February 01, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended December 29, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-5129

INC.
(Exact name of registrant as specified in its charter)

New York State (State or other jurisdiction of incorporation or organization)	16-0757636 (I.R.S. Employer Identification No.)
East Aurora, New York (Address of principal executive offices)	14052-0018 (Zip Code)
Telephone number including area code: (716) 652-2000	

Former name, former address and former fiscal year, if changed since last report.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: MOOG INC - Form 10-Q

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The number of shares outstanding of each class of common stock as of January 28, 2013 was:

Class A common stock, \$1.00 par value, 41,436,698 shares

Class B common stock, \$1.00 par value, 3,889,073 shares

Notes to Consolidated Condensed Financial Statements

Three Months Ended December 29, 2012

(Unaudited)

(dollars in thousands, except per share data)

Note 1 - Basis of Presentation

The accompanying unaudited consolidated condensed financial statements have been prepared by management in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments consisting of normal recurring adjustments considered necessary for the fair presentation of results for the interim period have been included. The results of operations for the three months ended December 29, 2012 are not necessarily indicative of the results expected for the full year. The accompanying unaudited consolidated condensed financial statements should be read in conjunction with the financial statements and notes thereto included in our Form 10-K for the fiscal year ended September 29, 2012. All references to years in these financial statements are to fiscal years.

Note 2 - Acquisitions

In 2012, we completed four business combinations. Two of these business combinations were in our Components segment. We acquired Protokraft, LLC, based in Tennessee, for \$12,500 in cash plus contingent consideration with an initial fair value of \$4,809. Protokraft designs and manufactures opto-electronic transceivers, ethernet switches and media converters packaged into rugged, environmentally-sealed connectors. We also acquired Tritech International Limited, based in the U.K., for \$34,267, net of cash acquired, which includes a working capital adjustment of \$1,346 paid in 2013. Tritech is a leading designer and manufacturer of high performance acoustic sensors, sonars, video cameras and mechanical tooling equipment. We also completed two business combinations in our Space and Defense Controls segment. We acquired Bradford Engineering, based in The Netherlands, for \$13,173, net of cash acquired. Bradford is a developer and manufacturer of satellite equipment including attitude control, propulsion and thermal control subsystems. We also acquired In-Space Propulsion for \$45,495, net of cash acquired. In-Space Propulsion has locations in New York, California, Ireland and the United Kingdom and is a developer and manufacturer of liquid propulsion systems and components for satellites and missile defense systems.

Note 3 - Receivables

We securitize certain trade receivables in transactions that are accounted for as secured borrowings (Securitization Program). We maintain a subordinated interest in a portion of the pool of trade receivables that are securitized. The retained interest, which is included in Receivables in the consolidated condensed balance sheets, is recorded at fair value, which approximates the total amount of the designated pool of accounts receivable. Refer to Note 6, Indebtedness, for additional disclosures related to the Securitization Program.

Note 4 - Inventories

Inventories, net of reserves, consist of:

	December 29, 2012	September 29, 2012
Raw materials and purchased parts	\$192,440	\$188,643
Work in progress	289,310	283,122
Finished goods	69,950	66,497
Total	\$551,700	\$538,262

Note 5 - Goodwill and Intangible Assets

The changes in the carrying amount of goodwill are as follows:

	Balance as of September 29, 2012	Adjustment To Prior Year Acquisitions	Foreign Currency Translation	Balance as of December 29, 2012
Aircraft Controls	\$192,386	\$—	\$77	\$192,463
Space and Defense Controls	130,715	2,418	355	133,488
Industrial Systems	119,575	—	1,088	120,663
Components	194,464	(366)	(362)	193,736
Medical Devices	125,714	—	325	126,039
Total	\$762,854	\$2,052	\$1,483	\$766,389

The components of acquired intangible assets are as follows:

		December 29, 2012		September 29, 2012	
	Weighted - Average Life (years)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer-related	10	\$180,845	\$(85,528)	\$179,383	\$(80,953)
Program-related	18	79,679	(15,230)	79,631	(13,976)
Technology-related	9	68,138	(37,393)	67,969	(35,676)
Marketing-related	9	29,388	(16,737)	29,327	(16,145)
Acquired intangible assets	12	\$358,050	\$(154,888)	\$356,310	\$(146,750)

Customer-related intangible assets primarily consist of customer relationships. Program-related intangible assets consist of long-term programs represented by current contracts and probable follow on work. Technology-related intangible assets primarily consist of technology, patents, intellectual property and software. Marketing-related intangible assets primarily consist of trademarks, trade names and non-compete agreements.

Amortization of acquired intangible assets was \$7,741 for the three months ended December 29, 2012 and \$7,671 for the three months ended December 31, 2011. Based on acquired intangible assets recorded at December 29, 2012, amortization is expected to be approximately \$29,678 in 2013, \$26,497 in 2014, \$23,455 in 2015, \$21,951 in 2016 and \$18,578 in 2017.

We have \$5,116 and \$5,113 of identifiable assets with indefinite lives in marketing-related intangibles at December 29, 2012 and September 29, 2012, respectively.

Note 6 - Indebtedness

Short-term borrowings consist of:

	December 29, 2012	September 29, 2012
Securitization program	\$69,400	\$81,800
Lines of credit	8,137	8,974
Short-term borrowings	\$77,537	\$90,774

The Securitization Program matures on March 4, 2013 and effectively increases our borrowing capacity by up to \$100,000. Under the Securitization Program, we sell certain trade receivables and related rights to an affiliate, which in turn sells an undivided variable percentage ownership interest in the trade receivables to a financial institution, while maintaining a subordinated interest in a portion of the pool of trade receivables. The Securitization Program can be extended by agreement of the parties thereto for successive 364-day terms. Interest for the Securitization Program is based on prevailing market rates for short-term commercial paper plus an applicable margin. A commitment fee is also charged based on a percentage of the unused amounts available and is not material. The agreement governing the Securitization Program contains restrictions and covenants which include limitations on the making of certain restricted payments, creation of certain liens, and certain corporate acts such as mergers, consolidations and sale of substantially all assets.

In addition to the Securitization Program, we maintain short-term credit facilities with banks throughout the world that are principally demand lines subject to revision by the banks.

On January 15, 2013, we repurchased at par our 6¼% senior subordinated notes due on January 15, 2015, pursuant to an early redemption right. We redeemed the aggregate principal amount of \$200,000 using proceeds drawn from our U.S. revolving credit facility.

Note 7 - Product Warranties

In the ordinary course of business, we warrant our products against defects in design, materials and workmanship typically over periods ranging from twelve to sixty months. We determine warranty reserves needed by product line based on historical experience and current facts and circumstances. Activity in the warranty accrual is summarized as follows:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Warranty accrual at beginning of period	\$18,859	\$19,247
Warranties issued during current period	2,040	1,760
Adjustments to pre-existing warranties	(566)	26
Reductions for settling warranties	(2,321)	(2,359)
Foreign currency translation	28	(122)
Warranty accrual at end of period	\$18,040	\$18,552

Note 8 - Derivative Financial Instruments

We principally use derivative financial instruments to manage foreign exchange risk related to foreign operations and foreign currency transactions and interest rate risk associated with long-term debt. We enter into derivative financial instruments with a number of major financial institutions to minimize counterparty credit risk.

Derivatives designated as hedging instruments

We use foreign currency forward contracts as cash flow hedges to effectively fix the exchange rates on future payments. To mitigate exposure in movements between various currencies, primarily the Philippine peso, we had outstanding foreign currency forwards with notional amounts of \$27,537 at December 29, 2012. These contracts mature at various times through the third quarter of 2014.

Interest rate swaps are used to adjust the proportion of total debt that is subject to variable and fixed interest rates. The interest rate swaps are designated as hedges of the amount of future cash flows related to interest payments on variable-rate debt that, in combination with the interest payments on the debt, convert a portion of the variable-rate debt to fixed-rate debt. There were no outstanding interest rate swaps at December 29, 2012.

These foreign currency forwards and interest rate swaps are recorded in the consolidated condensed balance sheets at fair value and the related gains or losses are deferred in shareholders' equity as a component of Accumulated Other Comprehensive Income (Loss) (AOCI). These deferred gains and losses are reclassified into expense during the periods in which the related payments or receipts affect earnings. However, to the extent the interest rate swaps and foreign currency forwards are not perfectly effective in offsetting the change in the value of the payments being hedged, the ineffective portion of these contracts is recognized in earnings immediately. Ineffectiveness was not material in the first three months of 2013 or 2012.

Activity in AOCI related to these derivatives is summarized below:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Balance at beginning of period	\$220	\$(165)
Net deferral in AOCI of derivatives:		
Net increase (decrease) in fair value of derivatives	678	(231)
Tax effect	(236)	75)
	442	(156)
Net reclassification from AOCI into earnings:		
Reclassification from AOCI into earnings	(222)	(93)
Tax effect	102	35)
	(120)	(58)
Balance at end of period	\$542	\$(379)

Activity and classification of derivatives are as follows:

		Net deferral in AOCI of derivatives - effective portion	
		Three Months Ended	
	Statement of earnings classification	December 29, 2012	December 31, 2011
Foreign currency forwards	Cost of sales	\$678	\$(231)
Net gain (loss)		\$678	\$(231)
		Net reclassification from AOCI into earnings - effective portion	
		Three Months Ended	
	Statement of earnings classification	December 29, 2012	December 31, 2011
Interest rate swaps	Interest expense	\$—	\$(67)
Foreign currency forwards	Cost of sales	222	160
Net gain		\$222	\$93

Derivatives not designated as hedging instruments

We also have foreign currency exposure on intercompany balances that are denominated in a foreign currency and are adjusted to current values using period-end exchange rates. The resulting gains or losses are recorded in the statements of earnings. To minimize foreign currency exposure, we had foreign currency forwards with notional amounts of \$205,739 at December 29, 2012. The foreign currency forwards are recorded in the consolidated condensed balance sheets at fair value and resulting gains or losses are recorded in the consolidated condensed statements of earnings. We recorded the following gains or losses on foreign currency forwards which are included in other income or expense and generally offset the gains or losses from the foreign currency adjustments on the intercompany balances that are also included in other income or expense:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Net gain (loss)	\$922	\$(1,382)

Summary of derivatives

The fair value and classification of derivatives is summarized as follows:

		December 29, 2012	September 29, 2012
Derivatives designated as hedging instruments:			
Foreign currency forwards	Other current assets	\$775	\$467
Foreign currency forwards	Other assets	58	32
	Total assets	\$833	\$499
Foreign currency forwards	Other accrued liabilities	\$22	\$41
Foreign currency forwards	Other long-term liabilities	6	40
	Total liabilities	\$28	\$81
Derivatives not designated as hedging instruments:			
Foreign currency forwards	Other current assets	\$1,318	\$1,456
	Total assets	\$1,318	\$1,456
Foreign currency forwards	Other accrued liabilities	\$1,151	\$2,549
	Total liabilities	\$1,151	\$2,549

Note 9 - Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, various techniques and assumptions can be used to estimate fair value. The definition of the fair value hierarchy is as follows:

Level 1 – Quoted prices in active markets for identical assets and liabilities.

Level 2 – Observable inputs other than quoted prices in active markets for similar assets and liabilities.

Level 3 – Inputs for which significant valuation assumptions are unobservable in a market and therefore value is based on the best available data, some of which is internally developed and considers risk premiums that a market participant would require.

Our derivatives are valued using various pricing models or discounted cash flow analyses that incorporate observable market data, such as interest rate yield curves and currency rates, and are classified as Level 2 within the valuation hierarchy. Our Level 3 fair value liabilities represent contingent consideration recorded for acquisitions to be paid if various financial targets are met. The amounts recorded were calculated for each payment scenario in each period using an estimate of the probability of the future cash outflows. The varying contingent payments were then discounted to the present value at the weighted average cost of capital. Fair value is assessed on a quarterly basis, or whenever events or circumstances change that indicates an adjustment is required. The assessment includes an evaluation of the performance of the acquired business compared to previous expectations, changes to future projections and the probability of achieving the earn out targets.

The following table presents the fair values and classification of our financial assets and liabilities measured on a recurring basis as of December 29, 2012:

	Classification	Level 1	Level 2	Level 3	Total
Foreign currency forwards	Other current assets	\$—	\$2,093	\$—	\$2,093
Foreign currency forwards	Other assets	—	58	—	58
	Total assets	\$—	\$2,151	\$—	\$2,151
Foreign currency forwards	Other accrued liabilities	\$—	\$1,173	\$—	\$1,173
Foreign currency forwards	Other long-term liabilities	—	6	—	6
Acquisition contingent consideration	Other accrued liabilities	—	—	3,275	3,275
Acquisition contingent consideration	Other long-term liabilities	—	—	1,211	1,211
	Total liabilities	\$—	\$1,179	\$4,486	\$5,665

The changes in financial liabilities classified as Level 3 within the fair value hierarchy are as follows:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Balance at beginning of period	\$6,422	\$1,990
Increase in discounted future cash flows recorded as interest expense	97	44
Decrease in earn out provisions recorded as other income	(2,033)	(44)
Balance at end of period	\$4,486	\$1,990

Our only financial instrument for which the carrying value differs from its fair value is long-term debt. At December 29, 2012, the fair value of long-term debt was \$691,215 compared to its carrying value of \$681,636. The fair value of long-term debt is classified as Level 2 within the fair value hierarchy and was estimated based on quoted

market prices.

12

Note 10 - Employee Benefit Plans

Net periodic benefit costs for U.S. pension plans consist of:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Service cost	\$6,714	\$5,837
Interest cost	7,205	7,446
Expected return on plan assets	(10,335) (10,492
Amortization of prior service cost	2	2
Amortization of actuarial loss	6,901	4,256
Pension expense for defined benefit plans	10,487	7,049
Pension expense for defined contribution plans	2,393	2,047
Total pension expense for U.S. plans	\$12,880	\$9,096

Net periodic benefit costs for non-U.S. pension plans consist of:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Service cost	\$1,248	\$1,016
Interest cost	1,455	1,467
Expected return on plan assets	(959) (953
Amortization of prior service credit	(14) (16
Amortization of actuarial loss	407	218
Pension expense for defined benefit plans	2,137	1,732
Pension expense for defined contribution plans	1,350	1,198
Total pension expense for non-U.S. plans	\$3,487	\$2,930

Net periodic benefit costs for post-retirement health care benefit plan consists of:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Service cost	\$73	\$82
Interest cost	137	196
Amortization of transition obligation	90	99
Total periodic post-retirement benefit cost	\$300	\$377

Activity in AOCI related to U.S. pension plans, non-U.S. pension plans and post-retirement health care benefit plans is summarized below:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Balance at beginning of period	\$(280,424) \$(234,128
Net reclassification from AOCI into earnings:		
Reclassification from AOCI into earnings	7,272	4,388
Tax effect	(2,753) (1,698
	4,519	2,690
Balance at end of period	\$(275,905) \$(231,438

Actual contributions for the three months ended December 29, 2012 and anticipated additional 2013 contributions to our defined benefit pension plans are as follows:

	U.S. Plans	Non-U.S. Plans	Total
Actual	\$7,969	\$1,555	\$9,524
Anticipated	23,862	5,697	29,559
	\$31,831	\$7,252	\$39,083

Note 11 - Income Taxes

The effective tax rates for the three months ended December 29, 2012 and December 31, 2011 of 30.5% and 31.3%, respectively, are lower than would be expected by applying the U.S. federal statutory tax rate to earnings before income taxes primarily as a result of a significant portion of our earnings that come from foreign operations with lower tax rates.

Note 12 - Shareholders' Equity

The changes in shareholders' equity for the three months ended December 29, 2012 are summarized as follows:

	Amount	Number of Shares	
		Class A Common Stock	Class B Common Stock
COMMON STOCK			
Beginning of period	\$51,280	43,575,124	7,704,589
Conversion of Class B to Class A	—	10,500	(10,500)
End of Period	51,280	43,585,624	7,694,089
ADDITIONAL PAID-IN CAPITAL			
Beginning of period	421,969		
Equity-based compensation expense	3,891		
Issuance of treasury shares at more than cost	1,534		
Adjustment to market - SECT, and other	1,136		
End of period	428,530		
RETAINED EARNINGS			
Beginning of period	1,169,216		
Net earnings	34,118		
End of period	1,203,334		
TREASURY STOCK			
Beginning of period	(74,980)	(2,253,318)	(3,305,971)
Issuance of treasury shares	1,340	153,327	—
Purchase of treasury shares	(2,288)	(62,305)	—
End of period	(75,928)	(2,162,296)	(3,305,971)
STOCK EMPLOYEE COMPENSATION TRUST (SECT)			
Beginning of period	(15,984)		(418,317)
Issuance of shares	781		21,237
Purchase of shares	(504)		(13,686)
Adjustment to market - SECT	(1,032)		—
End of period	(16,739)	—	(410,766)
ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME			
Beginning of period	(246,711)		
Other comprehensive income	11,015		
End of period	(235,696)		
TOTAL SHAREHOLDERS' EQUITY	\$1,354,781	41,423,328	3,977,352

The components of accumulated other comprehensive loss, net of tax, are as follows:

	December 29, 2012	September 29, 2012
Accumulated foreign currency translation	\$39,667	\$33,493
Accumulated retirement liability	(275,905)	(280,424)
Accumulated gain on derivatives	542	220

Accumulated other comprehensive loss	\$ (235,696)	\$ (246,711)
--------------------------------------	-------------	---	-------------	---

15

Note 13 - Stock Employee Compensation Trust

The Stock Employee Compensation Trust (SECT) assists in administering and provides funding for equity-based compensation plans and benefit programs, including the Moog Inc. Retirement Savings Plan. The shares in the SECT are not considered outstanding for purposes of calculating earnings per share. However, in accordance with the trust agreement governing the SECT, the SECT trustee votes all shares held by the SECT on all matters submitted to shareholders.

Note 14 - Earnings per Share

Basic and diluted weighted-average shares outstanding are as follows:

	Three Months Ended	
	December 29, 2012	December 31, 2011
Weighted-average shares outstanding - Basic	45,353,332	45,211,734
Dilutive effect of equity-based awards	354,957	468,231
Weighted-average shares outstanding - Diluted	45,708,289	45,679,965

Note 15 - Segment Information

Below are sales and operating profit by segment for the three months ended December 29, 2012 and December 31, 2011 and a reconciliation of segment operating profit to earnings before income taxes. Operating profit is net sales less cost of sales and other operating expenses, excluding interest expense, equity-based compensation expense and other corporate expenses. Cost of sales and other operating expenses are directly identifiable to the respective segment or allocated on the basis of sales, number of employees or profit.

	Three Months Ended			
	December 29, 2012		December 31, 2011	
Net sales:				
Aircraft Controls	\$252,281		\$231,080	
Space and Defense Controls	86,465		88,394	
Industrial Systems	147,976		158,085	
Components	99,275		88,147	
Medical Devices	34,806		34,912	
Net sales	\$620,803		\$600,618	
Operating profit and margins:				
Aircraft Controls	\$31,075		\$24,827	
	12.3	%	10.7	%
Space and Defense Controls	8,228		12,743	
	9.5	%	14.4	%
Industrial Systems	9,047		15,826	
	6.1	%	10.0	%
Components	18,846		15,029	
	19.0	%	17.0	%
Medical Devices	1,602		1,598	
	4.6	%	4.6	%
Total operating profit	68,798		70,023	
	11.1	%	11.7	%
Deductions from operating profit:				
Interest expense	8,596		8,546	
Equity-based compensation expense	3,891		4,105	
Corporate expenses and other	7,240		4,423	
Earnings before income taxes	\$49,071		\$52,949	

Note 16 - Recent Accounting Pronouncements

In July 2012, the FASB issued ASU No. 2012-02, "Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment." The amendment provides an option to make a qualitative assessment about the likelihood that an indefinite-lived intangible asset is impaired to determine whether it is necessary to perform a quantitative impairment test. The amendment also enhances the consistency of impairment testing guidance by making impairment testing requirements for indefinite-lived intangible assets equivalent to that of other long-lived assets. The amendment is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. We adopted this amendment in the first quarter of 2013. The adoption of this standard did not have a material impact on our financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the Company's Annual Report filed on Form 10-K for the fiscal year ended September 29, 2012. All references to years in this Management's Discussion and Analysis of Financial Condition and Results of Operations are to fiscal years.

OVERVIEW

We are a worldwide designer, manufacturer and integrator of high performance precision motion and fluid controls and control systems for a broad range of applications in aerospace and defense and industrial markets. Within the aerospace and defense market, our products and systems include military and commercial aircraft flight controls, thrust vector controls for space launch vehicles, controls for gun aiming, stabilization and automatic ammunition loading for armored combat vehicles, satellite positioning controls and controls for steering tactical and strategic missiles. In the industrial market, our products are used in a wide range of applications including injection molding machines, metal forming, heavy industry, material and automotive testing, pilot training simulators, wind energy, enteral clinical nutrition pumps, infusion therapy pumps, oil exploration, motors used in sleep apnea devices, power generation, surveillance systems and slip rings used on CT scanners. We operate under five segments, Aircraft Controls, Space and Defense Controls, Industrial Systems, Components and Medical Devices. Our principal manufacturing facilities are located in the United States, the United Kingdom, the Philippines, Germany, China, India, Italy, The Netherlands, Japan, Costa Rica, Luxembourg, Ireland and Canada.

We have long-term contracts with some of our customers. These contracts are predominantly within Aircraft Controls and Space and Defense Controls and represent 32% of our sales. We recognize revenue on these contracts using the percentage of completion, cost-to-cost method of accounting as work progresses toward completion. The remainder of our sales are recognized when the risks and rewards of ownership and title to the product are transferred to the customer, principally as units are delivered or as service obligations are satisfied. This method of revenue recognition is predominantly used within the Industrial Systems, Components and Medical Devices segments, as well as with aftermarket activity.

We concentrate on providing our customers with products designed and manufactured to the highest quality standards. In achieving a leadership position in the high performance, precision controls market, we have capitalized on our strengths, which include:

- superior technical competence,
- customer diversity and broad product portfolio, and
- well-established international presence serving customers worldwide.

We intend to increase our revenue base and improve our profitability and cash flows from operations by building on our market leadership positions, by strengthening our niche market positions in the principal markets we serve and by extending our participation on the platforms we supply by providing more systems solutions. We also expect to maintain a balanced, diversified portfolio in terms of markets served, product applications, customer base and geographic presence. Our strategy to achieve our objectives includes:

- maintaining our technological excellence by building upon our systems integration capabilities while solving our customers' most demanding technical problems,
- striving for continuing cost improvements,
- taking advantage of our global capabilities,
- developing products for new and emerging markets,
- growing our profitable aftermarket business, and
- capitalizing on strategic acquisitions and opportunities.

We face numerous challenges to improve shareholder value. These include, but are not limited to, adjusting to dynamic global economic conditions that are influenced by governmental, industrial and commercial factors, pricing pressures from customers, strong competition, foreign currency fluctuations and increases in employee benefit costs.

We address these challenges by focusing on strategic revenue growth and by continuing to improve operating efficiencies through various process and manufacturing initiatives and using low cost manufacturing facilities without compromising quality. Based on periodic reviews of the financial outlook of the business, we may also engage in restructuring activities, including reducing overhead, consolidating facilities and exiting some product lines.

Acquisitions

All of our acquisitions are accounted for under the purchase method and, accordingly, the operating results for the acquired companies are included in the consolidated statements of earnings from the respective dates of acquisition. Under purchase accounting, we record assets and liabilities at fair value on the balance sheet. The purchase price described for each acquisition below is net of any cash acquired and includes debt issued or assumed.

In 2012, we completed four business combinations. Two of these business combinations were in our Components segment. We acquired Protokraft, LLC, based in Tennessee, for \$13 million plus contingent consideration with an initial fair value of \$5 million. Protokraft designs and manufactures opto-electronic transceivers, ethernet switches and media converters packaged into rugged, environmentally-sealed connectors. We also acquired Tritech International Limited, based in the U.K., for \$34 million, which includes a working capital adjustment of \$1 million paid in 2013. Tritech is a leading designer and manufacturer of high performance acoustic sensors, sonars, video cameras and mechanical tooling equipment. We also completed two business combinations in our Space and Defense Controls segment. We acquired Bradford Engineering, based in The Netherlands, for \$13 million. Bradford is a developer and manufacturer of satellite equipment including attitude control, propulsion and thermal control subsystems. We also acquired In-Space Propulsion for \$45 million. In-Space Propulsion has locations in New York, California, Ireland and the United Kingdom and is a developer and manufacturer of liquid propulsion systems and components for satellites and missile defense systems.

On December 31, 2012, we completed a business combination in our Space and Defense Controls segment by acquiring Broad Reach Engineering Company for \$48 million. The purchase price includes cash consideration of \$37 million, issuance of a \$6 million note payable and contingent consideration with a maximum potential earn out payment of \$5 million. Based in Colorado, Broad Reach Engineering Company is a leading designer and manufacturer of spaceflight electronics and software for aerospace, scientific, commercial and military missions. The company also provides ground testing, launch and on-orbit operations.

CRITICAL ACCOUNTING POLICIES

On an ongoing basis, we evaluate the critical accounting policies used to prepare our consolidated financial statements, including, but not limited to, revenue recognition on long-term contracts, reserves for inventory valuation, contract loss reserves, reviews for impairment of goodwill, purchase price allocations for business combinations, pension assumptions and deferred tax asset valuation allowances.

There have been no material changes in critical accounting policies in the current year from those disclosed in our 2012 Annual Report filed on Form 10-K.

CONSOLIDATED RESULTS OF OPERATIONS AND OUTLOOK

(dollars in millions, except per share data)	Three Months Ended		\$	%	%
	December 29, 2012	December 31, 2011			
Net sales	\$620.8	\$600.6	\$20.2	3	%
Gross margin	31.0	% 30.8	%		
Research and development expenses	\$32.3	\$29.2	\$3.1	11	%
Selling, general and administrative expenses as a percentage of sales	16.9	% 15.9	%		
Interest expense	\$8.6	\$8.5	\$0.1	1	%
Effective tax rate	30.5	% 31.3	%		
Net earnings	\$34.1	\$36.4	(2.3)	(6)	%
Diluted earnings per share	\$0.75	\$0.80	\$(0.05)	(6)	%

Net sales increased in the first quarter of 2013 compared to the first quarter of 2012. Sales increased in Aircraft Controls and Components, while sales declined in Industrial Systems and Space and Defense Controls.

Gross margin increased slightly in the first quarter compared to the same period last year. We had stronger gross margins in Medical Devices, Aircraft Controls and Components. Gross margin was fairly flat in Industrial Systems, while gross margin decreased in Space and Defense Controls.

Research and development expenses were higher in the first quarter of 2013 compared to the same period in 2012 in part due to increased activity on the Airbus A350 program.

Our selling, general and administrative expenses as a percentage of sales increased in the first quarter of 2013 in all of our segments. The increase is driven by the timing of professional services and marketing costs and by increased pension expense.

The effective tax rate decreased in the first quarter of 2013 due to a more favorable mix of foreign earnings.

2013 Outlook – We expect sales in 2013 to increase 6% to \$2.62 billion, with growth in our Space and Defense Controls, Components, Aircraft and Medical Devices segments. Offsetting the increase is an expected sales decline in our Industrial Systems segment, reflecting a slowdown in our wind energy business and continued concerns in the macro-economic environment affecting industrial automation. We expect our operating margin to increase slightly to 11.2% from 11.1% due to contributions from our Medical Devices, Aircraft Controls and Components segments. Offsetting these contributions are declines in Industrial Systems, in part related to additional restructuring expenses, and a decline in Space and Defense Controls, related to adverse product mix. We will also benefit from \$5 million of lower interest expense due to our January 15, 2013 early redemption of our 6¼% senior subordinated notes. We expect net earnings to increase to between \$160.3 and \$164.9 million, and diluted earnings per share to increase between 5% and 8% to between \$3.50 and \$3.60. This outlook excludes any effect for 2013 from sequestration (as noted in Economic Conditions and Market Trends).

SEGMENT RESULTS OF OPERATIONS AND OUTLOOK

Operating profit, as presented below, is net sales less cost of sales and other operating expenses, excluding interest expense, equity-based compensation expense and other corporate expenses. Cost of sales and other operating expenses are directly identifiable to the respective segment or allocated on the basis of sales, number of employees or profit. Operating profit is reconciled to earnings before income taxes in Note 15 of the Notes to Consolidated Condensed Financial Statements included in this report.

Aircraft Controls

(dollars in millions)	Three Months Ended		\$	%	
	December 29, 2012	December 31, 2011			
Net sales - military aircraft	\$149.7	\$142.8	\$6.9	5	%
Net sales - commercial aircraft	102.6	88.3	14.3	16	%
	\$252.3	\$231.1	\$21.2	9	%
Operating profit	\$31.1	\$24.8	\$6.3	25	%
Operating margin	12.3	% 10.7			%
Backlog	\$663.1	\$631.1	\$32.0	5	%

Aircraft Controls' sales increased in the first quarter of 2013 compared to the same period in 2012 in both commercial and military markets. Within commercial aircraft, OEM sales to Boeing increased \$13 million due to volume, most notably on the Boeing 787 as production levels increased, and aftermarket sales increased \$1 million due to higher initial provisioning sales for Boeing 787. In military aircraft, aftermarket increased \$8 million due to volume increases in multiple programs.

Our operating margin expanded in the first quarter of 2013 compared to the first quarter of 2012 mostly due to a more profitable sales mix. Partially offsetting the increase was a \$1 million increase in research and development expenses as activity on the Airbus A350 platform was even higher than the activity on last year's Boeing 747-8 certification program. Additionally, increased pension costs associated with a lower discount rate in 2013 reduced margin expansion.

The higher level of twelve-month backlog for Aircraft Controls at December 29, 2012 reflects strong military orders and commercial production ramp up.

2013 Outlook for Aircraft Controls – We expect sales in Aircraft Controls to increase 7% to \$1.03 billion in 2013. Commercial aircraft is expected to increase 13% to \$437 million due to stronger sales to Boeing and Airbus. Military aircraft sales is expected to increase 3% to \$590 million. Aftermarket sales volumes are expected to drive the increase while OEM sales are expected to be flat. We expect our operating margin to increase to 11.9% from 10.9%, reflecting incremental margin on higher sales and a decline in research and development expenses as a percentage of sales.

Space and Defense Controls

(dollars in millions)	Three Months Ended				\$	%	%
	December 29, 2012	December 31, 2011					
Net sales	\$86.5	\$88.4			\$(1.9)	(2))%
Operating profit	\$8.2	\$12.7			\$(4.5)	(35))%
Operating margin	9.5	% 14.4	%				
Backlog	\$242.2	\$206.6			\$35.6	17	%

Space and Defense Controls' sales were relatively flat in the first quarter of 2013 compared to 2012 due to sales from acquisitions offset by declines in various legacy programs. Within the space market, sales grew \$5 million. Of this increase, \$13 million came from acquisitions with In-Space Propulsion contributing \$10 million and Bradford Engineering contributing \$3 million. Partially offsetting the increase in the space market was a \$5 million decline in NASA programs as efforts on the Orion multi purpose crew vehicle subsided. Also, sales in the security market declined \$4 million due to the diminished activity on the Driver Vision Enhancer (DVE) program. Lastly, defense sales declined \$3 million as work on armored vehicles slowed.

Our operating margin declined in the first quarter of 2013 compared to the first quarter of 2012 in part due to a less favorable sales mix as 2012 included strong DVE sales. Additionally, our recently acquired businesses' cost structures added incremental expenses to our core operating expenses.

The increased level of twelve-month backlog at December 29, 2012 compared to the backlog at December 31, 2011, is due to recent acquisitions and increased activities on the United Launch Alliance common thrust vector control system for the Delta IV and Atlas V next generation rockets.

2013 Outlook for Space and Defense Controls – We expect sales in Space and Defense Controls to increase 21% to \$433 million in 2013. We expect this increase to be predominately attributable to our recent acquisitions of In-Space Propulsion and Broad Reach Engineering Company. Additionally, we expect growth in our missile defense programs. We expect our operating margin to decrease to 10.2% from 11.9%, largely as a result of unfavorable product mix and the impact of recent acquisitions.

Industrial Systems

(dollars in millions)	Three Months Ended			
	December 29, 2012	December 31, 2011	\$ Variance	% Variance
Net sales	\$148.0	\$158.1	\$(10.1)	(6)%
Operating profit	\$9.0	\$15.8	\$(6.8)	(43)%
Operating margin	6.1 %	10.0 %		
Backlog	\$208.6	\$273.3	\$(64.7)	(24)%

Industrial Systems' net sales declined in the first quarter of 2013 as compared to the first quarter of 2012. Sales in our wind business declined \$11 million due to continued weakness in China. Also, sales in our industrial automation market, specifically metal forming and presses and heavy industry, decreased \$3 million reflecting the general economic conditions. Additionally, auto test sales declined \$3 million as sales in the first quarter of 2012 were strong. Offsetting these declines were strengths in our simulation and non-renewable energy markets. Simulation sales were strong, providing an additional \$4 million over the prior period. Additionally, sales in the gas and steam market increased \$4 million due to strong demand in the Pacific region.

Our operating margin declined in the first quarter of 2013 when compared to the first quarter of 2012. The decrease was primarily due to the decline in sales.

The twelve-month backlog for Industrial Systems at December 29, 2012 decreased as compared to December 31, 2011 primarily associated with Pacific wind sales. Industrial automation backlog declined as well, but was offset by strong simulation orders.

2013 Outlook for Industrial Systems – We expect sales in Industrial Systems to decline 5% to \$600 million in 2013, aligning with the first quarter of 2013's run rate. We expect sales in our energy and industrial automation markets to decrease compared to the prior year. However, we expect strong simulation sales. We expect that our operating margin will decrease to 8.4% from 10.0%, which includes \$4 million of expected restructuring expenses, and reflects a loss of margin on lower sales.

Components

(dollars in millions)	Three Months Ended					
	December 29, 2012	December 31, 2011	\$ Variance	% Variance		
Net sales	\$99.3	\$88.1	\$11.2	13	%	
Operating profit	\$18.8	\$15.0	\$3.8	25	%	
Operating margin	19.0	% 17.0	%			
Backlog	\$163.8	\$169.6	\$(5.8)) (3)%	

Components' net sales increased in the first quarter of 2013 compared to the first quarter of 2012. Sales increased in our non-aerospace and defense markets and were slightly lower in our aerospace and defense market. Sales in the energy market increased \$14 million due to strong deliveries of large slip rings used on off-shore oil storage vessels and \$5 million due to incremental sales from our Trittech acquisition. Offsetting this increase was a \$2 million decline in our CCTV programs due to increased price competition. Additionally, space and defense programs decreased \$2 million as demand for military and defense controls products slowed.

Our operating margin increased in the first quarter of 2013 compared to the first quarter of 2012 primarily due to increased marine sales in our energy market. Additionally, a partial unwinding of an earn out provision for the Protokraft acquisition contributed to margin expansion.

The twelve-month backlog at December 29, 2012 compared to December 31, 2011 decreased due to large marine orders in the first quarter of 2012 that have since converted to sales. Slowing demand for military and wind control products also contributed to the decrease in backlog.

2013 Outlook for Components – We expect sales to increase 10% to \$413 million in 2013. We expect acquisitions to drive sales growth in marine and industrial automation markets. Also, we expect some sales growth in our defense business as foreign missile defense programs ramp up. Offsetting the growth is an expected continued decline in military aircraft sales. We expect operating margin will increase to 16.2% from 15.0%, reflecting strong first quarter results.

Medical Devices

(dollars in millions)	Three Months Ended		\$	%	Variance	%
	December 29, 2012	December 31, 2011				
Net sales	\$34.8	\$34.9	\$(0.1))	—	%
Operating profit	\$1.6	\$1.6	\$—		—	%
Operating margin	4.6	% 4.6		%		
Backlog	\$21.2	\$17.3	\$3.9		23	%

Medical Devices' net sales were flat in the first quarter of 2013 compared to the first quarter of 2012. Sales of IV sets increased \$1 million as we changed from using a third party distributor to selling products directly. Offsetting the increase was a decline in enteral pump sales volumes, both domestically and internationally.

Our operating margin in the first quarter of 2013 was relatively flat compared to the first quarter of 2012. Our gross margin improved, in part, due to manufacturing cost improvements, but was offset by increased operating expenses, including marketing and freight costs.

Twelve-month backlog for Medical Devices is not as substantial relative to sales as compared to our other segments, reflecting the shorter order-to-shipment cycle for this line of business.

2013 Outlook for Medical Devices – We expect sales to increase 4% to \$146 million in 2013. Sales of pumps are expected to increase as our IV pumps gain traction in the marketplace. We expect our operating margin to increase to 6.0% from 3.9%, as a result of higher sales. This increase also reflects the negative impact of the medical devices excise tax effective in January 2013 under the Affordable Health Care Act.

FINANCIAL CONDITION AND LIQUIDITY

(dollars in millions)	Three Months Ended		\$	%
	December 29, 2012	December 31, 2011		
Net cash provided (used) by:				
Operating activities	\$28.2	\$35.0	\$(6.8)	(19)%
Investing activities	(23.3)	(45.5)	22.2	(49)%
Financing activities	(3.5)	10.2	(13.7)	(134)%

Our available borrowing capacity and our cash flow from operations provide us with the financial resources needed to run our operations, reinvest in our business and make strategic acquisitions.

At December 29, 2012, our cash balance was \$152 million, substantially all of which is held outside of the U.S. Our U.S. operations fund on-going activities, debt requirements and future growth investments with cash generated from operations along with available borrowings. We reinvest the cash generated from foreign operations locally and such international balances are not available to pay down debt in the U.S. unless we decided to repatriate such amounts. If we determined repatriation of foreign funds was necessary, we would then be required to pay U.S. income taxes on those funds.

Operating activities

Cash provided by operating activities decreased in the first three months of 2013 compared to the first three months of 2012. We had lower net earnings adjusted for non-cash charges in the first quarter of 2013. We also had higher pension contributions as we slowed the funding in 2012.

Investing activities

Cash used by investing activities decreased in part due to no acquisitions in the first quarter of 2013. In the first quarter of 2012, we had one acquisition each in our Space and Defense Controls and our Components segments. Also, we had lower levels of capital expenditures than in 2012 related to our newly constructed facility in the U.K. in our Aircraft Controls segment.

We expect our 2013 capital expenditures to be approximately \$105 million.

Financing activities

The change in net cash from financing activities in the first quarter of 2013 primarily reflects the absence of borrowings to fund acquisitions as well as payments on our U.S. credit facility.

Off Balance Sheet Arrangements

We do not have any material off balance sheet arrangements that have or are reasonably likely to have a material future effect on our results of operations or financial condition.

Contractual Obligations and Commercial Commitments

Our contractual obligations and commercial commitments have not changed materially from the disclosures in our 2012 Annual Report on Form 10-K, with the exception of an announced call of our 6¼% senior subordinated notes,

which was subsequently completed on January 15, 2013.

28

CAPITAL STRUCTURE AND RESOURCES

We maintain bank credit facilities to fund our short and long-term capital requirements, including for acquisitions. From time to time, we also sell equity and debt securities to fund acquisitions or take advantage of favorable market conditions.

Our largest credit facility is our U.S. credit facility, which matures on March 18, 2016. It consists of a \$900 million revolver and had an outstanding balance of \$303 million at December 29, 2012. Interest on the majority of the outstanding credit facility borrowings is based on LIBOR plus the applicable margin, which was 150 basis points at December 29, 2012. The credit facility is secured by substantially all of our U.S. assets.

The U.S. credit facility contains various covenants. The covenant for minimum interest coverage ratio, defined as the ratio of EBITDA to interest expense for the most recent four quarters, is 3.0. The covenant for the maximum leverage ratio, defined as the ratio of net debt, including letters of credit, to EBITDA for the most recent four quarters, is 3.5. The covenant for maximum capital expenditures is \$155 million for 2013 and increases by \$10 million each year thereafter. We are in compliance with all covenants. EBITDA is defined in the loan agreement as (i) the sum of net income, interest expense, income taxes, depreciation expense, amortization expense, other non-cash items reducing consolidated net income and non-cash equity-based compensation expenses minus (ii) other non-cash items increasing consolidated net income.

We are required to obtain the consent of lenders of the U.S. credit facility before raising significant additional debt financing. In recent years, we have demonstrated our ability to secure consents to access debt markets. We have also been successful in accessing equity markets, from time to time. We believe that we will be able to obtain additional debt or equity financing as needed.

At December 29, 2012, we had \$597 million of unused borrowing capacity, including \$583 million from the U.S. credit facility after considering standby letters of credit.

We have a trade receivables securitization facility (the "Securitization Program"), which terminates on March 4, 2013. Under the Securitization Program, we sell certain trade receivables and related rights to an affiliate, which in turn sells an undivided variable percentage ownership interest in the trade receivables to a financial institution, while maintaining a subordinated interest in a portion of the pool of trade receivables. The Securitization Program can be extended by agreement of the parties thereto for successive 364-day terms. The Securitization Program effectively increases our borrowing capacity by up to \$100 million and lowers our cost to borrow funds as compared to the U.S. credit facility. We had an outstanding balance of \$69 million at December 29, 2012. The Securitization Program reduced the amount outstanding under our U.S. credit facility and increased the amount of short-term borrowings. Interest on the secured borrowings under the Securitization Program is based on prevailing market rates for short-term commercial paper plus an applicable margin, which was 90 basis points at December 29, 2012.

Net debt to capitalization was 31% at December 29, 2012 and 32% at September 29, 2012. The decrease in net debt to capitalization is primarily due to our net earnings in the first three months of 2013.

We believe that our cash on hand, cash flows from operations and available borrowings under short and long-term arrangements will continue to be sufficient to meet our operating needs.

On January 15, 2013, we repurchased at par our 6¼% senior subordinated notes due on January 15, 2015, pursuant to an early redemption right. We redeemed the aggregate principal amount of \$200 million using proceeds drawn from our U.S. revolving credit facility.

ECONOMIC CONDITIONS AND MARKET TRENDS

We operate within the aerospace and defense and industrial markets. Our aerospace and defense markets are affected by market conditions and program funding levels, while our industrial markets are influenced by general capital investment trends and economic conditions. A common factor throughout our markets is the continuing demand for technologically advanced products.

Aerospace and Defense

Approximately 59% of our 2012 sales were generated in aerospace and defense markets. Within aerospace and defense, we serve three end markets: defense, commercial aircraft and space.

The defense market is dependent on military spending for development and production programs. Aircraft production programs are typically long-term in nature, offering predictability as to capacity needs and future revenues. We maintain positions on numerous high priority programs, including the F-35 Joint Strike Fighter, F/A-18E/F Super Hornet and V-22 Osprey. The large installed base of our products leads to attractive aftermarket sales and service opportunities. The tactical missile, missile defense and defense controls markets are dependent on many of the same market conditions as military aircraft, including overall military spending and program funding levels. Our homeland security product line is dependent on government funding at federal and local levels, as well as private sector demand.

Starting in calendar year 2013, additional cuts to the U.S. Department of Defense's mandatory and discretionary budgeted spending of approximately \$500 billion over the next decade (which is generally referred to as sequestration) resulting from the 2011 Budget Control Act could have ramifications for the aerospace and defense market. Currently the Budget Control Act provides that sequestration cuts are uniform by category for programs, projects and activities within accounts. These reductions would impact our sales, operating profit and our cash flow. However, it is not clear that sequestration will happen or how it will be implemented. Currently, we have approximately \$800 million in domestic defense sales forecasted for 2013.

Global demand for air travel generally follows economic growth and therefore the commercial aircraft market has historically exhibited cyclical swings. The aftermarket is driven by usage of the existing aircraft fleet and the age of the installed fleet, and is impacted by fleet re-sizing programs for passenger and cargo aircraft. Changes in aircraft utilization rates affect the need for maintenance and spare parts and impact aftermarket sales. Boeing and Airbus have historically adjusted production in line with air traffic volume. Demand for our commercial aircraft products is in large part dependent on new aircraft production, which is increasing as Boeing and Airbus work down large backlogs of unfilled orders.

The commercial space market is comprised of large satellite customers, traditionally communications companies. Trends for this market, as well as for commercial launch vehicles, follow demand for increased capacity, satellite replacement and global navigation. The space market is also partially dependent on the governmental authorized levels of funding for satellite communications.

Industrial

Approximately 41% of our 2012 sales were generated in industrial markets. Within industrial, we serve three end markets: industrial automation, energy and medical.

The industrial automation market we serve is influenced by several factors including capital investment, product innovation, economic growth, cost-reduction efforts and technology upgrades. We experience challenges based on the need to react to the demands of our customers who are in large part sensitive to international and domestic economies. The energy market is in part affected by changing natural oil and gas prices, global urbanization and the resulting increase in demand for global energy. Drivers for global growth include investments in power generation infrastructure, including renewable energy, and exploration for new resource reservoirs.

The medical market we serve is influenced by economic conditions, regulatory environments, hospital and outpatient clinic spending on equipment, population demographics, medical advances, patient demands and the need for precision control components and systems. Advances in medical technology and medical treatments have had the effect of extending the average life span, in turn resulting in greater need for medical services. These same technology and treatment advances also drive increased demand from the general population as a means to improve quality of life. Access to medical insurance, whether through government funded health care plans or private insurance, also affects the demand for medical services.

Foreign Currencies

We are affected by the movement of foreign currencies compared to the U.S. dollar, particularly in our Industrial Systems segment. About one-third of our 2012 sales were denominated in foreign currencies. The translation of the results of our foreign subsidiaries into U.S. dollars did not have a significant impact on our sales in the first three months of 2013 compared to the same period one year ago.

Cautionary Statement

Information included or incorporated by reference in this report that does not consist of historical facts, including statements accompanied by or containing words such as “may,” “will,” “should,” “believes,” “expects,” “expected,” “intends,” “projects,” “approximate,” “estimates,” “predicts,” “potential,” “outlook,” “forecast,” “anticipates,” “presume” and “assume,” are forward-looking statements. Such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not guarantees of future performance and are subject to several factors, risks and uncertainties, the impact or occurrence of which could cause actual results to differ materially from the expected results described in the forward-looking statements. These important factors, risks and uncertainties include:

- the markets we serve are cyclical and sensitive to domestic and foreign economic conditions and events, which may cause our operating results to fluctuate
- we operate in highly competitive markets with competitors who may have greater resources than we possess
- we depend heavily on government contracts that may not be fully funded or may be terminated, and the failure to receive funding or the termination of one or more of these contracts could reduce our sales and increase our costs
- we make estimates in accounting for long-term contracts, and changes in these estimates may have significant impacts on our earnings
- we enter into fixed-price contracts, which could subject us to losses if we have cost overruns
- if our subcontractors or suppliers fail to perform their contractual obligations, our prime contract performance and our ability to obtain future business could be materially and adversely impacted
- contracting on government programs is subject to significant regulation, including rules related to bidding, billing and accounting kickbacks and false claims, and any non-compliance could subject us to fines and penalties or possible debarment
- the loss of Boeing as a customer or a significant reduction in sales to Boeing could adversely impact our operating results
- our new product research and development efforts may not be successful which could reduce our sales and earnings
- our inability to adequately enforce and protect our intellectual property or defend against assertions of infringement could prevent or restrict our ability to compete
- our business operations may be adversely affected by information systems interruptions or infringements
- our indebtedness and restrictive covenants under our credit facilities could limit our operational and financial flexibility
- significant changes in discount rates, rates of return on pension assets, mortality tables and other factors could affect our earnings, equity and pension funding requirements
- a write-off of all or part of our goodwill or other intangible assets could adversely affect our operating results and net worth
- our sales and earnings growth may be affected if we cannot identify, acquire or integrate strategic acquisitions
- our operations in foreign countries expose us to political and currency risks and adverse changes in local legal and regulatory environments
- unforeseen exposure to additional tax income liabilities may affect our operating results
- government regulations could limit our ability to sell our products outside the United States and otherwise adversely affect our business
- the failure or misuse of our products may damage our reputation, necessitate a product recall or result in claims against us that exceed our insurance coverage, thereby requiring us to pay significant damages
- future terror attacks, natural disasters or other catastrophic events beyond our control could negatively impact our business
- our operations are subject to environmental laws, and complying with those laws may cause us to incur significant costs
- we are involved in various legal proceedings, the outcome of which may be unfavorable to us

These factors are not exhaustive. New factors, risks and uncertainties may emerge from time to time that may affect the forward-looking statements made herein. Given these factors, risks and uncertainties, investors should not place undue reliance on forward-looking statements as predictive of future results. We disclaim any obligation to update the forward-looking statements made in this report.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Refer to the Company's Annual Report on Form 10-K for the year ended September 29, 2012 for a complete discussion of our market risk. There have been no material changes in the current year regarding this market risk information.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures. We carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that these (a) disclosure controls and procedures are effective as of the end of the period covered by this report, to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting. There have been no changes in our internal control over (b) financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) The following table summarizes our purchases of our common stock for the quarter ended December 29, 2012.

Period	(a) Total Number of Shares Purchased (1)(2)	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (3)	(d) Maximum Number (or Approximate Dollar Value) of Shares that May yet be Purchased Under the Plans or Programs (3)
September 30, 2012 - October 31, 2012	1,240	\$37.07	—	1,000,000
November 1, 2012 - November 30, 2012	24,994	\$36.03	—	1,000,000
December 1, 2012 - December 29, 2012	49,757	\$37.08	—	1,000,000
Total	75,991	\$36.73	—	1,000,000

Reflects purchases by the SECT of shares of Class B common stock from the Moog Inc. Retirement Savings Plan (RSP) as follows: October, 1,240 shares at \$37.07 per share, November, 7,011 shares at \$35.99 per share and (1) December, 1,235 at \$40.10 per share. Purchases by the SECT in November and December also include 1,500 and 2,700 shares of Class B common stock from members of the Moog family at \$37.36 and \$36.93 per share, respectively.

In connection with the exercise of stock options, we accept, from time to time, delivery of shares to pay the exercise price of stock options. During November, we accepted delivery of 16,483 shares at \$35.92 per share and (2) in December, we accepted delivery of 45,822 shares at \$37.01 per share, in connection with the exercise of stock options.

In December 2011, the Board of Directors authorized a share repurchase program. The program permits the (3) purchase of up to 1,000,000 shares of Class A or Class B common stock in open market or privately negotiated transactions at the discretion of management.

Item 6. Exhibits.

- (a) Exhibits
 - 31.1 Certification of Chief Executive Officer pursuant to Exchange Act Rule 13a-14(a) as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
 - 31.2 Certification of Chief Financial Officer pursuant to Exchange Act Rule 13a-14(a) as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
 - 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
 - 101 Interactive Data files (submitted electronically herewith)
 - (101.INS) XBRL Instance Document
 - (101.SCH) XBRL Taxonomy Extension Schema Document
 - (101.CAL) XBRL Taxonomy Extension Calculation Linkbase Document
 - (101.DEF) XBRL Taxonomy Extension Definition Linkbase Document
 - (101.LAB) XBRL Taxonomy Extension Label Linkbase Document
 - (101.PRE) XBRL Taxonomy Extension Presentation Linkbase Document

In accordance with Rule 406T of Regulation S-T, the XBRL related information in Exhibit 101 to this Quarterly Report on Form 10-Q shall not be deemed to be “filed” for purposes of Section 18 of the Exchange Act, or otherwise subject to the liability of that section and shall not be part of any registration or other document filed under the Securities Act or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
