

MAGNETEK, INC.
 Form 10-K
 March 21, 2014

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
 Washington, D.C. 20549

FORM 10-K
 (Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
 ACT OF 1934
 For the fiscal year ended December 29, 2013

OR
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
 ACT OF 1934

Commission file number 1-10233

MAGNETEK, INC.

(Exact name of Registrant as specified in its charter)

DELAWARE

(State or other jurisdiction of incorporation or
 organization)

95-3917584

(I.R.S. Employer Identification No.)

N49 W13650 Campbell Drive

Menomonee Falls, Wisconsin

(Address of Principal Executive Offices)

53051

(Zip Code)

Registrant's telephone number, including area code: (262) 783-3500

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$.01 par value	The NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the
 Act:

None

Indicate by check mark if the registrant is a well known seasoned issuer, as defined in Rule 405
 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or
 Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by
 Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or
 for such shorter period that the registrant was required to file such reports), and (2) has been
 subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its
 corporate Web site, if any, every Interactive Data File required to be submitted and posted
 pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12
 months (or for such shorter period that the registrant was required to submit and post such
 files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K
 is not contained herein, and will not be contained, to the best of registrant's knowledge, in
 definitive proxy or information statements incorporated by reference in Part III of this
 Form 10-K or any amendment to this Form 10-K.

Edgar Filing: MAGNETEK, INC. - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer,” “accelerated filer”, and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer [] Accelerated filer [] Non-accelerated filer [] Smaller reporting company []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes [] No []

The aggregate market value of the voting stock held by non-affiliates of the registrant, based on the closing price of \$18.03 per share as reported by the NASDAQ Stock Market, on June 30, 2013 (the last business day of the Company’s most recently completed second fiscal quarter), was \$56,952,190. Shares of common stock held by each executive officer and director have been excluded since such persons may be deemed affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of shares outstanding of the registrant’s Common Stock, as of February 20, 2014, was 3,260,002 shares.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Magnetek, Inc. definitive 2014 Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after the close of the fiscal year ended December 29, 2013, are incorporated by reference into Part II and Part III of this Form 10-K.

PART I

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, including documents incorporated herein by reference, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The words “believe”, “expect”, “estimate”, “anticipate”, “intend”, “may”, “might”, “will”, “would”, “could”, “project”, “objective”, and “predict”, or similar words and phrases generally identify forward-looking statements. Forward-looking statements contained or incorporated by reference in this document, including those set forth in Part II, Item 7 entitled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and in Item 1 of this Annual Report on Form 10-K entitled “Business” include, but are not limited to, statements regarding our plans, objectives, goals, strategies, future events, future sales or performance, projections of revenues, income or loss, capital expenditures, plans for future operations, products or services, legal issues, financing needs or expectations, and other information that is not historical information, as well as assumptions relating to the foregoing. All forward-looking statements are based upon our current expectations, beliefs, projections, and assumptions.

Our expectations, beliefs, projections and assumptions are expressed in good faith and we believe there is a reasonable basis for them. However, there can be no assurance that our financial condition or results of operations will meet the expectations set forth in our forward-looking statements. Forward-looking statements are inherently subject to risks and uncertainties which in many cases are beyond the control of the Company and which cannot be predicted or quantified. As a result, future events and actual results could differ materially from those set forth in, contemplated by, or underlying forward-looking statements. Such risks and uncertainties include, but are not limited to, economic conditions in general, sensitivity to industry conditions, competitive factors such as technology and pricing pressures, business conditions in electronics, industrial equipment and energy markets, international sales and operations, dependence on major customers, increased material costs, risks and costs associated with acquisitions, litigation and environmental matters, and the risk that the Company’s ultimate costs of doing business exceed present estimates. A discussion of these and other specific risks is included in Part I, Item 1A. “Risk Factors” of this Annual Report on Form 10-K. Forward-looking statements contained in this Annual Report speak only as of the date of this document or, in the case of any document incorporated by reference, the date of that document. The Company does not have an obligation to publicly update or revise any forward-looking statement contained or incorporated by reference in these documents to reflect changed assumptions, the occurrence of unanticipated events, or changes to future operating results over time.

ITEM 1. BUSINESS

General

Magnetek, Inc. (“Magnetek,” the “Company,” “we,” or “us”) is a global provider of digital power control systems that are used to control motion and power primarily in material handling, elevator, and mining applications. Magnetek is listed on the NASDAQ Global Market (NASDAQ: MAG) and was founded in 1984 as a Delaware corporation. However, certain businesses we have acquired have a long history of technical innovation that predates the founding of Magnetek. Our digital power control systems serve the needs of selected niches of traditional and emerging markets that are becoming increasingly dependent on “smart” power. Over the past ten years, we have successfully transitioned the Company from a component supplier to a provider of systems solutions. Today, much of our focus is on developing and introducing innovative electronic drive solutions that both enhance our customers' operational efficiency and save energy. Our products are sold directly or through manufacturers' representatives to original equipment manufacturers (“OEMs”) for incorporation into their products, to system integrators and value-added resellers for assembly and incorporation into end-user systems, to distributors for resale to OEMs and contractors, and to end users for repair and replacement purposes. We operate in a single segment, Digital Power Control Systems. Revenue and profit information, additional financial data, and commentary on recent financial results, which are

provided in Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" and in Part II, Item 8. "Financial Statements and Supplementary Data" of this Annual Report Report on Form 10-K, should be read in conjunction with this section.

We believe we are North America's largest independent supplier of digital drives, radio controls, software, and accessories for industrial cranes and hoists, and we believe we are also the largest independent supplier of digital direct current ("DC") motion control systems for elevators. Customers include most of the industrial crane and hoist companies in North America and the world's leading elevator builders. In addition, we have a growing range of motion control products for mining equipment applications. Our operations are located in North America, predominantly in Menomonee Falls, Wisconsin, the location of our headquarters.

Index

One of our primary goals is to expand our position in markets offering long-term stability, excellent growth potential, and profitability. Our focus is on markets where we can apply both our industry expertise and our systems integration model to add value to our customers by improving their productivity, throughput, energy efficiency, or safety, while reducing labor costs, downtime, and maintenance costs.

Product Offerings

Magnetek is a leading provider of innovative power control and delivery systems and solutions for overhead material handling applications used in a number of diverse industries, including aerospace, automotive, steel, aluminum, paper, logging, mining, ship loading, nuclear power plants, and heavy movable structures. Our material handling products include alternating current (“AC”) and DC drive systems, radio remote controls, push-button pendant stations, brakes, and collision avoidance and power delivery subsystems. We are a major supplier in North America of AC control systems. While we sell primarily to OEMs of overhead cranes and hoists, we spend a great deal of effort understanding the needs of end users to gain specification. We can combine our products with engineered services to provide complete customer-specific systems solutions.

Magnetek also designs, builds, sells, and supports elevator application-specific drive products that efficiently deliver power used to control motion, primarily in high-rise, high-speed elevator applications. We are recognized as an industry leader for DC high-performance elevator drives, as well as for AC drives used with low- and high-performance traction elevators, due to our extensive application expertise and product reliability. Our elevator product offerings are comprised of highly integrated subsystems and drives, sold mainly to elevator OEMs. In addition, our product options include a number of regenerative controls for both new building installations and elevator modernization projects that help building owners save energy. We have over 70,000 elevator drives currently in operation worldwide.

We are also a leading independent supplier of AC and DC digital motion control systems for underground coal mining equipment. Our systems are used in coal hauling vehicles, shuttle cars, scoops, and other heavy mining equipment. We estimate that we have an installed base of over 10,000 drive systems operating in mining equipment throughout the world.

We intend to continue to build on our competitive strengths in established material handling, elevator, and mining markets and continue to invest in research and development to expand our product portfolio aimed at penetrating growing and emerging markets for digital power-based systems.

Growth Drivers in our Served Markets

We believe that future demand for our products will be aided by certain trends that we expect to drive growth in our served markets, including the following:

Focus on Increasing Efficiency and Productivity

In response to increasingly competitive economic conditions, many manufacturers seek to increase productivity and efficiency while controlling costs, and many of our product offerings enable our customers to achieve these goals. Our variable frequency AC drive products and DC digital controls are highly reliable, operate at high speeds, and improve production output, while reducing labor and maintenance costs. Technology advancements in control products and engineering enable us to convert manual processes and systems to automated systems, providing a wide range of benefits, including labor and space savings, improved productivity, efficient material flow, more accurate positioning, and safer operation. As a result, we can demonstrate many opportunities to improve our customers' operations and provide them with quantifiable, and in many cases, significant returns on invested capital.

Growing Energy Needs and Focus on Energy Efficiency

Total global energy consumption is projected to increase 56% by the year 2040 according to the U.S. Energy Information Administration (“EIA”). The vast majority of energy consumed today comes from traditional energy sources such as coal, oil, and natural gas, and the EIA projects that fossil fuels will supply nearly 80% of world energy use through 2040. Approximately 40% of the electricity used in the U.S. today comes from coal, and world energy use derived from coal sources is projected to increase approximately 30% through 2040, per the EIA. We have a wide variety of product offerings across all of our major served markets which are engineered to efficiently use available power, or which convert energy to usable power in an energy efficient manner. We have been a leading supplier of AC and DC digital motion control systems to underground coal mining equipment manufacturers for nearly 30 years.

In addition, our regenerative elevator drives can provide energy savings of 25% to 45% over other elevator solutions. During fiscal 2013, we introduced a new line of regenerative drives for the material handling market that, when coupled with our existing motor drive technology, have the ability to provide energy savings of over 40% compared to non-regenerative solutions in the market. We believe our energy efficient product offerings have us well positioned to benefit from the expected growing demand for energy and energy efficient solutions in the future.

Index

Shift from Electro-Mechanical Control to Digital Power Control

Technological advancements have resulted in a shift away from electro-mechanical control to digital power control. For example, a number of years ago, cranes relied mainly on contactors, relays, and static controls for their operation, whereas today, AC and DC drives are the preferred method of control. Improvements in drive technology have also allowed for the downsizing of power platforms and the inclusion of many high-performance features valued by the marketplace. AC power control is generally used for new installations in overhead material handling systems, elevators, and mining equipment. However, DC drive solutions are also a viable alternative for existing installations that wish to retain existing DC power sources. We believe this trend will benefit us in the future as our primary core competency is in digital power control.

Conversion to Wireless Applications

Many industries, including the overhead material handling, mobile hydraulic, construction, and mining markets, are rapidly adopting remote wireless control solutions. While wireless control has been available for a number of years, technology has improved significantly in recent years, enabling enhancements that have resulted in products that are safer, more reliable, ergonomically designed, versatile, and cost-effective. Over the past several years, through both acquisition and internal development, we have invested in expanding the breadth of our wireless control product offering, which we believe will help us to meet demand, increase market share, and enter new markets in this growing field.

Modernization and Upgrade of Existing Equipment

Overhead cranes, elevators, and mining equipment represent significant investments in capital which in most cases operate under severe duty and in some cases, in harsh environments. Many of the structural components of these systems are manufactured to withstand significant mechanical forces, and to have useful lives in excess of 30 years. For example, it is not uncommon to find cranes that are more than 50 years old still operating today, or elevators or mining equipment operating with aging and inefficient power control equipment. Rather than scrap structurally sound but outdated equipment, it is often more cost-effective to modernize the equipment to meet current operational needs by upgrading the power control systems. Our current drive technology along with our application expertise can provide reduced energy consumption, greater reliability, improved throughput, lower operational costs, enhanced features, and prolonged equipment life over older drive technology. We believe our large installed base of product combined with our industry expertise provides us with opportunities to expand our business through modernization projects.

Systems Solutions

In an effort to reduce costs and streamline operations, many customers are recognizing increased value in consolidating purchasing requirements with suppliers who can provide increasingly integrated solutions. We benefit from this trend as we can bundle a wide breadth of products together with engineered services to provide customer-specific solutions that will result in reduced installation costs as well as lower operating and maintenance costs for our customers. In many of our served markets, we can provide turnkey service, including project evaluation, project management, installation services, field start-up, operator training, and after-sales service and systems support.

Communication and Diagnostic Features

In many electrical applications today, electronic devices controlled by microprocessors are increasingly being networked together, resulting in smart devices with greater productivity and user benefits. The benefits of this trend on control systems for industrial applications include lower installation costs, better monitoring of performance, improved integration with supervisory systems, and improved uptime. We believe the power of embedded and connected microprocessors within our power electronic devices provide a tremendous benefit for users at all levels from maintenance to production to finance.

Safer Workplace Environments

In an effort to comply with increasing workplace safety regulations and to reduce ongoing costs associated with health insurance, workplace accidents, and workers' compensation expenses, many employers are focused on providing safer workplace environments. We offer a vast number of optional features that can further enhance workplace safety and reduce the risk of accidents and personal injury, including collision avoidance software, programmable acceleration and deceleration, and other safeguards that prevent overheating, eliminate load swing, and prevent uneven lifting.

Competitive Strengths

We believe that we benefit from competitive advantages in the following areas:

Technological Capabilities and Industry Expertise

We emphasize and leverage our ability to provide customized solutions for power and motion control applications through digital power technology. We have a long history of technical innovation and a highly skilled and experienced technical staff. Our technical personnel possess substantial expertise in disciplines central to digital power systems and

Index

applications. These include analog-to-digital circuit design, thermal management technology, and the application of microprocessors, digital signal processors, and software algorithms in the development of smart power products. We are widely recognized for our expertise in our served markets, regularly hosting training and technology seminars for customers and end users. We believe we are at the forefront of innovation in the industries we have traditionally served, continuously developing new products to provide cost-effective, value-added solutions to meet the changing needs of our customers.

Customer and End-User Relationships

We have established long-term relationships with major manufacturers of cranes and hoists, elevators, and mining equipment, among others. We believe that these relationships have resulted from our reliability and responsiveness, readiness to meet special customer requirements based on innovative technology and application expertise, and the quality and performance of our products, all of which ultimately adds value to our customers by improving their operations and reducing their costs.

Product Breadth and Brand Name Recognition

We provide a wide variety of products in most of our major served markets, and we are among the leaders in the U.S. in many of our served markets. For material handling customers, we serve as a one-stop source, providing a full range of AC and DC crane controls as well as subsystems, including radio controls, push-button stations, motors, brakes, and power delivery products. For elevator customers, we offer both AC and DC integrated digital motion control subsystems for mid- to high-rise buildings at varying speed and performance levels. Our elevator control systems can be found in many of the world's most recognizable buildings. Over the past several years, we've introduced a number of new innovative products to further broaden our product offerings, including severe duty AC traction drives for mining applications, regenerative AC and DC drives for elevator applications, and a new generation of lower-cost AC elevator drives for mid-rise applications.

Our brand names, including Telemotive, Electromotive Systems, OmniPulse, IMPULSE, Enrange, Mondel, M-FORCE, and Quattro, are among the most known and respected in the industries we serve. We believe our strong brand name recognition enables us to retain and leverage existing customer relationships while also providing opportunities to gain market share with new customers and grow our business by entering new markets.

Sales Channels

Our sales force is comprised of a combination of direct employees, sales representatives, and distributors. Although we sell our products to OEMs, our sales and marketing efforts are also aimed at gaining end-user specification. Our sales and marketing team is focused on targeted markets, and has extensive experience and a great deal of application expertise in those markets. We believe that our well established sales network constitutes a significant competitive advantage in the North American marketplace.

Large Installed Base with Proven Technology

Our many years of experience combined with leading share positions in our served markets has resulted in a significant installed base of our products operating in material handling systems, elevators, and mining equipment around the world. We believe the large installed base of our quality products not only demonstrates our technical capability and expertise, but also serves as a potential source for future business from service, repair, retrofit, and modernization opportunities. As production requirements change and existing installed equipment ages, reliability may deteriorate, resulting in reduced productivity, increased downtime, unscheduled repair costs, and safety issues. In these situations, it is often prudent to replace and upgrade power control systems with state-of-the-art controls that can meet present operational needs, enhance performance, and prolong the life of the equipment.

Aftermarket Service and Support

We have a highly trained team of experienced service technicians dedicated to aftermarket support to provide prompt service to end users of our products, 24 hours a day, every day of the year. We believe we are able to attract and retain customers in part due to our commitment to quality, service, and customer satisfaction.

Strategy

Invest in Innovation and New Product Development

We continue to invest in research and development (“R&D”) in an effort to grow our business, refreshing our product offerings and developing new products and services to address the changing needs of our customers. Developing and

offering a broad range of products for each of our served markets is an integral part of our strategy. We make innovative modifications to existing products in an effort to add features and special application software that improve performance. We continue to expand our bundling opportunities in material handling with our radio drive serial interface (“RDSI”). An RDSI module allows a wireless radio to communicate directly with the crane control system, providing improved diagnostic and troubleshooting information.

6

Index

We believe opportunities for growth exist in available elevator markets through the expansion of the breadth of available product offerings to include additional competitive products for AC applications. We also believe opportunities for growth exist in available material handling, elevator, and mining markets through the introduction of new energy-saving product offerings. Over the past several years, we've developed an AC version of our Quattro regenerative elevator drive, and a severe duty AC traction drive for mining equipment.

Gain Market Share in Served Markets

Our long-standing customer relationships, sales network, and end-user relationships provide us with insights into our served markets that help us to anticipate changes in market conditions and customer requirements. We believe we can leverage our close relationships with our channel partners to grow our business by further enhancing strategic partnerships with key customers. We also believe we can use our knowledge and application expertise to increase our share in our served markets by expanding our level of sales with existing customers and by providing value-added solutions to displace our competition.

Entry into New Markets

We continue to seek to grow our business by migrating our proven technology and application expertise into new markets. Over the past several years, we've strategically allocated R&D, sales, and marketing resources to markets such as automation and mobile hydraulic in material handling in an effort to understand the dynamics and requirements of those markets. We've had success in growing our business in those markets, and will continue to look for opportunities where we believe we can take advantage of our competitive strengths to enter into and gain share in new markets.

Expand Geographically

We have leading North American market positions and derive the majority of our revenue from North American, and more specifically, U.S. customers. We believe that certain non-U.S. markets may provide us with compelling growth opportunities for our products. We also believe that, with our commitment to technological innovation and our demonstrated ability to reduce our customers' costs and improve efficiency, our business model may transfer well to markets outside the U.S. in cases where cost-effective, high quality, reliable power solutions are also valued. In addition, certain of our customers are increasing their global footprint, which could provide us with opportunities to partner with them and service those customers locally. We intend to evaluate these opportunities, and prudently allocate sales resources to those markets outside the U.S. where we think we have the best growth prospects relative to the level of investment required to enter the market.

Generate Sufficient Cash to Fund our Growth Initiatives and our Obligations

Our business has consistently generated positive cash flow from operating activities, prior to funding pension obligations, even during periods of economic downturns by focusing on controlling our costs and effectively managing our working capital. Since January 2007, our unrestricted cash balances have increased from \$7 million to \$15 million at the end of December 2013. During that time, we've contributed approximately \$75 million to our defined benefit pension plan while also experiencing some of the worst economic conditions since the 1930s. In addition, we've continued to spend approximately \$3 to \$4 million annually on R&D activities aimed at growing our business through innovative new product introductions and entry into new markets. We intend to continue to focus on tight cost control and asset management while continuing to prudently invest in our business to drive future growth, in an effort to maximize our profitability and cash flow, while we reduce our pension obligation over time through contributions.

In summary, we will continue to pursue internal growth opportunities in our core product lines, seeking to increase our market share, enter new markets, and expand our current business model geographically. We may also selectively pursue external growth through acquisitions in our served or related markets, adding products, technology, market opportunities or capabilities that complement our existing business. Our focus over the next 12 months will be directed toward aligning our resources and investments with the best growth opportunities, maximizing those opportunities through new product introductions and penetration of new markets. At the same time, we'll strive to effectively manage our cost structure and our assets to optimize cash flow and profitability.

Seasonality

Our power control systems for material handling applications represented nearly 74% of our revenue in fiscal year 2013. Sales of these products tend to follow capital budgeting and spending patterns of the customer base. As a result, our revenues are generally strongest in our June and December fiscal quarters, with relatively lower revenues in our March and September fiscal quarters.

Index

Backlog

Our backlog as of the end of fiscal 2013 was \$12.8 million, comparable to our backlog of \$13.1 million at the end of fiscal 2012. While we use our backlog figure as an indicator of future sales activity, we have historically had a significant amount of revenue derived from orders that are booked and shipped within the same reporting period. We expect most of the orders in our backlog to be filled during fiscal 2014.

Competition

Our primary competitors include: Konecranes Inc., Power Electronics International, Inc., Cattron Group International (a division of Laird Technologies), Conductix-Wampfler (a division of Delachaux Group), Control Techniques (a division of Emerson Electric), OMRON Corporation, KEB GmbH, and Fujitec. Some of these companies have substantially greater financial, marketing, and other resources, larger product portfolios, and greater global reach than us.

Suppliers and Raw Materials

Virtually all materials and components that we purchase are available from multiple suppliers. During fiscal 2013, raw material purchases accounted for approximately 73% of our total cost of sales. Production of digital power control systems depends heavily on various electronic components as well as steel and aluminum enclosures and wire harnesses. We seek to obtain competitive pricing on these raw materials by utilizing multiple suppliers and leveraging our total purchasing requirements.

Research and Development

Our research and development activities, which are conducted primarily in Menomonee Falls, Wisconsin, are directed toward developing new products, improving existing products by, among other things, adding features or reducing costs, and customizing or modifying products to meet customers' specific needs. Total research and development expenditures were approximately \$3.2 million, \$3.8 million, \$2.1 million, and \$4.4 million for fiscal 2013 and 2012, the six-month transition period 2011, and our 2011 fiscal year, respectively.

Intellectual Property

Magnetek holds numerous patents, trademarks, and copyrights, and we believe that we hold or license all of the patent, trademark, copyright, and other intellectual property rights necessary to conduct our business. We generally rely upon patents, copyrights, trademarks, and trade secret laws to establish and maintain our proprietary rights in our technology and products. There can be no assurance that any of our patents, trademarks or other intellectual property rights will not be challenged, invalidated, or circumvented, or that any rights granted thereunder will provide competitive advantages to us. In addition, there can be no assurance that patents will be issued from pending patent applications filed by us, or that claims allowed on any future patents will be sufficiently broad to protect Magnetek's technology. Further, the laws of some foreign countries may not permit the protection of our proprietary rights to the same extent as do the laws of the United States. Although we believe the protection afforded by our patents, patent applications, trademarks, and copyrights have value, Magnetek's future success will depend primarily on the innovative skills, technological expertise, research and development, and management capabilities of our employees rather than on patent, copyright, and trademark protection.

International Operations

International sales accounted for \$11.3 million, or 11% of our net sales, while domestic sales were \$92.0 million, or 89% of our net sales in fiscal year 2013. We define international sales as sales of products manufactured by our facilities outside the U.S. that are sold outside of the U.S., as well as sales of products manufactured in the U.S. sold to

purchasers outside of the U.S. International sales accounted for \$13.9 million, or 12% of our net sales, while domestic sales were \$100.4 million, or 88% of our net sales in fiscal year 2012. During the six-month transition period ended January 1, 2012, our domestic sales were \$51.4 million, while international sales were \$7.3 million. For our 2011 fiscal year, revenues derived from domestic sales were \$97.6 million and revenues derived from international sales were \$12.2 million. We hold assets in Canada and the United Kingdom totaling \$7.9 million, of which \$5.3 million are held in Canada and \$2.6 million are in the United Kingdom.

Employee Relations

Index

As of February 17, 2014, we had 126 salaried employees and 202 hourly employees, none of whom were covered by collective bargaining agreements with unions. We believe that our relationships with our employees are favorable.

Available Information

Our Internet website address is www.magnetek.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to these reports that are filed by the Company with the Securities and Exchange Commission (SEC) pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 are available free of charge at or through our website.

Environmental Matters

From time to time, Magnetek has taken action to bring certain facilities associated with previously owned businesses into compliance with applicable environmental laws and regulations. Upon the subsequent sale of certain businesses, we agreed to indemnify the buyers against environmental claims associated with the divested operations, subject to certain conditions and limitations. Remediation activities, including those related to our indemnification obligations, did not involve material expenditures during fiscal 2013, fiscal 2012, our six-month transition period 2011, or in fiscal year 2011.

We have been identified by the United States Environmental Protection Agency and certain state agencies as a potentially responsible party for cleanup costs associated with alleged past waste disposal practices at several previously utilized, owned or leased facilities and offsite locations. Our remediation activities as a potentially responsible party were not material in fiscal 2013, fiscal 2012, our six-month transition period 2011, or in fiscal year 2011. Although the materiality of future expenditures for environmental activities may be affected by the level and type of contamination, the extent and nature of cleanup activities required by governmental authorities, the nature of our alleged connection to the contaminated sites, the number and financial resources of other potentially responsible parties, the availability of indemnification rights against third parties and the identification of additional contaminated sites, our estimated share of liability, if any, for environmental remediation, including our indemnification obligations, is not expected to be material.

For a discussion of environmental-related litigation matters in which we are engaged, please refer to Item 3 - "Legal Proceedings" of this Annual Report on Form 10-K.

Supplemental Information-Executive Officers of the Company

The following table sets forth certain information regarding the current executive officers of the Company, each of whom serves a one-year term of office, as appointed by the Board of Directors.

Name	Age	Position
Peter M. McCormick	53	Director, President and Chief Executive Officer
Marty J. Schwenner	53	Vice President, Chief Financial Officer
Scott S. Cramer	61	Vice President, General Counsel and Corporate Secretary
Michael J. Stauber	40	Vice President, Corporate Controller
Hungsun S. Hui	51	Vice President, Operations

Peter McCormick has been President and Chief Executive Officer of Magnetek since October 2008. Prior to that, Mr. McCormick served as Chief Operating Officer of Magnetek since November 2006 and served as the Executive Vice President responsible for the Company's power control systems group since 2002. Prior to that, he served as the President of the Company's industrial controls group from 1999 until 2002. Since joining the Company in 1993,

Mr. McCormick has also served as the Vice President of Operations for the Company's drives group from 1998 until 1999 and as Vice President of the custom products business group from 1996 until 1998.

Marty Schwenner has been Chief Financial Officer of Magnetek since November 2006. Mr. Schwenner has served as a Vice President of the Company since 2003 and was Controller of the Company from 2002 until November 2006. Mr. Schwenner was Vice President of Finance for the Company's power electronics group from 1998 until 2002. Mr. Schwenner also served as the Chief Financial Officer of the Company's European operations from 1992 to 1998 and as Internal Audit Manager from 1991 until 1992. Mr. Schwenner joined Magnetek as an Internal Auditor in 1989. Mr. Schwenner is a Certified Public Accountant and a Certified Internal Auditor.

Index

Scott Cramer has been Vice President, General Counsel and Corporate Secretary of Magnetek since March 2010. Prior to joining Magnetek, Mr. Cramer served as Senior Vice President and General Counsel with Bucyrus International, Inc. in South Milwaukee, WI from 2006 until 2010. From 2005 to 2006, Mr. Cramer was Senior Legal Counsel with Regal Beloit Corporation following private practice from 2004 to 2005. Mr. Cramer served as Vice President, General Counsel and Secretary from 1997 until 2004 with Superior Services, Inc. following his tenure with Browning-Ferris Industries in Houston, TX and Utrecht, The Netherlands, where he served respectively as Senior Counsel and EMEA General Counsel from 1984 to 1997.

Michael Stauber has been Vice President, Corporate Controller since February 2011. Prior to that, Mr. Stauber served as Operations Controller for the Company since November 2007 and prior thereto served as Finance Manager of the Company's Power Control Division since joining the Company in December 2004. Prior to joining Magnetek, from August 1995 to December 2004, Mr. Stauber was with Rockwell Automation in a variety of financial roles of increasing responsibility.

Hungsun Hui has served as Vice President, Operations since February 2001. Mr. Hui previously held the positions of Magnetek's Vice President, Engineering from June 1999 to January 2001, and Magnetek's Director of Advance Manufacturing from March 1998 to June 1999. Prior to joining Magnetek, from June 1985 to February 1998, Mr. Hui was with Rockwell Automation in a variety of operational roles of increasing responsibility.

ITEM 1A. RISK FACTORS

Our future results of operations and the other forward-looking statements contained in this Annual Report on Form 10-K, including the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” under Item 7, involve a number of risks and uncertainties. In particular, the statements regarding future goals and strategies, opportunities for growth in certain markets, new product introductions, penetration of new markets, projections of sales revenues, manufacturing costs and operating costs, pricing of our products and raw materials required to manufacture our products, gross margin expectations, relocation and outsourcing of production capacity, capital spending, research and development expenses, the outcome of pending legal proceedings and environmental matters, tax rates, sufficiency of funds to meet our needs including contributions to our defined benefit pension plan, and our plans for future operations, as well as our assumptions relating to the foregoing, are all subject to risks and uncertainties.

A number of other factors could cause our actual results to differ materially from our expectations. We are subject to all of the business risks facing public companies, including business cycles and trends in the general economy, financial market conditions, demand variations and volatility, potential loss of key personnel, supply chain disruptions, government legislation and regulation, and natural causes. The following list of risk factors is not all-inclusive. Other factors and unanticipated events could adversely affect our financial position or results of operations. We believe that the most significant potential risk factors that could adversely impact us are the following:

Economic conditions, primarily in the U.S., may adversely affect our served markets, our business, demand for our products, and our results of operations and cash flows

Demand for our products, which impacts our revenue and gross profit, is affected by general business and economic conditions as well as by changes in customer order patterns. Adverse developments in business conditions, economic activity, or capital spending levels could result in reduced demand for our products and impair our ability to accurately forecast and plan future business activities. We cannot predict the timing, duration, or strength of any economic recovery or the timing, duration, or severity of a subsequent economic slowdown, worldwide, in the U.S., or in the specific end markets we serve. In the event of a future prolonged slowdown in economic activity, our business, financial condition, results of operations, and cash flows could be adversely and materially affected. Additionally, our stock price could decrease if investors have concerns that our business and financial condition will be negatively impacted by weakening economic conditions.

We operate in a highly competitive industry

We operate in a competitive industry characterized by periodic changes in technology, product demand, prices and lead times. Our future profitability depends on our ability to successfully identify and react to these changing trends. Specifically, achievement of our sales and profit goals is dependent in part upon our ability to successfully anticipate product demand, to introduce quality products to meet that demand in a timely manner at competitive prices, to gain acceptance of our products in the marketplace, to achieve cost reductions during the product life cycle, and to adapt our existing product platforms in the event of changes in technology. Failure to do so could result in low returns on investment in new products and technologies, a loss of competitive position relative to our peers, obsolete products and technologies, and an adverse impact on our operating results. In addition, price erosion in response to competition in our served markets could have a material impact on our financial position or results of operations.

Our future sales growth is partially dependent on the successful introduction of new products

Achievement of our Company objectives of sales growth of at least 5% on a year-over year basis and gross margins in excess of 35% are in part dependent upon the successful introduction of new products, acceptance of these new products by customers in those markets, and successful cost reduction efforts related to new products. Any delay in introduction of new products, customer acceptance of new products, or cost reduction actions could have an adverse impact on our financial position or results of operations.

Changes in technology could reduce demand for our products

We believe that our intellectual property is equal or superior to our competitors' and we do not know of any new technologies that could cause a shift away from digital power electronic solutions in the end markets we serve. However, major advancements in digital power electronic technologies by competitors or the advent of technologies obviating digital power-electronic solutions could have an adverse effect on our financial position or results of operations.

Index

The loss of one or more major customers could adversely affect our results of operations or financial condition

We rely on several large customers for a significant portion of our sales. While we have taken actions to diversify our customer base, we have three customers whose purchases from us represented in the aggregate approximately 13% of our net sales in fiscal 2013. The loss of one or more of these customers or significant decreases in these customers' purchase levels could have an adverse effect on our business and on our results of operations.

Certain of our competitors have substantially greater resources and greater global reach than us

We compete with crane and hoist drive manufacturers and drive system integrators, radio control manufacturers, elevator drive manufacturers and control system integrators, and mining machinery drive builders. The total number of such enterprises with whom we compete directly is believed to be fewer than 100. However, certain of our competitors are significantly larger and have substantially greater resources than we do, and some are global in scope, whereas we currently compete primarily in the North American market.

We have significant pension liabilities and funding obligations

Our defined benefit pension plan was underfunded as of December 29, 2013, due primarily to reductions in interest rates over the past decade, which impact the discount rate used to estimate the net present value of our pension obligations. Current actuarial estimates indicate that we will be required to make significant contributions to our defined benefit pension plan, which may consume the majority of our cash generated from operations for the next several years.

In addition, changes in interest rates, investment returns, mortality assumptions, and other factors could adversely affect the funded status of our pension plan in the future and require that we contribute additional cash to the pension plan over and above the amounts currently estimated. Such volatility could also increase pension expense in periods beyond fiscal 2013. As a result, we may be required to seek additional sources of cash to fund both our operations and our required pension contributions.

We may seek additional capital through private or public sales of equity, debt or convertible debt securities, which could have negative effects on our existing investors

We may seek to raise additional funding through equity or certain forms of debt financing in the future that could dilute the percentage ownership held by existing stockholders. In addition, new investors may demand rights or privileges that are preferable to, or senior to, those of our existing stockholders, such as interest payments, dividends or warrants, as a condition to completing a transaction that provides us with capital.

We may have limited access to additional financing

Macroeconomic conditions several years ago led to volatility in security prices, the failure of financial institutions, diminished liquidity and credit availability, and deflation in the valuation of investment vehicles across varied asset classes.

In the event capital and credit markets again become illiquid and the availability of funds becomes limited, we could incur increased costs associated with future equity or debt financing transactions. Our ability to access the capital and credit markets may be limited by these or other factors unique to our Company. Limited access to financing opportunities in the future could have a material adverse impact on our ability to fund our operations or meet our corporate obligations.

We are subject to credit risk

We are exposed to the credit risk of our customers, including risk of bankruptcy, and are subject to losses from uncollectable accounts receivable. If the financial condition of any of our customers deteriorates and impairs their ability to make payments, we could incur future write-offs of accounts receivable that could have a material impact on our financial position, results of operations, or cash flows.

We are reliant on suppliers

We purchase raw materials and subassemblies used in our products from third-party suppliers, and also purchase finished goods for resale to customers from third-party subcontractors. If our suppliers or subcontractors cannot meet their commitments to us in terms of price, delivery, or quality, it may negatively impact our ability to meet our commitments to our customers. This could result in disruption of production, delay in shipments to customers, higher material costs, quality issues

Index

with our products and damage to customer relationships. In addition, increases in the cost of raw materials purchased from third-party suppliers could negatively impact our gross profit and results of operations.

We may face claims of infringement on the intellectual property of others, or others may infringe upon our intellectual property

Our future success depends in part on our ability to prevent others from infringing on our proprietary rights, as well as our ability to operate without infringing upon the proprietary rights of others. We may be required at times to take legal action to protect our proprietary rights and, despite our best efforts, we may be sued for infringing on the patent rights of others. Patent litigation is costly and, even if we prevail, the cost of such litigation could adversely affect our financial condition. In addition, we could be adversely affected financially should we be judged to have infringed upon the intellectual property of others.

We may suffer losses resulting from legal and environmental issues

Our results of operations could be adversely impacted by pending and future litigation, including claims related to, but not limited to, product liability, patent infringement, contracts, employment and labor issues, personal injury, and property damage, including damage to the environment.

In some cases, we have agreed to provide indemnification against legal and environmental liabilities and potential liabilities associated with operations that we have divested, including certain motor, generator, lighting ballast, transformer, drive and power supply manufacturing operations. If we are required to make payments under such indemnification obligations, such payments could have a material adverse impact on our financial position, results of operations, or cash flows. Further, we have been indemnified against potential legal and environmental liabilities and potential liabilities associated with operations that we have acquired, including lighting ballast, transformer, capacitor, and crane brake manufacturing operations that were subsequently divested. If not borne by the indemnifying party, such liabilities, if any, could be borne by us and have an adverse effect on our financial position or results of operations.

Ordinary transfers of our common stock between shareholders could result in an ownership change as defined in Section 382 of the Internal Revenue Code, limiting our ability to fully utilize our net operating loss carryforwards for U.S. federal tax purposes

We had net operating loss (“NOL”) carryforwards for U.S. federal tax purposes of \$227 million as of December 29, 2013. Our NOLs have a carryforward period of 20 years with expiration dates ranging from 2019 to 2033. We anticipate that no federal income tax liability, other than alternative minimum tax, would be recorded if and when we generate U.S. taxable income and such carryforwards are utilized.

We periodically evaluate whether ordinary transfers of our common stock between shareholders have resulted in an ownership change as defined in Section 382 of the Internal Revenue Code. Based on available information, we have determined that no such ownership change has occurred. If such ownership change had occurred, utilization of the Company’s NOLs would be subject to annual limitation provisions per the Internal Revenue Code and similar state laws. Such annual limitations could defer the utilization of NOL carryforwards and accelerate payment of federal income taxes, and could result in the expiration of a portion of the NOL carryforwards before utilization. An ownership change under Section 382 of the Internal Revenue Code would not have a material adverse effect on our results of operations or financial position, as we have provided a full valuation allowance against substantially all of our deferred tax assets. Ordinary transfers of our common stock between shareholders in future periods could result in an ownership change in such periods and accordingly, at that time, limit the utilization of our NOLs as described above.

Index

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Magnetek's headquarters and each of our facilities for the continuing operations of the Company are listed below, each of which is leased.

Location	Lease Term	Approximate Size (Sq.Ft.)	Principal Use
Menomonee Falls, Wisconsin	2020	143,700	Power control systems manufacturing and corporate headquarters
Mississauga, Canada	2016	11,180	Sales and service
Pittsburgh, Pennsylvania	2016	11,400	Power control systems manufacturing
Bedford, England	2023	7,000	Sales and service
Bridgeville, Pennsylvania	2017	6,800	Engineering

We believe our facilities are in satisfactory condition and are adequate for our continuing operations.

ITEM 3. LEGAL PROCEEDINGS

We are involved from time to time in legal actions for product liability and other matters that arise in the ordinary course of our business. We are also involved in legal actions associated with our discontinued business operations, including product liability, asbestos-related liability, and environmental proceedings relating to cleanup costs associated with alleged past waste disposal practices at several previously utilized, owned or leased facilities and offsite locations. It is not possible to predict with certainty the outcome of any of these unresolved legal actions or proceedings or the range of possible loss or recovery. A discussion of these matters appears in Note 10 of the Notes to Consolidated Financial Statements under Item 8, including a discussion of whether or not these unresolved matters will have a material impact on our financial position or results of operations.

Litigation - Product Liability

We have been named, along with multiple other defendants, in asbestos-related lawsuits associated with business operations we previously acquired, but which are no longer owned. During our ownership, none of the businesses produced or sold asbestos-containing products. For such claims, we are either contractually indemnified against liability, or contractually obligated to defend and indemnify the purchaser of these former Magnetek business operations. With respect to these claims, we are uninsured, but we believe that we have no such liability and we aggressively seek dismissal from these proceedings. Management does not believe the asbestos proceedings, individually or in the aggregate, will have a material adverse effect on our financial position or results of operations.

Litigation - Patent Infringement and Related Proceedings

In August 2008, we filed a complaint in the Circuit Court of Cook County, Illinois, County Department, Law Division, against Kirkland & Ellis, LLP ("K&E"). The lawsuit involved a claim for breach of professional responsibility arising out of K&E's representation of Magnetek in the patent infringement action, *Ole K. Nilssen v. Magnetek, Inc.* We alleged that, as a result of K&E's negligent breach of professional duty in failing to discover or investigate the existence of prior art and prior misconduct which would have made Nilssen's patent claim unenforceable or invalidated his patent, we suffered an arbitration award and judgment in the amount of \$23.4 million, which judgment was ultimately settled by the payment to Nilssen of \$18.75 million. Accordingly, we sought damages in the amount of \$18.75 million. Following a December 2011 mediation, on January 9, 2012, we entered into a settlement agreement

with K&E. Under the terms of the settlement agreement all outstanding claims were settled and released with prejudice in consideration of K&E making a \$5 million settlement payment to us, which we received in January 2012. The federal proceeding and the Illinois Supreme Court proceeding were subsequently dismissed, also in January 2012. We entered into the settlement agreement to eliminate the uncertainties, burden, and expense of further litigation. We recorded the settlement payment as a gain in discontinued operations in the first quarter of fiscal 2012.

Index

As we previously reported, Universal Lighting Technologies, Inc. (“ULT”) and Nilssen entered into a consent judgment in April 2008, for dismissal, on collateral estoppel grounds, of the patent infringement lawsuit filed by Nilssen against ULT. We had provided the defense in the lawsuit pursuant to an indemnification claim from ULT subject to the terms of the sale agreement under which ULT purchased our lighting business in 2003. In September 2009, Nilssen and ULT entered into a settlement agreement relating to attorney’s fees. Under the settlement agreement, Nilssen paid us an amount of \$0.75 million as attorney’s fees as well as a nominal amount for costs. However, if a motion by Nilssen was successful such that ULT ceased to be the “prevailing party” and was no longer entitled to attorney’s fees, then we would have been obligated to refund the \$0.75 million attorney’s fees settlement amount. In November 2011, the court ordered Nilssen’s motion be denied and, as a result, Nilssen’s potential claim to a refund of the attorney’s fees settlement amount was extinguished. As a result, we recorded a gain of \$0.75 million in discontinued operations in the six-month transition period ended January 1, 2012.

Litigation - Other

In November 2007, a lawsuit was filed by Antonio Canova in Italy, in the Court of Arezzo, Labor Law Section, against us and Power-One Italy, S.p.A. Mr. Canova is a former Executive Vice President of Magnetek and was Deputy Chairman and Managing Director of our former Italian subsidiary, Magnetek, S.p.A. Mr. Canova asserted claims for damages in the amount of 3.5 million Euros (approximately US\$4.8 million) allegedly incurred in connection with the termination of his employment at the time of the sale of our power electronics business to Power-One, Inc. (“Power One”) in October 2006. The claims against us relate to a change of control agreement and restricted stock grant. In March 2012, the Court of Arezzo ruled in our favor, dismissing Mr. Canova’s claims against us as invalid. Mr. Canova appealed the ruling in September 2012. On October 1, 2013, the Court of Appeal of Florence issued its decision in the Canova matter rejecting all claims of the appellant Canova against Magnetek, Inc. and ordered Mr. Canova to pay a nominal amount in favor of Magnetek, Inc. toward our legal expenses incurred in the appeal. Mr. Canova retains the right to appeal the decision to the Supreme Court within one year after the decision of the Court of Appeal was formally published (October 16, 2013). Any review by the Supreme Court would be limited to a review of the legal basis of the decision and no review of the merits of the case is possible.

In October 2010, we received a request for indemnification from Power-One for an Italian tax matter arising out of the sale of our power electronics business to Power-One in October 2006. With a reservation of rights, we affirmed our obligation to indemnify Power-One for certain pre-closing taxes. The sale included an Italian company, Magnetek, S.p.A., and its wholly owned subsidiary, Magnetek Electronics (Shenzhen) Co. Ltd. (the “Power-One China Subsidiary”). The tax authority in Arezzo, Italy, issued a notice of audit report in September 2010 wherein it asserted that the Power-One China Subsidiary had its administrative headquarters in Italy with fiscal residence in Italy and, therefore, was subject to taxation in Italy. In November 2010, the tax authority issued a notice of tax assessment for the period of July 2003 to June 2004, alleging that taxes of approximately 1.9 million Euros (approximately US\$2.6 million) were due in Italy on taxable income earned by the Power-One China Subsidiary during this period. In addition, the assessment alleged potential penalties calculated at 120% of the tax amount claimed together with interest in the amount of approximately 2.6 million Euros (or approximately US\$3.6 million) for the alleged failure of the Power-One China Subsidiary to file its Italian tax return. The Power-One China Subsidiary filed its response with the provincial tax commission of Arezzo, Italy in January 2011. The tax authority in Arezzo, Italy issued a tax inspection report in January 2011 for the periods July 2002 to June 2003 and July 2004 to December 2006 claiming that the Power-One China Subsidiary failed to file Italian tax returns for the reported periods. A hearing before the Tax Court was held on July 5, 2012 on the tax assessment for the period of July 2003 to June 2004. On September 20, 2012, the Tax Court ruled in favor of the Power-One China Subsidiary dismissing the tax assessment for the period of July 2003 to June 2004. On February 22, 2013, the tax authority filed an appeal of the Tax Court’s September 2012 ruling. On August 2, 2012, the tax authority in Arezzo, Italy issued additional notices of tax assessment for the periods July 2002 to June 2003 and July 2004 to December 2006, alleging that taxes of approximately 9.5 million Euros (approximately US\$13 million) were due in Italy on taxable income earned by the Power-One China Subsidiary

together with an allegation of potential penalties in the amount of approximately 2.8 million Euros (approximately US\$3.9 million) for the alleged failure of the Power-One China Subsidiary to file its Italian tax returns. We believe the Italian tax claims are without merit and intend to vigorously defend against them.

Litigation - Environmental Matters

From time to time, we have taken action to bring certain facilities associated with previously owned businesses into compliance with applicable environmental laws and regulations. Upon the subsequent sale of certain businesses, we agreed to indemnify the buyers against environmental claims associated with the divested operations, subject to certain conditions and limitations. Remediation activities, including those related to our indemnification obligations, did not involve material expenditures during fiscal years 2013 and 2012, transition period 2011, or fiscal year 2011.

We have also been identified by the United States Environmental Protection Agency and certain state agencies as a potentially responsible party for clean-up costs associated with alleged past waste disposal practices at several previously

Index

utilized, owned, or leased facilities and offsite locations. Our remediation activities as a potentially responsible party were not material in fiscal years 2013 and 2012, transition period 2011, or fiscal year 2011. Although the materiality of future expenditures for environmental activities may be affected by the level and type of contamination, the extent and nature of clean-up activities required by governmental authorities, the nature of our alleged connection to the contaminated sites, the number and financial resources of other potentially responsible parties, the availability of indemnification rights against third parties and the identification of additional contaminated sites, our estimated share of liability, if any, for environmental remediation, including its indemnification obligations, is not expected to be material.

Bridgeport, Connecticut Facility

In 1986, we acquired the stock of Universal Manufacturing Company (“Universal”) from a predecessor of Fruit of the Loom (“FOL”), and the predecessor agreed to indemnify us against certain environmental liabilities arising from pre-acquisition activities at a facility in Bridgeport, Connecticut. Environmental liabilities covered by the indemnification agreement included completion of additional clean-up activities, if any, at the Bridgeport facility and defense and indemnification against liability for potential response costs related to offsite disposal locations. Our leasehold interest in the Bridgeport facility was assigned to the buyer in connection with the sale of our transformer business in June 2001. FOL, the successor to the indemnification obligation, filed a petition for Reorganization under Chapter 11 of the Bankruptcy Code in 1999 and we filed a proof of claim in the proceeding for obligations related to the environmental indemnification agreement. We believe that FOL had substantially completed the clean-up obligations required by the indemnification agreement prior to the bankruptcy filing. In November 2001, we entered into an agreement with FOL involving the allocation of certain potential tax benefits and we withdrew our claims in the bankruptcy proceeding. We further believe that FOL's obligation to the state of Connecticut was not discharged in the reorganization proceeding.

In January 2007, the Connecticut Department of Environmental Protection (“DEP”) requested parties, including us, to submit reports summarizing the investigations and remediation performed to date at the site and the proposed additional investigations and remediation necessary to complete those actions at the site. DEP requested additional information from us relating to site investigations and remediation. We retained an environmental consultant to review and prepare reports on historical operations and environmental activities at the Bridgeport facility. In November 2009, we submitted our site summary report and proposed work plan to the DEP and in October 2010 submitted a revised work plan to the DEP. We agreed to the scope of the work plan with the DEP in November 2010. We have recorded a liability of \$0.5 million related to the Bridgeport facility, representing our best estimate of future site investigation costs and remediation costs which are expected to be incurred in the future. The liability is included in accrued liabilities in the consolidated balance sheet as of December 29, 2013.

FOL's inability to satisfy its remaining obligations to the state of Connecticut related to the Bridgeport facility and any offsite disposal locations or the discovery of additional environmental contamination at the Bridgeport facility could have a material adverse effect on our financial position, cash flows, or results of operations.

ITEM 4. MINE SAFETY DISCLOSURES

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on the NASDAQ Global Market under the symbol "MAG." As of February 20, 2014, there were 153 record holders of Magnetek's common stock.

All references to numbers of common shares and per-share information in this Annual Report on Form 10-K have been adjusted retroactively to reflect the Company's one for ten reverse stock split, which became effective December 5, 2011.

The following table sets forth the high and low sales prices of our common stock during each quarter of fiscal years 2013 and 2012:

Fiscal Year 2013	High	Low
Fourth Quarter	\$23.71	\$17.08
Third Quarter	18.33	16.22
Second Quarter	18.21	12.71
First Quarter	14.12	10.25
Fiscal Year 2012		
Fourth Quarter	\$12.70	\$8.61
Third Quarter	17.21	10.24
Second Quarter	19.72	13.04
First Quarter	19.24	8.63

We have not paid any cash dividends on our common stock and do not anticipate paying cash dividends in the near future. Our ability to pay dividends on our common stock is restricted by provisions in our 2007 revolving loan agreement, as amended, which provides that we may not declare or pay any dividend or make any distribution with respect to our capital stock.

There were no unregistered sales of equity securities during fiscal year 2013.

Securities Authorized for Issuance Under Equity Compensation Plans

The information required by this Item 5 is hereby incorporated by reference to the section of the Company's 2014 Proxy Statement entitled "Equity Compensation Plan Information Table."

Stock Performance Graph – Return to Shareholders

The table and line graph shown below compare the cumulative total return for the last five years and six months to holders of Magnetek common stock with the cumulative total return of the Russell 2000 Index and the NASDAQ Electronics Components index.

The table and line graph below assume an investment of \$100 in the Company's common stock and in each of the comparison groups beginning June 30, 2008, and assumes the reinvestment of all dividends, through December 29, 2013. The stock price performance information shown below should not be considered indicative of potential future stock price performance.

	Jun-08	Jun-09	Jun-10	Jun-11	Dec-11	Dec-12	Dec-13
Magnetek, Inc.	100.00	32.86	21.75	43.03	20.35	24.96	56.67
Russell 2000	100.00	74.99	91.10	125.18	112.94	131.41	182.42

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected historical financial data for Magnetek, Inc. for fiscal years 2013 and 2012, the six-month transition period ended January 1, 2012, and the previous three fiscal years. The financial data presented below is derived from our audited consolidated financial statements. For additional information, see our financial statements and the notes thereto included elsewhere in this Annual Report on Form 10-K. The following table should be read in conjunction with Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" below.

Statement of Operations Data	Fiscal Year Ended		Six Months Ended	Fiscal Year Ended		
	December 29, 2013	December 30, 2012	January 1, 2012	July 3, 2011	June 27, 2010	June 28, 2009
(Amounts in thousands, except per share data)						
Net sales	\$103,316	\$114,274	\$58,721	\$109,832	\$80,571	\$98,221

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are a global provider of digital power control systems that are used to control motion and power primarily in material handling, elevator, and mining applications. Our digital power control systems serve the needs of selected niches of traditional and emerging markets that are becoming increasingly dependent on “smart” power. We believe we are North America's largest independent supplier of digital drives, radio controls, software, and accessories for industrial cranes and hoists, and believe we are also the largest independent supplier of digital DC motion control systems for elevators. Customers include most of the industrial crane and hoist companies in North America and the world's leading elevator builders. In addition, we have a growing range of products for motion control systems used in mining equipment. We are focused on providing our customers cost-effective power solutions that will improve efficiency, reduce costs, and save energy. Other trends in our served markets we believe we can capitalize on include the adoption of wireless control solutions, modernization and upgrading of installed equipment, and an increasing desire in our markets for added features, enhanced performance, and safer workplace environments. We believe that with our focus on innovation and our application expertise, combined with strong brand name recognition, broad product offerings and sales channel capabilities, we are well positioned to grow our business by gaining share in both our served markets as well as in new markets. Our operations are located in North America, predominantly in Menomonee Falls, Wisconsin, our Company headquarters.

Our product offerings for material handling applications include innovative power control systems, radio remote controls, and braking, collision avoidance, and electrification subsystems, sold primarily to OEMs of overhead cranes and hoists. While we sell primarily to OEMs of overhead cranes and hoists, we spend a great deal of effort understanding the needs of end users to gain specification. We can combine our products with engineered services to provide complete customer-specific systems solutions. A primary driver of our growth in this market is our ability to improve our customers' operations and provide them with quantifiable, and in many cases, significant returns on invested capital.

Our product offerings for elevator applications are comprised of highly integrated subsystems and drives used to control motion primarily in high-rise, high-speed elevator applications. Our products are sold mainly to elevator OEMs and we have a significant share of the available market for DC drives and subsystems used in high-rise elevators. We believe we have opportunities for growth in available elevator markets by introducing new energy-saving product offerings for both AC and DC applications, expanding the breadth of our product offerings for lower performance AC applications, and using our new product offerings to expand geographically.

Our product offerings for mining applications include drives used mainly in the underground coal mining industry. We have been a leading supplier of AC and DC digital motion control systems to underground coal mining equipment manufacturers for over 30 years. We believe that global energy needs will continue to grow significantly for the foreseeable future, and part of that need will continue to be met by traditional coal-based sources. In addition, we intend to develop and introduce new products for hard rock mining applications in an effort to reduce our reliance on the coal industry.

Several years ago, we developed and marketed power inverters for renewable energy applications which convert DC power from renewable energy sources such as wind to utility-grade AC power. Renewable energy markets have been characterized by rapidly changing product requirements, high levels of investment, and lengthy and often uncertain returns on investment. As a result, late in fiscal 2012, we made the decision to no longer pursue new business opportunities in renewable energy, as we believe we have better growth and profit opportunities in our traditional

served markets.

We intend to continue to build on our competitive strengths in established material handling, elevator, and mining markets and continue to invest in research and development to expand our product portfolio aimed at penetrating growing markets for digital power-based systems. We are focused on increasing our sales and profitability primarily by pursuing internal growth opportunities in our core product lines, seeking to increase our market share, enter new markets, and expand our current business model geographically.

Continuing Operations

We focus on a variety of key indicators to monitor our business performance. These indicators include order rates, sales growth, gross profit margin, operating profit margin, net income, earnings per share, and working capital and cash flow measures. These indicators are compared to our operating plans as well as to our prior year actual results, and are used to measure our success relative to our objectives. Our Company objectives are to grow sales at least 5% on a year-over-year

Index

basis, to achieve 35% gross margins and 10% operating profit margins, and to generate sufficient cash flow to fund our growth initiatives, our operations, and our obligations.

We experienced challenging, uncertain, and uneven conditions throughout fiscal 2013, and we believe end-market conditions in our largest served market, overhead material handling, deteriorated in 2013 from 2012 levels. In addition, conditions in our served mining markets remained depressed during fiscal 2013. These weakened market conditions were reflected in our fiscal 2013 total company sales, which decreased 10% to \$103 million from \$114 million in fiscal 2012, mainly due to the aforementioned weakness in material handling and mining markets.

Fiscal 2013 gross profit decreased to \$35.3 million, or 34.2% of sales, compared to gross profit of \$39.8 million, or 34.9% of sales for the 12 months ended December 2012. Fiscal 2012 gross profit was impacted by an asset impairment charge of \$1.2 million related to a write-down of our renewable energy fixed assets. We reported pre-tax income from operations of \$4.8 million, or 4.6% of sales, in fiscal 2013, compared to pre-tax income from operations of \$8.0 million, or 7.0% of sales in fiscal 2012.

Our cash balances decreased nearly \$14 million during fiscal 2013 despite generating adjusted EBITDA of \$12.5 million in fiscal 2013, as we contributed nearly \$25 million to our pension plan. Those contributions were one of several factors resulting in a reduction in our pension liability of \$54 million during fiscal 2013, improving the funded status of the plan as well as strengthening the Company's balance sheet. The improvement in our pension liability should also result in reduced pension expense and pension contributions in fiscal 2014 and beyond. In summary, our financial performance was satisfactory given market conditions, and we prudently deployed our resources and effectively managed our assets during fiscal 2013, entering 2014 with no liquidity issues and enhanced alternatives for our business.

Current forecasts indicate the U.S. economic recovery is continuing, albeit at a deliberate pace, and recent indicators early in 2014 point to a slowdown in industrial production in the U.S. Macro-economic conditions remain dynamic and fragile, and as a result, it remains challenging to predict the duration or the magnitude of the current economic recovery, whether in the U.S. overall or in the specific end markets we serve. However, barring a significant decline in demand in our served markets, we expect that we can grow our business through a combination of new product introductions, market share gains, and entry into new markets. Throughout 2014, we intend to focus our development and marketing efforts on organic sales growth opportunities across all product lines, and are executing actions to prudently expand our reach into new end markets and geographical areas. We also plan to continue to tightly control our operating expenses to optimize operating leverage and grow our income and cash flow.

Discontinued Operations

Certain expenses related to previously divested businesses have been classified as discontinued operations in the accompanying consolidated financial statements and footnotes for all periods presented (see Note 2 of Notes to Consolidated Financial Statements under Item 8). Expenses related to previously divested businesses have historically included certain environmental matters, asbestos claims, and product liability claims (see Note 10 of Notes to Consolidated Financial Statements under Item 8). All of these issues relate to businesses we no longer own and most relate to indemnification agreements that we entered into when we divested those businesses.

Going forward, our results of discontinued operations may include additional costs above those currently estimated and accrued related to previously divested businesses, mainly related to a power electronics business that we divested in October 2006 (see Note 10 of Notes to Consolidated Financial Statements under Item 8).

Critical Accounting Policies

Our accounting policies are more fully described in Note 1 of Notes to Consolidated Financial Statements under Item 8. As disclosed in Note 1, the preparation of financial statements in conformity with accounting principles generally accepted in the United States requires estimates and judgments by management that affect the reported amount of assets and liabilities, revenues, expenses, and related disclosures. Such estimates are based upon historical experience and other assumptions believed to be reasonable given known circumstances. Actual results could differ from those estimates. On an ongoing basis, we evaluate and update our estimates, and we believe the following discussion addresses our policies which are most critical to understanding our financial position and results of operations and which require our most complex judgments.

Index

Accounts Receivable

Accounts receivable represent amounts due from customers in the ordinary course of business. We are subject to losses from uncollectable receivables in excess of our allowances. We maintain allowances for doubtful accounts for estimated losses from customers' inability to make required payments. In order to estimate the appropriate level of these allowances, we analyze historical bad debts, customer concentrations, current customer creditworthiness, current economic trends, and changes in customer payment patterns. Our total allowance includes a specific allowance based on identification of customers where we feel full payment is in doubt, as well as a general allowance calculated based on our historical losses on accounts receivable as a percentage of historical sales. We believe that our methodology has been effective in accurately quantifying our allowance for doubtful accounts and do not anticipate changing our methodology in the future. However, if the financial condition of any of our customers was to deteriorate and impair their ability to make payments, additional allowances may be required in future periods. We believe that all appropriate allowances have been provided.

Inventories

Our inventories are stated at the lower of cost or market. Cost is determined by the first-in, first-out ("FIFO") method, including material, labor, and factory overhead. We identify potentially obsolete and excess inventory by evaluating overall inventory levels in relation to expected future requirements and market conditions, and provisions for excess and obsolete inventory and inventory valuation are recorded accordingly. Items with no usage for the past 12 months and no expected future usage are considered obsolete, and are disposed of or fully reserved. Reserves for excess inventory are determined based upon historical and anticipated usage as compared to quantities on hand. Excess inventory is defined as inventory items with on-hand quantities in excess of one year's usage and specified percentages are applied to the excess inventory value in determining the reserve. We believe that our assumptions regarding inventory valuation have been accurate in the past and believe that all appropriate reserves for excess and obsolete inventory have been provided.

Long-Lived Assets and Goodwill

We periodically evaluate the recoverability of our long-lived assets, including property, plant and equipment. Impairment charges are recorded in operating results when the undiscounted future expected cash flows derived from an asset are less than the carrying value of the asset. In fiscal 2012, given diminished prospects for sales of wind and solar inverters, we recorded an impairment charge of \$1.2 million. The impairment charge was comprised entirely of accelerated depreciation related to fixed assets used in the production and testing of inverters, and is included in cost of sales in the accompanying statement of operations for fiscal 2012 (see Note 8 of Notes to Consolidated Financial Statements under Item 8).

We are required to perform annual impairment tests of our goodwill, and may be required to test more frequently in certain circumstances. We have elected to perform our annual impairment test in the fourth quarter of our fiscal year. Per Accounting Standards Codification ("ASC") Topic 350, Intangibles – Goodwill and Others, the best evidence of fair value is quoted prices in active markets. Accordingly, we believe that our market capitalization is the best indication of fair value. No impairments were recognized in goodwill or other intangible assets during fiscal years 2013 or 2012, transition period 2011, or for fiscal year 2011.

Pension Benefits

We sponsor a defined benefit plan that was frozen in 2003 which covers primarily former employees in the U.S. The valuation of our pension plan requires the use of assumptions and estimates that attempt to anticipate future events to develop actuarial valuations of pension expense, assets, and liabilities. These assumptions include expected rates of

return on plan assets, discount rates, and mortality rates.

We determine the expected return on plan assets based upon the overall expected long-term rate of return over the period that benefits are expected to be paid. This estimate considers the targeted allocation of pension plan assets among securities with various risk and return profiles, and incorporates historical data as well as anticipated economic and market conditions by analyzing future expectations of asset performance, past return results, and current and expected asset allocations. Based on the results of these periodic reviews, we reduced our long-term expected return on plan assets to 7.75% for cost recognition purposes for fiscal years 2014 and 2013, from the expected rate of return of 8.25% for cost recognition purposes in fiscal year 2012 and transition period 2011.

The discount rate reflects the market for high-quality fixed income debt instruments and is subject to change each year. As of December 29, 2013, the discount rate used to determine the benefit obligation was 4.45% as compared to 3.5% at December 30, 2012, reflecting the increasing interest rate environment that occurred throughout much of fiscal year 2013.

Index

We believe that the assumptions we used in valuing our pension plan are appropriate and reasonable, however, actual experience may differ from our assumptions. Actual results that differ from assumptions are accumulated as deferred actuarial gains or losses, and are recognized as increases or decreases in other comprehensive income or loss ("OCI"). The amount accumulated in OCI impacts future periodic pension expense through subsequent amortization of the gains and losses in accordance with the methods specified in ASC Topic 715, Employers' Accounting for Pensions ("ASC 715"). As permitted under ASC 715, we use the corridor approach to determine the aggregate amount of actuarial gains or losses that must be recognized, and we then amortize those gains or losses on a straight-line basis over the average future life expectancy of our plan participants, due to the fact that all of our plan participants are considered inactive, as our plan is frozen. Deferred actuarial losses which will be amortized into earnings in future accounting periods totaled \$169 million at December 29, 2013.

We contributed \$24.9 million to our pension plan in fiscal 2013, and we currently expect to contribute approximately \$15 million in fiscal 2014. Pension plan expense for fiscal 2014 is expected to decrease to approximately \$3.7 million from \$6.4 million in fiscal 2013 (see Note 12 of Notes to Consolidated Financial Statements under Item 8).

Reserves for Contingencies

We periodically record the estimated impact of various conditions, situations, or circumstances involving uncertain outcomes. The accounting for such events is prescribed under ASC Topic 450, Contingencies ("ASC 450"). ASC 450 defines a contingency as an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss to an entity that will ultimately be resolved when one or more future events occur or fail to occur.

ASC 450 does not permit the accrual of gain contingencies under any circumstances. For loss contingencies, the loss must be accrued if information is available that indicates it is probable that the loss has been incurred, given the likelihood of uncertain events, and the amount of the loss can be reasonably estimated.

The accrual of a contingency involves considerable judgment and we use our internal expertise and outside experts, as necessary, to help estimate the probability that a loss has been incurred and to assist in determining the amount or range of the loss.

Income Taxes

We operate in several taxing jurisdictions and are subject to a variety of income and related taxes. Judgment is required in determining our provision for income taxes and related tax assets and liabilities. We believe we have reasonably estimated our tax positions for all jurisdictions for all open tax periods. However, it is possible that, upon closure of our tax periods, our final tax liabilities could differ from our estimates.

We record deferred income tax assets in tax jurisdictions where we generate losses for income tax purposes. We also record valuation allowances against these deferred tax assets in accordance with ASC Topic 740, Income Taxes, when in our judgment, the deferred income tax assets will likely not be realized in the foreseeable future.

Since fiscal 2002, we have provided valuation reserves against our U.S. deferred tax assets that result in a net deferred tax liability position. A portion of our deferred tax liability relates to tax-deductible amortization of goodwill that is no longer amortized for financial reporting purposes. Under applicable accounting rules, such deferred tax liabilities are considered to have an indefinite life and are therefore ineligible to be considered as a source of future taxable income in assessing the realization of deferred tax assets.

Results of Operations for the Twelve Months Ended December 29, 2013 (Fiscal Year 2013), Compared with the Twelve Months Ended December 30, 2012 (Fiscal Year 2012)

Net Sales and Gross Profit

Net sales decreased 10% to \$103.3 million for the twelve months ended December 29, 2013, from sales of \$114.3 million for the twelve months ended December 30, 2012. The decrease in net sales was due primarily to lower sales of products for material handling applications, which decreased \$4.4 million year-over-year, and lower sales of products for mining applications, which decreased \$3.3 million. In addition, sales into renewable energy markets declined \$2.9 million year-over-year following our decision late in fiscal 2012 to no longer pursue new business opportunities in those markets. Net sales by primary market were as follows, in millions:

Index

Twelve Months Ended	December 29, 2013		December 30, 2012		
	Sales	% of Sales	Sales	% of Sales	
Material handling	\$76.6	74	% \$81.0	71	%
Elevator motion control	22.2	21	% 22.6	20	%
Energy systems (renewable energy and mining)	4.5	4	% 10.7	9	%
Total net sales	\$103.3	100	% \$114.3	100	%

Gross profit for the twelve months ended December 29, 2013, decreased to \$35.3 million (34.2% of sales) from \$39.8 million (34.9% of sales) in the twelve months ended December 30, 2012. The decrease in gross profit for the twelve months ended December 30, 2012, was primarily due to lower sales volumes into material handling and mining markets, partially offset by pricing actions and cost reduction efforts enacted in the second half of fiscal 2013. Gross profit for fiscal 2012 was impacted by asset impairment charges of \$1.2 million recorded in fiscal 2012 related to our renewable energy fixed assets.

Operating Expenses

Operating expenses are comprised of R&D expense, pension expense, and selling, general and administrative (“SG&A”) expenses. R&D expense was \$3.2 million for the twelve months ended December 29, 2013, or 3.1% of sales, compared to R&D expense of \$3.8 million, or 3.4% of sales, for the twelve months ended December 30, 2012. The year-over-year decrease in R&D expense was mainly due to the lack of development projects related to products with renewable energy applications in fiscal 2013.

Pension expense for the twelve months ended December 29, 2013, decreased to \$6.4 million from \$6.9 million in the twelve months ended December 30, 2012 (see Note 12 of Notes to Consolidated Financial Statements under Item 8).

SG&A expense was \$20.9 million, or 20.3% of sales, for the twelve months ended December 29, 2013, compared to \$21.1 million, or 18.4% of sales, for the twelve months ended December 30, 2012. Selling expenses were \$12.0 million, or 11.6% of sales, for the twelve months ended December 29, 2013, comparable to \$12.2 million, or 10.6% of sales, for the twelve months ended December 30, 2012. General and administrative (“G&A”) expense was \$8.9 million for the twelve months ended December 29, 2013, comparable to G&A expense of \$8.9 million for the twelve months ended December 30, 2012.

Income from Operations

Income from operations was \$4.8 million for the twelve months ended December 29, 2013, compared to income from operations of \$8.0 million for the twelve months ended December 30, 2012.

Provision for Income Taxes

We recorded a tax provision of \$1.0 million for the twelve months ended December 29, 2013, and \$1.1 million for the twelve months ended December 30, 2012, mainly due to non-cash deferred tax provisions of \$0.9 million and \$1.0 million recorded in those periods respectively, related to changes in deferred tax liabilities from goodwill amortization. The remainder of our provision or benefit for income taxes is comprised of provisions or benefit for income taxes on our pretax operating results in Canada (see Note 9 of Notes to Consolidated Financial Statements under Item 8).

Income from Continuing Operations

For the twelve months ended December 29, 2013, we recorded income from continuing operations of \$3.8 million, or \$1.13 per diluted share, compared to income from continuing operations of \$6.9 million for the twelve months ended December 30, 2012, or \$2.14 per share, on a diluted basis.

Income (Loss) from Discontinued Operations

We recorded a loss from discontinued operations for the twelve months ended December 29, 2013, of \$0.6 million, or a \$0.19 loss per share on a diluted basis, compared to income from discontinued operations of \$5.7 million, or \$1.76 per share on a diluted basis, for the twelve months ended December 30, 2012.

Index

Our loss from discontinued operations for the twelve month period ended December 29, 2013, related entirely to previously divested businesses, comprised mainly of legal and professional fees incurred in various matters (see Notes 2 and 10 of Notes to Consolidated Financial Statements under Item 8).

Income from discontinued operations for the twelve months ended December 30, 2012, includes a gain of \$5.0 million from a settlement agreement to resolve a legal matter, as well as income of \$1.2 million from non-cash adjustments of liabilities related to previously owned businesses, partially offset by \$0.5 million of legal fees and other costs related to previously divested businesses (see Notes 2 and 10 of Notes to Consolidated Financial Statements under Item 8).

Net Income

We recorded net income for the twelve months ended December 29, 2013, of \$3.1 million, or \$0.94 per share on a diluted basis, compared to net income of \$12.6 million, or \$3.90 per share, on a diluted basis for the twelve months ended December 30, 2012.

Results of Operations for the Twelve Months Ended December 30, 2012 (Fiscal Year 2012), Compared with the Twelve Months Ended January 1, 2012 (Unaudited)

Net Sales and Gross Profit

Net sales decreased 3% to \$114.3 million for the twelve months ended December 30, 2012, from sales of \$117.6 million for the twelve months ended January 1, 2012. The decrease in net sales was due primarily to lower sales of power inverters for renewable energy applications, which decreased \$10.9 million year-over-year, and lower sales of products for mining applications, which decreased \$1.8 million. These sales decreases were partially offset by higher sales of products for material handling applications, which increased by \$10.3 million for the twelve months ended December 30, 2012, as compared to the same period last year. Net sales by primary market were as follows, in millions:

Twelve Months Ended	December 30, 2012		January 1, 2012		
	Sales	% of Sales	Sales	% of Sales	
					(unaudited)
Material handling	\$81.0	71	% \$70.7	60	%
Elevator motion control	22.6	20	% 23.5	20	%
Energy systems (renewable energy and mining)	10.7	9	% 23.4	20	%
Total net sales	\$114.3	100	% \$117.6	100	%

Gross profit for the twelve months ended December 30, 2012, increased to \$39.8 million (34.9% of sales) from \$39.5 million (33.6% of sales) in the comparable prior year period. The increase in gross profit for the twelve months ended December 30, 2012, was primarily due to a favorable shift in our sales mix, with increased sales of relatively higher margin material handling products and decreased sales of lower margin renewable energy inverters, partially offset by asset impairment charges of \$1.2 million recorded in fiscal 2012 related to our renewable energy fixed assets.

Operating Expenses

Operating expenses are comprised of R&D expense, pension expense, and selling, general and administrative (“SG&A”) expenses. R&D expense was \$3.8 million for the twelve months ended December 30, 2012, or 3.4% of sales, compared to R&D expense of \$4.4 million for the twelve months ended January 1, 2012. The year-over-year decrease in R&D expense was mainly due to fewer development projects related to products with renewable energy

applications in fiscal 2012.

Pension expense for the twelve months ended December 30, 2012, increased to \$6.9 million from \$5.9 million in the same period last year, mainly due to increased amortization of actuarial losses resulting from continuing declining interest rates.

SG&A expense was \$21.1 million, or 18.4% of sales, for the twelve months ended December 30, 2012, compared to \$21.2 million, or 18.0% of sales, for the twelve months ended January 2, 2012. Selling expenses were \$12.2 million, or 10.6% of sales, for the twelve months ended December 30, 2012, compared to \$10.5 million, or 8.9% of sales, for the prior year comparable period. The increase in selling expense was due to higher sales commission expense, increased payroll costs from

25

Index

headcount additions, and higher discretionary spending. General and administrative (“G&A”) expense decreased to \$8.9 million for the twelve months ended December 30, 2012, from \$10.7 million for the twelve months ended January 1, 2012, mainly due to lower incentive compensation provisions.

Income from Operations

Income from operations was \$8.0 million for the twelve months ended December 30, 2012, comparable to income from operations for the twelve months ended January 1, 2012.

Provision for Income Taxes

We recorded a tax provision of \$1.1 million for the twelve months ended December 30, 2012, and \$0.9 million for the twelve months ended January 1, 2012, mainly due to non-cash deferred tax provisions of \$1.0 million and \$0.8 million recorded in those periods respectively, related to changes in deferred tax liabilities from goodwill amortization. The remainder of our provision or benefit for income taxes is comprised of provisions or benefit for income taxes on our pretax operating results in Canada (see Note 9 of Notes to Consolidated Financial Statements under Item 8).

Income from Continuing Operations

For the twelve months ended December 30, 2012, we recorded income from continuing operations of \$6.9 million, or \$2.14 per diluted share, compared to income from continuing operations of \$7.1 million for the twelve months ended January 1, 2012, or \$2.22 per share, on a diluted basis.

Income (Loss) from Discontinued Operations

Income from discontinued operations for the twelve months ended December 30, 2012, was \$5.7 million, or \$1.76 per share on a diluted basis, compared to a loss from discontinued operations of \$0.7 million, or a \$0.21 loss per share on a diluted basis for the twelve months ended January 1, 2012.

Income from discontinued operations for the twelve months ended December 30, 2012, includes a gain of \$5.0 million from a settlement agreement to resolve a legal matter, as well as income of \$1.2 million from non-cash adjustments of liabilities related to previously owned businesses, partially offset by \$0.5 million of legal fees and other costs related to previously divested businesses (see Notes 2 and 10 of Notes to Consolidated Financial Statements under Item 8).

Our loss from discontinued operations for the twelve month period ended January 1, 2012, related entirely to previously divested businesses, comprised mainly of legal and professional fees incurred in various matters (see Notes 2 and 10 of Notes to Consolidated Financial Statements under Item 8).

Net Income

We recorded net income for the twelve months ended December 30, 2012, of \$12.6 million, or \$3.90 per share on a diluted basis, compared to net income of \$6.4 million, or \$2.01 per share, on a diluted basis for the twelve months ended January 1, 2012.

Results of Operations for the Six Months Ended January 1, 2012, Compared with the Six Months Ended January 2, 2011

Net Sales and Gross Profit

Net sales increased 15% to \$58.7 million for the six months ended January 1, 2012, from sales of \$50.9 million for the six months ended January 2, 2011. The increase in net sales was due primarily to higher sales of products for material handling applications, which increased \$11.6 million, and higher sales of products for mining applications, which increased \$1.5 million. These sales increases were partially offset by lower sales of power inverters for wind turbine applications, which decreased by \$5.9 million for the six months ended January 1, 2012, as compared to the same period last year.

Index

Net sales by primary market were as follows, in millions:

Six Months Ended	January 1, 2012		January 2, 2011 (unaudited)		
	Sales	% of Sales	Sales	% of Sales	%
Material handling	\$39.2	67	% \$27.6	54	%
Elevator motion control	11.6	20	% 11.0	22	%
Energy systems (renewable energy and mining)	7.9	13	% 12.3	24	%
Total net sales	\$58.7	100	% \$50.9	100	%

Gross profit for the six months ended January 1, 2012, increased to \$20.3 million (34.6% of sales) from \$16.0 million (31.4% of sales) in the comparable prior year period. The increase in gross profit for six months ended January 1, 2012, was primarily due to increased sales of relatively higher margin material handling and mining products.

Operating Expenses

Operating expenses are comprised of R&D expense, pension expense, and SG&A expenses. R&D expense was \$2.1 million for the six months ended January 1, 2012, or 3.6% of sales, comparable to R&D expense for the six months ended January 2, 2011.

Pension expense for the six months ended January 1, 2012, decreased to \$2.7 million from \$3.3 million for the six months ended January 2, 2011, due to higher than expected returns on assets realized in fiscal 2011 as well as a decrease in the interest cost component of pension expense due to declining interest rates.

SG&A expense was \$10.6 million, or 18.1% of sales, for the six months ended January 1, 2012, compared to \$8.3 million, or 16.3% of sales, for the six months ended January 2, 2011. Selling expenses were \$5.5 million, or 9.4% of sales, for the six months ended January 1, 2012, compared to \$4.3 million, or 7.3% of sales, for the prior year comparable period. The increase in selling expense was due to higher sales commission expense, increased payroll costs from headcount additions, and higher discretionary spending. General and administrative ("G&A") expense increased to \$5.1 million for the six months ended January 1, 2012, from \$4.0 million for the six months ended January 2, 2011, due to higher incentive compensation provisions, increases in other payroll-related costs and higher professional fees.

Income from Operations

Income from operations was \$4.9 million for the six months ended January 1, 2012, compared to income from operations of \$2.3 million for the six months ended January 2, 2011. The increase in income from operations for the six months ended January 1, 2012, was primarily due to higher sales volume and lower pension expense, partially offset by higher SG&A costs.

Interest Income and Expense

Interest income was negligible for each of the six month periods ended January 1, 2012, and January 2, 2011.

Provision for Income Taxes

We recorded a tax provision of \$0.5 million for the six months ended January 1, 2012, and \$0.3 million for the six months ended January 2, 2011, mainly due to non-cash deferred tax provisions of \$0.5 million recorded in each period related to changes in deferred tax liabilities from goodwill amortization. The remainder of our provision or benefit for

income taxes is comprised of provisions or benefit for income taxes on our pretax operating results in Canada (see Note 9 of Notes to Consolidated Financial Statements under Item 8).

Income from Continuing Operations

For the six months ended January 1, 2012, we recorded income from continuing operations of \$4.3 million, or \$1.35 per share, compared to income from continuing operations of \$2.0 million for the six months ended January 2, 2011, or \$0.65 per share, on a diluted basis.

Index

Loss from Discontinued Operations

We recorded a slight loss from discontinued operations for the six months ended January 1, 2012, or a \$0.01 loss per share on a diluted basis, compared to a loss from discontinued operations of \$0.5 million, or a \$0.17 loss per share on a diluted basis for the six months ended January 2, 2011.

Our loss from discontinued operations for the six month periods ended January 1, 2012, and January 2, 2011, related entirely to previously divested businesses, comprised mainly of legal and professional fees incurred in various matters (see Note 2 of Notes to Consolidated Financial Statements under Item 8).

Net Income

We recorded net income for the six months ended January 1, 2012, of \$4.3 million, or \$1.34 per share on a diluted basis, compared to net income of \$1.5 million, or \$0.48 per share, on a diluted basis for the six months ended January 2, 2011.

Liquidity and Capital Resources

Our unrestricted cash and cash equivalent balances decreased \$13.7 million during fiscal 2013, from \$28.7 million at December 30, 2012, to \$15.0 million at December 29, 2013. Restricted cash balances remained unchanged during fiscal 2013 at \$0.3 million. The primary source of cash during fiscal 2013 was income from continuing operations of \$3.8 million, which reflects non-cash charges totaling \$8.7 million for depreciation, amortization, pension, stock compensation and deferred income tax provisions.

The primary uses of cash in fiscal 2013 were \$24.9 million in contributions to our defined benefit pension plan, \$1.1 million of disbursements related to discontinued operations, and \$0.5 million for capital expenditures. There were no significant changes in our operating assets and liabilities in total, as decreases in accounts receivable, inventories, and other assets were largely offset by decreases in accounts payable and other accrued liabilities (see Note 14 of Notes to Consolidated Financial Statements). Our accounts receivable decreased during fiscal 2013 by \$0.7 million, and our inventories decreased \$1.5 million, both mainly due to lower volume in fiscal 2013. Current liabilities decreased during fiscal 2013 by \$2.8 million, mainly due to lower accounts payable balances again due to lower volume, and payment in fiscal 2013 of incentive compensation amounts accrued as of the end of fiscal 2012.

While we may make further investments to increase capacity and improve efficiency, we do not anticipate that capital expenditures during fiscal 2014 will exceed \$1.5 million. The expected amount of capital expenditures could change depending upon changes in revenue levels, our financial condition, and the general economy.

In December 2007, we entered into an agreement with Associated Bank, N.A. ("Associated Bank") providing for a \$10 million revolving credit facility (the "revolving facility"). Borrowings under the revolving facility bore interest at the London Interbank Offering Rate ("LIBOR") plus 1.5%, with borrowing levels determined by a borrowing base formula as defined in the agreement, based on the level of eligible accounts receivable. The revolving facility also supports the issuance of letters of credit, places certain restrictions on our ability to pay dividends or make acquisitions, and includes covenants which required minimum operating profit levels and limited annual capital expenditures. Borrowings under the revolving facility at that time were collateralized by our accounts receivable and inventory.

We have subsequently entered into several amendments to the revolving facility, mainly to increase the commitment amount of Associated Bank to \$12.5 million, extend the maturity date of the revolving facility, to broaden the security

interest of Associated Bank to collateralize all of our assets, and to establish or modify certain covenants with which we must comply under the terms of the amended revolving facility.

In June 2013, we entered into the fifth amendment to the revolving facility, the purpose of which was to (i) extend the maturity date of the revolving facility to June 15, 2014; (ii) establish minimum adjusted earnings before interest, taxes, depreciation and amortization requirements for the three-month periods ending December 31, 2012, through March 31, 2014; and (iii) establish maximum cash amounts that we can contribute to our defined benefit pension plan during the term of the agreement.

In December 2013, we entered into the most recent sixth amendment to the revolving facility, the purpose of which was to increase the maximum cash amounts that we could contribute to our defined benefit pension plan during the fourth quarter of fiscal 2013.

Index

There were no amounts outstanding under the revolving facility as of December 29, 2013. We are currently in compliance with all covenants of the revolving credit facility, as amended.

Primarily as a result of the decline in interest rates over the past decade, the accumulated benefit obligation of our defined benefit pension plan currently exceeds plan assets. We contributed \$30 million to our pension plan in December 2006 following the divestiture of our power electronics business, and subsequently have made contributions to the plan aggregating \$75 million from April 2008 through December 2013, including nearly \$25 million during fiscal 2013. These contributions have been funded by cash generated from operations and existing cash on hand. Estimated future contributions to achieve 100% funded status, as measured using current actuarial assumptions, are projected to be approximately \$43 million, relatively significant given the Company's current size and cash flow. Estimated pension contributions for fiscal 2014 are currently projected at \$15 million. Actual future contribution amounts will likely vary from current estimated future contributions, depending on future interest rate levels, values in equity and fixed income markets, and the level and timing of additional interim contributions we may make to plan assets.

Based upon current plans and business conditions, we believe that current cash balances and internally generated cash flows will be sufficient to fund anticipated operational needs, capital expenditures, required pension plan contributions, and other commitments over the next 12 months.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements or variable interest entities as of December 29, 2013.

Summary of Contractual Obligations and Commitments

Future payments due under contractual obligations of our continuing operations as of December 29, 2013, were as follows (in thousands):

	Less than 1 Year	1 to 3 Years	3 to 5 Years	More than 5 Years	Total
Pension funding obligations	\$15,284	\$13,815	\$9,400	\$4,700	\$43,199
Operating lease obligations	1,231	1,935	1,706	1,879	6,751
Purchase obligations	15,978	—	—	—	15,978
Total	\$32,493	\$15,750	\$11,106	\$6,579	\$65,928

Pension funding amounts in the table above are based on current regulations and actuarial estimates as of December 29, 2013, and are not discounted. The net present value of our future pension funding obligations, discounted at a rate of 4.45% (the rate used to estimate our projected benefit obligation at December 2013), total approximately \$38 million. Estimated pension funding obligation amounts could vary, depending on future interest rate levels, values in equity and fixed-income markets, changes in mortality rates, or changes in pension funding legislation that may be enacted in the future.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rates

The fair value of our debt was zero at December 29, 2013. However, we do have significant pension liabilities and funding obligations which vary as interest rates change. We used an average interest rate of 4.8% in determining our aggregate pension funding obligations of approximately \$43 million as of December 29, 2013 (see "Summary of

Contractual Obligations and Commitments” table under Item 7). A hypothetical increase of 100 basis points from the average interest rate used in the calculation would reduce our aggregate pension funding obligation to approximately \$23 million at December 29, 2013. Similarly, a hypothetical decrease of 100 basis points would increase our aggregate pension funding obligation to approximately \$67 million at December 29, 2013.

Foreign Currency Exchange Rates

We generally do not enter into foreign exchange contracts to protect against reductions in value and volatility of future cash flows caused by changes in exchange rates, but we may selectively enter into foreign exchange contracts to hedge certain

Index

exposures. Gains and losses on these non-U.S. currency investments would generally be offset by corresponding losses and gains on the related hedging instruments, resulting in negligible net exposure.

We did not have any foreign currency contracts, or hedge instruments or contracts outstanding at December 29, 2013, or December 30, 2012.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Magnetek, Inc.

We have audited the accompanying consolidated balance sheets of Magnetek, Inc. as of December 29, 2013 and December 30, 2012, and the related consolidated statements of operations, comprehensive income, stockholders' equity (deficit), and cash flows for the years ended December 29, 2013 and December 30, 2012, the six months ended January 1, 2012 and the year ended July 3, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Magnetek, Inc. as of December 29, 2013 and December 30, 2012, and the related consolidated statements of operations, comprehensive income, stockholders' equity (deficit), and cash flows for the years ended December 29, 2013 and December 30, 2012, the six months ended January 1, 2012 and the year ended July 3, 2011, in conformity with U.S. generally accepted accounting principles.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in the notes to consolidated financial statements are expressed in thousands unless otherwise noted, except share and per share data)

1. Summary of Significant Accounting Policies

Profile

Magnetek, Inc. (the “Company” or “Magnetek”) is a global provider of digital power control systems that are used to control motion and power primarily in material handling, elevator, and mining applications. The Company’s products consist primarily of programmable motion control and power conditioning systems used on overhead cranes and hoists, elevators, and underground mining equipment.

Basis of Presentation

The consolidated financial statements include the accounts of Magnetek, Inc. and its subsidiaries. All significant intercompany accounts and transactions have been eliminated.

Fiscal Year

On August 4, 2011, the Company's Board of Directors approved a change in the Company's fiscal year-end from the Sunday nearest to June 30 of each calendar year to the Sunday nearest to December 31, with the change to a calendar year reporting cycle beginning January 2, 2012. The intent of the change was to align the reporting of financial results more closely with peers and to better align the Company's business cycle with suppliers and customers. Fiscal years 2013 and 2012 refer to the twelve-month periods ended December 29, 2013, and December 30, 2012, respectively, and each fiscal year contained 52 weeks. Transition period 2011 refers to the six-month transition period ended January 1, 2012, and contained 26 weeks. Fiscal year 2011 refers to the twelve-month period ended July 3, 2011, and contained 53 weeks. Supplemental financial information in these financial statements with respect to the twelve months ended January 1, 2012, and the six months ended January 2, 2011, is unaudited.

Reverse Stock Split

All references to numbers of common shares and per share information in this Annual Report on Form 10-K have been adjusted retroactively to reflect the one for ten reverse stock split effected by the Company on December 5, 2011.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Accounts Receivable

Accounts receivable represent amounts due from customers in the ordinary course of business. The Company is subject to losses from uncollectable receivables in excess of its allowances. The Company maintains allowances for doubtful accounts for estimated losses from customers’ inability to make required payments. In order to estimate the appropriate level of these allowances, the Company analyzes historical bad debts, customer concentrations, current customer creditworthiness, current economic trends, and changes in customer payment patterns. If the financial

conditions of the Company's customers were to deteriorate and impair their ability to make payments, additional allowances may be required in future periods.

Inventories

The Company's inventories are stated at the lower of cost or market. Cost is determined by the first-in, first-out ("FIFO") method, including material, labor and factory overhead. Existing inventory on hand may exceed future demand either because the product is obsolete, or the amount on hand is more than can be used to meet future needs. The Company identifies potentially obsolete and excess inventory by evaluating overall inventory levels in relation to past and anticipated usage levels. In assessing the ultimate realization of inventories, the Company is required to make judgments as to future

Index

demand requirements and compare those with the current or committed inventory levels. If future demand requirements are less favorable than those projected by management, additional inventory write-downs may be required.

Reserves for Litigation and Environmental Issues

The Company periodically records the estimated impacts of various conditions, situations, or circumstances involving uncertain outcomes. The accounting for such events is prescribed under ASC Topic 450, Contingencies. The Company does not record gain contingencies under any circumstances. For loss contingencies, the loss must be accrued if information is available that indicates it is probable that the loss has been incurred, given the likelihood of uncertain events, and if the amount of the loss can be reasonably estimated.

The accrual of a contingency involves considerable judgment on the part of management. The Company uses its internal expertise and outside experts, as necessary, to help estimate the probability that a loss has been incurred and the amount or range of the loss.

Income Taxes

The Company uses the liability method to account for income taxes. The preparation of consolidated financial statements involves estimating the Company's current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheets. An assessment of the recoverability of deferred tax assets is made, and a valuation allowance is established if necessary based upon this assessment.

Pension Benefits

The valuation of the Company's pension plan requires the use of assumptions and estimates to develop actuarial valuations of pension expense, pension assets, and pension liabilities. These assumptions include discount rates, investment returns, and mortality rates. Changes in these assumptions could potentially have a material impact on the Company's pension expense and related funding requirements.

Restricted Cash

At December 29, 2013, and December 30, 2012, the Company had \$0.3 million of restricted cash related to minimum balance requirements associated with procurement of certain raw materials and supplies.

Revenue Recognition

The Company's policy is to recognize revenue when the earnings process is complete. The criteria used in making this determination are persuasive evidence that an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collectability is reasonably assured. Sales are recorded net of returns and allowances, which are estimated using historical data, at the time of sale.

Terms of shipment are free on board shipping point, and payment is not contingent upon resale or any other matter other than passage of time. As a result, title to goods passes upon shipment. Amounts billed to customers for shipping costs are reflected in net sales; shipping costs are reflected in cost of sales.

Property, Plant and Equipment

Additions and improvements are capitalized at cost, whereas expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is provided over the estimated useful lives of the respective assets principally on the straight-line method (machinery and equipment normally five to ten years; buildings and leasehold improvements over the shorter of the lease term or the economic life, estimated at ten to forty years).

Goodwill

In accordance with ASC Topic 350, Goodwill and Other Intangible Assets, the Company reviews the carrying value of goodwill at least annually and more frequently if indicators of potential impairment arise. Goodwill represents the excess of the amount paid to acquire the Company over the estimated fair value of the net tangible and intangible assets acquired as of

Index

the acquisition date. Conditions that would trigger an impairment assessment include, but are not limited to, a significant adverse change in legal factors or business climate that could affect the value of an asset.

The Company performed the required annual impairment tests for fiscal years 2013 and 2012, transition period 2011, and fiscal year 2011, and found no impairment of goodwill. There can be no assurance that future goodwill impairment tests will not result in a charge to earnings.

Intangible Assets

Additions to intangible assets are capitalized at fair market value and the carrying value of indefinite-lived intangibles is reviewed for impairment at least annually. Intangible assets are included in other assets in the consolidated balance sheets, and are amortized over the estimated useful lives of the respective assets, principally on the straight-line method. In fiscal 2009 and fiscal 2010, the Company acquired several patents related to the design and manufacture of digital DC drives for material handling and mining applications. The cost of the patents, \$533 as of December 29, 2013, and December 30, 2012, was capitalized and is included in other assets in the consolidated balance sheets. The estimated useful life of the patents is 10 years. Accumulated amortization of the patents as of December 29, 2013, and December 30, 2012, was \$291 and \$238, respectively, resulting in a net carrying value as of those dates of \$242 and \$295, respectively.

Stock-Based Compensation

The Company records stock-based compensation expenses in accordance with ASC Topic 718, Stock Compensation (formerly SFAS No. 123R, Accounting for Stock-Based Compensation). Compensation expense related to all stock-based awards for fiscal years 2013 and 2012, transition period 2011, and for fiscal year 2011 is included in selling, general and administrative expense in the consolidated statements of operations. No tax benefit was recorded on the stock compensation expense for fiscal years 2013 and 2012, transition period 2011, or fiscal year 2011 due to deferred tax valuation allowances recorded by the Company in those years.

Research and Development

Expenditures for research and development are charged to expense as incurred and totaled \$3,246 for fiscal 2013, \$3,834 for fiscal 2012, \$2,103 for the six-month transition period 2011, and \$4,360 for fiscal year 2011.

Advertising

Expenditures for advertising are charged to expense as incurred and totaled \$58 for fiscal year 2013, \$88 for fiscal year 2012, \$26 for the six-month transition period 2011, and \$74 for the fiscal year 2011.

Foreign Currency Translation

The accounts of the Company's foreign entities are measured using local currency as the functional currency. Assets and liabilities are translated to the reporting currency (U.S. Dollar) at the exchange rate in effect at year-end. Revenues and expenses are translated at the rates of exchange prevailing during the year. Unrealized translation gains and losses arising from differences in exchange rates from period to period are included as a component of accumulated other comprehensive gain or loss in stockholders' equity.

Earnings Per Share

In accordance with ASC Topic 260, Earnings Per Share, basic earnings per share is computed using the weighted average number of common shares outstanding during the period. Diluted earnings per common share incorporate the incremental shares issuable upon the assumed vesting of restricted stock and the exercise of stock options as if all vesting and exercises had occurred at the beginning of the fiscal year.

Recent Accounting Pronouncements

On January 2, 2012, the Company adopted Financial Accounting Standards Board Accounting Standards Update ("ASU") 2011-05, an amendment to Accounting Standards Codification 220, Comprehensive Income. ASU 2011-05 introduces a new statement, the Consolidated Statement of Comprehensive Income, which begins with net earnings and adds or deducts other recognized changes in assets and liabilities that are not included in net earnings, but are reported directly to equity. For example, unrealized changes in currency translation adjustments are included in the measure of comprehensive income but are

Index

excluded from net income. The amendment affects only the display of those components of equity categorized as other comprehensive income and does not change existing recognition and measurement requirements that determine net earnings.

In February 2010, the SEC approved a work plan regarding convergence of US GAAP with International Financial Reporting Standards (“IFRS”) and the timeline for the preparation of financial statements by U.S. registrants under IFRS. IFRS are standards and interpretations adopted by the International Accounting Standards Board. Under the proposed roadmap, the Company would be required to prepare financial statements in accordance with IFRS no earlier than in fiscal 2016. The Company is currently assessing the potential impact of IFRS on its financial statements and will continue to follow the proposed roadmap for future developments.

2. Discontinued Operations

Certain expenses incurred related to businesses the Company no longer owns, are classified as discontinued operations. The results of discontinued operations follow:

	Fiscal Year Ended		Six Months	Fiscal Year
	December 29, 2013	December 30, 2012	Ended January 1, 2012	Ended July 3, 2011
Income (loss) from discontinued operations before interest and income taxes	\$(627)	\$703	\$(39)	\$(1,154)
Income on sale of telecom power systems business	—	32	—	—
Gain from settlement agreement, net of fees	—	4,962	—	—
Income (loss) from discontinued operations	\$(627)	\$5,697	\$(39)	\$(1,154)

The Company's loss from discontinued operations of \$0.6 million in fiscal 2013 was comprised mainly of charges of \$0.3 million for environmental matters and \$0.2 million for legal fees related to asbestos matters from previously divested businesses (see Note 10 of Notes to Consolidated Financial Statements).

Income from discontinued operations of \$5.7 million in fiscal 2012 includes a gain of \$5.0 million from a settlement agreement entered into by the Company to resolve a legal matter, as well as income of \$1.2 million from non-cash adjustments of liabilities related to previously owned businesses, partially offset by \$0.5 million of legal fees and other costs related to previously divested businesses (see Note 10 of Notes to Consolidated Financial Statements).

The Company's loss from discontinued operations in transition period 2011 includes charges of \$0.3 million for adjustments to legacy insurance reserves, \$0.2 million for environmental matters, and \$0.2 million for legal fees related to asbestos and other costs related to previously divested businesses, offset by a gain of \$0.7 million related to the recovery of legal fees paid in a patent infringement matter pursuant to an indemnification agreement (see Note 10 of Notes to Consolidated Financial Statements).

The Company's loss from discontinued operations in fiscal 2011 includes charges of \$0.5 million for environmental matters, \$0.3 million for legal fees related to asbestos issues, and \$0.3 million for other legal fees and other costs related to previously divested businesses.

3. Goodwill

The change in the carrying value of goodwill for the periods ended December 29, 2013, and December 30, 2012, is as follows:

	December 29, 2013	December 30, 2012
Balance at beginning of period	30,485	30,465
Currency translation	(58) 20
Balance at end of period	30,427	30,485

Index

4. Inventories

Inventories consist of the following:

	December 29, 2013	December 30, 2012
Raw materials	\$8,531	\$9,754
Work in process	1,344	1,554
Finished goods	3,447	3,560
Total inventory	\$13,322	\$14,868

5. Bank Borrowing Arrangements

In November 2007, the Company entered into an agreement with Associated Bank, N.A. (“Associated Bank”) providing for a \$10 million revolving credit facility (the “revolving facility”). Borrowings under the revolving facility bore interest at the London Interbank Offering Rate (“LIBOR”) plus 1.5%, with borrowing levels determined by a borrowing base formula as defined in the agreement, which includes the level of eligible accounts receivable. The revolving facility also supports the issuance of letters of credit, places certain restrictions on the Company’s ability to pay dividends or make acquisitions, and includes covenants that require minimum operating profit levels and limit annual capital expenditures. Borrowings under the revolving facility were originally collateralized by the Company’s accounts receivable and inventory.

The Company has subsequently entered into several amendments to the revolving facility, mainly to increase the commitment amount to \$12.5 million, to extend the maturity date of the revolving facility, to broaden the security interest of Associated Bank to collateralize all assets of the Company, and to establish or modify certain covenants with which the Company must comply under the terms of the amended revolving facility.

In June 2013, the Company and Associated Bank entered into the fifth amendment to the revolving facility, the purpose of which was to (i) extend the maturity date of the revolving facility to June 15, 2014; (ii) establish minimum adjusted earnings before interest, taxes, depreciation and amortization requirements for the three-month periods ending December 31, 2012, through March 31, 2014; and (iii) establish maximum cash amounts the Company can contribute to its defined benefit pension plan during the term of the agreement.

In December 2013, the Company and Associated Bank entered into the most recent sixth amendment to the revolving facility, the purpose of which was to increase the maximum cash amounts the Company could contribute to its defined benefit pension plan during the fourth quarter of fiscal 2013.

There were no amounts outstanding on the amended revolving facility as of December 29, 2013. The Company is currently in compliance with all covenants of the revolving facility, as amended.

Index

6. Earnings (Loss) Per Share

The following table sets forth the computation of basic and diluted earnings (loss) per share for the periods ended:

	Fiscal Year Ended		Six Months	Fiscal Year
	December 29, 2013	December 30, 2012	Ended January 1, 2012	Ended July 3, 2011
Numerator:				
Income (loss) from continuing operations	\$3,759	\$6,926	\$4,331	\$4,817
Income (loss) from discontinued operations	(627) 5,697	(39) (1,154
Net income (loss)	\$3,132	\$12,623	\$4,292	\$3,663
Denominator:				
Weighted average shares for basic income (loss) per share	3,231	3,174	3,148	3,134
Add dilutive effect of stock options outstanding	108	64	64	53
Weighted average shares for diluted income (loss) per share	3,339	3,238	3,212	3,187
Income (loss) per share - basic:				
Income (loss) per share from continuing operations	\$1.16	\$2.18	\$1.38	\$1.54
Income (loss) per share from discontinued operations	\$(0.19) \$1.79	\$(0.01) \$(0.37
Net income (loss) per share - basic	\$0.97	\$3.97	\$1.36	\$1.17
Income (loss) per share - diluted:				
Income (loss) per share from continuing operations	\$1.13	\$2.14	\$1.35	\$1.51
Income (loss) per share from discontinued operations	\$(0.19) \$1.76	\$(0.01) \$(0.37
Net income (loss) per share - diluted	\$0.94	\$3.90	\$1.34	\$1.15

Outstanding options to purchase 147 thousand and 174 thousand shares of common stock for fiscal years 2013 and 2012, respectively, have not been included in the Company's computation of weighted average shares for diluted earnings per share because the effect would have been anti-dilutive. Similarly, outstanding options to purchase 179 thousand and 178 thousand shares of common stock for the six-month period ended January 1, 2012 and fiscal year 2011, respectively, have not been included in the Company's computation of weighted average shares for diluted earnings per share because the effect would have been anti-dilutive.

7. Fair Values of Financial Instruments

The carrying amounts of certain financial instruments including cash, restricted cash, accounts receivable, and accounts payable approximate their fair values based on the short-term nature of these instruments. In addition, the Company's investment in an annuity contract of \$3.9 million at December 29, 2013, and \$4.6 million at December 30, 2012, is recorded at fair value based upon the net asset value of the contract. The annuity contract is included in other assets in the accompanying consolidated balance sheet and is classified as a level 2 asset within the fair value hierarchy (refer to Note 12 of Notes to Consolidated Financial Statements for a definition of the fair value levels).

8. Asset Impairment Charges

In the fourth quarter of fiscal 2012, the Company committed to a plan to no longer pursue new business opportunities in renewable energy, due to significantly diminished expectations for future sales of inverters into renewable energy

markets. As a result, the Company determined at that time that its fixed assets used in the manufacture and test of inverters were impaired. Accordingly, the Company recorded a non-cash, pre-tax impairment charge of \$1.2 million. The charge is included in cost of sales in the accompanying consolidated statement of operations for the fiscal year ended December 30, 2012. The impairment charge reduced the net book value of the Company's renewable energy fixed assets to a negligible amount.

Index

9. Income Taxes

The Company's provision for income taxes, all of which relates to its continuing operations, consists of the following:

For the period ended	Fiscal Year Ended		Six Months	Fiscal Year
	December 29, 2013	December 30, 2012	Ended January 1, 2012	Ended July 3, 2011
Current				
Federal	\$—	\$—	\$—	\$—
State	—	45	—	—
Foreign	87	101	48	(219)
Deferred				
Federal	926	955	477	953
State and foreign	3	(5)	24	(104)
Provision for income taxes	\$1,016	\$1,096	\$549	\$630

The Company did not record any provision for income taxes related to its discontinued operations for fiscal years 2013 or 2012, transition period 2011, or for fiscal year 2011, as the Company has a full valuation allowance and available net operating losses.

A reconciliation of the Company's effective tax rate for continuing operations to the statutory Federal tax rate follows:

	Fiscal Year Ended				Six Months Ended		Fiscal Year Ended	
	December 29, 2013		December 30, 2012		January 1, 2012		July 3, 2011	
	Amount	%	Amount	%	Amount	%	Amount	%
Provision (benefit) computed at the statutory rate	\$1,670	35.0	\$2,808	35.0	\$1,708	35.0	\$1,906	35.0
Losses not benefited	—	—	—	—	—	—	—	—
Use of net operating losses	(622)	(13.0)	(1,652)	(20.2)	(1,124)	(23.0)	(896)	(16.5)
Foreign tax rate differential	(32)	(0.7)	(60)	(0.8)	(35)	(0.7)	(380)	(7.0)
Total provision for income taxes	\$1,016	21.3	\$1,096	14.0	\$549	11.3	\$630	11.5

Income before provision for income taxes of the Company's foreign subsidiaries (located in Canada and the United Kingdom) included in continuing operations was approximately \$368, \$447, \$305, and \$341 for fiscal years 2013 and 2012, the six-month transition period 2011, and fiscal year 2011, respectively.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

Index

Significant components of the Company's deferred tax liabilities and assets as of December 29, 2013, and December 30, 2012, follow:

	December 29, 2013		December 30, 2012	
Deferred tax liabilities				
Depreciation and amortization (including differences in the basis of acquired assets)	\$(9,125)	\$(8,204)
Total deferred tax liabilities	(9,125)	(8,204)
Deferred tax assets				
Inventory and other reserves	2,329		2,152	
Pension benefit obligation	19,055		40,240	
Net operating loss and capital loss carryforwards	88,784		85,080	
Total gross deferred tax assets	110,168		127,472	
Less valuation allowance	(110,090)	(127,386)
Deferred tax assets less valuation allowance	78		86	
Net deferred tax liability	\$(9,047)	\$(8,118)

The Company records valuation allowances against its deferred tax assets, when necessary, in accordance with ASC Topic 740, Income Taxes. Realization of deferred tax assets (such as net operating loss carryforwards) is dependent on future taxable earnings and may therefore be uncertain. To the extent the Company believes that recovery is unlikely, a valuation allowance is established against its deferred tax asset, which increases the Company's income tax expense in the period such determination is made. Due to the uncertainty surrounding the timing of realizing the benefits of its deferred tax assets in future tax returns, the Company has recorded a valuation allowance against its otherwise recognizable deferred tax assets.

The Company had net operating loss ("NOL") carryforwards for U.S. federal tax purposes of \$227 million and \$212 million as of December 29, 2013, and December 30, 2012, respectively. The potential tax benefit of all carryforwards has been fully reserved with a valuation allowance and therefore there is no net tax asset on the consolidated balance sheets related to this asset at December 29, 2013, or at December 30, 2012. The Company's NOLs have a carryforward period of 20 years with expiration dates ranging from 2019 to 2033. As the balance sheet reflects no benefit of such NOLs, the Company anticipates that no federal tax liability, other than alternative minimum tax, would be recorded when U.S. taxable income is generated and such carryforwards are utilized.

The Company regularly completes internal evaluations as to whether ordinary transfers of the Company's common stock between shareholders have resulted in an ownership change as defined in Section 382 of the Internal Revenue Code. Based on available information, the Company has determined that no such ownership change has occurred as of the end of December 29, 2013. If such ownership change had occurred, utilization of the Company's NOLs would be subject to annual limitation provisions per the Internal Revenue Code and similar state laws.

Index

10. Commitments and Contingencies

Leases

The Company leases certain facilities and machinery and equipment primarily under operating lease arrangements, which generally provide renewal options. Future minimum rental payments under noncancellable operating leases as of December 29, 2013, follow:

Fiscal Year	Minimum Lease Payments
2014	1,231
2015	997
2016	938
2017	859
2018	847
Thereafter	1,879
Total lease payments	\$6,751

Rent expense was \$1.3 million, \$1.1 million, \$0.6 million, and \$1.2 million for fiscal years 2013 and 2012, the six-month transition period 2011, and fiscal year 2011, respectively.

Litigation-Product Liability

The Company has been named, along with multiple other defendants, in asbestos-related lawsuits associated with business operations previously acquired by the Company, but which are no longer owned. During the Company's ownership, none of the businesses produced or sold asbestos-containing products. For such claims, the Company is either contractually indemnified against liability, or contractually obligated to defend and indemnify the purchaser of these former Magnetek business operations. With respect to these claims, the Company is uninsured, but management believes that it has no such liability and the Company aggressively seeks dismissal from these proceedings. Management does not believe the asbestos proceedings, individually or in the aggregate, will have a material adverse effect on its financial position or results of operations. Given the nature of the above issues, uncertainty of the ultimate outcome, and inability to estimate the potential loss, no amounts have been reserved for these matters.

Litigation—Patent Infringement and Related Proceedings

In August 2008, the Company filed a complaint in the Circuit Court of Cook County, Illinois, County Department, Law Division, against Kirkland & Ellis, LLP (“K&E”). The lawsuit involved a claim for breach of professional responsibility arising out of K&E’s representation of Magnetek in the patent infringement action, *Ole K. Nilssen v. Magnetek, Inc.* The Company alleged that, as a result of K&E’s negligent breach of professional duty in failing to discover or investigate the existence of prior art and prior misconduct which would have made Nilssen’s patent claim unenforceable or invalidated his patent, the Company suffered an arbitration award and judgment in the amount of \$23.4 million, which judgment was ultimately settled by the payment to Nilssen of \$18.75 million. The Company sought damages in the amount of \$18.75 million. Following a December 2011 mediation, on January 9, 2012, the Company entered into a settlement agreement with K&E. Under the terms of the settlement agreement all outstanding claims were settled and released with prejudice in consideration of K&E making a \$5 million settlement payment to Magnetek, which the Company received in January 2012. The federal proceeding and the Illinois Supreme Court proceeding were subsequently dismissed, also in January 2012. The Company entered into the settlement agreement to

eliminate the uncertainties, burden and expense of further litigation. The Company recorded the settlement payment as a gain in discontinued operations in the first quarter of fiscal 2012, as the initial patent infringement claim related to a business the Company divested in 2003.

As previously reported by the Company, Universal Lighting Technologies, Inc. (“ULT”) and Nilssen entered into a consent judgment in April 2008, for dismissal, on collateral estoppel grounds, of the patent infringement lawsuit filed by Nilssen against ULT. The Company had provided the defense in the lawsuit pursuant to an indemnification claim from ULT subject to the terms of the sale agreement under which ULT purchased Magnetek’s lighting business in 2003. In September 2009, Nilssen and ULT entered into a settlement agreement relating to attorney’s fees. Under the settlement agreement, Nilssen

Index

paid to the Company an amount of \$0.75 million as attorney's fees as well as a nominal amount for costs. However, if a motion by Nilssen was successful such that ULT ceased to be the "prevailing party" and was no longer entitled to attorney's fees, then the Company would have been obligated to refund the \$0.75 million attorney's fees settlement amount. In November 2011, the court ordered Nilssen's motion be denied and, as a result, Nilssen's potential claim to a refund of the attorney's fees settlement amount was extinguished. As a result, the Company recorded a gain of \$0.75 million in discontinued operations in the six-month transition period ended January 1, 2012.

Litigation-Other

In November 2007, a lawsuit was filed by Antonio Canova in Italy, in the Court of Arezzo, Labor Law Section, against the Company and Power-One Italy, S.p.A. Mr. Canova is a former Executive Vice President of the Company and was Deputy Chairman and Managing Director of the Company's former Italian subsidiary, Magnetek, S.p.A. Mr. Canova asserted claims for damages in the amount of 3.5 million Euros (approximately US\$4.8 million) allegedly incurred in connection with the termination of his employment at the time of the sale of the Company's power electronics business to Power-One, Inc. ("Power One") in October 2006. The claims against the Company relate to a change of control agreement and restricted stock grant. On March 8, 2012, the Court of Arezzo ruled in the Company's favor, dismissing Mr. Canova's claims against the Company as invalid. Mr. Canova appealed the ruling in September 2012.

In October 2010, the Company received a request for indemnification from Power-One for an Italian tax matter arising out of the sale of the Company's power electronics business to Power-One in October 2006. With a reservation of rights, the Company affirmed its obligation to indemnify Power-One for certain pre-closing taxes. The sale included an Italian company, Magnetek, S.p.A., and its wholly owned subsidiary, Magnetek Electronics (Shenzhen) Co. Ltd. (the "Power-One China Subsidiary"). The tax authority in Arezzo, Italy, issued a notice of audit report in September 2010 wherein it asserted that the Power-One China Subsidiary had its administrative headquarters in Italy with fiscal residence in Italy and, therefore, was subject to taxation in Italy. In November 2010, the tax authority issued a notice of tax assessment for the period of July 2003 to June 2004, alleging that taxes of approximately 1.9 million Euros (approximately US\$2.6 million) were due in Italy on taxable income earned by the Power-One China Subsidiary during this period. In addition, the assessment alleged potential penalties calculated at 120% of the tax amount claimed together with interest in the amount of approximately 2.6 million Euros (or approximately US\$3.6 million) for the alleged failure of the Power-One China Subsidiary to file its Italian tax return. The Power-One China Subsidiary filed its response with the provincial tax commission of Arezzo, Italy in January 2011. The tax authority in Arezzo, Italy issued a tax inspection report in January 2011 for the periods July 2002 to June 2003 and July 2004 to December 2006 claiming that the Power-One China Subsidiary failed to file Italian tax returns for the reported periods. A hearing before the Tax Court was held on July 5, 2012 on the tax assessment for the period of July 2003 to June 2004. On September 20, 2012, the Tax Court ruled in favor of the Power-One China Subsidiary dismissing the tax assessment for the period of July 2003 to June 2004. On February 22, 2013, the tax authority filed an appeal of the Tax Court's September 2012 ruling. On August 2, 2012, the tax authority in Arezzo, Italy issued additional notices of tax assessment for the periods July 2002 to June 2003 and July 2004 to December 2006, alleging that taxes of approximately 9.5 million Euros (approximately US\$13.0 million) were due in Italy on taxable income earned by the Power-One China Subsidiary together with an allegation of potential penalties in the amount of approximately 2.8 million Euros (approximately US\$3.9 million) for the alleged failure of the Power-One China Subsidiary to file its Italian tax returns. The Company believes the Italian tax claims are without merit and intends to vigorously defend against them. On October 1, 2013, the Court of Appeal of Florence issued its decision in the Canova matter rejecting all claims of the appellant Canova against Magnetek, Inc. and ordered Mr. Canova to pay a nominal amount in favor of Magnetek, Inc. toward the Company's legal expenses incurred in the appeal. Mr. Canova retains the right to appeal the decision to the Supreme Court within one year after the decision of the Court of Appeal was formally published (October 16, 2013). Any review by the Supreme Court would be limited to a review of the legal basis of the decision and no review of the merits of the case is possible.

Litigation - Environmental Matters

From time to time, Magnetek has taken action to bring certain facilities associated with previously owned businesses into compliance with applicable environmental laws and regulations. Upon the subsequent sale of certain businesses, the Company agreed to indemnify the buyers against environmental claims associated with the divested operations, subject to certain conditions and limitations. Remediation activities, including those related to the Company's indemnification obligations, did not involve material expenditures during fiscal years 2013 or 2012, transition period 2011, or fiscal year 2011.

The Company has also been identified by the United States Environmental Protection Agency and certain state agencies as a potentially responsible party for clean-up costs associated with alleged past waste disposal practices at several previously utilized, owned or leased facilities and offsite locations. Its remediation activities as a potentially responsible party were not material in fiscal years 2013 or 2012, transition period 2011, or fiscal year 2011. Although the materiality of future

Index

expenditures for environmental activities may be affected by the level and type of contamination, the extent and nature of clean-up activities required by governmental authorities, the nature of the Company's alleged connection to the contaminated sites, the number and financial resources of other potentially responsible parties, the availability of indemnification rights against third parties and the identification of additional contaminated sites, the Company's estimated share of liability, if any, for environmental remediation, including its indemnification obligations, is not expected to be material.

Bridgeport, Connecticut Facility

In 1986, the Company acquired the stock of Universal Manufacturing Company (“Universal”) from a predecessor of Fruit of the Loom (“FOL”), and the predecessor agreed to indemnify the Company against certain environmental liabilities arising from pre-acquisition activities at a facility in Bridgeport, Connecticut. Environmental liabilities covered by the indemnification agreement included completion of additional clean-up activities, if any, at the Bridgeport facility and defense and indemnification against liability for potential response costs related to offsite disposal locations. The Company's leasehold interest in the Bridgeport facility was assigned to the buyer in connection with the sale of the Company's transformer business in June 2001. FOL, the successor to the indemnification obligation, filed a petition for Reorganization under Chapter 11 of the Bankruptcy Code in 1999 and the Company filed a proof of claim in the proceeding for obligations related to the environmental indemnification agreement. The Company believes that FOL had substantially completed the clean-up obligations required by the indemnification agreement prior to the bankruptcy filing. In November 2001, the Company and FOL entered into an agreement involving the allocation of certain potential tax benefits and Magnetek withdrew its claims in the bankruptcy proceeding. The Company further believes that FOL's obligation to the state of Connecticut was not discharged in the reorganization proceeding.

In January 2007, the Connecticut Department of Environmental Protection (“DEP”) requested parties, including the Company, to submit reports summarizing the investigations and remediation performed to date at the site and the proposed additional investigations and remediation necessary to complete those actions at the site. DEP requested additional information from the Company relating to site investigations and remediation. The Company retained an environmental consultant to review and prepare reports on historical operations and environmental activities at the Bridgeport facility. In November 2009, the Company submitted its site summary report and proposed work plan to the DEP and in October 2010 submitted a revised work plan to the DEP. The Company and the DEP agreed to the scope of the work plan in November 2010. The Company has recorded a liability of \$0.5 million related to the Bridgeport facility, representing the Company's best estimate of future site investigation costs and remediation costs which are expected to be incurred in the future. The liability is included in accrued liabilities in the consolidated balance sheet as of December 29, 2013.

FOL's inability to satisfy its remaining obligations to the state of Connecticut related to the Bridgeport facility and any offsite disposal locations or the discovery of additional environmental contamination at the Bridgeport facility could have a material adverse effect on the Company's financial position, cash flows or results of operations.

Letters of Credit

The Company had approximately \$0.8 million of outstanding letters of credit as of December 29, 2013.

Index

11. Stock-Based Compensation Agreements

The Company has two stock option plans (the "Plans"), one of which provides for the issuance of both incentive stock options (under Section 422A of the Internal Revenue Code of 1986) and non-qualified stock options at exercise prices not less than the fair market value of the Company's common stock at the date of grant, and one of which provides only for the issuance of non-qualified stock options at exercise prices not less than the fair market value of the Company's common stock at the date of grant. One of the Plans also provides for the issuance of stock appreciation rights, restricted stock, incentive bonuses and incentive stock units. The total number of shares of the Company's common stock available for issuance of stock options and other stock rights under the Plans is approximately 158 thousand shares.

Under the provisions of the Plans, key employees and non-employee directors may be granted options to purchase shares of Magnetek common stock at a price not less than its fair market value on the date of grant. Options granted have a maximum term of 10 years. Vesting requirements are determined at the discretion of the Compensation Committee of the Company's Board of Directors, with vesting periods generally ranging from two to four years. The Company uses the Black-Scholes option pricing model to calculate the fair value of stock options. The key assumptions for the Black-Scholes valuation method include the expected life of the option, stock price volatility, a risk-free interest rate, and dividend yield. Many of these assumptions are judgmental and highly sensitive. Following is a table of the weighted average fair value of the Company's stock option grants for fiscal years 2013 and 2012, transition period 2011, and for fiscal year 2011, using the Black-Scholes valuation model, assuming no dividends, with the following assumptions:

	Fiscal Year Ended		Six Months	Fiscal Year	
	December 29, 2013	December 30, 2012	Ended January 1, 2012	July 3, 2011	
Expected life in years	5.8	5.3	5.6	5.7	
Expected stock price volatility	70.9	% 74.9	% 73.7	% 73.3	%
Risk-free interest rate	2.0	% 0.8	% 1.2	% 1.6	%
Options granted (in thousands)	6	15	11	42	
Weighted average fair value of options granted	\$ 14.03	\$ 6.47	\$ 6.18	\$ 8.00	

Compensation expense related to stock option awards is recognized ratably over the vesting period.

The Company also awards restricted shares of the Company's common stock to key employees under the provisions of one of the Plans. Restrictions on the shares expire either after completion of a service period, typically three years, or upon achievement of established performance objectives, as determined by the Compensation Committee of the Company's Board of Directors. Shares are valued at the market price on the date of award. Compensation expense related to these awards is recognized ratably over the service period.

During fiscal 2013, the Company recorded \$0.7 million of stock-based compensation related to all share-based awards. For fiscal year 2012, transition period 2011 and fiscal year 2011, the Company recorded \$0.8 million, \$0.4 million, and \$0.6 million, respectively, of stock-based compensation related to share-based awards. Stock-based compensation expense is included in selling, general and administrative expense in the accompanying consolidated statements of operations. As of December 29, 2013, there was \$1.0 million of total unrecognized compensation cost related to all stock option and restricted share grants, to be expensed ratably over a weighted-average remaining period of 1.8 years.

Unvested at December 29, 2013	131	\$14.11	

12. Employee Benefit Plans

The Company maintains a defined benefit pension plan (the “pension plan”) for the benefit of eligible employees, former employees, and retirees in the U.S. The pension plan has been frozen since 2003, and since that time, participant accounts have not been credited with any additional years of service or additional compensation, but rather only with interest on accrued balances. The pension plan is managed in compliance with all provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), the Investment Advisers Act of 1940, and other applicable laws. The Company funds the pension plan in accordance with applicable employee benefit and tax laws, primarily the Pension Protection Act of 2006, as amended (“PPA”). The primary purpose of the pension plan is to provide a source of retirement income for plan participants and beneficiaries.

Net pension expense for the Company’s pension plan follows:

	Fiscal Year Ended		Six Months Ended	Fiscal Year Ended
	December 29, 2013	December 30, 2012	January 1, 2012	July 3, 2011
Interest cost	\$7,854	\$8,655	\$4,919	\$9,686
Expected return on plan assets	(10,246) (9,741) (5,394) (10,041
Recognized net actuarial loss	8,757	8,022	3,181	6,855
Net pension expense	\$6,365	\$6,936	\$2,706	\$6,500

Net pension expense for fiscal 2014 is estimated at \$3.7 million. During that time, it is expected that \$7.2 million of amounts included in accumulated other comprehensive loss will be recognized in net periodic benefit cost. The expected long-term rate of return on pension plan assets in determining fiscal 2014 pension expense is 7.75%.

Index

Pension benefit obligations at year-end, the fair value of pension plan assets, and the pension plan funded status are as follows:

	December 29, 2013	December 30, 2012
Change in Benefit Obligation:		
Benefit obligation at beginning of period	\$230,257	\$217,452
Interest cost	7,854	8,655
Actuarial loss (gain)	(17,762) 16,922
Benefits paid	(11,285) (12,772)
Benefit obligation at end of period	\$209,064	\$230,257
Change in Plan Assets:		
Fair value of plan assets at beginning of period	\$127,917	\$119,344
Actual return on plan assets	19,115	9,774
Employer contributions	24,856	11,571
Benefits paid	(11,285) (12,772)
Fair value of plan assets at end of period	\$160,603	\$127,917
Funded status		
Unrecognized net actuarial loss	\$(48,461) \$(102,340)
Net amount recognized	169,070	204,459
	\$120,609	\$102,119
Amounts Recognized in Statement of Financial Position:		
Pension benefit obligations, net	\$(48,461) \$(102,340)
Accumulated other comprehensive loss	169,070	204,459
Net amount recognized	\$120,609	\$102,119

The pension plan has been in a net under-funded position for the past several years, and as a result, the Company recognized an additional minimum pension liability on its balance sheet in accordance with ASC 715. The pension plan's unrecognized losses of \$169.1 million and \$204.5 million (excluding tax benefits of \$17 million) at December 29, 2013, and December 30, 2012, respectively, have been recorded as a reduction to equity in accumulated other comprehensive loss on the Company's consolidated balance sheets.

During fiscal years 2013 and 2012, the Company made contributions totaling \$24.9 million and \$11.6 million to the pension plan. The Company previously made required contributions to the pension plan of \$1.9 million in transition period 2011, and \$8.4 million in fiscal 2011. Based upon current actuarial projections and pension funding regulations, future minimum required contributions to the pension plan are estimated at \$43.2 million, of which approximately \$15.3 million is scheduled to be contributed during fiscal 2014. The net present value of the future required minimum contributions, discounted at 4.45%, is estimated at \$38.0 million. Required contributions after fiscal 2014 are subject to change and will depend on future interest rate levels, values in equity and fixed income markets, and the level and timing of interim contributions we may make to the pension plan.

Weighted average assumptions used to determine benefit cost and benefit obligation for the pension plan follow:

Index

	Fiscal Year Ended		Six Months Ended	Fiscal Year Ended
	December 29, 2013	December 30, 2012	January 1, 2012	July 3, 2011
Discount rate used to determine benefit obligation	4.45%	3.50%	4.05%	5.15%
Discount rate used to determine benefit cost	3.50%	4.05%	5.15%	5.10%
Expected return on plan assets	7.75%	8.25%	8.25%	8.50%
Measurement date for pension benefit obligations	December 29, 2013	December 30, 2012	January 1, 2012	July 3, 2011

The Company's expected rate of return on plan assets is determined in part by reviewing past actual investment returns of plan assets and historical returns of the Company's asset allocation targets. In addition, management reviews assessments of the current market environment based on a variety of data sources by asset class, including correlations between economic growth, volatility, risk, return rates, interest rates, and inflation, applied to a number of different time periods, seeking time periods that are most representative of current markets. In reviewing these assessments, management relies in part on input

from the Company's independent investment manager and actuaries, who provide asset-liability modeling and other advice services which simulate how pension assets and liabilities will respond under different investment and interest rate scenarios. These models incorporate the Company's specific liability and cash flow information as well as other factors that influence the pension plan liability and corresponding assets. In addition, management periodically evaluates actual returns against appropriate benchmarks to determine if actual return rates were commensurate with expectations. Based on the Company's analysis of past actual return rates, current and expected asset allocations, and future expectations of asset performance, the long-term expected rate of return on assets was reduced to 7.75% for cost recognition purposes for fiscal 2013 from the expected return rate of 8.25% that was used in fiscal year 2012.

The Company has adopted an investment policy which is periodically reviewed and updated. The primary objective of the investment policy is to maximize the funded status of the pension plan based on a long-term investment horizon. The Company's long-term strategic investment objectives take into consideration a number of factors, including the funded status of the plan, the plan's projected liquidity needs, the demographics of the plan's participants, and a consideration of the probability and duration of investment losses weighted against the potential for long-term appreciation of assets.

The Company's investment policy also establishes asset allocation targets (guidelines) for each primary asset class. The asset allocation targets per the Company's most recently adopted investment policy statement are as follows:

Asset Class	Target Allocation
Equity	45% to 65%
Fixed income	15% to 30%
Alternative investments	20% to 40%
Cash	0% to 5%

Rapid unanticipated market shifts or changes in economic conditions may cause the asset mix to fall outside the target allocations. Generally these divergences should be of a short-term nature, and rebalancing may be necessary. Investments are diversified within asset classes with the intent of minimizing risk of large losses to the pension plan while maintaining liquidity sufficient to fund current benefit payments.

The U.S equity holdings portion of the portfolio consists primarily of equity securities or mutual funds of companies listed on registered exchanges or actively traded in the over-the-counter markets. International equity holdings consist

primarily of equity securities of non-U.S. issuers purchased in foreign markets, on U.S. or foreign exchanges, or the over-the-counter markets. The strategy for equity holdings is to provide opportunities to earn higher rates of return than with fixed income investments, while minimizing concentrations of risk by investing in a diversified mix of companies and industries worldwide, with varying market capitalization levels, growth and value profiles, fund types, and fund managers.

Fixed income holdings include core fixed income securities rated investment grade or better, such as bonds and debentures issued by domestic and foreign private and governmental issuers, as well as high-yield fixed income securities rated below investment grade. The fixed income investment strategy includes longer term maturities which match longer duration pension liabilities, and also includes the higher yield alternatives which are shorter in duration and allow for higher potential

Index

returns. The emerging market debt portion of the portfolio consists primarily of debt securities rated below investment grade of government and corporate issuers in emerging market countries and of entities organized to restructure outstanding debt of such issuers. The primary strategy for investing in emerging market debt is to provide opportunities to earn higher returns than core fixed income.

Limited partnership holdings consist primarily of investments in hedge funds and private investment funds. The portfolio may be allocated across several hedge fund styles and strategies, and may include equity securities, debt securities, asset-backed securities, exchange-traded funds, and derivatives. Investments in limited partnerships provide opportunities to earn above market returns.

The fair values of pension plan assets as of December 29, 2013, follows:
