## Item 7.01. Regulation FD Disclosure

In our Form 8-K dated July 24, 2014, we announced our results for the 13 and 26 weeks ended June 27, 2014 and also provided net income per diluted share guidance for the third quarter of 2014. To provide our shareholders with additional information, today we are supplementing our guidance for the third quarter of 2014 to include adjusted net income per diluted share, which is a non-GAAP measure that excludes non-recurring acquisition and integration costs. There are no changes to the guidance we issued on July 24, 2014.

We believe the use of adjusted net income per diluted share provides additional perspective which is useful to investors in assessing our business results. The comparability of our net income per diluted share is impacted by non-recurring acquisition and integration costs. We believe the use of this measure enhances comparability to prior periods, and assists investors in developing their expectations for the future. In the future, we will also be providing net income per diluted share guidance on an adjusted basis to the extent it is applicable to our business.

Below are reconciliations of previously reported projected net income per diluted share to projected net income per diluted share excluding non-recurring costs related to the acquisition of Seaton Corp. for the third quarter of 2014, and of historical net income per diluted share to adjusted net income per diluted share excluding non-recurring acquisition and integration costs for the historical periods presented.

similarly titled measures of other companies.
