

SUMMIT FINANCIAL GROUP INC  
Form 10-Q  
May 06, 2016  
UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10 – Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2016

or  
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934 For the transition period from \_\_\_\_\_ to \_\_\_\_\_.

Commission File Number 0-16587

Summit Financial Group, Inc.  
(Exact name of registrant as specified in its charter)  
West Virginia 55-0672148  
(State or other jurisdiction of (IRS Employer  
incorporation or organization) Identification No.)  
300 North Main Street  
Moorefield, West Virginia 26836  
(Address of principal executive offices) (Zip Code)  
(304) 530-1000  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities and Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer   
Non-accelerated filer  Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

Indicate the number of shares outstanding of each of the issuer’s classes of Common Stock as of the latest practicable date.

Common Stock, \$2.50 par value  
10,681,880 shares outstanding as of April 30, 2016

## NOTE 1. BASIS OF PRESENTATION

We, Summit Financial Group, Inc. and subsidiaries, prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America for interim financial information and with instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for annual year end financial statements. In our opinion, all adjustments considered necessary for a fair presentation have been included and are of a normal recurring nature.

The presentation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

The results of operations for the quarter ended March 31, 2016 are not necessarily indicative of the results to be expected for the full year. The consolidated financial statements and notes included herein should be read in conjunction with our 2015 audited financial statements and Annual Report on Form 10-K. Certain accounts in the consolidated financial statements for December 31, 2015 and March 31, 2015, as previously presented, have been reclassified to conform to current year classifications.

## NOTE 2. SIGNIFICANT NEW AUTHORITATIVE ACCOUNTING GUIDANCE

ASU 2015-01, Income Statement - Extraordinary and Unusual Items (Subtopic 225-20) - Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items eliminates from U.S. GAAP the concept of extraordinary items, which, among other things, required an entity to segregate extraordinary items considered to be unusual and infrequent from the results of ordinary operations and show the item separately in the income statement, net of tax, after income from continuing operations. ASU 2015-01 is effective for us beginning January 1, 2016, though early adoption is permitted, and is not expected to have a significant impact on our financial statements.

ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30) - Simplifying the Presentation of Debt Issuance Costs specifies that debt issuance costs related to a recognized liability are to be reported in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. ASU 2015-03 is effective for years beginning after December 31, 2015 and is not expected to have a material impact on our financial statements.

The guidance of ASU No. 2015-03 did not address presentation or subsequent measurement of debt issuance costs related to line-of-credit arrangements. Given the absence of authoritative guidance for debt issuance costs related to line-of-credit arrangements within the update, in ASU 2015-15, Interest—Imputation of Interest (Subtopic 835-30) - Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements (Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting), issued in August 2015, the SEC staff stated that they would not object to any entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement.

ASU 2015-16, Business Combinations (Topic 805) – Simplifying the Accounting for Measurement-Period Adjustments requires that adjustments to provisional amounts that are identified during the measurement period of a business combination be recognized in the reporting period in which the adjustment amounts are determined. Furthermore, the

income statement effects of such adjustments, if any, must be calculated as if the accounting had been completed at the acquisition date reflecting the portion of the amount recorded in current-period earnings that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. Under previous guidance, adjustments to provisional amounts identified during the measurement period are to be recognized retrospectively. ASU 2015-16 became effective for us on January 1, 2016 and did not have a significant impact on our financial statements.

ASU 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, among other things, (i) requires equity investments, with certain exceptions, to be measured at fair value with changes in fair value recognized in net income, (ii) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment, (iii) eliminates the requirement for public business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to

Table of Contents

10

---

be disclosed for financial instruments measured at amortized cost on the balance sheet, (iv) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, (v) requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments, (vi) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements and (viii) clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale. ASU 2016-01 will be effective for us on January 1, 2018 and is not expected to have a significant impact on our financial statements.

ASU 2016-02, Leases (Topic 842) will, among other things, require lessees to recognize a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. ASU 2016-02 does not significantly change lease accounting requirements applicable to lessors; however, certain changes were made to align, where necessary, lessor accounting with the lessee accounting model and ASC Topic 606, Revenue from Contracts with Customers. ASU 2016-02 will be effective for us on January 1, 2019 and will require transition using a modified retrospective approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. We are currently evaluating the potential impact of ASU 2016-02 on our financial statements.

ASU 2016-05, Derivatives and Hedging (Topic 815) Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships, clarifies that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under ASC Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. ASU 2016-05 will be effective for us on January 1, 2017 and is not expected to have a significant impact on our financial statements.

ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, requires that all excess tax benefits and tax deficiencies related to share-based payment awards be recognized as income tax expense or benefit in the income statement during the period in which they occur. Previously, such amounts were recorded in the pool of excess tax benefits included in additional paid-in capital, if such pool was available. Because excess tax benefits are no longer recognized in additional paid-in capital, the assumed proceeds from applying the treasury stock method when computing earnings per share should exclude the amount of excess tax benefits that would have previously been recognized in additional paid-in capital. Additionally, excess tax benefits should be classified along with other income tax cash flows as an operating activity rather than a financing activity, as was previously the case. ASU 2016-09 also provides that an entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest (current GAAP) or account for forfeitures when they occur. ASU 2016-09 changes the threshold to qualify for equity classification (rather than as a liability) to permit withholding up to the maximum statutory tax rates (rather than the minimum as was previously the case) in the applicable jurisdictions. ASU 2016-09 will be effective on January 1, 2017 and is not expected to have a significant impact on our financial statements.

### NOTE 3. FAIR VALUE MEASUREMENTS

ASC Topic 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value.

Level 1: Quoted prices (unadjusted) or identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Accordingly, securities available-for-sale are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record other assets at fair value on a nonrecurring basis, such as loans held for sale, and impaired loans held

for investment. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value.

**Available-for-Sale Securities:** Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities, municipal bonds and corporate debt securities.

**Derivative Financial Instruments:** Derivative financial instruments are recorded at fair value on a recurring basis. Fair value measurement is based on pricing models run by a third-party, utilizing observable market-based inputs. All future floating cash flows are projected and both floating and fixed cash flows are discounted to the valuation date. As a result, we classify interest rate swaps as Level 2.

**Loans Held for Sale:** Loans held for sale are carried at the lower of cost or market value. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, we classify loans subject to nonrecurring fair value adjustments as Level 2.

**Loans:** We do not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan loss is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the original contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with ASC Topic 310, Accounting by Creditors for Impairment of a Loan. The fair value of impaired loans is estimated using one of several methods, including collateral value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the discounted cash flows or collateral value exceeds the recorded investments in such loans. These loans are carried at recorded loan investment, and therefore are not included in the following tables of loans measured at fair value. Impaired loans internally graded as substandard, doubtful, or loss are evaluated using the fair value of collateral method. All other impaired loans are measured for impairment using the discounted cash flows method. In accordance with ASC Topic 310, impaired loans where an allowance is established based on the fair value of collateral requires classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, we record the impaired loan as nonrecurring Level 2. When a current appraised value is not available and there is no observable market price, we record the impaired loan as nonrecurring Level 3.

When impaired loans are deemed required to be included in the fair value hierarchy, management immediately begins the process of evaluating the estimated fair value of the underlying collateral to determine if a related specific allowance for loan losses or charge-off is necessary. Current appraisals are ordered once a loan is deemed impaired if the existing appraisal is more than twelve months old, or more frequently if there is known deterioration in value. For recently identified impaired loans, a current appraisal may not be available at the financial statement date. Until the current appraisal is obtained, the original appraised value is discounted, as appropriate, to compensate for the estimated depreciation in the value of the loan's underlying collateral since the date of the original appraisal. Such discounts are generally estimated based upon management's knowledge of sales of similar collateral within the applicable market area and its knowledge of other real estate market-related data as well as general economic trends. When a new appraisal is received (which generally are received within 3 months of a loan being identified as impaired), management then re-evaluates the fair value of the collateral and adjusts any specific allocated allowance

for loan losses, as appropriate. In addition, management also assigns a discount of 7–10% for the estimated costs to sell the collateral.

Foreclosed properties: Foreclosed properties consists of real estate acquired in foreclosure or other settlement of loans. Such assets are carried on the balance sheet at the lower of the investment in the real estate or its fair value less estimated selling costs. The fair value of foreclosed properties is determined on a nonrecurring basis generally utilizing current appraisals performed by an independent, licensed appraiser applying an income or market value approach using observable market data (Level 2). Updated appraisals of foreclosed properties are generally obtained if the existing appraisal is more than 18 months old or more frequently if there is a known deterioration in value. However, if a current appraisal is not available, the original appraised value is discounted, as appropriate, to compensate for the estimated depreciation in the value of the real estate since the date of its original appraisal. Such discounts are generally estimated based upon management’s knowledge of sales of similar property within the applicable market area and its knowledge of other real estate market-related data as well as general

economic trends (Level 3). Upon foreclosure, any fair value adjustment is charged against the allowance for loan losses. Subsequent fair value adjustments are recorded in the period incurred and included in other noninterest expense in the consolidated statements of income.

#### Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The table below presents the recorded amount of assets and liabilities measured at fair value on a recurring basis.

Dollars in thousands	Balance at March 31, 2016	Fair Value Measurements Using:		
		Level 1	Level 2	Level 3
		Available for sale securities		
U.S. Government sponsored agencies	\$ 20,939	\$—	\$20,939	\$—

---------------------	----------	-----	---------	-----

#### Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

We may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets measured at fair value on a

nonrecurring basis are included in the table below.

ASC Topic 825, Financial Instruments, requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The following summarizes the methods and significant assumptions we used in estimating our fair value disclosures for financial instruments.

Cash and cash equivalents: The carrying values of cash and cash equivalents approximate their estimated fair value.

Interest bearing deposits with other banks: The carrying values of interest bearing deposits with other banks approximate their estimated fair values.

Federal funds sold: The carrying values of Federal funds sold approximate their estimated fair values.

Securities: Estimated fair values of securities are based on quoted market prices, where available. If quoted market prices are not available, estimated fair values are based on quoted market prices of comparable securities.

Loans held for sale: The carrying values of loans held for sale approximate their estimated fair values.

Loans: The estimated fair values for loans are computed based on scheduled future cash flows of principal and interest, discounted at interest rates currently offered for loans with similar terms to borrowers of similar credit quality. No prepayments of principal are assumed.

Table of Contents

14

---

Accrued interest receivable and payable: The carrying values of accrued interest receivable and payable approximate their estimated fair values.

Deposits: The estimated fair values of demand deposits (i.e. non-interest bearing checking, NOW, money market and savings accounts) and other variable rate deposits approximate their carrying values. Fair values of fixed maturity deposits are estimated using a discounted cash flow methodology at rates currently offered for deposits with similar remaining maturities. Any intangible value of long-term relationships with depositors is not considered in estimating the fair values disclosed.

Short-term borrowings: The carrying values of short-term borrowings approximate their estimated fair values.

Long-term borrowings: The fair values of long-term borrowings are estimated by discounting scheduled future payments of principal and interest at current rates available on borrowings with similar terms.

Subordinated debentures: The carrying values of subordinated debentures approximate their estimated fair values.

Subordinated debentures owed to unconsolidated subsidiary trusts: The carrying values of subordinated debentures owed to unconsolidated subsidiary trusts approximate their estimated fair values.

Derivative financial instruments: The fair value of the interest rate swaps is valued using independent pricing models.

Off-balance sheet instruments: The fair values of commitments to extend credit and standby letters of credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit standing of the counter parties. The amounts of fees currently charged on commitments and standby letters of credit are deemed insignificant, and therefore, the estimated fair values and carrying values are not shown below.

The carrying values and estimated fair values of our financial instruments are summarized below:

Dollars in thousands	March 31, 2016		December 31, 2015

## NOTE 4. EARNINGS PER SHARE

The computations of basic and diluted earnings per share follow:

Dollars in thousands, except per share amounts	For the Three Months Ended March 31,					
	2016		2015			
	Income (Numerator)	Common Shares (Denominator)	Per Share	Income (Numerator)	Common Shares (Denominator)	Per Share
Net income	\$4,062			\$4,285		
Basic EPS	\$4,062	10,671,856	\$0.38	\$4,285	8,815,961	\$0.49
Effect of dilutive securities:						
Stock options		7,445			8,567	
Stock appreciation rights		—			—	
Series 2011 convertible preferred stock	—	—		—	1,158,250	
Series 2009 convertible preferred stock	—	—		—	510,545	
Diluted EPS	\$4,062	10,679,301	\$0.38	\$4,285	10,493,323	\$0.41

Stock option and stock appreciation right (SAR) grants and the convertible preferred shares are disregarded in this computation if they are determined to be anti-dilutive. Our anti-dilutive stock options at March 31, 2016 and 2015 totaled 57,000 shares and 128,900 shares, respectively, and our anti-dilutive SARs at March 31, 2016 were 166,717.

## NOTE 5. SECURITIES

The amortized cost, unrealized gains, unrealized losses and estimated fair values of securities at March 31, 2016, December 31, 2015, and March 31, 2015 are summarized as follows:

Dollars in thousands	March 31, 2016			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value

The below information is relative to the five states where issuers with the highest volume of state and political subdivision securities held in our portfolio are located. We own no such securities of any single issuer which we deem to be a concentration.

Table of Contents

17

---

Dollars in thousands	March 31, 2016			Estimated Fair Value
	Amortized Cost	Unrealized Gains	Unrealized Losses	
Illinois	\$10,803	\$441	\$10	\$11,234
Michigan	9,473	202	4	9,671
West Virginia	7,676	133	—	7,809
Texas	7,173	406	—	7,579
Washington	5,429	202	—	5,631

Management performs pre-purchase and ongoing analysis to confirm that all investment securities meet applicable credit quality standards. Prior to July 1, 2013, we principally used credit ratings from Nationally Recognized Statistical Rating Organizations (“NRSROs”) to support analyses of our portfolio of securities issued by state and political subdivisions, as we generally do not purchase securities that are rated below the six highest NRSRO rating categories. Beginning July 1, 2013, in addition to considering a security’s NRSRO rating, we now also assess or confirm through an internal review of an issuer’s financial information and other applicable information that: 1) the issuer’s risk of default is low; 2) the characteristics of the issuer’s demographics and economic environment are satisfactory; and 3) the issuer’s budgetary position and stability of tax or other revenue sources are sound.

The maturities, amortized cost and estimated fair values of securities at March 31, 2016, are summarized as follows:

Dollars in thousands	Amortized Cost	Estimated Fair Value
Due in one year or less	\$58,168	\$58,981
Due from one to five years	103,471	105,032
Due from five to ten years	18,437	18,932
Due after ten years	85,970	88,493
Equity securities	77	77
	\$266,123	\$271,515

The proceeds from sales, calls and maturities of available for sale securities, including principal payments received on mortgage-backed obligations, and the related gross gains and losses realized, for the three months ended March 31, 2016 are as follows:

Dollars in thousands	Proceeds from			Gross realized	
	Sales	Calls and Maturities	Principal Payments	Gains	Losses
Securities available for sale	\$33,787	\$55	\$8,170	\$562	\$169

We held 53 available for sale securities having an unrealized loss at March 31, 2016. We do not intend to sell these securities, and it is more likely than not that we will not be required to sell these securities before recovery of their amortized cost bases. We believe that this decline in value is primarily attributable to the lack of market liquidity and to changes in market interest rates and not due to credit quality. Accordingly, no additional other-than-temporary impairment charge to earnings is warranted at this time.

#### Table of Contents

Edgar Filing: SUMMIT FINANCIAL GROUP INC - Form 10-Q

Provided below is a summary of securities available for sale which were in an unrealized loss position at March 31, 2016 and December 31, 2015, including debt securities for which a portion of other-than-temporary impairment has been recognized in other comprehensive income.

## NOTE 6. LOANS

Loans are generally stated at the amount of unpaid principal, reduced by unearned discount and allowance for loan losses. Interest on loans is accrued daily on the outstanding balances. Loan origination fees and certain direct loan origination costs are deferred and amortized as adjustments of the related loan yield over its contractual life. We categorize residential real estate loans in excess of \$600,000 as jumbo loans.

Generally, loans are placed on nonaccrual status when principal or interest is greater than 90 days past due based upon the loan's contractual terms. Interest is accrued daily on impaired loans unless the loan is placed on nonaccrual status. Impaired loans are placed on nonaccrual status when the payments of principal and interest are in default for a period of 90 days, unless the loan is both well-secured and in the process of collection. Interest on nonaccrual loans is recognized primarily using the cost-recovery method. Loans may be returned to accrual status when repayment is reasonably assured and there has been demonstrated performance under the terms of the loan or, if applicable, the terms of the restructured loans.

Commercial-related loans or portions thereof (which are risk-rated) are charged off to the allowance for loan losses when the loss has been confirmed. This determination is made on a case by case basis considering many factors, including the prioritization of our claim in bankruptcy, expectations of the workout/restructuring of the loan and valuation of the borrower's equity. We deem a loss confirmed when a loan or a portion of a loan is classified "loss" in accordance with bank regulatory classification guidelines, which state, "Assets classified loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted".

Consumer-related loans are generally charged off to the allowance for loan losses upon reaching specified stages of delinquency, in accordance with the Federal Financial Institutions Examination Council policy. For example, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), which ever is earlier. Residential mortgage loans are generally charged off to net realizable value no later than when the account becomes 180 days past due. Other consumer loans, if collateralized, are generally charged off to net realizable value at 120 days past due.

Loans are summarized as follows:

Dollars in thousands	March 31, 2016	December 31, 2015	March 31, 2015
Commercial	\$ 101,742	\$ 97,201	\$ 89,928

Impaired loans: Impaired loans include the following:

Loans which we risk-rate (consisting of loan relationships having aggregate balances in excess of \$2.0 million, or loans exceeding \$500,000 and exhibiting credit weakness) through our normal loan review procedures and which, based on current information and events, it is probable that we will be unable to collect all amounts due in accordance with the original contractual terms of the loan agreement. Risk-rated loans with insignificant delays or insignificant short falls in the amount of payments expected to be collected are not considered to be impaired.

Loans that have been modified in a troubled debt restructuring.

Both commercial and consumer loans are deemed impaired upon being contractually modified in a troubled debt restructuring. Troubled debt restructurings typically result from our loss mitigation activities and occur when we grant

a concession to a borrower who is experiencing financial difficulty in order to minimize our economic loss and to avoid foreclosure or repossession of collateral. Once restructured in a troubled debt restructuring, a loan is generally considered impaired until its maturity, regardless of whether the borrower performs under the modified terms. Although such a loan may be returned to accrual status if the criteria set forth in our accounting policy are met, the loan would continue to be evaluated for an asset-specific allowance for loan losses and we would continue to report the loan in the impaired loan table below.

The table below sets forth information about our impaired loans.

A modification of a loan is considered a troubled debt restructuring (“TDR”) when a borrower is experiencing financial difficulty and the modification constitutes a concession that we would not otherwise consider. This may include a transfer of real estate or other assets from the borrower, a modification of loan terms, or a combination of both. A loan continues to be classified as a TDR for the life of the loan. Included in impaired loans are TDRs of \$30.3 million, of which \$29.2 million were current with respect to restructured contractual payments at March 31, 2016, and \$30.5 million, of which \$28.9 million were current with respect to restructured contractual payments at December 31, 2015. There were no commitments to lend additional funds under these restructurings at either balance sheet date.

The following table presents by class the TDRs that were restructured during the three months ended March 31, 2016, there were no loans restructured during the three months ended March 31, 2015 . Generally, the modifications were extensions of term, modifying the payment terms from principal and interest to interest only for an extended period, or reduction in interest rate. All TDRs are evaluated individually for allowance for loan loss purposes.

We categorize loans into risk categories based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. We analyze loans individually by classifying the loans as to credit risk. We internally grade all commercial loans at the time of loan origination. In addition, we perform an annual loan review on all non-homogenous commercial loan relationships with an aggregate exposure of \$2 million, at which time these loans are re-graded. We use the following definitions for our risk grades:

**Pass:** Loans graded as Pass are loans to borrowers of acceptable credit quality and risk. They are higher quality loans that do not fit any of the other categories described below.

**OLEM (Special Mention):** Commercial loans categorized as OLEM are potentially weak. The credit risk may be relatively minor yet represent a risk given certain specific circumstances. If the potential weaknesses are not monitored or mitigated, the asset may weaken or inadequately protect our position in the future.

**Substandard:** Commercial loans categorized as Substandard are inadequately protected by the borrower's ability to repay, equity, and/or the collateral pledged to secure the loan. These loans have identified weaknesses that could hinder normal repayment or collection of the debt. These loans are characterized by the distinct possibility that we will sustain some loss if the identified weaknesses are not mitigated.

**Doubtful:** Commercial loans categorized as Doubtful have all the weaknesses inherent in those loans classified as Substandard, with the added elements that the full collection of the loan is improbable and the possibility of loss is high.

Loss: Loans classified as loss are considered to be non-collectible and of such little value that their continuance as a bankable asset is not warranted. This does not mean that the loan has absolutely no recovery value, but rather it is neither practical nor desirable to defer writing off the loan, even though partial recovery may be obtained in the future.

The following table presents the recorded investment in construction and development, commercial, and commercial real estate loans which are generally evaluated based upon the internal risk ratings defined above.

Total	\$372,469	\$373,936	\$364,327	\$3,383	\$3,347	\$4,556

Loan commitments: ASC Topic 815, Derivatives and Hedging, requires that commitments to make mortgage loans should be accounted for as derivatives if the loans are to be held for sale, because the commitment represents a written option and accordingly is recorded at the fair value of the option liability.

## NOTE 7. ALLOWANCE FOR LOAN LOSSES

We maintain the allowance for loan losses at a level considered adequate to provide for estimated probable credit losses inherent in the loan portfolio. The allowance is comprised of three distinct reserve components: (1) specific reserves related to loans individually evaluated, (2) quantitative reserves related to loans collectively evaluated, and (3) qualitative reserves related to loans collectively evaluated. A summary of the methodology we employ on a quarterly basis with respect to each of these components in order to evaluate the overall adequacy of our allowance for loan losses is as follows:

## Specific Reserve for Loans Individually Evaluated

First, we identify loan relationships having aggregate balances in excess of \$500,000 and that may also have credit weaknesses. Such loan relationships are identified primarily through our analysis of internal loan evaluations, past due loan reports, and loans adversely classified by regulatory authorities. Each loan so identified is then individually evaluated to determine whether it is impaired – that is, based on current information and events, it is probable that we will be unable to collect all amounts due in accordance with the contractual terms of the underlying loan agreement. Substantially all of our impaired loans historically have been collateral dependent, meaning repayment of the loan is expected or is considered to be provided solely from the sale of the loan's underlying collateral. For such

loans, we measure impairment based on the fair value of the loan's collateral, which is generally determined utilizing current appraisals. A specific reserve is established in an amount equal to the excess, if any, of the recorded investment in each impaired loan over the fair value of its underlying collateral, less estimated costs to sell. Our policy is to re-evaluate the fair value of collateral dependent loans at least every twelve months unless there is a known deterioration in the collateral's value, in which case a new appraisal is obtained. Beginning in 2014, for purposes of loans that have been modified in a troubled debt restructuring and not internally graded as substandard, doubtful, or loss("performing TDRs") we began measuring impairment using the discounted cash flows method. Under this method, a specific reserve is established in an amount equal to the excess, if any, of the recorded investment in each impaired loan over its discounted cash flows.

#### Quantitative Reserve for Loans Collectively Evaluated

Second, we stratify the loan portfolio into the following ten loan pools: land and land development, construction, commercial, commercial real estate -- owner-occupied, commercial real estate -- non-owner occupied, conventional residential mortgage,

#### Table of Contents

29

---

jumbo residential mortgage, home equity, consumer, and other. Quantitative reserves relative to each loan pool are established as follows: for all loan segments detailed above an allocation equaling 100% of the respective pool's average 12 month historical net loan charge-off rate (determined based upon the most recent twelve quarters) is applied to the aggregate recorded investment in the pool of loans.

#### Qualitative Reserve for Loans Collectively Evaluated

Third, we consider the necessity to adjust our average historical net loan charge-off rates relative to each of the above ten loan pools for potential risks factors that could result in actual losses deviating from prior loss experience. For example, if we observe a significant increase in delinquencies within the conventional mortgage loan pool above historical trends, an additional allocation to the average historical loan charge-off rate is applied. Such qualitative risk factors considered are: (1) levels of and trends in delinquencies and impaired loans, (2) levels of and trends in charge-offs and recoveries, (3) trends in volume and term of loans, (4) effects of any changes in risk selection and underwriting standards, and other changes in lending policies, procedures, and practice, (5) experience, ability, and depth of lending management and other relevant staff, (6) national and local economic trends and conditions, (7) industry conditions, and (8) effects of changes in credit concentrations.

An analysis of the allowance for loan losses for the three month periods ended March 31, 2016 and 2015, and for the year ended December 31, 2015 is as follows:

	Three Months Ended March 31,		Year Ended December 31,

NOTE 8. GOODWILL AND OTHER INTANGIBLE ASSETS

The following tables present our goodwill by reporting unit at March 31, 2016 and other intangible assets by reporting unit at March 31, 2016 and December 31, 2015.

Dollars in thousands	Goodwill Activity		Total
	Community Banking	Insurance Services	

Balance, January 1, 2016	\$1,488	\$ 4,710	\$6,198
Acquired goodwill, net	—	—	—
Balance, March 31, 2016	\$1,488	\$ 4,710	\$6,198

Dollars in thousands	Other Intangible Assets March 31, 2016			December 31, 2015		
	Communi- Banking	Insurance Services	Total	Communi- Banking	Insurance Services	Total
Unidentifiable intangible assets						
Gross carrying amount	\$2,268	\$ —	\$2,268	\$2,268	\$ —	\$2,268
Less: accumulated amortization	2,268	—	2,268	2,268	—	2,268
Net carrying amount	\$—	\$ —	\$—	\$—	\$ —	\$—
Identifiable intangible assets						
Gross carrying amount	\$—	\$ 3,000	\$3,000	\$—	\$ 3,000	\$3,000
Less: accumulated amortization	—	1,750	1,750	—	1,700	1,700
Net carrying amount	\$—	\$ 1,250	\$1,250	\$—	\$ 1,300	\$1,300

We recorded amortization expense of approximately \$50,000 for the three months ended March 31, 2016 relative to our other intangible assets. Annual amortization is expected to approximate \$200,000 for each of the years ending 2016 through 2020.

## NOTE 9. DEPOSITS

The following is a summary of interest bearing deposits by type as of March 31, 2016 and 2015 and December 31, 2015:

Dollars in thousands	March 31, December 31, March 31,		
	2016	2015	2015
Demand deposits, interest bearing	\$ 210,878	\$ 215,721	\$ 196,606
Savings deposits	286,695	266,825	257,687
Time deposits	474,593	465,153	486,966
Total	\$ 972,166	\$ 947,699	\$ 941,259

Included in time deposits are deposits acquired through a third party (“brokered deposits”) totaling \$138.8 million, \$126.5 million and \$139.5 million at March 31, 2016, December 31, 2015, and March 31, 2015, respectively.

A summary of the scheduled maturities for all time deposits as of March 31, 2016 is as follows:

Dollars in thousands	
Nine month period ending December 31, 2016	\$ 178,643
Year ending December 31, 2017	101,517
Year ending December 31, 2018	69,566
Year ending December 31, 2019	41,780
Year ending December 31, 2020	42,061
Thereafter	41,026
Total	\$ 474,593

The following is a summary of the maturity distribution of all certificates of deposit in denominations of \$100,000 or more as of March 31, 2016:

Dollars in thousands	Amount	Percent
Three months or less	\$ 56,301	15.9 %
Three through six months	27,534	7.8 %
Six through twelve months	70,482	19.9 %
Over twelve months	199,870	56.4 %
Total	\$ 354,187	100.00%

## NOTE 10. BORROWED FUNDS

Short-term borrowings: A summary of short-term borrowings is presented below:

Dollars in thousands	Three Months Ended March 31,			
	2016		2015	
	Short-term FHLB Advances	Federal Funds Purchased and Lines of Credit	Short-term FHLB Advances	Federal Funds Purchased and Lines of Credit
Balance at March 31	\$ 150,000	\$ 3,448	\$ 141,550	\$ 7,435
Average balance outstanding for the period	165,102	3,446	139,590	5,189
Maximum balance outstanding at any month end during period	188,450	3,448	141,780	7,435
Weighted average interest rate for the period	0.58 %	0.50 %	0.32 %	0.25 %
Weighted average interest rate for balances outstanding at March 31	0.57 %	0.50 %	0.31 %	0.25 %

Table of Contents

32

---

Dollars in thousands	Year Ended December 31, 2015			
	Short-term FHLB Advances	Federal Funds Purchased	and Lines of Credit	
Balance at December 31	\$ 167,950	\$ 3,444		
Average balance outstanding for the period	146,412	4,690		
Maximum balance outstanding at any month end during period	171,160	7,438		
Weighted average interest rate for the period	0.43	% 0.50	%	
Weighted average interest rate for balances outstanding at December 31	0.35	% 0.26	%	

Long-term borrowings: Our long-term borrowings of \$75.1 million, \$75.6 million and \$77.0 million at March 31, 2016, December 31, 2015, and March 31, 2015 respectively, consisted primarily of advances from the Federal Home Loan Bank (“FHLB”) and structured reverse repurchase agreements with two unaffiliated institutions. All FHLB advances are collateralized primarily by similar amounts of residential mortgage loans, certain commercial loans, mortgage backed securities and securities of U. S. Government agencies and corporations.

Dollars in thousands	Balance		
	Balance at March 31, 2016	2015	at December 31, 2015
Long-term FHLB advances	\$ 846	\$ 951	\$ 873
Long-term reverse repurchase agreements	72,000	72,000	72,000
Term loan	2,257	4,062	2,708
Total	\$ 75,103	\$ 77,013	\$ 75,581

The term loan at March 31, 2016 is secured by the common stock of our subsidiary bank and bears a variable interest rate of prime minus 50 basis points with a final maturity of 2017. Our long term FHLB borrowings and reverse repurchase agreements bear both fixed and variable rates and mature in varying amounts through the year 2026.

The average interest rate paid on long-term borrowings for the three month period ended March 31, 2016 was 4.41% compared to 4.32% for the first three months of 2015.

Subordinated debentures owed to unconsolidated subsidiary trusts: We have three statutory business trusts that were formed for the purpose of issuing mandatorily redeemable securities (the “capital securities”) for which we are obligated to third party investors and investing the proceeds from the sale of the capital securities in our junior subordinated debentures (the “debentures”). The debentures held by the trusts are their sole assets. Our subordinated debentures totaled \$19.6 million at March 31, 2016, December 31, 2015, and March 31, 2015.

In October 2002, we sponsored SFG Capital Trust I, in March 2004, we sponsored SFG Capital Trust II, and in December 2005, we sponsored SFG Capital Trust III, of which 100% of the common equity of each trust is owned by us. SFG Capital Trust I issued \$3.5 million in capital securities and \$109,000 in common securities and invested the proceeds in \$3.61 million of debentures. SFG Capital Trust II issued \$7.5 million in capital securities and \$232,000 in common securities and invested the proceeds in \$7.73 million of debentures. SFG Capital Trust III issued \$8.0 million in capital securities and \$248,000 in common securities and invested the proceeds in \$8.25 million of debentures. Distributions on the capital securities issued by the trusts are payable quarterly at a variable interest rate equal to 3 month LIBOR plus 345basis points for SFG Capital Trust I, 3 month LIBOR plus 280basis points for SFG Capital Trust II, and 3 month LIBOR plus 145basis points for SFG Capital Trust III, and equals the interest rate

earned on the debentures held by the trusts, and is recorded as interest expense by us. The capital securities are subject to mandatory redemption in whole or in part, upon repayment of the debentures. We have entered into agreements which, taken collectively, fully and unconditionally guarantee the capital securities subject to the terms of the guarantee. The debentures of each Capital Trust are redeemable by us quarterly.

The capital securities held by SFG Capital Trust I, SFG Capital Trust II, and SFG Capital Trust III qualify as Tier 1 capital under Federal Reserve Board guidelines. In accordance with these Guidelines, trust preferred securities generally are limited to 25% of Tier 1 capital elements, net of goodwill. The amount of trust preferred securities and certain other elements in excess of the limit can be included in Tier 2 capital.

A summary of the maturities of all long-term borrowings and subordinated debentures for the next five years and thereafter is as follows:

Table of Contents

2018	45,017	—
2019	18	—
2020	19	—
Thereafter	698	19,589
	\$ 75,103	\$ 19,589

#### NOTE 11. SHARE BASED COMPENSATION

The 2014 Long-Term Incentive Plan (“2014 LTIP”) was adopted by our shareholders in May 2014 to enhance the ability of the Company to attract and retain exceptionally qualified individuals to serve as key employees. The LTIP provides for the issuance of up to 500,000 shares of common stock, in the form of equity awards including stock options, restricted stock, restricted stock units, stock appreciation rights (“SARs”), performance units, other stock-based awards or any combination thereof, to our key employees.

Stock options awarded under the 2009 Officer Stock Option Plan and the 1998 Officer Stock Option Plan (collectively, the “Plans”) were not altered by the 2014 LTIP, and remain subject to the terms of the Plans. However, under the terms of the 2014 LTIP, all shares of common stock remaining issuable under the Plans at the time the 2014 LTIP was adopted ceased to be available for future issuance.

Under the 2014 LTIP and the Plans, stock options and SARs have generally been granted with an exercise price equal to the fair value of Summit's common stock on the grant date. We periodically grant employee stock options to individual employees. During second quarter 2015, we granted 166,717 SARs that become exercisable ratably over five years (20% per year) and expire ten years after the grant date. There were no grants of stock options or SARs in first quarter 2016 or first quarter 2015.

The fair value of our employee stock options and SARs granted under the Plans is estimated at the date of grant using the Black-Scholes option-pricing model. This model requires the input of highly subjective assumptions, changes to which can materially affect the fair value estimate. Additionally, there may be other factors that would otherwise have a significant effect on the value of employee stock options and SARs granted but are not considered by the model. Because our employee stock options and SARs have characteristics significantly different from those of traded options and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options and SARs at the time of grant. The assumptions used to value SARs issued during 2015 were a risk-free interest rate of 1.96%, an expected dividend yield of 2.75%, an expected common stock volatility of 61.84%, and an expected life of 10 years.

We recognize compensation expense based on the estimated number of stock awards expected to actually vest, exclusive of the awards expected to be forfeited. During the first three months of 2016 and 2015, our stock compensation expense and related deferred taxes were insignificant.

Edgar Filing: SUMMIT FINANCIAL GROUP INC - Form 10-Q

A summary of activity in our Plans during the first three months of 2016 and 2015 is as follows:

	For the Three Months Ended March 31, 2016		2015	
	Options/ SARS	Weighted-Average Exercise Price	Options/ SARS	Weighted-Average Exercise Price

## NOTE 12. COMMITMENTS AND CONTINGENCIES

### Off-Balance Sheet Arrangements

We are a party to certain financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of our customers. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the statement of financial position. The contract amounts of these instruments reflect the extent of involvement that we have in this class of financial instruments.

Many of our lending relationships contain both funded and unfunded elements. The funded portion is reflected on our balance sheet. The unfunded portion of these commitments is not recorded on our balance sheet until a draw is made under the loan facility. Since many of the commitments to extend credit may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements.

A summary of the total unfunded, or off-balance sheet, credit extension commitments follows:

Dollars in thousands	March 31, 2016
Commitments to extend credit:	
Revolving home equity and credit card lines	\$ 59,628
Construction loans	32,721
Other loans	54,643
Standby letters of credit	3,900
Total	\$ 150,892

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if we deem necessary upon extension of credit, is based on our credit evaluation. Collateral held varies but may include accounts receivable, inventory, equipment or real estate.

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party.

Our exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance sheet instruments.

#### Legal Contingencies

On May 13, 2014, the ResCap Liquidating Trust (“ResCap”), as successor to Residential Funding Company, LLC f/k/a Residential Funding Corporation (“RFC”), filed a complaint against Summit Financial Mortgage, LLC (“Summit Mortgage”), a former

#### Table of Contents

35

---

residential mortgage subsidiary of Summit whose operations were discontinued in 2007, in the United States Bankruptcy Court for the Southern District of New York and subsequently amended its complaint on July 25, 2014. The Amended Complaint asserts the following three causes of action related to Summit Mortgage's origination and subsequent sale of mortgage loans to Residential Funding Corporation: 1) Summit Mortgage breached its representations and warranties made in the contract governing the sale of the mortgage loans to RFC; 2) an indemnification claim against Summit Mortgage for damages paid by ResCap to settle claims in RFC's bankruptcy proceeding which allegedly relate to mortgage loans Summit Mortgage sold to RFC; 3) a claim for damages against Summit Community Bank, Inc., former parent of Summit Mortgage, arising out of a guaranty in which the Bank guaranteed Summit Mortgage's full performance under the contract governing the sale of mortgage loans to RFC. Summit has filed a motion to dismiss the case. Based upon the applicable statute of limitations, the Court granted our motion to dismiss the breach of contract claim with respect to loans Summit sold to RFC prior to March 14, 2006. The court otherwise denied our motion to dismiss on the grounds that the other arguments raised factual questions that could not be decided on a motion to dismiss. An estimate as to possible loss resulting from the Amended Complaint cannot be provided at this time because such an estimate cannot be made. Summit intends to defend these claims vigorously.

We are not a party to any other litigation except for matters that arise in the normal course of business. While it is impossible to ascertain the ultimate resolution or range of financial liability with respect to these contingent matters, in the opinion of management, the outcome of these matters will not have a significant adverse effect on the consolidated financial statements.

#### NOTE 13. REGULATORY MATTERS

We and our subsidiaries are subject to various regulatory capital requirements administered by the banking regulatory agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we and each of our subsidiaries must meet specific capital guidelines that involve quantitative measures of our and our subsidiaries' assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. We and each of our subsidiaries' capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require us and each of our subsidiaries to maintain minimum amounts and ratios of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital (as defined) to average assets (as defined). We believe, as of March 31, 2016, that we and each of our subsidiaries met all capital adequacy requirements to which they were subject.

The most recent notifications from the banking regulatory agencies categorized us and each of our subsidiaries as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, we and each of our subsidiaries must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table below.

The Basel III Capital Rules became effective for us on January 1, 2015, with full compliance with all of the final rule's requirements phased in over a multi-year schedule, to be fully phased-in by January 1, 2019. As of March 31, 2016, our capital levels remained characterized as "well-capitalized" under the new rules. See the Capital Requirements section included in Part I Item 1 Business of our 2015 Annual Report on Form 10-K for further discussion of Basel III.

#### Table of Contents

36

---

The following table presents Summit's, as well as our subsidiary, Summit Community Bank's ("Summit Community"), actual and required minimum capital amounts and ratios as of March 31, 2016 and December 31, 2015 under the Basel III Capital Rules. The minimum required capital levels presented below reflect the minimum required capital levels (inclusive of the full capital conservation buffers) that will be effective as of January 1, 2019 when the Basel III Capital Rules have been fully phased-in. Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Capital Rules.

	Actual		Minimum Required Capital - Basel III Fully Phased-in		Minimum Required To Be Well Capitalized

NOTE 14. SEGMENT INFORMATION

We operate two business segments: community banking and insurance & financial services. These segments are primarily identified by the products or services offered. The community banking segment consists of our full service banks which offer customers traditional banking products and services through various delivery channels. The insurance & financial services segment includes three insurance agency offices that sell insurance products. The accounting policies discussed throughout the notes to the consolidated financial statements apply to each of our business segments.

Table of Contents

37

---

Inter-segment revenue and expense consists of management fees allocated to the community banking and the insurance & financial services segments for all centralized functions that are performed by the parent, including overall direction in the areas of strategic planning, investment portfolio management, asset/liability management, financial reporting and other financial and administrative services. Information for each of our segments is included below:

	Three Months Ended March 31, 2016			
Dollars in thousands	Community Banking	Insurance & Financial Services	Parent Eliminations	Total
Net interest income (loss)	\$ 11,938	\$	—	\$(159)
