and warranties alone may not describe the actual state of affairs of the Company or its affiliates as of the date they were made or at any other time.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

CORPORATE OVERVIEW

Three Months Ended June 30, 2017 vs. Three Months Ended June 30, 2016

Net income attributable to EQT Corporation for the three months ended June 30, 2017 was \$41.1 million, \$0.24 per diluted share, compared with net loss attributable to EQT Corporation of \$258.6 million, a loss of \$1.55 per diluted share, for the three months ended June 30, 2016. The increase was primarily attributable to gains on derivatives not designated as hedges for the three months ended June 30, 2017 compared to losses on derivatives not designated as hedges for the three months ended June 30, 2016, a \$0.75 increase in the average realized price, a 7.3% increase in production sales volumes and higher pipeline and net marketing services revenue, partly offset by higher income tax expense, higher operating expenses, higher interest expense and higher net income attributable to noncontrolling interests of EQGP and EQM.

EQT Production paid \$11.2 million and received \$86.1 million of net cash settlements for derivatives not designated as hedges for the three months ended June 30, 2017 and 2016, respectively, that are included in the average realized price but are not in GAAP operating revenues.

Net income attributable to noncontrolling interests of EQGP and EQM was \$81.5 million for the three months ended June 30, 2017 compared to \$77.8 million for the three months ended June 30, 2016. The \$3.7 million increase was primarily the result of increased net income at EQM and increased ownership of EQM common units by third-parties.

In connection with the Rice Merger, the Company recorded \$4.2 million in acquisition-related expenses during the three months ended June 30, 2017. The Company also capitalized \$7.4 million in debt issuance costs related to the Bridge Facility (as defined in Note N to the Condensed Consolidated Financial Statements) in June 2017. The Company is amortizing these debt issuance costs through the expected date of issuance of permanent financing for the Rice Merger. The Company amortized approximately \$0.8 million of the Bridge Facility debt issuance costs during the three months ended June 30, 2017.

Six Months Ended June 30, 2017 vs. Six Months Ended June 30, 2016

Net income attributable to EQT Corporation for the six months ended June 30, 2017 was \$205.1 million, \$1.18 per diluted share, compared with net loss attributable to EQT Corporation of \$253.0 million, a loss of \$1.56 per diluted share, for the six months ended June 30, 2016. The increase was primarily attributable to gains on derivatives not designated as hedges for the six months ended June 30, 2017 compared to losses on derivatives not designated as hedges for the six months ended June 30, 2016, an \$0.80 increase in the average realized price, a 6.5% increase in production sales volumes and higher pipeline and net marketing services revenue, partly offset by higher income tax expense, higher operating expenses, higher interest expense and higher net income attributable to noncontrolling interests of EQGP and EQM.

EQT Production paid \$20.2 million and received \$195.2 million of net cash settlements for derivatives not designated as hedges for the six months ended June 30, 2017 and 2016, respectively, that are included in the average realized price but are not in GAAP operating revenues.

Net income attributable to noncontrolling interests of EQGP and EQM was \$168.2 million for the six months ended June 30, 2017 compared to \$160.6 million for the six months ended June 30, 2016. The \$7.6 million increase was primarily the result of increased net income at EQM and increased ownership of EQM common units by third-parties.

In connection with the Rice Merger, the Company recorded \$4.2 million in acquisition-related expenses during the six months ended June 30, 2017. The Company also capitalized \$7.4 million in debt issuance costs related to the Bridge Facility in June 2017. The Company is amortizing these debt issuance costs through the expected date of issuance of permanent financing for the Rice Merger. The Company amortized approximately \$0.8 million of the Bridge Facility debt issuance costs during the six months ended June 30, 2017.

See “Business Segment Results of Operations” for a discussion of production sales volumes and gathering and transmission firm reservation fee revenues.

See “Investing Activities” under the caption “Capital Resources and Liquidity” for a discussion of capital expenditures.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Operational Data

The following table presents detailed natural gas and liquids operational information to assist in the understanding of the Company's consolidated operations, including the calculation of the Company's average realized price (\$/Mcf), which is based on EQT Production adjusted operating revenues, a non-GAAP supplemental financial measure. EQT Production adjusted operating revenues is presented because it is an important measure used by the Company's management to evaluate period-to-period comparisons of earnings trends. EQT Production adjusted operating revenues should not be considered as an alternative to EQT Corporation total operating revenues as reported in the Statements of Consolidated Operations, the most directly comparable GAAP financial measure. See "Reconciliation of Non-GAAP Financial Measures" for a reconciliation of EQT Production adjusted operating revenues to EQT Corporation total operating revenues.

The Company's volume weighted NYMEX natural gas price (actual average NYMEX natural gas price (\$/MMBtu) (a) was \$3.18 and \$1.95 for the three months ended June 30, 2017 and 2016, respectively, and \$3.25 and \$2.02 for the six months ended June 30, 2017 and 2016, respectively).

(b) Basis represents the difference between the ultimate sales price for natural gas and the NYMEX natural gas price.

(c) NGLs, ethane and crude oil were converted to Mcfe at the rate of six Mcfe per barrel for all periods.

(d) Also referred to in this report as EQT Production adjusted operating revenues, a non-GAAP supplemental financial measure.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Reconciliation of Non-GAAP Financial Measures

The table below reconciles EQT Production adjusted operating revenues, a non-GAAP supplemental financial measure, to EQT Production total operating revenues as reported under EQT Production Results of Operations, its most directly comparable financial measure calculated in accordance with GAAP. See Note F to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q for a reconciliation of EQT Production operating revenues to EQT Corporation total operating revenues as reported in the Statements of Consolidated Operations.

EQT Production adjusted operating revenues (also referred to as total natural gas & liquids sales, including cash settled derivatives) is presented because it is an important measure used by the Company's management to evaluate period-over-period comparisons of earnings trends. EQT Production adjusted operating revenues as presented excludes the revenue impact of changes in the fair value of derivative instruments prior to settlement and the revenue impact of certain pipeline and net marketing services. Management utilizes EQT Production adjusted operating revenues to evaluate earnings trends because the measure reflects only the impact of settled derivative contracts and thus does not impact the revenue from natural gas sales with the often volatile fluctuations in the fair value of derivatives prior to settlement. EQT Production adjusted operating revenues also excludes "Pipeline and net marketing services" because management considers these revenues to be unrelated to the revenues for its natural gas and liquids production. "Pipeline and net marketing services" primarily includes revenues for gathering services provided to third-parties as well as both the cost of and recoveries on third-party pipeline capacity not used for EQT Production sales volumes. Management further believes that EQT Production adjusted operating revenues as presented provides useful information to investors for evaluating period-over-period earnings trends.

Calculation of EQT Production adjusted operating revenues	Three Months Ended		Six Months Ended June

Management's Discussion and Analysis of Financial Condition and Results of Operations

Business Segment Results of Operations

Business segment operating results are presented in the segment discussions and financial tables on the following pages. Operating segments are evaluated on their contribution to the Company's consolidated results based on operating income. Other income, interest and income taxes are managed on a consolidated basis. Headquarters' costs are billed to the operating segments based upon a fixed allocation of the headquarters' annual operating budget. Unallocated expenses consist primarily of incentive compensation expense and administrative costs.

The Company has reported the components of each segment's operating income and various operational measures in the sections below, and where appropriate, has provided information describing how a measure was derived. EQT's management believes that presentation of this information provides useful information to management and investors regarding the financial condition, operations and trends of each of EQT's business segments without being obscured by the financial condition, operations and trends for the other segments or by the effects of corporate allocations of interest, income taxes and other income. In addition, management uses these measures for budget planning purposes. The Company has reconciled each segment's operating income to the Company's consolidated operating income and net income in Note F to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

As of December 31, 2016, the Company reports its results of operations through three business segments: EQT Production, EQT Gathering and EQT Transmission. The segment disclosures and discussions contained in this Quarterly Report on Form 10-Q have been recast to reflect the current reporting structure for all periods presented. Certain previously reported amounts have been reclassified to conform to the current year presentation under the current segment reporting structure.

(a) Includes Upper Devonian wells.

Includes 2,510 and 3,842 MMcfe of Utica sales volume for the three months ended June 30, 2017 and 2016,

(b) respectively, and 4,972 and 7,795 MMcfe of Utica sales volume for the six months ended June 30, 2017 and 2016, respectively.

(c) NGLs, ethane and crude oil were converted to Mcfe at the rate of six Mcfe per barrel for all periods.

Expenditures for segment assets in the EQT Production segment included \$49.6 million and \$34.8 million for general leasing activity during the three months ended June 30, 2017 and 2016, respectively, and \$94.9 million and \$68.1 million for general leasing activity during the six months ended June 30, 2017 and 2016, respectively. The

(d) three and six months ended June 30, 2017 also includes \$141.7 million and \$811.2 million of cash capital expenditures, respectively, for the acquisitions discussed in Note M to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q. During the six months ended June 30, 2017, the Company also incurred \$9.7 million of non-cash capital expenditures for the acquisitions discussed in Note M to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Three Months Ended June 30, 2017 vs. Three Months Ended June 30, 2016

EQT Production's operating income totaled \$52.8 million for the three months ended June 30, 2017 compared to an operating loss of \$447.7 million for the three months ended June 30, 2016. The \$500.5 million increase was primarily due to gains on derivatives not designated as hedges for the three months ended June 30, 2017 compared to losses on derivatives not designated as hedges for the three months ended June 30, 2016, a higher average realized price and increased sales volumes of produced natural gas and NGLs, partly offset by increased operating expenses.

Total operating revenues were \$631.1 million for the three months ended June 30, 2017 compared to \$77.0 million for the three months ended June 30, 2016. Sales of natural gas, oil and NGLs increased as a result of a higher average realized price and a 7.3% increase in production sales volumes in the current period. EQT Production paid \$11.2 million and received \$86.1 million of net cash settlements for derivatives not designated as hedges for the three months ended June 30, 2017 and 2016, respectively, that are included in the average realized price but are not in GAAP operating revenues. Changes in the fair market value of derivative instruments prior to settlement are recognized in gain on derivatives not designated as hedges. The increase in production sales volumes was primarily the result of increased production from the 2015 and 2016 drilling programs, primarily in the Marcellus play, as well as the recent acquisition activity, partially offset by the normal production decline in the Company's producing wells.

The \$0.75 per Mcfe increase in the average realized price for the three months ended June 30, 2017 was primarily due to the increase in the average NYMEX natural gas price net of cash settled derivatives of \$0.62 per Mcf, an increase in the average natural gas differential of \$0.15 per Mcf and higher liquids prices. The increase in the average differential primarily related to higher basis. Basis improved in the Appalachian Basin and at sales points reached through the Company's transportation portfolio. The Company started flowing its produced volumes to its Rockies Express pipeline capacity and Texas Eastern Transmission Gulf Markets pipeline capacity in the fourth quarter of 2016, which resulted in a favorable impact to basis for the three months ended June 30, 2017 compared to the three months ended June 30, 2016.

EQT Production total operating revenues for the three months ended June 30, 2017 included a \$46.3 million gain on derivatives not designated as hedges compared to a \$234.7 million loss for the three months ended June 30, 2016. The gains for the three months ended June 30, 2017 primarily related to increases in the fair market value of EQT Production's NYMEX swaps due to decreased NYMEX prices, partly offset by a \$30.7 million loss on a physical contract treated as a derivative for accounting purposes that contained off-market terms at inception.

Operating expenses totaled \$578.3 million for the three months ended June 30, 2017 compared to \$524.7 million for the three months ended June 30, 2016. Transmission expense increased \$29.1 million related to increased third-party costs and \$8.6 million primarily due to increased firm capacity on contracts with affiliates incurred to move EQT Production's natural gas out of the Appalachian Basin. Processing expense increased as a result of increased processing capacity acquired through recent acquisitions and higher volumes processed from increased production volumes. Gathering expense increased primarily due to increased third-party volumetric charges and increased affiliate firm gathering capacity.

The decrease in LOE was primarily due to decreased personnel costs and lower salt water disposal costs in 2017, partly offset by other operational costs related to the Company's recent acquisitions. Production taxes increased as a result of an increase in the Pennsylvania impact fee, primarily as a result of an increase in the number of wells drilled in Pennsylvania during the three months ended June 30, 2017. Production taxes also increased due to higher severance taxes associated with increased production volumes resulting from recent acquisitions and on higher market sales prices partly offset by the expiration of the West Virginia volume based tax in 2016. The state of West Virginia

previously imposed a \$0.047 per Mcf additional volume based severance tax that was terminated on July 1, 2016.

SG&A expense decreased primarily due to lower pension expense of \$9.4 million related to the termination of the EQT Corporation Retirement Plan for Employees which was recorded in the second quarter of 2016, decreased legal reserves, lower personnel costs partly offset by higher professional service fees. DD&A expense increased on higher production depletion as a result of higher produced volumes partly offset by a lower overall depletion rate in the second quarter of 2017.

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Six Months Ended June 30, 2017 vs. Six Months Ended June 30, 2016

EQT Production's operating income totaled \$310.2 million for the six months ended June 30, 2017 compared to an operating loss of \$453.2 million for the six months ended June 30, 2016. The \$763.4 million increase was primarily due to gains on derivatives not designated as hedges for the six months ended June 30, 2017 compared to losses on derivatives not designated as hedges for the six months ended June 30, 2016, a higher average realized price, increased sales volumes of produced natural gas and NGLs, and increased pipeline and net marketing services, partly offset by increased operating expenses.

Total operating revenues were \$1,459.8 million for the six months ended June 30, 2017 compared to \$560.7 million for the six months ended June 30, 2016. Sales of natural gas, oil and NGLs increased as a result of a higher average realized price and a 6.5% increase in production sales volumes in the current period. EQT Production paid \$20.2 million and received \$195.2 million of net cash settlements for derivatives not designated as hedges for the six months ended June 30, 2017 and 2016, respectively, that are included in the average realized price but are not in GAAP operating revenues. The increase in production sales volumes was primarily the result of increased production from the 2015 and 2016 drilling programs, primarily in the Marcellus play, as well as the recent acquisition activity, partially offset by the normal production decline in the Company's producing wells.

The \$0.80 per Mcfe increase in the average realized price for the six months ended June 30, 2017 was primarily due to the increase in the average NYMEX natural gas price net of cash settled derivatives of \$0.65 per Mcf, an increase in the average natural gas differential of \$0.11 per Mcf and an increase in liquid prices. The increase in the average differential primarily related to higher basis partly offset by unfavorable cash settled basis swaps for the first six months of 2017 as compared to the first six months of 2016. The Company started flowing its produced volumes to its Rockies Express pipeline capacity and Texas Eastern Transmission Gulf Markets pipeline capacity in the fourth quarter of 2016, which resulted in a favorable impact to basis for the six months ended June 30, 2017 compared to the six months ended June 30, 2016. In addition, for the first six months of 2017, basis improved in the Appalachian Basin and at sales points reached through the Company's transportation portfolio, particularly in the United States Northeast.

Pipeline and net marketing services primarily includes gathering revenues for gathering services provided to third parties and both the cost of, and recoveries on, third-party pipeline capacity not used to transport the Company's produced volumes. The \$5.1 million increase primarily related to costs, net of recoveries, for the Company's Rockies Express Pipeline capacity in 2016.

EQT Production total operating revenues for the six months ended June 30, 2017 included a \$187.1 million gain on derivatives not designated as hedges compared to a \$125.7 million loss for the six months ended June 30, 2016. The gains for the six months ended June 30, 2017 primarily related to increases in the fair market value of EQT Production's NYMEX swaps due to decreased NYMEX prices, partly offset by a \$30.7 million loss on a physical contract treated as a derivative for accounting purposes that contained off-market terms at inception.

Operating expenses totaled \$1,149.6 million for the six months ended June 30, 2017 compared to \$1,013.9 million for the six months ended June 30, 2016. Transmission expense increased \$63.0 million related to increased third-party costs and \$18.1 million primarily due to increased firm capacity on contracts with affiliates incurred to move EQT Production's natural gas out of the Appalachian Basin. Processing expense increased as more volumes were processed from higher production volumes and increased processing capacity acquired through recent acquisitions. Gathering expense increased primarily due to increased third-party volumetric charges and increased affiliate firm gathering capacity.

The decrease in LOE was primarily due to decreased personnel costs, including \$1.9 million of costs related to the consolidation of the Company's Huron operations during the six months ended June 30, 2016, partly offset by an increase in salt water disposal costs in 2017 and other operational costs related to the Company's recent acquisitions. Production taxes increased as a result of higher severance taxes associated with increased production volumes and on higher market sales prices partly offset by the expiration of the West Virginia volume based tax in 2016. Production taxes also increased by \$3.7 million due to an increase in the Pennsylvania impact fee, primarily as a result of an increase in the number of wells drilled in Pennsylvania during the six months ended June 30, 2017.

SG&A expense decreased primarily due to lower pension expense of \$9.4 million related to the termination of the EQT Corporation Retirement Plan for Employees in the second quarter of 2016, lower personnel costs, including reduced costs related to the consolidation of the Company's Huron operations during the six months ended June 30, 2016, a reduction to the reserve for uncollectible accounts and lower legal expenses. This was partly offset by higher professional service fees driven by recent acquisitions. DD&A expense increased on higher production depletion as a result of higher produced volumes partly offset by a lower overall depletion rate in 2017.

Capital expenditures	\$ 53,708	\$ 86,278	(37.8)	\$ 102,546	\$ 159,365	(35.7)

(a) Includes fees on volumes gathered in excess of firm contracted capacity.

(b) Includes volumes gathered under interruptible contracts and volumes gathered in excess of firm contracted capacity.

Three Months Ended June 30, 2017 vs. Three Months Ended June 30, 2016

Gathering revenues increased by \$12.0 million for the three months ended June 30, 2017 compared to the three months ended June 30, 2016 driven by third party and affiliate production development in the Marcellus Shale. EQT Gathering increased firm reservation fee revenues primarily as a result of affiliates and third parties contracting for additional firm gathering capacity on various affiliate wellhead gathering expansion projects and the Range Resources Corporation (Range Resources) Header Pipeline project. The decrease in usage fees under firm contracts was due to lower affiliate volumes in excess of firm contracted capacity. The decrease in usage fees under interruptible contracts was primarily due to the additional contracts for firm capacity.

Operating expenses increased by \$1.9 million for the three months ended June 30, 2017 compared to the three months ended June 30, 2016. Operating and maintenance expense increased primarily as a result of higher repairs and

maintenance expenses associated with increased throughput. SG&A expenses decreased primarily due to lower corporate allocations from the Company as a result of the Company's shift in focus during 2017 from midstream drop-down transactions to upstream asset and corporate acquisition projects. The increase in depreciation and amortization expense resulted from additional assets placed in-service including those associated with the Range Resources Header Pipeline project and the NWV Gathering expansion project.

Six Months Ended June 30, 2017 vs. Six Months Ended June 30, 2016

Gathering revenues increased by \$16.3 million for the six months ended June 30, 2017 compared to the six months ended June 30, 2016 driven by third party and affiliate production development in the Marcellus Shale. EQT Gathering increased firm reservation fee revenues primarily as a result of affiliates and third parties contracting for additional firm gathering capacity on various affiliate wellhead gathering expansion projects and the Range Resources Header Pipeline project. The decrease in usage fees under firm contracts was due to lower affiliate volumes in excess of firm contracted capacity. The decrease in usage fees under interruptible contracts was primarily due to the additional contracts for firm capacity.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Operating expenses increased by \$5.2 million for the six months ended June 30, 2017 compared to the six months ended June 30, 2016. Operating and maintenance expense increased primarily as a result of higher personnel costs. SG&A expenses decreased primarily due to lower corporate allocations from the Company as a result of the Company's shift in focus during 2017 from midstream drop-down transactions to upstream asset and corporate acquisition projects partly offset by increases in other miscellaneous administrative costs of \$1.3 million. The increase in depreciation and amortization expense resulted from additional assets placed in-service including those associated with the Range Resources Header Pipeline project and the NWV Gathering expansion project.

(a) Includes commodity charges and fees on all volumes transported under firm contracts as well as transmission fees on volumes in excess of firm contracted capacity.

(b) Includes volumes transported under interruptible contracts and volumes transported in excess of firm contracted capacity.

Three Months Ended June 30, 2017 vs. Three Months Ended June 30, 2016

Transmission and storage revenues increased by \$8.9 million for the three months ended June 30, 2017 compared to the three months ended June 30, 2016. Firm reservation fee revenues increased due to affiliates contracting for additional firm capacity on the Ohio Valley Connector (OVC). The firm capacity on the OVC resulted in lower affiliate usage fees under firm contracts.

Operating expenses increased by \$7.0 million for the three months ended June 30, 2017 compared to the three months ended June 30, 2016. The increases in operating and maintenance expense and depreciation and amortization expense were the result of the OVC project placed in-service in the fourth quarter of 2016. Operating and maintenance expense increased primarily due to property taxes on the OVC. SG&A expenses decreased primarily due to lower corporate allocations from the Company as a result of the Company's shift in focus during 2017 from midstream drop-down transactions to upstream asset and corporate acquisition projects.

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Six Months Ended June 30, 2017 vs. Six Months Ended June 30, 2016

Transmission and storage revenues increased by \$22.3 million for the six months ended June 30, 2017 compared to the six months ended June 30, 2016. Firm reservation fee revenues increased due to affiliates and third parties contracting for additional firm capacity, primarily on the OVC, as well as higher contractual rates on existing contracts in the current year. The firm capacity on the OVC resulted in lower affiliate usage fees under firm contracts.

Operating expenses increased by \$13.3 million for the six months ended June 30, 2017 compared to the six months ended June 30, 2016. Operating and maintenance expense increased primarily as a result of property taxes on the OVC and higher personnel costs. SG&A expenses decreased primarily due to lower corporate allocations from the Company as a result of the Company's shift in focus during 2017 from midstream drop-down transactions to upstream asset and corporate acquisition projects. Depreciation and amortization expense increased primarily as a result of the OVC project placed in-service in the fourth quarter of 2016.

Other Income Statement Items

Other Income

For the three months ended June 30, 2017 and 2016, the Company recorded equity in earnings of nonconsolidated investments of \$5.1 million and \$1.9 million, respectively, related to EQM's portion of the MVP Joint Venture's Allowance for Funds Used During Construction (AFUDC) on the MVP project. For the six months ended June 30, 2017 and 2016, the Company recorded equity in earnings of nonconsolidated investments of \$9.4 million and \$3.4 million, respectively, related to EQM's portion of the MVP Joint Venture's AFUDC on the MVP project.

For the three months ended June 30, 2017 and 2016, the Company recorded AFUDC of \$1.6 million and \$5.8 million, respectively, on regulated construction projects. For the six months ended June 30, 2017 and 2016, the Company recorded AFUDC of \$3.3 million and \$8.7 million, respectively, on regulated construction projects. These decreases were mainly attributable to completion of the OVC project in 2016.

For the six months ended June 30, 2017, other income was partly offset by losses on the sale of trading securities.

Interest Expense

Interest expense increased by \$7.8 million for the three months ended June 30, 2017 compared to the three months ended June 30, 2016 primarily driven by \$5.2 million of interest incurred on EQM's long-term debt issued in November 2016, lower interest income earned on short-term investments, higher amortization of debt issuance costs due to the amortization of the Bridge Facility costs and lower AFUDC - debt associated with decreased spending on EQM's regulated projects.

Interest expense increased by \$14.2 million for the six months ended June 30, 2017 compared to the six months ended June 30, 2016 primarily driven by \$10.3 million of interest incurred on EQM's long-term debt issued in November 2016, lower capitalized interest due to the timing of drilling completions and lower AFUDC - debt associated with decreased spending on EQM's regulated projects, and lower interest income earned on short-term investments.

Income Tax Expense

The Company recorded income tax expense for the three and six months ended June 30, 2017, compared to income tax benefit for the three and six months ended June 30, 2017. The increase in 2017 was attributable to the increase in EQT Production segment operating income for the three and six month periods ended June 30, 2017 compared to June 30, 2016. The Company's effective income tax rate differed from the U.S. Federal statutory rate of 35% for all periods primarily because the Company consolidates 100% of the pre-tax income related to the noncontrolling public limited partners' share of EQGP income, but is not required to record an income tax provision with respect to the portion of the income allocated to EQGP and EQM noncontrolling public limited partners.

Management's Discussion and Analysis of Financial Condition and Results of Operations

OUTLOOK

The Company is committed to profitably developing its natural gas and NGL reserves through environmentally responsible, cost-effective and technologically advanced horizontal drilling. The Company's revenues, earnings, liquidity and ability to grow are substantially dependent on the prices it receives for, and the Company's ability to develop, its reserves of natural gas and NGLs. Despite the continued low price environment for natural gas and NGLs, the Company believes the long-term outlook for its business is favorable due to the Company's substantial resource base, strategically located midstream assets, low cost structure, financial strength, risk management, including its commodity hedging strategy, and disciplined investment of capital. The Company believes the combination of these factors provide it with an opportunity to exploit and develop its positions and maximize efficiency through economies of scale in its strategic operating area.

On June 19, 2017, the Company entered into the Rice Merger Agreement with Rice, pursuant to which the Company will acquire Rice. The waiting period applicable to the Rice Merger under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 was terminated by the Federal Trade Commission on July 18, 2017. The Rice Merger is expected to close in the fourth quarter of 2017, subject to certain customary closing conditions, including the approval by the Company's shareholders of the issuance of shares of EQT Common Stock as Merger Consideration and the adoption of the Rice Merger Agreement by Rice stockholders. As part of this transaction, the Company will acquire the retained midstream assets that are currently held at Rice, which the Company intends to sell to EQM through one or more drop-down transactions. See Note N to the Company's Condensed Consolidated Financial Statements for further discussion of the Rice Merger and related transactions.

The Company continues to focus on creating and maximizing shareholder value by developing its Marcellus and Upper Devonian reserves and making midstream investments in projects that support EQT Production and third parties while maintaining a strong balance sheet. The Company monitors current and expected market conditions, including the commodity price environment, and its liquidity needs and may adjust its capital investment plan accordingly. While the tactics continue to evolve based on market conditions, the Company periodically considers arrangements to monetize the value of certain mature assets for re-deployment into the highest value development opportunities. Upon the closing of the Rice Merger, the Company's consolidation goals will largely be met and the Company plans to focus on integrating the Rice assets and realizing higher returns through longer laterals and achieving an even lower operating cost structure. The Company will, however, continue to pursue tactical acquisitions of fill-in acreage to extend laterals.

Total capital investment by EQT in 2017, excluding the Rice Merger and other acquisitions, is expected to be approximately \$2.0 billion (including EQM). Capital spending for well development (primarily drilling and completion) of approximately \$1.3 billion in 2017 is expected to support the drilling of approximately 178 gross wells, which includes 115 Marcellus wells, 62 Upper Devonian wells and one deep Utica well. The wells drilled in 2017 will have longer laterals, resulting in the same expected feet-of-pay as the number of wells the Company previously announced plans to drill. Assuming the closing of the Rice Merger, the Company is prioritizing its Marcellus drilling program as the stronger economics of the longer-lateral Marcellus wells will exceed the economics of the deep Utica drilling program. The 2017 sales volume guidance has been reduced by 10 - 15 Bcfe as a result of the suspension of the Company's deep Utica test program. Excluding any potential volumes from the Rice Merger, estimated 2017 sales volumes are 825 - 840 Bcfe, which reflects volume growth of approximately 74 Bcfe, the majority of which stems from the previous year's drilling program. The majority of the volume expected from the 2017 drilling program will be realized in 2018. Total NGLs volumes are expected to be 19,050 - 19,650 Mbbls in 2017. To support continued growth in production, the Company plans to invest approximately \$0.5 billion on midstream infrastructure through EQM. Excluding the Rice Merger, the 2017 capital investment plan for EQT

Production is expected to be funded by cash generated from operations and cash on hand. EQM's available sources of liquidity include cash generated from operations, borrowings under its credit facilities, cash on hand, debt offerings and issuances of additional EQM partnership interests.

The daily spot prices for NYMEX Henry Hub natural gas ranged from a high of \$3.42 per MMBtu to a low of \$2.44 per MMBtu from January 1, 2017 through June 30, 2017. In addition, the market price for natural gas in the Appalachian Basin was lower relative to NYMEX Henry Hub as a result of the significant increases in the supply of natural gas in the Northeast region in recent years. Due to the volatility of commodity prices, the Company is unable to predict future potential movements in the market prices for natural gas, including Appalachian basin, and NGLs and thus cannot predict the ultimate impact of prices on its operations.

See "Impairment of Oil and Gas Properties" and "Critical Accounting Policies and Estimates" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016 for a discussion of the Company's accounting policies and significant assumptions related to accounting for oil and gas producing activities, and the Company's policies and processes with respect to impairment reviews for proved and unproved property. As a result of its second quarter 2017 evaluations, the Company did not recognize an impairment charge for proved properties. However, a further decline in the average five-year forward realized prices

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

in a future period may cause the Company to recognize a significant impairment on the assets in the Huron play, which had a carrying value of approximately \$3 billion at June 30, 2017.

CAPITAL RESOURCES AND LIQUIDITY

Overview

During the six months ended June 30, 2017, the Company's cash on hand decreased by \$531.2 million primarily as a result of capital expenditures exceeding the net cash provided by operating activities and proceeds from sales of trading securities.

Operating Activities

Net cash flows provided by operating activities totaled \$809.0 million for the six months ended June 30, 2017 compared to \$493.4 million for the six months ended June 30, 2016. The \$315.6 million increase in cash flows provided by operating activities was primarily the result of higher operating income, the reasons for which are discussed in the section captioned "Corporate Overview" in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and the timing of working capital payments, partly offset by lower cash settlements on derivatives not designated as hedges.

The Company's cash flows from operating activities will be impacted by future movements in the market price for commodities. The Company is unable to predict these future price movements outside of the current market view as reflected in forward strip pricing. Refer to "Natural gas, NGLs and oil price volatility, or a prolonged period of low natural gas, NGLs and oil prices may have an adverse effect upon our revenue, profitability, future rate of growth, liquidity and financial position" under Item 1A, "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2016 for further information.

Investing Activities

Net cash flows used in investing activities totaled \$1,192.8 million for the six months ended June 30, 2017 compared to \$859.9 million for the six months ended June 30, 2016. The \$333.0 million increase was primarily due to the Company's acquisitions during the six months ended June 30, 2017, partly offset by cash received from the sale of trading securities. The Company spud 114 gross wells in the first half of 2017, including 71 horizontal Marcellus wells, 42 horizontal Upper Devonian wells and one horizontal Utica well. The Company spud 44 gross wells in the first half of 2016, including 42 horizontal Marcellus wells and two horizontal Utica wells. The increase in drilling and completions spending was offset by decreased spending on the following projects: the OVC, the Range Resources Header Pipeline project and the NWV Gathering expansion. The OVC project, part of the Range Resources Header Pipeline project and a prior expansion project in the NWV Gathering development area were placed into service in the fourth quarter of 2016.

Capital expenditures as reported on the Statement of Condensed Consolidated Cash Flows for the six months ended June 30, 2017 and 2016 excluded capitalized non-cash stock-based compensation expense and accruals. The impact of accrued capital expenditures includes the reversal of the prior period accrual as well as the current period estimate, both of which are non-cash items. The net impact of these non-cash items was \$58.4 million and \$(8.8) million for the six months ended June 30, 2017 and 2016, respectively. Capital expenditures for acquisitions as reported on the Statement of Condensed Consolidated Cash Flows for the six months ended June 30, 2017 also excluded non-cash capital expenditures of \$9.7 million related to the Company's acquisitions.

Financing Activities

Net cash flows used in financing activities totaled \$147.3 million for the six months ended June 30, 2017 compared to net cash flows provided by financing activities of \$1,022.2 million for the six months ended June 30, 2016. During the six months ended June 30, 2017, the primary financing uses of cash were distributions to noncontrolling interests and payment of taxes related to the vesting or exercise of equity awards. There was no cash provided by financing activities during the period. During the six months ended June 30, 2016, the primary sources of financing cash flows were net proceeds from public offerings of EQT common stock and EQM common units, and the primary financing uses of cash were net credit facility repayments under the EQM credit facility, distributions to noncontrolling interests and payment of taxes related to the vesting or exercise of equity awards.

The Company may from time to time seek to repurchase its outstanding debt securities. Such repurchases, if any, will depend on prevailing market conditions, the Company's liquidity requirements and contractual and legal restrictions and other factors.

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

Security Ratings and Financing Triggers

The table below reflects the credit ratings for debt instruments of the Company at June 30, 2017. Changes in credit ratings may affect the Company's cost of short-term debt through interest rates and fees under its lines of credit. These ratings may also affect collateral requirements on derivative instruments, pipeline capacity contracts, joint venture arrangements and subsidiary construction contracts, as well as the rates available on new long-term debt and access to the credit markets.

Rating Service	Senior Notes	Outlook
Moody's	Baa3	Stable
S&P	BBB	Negative
Fitch Ratings Service (Fitch)	BBB-	Stable

The table below reflects the credit ratings for debt instruments of EQM at June 30, 2017. Changes in credit ratings may affect EQM's cost of short-term debt through interest rates and fees under its lines of credit. These ratings may also affect collateral requirements under joint venture arrangements and subsidiary construction contracts, as well as the rates available on new long-term debt and access to the credit markets.

Rating Service	Senior Notes	Outlook
Moody's	Ba1	Stable
S&P	BBB-	Stable
Fitch	BBB-	Stable

The Company's and EQM's credit ratings are subject to revision or withdrawal at any time by the assigning rating organization, and each rating should be evaluated independently of any other rating. The Company and EQM cannot ensure that a rating will remain in effect for any given period of time or that a rating will not be lowered or withdrawn by a credit rating agency if, in its judgment, circumstances so warrant. If any credit rating agency downgrades the ratings, particularly below investment grade, the Company's or EQM's access to the capital markets may be limited, borrowing costs and margin deposits on the Company's derivative contracts would increase, counterparties may request additional assurances, including collateral, and the potential pool of investors and funding sources may decrease. Investment grade refers to the quality of a company's credit as assessed by one or more credit rating agencies. In order to be considered investment grade, a company must be rated BBB- or higher by S&P, Baa3 or higher by Moody's, and BBB- or higher by Fitch. Anything below these ratings is considered non-investment grade.

The Company has a \$1.5 billion unsecured credit facility that expires in February 2019. The Company had no amounts outstanding under the facility as of June 30, 2017. The Company's debt agreements and other financial obligations contain various provisions that, if not complied with, could result in termination of the agreements, require early payment of amounts outstanding or similar actions. The most significant covenants and events of default under the debt agreements relate to maintenance of a debt-to-total capitalization ratio, limitations on transactions with affiliates, insolvency events, nonpayment of scheduled principal or interest payments, acceleration of other financial obligations and change of control provisions. The Company's credit facility contains financial covenants that require a total debt-to-total capitalization ratio of no greater than 65%. The calculation of this ratio excludes the effects of accumulated other comprehensive income (OCI). As of June 30, 2017, the Company was in compliance with all debt provisions and covenants.

In July 2017, the Company entered into a commitment letter related to a proposed amendment and restatement of its unsecured credit facility (the EQT Revolver Amendment) which, among other matters, would extend the maturity date of the credit facility to five years from the closing of EQT Revolver Amendment and, contingent upon the closing of

the Rice Merger, increase the aggregate amount of the credit facility to \$2.5 billion. The Company expects to close the EQT Revolver Amendment during the third quarter of 2017.

On June 19, 2017, in connection with its entry into the Rice Merger Agreement, the Company entered into a commitment letter (the Commitment Letter) with Citigroup Global Markets Inc. (Citi), pursuant to which Citi and its affiliates committed to provide, subject to the terms and conditions set forth therein, up to \$1.4 billion of senior unsecured bridge loans (the Bridge Facility), the proceeds of which may be used to pay the cash portion of the Merger Consideration, to refinance certain existing indebtedness of the Company, Rice and their respective subsidiaries, and to pay fees and expenses in connection with the Rice Merger and related

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

transactions. On July 14, 2017, the Company entered into a joinder letter to the Commitment Letter, pursuant to which 16 additional banks assumed a portion of Citi's commitment under the Bridge Facility.

EQM has a \$750 million unsecured credit facility that expires in February 2019. EQM had no amounts outstanding under the facility as of June 30, 2017. EQM's debt agreements and other financial obligations contain various provisions that, if not complied with, could result in termination of the agreements, require early payment of amounts outstanding or similar actions. The covenants and events of default under the debt agreements relate to maintenance of permitted leverage ratio, limitations on transactions with affiliates, limitations on restricted payments, insolvency events, nonpayment of scheduled principal or interest payments, acceleration of and certain other defaults under other financial obligations and change of control provisions. Under EQM's \$750 million credit facility, EQM is required to maintain a consolidated leverage ratio of not more than 5.00 to 1.00 (or not more than 5.50 to 1.00 for certain measurement periods following the consummation of certain acquisitions). As of June 30, 2017, EQM was in compliance with all debt provisions and covenants.

In July 2017, EQM entered into a commitment letter related to a proposed amendment and restatement of its unsecured credit facility (the EQM Revolver Amendment) which, among other matters, would extend the maturity date of the credit facility to five years from the closing of EQM Revolver Amendment and increase the amount of the credit facility to \$1.0 billion. The Company expects EQM to close the EQM Revolver Amendment during the third quarter of 2017.

In October 2016, EQM entered into a \$500 million, 364-day, uncommitted revolving loan agreement with EQT (the 364-Day Facility) that matures on October 25, 2017 and will automatically renew for successive 364-day periods unless EQT delivers a non-renewal notice at least 60 days prior to the then current maturity date. Interest accrues on any outstanding borrowings at an interest rate equal to the rate then applicable to similar loans under EQM's \$750 million credit facility, or a successor revolving credit facility, less the sum of (i) the then applicable commitment fee under EQM's \$750 million credit facility and (ii) 10 basis points. During the three and six months ended June 30, 2017, the maximum amount of EQM's outstanding borrowings under the credit facility at any time was \$100 million, and the average daily balances were approximately \$55 million and \$40 million, respectively. EQM had \$40 million of borrowings outstanding under the 364-Day Facility as of June 30, 2017 and had no borrowings outstanding as of December 31, 2016.

EQM ATM Program

During 2015, EQM entered into an equity distribution agreement that established an "At the Market" (ATM) common unit offering program, pursuant to which a group of managers acting as EQM's sales agents may sell EQM common units having an aggregate offering price of up to \$750 million. EQM had approximately \$443 million in remaining capacity under the program as of July 27, 2017.

Commodity Risk Management

The substantial majority of the Company's commodity risk management program is related to hedging sales of the Company's produced natural gas. The Company's overall objective in this hedging program is to protect cash flow from undue exposure to the risk of changing commodity prices. The derivative commodity instruments currently utilized by the Company are primarily NYMEX swaps and collars.

As of July 25, 2017, the approximate volumes and prices of the Company's derivative commodity instruments hedging sales of produced gas for 2017 through 2019 were:

NYMEX Swaps	2017 (a)(b)(c)	2018	2019
		(b)(c)	
Total Volume (Bcf)	249	189	19
Average Price per Mcf (NYMEX) (d)	\$ 3.35	\$3.18	\$3.12
Collars			
Total Volume (Bcf)	12	18	—
Average Floor Price per Mcf (NYMEX) (d)	\$ 3.06	\$3.16	\$—
Average Cap Price per Mcf (NYMEX) (d)	\$ 3.93	\$3.63	\$—

(a) July through December 31.

(b) The Company also sold calendar year 2017 and 2018 calls/swaptions for approximately 16 Bcf and 33 Bcf, respectively, at strike prices of \$3.53 per Mcf and \$3.47 per Mcf, respectively.

(c) For 2017 and 2018, the Company also sold puts for approximately 2 Bcf and 3 Bcf, respectively, at a strike price of \$2.63 per Mcf.

(d) The average price is based on a conversion rate of 1.05 MMBtu/Mcf.

Table of Contents

EQT Corporation and Subsidiaries

Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company also enters into natural gas sales agreements that are satisfied by physical delivery. The difference between these sales prices and NYMEX are included in average differential on the Company's price reconciliation under "Consolidated Operational Data." The Company has fixed price physical sales for the remainder of 2017 and 2018 of 45 Bcf and 13 Bcf, respectively, at average NYMEX prices of \$3.29 per Mcf and \$3.24 per Mcf, respectively. For 2017 and 2018, the Company has a natural gas sales agreement for approximately 35 Bcf per year that includes a NYMEX ceiling price of \$4.88 per Mcf. For 2018 and 2019, the Company has a natural gas sales agreement for approximately 49 Bcf per year that includes a NYMEX ceiling price of \$3.36 per Mcf. For 2018 and 2019, the Company also has a natural gas sales agreement for approximately 7 Bcf per year that includes a NYMEX floor price of \$2.16 per Mcf and a NYMEX ceiling price of \$4.47 per Mcf. Currently, the Company has also entered into derivative instruments to hedge basis and a limited number of contracts to hedge its NGL exposure. The Company may also use other contractual agreements in implementing its commodity hedging strategy.

See Item 3, "Quantitative and Qualitative Disclosures About Market Risk," and Note G to the Company's Condensed Consolidated Financial Statements for further discussion of the Company's hedging program.

Commitments and Contingencies

In the ordinary course of business, various legal and regulatory claims and proceedings are pending or threatened against the Company. While the amounts claimed may be substantial, the Company is unable to predict with certainty the ultimate outcome of such claims and proceedings. The Company accrues legal and other direct costs related to loss contingencies when actually incurred. The Company has established reserves it believes to be appropriate for pending matters and, after consultation with counsel and giving appropriate consideration to available insurance, the Company believes that the ultimate outcome of any matter currently pending against the Company will not materially affect the Company's financial position, results of operations or liquidity.

Off-Balance Sheet Arrangements

See Note D to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q for further discussion of the MVP Joint Venture guarantee.

Dividend

On July 12, 2017, the Board of Directors of the Company declared a regular quarterly cash dividend of three cents per share, payable September 1, 2017, to the Company's shareholders of record at the close of business on August 11, 2017.

See Notes B and C to the Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q for discussion of EQGP's and EQM's distributions, respectively.

Critical Accounting Policies

The Company's significant accounting policies are described in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2016. Any new accounting policies or updates to existing accounting policies as a result of new accounting pronouncements have been included in the notes to the Company's Condensed Consolidated Financial Statements contained in this Quarterly Report on Form 10-Q. The application of the Company's critical accounting

policies may require management to make judgments and estimates about the amounts reflected in the Condensed Consolidated Financial Statements. Management uses historical experience and all available information to make these estimates and judgments. Different amounts could be reported using different assumptions and estimates.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Commodity Price Risk and Derivative Instruments

The Company's primary market risk exposure is the volatility of future prices for natural gas and NGLs. The market price for natural gas in the Appalachian Basin continues to be lower relative to NYMEX Henry Hub as a result of the significant increases in the supply of natural gas in the Northeast region in recent years. Due to the volatility of commodity prices, the Company is unable to predict future potential movements in the market prices for natural gas, including Appalachian basis, and NGLs and thus cannot predict the ultimate impact of prices on its operations. Prolonged low, and/or significant or extended declines in, natural gas and NGL prices could adversely affect, among other things, the Company's development plans, which would decrease the pace of development and the level of the Company's proved reserves. Such changes or similar impacts on third-party shippers on the Company's midstream assets could also impact the Company's revenues, earnings or liquidity and could result in material non-cash impairments to the recorded value of the Company's property, plant and equipment.

In addition to the ability to elect to slow capital spending in periods of prolonged low, and/or significant declines in, natural gas and NGL prices, the Company uses derivatives to reduce the effects of commodity price volatility. The Company's use of derivatives is further described in Note G to the Condensed Consolidated Financial Statements and under the caption "Commodity Risk Management" in the "Capital Resources and Liquidity" section of Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Quarterly Report on Form 10-Q. The Company uses derivative commodity instruments that are typically placed with financial institutions and the creditworthiness of these institutions is regularly monitored. The Company primarily enters into derivative instruments to hedge forecasted sales of production. The Company also enters into derivative instruments to hedge basis and exposure to fluctuations in interest rates. The Company's use of derivative instruments is implemented under a set of policies approved by the Company's Hedge and Financial Risk Committee and reviewed by the Audit Committee of the Company's Board of Directors.

For the derivative commodity instruments used to hedge the Company's forecasted sales of production, most of which are hedged at NYMEX natural gas prices, the Company sets policy limits relative to the expected production and sales levels which are exposed to price risk. The Company has an insignificant amount of financial natural gas derivative commodity instruments for trading purposes.

The derivative commodity instruments currently utilized by the Company are primarily fixed price swap agreements and collar agreements which may require payments to or receipt of payments from counterparties based on the differential between two prices for the commodity. The Company may also use other contractual agreements in implementing its commodity hedging strategy.

The Company monitors price and production levels on a continuous basis and makes adjustments to quantities hedged as warranted. The Company's overall objective in its hedging program is to protect a portion of cash flows from undue exposure to the risk of changing commodity prices.

With respect to the derivative commodity instruments held by the Company, the Company hedged portions of expected sales of equity production and portions of its basis exposure covering approximately 614 Bcf of natural gas and 735 Mbbls of NGLs as of June 30, 2017, and 646 Bcf of natural gas and 1,095 Mbbls of NGLs as of December 31, 2016. See the "Commodity Risk Management" section in the "Capital Resources and Liquidity" section of Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Quarterly Report on Form 10-Q for further discussion. A hypothetical decrease of 10% in the market price of natural gas from

the June 30, 2017 and December 31, 2016 levels would have increased the fair value of these natural gas derivative instruments by approximately \$143.4 million and \$179.0 million, respectively. A hypothetical increase of 10% in the market price of natural gas from the June 30, 2017 and December 31, 2016 levels would have decreased the fair value of these natural gas derivative instruments by approximately \$146.1 million and \$181.8 million, respectively. The Company determined the change in the fair value of the derivative commodity instruments using a method similar to its normal determination of fair value as described in Note H to the Condensed Consolidated Financial Statements. The Company assumed a 10% change in the price of natural gas from its levels at June 30, 2017 and December 31, 2016. The price change was then applied to these natural gas derivative commodity instruments, resulting in the hypothetical change in fair value.

The above analysis of the derivative commodity instruments held by the Company does not include the offsetting impact that the same hypothetical price movement may have on the Company's physical sales of natural gas. The portfolio of derivative commodity instruments held to hedge the Company's forecasted produced gas approximates a portion of the Company's expected physical sales of natural gas. Therefore, an adverse impact to the fair value of the portfolio of derivative commodity instruments held to hedge the Company's forecasted production associated with the hypothetical changes in commodity prices referenced above should be offset by a favorable impact on the Company's physical sales of natural gas, assuming the derivative commodity instruments

Table of Contents

are not closed out in advance of their expected term, and the derivative commodity instruments continue to function effectively as hedges of the underlying risk.

If the underlying physical transactions or positions are liquidated prior to the maturity of the derivative commodity instruments, a loss on the financial instruments may occur or the derivative commodity instruments might be worthless as determined by the prevailing market value on their termination or maturity date, whichever comes first.

Interest Rate Risk

Changes in interest rates affect the amount of interest the Company, EQGP and EQM earn on cash, cash equivalents and short-term investments and the interest rates the Company and EQM pay on borrowings under their respective revolving credit facilities. All of the Company's and EQM's long-term borrowings are fixed rate and thus do not expose the Company to fluctuations in its results of operations or liquidity from changes in market interest rates. Changes in interest rates do affect the fair value of the Company's and EQM's fixed rate debt. See Note J to the Condensed Consolidated Financial Statements for further discussion of the Company's and EQM's revolving credit facilities and Note H to the Condensed Consolidated Financial Statements for a discussion of fair value measurements, including the fair value of long-term debt.

Other Market Risks

The Company is exposed to credit loss in the event of nonperformance by counterparties to derivative contracts. This credit exposure is limited to derivative contracts with a positive fair value, which may change as market prices change. The Company's over-the-counter (OTC) derivative instruments are primarily with financial institutions and, thus, are subject to events that would impact those companies individually as well as that industry as a whole. The Company utilizes various processes and analyses to monitor and evaluate its credit risk exposures. These include closely monitoring current market conditions, counterparty credit fundamentals and credit default swap rates. Credit exposure is controlled through credit approvals and limits based on counterparty credit fundamentals. To manage the level of credit risk, the Company enters into transactions with financial counterparties that are of investment grade or better, enters into netting agreements whenever possible and may obtain collateral or other security.

Approximately 44%, or \$85.4 million, of the Company's OTC derivative contracts outstanding at June 30, 2017 had a positive fair value. Approximately 11%, or \$33.1 million, of the Company's OTC derivative contracts outstanding at December 31, 2016 had a positive fair value.

As of June 30, 2017, the Company was not in default under any derivative contracts and had no knowledge of default by any counterparty to its derivative contracts. The Company made no adjustments to the fair value of derivative contracts due to credit related concerns outside of the normal non-performance risk adjustment included in the Company's established fair value procedure. The Company monitors market conditions that may impact the fair value of derivative contracts reported in the Condensed Consolidated Balance Sheets.

The Company is also exposed to the risk of nonperformance by credit customers on physical sales or transportation of natural gas. A significant amount of revenues and related accounts receivable are generated from the sale of produced natural gas and NGLs to certain marketers, utility and industrial customers located mainly in the Appalachian Basin and the northeastern United States as well as the Permian Basin of Texas and a gas processor in Kentucky and West Virginia. The Company's current transportation portfolio also enables the Company to reach markets along the Gulf Coast and Midwestern portions of the United States. Similarly, revenues and related accounts receivable are generated from the gathering, transmission and storage of natural gas in the Appalachian Basin for independent producers, local

distribution companies and marketers.

The Company has a \$1.5 billion revolving credit facility that expires in February 2019. The credit facility is underwritten by a syndicate of financial institutions, each of which is obligated to fund its pro-rata portion of any borrowings by the Company. As of June 30, 2017, the Company had no borrowings or letters of credit outstanding under the facility. No one lender of the large group of financial institutions in the syndicate holds more than 10% of the facility. The Company's large syndicate group and relatively low percentage of participation by each lender is expected to limit the Company's exposure to problems or consolidation in the banking industry.

EQM has a \$750 million revolving credit facility that expires in February 2019. The credit facility is underwritten by a syndicate of financial institutions, each of which is obligated to fund its pro-rata portion of any borrowings by EQM. As of June 30, 2017, EQM had no borrowings or letters of credit outstanding under the credit facility. No one lender of the large group of financial institutions in the syndicate holds more than 10% of the facility. EQM's large syndicate group and relatively low percentage of participation by each lender is expected to limit EQM's exposure to problems or consolidation in the banking industry.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of management, including the Company's Principal Executive Officer and Principal Financial Officer, an evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)), was conducted as of the end of the period covered by this report. Based on that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

Changes in Internal Control over Financial Reporting

There were no changes in internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act) that occurred during the second quarter of 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the ordinary course of business, various legal and regulatory claims and proceedings are pending or threatened against the Company. While the amounts claimed may be substantial, the Company is unable to predict with certainty the ultimate outcome of such claims and proceedings. The Company accrues legal and other direct costs related to loss contingencies when actually incurred. The Company has established reserves it believes to be appropriate for pending matters and, after consultation with counsel and giving appropriate consideration to available insurance, the Company believes that the ultimate outcome of any matter currently pending against the Company will not materially affect the financial position, results of operations or liquidity of the Company.

Environmental Proceedings

Phoenix S Impoundment, Tioga County, Pennsylvania

In June and August 2012, the Company received three Notices of Violation (NOVs) from the Pennsylvania Department of Environmental Protection (the PADEP). The NOVs alleged violations of the Pennsylvania Oil and Gas Act and Clean Streams Law in connection with the unintentional release in May 2012, by a Company vendor, of water from an impaired water pit at a Company well location in Tioga County, Pennsylvania. Since confirming a release, the Company has cooperated with the PADEP in remediating the affected areas.

During the second quarter of 2014, the Company received a proposed consent assessment of civil penalty from the PADEP that proposed a civil penalty related to the NOVs. On September 19, 2014, the Company filed a declaratory judgment action in the Commonwealth Court of Pennsylvania against the PADEP seeking a court ruling on the PADEP's legal interpretation of the penalty provisions of the Clean Streams Law, which interpretation the Company believed was legally flawed and unsupported. On October 7, 2014, based on its interpretation of the penalty provisions, the PADEP filed a complaint against the Company before the Pennsylvania Environmental Hearing Board (the EHB) seeking \$4.53 million in civil penalties. In January 2017, the Commonwealth Court ruled in favor of the Company, finding the PADEP's interpretation of the penalty provisions of the Clean Streams Law erroneous, and the PADEP appealed that decision to the Pennsylvania Supreme Court. Following a July 2016 hearing before the EHB, the EHB, in May 2017, ruled that the Company should pay \$1.1 million in civil penalties. In June 2017, both the Company and the PADEP appealed the EHB's decision to the Commonwealth Court. While the Company expects the PADEP's claims to result in penalties that exceed \$100,000, the Company expects the resolution of this matter will not have a material impact on the financial position, results of operations or liquidity of the Company.

Trans Energy, Inc. Matter, West Virginia

As described in Note 9 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, the Company completed the acquisition of Trans Energy, Inc. (Trans Energy) on December 5, 2016. As a result, Trans Energy is now an indirect wholly owned subsidiary of the Company. Between 2009 and 2011, Trans Energy received several NOVs from the West Virginia Department of Environmental Protection (the WVDEP) as well as seven Compliance Orders from the U.S. Environmental Protection Agency (the EPA). The NOVs and Compliance Orders alleged various violations of the federal Clean Water Act related to the filling of streams and wetlands to create impoundments at several well pads in Marshall, Wetzel and Marion Counties, West Virginia.

On August 25, 2014, Trans Energy entered into a civil consent decree with the EPA (the Consent Decree) to settle the various violations of the Clean Water Act. The Consent Decree required the payment of a \$3 million civil penalty.

Trans Energy paid \$1.25 million of the penalty prior to the Company's acquisition of Trans Energy and the remaining \$1.75 million was paid by the Company in April 2017. The Consent Decree also requires, among other things, numerous restoration activities associated with impoundments, well pads and access roads in West Virginia at an estimated cost of \$10 - \$15 million.

On October 1, 2014, Trans Energy pleaded guilty to three misdemeanor charges filed by the United States Attorney for the Northern District of West Virginia related to the same violations of the Clean Water Act that were the subject of the Consent Decree. In connection with this plea agreement (the Plea Agreement), Trans Energy paid a \$600,000 fine and was placed on probation. The probation period terminated on April 24, 2017.

Table of Contents

Finally, on December 21, 2015, Trans Energy entered into an Administrative Agreement with the EPA's Office of Suspension and Debarment to resolve all matters relating to suspension, debarment and statutory disqualification arising from the Plea Agreement. The Administrative Agreement requires, among other things, Trans Energy to comply with the Plea Agreement and Consent Decree, prepare semiannual compliance reports, and retain an independent monitor to certify Trans Energy's compliance. As a result of the Company's acquisition of Trans Energy, the Company is currently working with the EPA's Office of Suspension and Debarment to agree to an amendment to, or possible termination of, the Administrative Agreement.

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, other than the risks described below relating to the proposed Rice Merger.

Our acquisition of Rice Energy Inc. (Rice) is subject to conditions, including certain conditions that may not be satisfied, or completed on a timely basis, if at all. Failure to complete the acquisition of Rice could have a material and adverse effect on us.

Completion of our acquisition of Rice is subject to a number of conditions set forth in our merger agreement with Rice, including the approval by our shareholders of the issuance of shares of our common stock as acquisition consideration and approval by Rice stockholders of the adoption of the merger agreement, which make the completion and timing of the completion of the transactions uncertain. Also, either EQT or Rice may terminate the merger agreement if the merger has not been consummated by February 19, 2018 (or, at either party's discretion, if the only conditions to closing that have not been satisfied or waived by that date are those related to the termination or expiration of any waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 or the issuance of an order, decree, ruling, injunction or other action that is in effect and is restraining, enjoining or otherwise prohibiting the consummation of the merger by May 19, 2018) except that this right to terminate the merger agreement will not be available to any party whose material breach of a representation, warranty, covenant or other agreement of such party under the merger agreement resulted in the failure of the transactions to be consummated on or before that date.

If the transactions contemplated by the merger agreement are not completed, our ongoing business may be adversely affected and, without realizing any of the benefits of having completed the transactions, we will be subject to a number of risks, including the following:

- we will be required to pay our costs relating to the transactions, such as legal, accounting, financial advisory and printing fees, whether or not the transactions are completed;

- time and resources committed by our management to matters relating to the transactions could otherwise have been devoted to pursuing other beneficial opportunities;

- the market price of our common stock could decline to the extent that the current market price reflects a market assumption that the transactions will be completed; and

if the merger agreement is terminated and our board of directors seeks another acquisition, our shareholders cannot be certain that we will be able to find a party willing to enter into a transaction as attractive to EQT as the acquisition of Rice.

If the acquisition of Rice is completed, we may not achieve the intended benefits and the acquisition may disrupt our current plans or operations.

There can be no assurance that we will be able to successfully integrate Rice's assets or otherwise realize the expected benefits of the acquisition. We also may not be able to finance the acquisition on attractive terms, which could result in increased costs, dilution to our shareholders, and/or have an adverse effect on our financial condition, results of operations or cash flows. In addition, our business may be negatively impacted following the acquisition if we are unable to effectively manage our expanded operations. The integration will require significant time and focus from management following the acquisition. Additionally, consummating the acquisition could disrupt current plans and operations, which could delay the achievement of our strategic objectives.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth the Company's repurchases of equity securities registered under Section 12 of the Exchange Act that have occurred during the three months ended June 30, 2017:

Period	Total number of shares purchased (a)	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may be purchased under the plans or programs (b)
April 2017 (April 1 – April 30)	—	\$ —	—	700,000
May 2017 (May 1 – May 31)	5,520	56.69	—	700,000
June 2017 (June 1 – June 30)	—	—	—	700,000
Total	5,520	\$ 56.69	—	

(a) Reflects shares withheld by the Company to pay taxes upon vesting of restricted stock.

(b) During 2014, the Company's Board of Directors approved a share repurchase authorization of up to 1,000,000 shares of the Company's outstanding common stock. The Company may repurchase shares from time to time in open market or in privately negotiated transactions. The share repurchase authorization does not obligate the Company to acquire any specific number of shares, has no pre-established end date and may be discontinued by the Company at any time. As of June 30, 2017, the Company had repurchased 300,000 shares under this authorization since its inception.
