UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934
For the quarterly period ended March 31, 2015

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934
For the transition period from _____ to _____

Commission File Number	Name of Registrant, State of Incorporation, Address of Principal Executive Offices and Telephone Number	IRS Employer Identification Number
1-9894	ALLIANT ENERGY CORPORATION (a Wisconsin corporation) 4902 N. Biltmore Lane Madison, Wisconsin 53718 Telephone (608) 458-3311	39-1380265
1-4117	INTERSTATE POWER AND LIGHT COMPANY (an Iowa corporation) Alliant Energy Tower Cedar Rapids, Iowa 52401 Telephone (319) 786-4411	42-0331370
0-337	WISCONSIN POWER AND LIGHT COMPANY (a Wisconsin corporation) 4902 N. Biltmore Lane Madison, Wisconsin 53718 Telephone (608) 458-3311	39-0714890

This combined Form 10-Q is separately filed by Alliant Energy Corporation, Interstate Power and Light Company and Wisconsin Power and Light Company. Information contained in the Form 10-Q relating to Interstate Power and Light Company and Wisconsin Power and Light Company is filed by each such registrant on its own behalf. Each of Interstate Power and Light Company and Wisconsin Power and Light Company makes no representation as to information relating to registrants other than itself.

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports), and (2) have been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: ALLIANT ENERGY CORP - Form 10-Q

Indicate by check mark whether the registrants have submitted electronically and posted on their corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrants were required to submit and post such files). Yes No

Indicate by check mark whether the registrants are large accelerated filers, accelerated filers, non-accelerated filers, or smaller reporting companies. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

	Large Accelerated Filer	Accelerated Filer	Non-accelerated Filer	Smaller Reporting Company Filer
Alliant Energy Corporation	x			
Interstate Power and Light Company			x	
Wisconsin Power and Light Company			x	

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Exchange Act). Yes No

Number of shares outstanding of each class of common stock as of March 31, 2015:

Alliant Energy Corporation	Common stock, \$0.01 par value, 112,977,238 shares outstanding
Interstate Power and Light Company	Common stock, \$2.50 par value, 13,370,788 shares outstanding (all of which are owned beneficially and of record by Alliant Energy Corporation)
Wisconsin Power and Light Company	Common stock, \$5 par value, 13,236,601 shares outstanding (all of which are owned beneficially and of record by Alliant Energy Corporation)

DEFINITIONS

The following abbreviations or acronyms used in this Form 10-Q are defined below:

Abbreviation or Acronym	Definition
2014 Form 10-K	Combined Annual Report on Form 10-K filed by Alliant Energy, IPL and WPL for the year ended Dec. 31, 2014
AFUDC	Allowance for funds used during construction
Alliant Energy	Alliant Energy Corporation
AROs	Asset retirement obligations
ATC	American Transmission Company LLC
CAA	Clean Air Act
CCR	Coal Combustion Residuals
CEO	Chief Executive Officer
CFO	Chief Financial Officer
Columbia	Columbia Energy Center
Corporate Services	Alliant Energy Corporate Services, Inc.
CRANDIC	Cedar Rapids and Iowa City Railway Company
DAEC	Duane Arnold Energy Center
Dth	Dekatherm
Edgewater	Edgewater Generating Station
EGU	Electric generating unit
EPA	U.S. Environmental Protection Agency
EPS	Earnings per weighted average common share
FERC	Federal Energy Regulatory Commission
Financial Statements	Condensed Consolidated Financial Statements
FTR	Financial transmission right
Fuel-related	Electric production fuel and energy purchases
GAAP	U.S. generally accepted accounting principles
HDD	Heating degree days
IPL	Interstate Power and Light Company
ITC	ITC Midwest LLC
IUB	Iowa Utilities Board
Marshalltown	Marshalltown Generating Station
MATS	Mercury and Air Toxic Standard
MDA	Management's Discussion and Analysis of Financial Condition and Results of Operations
MGP	Manufactured gas plant
MISO	Midcontinent Independent System Operator, Inc.
MPUC	Minnesota Public Utilities Commission
MW	Megawatt
MWh	Megawatt-hour
N/A	Not applicable
Nelson Dewey	Nelson Dewey Generating Station
Note(s)	Combined Notes to Condensed Consolidated Financial Statements
NOx	Nitrogen oxide
OPEB	Other postretirement benefits
PJM	PJM Interconnection, LLC
PPA	Purchased power agreement
PSCW	Public Service Commission of Wisconsin

PSD	Prevention of Significant Deterioration
Receivables Agreement	Receivables Purchase and Sale Agreement
Resources	Alliant Energy Resources, LLC
Riverside	Riverside Energy Center
RMT	RMT, Inc.
SO2	Sulfur dioxide
SSR	System Support Resource
U.S.	United States of America
Whiting Petroleum	Whiting Petroleum Corporation
WPL	Wisconsin Power and Light Company

FORWARD-LOOKING STATEMENTS

Statements contained in this report that are not of historical fact are forward-looking statements intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified as such because the statements include words such as “may,” “believe,” “expect,” “anticipate,” “plan,” “project,” “will,” “projections,” “estimate,” or other words of similar import. Similarly, statements that describe future financial performance or plans or strategies are forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed in, or implied by, such statements. Some, but not all, of the risks and uncertainties of Alliant Energy, IPL and WPL that could materially affect actual results include:

- federal and state regulatory or governmental actions, including the impact of energy, tax, financial and health care legislation, and of regulatory agency orders;
- IPL’s and WPL’s ability to obtain adequate and timely rate relief to allow for, among other things, the recovery of fuel costs, operating costs, transmission costs, deferred expenditures, capital expenditures, and remaining costs related to EGUs that may be permanently closed, earning their authorized rates of return, and the payments to their parent of expected levels of dividends;
- the ability to continue cost controls and operational efficiencies;
- the impact of IPL’s retail electric base rate freeze in Iowa during 2015 and 2016;
- the impact of WPL’s retail electric and gas base rate freeze in Wisconsin during 2015 and 2016;
- weather effects on results of utility operations, including impacts of temperature changes in IPL’s and WPL’s service territories on customers’ demand for electricity and gas;
- the impact of the economy in IPL’s and WPL’s service territories and the resulting impacts on sales volumes, margins and the ability to collect unpaid bills;
- the impact of customer- and third party-owned generation, including alternative electric suppliers, in IPL’s and WPL’s service territories on system reliability, operating expenses and customers’ demand for electricity;
- the impact of energy efficiency, franchise retention, customer- and third party-owned generation and customer disconnects on sales volumes and margins;
- developments that adversely impact the ability to implement the strategic plan, including unanticipated issues with new emission controls equipment for various coal-fired EGUs of IPL and WPL, IPL’s construction of Marshalltown, WPL’s proposed Riverside expansion, various replacements and expansion of IPL’s and WPL’s natural gas distribution systems, Resources’ electricity output and selling price of such output from its Franklin County wind project, the potential decommissioning of certain EGUs of IPL and WPL, and the anticipated sale of IPL’s electric distribution assets in Minnesota;
- issues related to the availability and operations of EGUs, including start-up risks, breakdown or failure of equipment, performance below expected or contracted levels of output or efficiency, operator error, transmission constraints, compliance with mandatory reliability standards and risks related to recovery of resulting incremental costs through rates;
- disruptions in the supply and delivery of coal, natural gas and purchased electricity;
- changes in the price of delivered coal, natural gas and purchased electricity due to shifts in supply and demand caused by market conditions and regulations, and the ability to recover and to retain the recovery of related changes in purchased power, fuel and fuel-related costs through rates in a timely manner;
- the impact that price changes may have on IPL’s and WPL’s customers’ demand for electric, gas and steam services and their ability to pay their bills;
- issues associated with environmental remediation and environmental compliance, including compliance with the Consent Decree between WPL, the Sierra Club and the EPA, future changes in environmental laws and regulations, including the EPA’s proposed regulations for carbon dioxide emissions reductions from new and existing fossil-fueled EGUs and the final CCR Rule, and litigation associated with environmental requirements;
-

the ability to defend against environmental claims brought by state and federal agencies, such as the EPA, state natural resources agencies or third parties, such as the Sierra Club, and the impact on operating expenses of defending and resolving such claims;

the ability to recover through rates all environmental compliance and remediation costs, including costs for projects put on hold due to uncertainty of future environmental laws and regulations;

2

Table of Contents

impacts that storms or natural disasters in IPL's and WPL's service territories may have on their operations and recovery of, and rate relief for, costs associated with restoration activities;

the direct or indirect effects resulting from terrorist incidents, including physical attacks and cyber attacks, or responses to such incidents;

the impact of penalties or third-party claims related to, or in connection with, a failure to maintain the security of personally identifiable information, including associated costs to notify affected persons and to mitigate their information security concerns;

the direct or indirect effects resulting from breakdown or failure of equipment in the operation of natural gas distribution systems, such as leaks, explosions and mechanical problems, and compliance with natural gas distribution safety regulations, such as those that may be issued by the Pipeline and Hazardous Materials Safety Administration;

risks associated with the deployment and integration of a new customer billing and information system expected in 2015;

impacts of IPL's future tax benefits from Iowa rate-making practices, including deductions for repairs expenditures and allocation of mixed service costs, and recoverability of the associated regulatory assets from customers, when the differences reverse in future periods;

any material post-closing adjustments related to any past asset divestitures, including the sales of IPL's Minnesota natural gas distribution assets and RMT, which could result from, among other things, warranties, parental guarantees or litigation;

continued access to the capital markets on competitive terms and rates, and the actions of credit rating agencies;

- inflation and interest rates;

changes to the creditworthiness of counterparties with which Alliant Energy, IPL and WPL have contractual arrangements, including participants in the energy markets and fuel suppliers and transporters;

issues related to electric transmission, including operating in Regional Transmission Organization energy and ancillary services markets, the impacts of potential future billing adjustments and cost allocation changes from Regional Transmission Organizations and recovery of costs incurred;

impacts on equity income from unconsolidated investments due to changes made by FERC to ATC's authorized return on equity;

current or future litigation, regulatory investigations, proceedings or inquiries;

Alliant Energy's ability to sustain its dividend payout ratio goal;

employee workforce factors, including changes in key executives, collective bargaining agreements and negotiations, work stoppages or restructurings;

access to technological developments;

adverse developments in the food manufacturing industry, including animal flu and other illnesses;

changes in technology that alter the channels through which electric customers buy or utilize power;

material changes in retirement and benefit plan costs;

the impact of performance-based compensation plans accruals;

the effect of accounting pronouncements issued periodically by standard-setting bodies, including a new revenue recognition standard, which is currently expected to be adopted in 2018;

the impact of changes to production tax credits for wind projects;

the impact of adjustments made to deferred tax assets and liabilities from state apportionment assumptions;

the ability to utilize tax credits and net operating losses generated to date, and those that may be generated in the future, before they expire;

the ability to successfully complete tax audits and changes in tax accounting methods, including changes required by new tangible property regulations with no material impact on earnings and cash flows; and

factors listed in MDA and Risk Factors in Item 1A in the 2014 Form 10-K.

Alliant Energy, IPL and WPL each assume no obligation, and disclaim any duty, to update the forward-looking statements in this report, except as required by law.

COMBINED NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) General - The interim unaudited Financial Statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and note disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted, although management believes that the disclosures are adequate to make the information presented not misleading. These Financial Statements should be read in conjunction with the financial statements and the notes thereto included in the latest combined Annual Report on Form 10-K.

In the opinion of management, all adjustments, which unless otherwise noted are normal and recurring in nature, necessary for a fair presentation of the results of operations, financial position and cash flows have been made. Results for the three months ended March 31, 2015 are not necessarily indicative of results that may be expected for the year ending December 31, 2015. A change in management's estimates or assumptions could have a material impact on financial condition and results of operations during the period in which such change occurred. Certain prior period amounts in the Financial Statements and Notes have been reclassified to conform to the current period presentation for comparative purposes. Unless otherwise noted, the Notes herein exclude assets and liabilities held for sale for all periods presented.

(b) New Accounting Pronouncements -

Revenue Recognition - In May 2014, the Financial Accounting Standards Board issued an accounting standard providing principles for recognizing revenue for the transfer of promised goods or services to customers with the consideration to which the entity expects to be entitled in exchange for those goods or services. This standard also requires disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. Alliant Energy, IPL and WPL are currently required to adopt this standard on January 1, 2017; however, in April 2015, the Financial Accounting Standards Board proposed to defer the effective date of this standard by one year. Alliant Energy, IPL and WPL are currently evaluating the impact of this standard on their financial condition and results of operations.

Presentation of Debt Issuance Costs - In April 2015, the Financial Accounting Standards Board issued an accounting standard to simplify the presentation of debt issuance costs on the balance sheet. Under the new standard, debt issuance costs related to a recognized debt liability will be presented on the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Alliant Energy, IPL and WPL are required to adopt this standard on January 1, 2016 and early adoption is permitted. Debt issuance costs represent less than 1% of total long-term debt.

(2) REGULATORY MATTERS

Regulatory Assets and Regulatory Liabilities -

Regulatory assets were comprised of the following items (in millions):

	Alliant Energy		IPL		WPL	
	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014
Tax-related	\$968.2	\$955.3	\$940.5	\$928.0	\$27.7	\$27.3

Emission allowances	26.9	27.4	26.9	27.4	—	—
Other	75.0	79.1	42.0	44.8	33.0	34.3
	\$1,790.3	\$1,783.7	\$1,363.7	\$1,357.9	\$426.6	\$425.8

Table of Contents

Regulatory liabilities were comprised of the following items (in millions):

	Alliant Energy		IPL		WPL	
	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014
Cost of removal obligations	\$423.2	\$421.7	\$279.5	\$279.1	\$143.7	\$142.6
IPL's tax benefit riders	222.0	243.0	222.0	243.0	—	—
Energy efficiency cost recovery	62.2	64.3	1.6	—	60.6	64.3
Commodity cost recovery	26.5	15.4	22.8	15.1	3.7	0.3
IPL's electric transmission cost recovery	23.2	19.4	23.2	19.4	—	—
Other	59.0	57.4	23.0	26.9	36.0	30.5
	\$816.1	\$821.2	\$572.1	\$583.5	\$244.0	\$237.7

Tax-related - Alliant Energy's and IPL's tax-related regulatory assets are generally impacted by certain property-related differences at IPL for which deferred tax is not recorded in the income statement pursuant to Iowa rate-making principles. Deferred tax amounts for such property-related differences at IPL are recorded to regulatory assets, along with the necessary revenue requirement tax gross-ups. During the three months ended March 31, 2015, Alliant Energy's and IPL's tax-related regulatory assets increased primarily due to property-related differences for qualifying repair expenditures.

Derivatives - Refer to Note 12 for discussion of derivative assets and derivative liabilities.

IPL's tax benefit riders - IPL's tax benefit riders utilize regulatory liabilities to credit bills of IPL's Iowa retail electric and gas customers to help offset the impact of rate increases on such customers. These regulatory liabilities are related to tax benefits from tax accounting method changes for repairs expenditures, allocation of mixed service costs, allocation of insurance proceeds from floods in 2008, and cost of removal expenditures. For the three months ended March 31, 2015, Alliant Energy's and IPL's "IPL's tax benefit riders" regulatory liabilities decreased by \$21 million as follows (in millions):

Electric tax benefit rider credits	\$18
Gas tax benefit rider credits	3
	\$21

Refer to Note 8 for additional details regarding IPL's tax benefit riders.

Utility Rate Cases -

IPL's Iowa Retail Electric Rate Settlement Agreement - The IUB approved a settlement agreement in 2014 related to rates charged to IPL's Iowa retail electric customers. The settlement agreement extends IPL's Iowa retail electric base rates authorized in its 2009 test year rate case through 2016 and provides targeted retail electric customer billing credits beginning May 2014. For the three months ended March 31, IPL recorded billing credits to reduce retail electric customers' bills as follows (in millions):

	2015
Billing credits to reduce retail electric customers' bills	\$6

WPL's Retail Fuel-related Rate Filing (2014 Test Year) - Pursuant to a 2013 PSCW order, WPL's 2014 fuel-related costs were subject to deferral since they were outside an annual bandwidth of plus or minus 2% of the approved annual forecasted fuel-related costs. Retail fuel-related costs incurred by WPL through December 31, 2014 were higher than fuel-related costs used to determine rates for such period resulting in an under-collection of fuel-related

costs for 2014 of \$33 million (including \$28 million outside the approved range for 2014). The \$28 million of deferred fuel-related costs is included in “Commodity cost recovery” in Alliant Energy’s and WPL’s regulatory assets table above. Beginning in 2015, the regulatory asset accrues interest at WPL’s PSCW authorized short-term debt rate. In March 2015, WPL filed a fuel reconciliation application with the PSCW to seek recovery in 2016 of the deferred fuel-related costs, including interest. WPL anticipates a decision from the PSCW regarding its application in the third quarter of 2015.

Table of Contents**(3) PROPERTY, PLANT AND EQUIPMENT**

Utility -

Emission Controls Project -

WPL's Edgewater Unit 5 - WPL is currently constructing a scrubber and baghouse at Edgewater Unit 5 to reduce SO₂ and mercury emissions at the EGU. Construction began in 2014 and is expected to be completed in 2016. As of March 31, 2015, Alliant Energy and WPL recorded capitalized expenditures for construction work in progress of \$110 million and AFUDC of \$4 million for the scrubber and baghouse in "Property, plant and equipment, net" on their balance sheets.

Natural Gas-Fired Generation Project -

IPL's Marshalltown Generating Station - IPL is currently constructing Marshalltown, an approximate 650 MW natural gas-fired combined-cycle EGU. Construction began in 2014 and is expected to be completed in 2017. As of March 31, 2015, Alliant Energy and IPL recorded capitalized expenditures of \$248 million and AFUDC of \$7 million for Marshalltown in "Property, plant and equipment, net" on their balance sheets.

Sales of IPL's Minnesota Electric and Natural Gas Distribution Assets - In April 2015, IPL completed the sale of its Minnesota natural gas distribution assets and received net proceeds of \$11 million and a promissory note of \$2 million. The proceeds are subject to post-closing adjustments based on the value of the net assets transferred as of the closing date, and will be used for general corporate purposes. Refer to Note 16 for details of the natural gas distribution assets, which qualified as held for sale as of March 31, 2015 and December 31, 2014.

In April 2015, the MPUC approved the sale of IPL's Minnesota electric distribution assets, subject to certain conditions. IPL is currently reviewing the MPUC's decision. Pending the receipt of remaining regulatory approvals, IPL currently expects the electric transaction to be concluded in the third quarter of 2015. As of March 31, 2015, IPL's assets and liabilities included in the electric sales agreement did not meet the criteria to be classified as held for sale due to uncertainties in the regulatory approval process that existed on such date.

Non-regulated and Other -

Corporate Services and Other - Corporate Services is implementing a new customer billing and information system for IPL and WPL, which is currently expected to be deployed in 2015. As of March 31, 2015, Alliant Energy recorded capitalized expenditures of \$71 million and capitalized interest of \$2 million for the system in "Property, plant and equipment, net" on its balance sheet.

(4) RECEIVABLES

(a) Sales of Accounts Receivable - IPL maintains a Receivables Agreement whereby it may sell its Iowa customer accounts receivables, unbilled revenues and certain other accounts receivables to a third party through wholly-owned and consolidated special purpose entities. The transfers of receivables meet the criteria for sale accounting established by the transfer of financial assets accounting rules. As of March 31, 2015, IPL sold \$197.5 million of receivables to the third party, received \$74.0 million in cash proceeds and recorded deferred proceeds of \$117.7 million.

IPL's maximum and average outstanding cash proceeds related to the sales of accounts receivable program for the three months ended March 31 were as follows (in millions):

	2015	2014
Maximum outstanding aggregate cash proceeds (based on daily outstanding balances)	\$118.0	\$75.0
Average outstanding aggregate cash proceeds (based on daily outstanding balances)	68.0	27.6

For the three months ended March 31, 2015 and 2014, IPL's costs incurred related to the sales of accounts receivable program were not material.

Table of Contents

The attributes of IPL's receivables sold under the Receivables Agreement were as follows (in millions):

	March 31, 2015	December 31, 2014
Customer accounts receivable	\$144.8	\$134.8
Unbilled utility revenues	52.5	69.7
Other receivables	0.2	0.1
Receivables sold to third party	197.5	204.6
Less: cash proceeds (a)	74.0	22.0
Deferred proceeds	123.5	182.6
Less: allowance for doubtful accounts	5.8	5.4
Fair value of deferred proceeds	\$117.7	\$177.2
Outstanding receivables past due	\$21.7	\$19.9

(a) Changes in cash proceeds are presented in "Sales of accounts receivable" in operating activities in Alliant Energy's and IPL's cash flows statements.

Additional attributes of IPL's receivables sold under the Receivables Agreement for the three months ended March 31 were as follows (in millions):

	2015	2014
Collections reinvested in receivables	\$505.9	\$541.4
Credit losses, net of recoveries	1.0	2.5

(b) Whiting Petroleum Tax Sharing Agreement - Prior to an initial public offering of Whiting Petroleum in 2003, Alliant Energy and Whiting Petroleum entered into a tax separation and indemnification agreement pursuant to which Alliant Energy and Whiting Petroleum made certain tax elections. These tax elections had the effect of increasing the tax basis of the assets of Whiting Petroleum's consolidated tax group based on the sales price of Whiting Petroleum's shares in the initial public offering. The increase in the tax basis of the assets was included in income in Alliant Energy's U.S. federal income tax return for the calendar year 2003. Pursuant to the tax separation and indemnification agreement, Whiting Petroleum paid Resources the final payment of \$26 million in March 2014, which represented the present value of certain future tax benefits expected to be realized by Whiting Petroleum through future tax deductions. The \$26 million received by Alliant Energy is presented in operating activities in its cash flows statement for the three months ended March 31, 2014.

(5) INVESTMENTS

Unconsolidated Equity Investments - Equity (income) loss from unconsolidated investments accounted for under the equity method of accounting for the three months ended March 31 was as follows (in millions):

	Alliant Energy		WPL	
	2015	2014	2015	2014
ATC	(\$7.8) (\$11.2) (\$7.8) (\$11.2
Other	1.3	(0.2) —	(0.2
	(\$6.5) (\$11.4) (\$7.8) (\$11.4

(6) COMMON EQUITY

Common Share Activity - A summary of Alliant Energy's common stock activity was as follows:

Shares outstanding, January 1, 2015	110,935,680
At-the-market offering program	1,996,450
Shareowner Direct Plan	11,193
Equity-based compensation plans (<u>Note 9(b)</u>)	56,378
Other	(22,463

Shares outstanding, March 31, 2015

112,977,238

Table of Contents

At-the-Market Offering Program - In March 2015, Alliant Energy filed a prospectus supplement under which it may sell up to \$150 million of its common stock through an at-the-market offering program. As of March 31, 2015, Alliant Energy issued 1,996,450 shares of common stock through this program and received cash proceeds of \$121 million, net of \$2 million in fees and commissions. Alliant Energy also had commitments not recognized on its balance sheet at March 31, 2015 to sell 190,167 shares of common stock under sales transactions executed through this program in late March 2015. Subsequent to March 31, 2015, Alliant Energy issued shares to settle these transactions in exchange for net cash proceeds of \$12 million. The proceeds from the issuances of common stock were used for general corporate purposes. Alliant Energy currently has no plans to issue any additional common stock through the at-the-market offering program.

Dividend Restrictions - As of March 31, 2015, IPL's amount of retained earnings that were free of dividend restrictions was \$518 million. As of March 31, 2015, WPL's amount of retained earnings that were free of dividend restrictions was \$95 million for the remainder of 2015.

Restricted Net Assets of Subsidiaries - As of March 31, 2015, the amount of net assets of IPL and WPL that were not available to be transferred to their parent company, Alliant Energy, in the form of loans, advances or cash dividends without the consent of IPL's and WPL's regulatory authorities was \$1.3 billion and \$1.6 billion, respectively.

Capital Transactions with Subsidiaries - For the three months ended March 31, 2015, IPL and WPL each paid common stock dividends of \$35.0 million and \$31.8 million, respectively, to its parent company.

Comprehensive Income - For the three months ended March 31, 2015 and 2014, Alliant Energy had no other comprehensive income; therefore, its comprehensive income was equal to its net income and its comprehensive income attributable to Alliant Energy common shareowners was equal to its net income attributable to Alliant Energy common shareowners for such periods. For the three months ended March 31, 2015 and 2014, IPL and WPL had no other comprehensive income; therefore, their comprehensive income was equal to their net income and their comprehensive income available for common stock was equal to their earnings available for common stock for such periods.

(7) DEBT

Short-term Debt - Information regarding commercial paper classified as short-term debt and back-stopped by the credit facilities was as follows (dollars in millions):

March 31, 2015	Alliant Energy (Consolidated)		Parent Company	IPL	WPL	
Commercial paper:						
Amount outstanding	\$41.5	\$41.5	\$—	\$—	\$—	\$—
Weighted average remaining maturity	1 day	1 day	N/A	N/A	N/A	N/A
Weighted average interest rates	0.5%	0.5%	N/A	N/A	N/A	N/A
Available credit facility capacity	\$958.5	\$258.5	\$300.0	\$400.0		
	Alliant Energy		IPL	WPL

Weighted average interest rates	0.4	% 0.1	% 0.4	% 0.2	% N/A	0.1 %

Table of Contents

(8) INCOME TAXES

Income Tax Rates - The provision for income taxes is based on an estimated annual effective income tax rate that excludes the impact of significant unusual or infrequently occurring items or extraordinary items. The overall income tax rates shown in the following table were computed by dividing income tax expense (benefit) by income before income taxes.

	Alliant Energy		IPL		WPL	
	2015	2014	2015	2014	2015	2014
Three Months Ended March 31						
Statutory federal income tax rate	35.0	% 35.0	% 35.0	% 35.0	% 35.0	% 35.0
IPL's tax benefit riders	(9.9)	(11.9)	(25.2)	(31.2)	—	—
Production tax credits	(6.2)	(6.7)	(7.3)	(8.3)	(6.0)	(6.4)
Effect of rate-making on property-related differences	(6.1)	(5.3)	(14.6)	(12.4)	(0.6)	(1.0)
Other items, net	4.3	4.6	4.4	4.7	4.6	4.8
Overall income tax rate	17.1	% 15.7	% (7.7 %)	(12.2 %)	33.0	% 32.4 %

IPL's tax benefit riders - Alliant Energy's and IPL's effective income tax rates include the impact of reducing income tax expense with offsetting reductions to regulatory liabilities as a result of implementing IPL's tax benefit riders. Refer to Note 2 for additional details of the tax benefit riders.

Production tax credits - For the three months ended March 31, details regarding production tax credits (net of state tax impacts) related to various wind projects are as follows (dollars in millions):

	End of Production Tax Credit Generation	Nameplate Capacity in MW	2015	2014
Cedar Ridge (WPL)	December 2018	68	\$1.2	\$1.2
Bent Tree - Phase I (WPL)	February 2021	201	3.9	4.2
Subtotal (WPL)			5.1	5.4
Whispering Willow - East (IPL)	December 2019	200	4.3	4.6
			\$9.4	\$10.0

Effect of rate-making on property-related differences - Alliant Energy's and IPL's effective income tax rates are impacted by the effect of rate-making principles on certain property-related differences for which deferred tax is not recognized in the income statement, substantially all of which relates to IPL. The increased benefits from property-related differences recognized during the three months ended March 31, 2015 were primarily due to additional repairs deductions.

Deferred Tax Assets and Liabilities - For the three months ended March 31, 2015, Alliant Energy's, IPL's and WPL's non-current deferred tax liabilities increased \$45.8 million, \$29.0 million and \$14.4 million, respectively. These increases in non-current deferred tax liabilities were primarily due to property-related differences recorded during the three months ended March 31, 2015, including an increase in qualifying repairs expenditures, and utilization of federal net operating loss carryforwards.

Carryforwards - At March 31, 2015, tax carryforwards and associated deferred tax assets and expiration dates were estimated as follows (dollars in millions):

	Tax Carryforwards	Deferred Tax Assets	Earliest Expiration Date
Alliant Energy			
Federal net operating losses	\$894	\$306	2029

(9) BENEFIT PLANS

(a) Pension and Other Postretirement Benefits Plans -

Net Periodic Benefit Costs (Credits) - The components of net periodic benefit costs (credits) for sponsored defined benefit pension and OPEB plans for the three months ended March 31 are included in the tables below (in millions). In the "IPL" and "WPL" tables below, the defined benefit pension plans costs represent those respective costs for IPL's and WPL's bargaining unit employees covered under the qualified plans that are sponsored by IPL and WPL, respectively, as well as amounts directly assigned to each of IPL and WPL related to their current and former non-bargaining employees who are participants in the Alliant Energy and Corporate Services sponsored qualified and non-qualified defined benefit pension plans. In the "IPL" and "WPL" tables below, the OPEB plans costs (credits) represent costs (credits) for IPL and WPL employees, respectively, as well as amounts directly assigned to each of IPL and WPL related to their current and former non-bargaining employees who are participants in the Corporate Services sponsored OPEB plan.

	Defined Benefit Pension Plans		OPEB Plans	
	2015	2014	2015	2014
Alliant Energy				
Service cost	\$4.0	\$3.3	\$1.4	\$1.3
Interest cost	13.4	13.5	2.2	2.4
Expected return on plan assets	(18.7)	(18.7)	(2.1)	(2.1)
Amortization of prior service credit	(0.1)	—	(2.8)	(3.0)
Amortization of actuarial loss	8.8	4.8	1.2	0.6
Additional benefit costs	0.2	—	—	—
	\$7.6	\$2.9	(\$0.1)	(\$0.8)
IPL	Defined Benefit Pension Plans		OPEB Plans	
	2015	2014	2015	2014
Service cost	\$2.2	\$1.8	\$0.6	\$0.6
Interest cost	6.2	6.3	0.9	1.0
Expected return on plan assets	(8.9)	(9.0)	(1.4)	(1.5)
Amortization of prior service credit	—	—	(1.5)	(1.6)
Amortization of actuarial loss	3.8	2.0	0.6	0.3
	\$3.3	\$1.1	(\$0.8)	(\$1.2)

Table of Contents

	Defined Benefit Pension Plans		OPEB Plans	
	2015	2014	2015	2014
WPL				
Service cost	\$1.4	\$1.2	\$0.6	\$0.5
Interest cost	5.6	5.7	0.9	1.0
Expected return on plan assets	(8.1) (8.1) (0.4) (0.3
Amortization of prior service cost (credit)	0.1	0.1	(0.9) (1.0
Amortization of actuarial loss	4.2	2.3	0.6	0.3
Additional benefit costs	0.2	—	—	—
	\$3.4	\$1.2	\$0.8	\$0.5

401(k) Savings Plans - A significant number of employees participate in defined contribution retirement plans (401(k) savings plans). For the three months ended March 31, costs related to the 401(k) savings plans, which are partially based on the participants' contributions, were as follows (in millions):

	Alliant Energy		IPL (a)		WPL (a)	
	2015	2014	2015	2014	2015	2014
401(k) costs	\$6.7	\$5.9	\$3.4	\$3.1	\$2.9	\$2.6

(a) IPL's and WPL's amounts include allocated costs associated with Corporate Services employees.

(b) Equity-based Compensation Plans - A summary of compensation expense (including amounts allocated to IPL and WPL) and the related income tax benefits recognized for share-based compensation awards for the three months ended March 31 was as follows (in millions):

	Alliant Energy		IPL		WPL	
	2015	2014	2015	2014	2015	2014
Compensation expense	\$3.2	\$3.1	\$1.7	\$1.7	\$1.4	\$1.3
Income tax benefits	1.3	1.3	0.7	0.7	0.6	0.5

As of March 31, 2015, total unrecognized compensation cost related to share-based compensation awards was \$13.1 million, which is expected to be recognized over a weighted average period of between 1 and 2 years. Share-based compensation expense is recognized on a straight-line basis over the requisite service periods and is primarily recorded in "Utility - Other operation and maintenance" in the income statements.

Performance Shares and Units -

Performance Shares - A summary of the performance shares activity was as follows:

	2015 (a)	2014 (a)
Nonvested shares, January 1	144,424	139,940
Granted	45,403	51,221
Vested	(45,612) (45,235
Nonvested shares, March 31	144,215	145,926

(a) Share amounts represent the target number of performance shares.

Table of Contents

During the three months ended March 31, certain performance shares vested, resulting in payouts (a combination of cash and common stock) as follows:

	2015 2012 Grant	2014 2011 Grant	
Performance shares vested	45,612	45,235	
Percentage of target number of performance shares	167.5	% 147.5	%
Aggregate payout value (in millions)	\$5.1	\$3.4	
Payout - cash (in millions)	\$3.2	\$2.9	
Payout - common stock shares issued	10,975	4,810	

Performance Units - A summary of the performance units activity was as follows:

	2015 (a)	2014 (a)	
Nonvested units, January 1	63,665	65,912	
Granted	17,837	20,422	
Vested	(22,845) (20,751)
Forfeited	(93) (311)
Nonvested units, March 31	58,564	65,272	

(a) Unit amounts represent the target number of performance units.

During the three months ended March 31, certain performance units vested, resulting in cash payouts as follows:

	2015 2012 Grant	2014 2011 Grant	
Performance units vested	22,845	20,751	
Percentage of target number of performance units	167.5	% 147.5	%
Payout value (in millions)	\$1.6	\$1.2	

Fair Value of Awards - Information related to fair values of nonvested performance shares and units at March 31, 2015, by year of grant, was as follows:

	Performance Shares			Performance Units		
	2015 Grant	2014 Grant	2013 Grant	2015 Grant	2014 Grant	2013 Grant
Nonvested awards	45,403	49,719	49,093	17,744	19,440	21,380
Alliant Energy common stock closing price on March 31, 2015	\$63.00	\$63.00	\$63.00			
Alliant Energy common stock closing price on grant date				\$65.09	\$53.77	\$47.58
Estimated payout percentage based on performance criteria	100	% 128	% 178	% 100	% 128	% 178
Fair values of each nonvested award	\$63.00	\$80.64	\$112.14	\$65.09	\$68.83	\$84.69

At March 31, 2015, fair values of nonvested performance shares and units were calculated based on Alliant Energy's stock price and anticipated total shareowner returns of Alliant Energy and its investor-owned utility peer group over the performance period. The portion of the fair values based on anticipated total shareowner returns was estimated using a model that incorporates the probability of meeting performance targets based on historical returns relative to the peer group.

Table of Contents

Performance Contingent Restricted Stock - A summary of the performance contingent restricted stock activity was as follows:

	2015		2014	
	Shares	Weighted Average Fair Value	Shares	Weighted Average Fair Value
Nonvested shares, January 1	98,812	\$50.69	158,922	\$42.71
Granted	45,403	65.09	51,221	53.77
Vested (a)	(49,093) 47.58	(90,847) 40.91
Forfeited	—	—	(18,982) 38.75
Nonvested shares, March 31	95,122	59.17	100,314	50.74

In 2015, 49,093 performance contingent restricted shares granted in 2013 vested because the specified performance (a) criteria for such shares were met. In 2014, 45,612 and 45,235 performance contingent restricted shares granted in 2012 and 2011, respectively, vested because the specified performance criteria for such shares were met.

Performance Contingent Cash Awards - A summary of the performance contingent cash awards activity was as follows:

	2015		2014	
Nonvested awards, January 1	78,930		96,977	
Granted	41,105		42,446	
Vested (a)	(37,332)	(55,517)
Forfeited	(469)	(3,406)
Nonvested awards, March 31	82,234		80,500	

In 2015, 37,332 performance contingent cash awards granted in 2013 vested, resulting in cash payouts valued at (a) \$2.4 million. In 2014, 34,766 and 20,751 performance contingent cash awards granted in 2012 and 2011 vested, resulting in cash payouts valued at \$1.9 million and \$1.1 million, respectively.

(10) ASSET RETIREMENT OBLIGATIONS

A reconciliation of the changes in AROs associated with long-lived assets is as follows (in millions):

	Alliant Energy		IPL		WPL		
	2015	2014	2015	2014	2015	2014	
Balance, January 1	\$114.0	\$109.7	\$51.8	\$47.9	\$52.4	\$52.4	
Liabilities settled	(2.2) (0.5) (2.2) (0.3) —	(0.2)
Liabilities incurred	—	16.5	—	16.3	—	0.2	
Accretion expense	1.0	1.0	0.4	0.5	0.4	0.4	
Balance, March 31	\$112.8	\$126.7	\$50.0	\$64.4	\$52.8	\$52.8	

CCR Rule - In April 2015, the EPA published the final CCR Rule, which regulates CCR as a non-hazardous waste and is effective October 2015. IPL and WPL have current and former coal-fired EGUs with existing coal ash surface impoundments, as well as active CCR company-owned landfills that are expected to be impacted by this rule. Alliant Energy, IPL and WPL are currently evaluating the final CCR Rule to determine its full impact. Alliant Energy, IPL and WPL currently anticipate recognizing additional AROs in the second quarter of 2015 as a result of the final CCR Rule as follows (in millions):

	Alliant Energy	IPL	WPL
Estimated ARO increase not to exceed	\$85	\$75	\$10

Expenditures incurred by IPL and WPL to comply with the CCR Rule are anticipated to be recovered in rates from their customers.

Table of Contents

(11) FAIR VALUE MEASUREMENTS

Fair Value of Financial Instruments - The carrying amounts of current assets and current liabilities approximate fair value because of the short maturity of such financial instruments. Carrying amounts and the related estimated fair values of other financial instruments were as follows (in millions):

	Alliant Energy		IPL		WPL	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
March 31, 2015						
Assets:						
Derivative assets (Note 12)	\$16.9	\$16.9	\$6.5	\$6.5	\$10.4	\$10.4
Deferred proceeds (sales of receivables) (Note 4(a))	117.7	117.7	117.7	117.7	—	—
Capitalization and liabilities:						
Long-term debt (including current maturities)	3,789.7	4,490.4	1,768.8	2,092.9	1,574.0	1,938.9
Cumulative preferred stock	200.0	203.7	200.0	203.7	—	—
Derivative liabilities (Note 12)	42.7	42.7	20.0	20.0	22.7	22.7
December 31, 2014						
Assets:						
Derivative assets (Note 12)	\$38.6	\$38.6	\$28.0	\$28.0	\$10.6	\$10.6
Deferred proceeds (sales of receivables) (Note 4(a))	177.2	177.2	177.2	177.2	—	—
Capitalization and liabilities:						
Long-term debt (including current maturities)	3,789.7	4,418.2	1,768.7	2,053.0	1,573.9	1,908.9
Cumulative preferred stock	200.0	200.2	200.0	200.2	—	—
Derivative liabilities (Note 12)	37.6	37.6	19.5	19.5	18.1	18.1

Valuation Hierarchy - At each reporting date, Level 1 items included IPL's 5.1% cumulative preferred stock, Level 2 items included certain non-exchange traded commodity contracts and substantially all of the long-term debt instruments, and Level 3 items included FTRs, certain non-exchange traded commodity contracts and IPL's deferred proceeds.

Valuation Techniques -

Derivative assets and derivative liabilities - Derivative instruments are periodically used for risk management purposes to mitigate exposures to fluctuations in certain commodity prices and transmission congestion costs, and risk policies are maintained that govern the use of such derivative instruments. Derivative instruments were not designated as hedging instruments and included the following:

Risk management purpose	Type of instrument
Mitigate pricing volatility for:	
Electricity purchased to supply customers	Electric swap and physical forward contracts (IPL and WPL)
Fuel used to supply natural gas-fired EGUs	Natural gas swap contracts (IPL and WPL) Natural gas options and physical forward contracts (WPL)
Natural gas supplied to retail customers	Natural gas options and physical forward contracts (IPL and WPL) Natural gas swap contracts (IPL)
Fuel used at coal-fired EGUs	Coal physical forward contracts (IPL and WPL)
Optimize the value of natural gas pipeline capacity	Natural gas physical forward contracts (IPL and WPL)

Manage transmission congestion costs Natural gas swap contracts (IPL)
FTRs (IPL and WPL)

23

Table of Contents

Swap, option and physical forward commodity contracts were non-exchange-based derivative instruments and were valued using indicative price quotations from a pricing vendor that provides daily exchange forward price settlements, from broker or dealer quotations, from market publications or from on-line exchanges. The indicative price quotations reflected the average of the bid-ask mid-point prices and were obtained from sources believed to provide the most liquid market for the commodity. A portion of these indicative price quotations were corroborated using quoted prices for similar assets or liabilities in active markets and categorized derivative instruments based on such indicative price quotations as Level 2. Commodity contracts that were valued using indicative price quotations based on significant assumptions such as seasonal or monthly shaping and indicative price quotations that could not be readily corroborated were categorized as Level 3. Swap, option and physical forward commodity contracts were predominately at liquid trading points. FTRs were valued using monthly or annual auction shadow prices from relevant auctions and were categorized as Level 3. Refer to Note 12 for additional details of derivative assets and derivative liabilities.

The fair value measurements of Level 3 derivative instruments include observable and unobservable inputs. The observable inputs are obtained from third-party pricing sources, counterparties and brokers and include bids, offers, historical transactions (including historical price differences between locations with both observable and unobservable prices) and executed trades. The significant unobservable inputs used in the fair value measurement of commodity contracts are forecasted electricity, natural gas and coal prices, and the expected volatility of such prices. Significant changes in any of those inputs would result in a significantly lower or higher fair value measurement.

Deferred proceeds (sales of receivables) - The fair value of IPL's deferred proceeds related to its sales of accounts receivable program was calculated each reporting date using the cost approach valuation technique. The fair value represents the carrying amount of receivables sold less the allowance for doubtful accounts associated with the receivables sold and cash proceeds received from the receivables sold due to the short-term nature of the collection period. These inputs were considered unobservable and deferred proceeds were categorized as Level 3. Deferred proceeds represent IPL's maximum exposure to loss related to the receivables sold. Refer to Note 4(a) for additional information regarding deferred proceeds.

Long-term debt (including current maturities) - The fair value of long-term debt instruments was based on quoted market prices for similar liabilities at each reporting date or on a discounted cash flow methodology, which utilizes assumptions of current market pricing curves at each reporting date.

Cumulative preferred stock - The fair value of IPL's 5.1% cumulative preferred stock was based on its closing market price quoted by the New York Stock Exchange at each reporting date.

Items subject to fair value measurement disclosure requirements were as follows (in millions):

Alliant Energy	March 31, 2015				December 31, 2014

Derivatives - commodity contracts	22.7	—	4.7	18.0	18.1	—	6.2	11.9

Unrealized gains and losses from derivative instruments are generally recorded with offsets to regulatory assets or regulatory liabilities, based on fuel and natural gas cost recovery mechanisms, as well as other specific regulatory authorizations. Based on these recovery mechanisms, the changes in the fair value of derivative liabilities resulted in comparable changes to regulatory assets, and the changes in the fair value of derivative assets resulted in comparable changes to regulatory liabilities.

Information for fair value measurements using significant unobservable inputs (Level 3 inputs) was as follows (in millions):

Alliant Energy	Commodity Contract Derivative Assets and (Liabilities), net

Regulatory assets	(\$20.9)	\$10.1	(\$11.7)	\$5.5	(\$9.2)	\$4.6
Regulatory liabilities	2.2	48.1	(1.4)	12.1	3.6	36.0

Table of Contents

Credit Risk-related Contingent Features - Various agreements contain credit risk-related contingent features, including requirements to maintain certain credit ratings and/or limitations on liability positions under the agreements based on credit ratings. Certain of these agreements with credit risk-related contingency features are accounted for as derivative instruments. In the event of a material change in creditworthiness or if liability positions exceed certain contractual limits, credit support may need to be provided in the form of letters of credit or cash collateral up to the amount of exposure under the contracts, or the contracts may need to be unwound and underlying liability positions paid. The aggregate fair value of all derivative instruments with credit risk-related contingent features in a net liability position, as well as amounts that would be required to be posted as credit support to counterparties by Alliant Energy, IPL or WPL if the most restrictive credit risk-related contingent features for derivative agreements in a net liability position were triggered, were as follows (in millions):

	Alliant Energy		IPL		WPL	
	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014
Aggregate fair value	\$42.7	\$37.6	\$20.0	\$19.5	\$22.7	\$18.1
Credit support to be posted if triggered	42.2	37.4	20.0	19.5	22.2	17.9

Balance Sheet Offsetting - The fair value amounts of derivative instruments subject to a master netting arrangement are not netted by counterparty on the balance sheets. However, if the fair value amounts of derivative instruments by counterparty were netted, derivative assets and derivative liabilities related to commodity contracts would have been presented on the balance sheets as follows (in millions):

	Alliant Energy		IPL		WPL	
	Gross (as reported)	Net	Gross (as reported)	Net	Gross (as reported)	Net
March 31, 2015						
Derivative assets	\$16.9	\$10.3	\$6.5	\$5.1	\$10.4	\$5.2
Derivative liabilities	42.7	36.1	20.0	18.6	22.7	17.5
December 31, 2014						
Derivative assets	38.6	33.0	28.0	24.7	10.6	8.3
Derivative liabilities	37.6	32.0	19.5	16.2	18.1	15.8

Fair value amounts recognized for the right to reclaim cash collateral (receivable) or the obligation to return cash collateral (payable) are not offset against fair value amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement.

(13) COMMITMENTS AND CONTINGENCIES

(a) Capital Purchase Obligations - Various contractual obligations contain minimum future commitments related to capital expenditures for certain construction projects. IPL's projects include the installation of a scrubber at Lansing Unit 4 to reduce SO₂ emissions. WPL's projects include the installation of a scrubber and baghouse at Edgewater Unit 5 to reduce SO₂ and mercury emissions, and generation maintenance and performance improvements at Columbia Units 1 and 2. At March 31, 2015, Alliant Energy's, IPL's and WPL's minimum future commitments related to certain contractual obligations for these projects were \$26 million, \$2 million and \$24 million, respectively.

Table of Contents

(b) Operating Expense Purchase Obligations - Various commodity supply, transportation and storage contracts help meet obligations to provide electricity and natural gas to utility customers. Other operating expense purchase obligations with various vendors provide other goods and services. At March 31, 2015, minimum future commitments related to these operating expense purchase obligations were as follows (in millions):

	Alliant Energy	IPL	WPL
Purchased power (a):			
DAEC (IPL)	\$1,510	\$1,510	\$—
Other	220	1	219
	1,730	1,511	219
Natural gas	228	120	108
Coal (b)	264	113	151
SO2 emission allowances	22	22	—
Other (c)	39	29	10
	\$2,283	\$1,795	\$488

(a) Includes payments required by PPAs for capacity rights and minimum quantities of MWhs required to be purchased.

Corporate Services entered into system-wide coal contracts on behalf of IPL and WPL that include minimum (b) future commitments. These commitments were assigned to IPL and WPL based on information available as of March 31, 2015 regarding expected future usage, which is subject to change.

(c) Includes individual commitments incurred during the normal course of business that exceeded \$1 million at March 31, 2015.

(c) Legal Proceedings -

Flood Damage Claims - In June 2013, several plaintiffs purporting to represent a class of residential and commercial property owners filed a complaint against CRANDIC, Alliant Energy and various other defendants in the Iowa District Court for Linn County. Plaintiffs assert claims of negligence and strict liability based on their allegations that CRANDIC (along with other defendants) caused or exacerbated flooding of the Cedar River in June 2008. In July 2013, the case was removed from state court to federal court based on federal jurisdiction. In September 2013, the U.S. District Court for the Northern District of Iowa dismissed the Plaintiffs' claims and transferred the case for resolution to the Surface Transportation Board, the administrative agency that oversees the Interstate Commerce Commission Termination Act. In October 2013, the Plaintiffs appealed the federal court's dismissal of the case to the Eighth Circuit Court of Appeals. Alliant Energy and CRANDIC believe the case is without merit and will continue to vigorously contest the case. As a result, Alliant Energy does not currently believe any material losses from these claims are both probable and reasonably estimated, and therefore, has not recognized any material loss contingency amounts for this complaint as of March 31, 2015. Due to the early stages of the claim and the lack of specific damages identified, Alliant Energy is currently unable to provide an estimate of potential loss or range of potential loss.

(d) Guarantees and Indemnifications -

RMT - In 2013, Alliant Energy sold RMT. RMT provided renewable energy services, including construction and high voltage connection services for wind and solar projects. As part of the sale, Alliant Energy indemnified the buyer for any claims, including claims of warranty under the project obligations that were commenced or are based on actions that occurred prior to the sale, except for liabilities already accounted for through adjustments to the purchase price. The indemnification obligations either cease to exist when the statute of limitation for such claims is met or, in the case of RMT's projects, when the warranty period under the agreements expires. The warranty periods for RMT's projects generally range from 12 to 60 months with the latest expiring in 2016.

Alliant Energy also continues to guarantee RMT's performance obligations related to certain of RMT's projects that were commenced prior to Alliant Energy's sale of RMT. As of March 31, 2015, Alliant Energy had \$251 million of performance guarantees outstanding, with \$128 million, \$48 million and \$75 million currently expected to expire in 2015, 2016 and 2017, respectively. The expiration of these performance guarantees may be extended depending on when all valid warranty claims are resolved for the respective projects.

Table of Contents

Although Alliant Energy has received warranty claims related to certain of these projects, it does not currently believe that material losses are both probable and reasonably estimated, and therefore, has not recognized any material liabilities related to these matters as of March 31, 2015. Due to the early stages of the warranty claims, Alliant Energy is currently unable to provide an estimate of potential loss or range of potential loss.

Whiting Petroleum - In 2004, Alliant Energy sold its remaining interest in Whiting Petroleum. Whiting Petroleum is an independent oil and gas company. Alliant Energy continues to guarantee the obligations related to the abandonment of certain platforms off the coast of California and related onshore plant and equipment that were owned by Whiting Petroleum prior to Alliant Energy's sale of Whiting Petroleum. The guarantee does not include a maximum limit. As of March 31, 2015, the present value of the abandonment obligations is estimated at \$35 million. Alliant Energy believes that no payments will be made under this guarantee. Alliant Energy has not recognized any material liabilities related to this guarantee as of March 31, 2015.

(e) Environmental Matters -

MGP Sites - IPL and WPL have current or previous ownership interests in various sites that are previously associated with the production of gas for which IPL and WPL have, or may have in the future, liability for investigation, remediation and monitoring costs. IPL and WPL are working pursuant to the requirements of various federal and state agencies to investigate, mitigate, prevent and remediate, where necessary, the environmental impacts to property, including natural resources, at and around these former MGP sites in order to protect public health and the environment. IPL and WPL are currently monitoring and/or remediating 25 and 5 sites, respectively. Included in IPL's sites is a Minnesota site for which responsibility of monitoring and/or remediating the site was transferred to the buyer as part of the sale of IPL's Minnesota natural gas distribution assets.

Environmental liabilities related to these MGP sites are recorded based upon periodic studies. Such amounts are based on the best current estimate of the remaining amount to be incurred for investigation, remediation and monitoring costs for those sites where the investigation process has been or is substantially completed, and the minimum of the estimated cost range for those sites where the investigation is in its earlier stages. There are inherent uncertainties associated with the estimated remaining costs for MGP projects primarily due to unknown site conditions and potential changes in regulatory agency requirements. It is possible that future cost estimates will be greater than current estimates as the investigation process proceeds and as additional facts become known. The amounts recognized as liabilities are reduced for expenditures incurred and are adjusted as further information develops or circumstances change. Costs of future expenditures for environmental remediation obligations are not discounted. At March 31, 2015, estimated future costs expected to be incurred for the investigation, remediation and monitoring of the MGP sites, as well as environmental liabilities recorded on the balance sheets for these sites, were as follows (in millions):

	Alliant Energy		IPL		WPL	
Range of estimated future costs	\$14	-\$34	\$13	-\$31	\$1	-\$3
Current and non-current environmental liabilities	16		14		2	

WPL Consent Decree - In 2009, the EPA sent a notice of violation to WPL as an owner and the operator of Edgewater, Nelson Dewey and Columbia alleging that the owners of such EGUs failed to comply with appropriate pre-construction review and permitting requirements and as a result violated the PSD program requirements, Title V Operating Permit requirements of the CAA and the Wisconsin State Implementation Plan. In 2010, the Sierra Club filed complaints against WPL, as owner and operator of Nelson Dewey and Columbia, and separately as owner and operator of Edgewater, based on allegations that modifications were made at the facilities without complying with the PSD program requirements, Title V Operating Permit requirements of the CAA and state regulatory counterparts contained within the Wisconsin State Implementation Plan designed to implement the CAA.

In April 2013, WPL, along with the other owners of Edgewater and Columbia, entered into a Consent Decree with the EPA and the Sierra Club to resolve the claims relating to Edgewater, Columbia and Nelson Dewey, while admitting no liability. In June 2013, the Consent Decree was approved by the U.S. District Court for the Western District of Wisconsin, thereby resolving all claims against WPL. Under the Consent Decree, WPL is required to install the following emission controls systems:

- Selective catalytic reduction system at Edgewater Unit 5 by May 1, 2013 (placed in service in 2012);
- Scrubbers and baghouses at Columbia Units 1 and 2 by December 31, 2014 (placed in service in 2014);
- Scrubber and baghouse at Edgewater Unit 5 by December 31, 2016; and
- Selective catalytic reduction system at Columbia Unit 2 by December 31, 2018.

Table of Contents

WPL is also required to fuel switch or retire Nelson Dewey Units 1 and 2 and Edgewater Unit 3 by December 31, 2015, and Edgewater Unit 4 by December 31, 2018. In addition, the Consent Decree establishes emission rate limits for SO₂, NO_x and particulate matter for Columbia Units 1 and 2, Nelson Dewey Units 1 and 2 and Edgewater Units 4 and 5. The Consent Decree also includes annual plant-wide emission caps for SO₂ and NO_x for Columbia, Edgewater and Nelson Dewey. In addition, WPL will complete approximately \$7 million in environmental mitigation projects.

Final recovery of the costs expected to be incurred related to the Consent Decree will be decided by the PSCW in future rate cases or other proceedings. Alliant Energy and WPL currently expect to recover any material costs incurred by WPL related to compliance with the terms of the Consent Decree from WPL's electric customers, except for costs related to certain of the environmental mitigation projects.

Other Environmental Contingencies - In addition to the environmental liabilities discussed above, various environmental rules are monitored that may have a significant impact on future operations. Several of these environmental rules are subject to legal challenges, reconsideration and/or other uncertainties. Given uncertainties regarding the outcome, timing and compliance plans for these environmental matters, the complete financial impact of each of these rules is not able to be determined; however future capital investments and/or modifications to EGUs to comply with certain of these rules could be significant. Specific current, proposed or potential environmental matters include, among others: Cross-State Air Pollution Rule, Clean Air Visibility Rule, MATS Rule, Industrial Boiler and Process Heater Maximum Achievable Control Technology Rule, Ozone National Ambient Air Quality Standards Rule, SO₂ National Ambient Air Quality Standards Rule, Federal Clean Water Act including Section 316(b), Effluent Limitation Guidelines, Hydroelectric Fish Passage Device, CCR Rule, and various legislation and EPA regulations to monitor and regulate the emission of greenhouse gases, including carbon emissions from new (CAA Section 111(b)) and existing (CAA Section 111(d)) fossil-fueled EGUs. Some recent developments concerning these environmental matters are included below:

Air Quality -

MATS Rule - In March 2015, the EPA approved an extension to the MATS Rule compliance deadline from April 2015 to April 2016 for IPL's M.L. Kapp Unit 2.

Land and Solid Waste -

CCR Rule - Refer to Note 10 for discussion of the final CCR Rule, including additional AROs that are expected to be recognized in the second quarter of 2015.

(14) SEGMENTS OF BUSINESS

Alliant Energy - Certain financial information relating to Alliant Energy's business segments is as follows.

Intersegment revenues were not material to Alliant Energy's operations.

	Utility				Non-Regulated, Parent and Other	Alliant Energy Consolidated
	Electric	Gas	Other	Total		
	(in millions)					
Three Months Ended March 31, 2015						
Operating revenues	\$671.3	\$198.4	\$16.4	\$886.1	\$11.3	\$897.4
Operating income	104.7	36.3	5.3	146.3	6.6	152.9
Net income attributable to Alliant Energy common shareowners				92.4	4.2	96.6
Three Months Ended March 31, 2014						

Edgar Filing: ALLIANT ENERGY CORP - Form 10-Q

Operating revenues	\$675.8	\$240.7	\$22.8	\$939.3	\$13.5	\$952.8
Operating income	94.3	43.0	7.9	145.2	9.0	154.2
Net income attributable to Alliant Energy common shareowners				98.2	9.8	108.0

31

Table of Contents

IPL - Certain financial information relating to IPL's business segments is as follows. Intersegment revenues were not material to IPL's operations.

	Electric (in millions)	Gas	Other	Total
Three Months Ended March 31, 2015				
Operating revenues	\$362.6	\$111.2	\$15.2	\$489.0
Operating income	40.3	20.6	4.6	65.5
Earnings available for common stock				47.8
Three Months Ended March 31, 2014				
Operating revenues	\$374.2	\$135.7	\$19.0	\$528.9
Operating income	26.5	23.3	7.7	57.5
Earnings available for common stock				43.4

WPL - Certain financial information relating to WPL's business segments is as follows. Intersegment revenues were not material to WPL's operations.

	Electric (in millions)	Gas	Other	Total
Three Months Ended March 31, 2015				
Operating revenues	\$308.7	\$87.2	\$1.2	\$397.1
Operating income	64.4	15.7	0.7	80.8
Earnings available for common stock				44.6
Three Months Ended March 31, 2014				
Operating revenues	\$301.6	\$105.0	\$3.8	\$410.4
Operating income	67.8	19.7	0.2	87.7
Earnings available for common stock				54.8

(15) RELATED PARTIES

Service Agreements - IPL and WPL are parties to service agreements with an affiliate, Corporate Services. Pursuant to these service agreements, IPL and WPL receive various administrative and general services. These services are billed to IPL and WPL at cost based on expenses incurred by Corporate Services for the benefit of IPL and WPL, respectively. These costs consisted primarily of employee compensation and benefits, fees associated with various professional services and a return on net assets. Corporate Services also acts as agent on behalf of IPL and WPL pursuant to the service agreements. As agent, Corporate Services enters into energy, capacity, ancillary services, and transmission sale and purchase transactions within MISO and PJM. Corporate Services assigns such sales and purchases among IPL and WPL based on statements received from MISO and PJM. The amounts billed for services provided, sales credited and purchases for the three months ended March 31 were as follows (in millions):

	IPL		WPL	
	2015	2014	2015	2014
Corporate Services billings	\$36	\$33	\$28	\$28
Sales credited	4	2	6	(1
Purchases billed	79	99	14	30

Net intercompany payables to Corporate Services were as follows (in millions):

	IPL		WPL	
	March 31, 2015	December 31, 2014	March 31, 2015	December 31, 2014
Net payables to Corporate Services	\$85	\$84	\$52	\$58

Table of Contents

ATC - Pursuant to various agreements, WPL receives a range of transmission services from ATC. WPL provides operation, maintenance, and construction services to ATC. WPL and ATC also bill each other for use of shared facilities owned by each party. The related amounts billed between the parties for the three months ended March 31 were as follows (in millions):

	2015	2014
ATC billings to WPL	\$25	\$24
WPL billings to ATC	2	3

WPL owed ATC net amounts of \$7 million as of March 31, 2015 and \$8 million as of December 31, 2014.

(16) ASSETS AND LIABILITIES HELD FOR SALE

In December 2014, the MPUC issued an order approving the sale of IPL's Minnesota natural gas distribution assets. In April 2015, IPL completed the sale of its Minnesota natural gas distribution assets. Alliant Energy's and IPL's balance sheets included assets held for sale recorded in "Other current assets" and liabilities held for sale recorded in "Other current liabilities" as follows (in millions):

	March 31, 2015	December 31, 2014
Assets held for sale:		
Current assets	\$2.3	\$1.1
Property, plant and equipment, net	11.0	11.0
Other assets	6.4	7.0
Total assets held for sale	19.7	19.1
Liabilities held for sale:		
Current liabilities	0.2	1.0
Other liabilities	6.8	7.1
Total liabilities held for sale	7.0	8.1
Net assets held for sale	\$12.7	\$11.0

Alliant Energy and IPL evaluated the sale of IPL's Minnesota natural gas distribution assets and believe it did not represent a strategic shift that has, or will have, a major effect on their operational and financial results. As a result, the operating results of IPL's Minnesota natural gas distribution assets have not been separately classified and reported as discontinued operations in Alliant Energy's and IPL's income statements. Refer to Note 3 for further discussion of IPL's sale of its Minnesota natural gas distribution assets.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This MDA includes information relating to Alliant Energy, IPL and WPL, as well as Resources and Corporate Services. Where appropriate, information relating to a specific entity has been segregated and labeled as such. The following discussion and analysis should be read in conjunction with the Financial Statements and the Notes included in this report as well as the financial statements, notes and MDA included in the 2014 Form 10-K. Unless otherwise noted, all "per share" references in MDA refer to earnings per diluted share.

Table of Contents

CONTENTS OF MDA

MDA consists of the following information:

- Executive Summary
- Strategic Overview
- Rate Matters
- Environmental Matters
- Legislative Matters
- Alliant Energy's Results of Operations
- IPL's Results of Operations
- WPL's Results of Operations
- Liquidity and Capital Resources
- Other Matters
- Market Risk Sensitive Instruments and Positions
- New Accounting Pronouncements
- Critical Accounting Policies and Estimates
- Other Future Considerations

EXECUTIVE SUMMARY

Description of Business

General - Alliant Energy is an investor-owned public utility holding company whose primary subsidiaries are IPL, WPL, Resources and Corporate Services. IPL is a public utility engaged principally in the generation and distribution of electricity and the distribution and transportation of natural gas in selective markets in Iowa and southern Minnesota. WPL is a public utility engaged principally in the generation and distribution of electricity and the distribution and transportation of natural gas in selective markets in southern and central Wisconsin. At March 31, 2015, WPL and Resources, through their ownership interests in WPL Transco, LLC, in aggregate held an approximate 16% ownership interest in ATC, a transmission-only utility operating primarily in the Midwest. Resources is the parent company for Alliant Energy's non-regulated businesses. Corporate Services provides administrative services to Alliant Energy and its subsidiaries. An illustration of Alliant Energy's primary businesses as of March 31, 2015 is shown below.

Alliant Energy

Utilities, ATC and Corporate Services

- Electric and gas services in IA (IPL)
- Electric and gas services in WI (WPL)
- 16% interest in ATC (primarily WPL)
- Electric and gas services in MN (IPL) (a)
- Corporate Services

Non-regulated and Parent

- Transportation (Resources)
- Non-regulated Generation (Resources)
- Parent Company

(a) In April 2015, IPL completed the sale of its Minnesota natural gas distribution assets. In April 2015, the MPUC approved the sale of IPL's Minnesota electric distribution assets, subject to certain conditions. Pending the receipt of remaining regulatory approvals, IPL currently expects the electric transaction to be concluded in the third quarter of 2015.

Edgar Filing: ALLIANT ENERGY CORP - Form 10-Q

Financial Results - Alliant Energy's net income and EPS attributable to Alliant Energy common shareowners for the first quarter were as follows (dollars in millions, except per share amounts):

	2015		2014	
	Income	EPS	Income	EPS
Utilities, ATC and Corporate Services	\$95.2	\$0.86	\$100.3	\$0.90
Non-regulated and Parent	1.4	0.01	7.7	0.07
Alliant Energy Consolidated	\$96.6	\$0.87	\$108.0	\$0.97

Table of Contents

The table above includes utilities, ATC and Corporate Services, and non-regulated and parent EPS, which are non-GAAP financial measures. Alliant Energy believes utilities, ATC and Corporate Services, and non-regulated and parent, EPS are useful to investors because they facilitate an understanding of segment performance and trends and provide additional information about Alliant Energy's operations on a basis consistent with the measures that management uses to manage its operations and evaluate its performance.

Utilities, ATC and Corporate Services - Lower EPS in the first quarter of 2015 compared to the first quarter of 2014 was primarily due to:

- an estimated \$0.08 per share of decreases in revenues from lower electric and gas sales in the first quarter of 2015 compared to the first quarter of 2014 due to weather conditions;
- \$0.05 per share of higher electric transmission service expense at WPL in the first quarter of 2015 compared to the first quarter of 2014;
- \$0.03 per share of retail electric customer billing credits at IPL in the first quarter of 2015 related to an approved settlement agreement in 2014 for its Iowa retail electric base rates;
- an estimated \$0.03 per share of lower estimated weather-normalized retail electric sales in the first quarter of 2015 compared to the first quarter of 2014; and
- \$0.02 per share of lower margins from a sharing mechanism related to optimizing gas capacity contracts at IPL in the first quarter of 2015 compared to the first quarter of 2014.

These items were partially offset by:

- \$0.13 per share of purchased electric capacity expense related to the previous DAEC PPA recognized by IPL in the first quarter of 2014;
- \$0.05 per share of lower energy efficiency cost recovery amortizations at WPL in the first quarter of 2015 compared to the first quarter of 2014; and
- \$0.03 per share of higher electric margins related to changes in the recovery of fuel-related expense at WPL.

Non-regulated and Parent - Lower EPS in the first quarter of 2015 compared to the first quarter of 2014 was primarily due to \$0.04 per share of effective tax rate adjustments at the Parent in the first quarter of 2015 compared to the first quarter of 2014, which is not expected to have a material impact on the full year results.

Refer to "Alliant Energy's Results of Operations," "IPL's Results of Operations" and "WPL's Results of Operations" for additional details regarding the various factors impacting earnings during the first quarters of 2015 and 2014.

Strategic Overview Highlights

The strategic plan focuses on the core business of delivering regulated electric and natural gas service in Iowa and Wisconsin, and is built upon three key elements: competitive costs, safe and reliable service, and responsible resources. Key strategic plan developments since the filing of the 2014 Form 10-K include the following. Refer to "Strategic Overview" for a more detailed discussion of strategic plan developments.

March 2015 - The IUB approved IPL's most recent Emissions Plan and Budget, which includes the scrubber currently under construction at Lansing Unit 4 to reduce SO₂ emissions at the EGU. IPL's previous Emissions Plan and Budget also included the scrubber currently under construction at Lansing Unit 4.

April 2015 - WPL filed a Certificate of Public Convenience and Necessity application with the PSCW for approval to construct an approximate 650 MW natural gas-fired combined-cycle EGU in Beloit, Wisconsin, referred to as the Riverside expansion.

- April 2015 - IPL completed the sale of its Minnesota natural gas distribution assets and received net proceeds of \$11 million and a promissory note of \$2 million. The proceeds are subject to post-closing adjustments based on the value of the net assets transferred as of the closing date, and will be used for general corporate purposes. In addition, the MPUC approved the sale of IPL's Minnesota electric distribution assets, subject to certain

conditions. Pending the receipt of remaining regulatory approvals, IPL currently expects the electric transaction to be concluded in the third quarter of 2015.

Rate Matters Highlights

Federal regulation of wholesale electric rates is administered by FERC and state regulation of retail utility rates is administered by the IUB, PSCW and MPUC. Key regulatory developments since the filing of the 2014 Form 10-K include the following. Refer to “Rate Matters” for a more detailed discussion of regulatory developments.

March 2015 - WPL filed a fuel reconciliation application with the PSCW to seek recovery in 2016 of \$28 million of deferred fuel-related costs, including interest. WPL anticipates a decision from the PSCW regarding its application in the third quarter of 2015.

Table of Contents

Environmental Matters Highlights

Environmental matters are regulated by various federal, state and local authorities. Key environmental developments since the filing of the 2014 Form 10-K include the following. Refer to “Environmental Matters” for a more detailed discussion of environmental developments.

March 2015 - The EPA approved an extension to the MATS Rule compliance deadline from April 2015 to April 2016 for IPL’s M.L. Kapp Unit 2.

April 2015 - The EPA published the final CCR Rule, which regulates CCR as a non-hazardous waste and is effective October 2015. IPL and WPL have current and former coal-fired EGUs with existing coal ash surface impoundments, as well as active CCR company-owned landfills that are expected to be impacted by this rule. Alliant Energy, IPL and WPL currently anticipate recognizing additional AROs in the second quarter of 2015 as a result of the final CCR Rule. Expenditures incurred by IPL and WPL to comply with the CCR Rule are anticipated to be recovered in rates from their customers.

Liquidity and Capital Resources Highlights

Based on current liquidity positions and capital structures, the additional capital required to implement the strategic plan and to meet long-term contractual obligations is expected to be available. Key financing developments since the filing of the 2014 Form 10-K include the following. Refer to “Liquidity and Capital Resources” for a more detailed discussion of financing developments.

March 2015 - Alliant Energy filed a prospectus supplement under which it may sell up to \$150 million of its common stock through an at-the-market offering program. As of March 31, 2015, Alliant Energy issued 1,996,450 shares of common stock through this program and received net cash proceeds of \$121 million. Alliant Energy also had commitments at March 31, 2015 to sell 190,167 shares of common stock under sales transactions executed through this program in late March 2015. Subsequent to March 31, 2015, Alliant Energy issued shares to settle these transactions in exchange for net cash proceeds of \$12 million. Alliant Energy currently has no plans to issue any additional common stock through the at-the-market offering program.

March 2015 - At March 31, 2015, Alliant Energy and its subsidiaries had \$959 million of available capacity under the revolving credit facilities, \$106 million of available capacity at IPL under its sales of accounts receivable program and \$98 million of cash and cash equivalents.

Other Matters Highlights

Other key developments since the filing of the 2014 Form 10-K that could impact future financial condition or results of operations include the following. Refer to “Other Matters” for a more detailed discussion of potential impacts to future financial condition and results of operations.

March 2015 - FERC issued an order allowing ITC to implement a 50 basis point incentive adder to its return on equity for being an independent transmission company. The implementation of the adder will be retroactively applied back to April 2015 after resolution of a MISO transmission owner return on equity complaint filed in 2013 by a group of MISO industrial customer organizations. Alliant Energy and IPL are currently unable to determine any resulting changes to future electric transmission service charges pending a decision by FERC on the 2013 complaint.

STRATEGIC OVERVIEW

A strategic overview summary is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K, except as described below.

Generation Plans -
Natural Gas-Fired Generation -

WPL's Proposed Construction of the Riverside Expansion - In April 2015, WPL filed a Certificate of Public Convenience and Necessity application with the PSCW for approval to construct an approximate 650 MW natural gas-fired combined-cycle EGU in Beloit, Wisconsin, referred to as the Riverside expansion. A decision from the PSCW on WPL's application is currently expected by mid-2016. The Riverside expansion is also subject to the receipt of various approvals and permits necessary to construct and operate the EGU and connect such EGU to the transmission system.

Utility Business Divestitures -

IPL's Minnesota Electric and Natural Gas Distribution Assets - Refer to Note 3 for discussion of the April 2015 sale of IPL's Minnesota natural gas distribution assets and the MPUC's April 2015 approval of the sale of IPL's Minnesota electric distribution assets. Pending the receipt of remaining regulatory approvals, IPL currently expects the electric transaction to be concluded in the third quarter of 2015.

Table of Contents

Environmental Compliance Plans -

IPL's Emission Controls Projects - In March 2015, the IUB approved IPL's most recent Emissions Plan and Budget, which includes the scrubber currently under construction at Lansing Unit 4 to reduce SO₂ emissions at the EGU. IPL's previous Emissions Plan and Budget also included the scrubber currently under construction at Lansing Unit 4.

RATE MATTERS

A rate matters summary is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K, except as described below.

WPL's Retail Fuel-related Rate Filings -

2014 Test Year - Refer to Note 2 for discussion of amounts recorded by Alliant Energy and WPL on their balance sheets as of March 31, 2015 for fuel-related costs incurred by WPL in 2014 that were outside the approved bandwidth for 2014, as well as a fuel reconciliation application WPL filed with the PSCW in March 2015 to seek recovery of these deferred fuel-related costs.

ENVIRONMENTAL MATTERS

An environmental matters summary is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K, except as described below.

Air Quality -

MATS Rule - In 2011, the EPA issued the final MATS Rule for existing coal-fired EGUs, which requires emission limits for mercury and other hazardous air pollutants and work practice standards. Compliance with the MATS Rule began in April 2015; however, an entity can request an additional year for compliance for EGUs that are needed to assure power reliability, EGUs needed while building replacement generation or repowering to gas, or EGUs that need additional time to install air emission controls technology. In March 2015, the EPA approved an extension to the MATS Rule compliance deadline from April 2015 to April 2016 for IPL's M.L. Kapp Unit 2.

Land and Solid Waste -

Coal Combustion Residuals Rule - Refer to Note 10 for discussion of the final CCR Rule, including additional AROs that are expected to be recognized in the second quarter of 2015.

LEGISLATIVE MATTERS

A legislative matters summary is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K.

ALLIANT ENERGY'S RESULTS OF OPERATIONS

Overview - First Quarter Results - "Executive Summary" provides an overview of Alliant Energy's first quarter 2015 and 2014 earnings and the various components of its business. Additional details of Alliant Energy's earnings for the three months ended March 31, 2015 and 2014 are discussed below.

Utility Electric Margins - Electric margins are defined as electric operating revenues less electric production fuel, energy purchases and purchased electric capacity expenses. Management believes that electric margins provide a more meaningful basis for evaluating utility operations than electric operating revenues since electric production fuel,

energy purchases and purchased electric capacity expenses are generally passed through to customers, and therefore, result in changes to electric operating revenues that are comparable to changes in electric production fuel, energy purchases and purchased electric capacity expenses.

Table of Contents

First Quarter 2015 vs. First Quarter 2014 Summary - Electric margins and MWh sales for Alliant Energy for the three months ended March 31 were as follows:

	Revenues and Costs (dollars in millions)			MWhs Sold (MWhs in thousands)		
	2015	2014	Change	2015	2014	Change
Residential	\$257.3	\$268.2	(4 %)	2,052	2,224	(8 %)
Commercial	155.2	161.0	(4 %)	1,596	1,654	(4 %)
Industrial	187.2	185.3	1 %	2,860	2,824	1 %
Retail subtotal	599.7	614.5	(2 %)	6,508	6,702	(3 %)
Sales for resale:						
Wholesale	52.0	53.5	(3 %)	864	936	(8 %)
Bulk power and other	8.2	(4.1)	300 %	418	90	364 %
Other	11.4	11.9	(4 %)	37	42	(12 %)
Total revenues/sales	671.3	675.8	(1 %)	7,827	7,770	1 %
Electric production fuel expense	136.8	129.1	6 %			
Energy purchases expense	78.9	84.8	(7 %)			
Purchased electric capacity expense	0.2	24.8	(99 %)			
Electric margins (a)	\$455.4	\$437.1	4 %			

(a) Includes \$18 million and \$23 million of credits on IPL's Iowa retail electric customers' bills for the first quarters of 2015 and 2014, respectively, resulting from the electric tax benefit rider. The electric tax benefit rider results in reductions in electric revenues that are offset by reductions in income tax expense for the years ended December 31, 2015 and 2014.

Variations - Variations between periods in electric margins were as follows (in millions):

First Quarter 2015 vs. First Quarter 2014 Summary:	Alliant Energy	IPL	WPL
Purchased electric capacity expense at IPL in 2014 (a)	\$25	\$25	\$—
Changes in electric fuel-related costs, net of recoveries at WPL	7	—	7
Higher revenues at IPL due to changes in credits on Iowa retail electric customers' bills resulting from the electric tax benefit rider (b)	5	5	—
Estimated changes in sales caused by weather conditions	(8)	(5)	(3)
Retail electric customer billing credits at IPL (c)	(6)	(6)	—
Other (d)	(5)	(1)	(4)
	\$18	\$18	\$—

IPL's previous DAEC PPA that expired in February 2014 included minimum payments for IPL's rights to electric (a) generating capacity. IPL's new DAEC PPA effective February 2014 does not contain minimum payments for electric generating capacity.

(b) Refer to Note 2 for further discussion of IPL's electric tax benefit rider.

(c) Refer to Note 2 for further discussion of billing credits that began in May 2014 related to the approved settlement agreement for IPL's Iowa retail electric rates.

(d) Includes decreases in weather-normalized retail sales volumes at IPL and WPL.

Weather Conditions - Temperatures during the first quarter of 2015 were 8-10% colder than normal, as measured by HDD in Alliant Energy's service territories. Temperatures during the first quarter of 2014 were 20-25% colder than normal. The warmer temperatures during the first quarter of 2015 compared to the temperatures during the first quarter of 2014 caused a decrease in IPL's and WPL's electric and gas sales in the first quarter of 2015 due to lower

demand by customers for heating. HDD in Alliant Energy's service territories for the three months ended March 31 were as follows:

	Actual 2015	2014	Normal
HDD (a):			
Cedar Rapids, Iowa (IPL)	3,690	4,192	3,417
Madison, Wisconsin (WPL)	3,834	4,275	3,506

Table of Contents

(a) HDD are calculated using a simple average of the high and low temperatures each day compared to a 65 degree base. Normal degree days are calculated using a rolling 20-year average of historical HDD.

Estimated increases to electric margins from the impacts of weather for the three months ended March 31 were as follows (in millions):

	2015	2014	Change	
IPL	\$2	\$7	(\$5)
WPL	3	6	(3)
Total Alliant Energy	\$5	\$13	(\$8)

Electric Production Fuel and Energy Purchases (Fuel-related) Cost Recoveries - Fossil fuels, such as coal and natural gas, are burned to produce electricity at EGUs. The cost of fossil fuels used during each period is included in electric production fuel expense. Electricity is also purchased to meet customer demand and these costs are charged to energy purchases expense.

Due to IPL's cost recovery mechanisms for fuel-related costs, changes in fuel-related costs resulted in comparable changes in electric revenues and, therefore, did not have a significant impact on electric margins. WPL's cost recovery mechanism for wholesale fuel-related costs also provides for adjustments to its wholesale electric rates for changes in commodity costs, thereby mitigating impacts of changes to commodity costs on electric margins.

WPL's cost recovery mechanism for retail fuel-related costs provides deferral for amounts that fall outside an approved bandwidth of plus or minus 2% of forecasted fuel-related costs determined by the PSCW each year. The difference between revenue collected and actual fuel-related costs incurred within the bandwidth increases or decreases electric margins. WPL estimates the increase (decrease) to electric margins from amounts within the bandwidth were approximately \$1 million and (\$6) million for the three months ended March 31, 2015 and 2014, respectively.

First Quarter 2015 vs. First Quarter 2014 Summary - Electric production fuel expense increased \$8 million for the three-month period. The increase for the three-month period was primarily due to a deferral recorded in the first quarter of 2014 for fuel-related costs that were outside the approved bandwidth at WPL.

Energy purchases expense decreased \$6 million for the three-month period. The extremely cold temperatures in the first quarter of 2014 contributed to higher prices for electricity purchased by IPL and WPL from wholesale energy markets (primarily MISO) during such period and was the primary driver of the lower energy purchases expense during the first quarter of 2015.

Sales Trends - Retail sales volumes decreased 3% for the three months ended March 31, 2015 compared to the same period in 2014 primarily due to the impact of the extremely cold weather conditions during the first quarter of 2014. The abnormally cold weather combined with other factors in the first quarter of 2014, such as high propane costs and supply constraints, contributed to customers relying more on electric heating sources, which resulted in higher than normal electric usage per customer during such period. Retail weather-normalized sales volumes for the three months ended March 31, 2015 were consistent with historical averages. The three-month decrease in residential and commercial sales volumes was partially offset by increased industrial sales volumes related to recent customer expansions.

Wholesale sales volumes decreased 8% for the three months ended March 31, 2015 compared to the same period in 2014. The three-month decrease was primarily due to decreased sales to WPL's partial-requirement wholesale customers that have contractual options to be served by WPL, other power supply sources or the MISO market, and

the impact of the unseasonably cold weather conditions during the first quarter of 2014.

Bulk power and other revenue changes were largely due to changes in sales in the wholesale energy markets operated by MISO and PJM. These changes are impacted by several factors including the availability and dispatch of Alliant Energy's EGUs and electricity demand within these wholesale energy markets. Changes in bulk power and other sales revenues were largely offset by changes in fuel-related costs, and therefore, did not have a significant impact on electric margins.

Refer to Note 2 for discussion of IPL's electric tax benefit rider and a fuel reconciliation application WPL filed with the PSCW in March 2015.

Table of Contents

Utility Gas Margins - Gas margins are defined as gas operating revenues less cost of gas sold. Management believes that gas margins provide a more meaningful basis for evaluating utility operations than gas operating revenues since cost of gas sold is generally passed through to customers, and therefore, results in changes to gas operating revenues that are comparable to changes in cost of gas sold.

First Quarter 2015 vs. First Quarter 2014 Summary - Gas margins and Dth sales for Alliant Energy for the three months ended March 31 were as follows:

	Revenues and Costs (dollars in millions)			Dths Sold (Dths in thousands)			
	2015	2014	Change	2015	2014	Change	
Residential	\$116.9	\$144.0	(19 %)	14,986	16,835	(11 %)	
Commercial	65.3	78.2	(16 %)	9,568	10,575	(10 %)	
Industrial	5.9	7.2	(18 %)	1,023	1,123	(9 %)	
Retail subtotal	188.1	229.4	(18 %)	25,577	28,533	(10 %)	
Transportation/other	10.3	11.3	(9 %)	22,587	18,028	25 %	
Total revenues/sales	198.4	240.7	(18 %)	48,164	46,561	3 %	
Cost of gas sold	130.8	161.9	(19 %)				
Gas margins (a)	\$67.6	\$78.8	(14 %)				

Includes \$3 million and \$3 million of credits on IPL's Iowa retail gas customers' bills for the first quarters of 2015 (a) and 2014, respectively, resulting from the gas tax benefit rider. The gas tax benefit rider results in reductions in gas revenues that are offset by reductions in income tax expense for the years ended December 31, 2015 and 2014.

Variances - Variances between periods in gas margins were as follows (in millions):

First Quarter 2015 vs. First Quarter 2014 Summary:	Alliant Energy	IPL	WPL
Estimated decrease from changes in sales caused by weather conditions	(\$6)	(\$3)	(\$3)
Lower revenues at IPL related to changes in recovery amounts for energy efficiency costs through the energy efficiency rider (a)	(6)	(6)	—
Lower revenues at WPL due to the impact of changes in retail gas base rates effective January 2015	(3)	—	(3)
Other	4	2	2
	(\$11)	(\$7)	(\$4)

(a) Changes in energy efficiency revenues were mostly offset by changes in energy efficiency expense included in other operation and maintenance expenses.

Weather Conditions - Estimated increases to gas margins from the impacts of weather for the three months ended March 31 were as follows (in millions):

	2015	2014	Change
IPL	\$1	\$4	(\$3)
WPL	2	5	(3)
Total Alliant Energy	\$3	\$9	(\$6)

Refer to "Utility Electric Margins" for HDD data details. Refer to Note 2 for discussion of IPL's gas tax benefit rider.

Utility Other Revenues - Variances between periods in utility other revenues were as follows (in millions):

First Quarter 2015 vs. First Quarter 2014 Summary:	Alliant Energy	IPL	WPL
--	----------------	-----	-----

Edgar Filing: ALLIANT ENERGY CORP - Form 10-Q

Lower margins from IPL's sharing mechanism related to optimizing gas capacity contracts (a)	(\$4)	(\$4)	\$—	
Other	(2)	—	(3)	
	(\$6)	(\$4)	(\$3)

40

Table of Contents

Approximately 50% of all margins earned from IPL's sharing mechanism relating to optimizing gas capacity contracts flow through the purchased gas adjustment clause to reduce retail gas customer bills in Iowa. The remaining margins are retained by IPL and recorded in utility other revenues. Due to the extreme cold temperatures causing natural gas price fluctuations in the first quarter of 2014, margins were higher than normal in 2014.

Electric Transmission Service Expense - Variances between periods in electric transmission service expense were as follows (in millions):

First Quarter 2015 vs. First Quarter 2014 Summary:	Alliant Energy	IPL	WPL
Higher electric transmission service costs billed from ITC, ATC and MISO (a)	\$6	\$3	\$3
Escrow treatment for the difference between actual electric transmission service costs and those costs used to determine rates during 2015 at WPL (b)	6	—	6
Changes in the under-/over-collection of electric transmission service expense through the transmission cost rider at IPL (c)	(3) (3) —
	\$9	\$—	\$9

(a) Primarily due to increased electric transmission service rates.

Electric revenues established in WPL's retail electric rate case (2015/2016 Test Period) included recovery of expected increases in electric transmission service expense largely due to SSR costs expected to be incurred. Due to a revision in MISO's method utilized to allocate SSR costs, WPL no longer expects to incur certain SSR costs.

(b) The difference between actual electric transmission service expense incurred and amounts collected from customers as electric revenues in 2015 and 2016 will be recorded as electric transmission service expense with an offsetting amount recorded to regulatory liabilities due to the escrow treatment WPL received as part of its approved retail electric rate case.

IPL is currently recovering the Iowa retail portion of its increased electric transmission service costs from its retail electric customers in Iowa through a transmission cost rider approved by the IUB in January 2011 and extended as part of the rate settlement approved in September 2014. The difference between electric transmission services expense and amounts collected from customers as electric revenues results in temporary costs (credits) recorded in electric transmission service expense until the amounts are reflected in future customer billings.

Utility Other Operation and Maintenance Expenses - Variances between periods in utility other operation and maintenance expenses were as follows (in millions):

First Quarter 2015 vs. First Quarter 2014 Summary:	Alliant Energy	IPL	WPL
Lower energy efficiency cost recovery amortizations at WPL (a)	(\$10) \$—	(\$10
Lower energy efficiency expense at IPL (b)	(4) (4) —
Higher employee benefits-related expense (c)	3	1	2
Other	(3) (2) (2
	(\$14) (\$5) (\$10

(a) The July 2012 PSCW order for WPL's 2013/2014 test period electric and gas base rate case authorized lower energy efficiency cost recovery amortizations for 2015.

(b) Changes in energy efficiency expense were offset by changes in electric and gas energy efficiency revenues.

Primarily due to an increase in retirement plans costs and other employee benefits-related costs. The increased retirement plan costs were largely due to decreases in discount rates and a change to the life expectancy assumption in 2014.

Depreciation and Amortization Expenses - Depreciation and amortization expenses increased \$5 million for the three-month period primarily due to increased property additions, including various emission controls projects at IPL

and WPL placed in service in 2014.

Equity Income from Unconsolidated Investments, Net - Equity income from unconsolidated investments decreased \$5 million for the three-month period primarily due to reserves for rate refunds recorded in the first quarter of 2015 at ATC. Refer to “Other Future Considerations” for discussion of a complaint pending with FERC regarding the level of return on equity that MISO transmission owners (including ATC) should be allowed to utilize in calculating the rates they charge their customers.

Table of Contents

Income Taxes - Refer to Note 8 for details of effective income tax rates for continuing operations, including discussion of the impacts of tax benefit riders, production tax credits and the effect of rate-making on property-related differences.

IPL'S RESULTS OF OPERATIONS

Overview - First Quarter Results - Earnings available for common stock increased \$4 million primarily due to purchased electric capacity expense related to the previous DAEC PPA in the first quarter of 2014. This item was partially offset by lower electric and gas sales and retail electric customer billing credits in the first quarter of 2015.

Electric Margins -

First Quarter 2015 vs. First Quarter 2014 Summary - Electric margins and MWh sales for IPL for the three months ended March 31 were as follows:

	Revenues and Costs (dollars in millions)			MWhs Sold (MWhs in thousands)				
	2015	2014	Change	2015	2014	Change		
Residential	\$143.1	\$150.5	(5 %)	1,131	1,234	(8 %)		
Commercial	96.5	100.0	(4 %)	1,019	1,046	(3 %)		
Industrial	105.0	107.6	(2 %)	1,733	1,710	1 %		
Retail subtotal	344.6	358.1	(4 %)	3,883	3,990	(3 %)		
Sales for resale:								
Wholesale	7.6	7.7	(1 %)	119	121	(2 %)		
Bulk power and other	2.5	0.2	1,150 %	124	5	2,380 %		
Other	7.9	8.2	(4 %)	19	22	(14 %)		
Total revenues/sales	362.6	374.2	(3 %)	4,145	4,138	— %		
Electric production fuel expense	63.5	66.2	(4 %)					
Energy purchases expense	46.6	49.0	(5 %)					
Purchased electric capacity expense	—	24.8	(100 %)					
Electric margins (a)	\$252.5	\$234.2	8 %					

(a) Includes \$18 million and \$23 million of credits on IPL's Iowa retail electric customers' bills for the first quarters of 2015 and 2014, respectively, resulting from the electric tax benefit rider. The electric tax benefit rider results in reductions in electric revenues that are offset by reductions in income tax expense for the years ended December 31, 2015 and 2014.

Variances - Electric margins increased \$18 million for the three-month period. Refer to "Alliant Energy's Results of Operations - Utility Electric Margins" for details of IPL's electric margins variances.

Refer to "Alliant Energy's Results of Operations - Utility Electric Margins" for details of the definition of electric margin, impacts of weather conditions on IPL's electric sales and HDD data in IPL's service territory. Refer to Note 2 for discussions of the electric tax benefit rider and billing credits which began in May 2014 related to the approved settlement agreement for IPL's Iowa retail electric rates.

Gas Margins -

First Quarter 2015 vs. First Quarter 2014 Summary - Gas margins and Dth sales for IPL for the three months ended March 31 were as follows:

	Revenues and Costs (dollars in millions)			Dths Sold (Dths in thousands)		
	2015	2014	Change	2015	2014	Change

Edgar Filing: ALLIANT ENERGY CORP - Form 10-Q

Residential	\$65.1	\$81.3	(20	%)	8,390	9,518	(12	%)
Commercial	35.7	42.5	(16	%)	5,148	5,730	(10	%)
Industrial	3.9	4.6	(15	%)	701	733	(4	%)
Retail subtotal	104.7	128.4	(18	%)	14,239	15,981	(11	%)
Transportation/other	6.5	7.3	(11	%)	10,017	8,699	15	%)
Total revenues/sales	111.2	135.7	(18	%)	24,256	24,680	(2	%)
Cost of gas sold	71.0	88.1	(19	%)				
Gas margins (a)	\$40.2	\$47.6	(16	%)				

42

Table of Contents

Includes \$3 million and \$3 million of credits on IPL's Iowa retail gas customers' bills for the first quarters of 2015 (a) and 2014, respectively, resulting from the gas tax benefit rider. The gas tax benefit rider results in reductions in gas revenues that are offset by reductions in income tax expense for the years ended December 31, 2015 and 2014.

Variations - Gas margins decreased \$7 million during the three-month period. Refer to "Alliant Energy's Results of Operations - Utility Gas Margins" for details of IPL's gas margins variations.

Refer to "Alliant Energy's Results of Operations - Utility Gas Margins" for details of the definition of gas margins and the impacts of weather conditions on IPL's gas sales. Refer to Note 2 for discussion of the gas tax benefit rider.

Steam and Other Revenues - Steam and other revenues decreased \$4 million for the three-month period. Refer to "Alliant Energy's Results of Operations - Utility Other Revenues" for IPL's steam and other revenues variations.

Other Operation and Maintenance Expenses - Other operation and maintenance expenses decreased \$5 million for the three-month period. Refer to "Alliant Energy's Results of Operations - Utility Other Operation and Maintenance Expenses" for IPL's other operation and maintenance expenses variations.

Income Taxes - Refer to Note 8 for details of effective income tax rates, including discussion of the impacts of tax benefit riders, production tax credits and the effect of rate-making on property-related differences.

WPL'S RESULTS OF OPERATIONS

Overview - First Quarter Results - WPL's earnings available for common stock decreased \$10 million primarily due to lower electric and gas sales, higher electric transmission service expense and lower equity income from its ATC investment during the first quarter of 2015. These items were partially offset by lower energy efficiency cost recovery amortizations and lower electric fuel-related costs during the first quarter of 2015.

Electric Margins -

First Quarter 2015 vs. First Quarter 2014 Summary - Electric margins and MWh sales for WPL for the three months ended March 31 were as follows:

	Revenues and Costs (dollars in millions)			MWhs Sold (MWhs in thousands)		
	2015	2014	Change	2015	2014	Change
Residential	\$114.2	\$117.7	(3 %)	921	990	(7 %)
Commercial	58.7	61.0	(4 %)	577	608	(5 %)
Industrial	82.2	77.7	6 %	1,127	1,114	1 %
Retail subtotal	255.1	256.4	(1 %)	2,625	2,712	(3 %)
Sales for resale:						
Wholesale	44.4	45.8	(3 %)	745	815	(9 %)
Bulk power and other	5.7	(4.3)) 233 %	294	85	246 %
Other	3.5	3.7	(5 %)	18	20	(10 %)
Total revenues/sales	308.7	301.6	2 %	3,682	3,632	1 %
Electric production fuel expense	73.3	62.9	17 %			
Energy purchases expense	32.3	35.8	(10 %)			
Purchased electric capacity expense	0.2	—	100 %			
Electric margins	\$202.9	\$202.9	— %			

Variances - Electric margins remained flat for the three-month period. Refer to “Alliant Energy’s Results of Operations - Utility Electric Margins” for details of WPL’s electric margins variances.

Refer to “Alliant Energy’s Results of Operations - Utility Electric Margins” for details of the definition of electric margin, impacts of weather conditions on WPL’s electric sales and HDD data in WPL’s service territory. Refer to Note 2 for discussion of a fuel reconciliation application WPL filed with the PSCW in March 2015.

Table of Contents

Gas Margins -

First Quarter 2015 vs. First Quarter 2014 Summary - Gas margins and Dth sales for WPL for the three months ended March 31 were as follows:

	Revenues and Costs (dollars in millions)			Dths Sold (Dths in thousands)		
	2015	2014	Change	2015	2014	Change
Residential	\$51.8	\$62.7	(17 %)	6,596	7,317	(10 %)
Commercial	29.6	35.7	(17 %)	4,420	4,845	(9 %)
Industrial	2.0	2.6	(23 %)	322	390	(17 %)
Retail subtotal	83.4	101.0	(17 %)	11,338	12,552	(10 %)
Transportation/other	3.8	4.0	(5 %)	12,570	9,329	35 %
Total revenues/sales	87.2	105.0	(17 %)	23,908	21,881	9 %
Cost of gas sold	59.8	73.8	(19 %)			
Gas margins	\$27.4	\$31.2	(12 %)			

Variances - Gas margins decreased \$4 million for the three-month period. Refer to “Alliant Energy’s Results of Operations - Utility Gas Margins” for details of WPL’s gas margins variances.

Refer to “Alliant Energy’s Results of Operations - Utility Gas Margins” for details of the definition of gas margin and the impacts of weather conditions on WPL’s gas sales.

Electric Transmission Service Expense - Electric transmission service expense increased \$9 million for the three-month period. Refer to “Alliant Energy’s Results of Operations - Electric Transmission Service Expense” for WPL’s electric transmission service expense variances.

Other Operation and Maintenance Expenses - Other operation and maintenance expenses decreased \$10 million for the three-month period. Refer to “Alliant Energy’s Results of Operations - Utility Other Operation and Maintenance Expenses” for WPL’s other operation and maintenance expenses variances.

Equity Income from Unconsolidated Investments - Equity income from unconsolidated investments decreased \$4 million for the three-month period primarily due to reserves for rate refunds recorded in the first quarter of 2015 at ATC. Refer to “Other Future Considerations” for discussion of a complaint pending with FERC regarding the level of return on equity that MISO transmission owners (including ATC) should be allowed to utilize in calculating the rates they charge their customers.

Income Taxes - Refer to Note 8 for details of effective income tax rates, including discussion of the impacts of production tax credits.

LIQUIDITY AND CAPITAL RESOURCES

A liquidity and capital resources matters summary is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K, except as described below.

Liquidity Position - At March 31, 2015, Alliant Energy had \$98 million of cash and cash equivalents, \$959 million (\$259 million at the parent company, \$300 million at IPL and \$400 million at WPL) of available capacity under the revolving credit facilities and \$106 million of available capacity at IPL under its sales of accounts receivable program.

Capital Structures - Capital structures at March 31, 2015 were as follows (dollars in millions):

Alliant Energy	IPL	WPL
----------------	-----	-----

Edgar Filing: ALLIANT ENERGY CORP - Form 10-Q

	(Consolidated)								
Common equity	\$3,597.1	47	%	\$1,826.9	48	%	\$1,716.6	52	%
Preferred stock	200.0	3	%	200.0	5	%	—	—	%

Table of Contents

Cash Flows - Selected information from the cash flows statements was as follows (in millions):

	Alliant Energy		IPL		WPL	
	2015	2014	2015	2014	2015	2014
Cash and cash equivalents, January 1	\$56.9	\$9.8	\$5.3	\$4.4	\$46.7	\$0.5
Cash flows from (used for):						
Operating activities	314.7	293.6	170.1	105.6	157.8	128.7
Investing activities	(250.9)	(176.8)	(156.3)	(96.6)	(78.4)	(70.5)
Financing activities	(23.1)	(112.1)	(16.5)	(7.6)	(35.2)	(53.8)
Net increase (decrease)	40.7	4.7	(2.7)	1.4	44.2	4.4
Cash and cash equivalents, March 31	\$97.6	\$14.5	\$2.6	\$5.8	\$90.9	\$4.9

Operating Activities -

Three Months Ended March 31, 2015 vs. Three Months Ended March 31, 2014 - Alliant Energy's cash flows from operating activities increased \$21 million primarily due to \$25 million of purchased electric capacity payments during the three months ended March 31, 2014 related to the previous DAEC PPA, higher cash flows from changes in inventory levels of gas stored underground, higher cash flows from lower fuel-related costs at WPL during the three months ended March 31, 2015 compared to the same period in 2014, and the timing of electric fuel-related, natural gas and transmission cost recoveries at IPL. These items were partially offset by the final receipt of \$26 million related to Alliant Energy's tax separation and indemnification agreement with Whiting Petroleum in March 2014. Refer to Note 4(b) for discussion of the tax separation and indemnification agreement with Whiting Petroleum.

IPL's cash flows from operating activities increased \$65 million primarily due to \$25 million of purchased electric capacity payments during the three months ended March 31, 2014 related to the previous DAEC PPA, the timing of electric fuel-related, natural gas and transmission cost recoveries, and higher cash flows from changes in inventory levels of gas stored underground.

WPL's cash flows from operating activities increased \$29 million primarily due to higher cash flows from lower fuel-related costs during the three months ended March 31, 2015 compared to the same period in 2014 and higher cash flows from changes in inventory levels of gas stored underground.

Investing Activities -

Three Months Ended March 31, 2015 vs. Three Months Ended March 31, 2014 - Alliant Energy's cash flows used for investing activities increased \$74 million primarily due to \$67 million of higher utility construction expenditures. The higher utility construction expenditures were largely due to higher expenditures during the three months ended March 31, 2015 for Marshalltown and emission controls projects at WPL's Edgewater Unit 5 and IPL's Lansing Unit 4.

IPL's cash flows used for investing activities increased \$60 million due to \$60 million of higher construction expenditures. The higher construction expenditures were largely due to higher expenditures during the three months ended March 31, 2015 for Marshalltown and an emission controls project at Lansing Unit 4.

WPL's cash flows used for investing activities increased \$8 million due to \$8 million of higher construction expenditures. The higher construction expenditures were largely due to higher expenditures during the three months ended March 31, 2015 for an emission controls project at Edgewater Unit 5.

Financing Activities -

Three Months Ended March 31, 2015 vs. Three Months Ended March 31, 2014 - Alliant Energy's cash flows used for financing activities decreased \$89 million primarily due to \$122 million of net proceeds from common stock issuances during the three months ended March 31, 2015, partially offset by net changes in the amount of commercial paper

outstanding.

IPL's cash flows used for financing activities increased \$9 million primarily due to \$30 million of capital contributions from its parent company during the three months ended March 31, 2014, partially offset by changes in outstanding checks that have not yet cleared the bank.

WPL's cash flows used for financing activities decreased \$19 million primarily due to changes in the amount of commercial paper outstanding.

Table of Contents

Common Stock Issuances - Refer to Note 6 for discussion of common stock issuances by Alliant Energy and payments of common stock dividends by IPL and WPL to their parent company during the three months ended March 31, 2015. Refer to Note 9(b) for discussion of Alliant Energy's common stock issuances during the three months ended March 31, 2015 under its equity-based compensation plans for employees.

Off-Balance Sheet Arrangements - A summary of Alliant Energy's off-balance sheet arrangements is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K, except as described below. Refer to Note 4(a) for information regarding IPL's sales of accounts receivable program. Refer to Note 13(d) for information regarding various guarantees and indemnifications related to Alliant Energy's prior divestiture activities.

Certain Financial Commitments -

Contractual Obligations - A summary of Alliant Energy's, IPL's and WPL's contractual obligations is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K, except for the items described in Notes 13(a) and 13(b).

OTHER MATTERS

Market Risk Sensitive Instruments and Positions - A summary of market risks is included in the 2014 Form 10-K and such market risks have not changed materially from those reported in the 2014 Form 10-K, except as described below.

Commodity Price - Refer to Note 2 for discussion of amounts recorded by Alliant Energy and WPL on their balance sheets as of March 31, 2015 for fuel-related costs incurred by WPL during 2014 that were outside the approved bandwidth for 2014, as well as a fuel reconciliation application WPL filed with the PSCW in March 2015 to seek recovery of these deferred fuel-related costs.

New Accounting Pronouncements - Refer to Note 1(b) for discussion of new accounting pronouncements impacting Alliant Energy, IPL and WPL.

Critical Accounting Policies and Estimates - A summary of critical accounting policies and estimates is included in the 2014 Form 10-K and such policies and estimates have not changed materially from those reported in the 2014 Form 10-K.

Other Future Considerations - A summary of other future considerations is included in the 2014 Form 10-K and has not changed materially from the items reported in the 2014 Form 10-K except as described below, and as discussed earlier in MDA, the Notes in Item 1 and "Risk Factors" in Item 1A.

Electric Transmission Service Expense -

MISO Transmission Owner Return on Equity Complaint - In 2013, a group of MISO industrial customer organizations filed a complaint with FERC requesting to reduce the base return on equity used by MISO transmission owners, including ITC and ATC, among other items. ITC's and ATC's current authorized return on equity is 12.38% and 12.2%, respectively. In 2014, FERC issued an order on the complaint against the MISO transmission owners, established hearing and settlement procedures on the return on equity component of the complaint, and established a refund period back to November 12, 2013. Through April 2015, various parties to the proceeding have filed testimony with FERC identifying base return on equity ranges with stated midpoints between 8.58% and 11.39%, excluding any incentive adders granted by FERC. A final decision from FERC on the complaint is currently expected in 2016.

Based on other recent FERC return on equity decisions, Alliant Energy, IPL and WPL currently anticipate FERC's decision on the MISO transmission owner complaint will reduce transmission owners' current return on equity, which is expected to reduce electric transmission service expense costs billed by ITC and ATC to their customers and result in lower equity income and dividends from ATC in the future. Alliant Energy and WPL have realized \$6 million of reductions in the amount of equity income from ATC for the period from November 12, 2013 through March 31, 2015, including \$3 million of reductions recorded in the first quarter of 2015. The amounts were recorded assuming the final base return on equity awarded to MISO transmission owners will be toward the top end of the midpoints included in the testimony filed by the various parties to the MISO complaint. Alliant Energy and WPL currently estimate each 25 basis point reduction in ATC's authorized return on equity would reduce their annual pre-tax equity income from ATC by approximately \$1 million.

Table of Contents

ITC Request for Equity Adder - In January 2015, ITC requested approval from FERC to implement a 100 basis point incentive adder to its base return on equity for being an independent transmission company. In March 2015, FERC issued an order granting a 50 basis point incentive adder to ITC's base return on equity for being an independent transmission company. The implementation of the adder will be retroactively applied back to April 2015 after resolution of a MISO transmission owner return on equity complaint filed in 2013 by a group of MISO industrial customer organizations. Alliant Energy and IPL are currently unable to determine any resulting changes to future electric transmission service charges pending a decision by FERC on the 2013 complaint.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Quantitative and Qualitative Disclosures About Market Risk are reported in "Other Matters - Market Risk Sensitive Instruments and Positions" in MDA.

ITEM 4. CONTROLS AND PROCEDURES

Alliant Energy's, IPL's and WPL's management evaluated, with the participation of each of Alliant Energy's, IPL's and WPL's CEO, CFO and Disclosure Committee, the effectiveness of the design and operation of Alliant Energy's, IPL's and WPL's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934) as of March 31, 2015 pursuant to the requirements of the Securities Exchange Act of 1934. Based on their evaluation, the CEO and the CFO concluded that Alliant Energy's, IPL's and WPL's disclosure controls and procedures were effective as of March 31, 2015.

There was no change in Alliant Energy's, IPL's and WPL's internal control over financial reporting that occurred during the quarter ended March 31, 2015 that has materially affected, or is reasonably likely to materially affect, Alliant Energy's, IPL's or WPL's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1A. RISK FACTORS

A summary of risk factors is included in Item 1A in the 2014 Form 10-K and such risk factors have not changed materially from the items reported in the 2014 Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

A summary of Alliant Energy common stock repurchases for the quarter ended March 31, 2015 was as follows:

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plan (a)
January 1 through January 31	2,226	\$68.32	—	N/A
February 1 through February 28	24,490	64.96	—	N/A
March 1 through March 31	583	60.93	—	N/A
	27,299	65.15	—	

(a)

Includes 2,226, 2,027 and 583 shares of Alliant Energy common stock for January 1 through January 31, February 1 through February 28 and March 1 through March 31, respectively, purchased on the open market and held in a rabbi trust under the Alliant Energy Deferred Compensation Plan. There is no limit on the number of shares of Alliant Energy common stock that may be held under the Deferred Compensation Plan, which currently does not have an expiration date. Also includes 22,463 shares of Alliant Energy common stock for February 1 through February 28 transferred from employees to Alliant Energy to satisfy tax withholding requirements in connection with the vesting of certain restricted stock under equity-based compensation plans.

Refer to Note 6 for discussion of restrictions on each of IPL's and WPL's distributions to its parent company.

ITEM 6. EXHIBITS

Exhibits for Alliant Energy, IPL and WPL are listed in the Exhibit Index, which is incorporated herein by reference.
