NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1: Summary of Significant Accounting Policies

Financial Statement Preparation

The unaudited condensed consolidated financial statements as of March 29, 2015, and for the quarter and two quarters ended March 29, 2015 and March 30, 2014, have been prepared by Starbucks Corporation under the rules and regulations of the Securities and Exchange Commission ("SEC"). In the opinion of management, the financial information for the quarter and two quarters ended March 29, 2015 and March 30, 2014 reflects all adjustments and accruals, which are of a normal recurring nature, necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods. In this Quarterly Report on Form 10-Q ("10-Q") Starbucks Corporation is referred to as "Starbucks," the "Company," "we," "us" or "our."

The financial information as of September 28, 2014 is derived from our audited consolidated financial statements and notes for the fiscal year ended September 28, 2014 ("fiscal 2014") included in Item 8 in the Fiscal 2014 Annual Report on Form 10-K (the "10-K"). The information included in this 10-Q should be read in conjunction with the footnotes and management's discussion and analysis of the consolidated financial statements in the 10-K.

The results of operations for the quarter and two quarters ended March 29, 2015 are not necessarily indicative of the results of operations that may be achieved for the entire fiscal year ending September 27, 2015 ("fiscal 2015").

Stock Split

On April 9, 2015, we effected a two-for-one stock split of our \$0.001 par value common stock for shareholders of record as of March 30, 2015. All share and per-share data in our consolidated financial statements and notes has been retroactively adjusted to reflect this stock split. We adjusted shareholders' equity to reflect the stock split by reclassifying an amount equal to the par value of the additional shares arising from the split from retained earnings to common stock during the second quarter of fiscal 2015, resulting in no net impact to shareholders' equity on our consolidated balance sheets.

Recent Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board ("FASB") issued guidance on the financial statement presentation of debt issuance costs. This guidance requires debt issuance costs to be presented in the balance sheet as a reduction of the related debt liability rather than an asset. The guidance will become effective for us at the beginning of our first quarter of fiscal 2017 and will only result in a change in presentation of these costs on our consolidated balance sheets.

In February 2015, the FASB issued guidance that changes the evaluation criteria for consolidation and related disclosure requirements. This guidance introduces evaluation criteria specific to limited partnerships and other similar entities, as well as amends the criteria for evaluating variable interest entities with which the reporting entity is involved and certain investment funds. The guidance will become effective for us at the beginning of our first quarter of fiscal 2017. We do not expect the adoption of this guidance will have a material impact on our consolidated financial statements.

In May 2014, the FASB issued guidance outlining a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers that supersedes most current revenue recognition guidance. This guidance requires an entity to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Additionally, this guidance expands related disclosure requirements. The guidance will become effective for us at the beginning of our first quarter of fiscal 2018 and will require full or modified retrospective application. We are currently evaluating the impact this guidance will have on our consolidated financial statements as well as the expected adoption method.

In April 2014, the FASB issued guidance that changes the criteria for reporting discontinued operations. To qualify as a discontinued operation under the amended guidance, a component or group of components of an entity that has been disposed of or is classified as held for sale must represent a strategic shift that has or will have a major effect on the entity's operations and financial results. This guidance also expands related disclosure requirements. The guidance

will become effective for us at the beginning of our first quarter of fiscal 2016. We do not expect the adoption of this guidance will have a material impact on our consolidated financial statements.

In July 2013, the FASB issued guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This guidance requires the unrecognized tax benefit to be presented in the financial statements as a reduction to a deferred tax asset. When a deferred tax asset is not

Table of Contents

available, or the asset is not intended to be used for this purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and not netted with a deferred tax asset. The guidance became effective for us at the beginning of our first quarter of fiscal 2015 and did not have a material impact on our consolidated financial statements.

In March 2013, the FASB issued guidance on a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. This guidance requires a parent to release any related cumulative translation adjustment into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. The guidance became effective for us at the beginning of our first quarter of fiscal 2015 and did not have a material impact on our consolidated financial statements.

Note 2: Acquisition

On September 23, 2014, we entered into a tender offer bid agreement with Starbucks Coffee Japan, Ltd. ("Starbucks Japan"), at the time a 39.5% owned equity method investment, and our joint venture partner, Sazaby League, Ltd. ("Sazaby"), to acquire the remaining 60.5% ownership interest in Starbucks Japan. Acquiring Starbucks Japan further leverages our existing infrastructure to continue disciplined retail store growth and expand our presence into other channels in the Japan market, such as consumer packaged goods ("CPG"), licensing and foodservice. This acquisition was structured as a two-step tender offer.

On October 31, 2014, we acquired Sazaby's 39.5% ownership interest in Starbucks Japan through the first tender offer step for ¥55 billion in cash, or \$509 million with Japanese yen converted into U.S. dollars at a reference conversion rate of 108.13 JPY to USD, based on a spot rate that approximates the rate as of the acquisition date, bringing our total ownership in Starbucks Japan to a controlling 79% interest. The estimated fair values of the assets acquired, liabilities assumed and the noncontrolling interest are based on preliminary valuation as of the October 31, 2014 acquisition date and are subject to change as additional information about the fair value of assets acquired, liabilities assumed and noncontrolling interest becomes available.

The following table summarizes the allocation of the total consideration to the fair values of the assets acquired and liabilities assumed as of October 31, 2014 (in millions):

Consideration:

Cash paid for Sazaby's 39.5% equity interest	\$508.7
Fair value of our preexisting 39.5% equity interest	577.0
Total consideration	\$1,085.7

Fair value of assets acquired and liabilities assumed:

Cash and cash equivalents	\$224.4	
Accounts receivable, net	37.4	
Inventories	26.4	
Prepaid expenses and other current assets	35.7	
Deferred income taxes, net (current)	23.4	
Property, plant and equipment	282.9	
Other long-term assets	141.4	
Other intangible assets	323.0	
Goodwill	815.6	
Total assets acquired	1,910.2	
Accounts payable	(54.5))
Accrued liabilities	(119.9))
Deferred revenue	(36.5))
Deferred income taxes (noncurrent)	(92.9))
Other long-term liabilities	(109.6))
Total liabilities assumed	(413.4))
Noncontrolling interest	(411.1))

Total consideration

\$1,085.7

The assets acquired and liabilities assumed are reported within our China/Asia Pacific segment. Other current and long-term assets acquired primarily include various deposits, specifically lease and key money deposits. Accrued liabilities and other

9

Table of Contents

long-term liabilities assumed primarily include the financing obligations associated with the build-to-suit leases discussed below, as well as asset retirement obligations.

The intangible assets are definite-lived and include reacquired rights, licensing agreements with Starbucks Japan's current licensees and Starbucks Japan's customer loyalty program. The reacquired rights of \$305.0 million represent the fair value, calculated over the remaining original contractual period, to exclusively operate licensed Starbucks® retail stores in Japan. These rights will be amortized on a straight-line basis through March 2021, or over a period of approximately 6.4 years. The licensing agreements were valued at \$15.0 million and will be amortized on a straight-line basis over a period of approximately 10.9 years, which is based on the remaining terms of the respective licensing agreements. The customer loyalty program was valued at \$3.0 million and will be amortized on a straight-line basis over a period of 4.0 years, which represents the period during which we expect to benefit from these customer relationships.

Below is a tabular summary of the acquired intangible assets as of March 29, 2015, for which the gross balances in total are \$29.5 million lower than as of the October 31, 2014 acquisition date due to foreign currency translation (in millions):

	Mar 29, 2015		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Reacquired rights	\$277.2	\$(18.0)) \$259.2
Licensing agreements	13.6	(0.5)) 13.1
Customer loyalty program	2.7	(0.3)) 2.4
Total acquired definite-lived intangible assets	\$293.5	\$(18.8)) \$274.7

Amortization expense for these definite-lived intangible assets for the quarter and two quarters ended March 29, 2015 was \$11.3 million and \$19.0 million, respectively, and is estimated to be approximately \$45 million each year for the next five years and approximately \$50 million thereafter.

The \$815.6 million of goodwill represents the intangible assets that do not qualify for separate recognition and primarily includes the acquired current customer base, the acquired workforce including store partners in the region that have strong relationships with these customers, the existing geographic retail and online presence, and the expected geographic presence in new channels. The goodwill was allocated to the China/Asia Pacific segment and is not deductible for income tax purposes. Due to foreign currency translation, the balance of goodwill related to the acquisition declined \$74.4 million to \$741.2 million as of March 29, 2015.

Table of Contents

As a part of this acquisition we acquired a significant number of operating leases, including \$7.5 million of favorable lease assets, which are included in prepaid expenses and other current assets and other long-term assets, and \$15.5 million of unfavorable lease liabilities, which are included in accrued liabilities and other long-term liabilities on the consolidated balance sheets. The fair values of these assets and liabilities were determined based on market terms for similar leases as of the date of the acquisition, and will be amortized on a straight-line basis as rent expense, or a reduction of rent expense, respectively, in cost of sales including occupancy costs on the consolidated statements of earnings over the remaining terms of the leases, for which the weighted-average period was 9.4 years as of the October 31, 2014 acquisition date. We recorded a net reduction of rent expense of \$0.2 million and \$0.4 million for the quarter and two quarters ended March 29, 2015, respectively, in connection with the leases acquired.

Additionally, we acquired a number of build-to-suit lease arrangements that are accounted for as financing leases. Starbucks Japan is the deemed owner of buildings under build-to-suit lease arrangements since Starbucks Japan has significant continuing involvement with the respective lessors and does not qualify for sales recognition during the lease term under sale-leaseback accounting guidance. Accordingly, we have recorded the acquired buildings in property, plant and equipment, and the assumed offsetting lease financing obligations, representing the related future minimum lease payments, in other long-term liabilities, with the current portion recorded in accrued liabilities on the consolidated balance sheets. These financing obligations will be amortized based on the terms of the related lease agreements.

The table below summarizes our estimated minimum future rental payments under the acquired non-cancelable operating leases and lease financing arrangements as of March 29, 2015 (in millions):

	Operating Leases	Lease Financing Arrangements
Year 1	\$87.0	\$3.2
Year 2	68.2	3.1
Year 3	53.1	3.1
Year 4	39.6	3.1
Year 5	31.7	3.1
Thereafter	150.5	31.1
Total minimum lease payments	\$430.1	\$46.7

The fair value of the noncontrolling interest in Starbucks Japan was estimated by applying the market approach. Specifically, the fair value was determined based on the purchase price we expected to pay for the remaining 21% noncontrolling interest, which was comprised of a set market price and a premium above the market price. The market price premium is a customary business practice for public tender offer transactions in Japan, so we believe this is what a market participant would pay and should be included in the fair value determination.

As a result of this acquisition, we remeasured the carrying value of our preexisting 39.5% equity method investment to fair value, which resulted in a pre-tax gain of \$390.6 million that was presented separately as gain resulting from acquisition of joint venture within other income on the consolidated statements of earnings. The fair value of \$577.0 million was calculated using an average of the income and market approach. The income approach fair value measurement was based on significant inputs that are not observable in the market and thus represents a fair value measurement categorized within Level 3 of the fair value hierarchy. Key assumptions used in estimating future cash flows included projected revenue growth and operating expenses, as well as the selection of an appropriate discount rate. Estimates of revenue growth and operating expenses were based on internal projections and considered the historical performance of stores, local market economics and the business environment impacting the stores' performance. The discount rate applied was based on Starbucks Japan's weighted-average cost of capital and included a company-specific risk premium. The market approach fair value measurement was based on the implied fair value of Starbucks Japan using the purchase price of Sazaby's 39.5% ownership interest and the expected purchase price of the 21% remaining noncontrolling interest.

We began consolidating Starbucks Japan's results of operations and cash flows into our consolidated financial statements beginning after October 31, 2014. For the quarter and two quarters ended March 29, 2015, Starbucks Japan's revenue included in our consolidated statements of earnings was \$291.3 million and \$484.1 million,

respectively. For the quarter and two quarters ended March 29, 2015, Starbucks Japan's net earnings included in our consolidated statements of earnings were \$18.5 million and \$38.8 million, respectively.

Table of Contents

The following table provides the supplemental pro forma revenue and net earnings of the combined entity had the acquisition date of Starbucks Japan been the first day of our first quarter of fiscal 2014 rather than during our first quarter of fiscal 2015 (in millions):

	Pro Forma (unaudited)			
	Quarter Ended		Two Quarters Ended	
	Mar 29, 2015	Mar 30, 2014	Mar 29, 2015	Mar 30, 2014
Revenue	\$4,563.5	\$4,152.4	\$9,458.5	\$8,679.1
Net earnings attributable to Starbucks ⁽¹⁾	495.6	418.5	1,097.3	1,340.3

The pro forma net earnings attributable to Starbucks for fiscal 2014 includes the acquisition-related gain of \$390.6 million, and transaction and integration costs of \$0.6 million and \$12.2 million for the quarter and two quarters ended March 30, 2014, respectively.

The amounts in the supplemental pro forma earnings for the periods presented above fully eliminate intercompany transactions, apply our accounting policies and reflect adjustments for additional occupancy costs, depreciation and amortization that would have been charged assuming the same fair value adjustments to leases, property, plant and equipment and acquired intangibles had been applied on September 30, 2013. These pro forma results are unaudited and are not necessarily indicative of results of operations that would have occurred had the acquisition actually occurred in the prior year period or indicative of the results of operations for any future period.

We initiated the second tender offer step on November 10, 2014 to acquire the remaining 21% ownership interest held by the public shareholders and option holders of Starbucks Japan's common stock, with the objective of acquiring all of the remaining outstanding shares including outstanding stock options. At the close of the second tender offer period on December 22, 2014, we funded the second tender offer step to acquire an additional 14.7% ownership interest for ¥31 billion in cash, or \$258 million with Japanese yen converted into U.S. dollars at a reference conversion rate of 120.39 JPY to USD. However, we did not complete the second tender offer nor obtain control of these shares until the settlement date of December 29, 2014, which was the first day of our second quarter of fiscal 2015.

Subsequent to the completion of the second tender offer step, we commenced a cash-out procedure under Japanese law (the "Cash-out") to acquire all remaining shares of Starbucks Japan (an approximate 6.3% interest). On March 26, 2015, we obtained control of these shares resulting in 100% ownership of Starbucks Japan. The purchase price for the Cash-out, which we expect to pay in the third quarter of fiscal 2015, is ¥13.5 billion, or approximately \$113.3 million, with Japanese yen converted into U.S. dollars at a reference conversion rate of 118.99 JPY to USD, which is reflected in accrued liabilities on our consolidated balance sheet as of March 29, 2015.

For the first quarter of fiscal 2015, net earnings attributable to noncontrolling interests in our consolidated statement of earnings related to Starbucks Japan reflects the 21% of minority shareholders' interests that we did not own as of the end of the first quarter of fiscal 2015. For the second quarter of fiscal 2015, net earnings attributable to noncontrolling interests in our consolidated statement of earnings related to Starbucks Japan reflects the approximate 6.3% of minority shareholders' interests that we did not obtain control of until March 26, 2015.

The following table shows the effects of the change in Starbucks ownership interest in Starbucks Japan on Starbucks equity:

	Two Quarters Ended	
	Mar 29, 2015	Mar 30, 2014
Net earnings attributable to Starbucks	\$1,478.3	\$967.6
Transfers (to)/from the noncontrolling interest:		
Increase/(decrease) in additional paid-in capital for purchase of interest in subsidiary	1.7	—
Change from net earnings attributable to Starbucks and transfers (to)/from noncontrolling interest	\$1,480.0	\$967.6

During the quarter and two quarters ended March 29, 2015, we incurred approximately \$0.3 million and \$11.3 million, respectively, of acquisition-related costs, such as regulatory, legal, and advisory fees, which we have recorded within unallocated corporate general and administrative expenses.

Table of Contents

Note 3: Derivative Financial Instruments

Interest Rates

Depending on market conditions, we enter into interest rate swap agreements to hedge the variability in cash flows due to changes in the benchmark interest rate related to anticipated debt issuances. These agreements are cash settled at the time of the pricing of the related debt. The effective portion of the derivative's gain or loss is recorded in accumulated other comprehensive income ("AOCI") and is subsequently reclassified to interest expense over the life of the related debt.

During the first quarter of fiscal 2015, we entered into forward-starting interest rate swap agreements with an aggregate notional amount of \$250.0 million related to a potential debt issuance in fiscal 2015.

Foreign Currency

To reduce cash flow volatility from foreign currency fluctuations, we enter into forward and swap contracts to hedge portions of cash flows of anticipated revenue streams, inventory purchases, and principal and interest payments on intercompany loans in currencies other than the entity's functional currency. The effective portion of the derivative's gain or loss is recorded in AOCI and is subsequently reclassified to revenue, cost of sales, or interest income and other, net, respectively, when the hedged exposure affects net earnings.

In connection with the acquisition of Starbucks Japan that is discussed in Note 2, Acquisition, we entered into cross-currency swap contracts during the first quarter of fiscal 2015 to hedge the foreign currency transaction risk of certain yen-denominated intercompany loans with a total notional value of ¥73.5 billion, or approximately \$618 million as of March 29, 2015. Gains and losses from these swaps offset the changes in value of interest and principal payments as a result of changes in foreign exchange rates, which are also recorded in net interest income and other on the consolidated statements of earnings. These swaps have been designated as cash flow hedges and mature in September 2016 and November 2024 at the same time as the related loans. There are no credit-risk-related contingent features associated with these swaps, although we may hold or post collateral depending upon the gain or loss position of the swap agreement.

We also enter into forward contracts to hedge the foreign currency exposure of our net investment in certain foreign operations. The effective portion of the derivative's gain or loss is recorded in AOCI and will be subsequently reclassified to net earnings when the hedged net investment is either sold or substantially liquidated.

As a result of our acquisition of Starbucks Japan, we reclassified the pretax cumulative net gains in AOCI of \$7.2 million related to our net investment derivative instruments used to hedge our preexisting 39.5% equity method investment in Starbucks Japan into earnings, which was included in the gain resulting from acquisition of joint venture line item on the consolidated statements of earnings. These gains offset the cumulative translation adjustment loss balance associated with our preexisting investment included in the calculation of the remeasurement gain, which is described further in Note 2, Acquisition.

To mitigate the foreign exchange risk of certain balance sheet items, we enter into foreign currency forward contracts that are not designated as hedging instruments. Gains and losses from these derivatives are largely offset by the financial impact of translating foreign currency denominated payables and receivables; both are recorded in net interest income and other.

Commodities

Depending on market conditions, we enter into coffee futures contracts and collars (the combination of a purchased call option and a sold put option) to hedge a portion of anticipated cash flows under our price-to-be-fixed green coffee contracts, which are described further in Note 5, Inventories. The effective portion of each derivative's gain or loss is recorded in AOCI and is subsequently reclassified to cost of sales when the hedged exposure affects net earnings.

To mitigate the price uncertainty of a portion of our future purchases of dairy products and diesel fuel, we enter into dairy swap contracts, futures and collars, as well as instruments used to hedge diesel fuel exposure that are not designated as hedging instruments. Gains and losses from these derivatives are recorded in net interest income and other and help to offset price fluctuations on our dairy purchases and the financial impact of diesel fuel fluctuations on our shipping costs, which are included in cost of sales including occupancy costs.

Table of Contents

Gains and losses on derivative contracts designated as hedging instruments included in AOCI and expected to be reclassified into earnings within 12 months, net of tax (in millions):

	Net Gains/(Losses) Included in AOCI		Net Gains/(Losses) Expected to be Reclassified from AOCI into Earnings within 12 Months	Contract Remaining Maturity (Months)

There were no transfers between levels and there was no significant activity within Level 3 instruments during the periods presented. The fair values of any financial instruments presented above exclude the impact of netting assets and liabilities when a legally enforceable master netting agreement exists.

Gross unrealized holding gains and losses on investments were not material as of March 29, 2015 and September 28, 2014.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Assets and liabilities recognized or disclosed at fair value on the consolidated financial statements on a nonrecurring basis include items such as property, plant and equipment, goodwill and other intangible assets, equity and cost method investments, and other assets. These assets are measured at fair value if determined to be impaired. During the quarter and two quarters ended March 29, 2015 and March 30, 2014, there were no material fair value adjustments. The estimated fair value of our long-term debt based on the quoted market price (Level 2) is included at [Note 7](#), Debt.

Table of Contents

Note 5: Inventories

(in millions)	Mar 29, 2015	Sep 28, 2014	Mar 30, 2014
Coffee:			
Unroasted	\$470.5	\$432.3	\$400.0
Roasted	213.5	238.9	189.5
Other merchandise held for sale	210.5	265.7	210.1
Packaging and other supplies	166.6	154.0	155.1
Total	\$1,061.1	\$1,090.9	\$954.7

Other merchandise held for sale includes, among other items, serveware and tea. Inventory levels vary due to seasonality, commodity market supply and price fluctuations.

As of March 29, 2015, we had committed to purchasing green coffee totaling \$787 million under fixed-price contracts and an estimated \$257 million under price-to-be-fixed contracts. As of March 29, 2015, approximately \$19 million of our price-to-be-fixed contracts were effectively fixed through the use of futures contracts and approximately \$17 million were price-protected through the use of collar instruments. Price-to-be-fixed contracts are purchase commitments whereby the quality, quantity, delivery period, and other negotiated terms are agreed upon, but the date, and therefore the price, at which the base "C" coffee commodity price component will be fixed has not yet been established. For these types of contracts, either Starbucks or the seller has the option to "fix" the base "C" coffee commodity price prior to the delivery date. Until prices are fixed, we estimate the total cost of these purchase commitments. We believe, based on relationships established with our suppliers in the past, the risk of non-delivery on these purchase commitments is remote.

(1) Release of pretax cumulative net gains in AOCI related to our net investment derivative instruments used to hedge our preexisting 39.5% equity method investment in Starbucks Japan.

(2) Release of cumulative translation adjustments to earnings upon sale or liquidation of foreign business.

As discussed in Note 1, Summary of Significant Accounting Policies, on April 9, 2015, we effected a two-for-one stock split of our \$0.001 par value common stock for shareholders of record as of March 30, 2015. All share data presented in this note has been retroactively adjusted to reflect this stock split.

In addition to 2.4 billion shares of authorized common stock with \$0.001 par value per share, the Company has authorized 7.5 million shares of preferred stock, none of which was outstanding as of March 29, 2015.

We repurchased 8.6 million shares of common stock at a total cost of \$342.4 million, and 8.1 million shares at a total cost of \$301.2 million for the two quarters ended March 29, 2015 and March 30, 2014, respectively. As of March 29, 2015, 23.1 million shares remained available for repurchase under the current authorization.

During the second quarter of fiscal 2015, our Board of Directors declared a quarterly cash dividend to shareholders of \$0.16 per share to be paid on May 22, 2015 to shareholders of record as of the close of business on May 7, 2015.

Note 9: Employee Stock Plans

As discussed in Note 1, Summary of Significant Accounting Policies, on April 9, 2015, we effected a two-for-one stock split of our \$0.001 par value common stock for shareholders of record as of March 30, 2015. All share and per-share data presented in this note has been retroactively adjusted to reflect this stock split.

As of March 29, 2015, there were 95.1 million shares of common stock available for issuance pursuant to future equity-based compensation awards and 14.6 million shares available for issuance under our employee stock purchase plan.

Table of Contents

Stock-based compensation expense recognized in the consolidated statements of earnings (in millions):

	Quarter Ended		Two Quarters Ended	
	Mar 29, 2015	Mar 30, 2014	Mar 29, 2015	Mar 30, 2014
Options	\$8.1	\$9.7	\$20.6	\$22.5
Restricted Stock Units (“RSUs”)	44.2	34.1	83.6	69.1
Total stock-based compensation	\$52.3	\$43.8	\$104.2	\$91.6

Stock option and RSU transactions from September 28, 2014 through March 29, 2015 (in millions):

	Stock Options	RSUs
Options outstanding/Nonvested RSUs, September 28, 2014	39.6	10.8
Granted	6.2	6.4
Options exercised/RSUs vested	(7.0) (5.0
Forfeited/expired	(0.8) (0.9
Options outstanding/Nonvested RSUs, March 29, 2015	38.0	11.3
Total unrecognized stock-based compensation expense, net of estimated forfeitures, as of March 29, 2015	\$46.8	\$195.3

Note 10: Earnings per Share

As discussed in Note 1, Summary of Significant Accounting Policies, on April 9, 2015, we effected a two-for-one stock split of our \$0.001 par value common stock for shareholders of record as of March 30, 2015. All share and per-share data presented in this note has been retroactively adjusted to reflect this stock split.

Calculation of net earnings per common share (“EPS”) — basic and diluted (in millions, except EPS):

	Quarter Ended		Two Quarters Ended	
	Mar 29, 2015	Mar 30, 2014	Mar 29, 2015	Mar 30, 2014
Net earnings attributable to Starbucks	\$494.9	\$427.0	\$1,478.3	\$967.6
Weighted average common shares outstanding (for basic calculation)	1,500.5	1,510.3	1,499.7	1,510.1
Dilutive effect of outstanding common stock options and RSUs	16.0	18.8	17.0	20.6
Weighted average common and common equivalent shares outstanding (for diluted calculation)	1,516.5	1,529.1	1,516.7	1,530.7
EPS — basic	\$0.33	\$0.28	\$0.99	\$0.64
EPS — diluted	\$0.33	\$0.28	\$0.97	\$0.63

Potential dilutive shares consist of the incremental common shares issuable upon the exercise of outstanding stock options (both vested and non-vested) and unvested RSUs, calculated using the treasury stock method. The calculation of dilutive shares outstanding excludes out-of-the-money stock options (i.e., such options’ exercise prices were greater than the average market price of our common shares for the period) because their inclusion would have been antidilutive. Out-of-the-money stock options totaled approximately 0.1 million and 5.7 million as of March 29, 2015 and March 30, 2014, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY STATEMENT PURSUANT TO THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Certain statements herein, including statements regarding trends in or expectations relating to the expected effects of our initiatives and plans, as well as trends in or expectations regarding earnings per share, revenues, operating margins, comparable store sales, sales leverage, sales growth, profitability, expenses, dividends, share repurchases, other financial results, the integration of Starbucks Japan and the anticipated gains and costs related to the acquisition of Starbucks Japan, capital expenditures, investments in our store partners, product innovation, offerings and distribution, including expansion of our beverage platforms and elevation of our food program, scaling and expansion of international operations, shifts in our store portfolio to more licensed stores in EMEA, foreign currency translation, growth of China into one of our largest markets outside the U.S., profitable growth models and opportunities, emerging businesses, strategic acquisitions, commodity costs and our mitigation strategies, liquidity, cash flow from operations, use of cash and cash requirements, repatriation of cash to the U.S., the potential issuance of debt and applicable interest rate, anticipated store openings and closings, net new stores, the health and growth of our business overall and of specific businesses or markets, benefits of recent initiatives, increased traffic to our stores, operational efficiencies, tax rates, and economic conditions in the U.S. and international markets, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based on currently available operating, financial and competitive information and are subject to various risks and uncertainties. Actual future results and trends may differ materially depending on a variety of factors, including, but not limited to, fluctuations in U.S. and international economies and currencies, our ability to preserve, grow and leverage our brands, potential negative effects of material breaches of our information technology systems if any were to occur, costs associated with, and the successful execution of, the company's initiatives and plans, including the acquisition of Starbucks Japan, the acceptance of the company's products by our customers, the impact of competition, coffee, dairy and other raw materials prices and availability, the effect of legal proceedings, and other risks detailed in our filings with the SEC, including in Part I Item IA "Risk Factors" in the 10-K.

A forward-looking statement is neither a prediction nor a guarantee of future events or circumstances, and those future events or circumstances may not occur. You should not place undue reliance on the forward-looking statements, which speak only as of the date of this report. We are under no obligation to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

This information should be read in conjunction with the condensed consolidated financial statements and the notes included in Item 1 of Part I of this 10-Q and the audited consolidated financial statements and notes, and Management's Discussion and Analysis of Financial Condition and Results of Operations, contained in the 10-K. General

Our fiscal year ends on the Sunday closest to September 30. All references to store counts, including data for new store openings, are reported net of store closures, unless otherwise noted.

Overview

Starbucks second quarter results reflect meaningful contributions from all reportable segments. Consolidated total net revenues increased 18% to \$4.6 billion, primarily driven by \$270 million of incremental revenues from the acquisition of Starbucks Japan, global comparable store sales growth of 7% and incremental revenue from 1,511 net new store openings over the last 12 months. These increases were partially offset by \$70 million of net unfavorable foreign currency translation, which resulted in an unfavorable impact of nearly 2% on revenue growth over the prior year second quarter. Consolidated operating income increased \$133 million, or 21%, to \$778 million. Operating margin expanded 40 basis points to 17.0%, primarily due to sales leverage, partially offset by the 100 basis point impact of our ownership change in Starbucks Japan, reflecting the change in accounting from a joint venture to a consolidated market and the acquisition-related transaction and integration costs. Earnings per share of \$0.33 increased 18% over the prior year quarter earnings per share of \$0.28.

The Americas segment continued its solid performance in the second quarter, growing revenues by 11% to \$3.1 billion, primarily driven by comparable store sales growth of 7%, comprised of a 5% increase in average ticket and a 2% increase in number of transactions, as well as revenue from 636 net new store openings over the past 12 months.

Growth in food sales, attributed to both new and existing products, successful limited time offering beverages and increased Teavana® tea sales in our Starbucks® retail stores contributed to the growth in comparable store sales. Operating margin expanded 110 basis points to 22.7%, primarily due to sales leverage, partially offset by increased salaries and benefits driven by investments in our store partners (employees). Looking forward, we expect to continue to drive revenue growth and margin expansion through net new stores and continued product innovation, targeted at driving growth across all geographies and dayparts, while continuing to make investments in our store partners through enhancements to wages and benefits. We plan to continue to expand our

Table of Contents

beverage platforms and elevate our food program, in part by expanding our Teavana-branded beverage offerings and with ongoing enhancements to our lunch options and the continued rollout of our Evenings program.

The transformation of our EMEA segment continued into the second quarter. Revenues declined \$30 million, or 10%, primarily due to \$32 million of unfavorable foreign currency translation, which resulted in an unfavorable impact of 11% on revenue growth over the prior year second quarter. This was partially offset by growth in revenue of \$5 million that was driven by comparable store sales growth of 2%. Incremental revenues from 188 net new licensed store openings over the past year also contributed. Sales leverage, driven by our ongoing portfolio shift to higher-margin licensed stores, as well as gains from the sales of certain store assets in the region, were the primary drivers of the 470 basis points of margin expansion over the prior year quarter, to 10.4%. We expect our continued disciplined licensed store expansion and focus on the customer experience, including introducing new food and beverage offerings in our retail stores, in this region will result in improved operating performance and contribute towards sustained mid-teens operating margin.

Our China/Asia Pacific segment results reflect the impact of fully consolidating Starbucks Japan. Incremental revenues from Starbucks Japan were the primary driver of the 124% increase in segment revenues, to \$595 million. Also contributing were increased sales from opening 232 company-operated and 479 licensed net new stores over the past year, along with a 12% increase in comparable store sales, primarily driven by a 10% increase in transactions. Operating income grew 29%, to \$112 million, while operating margin declined 1,390 basis points to 18.9%. The overall operating margin decline was due to the 1,470 basis point impact of the ownership change in Starbucks Japan and was partially offset by expansion of 80 basis points that was primarily due to sales leverage. We expect that continued new store openings and the integration of Starbucks Japan, including growth in other channels in the Japan market, will enable this segment to continue as a meaningful growth driver for our business. We also expect China will continue to grow toward being one of our largest markets outside of the U.S., primarily through expanding our retail store presence.

Channel Development segment revenues grew 16% for the quarter to \$428 million, primarily due to increased sales of premium single-serve products, driven by sales of Starbucks- and Tazo-branded K-Cup[®] portion packs, and growth in both packaged coffee and foodservice sales. Operating income grew \$29 million, or 23%, to \$156 million. Operating margin increased 210 basis points to 36.5% in the second quarter of fiscal 2015, driven by efficiencies in cost of sales, increased income from strong performance by our North American Coffee Partnership and sales leverage compared to the prior year. We continue to expand customer occasions outside of our retail stores, including growing our presence in the premium single-serve category with innovative new beverage offerings and internationally, particularly in the ready to drink market.

Fiscal 2015 — Financial Outlook for the Year

For fiscal year 2015, we expect revenue growth driven by incremental growth from the acquisition of Starbucks Japan, the opening of 1,650 net new stores, and mid-single-digit global comparable store sales growth, partially offset by the impact of unfavorable foreign currency translation. Approximately one-half of new store openings will be in China/Asia Pacific, with the remaining half coming primarily from the Americas.

For fiscal 2015, we expect consolidated operating margin to be flat compared to fiscal 2014. We also expect strong EPS growth over fiscal 2014, reflecting the strength of our global business and multiple layers of profitable growth initiatives.

Comparable Store Sales

Starbucks comparable store sales for the second quarter and the first two quarters of fiscal 2015:

	Quarter Ended Mar 29, 2015			Two Quarters Ended Mar 29, 2015		
	Sales Growth	Change in Transactions	Change in Ticket	Sales Growth	Change in Transactions	Change in Ticket
Consolidated	7%	3%	4%	6%	2%	4%
Americas	7%	2%	5%	6%	2%	4%
EMEA	2%	2%	1%	3%	2%	1%
China/Asia Pacific	12%	10%	2%	10%	9%	1%

Our comparable store sales represent the growth in revenue from Starbucks® company-operated stores open 13 months or longer. Comparable store sales exclude the effect of foreign currency translation.

Table of Contents

Results of Operations (in millions)

Revenues

	Quarter Ended			Two Quarters Ended			
	Mar 29, 2015	Mar 30, 2014	% Change	Mar 29, 2015	Mar 30, 2014	% Change	
Company-operated stores	\$3,622.9	\$3,068.0	18.1	% \$7,395.7	\$6,411.8	15.3	%
Licensed stores	421.3	356.2	18.3	905.3	758.0	19.4	
CPG, foodservice and other	519.3	449.6	15.5	1,065.8	943.6	13.0	
Total net revenues	\$4,563.5	\$3,873.8	17.8	% \$9,366.8	\$8,113.4	15.4	%

Total net revenues for the second quarter and first two quarters of fiscal 2015 increased \$690 million and \$1.3 billion, respectively, primarily due to increased revenues from company-operated stores (contributing \$555 million and \$984 million, respectively). The increase in company-operated store revenues was driven by incremental revenues from the acquisition of Starbucks Japan (approximately \$281 million and \$460 million, respectively), an increase in comparable store sales (approximately 7% growth, or \$202 million, for the second quarter and 6% growth, or \$366 million, for the first two quarters), and incremental revenues from 561 net new Starbucks® company-operated store openings over the past 12 months (approximately \$150 million and \$291 million, respectively). Partially offsetting these increases was the impact of unfavorable foreign currency translation (approximately \$61 million for the second quarter and \$95 million for the first two quarters).

Licensed store revenue growth also contributed to the increase in total net revenues for the second quarter and first two quarters of fiscal 2015 (contributing \$65 million and \$147 million, respectively). These increases were primarily a result of increased La Boulange food sales to our licensees in the Americas segment, as well as increased product sales to and royalty revenues from our licensees, primarily resulting from improved comparable store sales and the opening of 953 net new Starbucks® licensed stores over the past 12 months. These increases were partially offset by a decrease in licensed store revenues from the impact of our ownership change in Starbucks Japan (approximately \$12 million and \$20 million, respectively).

CPG, foodservice and other revenues increased \$70 million and \$122 million for the second quarter and the first two quarters of fiscal 2015, respectively. These increases were primarily due to increased sales of premium single-serve products (approximately \$35 million for the second quarter and \$61 million for the first two quarters), foodservice sales (approximately \$12 million for the second quarter and \$17 million for the first two quarters) and U.S. packaged coffee (approximately \$10 million for the second quarter and \$23 million for the first two quarters).

Other operating expenses	133.5	110.9	2.9	2.9	262.9	225.8	2.8	2.8	
Depreciation and amortization expenses	217.1	174.4	4.8	4.5	423.1	344.1	4.5	4.2	
General and administrative expenses	305.9	240.6	6.7	6.2	604.3	483.2	6.5	6.0	
Litigation credit	—	—	—	—	—	(20.2)	—	(0.2))
Total operating expenses	3,840.9	3,289.6	84.2	84.9	7,781.4	6,766.7	83.1	83.4	
Income from equity investees	54.9	59.9	1.2	1.5	107.7	111.0	1.1	1.4	
Operating income	\$777.5	\$644.1	17.0	% 16.6	% \$1,693.1	\$1,457.7	18.1	% 18.0	%
Store operating expenses as a % of related revenues			36.6	% 37.0	%		35.7	% 36.0	%

Cost of sales including occupancy costs as a percentage of total net revenues decreased 130 basis points for the second quarter and 110 basis points for the first two quarters of fiscal 2015, primarily driven by sales leverage (approximately 90 basis points for the second quarter and 80 basis points for the first two quarters of fiscal 2015) and cost of sales efficiencies (approximately 40 basis points in both periods).

Store operating expenses as a percentage of total net revenues decreased 30 basis points for the second quarter and for the first two quarters of fiscal 2015. Store operating expenses as a percentage of company-operated store revenues decreased 40 basis points for the second quarter and 30 basis points for the first two quarters, primarily driven by sales leverage (approximately 110 basis points and 100 basis points, respectively), partially offset by increased salaries and benefits driven by increased store partner (employee) investments (approximately 120 basis points and 70 basis points respectively). Decreased marketing (approximately 30 basis points) also contributed to the decrease for the second quarter.

Other operating expenses as a percentage of total net revenues were flat for the second quarter and the first two quarters of fiscal 2015. Excluding the impact of company-operated store revenues, other operating expenses increased 40 basis points for the quarter and were flat for the first two quarters of fiscal 2015. The impairment of certain assets in the Americas segment (approximately 90 basis points for the second quarter and 50 basis points for the first two quarters), partially offset by sales leverage, drove the change for both periods.

Depreciation and amortization expenses increased 30 basis points for both the second quarter and the first two quarters of fiscal 2015, primarily due to the impact of our ownership change in Starbucks Japan (approximately 30 basis points in each period).

General and administrative expenses as a percentage of total net revenues increased 50 basis points for the second quarter and the first two quarters of fiscal 2015. The second quarter increase was primarily due to increased performance-based compensation expense (approximately 40 basis points). The increase for the first two quarters was primarily due to increased professional fees (approximately 30 basis points) and higher performance based-compensation expense (approximately 20 basis points).

The \$20.2 million decrease in litigation credit for the first two quarters of fiscal 2015 was due to lapping of a prior year credit related to a reduction of our estimated prejudgment interest payable associated with the Kraft arbitration, as a result of paying our obligation earlier than anticipated.

The overall increase in operating margin of 40 basis points for the second quarter and 10 basis points for the first two quarters of fiscal 2015 were driven by the changes discussed above, including the impact of our ownership change in Starbucks Japan and the acquisition-related transaction and integration costs, which contributed unfavorably to operating margin 100 basis points for the second quarter and 90 basis points for the first two quarters.

Earnings before income taxes	761.9	645.2	16.7	16.7	2,061.6	1,464.0	22.0	18.0
Income taxes	266.3	218.3	5.8	5.6	581.2	496.4	6.2	6.1
Net earnings including noncontrolling interests	495.6	426.9	10.9	11.0	1,480.4	967.6	15.8	11.9
Net earnings/(loss) attributable to noncontrolling interests	0.7	(0.1)	—	—	2.1	—	—	—
Net earnings attributable to Starbucks	\$494.9	\$427.0	10.8 %	11.0 %	\$1,478.3	\$967.6	15.8 %	11.9 %
Effective tax rate including noncontrolling interests			35.0 %	33.8 %			28.2 %	33.9 %

During the first quarter of fiscal 2015, we recorded a gain of \$391 million as a result of remeasuring our preexisting 39.5% ownership interest in Starbucks Japan to fair value upon acquisition.

Net interest income and other decreased \$17 million for the second quarter and \$27 million for the first two quarters of fiscal 2015. The decrease for the second quarter was primarily the result of lower income recognized on unredeemed stored value card balances due to an increase in the expected future customer redemption rate (approximately \$13 million). The decrease for the first two quarters was primarily due to net unfavorable fair value adjustments from derivative instruments used to manage our risk of commodity price fluctuations (approximately \$24 million) and lower income recognized on unredeemed stored value card balances due to an increase in the expected future customer redemption rate and timing (approximately \$9 million).

Interest expense increased \$0.2 million for the second quarter and \$2 million for the first two quarters of fiscal 2015. The increase for the first two quarters was due to incurring a full quarter of interest in the first quarter of fiscal 2015 on the long-term debt we issued in December of fiscal 2014.

The effective tax rate for the quarter ended March 29, 2015 was 35.0% compared to 33.8% for the same quarter in fiscal 2014. The increase was primarily due to slightly higher international taxes, including the impact of consolidating Starbucks Japan. The effective tax rate for the two quarters ended March 29, 2015 was 28.2% compared to 33.9% for the same period in fiscal 2014. The decrease was primarily due to the 7.0% impact of the gain associated with the remeasurement of our preexisting 39.5% ownership interest in Starbucks Japan upon acquisition, which was almost entirely non-taxable.

Revenues

Americas total net revenues for the second quarter and the first two quarters of fiscal 2015 increased \$319 million, or 11%, and \$613 million, or 10%, respectively. These increases were primarily due to higher revenues from company-operated stores (contributing \$257 million and \$481 million, respectively) and licensed stores (contributing \$64 million and \$136 million, respectively).

The increase in company-operated store revenues was driven by 7% growth in comparable store sales (approximately \$175 million) for the second quarter and 6% growth in comparable store sales (approximately \$314 million) for the first two quarters, as well as incremental revenues from 348 net new Starbucks® company-operated store openings over the past 12 months (approximately \$106 million for the second quarter and \$210 million for the first two quarters). Partially offsetting these increases was unfavorable foreign currency translation (approximately \$24 million for the second quarter and \$45 million for the first two quarters), primarily driven by the strengthening of the U.S. dollar against the Canadian dollar.

The increase in licensed store revenues for the second quarter and the first two quarters was primarily due to increased La Boulange food sales to our licensees beginning in the first quarter of fiscal 2015, as well as other product sales to and royalty revenues from our licensees, resulting from improved comparable store sales and the opening of 286 net new licensed stores over the past 12 months, also contributed.

Operating Expenses

Cost of sales including occupancy costs as a percentage of total net revenues decreased 140 basis points for the second quarter and 90 basis points for the first two quarters of fiscal 2015, primarily driven by sales leverage (approximately 50 basis points for the second quarter and 40 basis points for the first two quarters), as well as cost of sales efficiencies (approximately 40 basis points in both periods).

Store operating expenses as a percentage of total net revenues decreased 30 basis points for both the second quarter and the first two quarters of fiscal 2015. Store operating expenses as a percentage of company-operated store revenues

increased 20 basis points for both periods. These increases were primarily driven by increased salaries and benefits driven by increased store

Table of Contents

partner (employee) investments (approximately 120 basis points for the second quarter and 70 basis points for the first two quarters) and various increased operational expenses related to in-store initiatives (approximately 30 basis points for the second quarter and 20 basis points for the first two quarters), partially offset by sales leverage (approximately 110 basis points and 90 basis points, respectively).

Other operating expenses as a percentage of total net revenues increased 40 basis points for the second quarter and 20 basis points for the first two quarters of fiscal 2015. Excluding the impact of company-operated store revenues, other operating expenses increased 220 basis points for the second quarter and 80 basis points for the first two quarters, primarily driven by the impairment of certain assets in the region (approximately 280 basis points for the second quarter and 130 basis points for the first two quarters). Sales leverage partially offset the increase for both periods. General and administrative expenses as a percentage of total net revenues increased 20 basis points for the second quarter and 10 basis points for the first two quarters of fiscal 2015, driven by higher performance-based compensation (approximately 30 basis points for the second quarter and 20 basis points for the first two quarters).

The combination of these changes resulted in an overall increase in operating margin of 110 basis points for the second quarter and 80 basis points for the first two quarters of fiscal 2015.

Revenues										

EMEA total net revenues decreased \$30 million, or 10%, for the second quarter and decreased \$36 million, or 6% for the first two quarters of fiscal 2015. The decreases were primarily from a decline in company-operated store revenues (approximately \$33 million and \$44 million, respectively). The decreases in company-operated store revenues were driven by unfavorable foreign currency translation (approximately \$31 million and \$42 million, respectively) and the transfer of certain stores in the UK from company-operated to licensed (approximately \$9 million for the second quarter and \$17 million for the first two quarters), partially offset by a 2% increase in comparable store sales (approximately \$5 million) for the second quarter and a 3% increase in comparable store sales (approximately \$15 million) for the first two quarters.

Licensed store revenues increased (approximately \$2 million for the second quarter and \$5 million for the first two quarters), due to higher product sales to and royalty revenues from our licensees (approximately \$6 million for the second quarter and \$15 million for the first two quarters), primarily from the opening of 188 net new licensed stores over the past 12 months and

30

Table of Contents

improved comparable store sales, partially offset by unfavorable foreign currency translation (approximately \$1 million for the second quarter and \$5 million for the first two quarters).

Operating Expenses

Cost of sales including occupancy costs as a percentage of total net revenues decreased 290 basis points for the second quarter and 280 basis points for the first two quarters of fiscal 2015, primarily due to favorable foreign currency exchange (approximately 170 basis points for the second quarter and 130 basis points for the first two quarters). We buy and sell products, primarily roasted coffee, in multiple currencies throughout the region depending on the functional currency of each market. Differences in those rates generated favorable foreign currency exchange for the second quarter and the first two quarters of fiscal 2015 resulting in a benefit in cost of sales. Sales leverage (approximately 80 basis points for the second quarter and 70 basis points for the first two quarters), driven by the shift to more licensed stores in the region, also contributed.

Store operating expenses as a percentage of total net revenues decreased 260 basis points for the second quarter and 270 basis points for the first two quarters of fiscal 2015. As a percentage of company-operated store revenues, store operating expenses decreased 170 basis points for the second quarter and 220 basis points for the first two quarters, primarily due to gains on the sales of certain store assets in the region (approximately 140 basis points for the second quarter and 100 basis points for the first two quarters). For the first two quarters of fiscal 2015, sales leverage driven by the shift to more licensed stores also contributed (approximately 60 basis points).

Other operating expenses as a percentage of total net revenues increased 100 basis points for the second quarter and 80 basis points for the first two quarters of fiscal 2015. Excluding the impact of company-operated store revenues, other operating expenses increased 160 basis points for the second quarter and 170 basis points for the first two quarters, primarily driven by increased costs to grow our non-retail operations in the region (approximately 190 basis points for the second quarter and 160 basis points for the first two quarters).

The combination of these changes resulted in an overall increase in operating margin of 470 basis points for the second quarter and 500 basis points for the first two quarters of fiscal 2015.

Discussion of our China/Asia Pacific segment results below reflects the impact of fully consolidating Starbucks Japan due to the ownership change from an equity method joint venture to a company-operated market since the acquisition date of October

31

Table of Contents

31, 2014. Under the joint venture model, we recognized royalties and product sales within revenue and related product cost of sales as well as our proportionate share of Starbucks Japan's net earnings, which we recognized within income from equity investees. This resulted in a very high operating margin. Under the company-operated ownership model, Starbucks Japan's operating results are reflected in most income statement lines of this segment and have an operating margin more in line with that of our other retail businesses.

Revenues

China/Asia Pacific total net revenues for the second quarter and the first two quarters of fiscal 2015 increased \$330 million, or 124%, and \$559 million, or 105%, respectively. The increases were primarily from an increase in company-operated store revenues (approximately \$330 million for the quarter and \$550 million for the first two quarters), driven by incremental revenues from the acquisition of Starbucks Japan (approximately \$281 million and \$460 million, respectively). Also contributing were incremental revenues from 232 net new company-operated store openings over the past 12 months (approximately \$41 million for the second quarter and \$81 million for the first two quarters) and an increase in comparable store sales (approximately 12% growth, or \$22 million, for the second quarter and 10% growth, or \$37 million, for the first two quarters).

Licensed store revenues decreased \$1 million for the second quarter and increased \$7 million for the first two quarters of fiscal 2015. The decrease for the second quarter was primarily the result of our ownership change in Starbucks Japan (approximately \$12 million), partially offset by increased product sales to and royalty revenues from licensees (approximately \$6 million), resulting from the opening of 479 net new licensed stores over the past 12 months, and incremental revenues from the transfer of stores in Australia and Malaysia to licensed stores in the fourth quarter of fiscal 2014 (approximately \$4 million). The increase for the first two quarters was primarily due to increased product sales to and royalty revenues from licensees (approximately \$18 million), resulting from the opening of 479 net new licensed stores over the past 12 months, and incremental revenues from the transfer of stores in Australia and Malaysia to licensed stores in the fourth quarter of fiscal 2014 (approximately \$9 million), partially offset by the impact of our ownership change in Starbucks Japan (approximately \$20 million).

Operating Expenses

Cost of sales including occupancy costs as a percentage of total net revenues decreased 270 basis points for the second quarter and 280 basis points for the first two quarters of fiscal 2015, primarily due to the impact of our ownership change in Starbucks Japan (approximately 200 basis points and 220 basis points, respectively). Sales leverage on occupancy costs also contributed (approximately 60 basis points for both periods).

Store operating expenses as a percentage of total net revenues increased 660 basis points for the second quarter and 570 basis points for the first two quarters of fiscal 2015. As a percentage of company-operated store revenues, store operating expenses increased 360 basis points for the second quarter and 310 basis points for the first two quarters, primarily from the impact of our ownership change in Starbucks Japan (approximately 480 basis points and 460 basis points, respectively), partially offset by the impact of the sale of our Australia retail operations in the fourth quarter of fiscal 2014 (approximately 70 basis points and 80 basis points, respectively) and sales leverage (approximately 70 basis points and 40 basis points, respectively).

Other operating expenses as a percentage of total net revenues decreased 210 basis points for the second quarter and 160 basis points for the first two quarters of fiscal 2015. Excluding the impact of company-operated store revenues, other operating expenses increased 220 basis points for the second quarter and 330 basis points for the first two quarters, primarily due to the impact of our ownership change in Starbucks Japan (approximately 430 basis points and 400 basis points, respectively). These increases were partially offset by the impact of the conversion of our Malaysia joint venture to a fully licensed market (approximately 130 basis points and 120 basis points, respectively) and the sale of our Australia retail operations (approximately 60 basis points and 60 basis points, respectively) in the fourth quarter of fiscal 2014.

Depreciation and amortization expenses increased 180 basis points for the second quarter and 190 basis points for the first two quarters of fiscal 2015 due to the impact of our ownership change in Starbucks Japan (approximately 190 basis points for both periods).

Income from equity investees as a percentage of total net revenues declined 980 basis points for the second quarter of fiscal 2015 and 790 basis points for the first two quarters of fiscal 2015, primarily driven by the impact of our

ownership change in Starbucks Japan (approximately 840 basis points and 690 basis points, respectively). The remaining change in income from equity investees was an increase of \$1.5 million for the second quarter and \$4.6 million for the first two quarters, which was primarily driven by higher income from our joint venture operations in China and Taiwan, partially offset by the absence of income from our Malaysia joint venture, which was converted to a fully licensed market in the fourth quarter of fiscal 2014. The accelerated growth in segment revenues, driven by the shift in the composition of our store portfolio to more company-operated stores, also contributed to income from equity investees declining as a percentage of total net revenues.

Table of Contents

The overall decrease in operating margin of 1,390 basis points for the second quarter and 1,140 basis points for the first two quarters of fiscal 2015 was primarily driven by the impact of our ownership change in Starbucks Japan (approximately 1,470 and 1,270 basis points, respectively), partially offset by 80 basis points of margin expansion for the second quarter and 130 basis points of margin expansion for the first two quarters driven by the other items discussed above.

Channel Development total net revenues for the second quarter and the first two quarters of fiscal 2015 increased \$58 million, or 16%, and \$99 million, or 13%, respectively, primarily due to higher sales of premium single-serve products (approximately \$35 million for the second quarter and \$61 million for the first two quarters) and U.S. packaged coffee (approximately \$10 million for the second quarter and \$23 million for the first two quarters). Also contributing to the growth in total net revenues was an increase in foodservice sales (approximately \$10 million for the second quarter and \$14 million for the first two quarters).

Operating Expenses

Cost of sales as a percentage of total net revenues decreased 60 basis points for the second quarter and 280 basis points for the first two quarters of fiscal 2015, primarily due to efficiencies in cost of sales (approximately 80 basis points and 150 basis points, respectively). Lower coffee costs also contributed to the decrease for the first two quarters (approximately 80 basis points).

Other operating expenses as a percentage of total net revenues decreased 70 basis points for the second quarter and 60 basis points for the first two quarters of fiscal 2015, primarily driven by sales leverage (approximately 60 basis points and 70 basis points, respectively).

Income from equity investees increased \$7 million for the second quarter and \$10 million for the first two quarters of fiscal 2015, due to higher income from our North American Coffee Partnership joint venture, primarily due to increased sales of bottled Frappuccino® beverages.

The combination of these changes resulted in an overall increase in operating margin of 210 basis points for the second quarter and 410 basis points for the first two quarters of fiscal 2015.

⁽³⁾ CAP store data includes the transfer of 1,009 Japan stores from licensed stores to company-operated as a result of the acquisition of Starbucks Japan in the first quarter of fiscal 2015.

⁽⁴⁾ CAP store data has been adjusted for the transfer of certain company-operated stores to licensed stores in the fourth quarter of fiscal 2014.

Financial Condition, Liquidity and Capital Resources

Investment Overview

Starbucks cash and investments totaled \$2.2 billion as of both March 29, 2015 and September 28, 2014. As discussed below, in the first quarter of fiscal 2015 we paid ¥55 billion (\$509 million) in cash to acquire Sazaby's 39.5% ownership interest in Starbucks Japan in the first tender offer step, and we paid ¥31.0 billion (\$258 million) in cash in the second quarter of fiscal 2015 to acquire an additional 14.7% ownership interest. We actively manage our cash and investments in order to internally fund operating needs, make scheduled interest and principal payments on our borrowings and return cash to shareholders through common stock cash dividend payments and share repurchases. Our investment portfolio primarily includes highly liquid available-for-sale securities, including corporate bonds, government treasury securities (foreign and domestic), mortgage and asset-backed securities, agency obligations and state and local government obligations. As of March 29, 2015, approximately \$1.1 billion of our cash and investments were held in foreign subsidiaries.

Borrowing Capacity

The indentures under which all of our Senior Notes were issued, as detailed in Note 7, Debt, to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q, require us to maintain compliance with

certain covenants,

35

Table of Contents

including limits on future liens and sale and leaseback transactions on certain material properties. As of March 29, 2015, we were in compliance with all applicable covenants.

Our \$750 million unsecured, revolving credit facility with various banks, of which \$150 million may be used for issuances of letters of credit, is available for working capital, capital expenditures and other corporate purposes, including acquisitions and share repurchases. During the second quarter of fiscal 2015, we extended the duration of our credit facility, which is now set to mature on January 21, 2020, and amended certain facility fees and borrowing rates. Starbucks has the option, subject to negotiation and agreement with the related banks, to increase the maximum commitment amount by an additional \$750 million. Borrowings under the credit facility will bear interest at a variable rate based on LIBOR, and, for U.S. dollar-denominated loans under certain circumstances, a Base Rate (as defined in the credit facility), in each case plus an applicable margin. The applicable margin is based on the better of (i) the Company's long-term credit ratings assigned by Moody's and Standard & Poor's rating agencies and (ii) the Company's fixed charge coverage ratio, pursuant to a pricing grid set forth in the credit facility. The current applicable margin is 0.680% for Eurocurrency Rate Loans and 0.00% for Base Rate Loans. The credit facility contains provisions requiring us to maintain compliance with certain covenants, including a minimum fixed charge coverage ratio, which measures our ability to cover financing expenses. As of March 29, 2015, we were in compliance with all applicable covenants. No amounts were outstanding under our credit facility as of March 29, 2015.

Under our commercial paper program, as approved by our Board of Directors, we may issue unsecured commercial paper notes up to a maximum aggregate amount outstanding at any time of \$1 billion, with individual maturities that may vary but not exceed 397 days from the date of issue. Amounts outstanding under the commercial paper program are to be backstopped by available commitments under our credit facility. Currently, we may issue up to \$750 million under our commercial paper program (which represents the full committed credit facility as outstanding letters of credit were not material as of March 29, 2015). The proceeds from borrowings under our commercial paper program may be used for working capital needs, capital expenditures and other corporate purposes, including acquisitions and share repurchases. We had no borrowings under our commercial paper program during the second quarter of fiscal 2015.

We continually evaluate liquidity and funding needs and potentially anticipate issuing long-term debt in fiscal 2015 to provide us with financial flexibility for general corporate purposes. As discussed further in Note 3, Derivative Financial Instruments, to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q, during the first quarter of fiscal 2015, we entered into forward-starting interest rate swap agreements to hedge the variability in cash flows due to changes in the benchmark interest rate related to this potential debt issuance.

Use of Cash

We expect to use our available cash and investments, including additional potential future borrowings under the credit facility and commercial paper program, to invest in our core businesses, including new product innovations and related marketing support, as well as other new business opportunities related to our core businesses. Further, we may use our available cash resources to make proportionate capital contributions to our equity method and cost method investees. We may also seek strategic acquisitions to leverage existing capabilities and further build our business in support of our growth agenda. Acquisitions may include increasing our ownership interests in our equity method and cost method investees. Any decisions to increase such ownership interests will be driven by valuation and fit with our ownership strategy.

We believe that future cash flows generated from operations and existing cash and investments both domestically and internationally will be sufficient to finance capital requirements for our core businesses in those respective markets as well as shareholder distributions for the foreseeable future. Significant new joint ventures, acquisitions and/or other new business opportunities may require additional outside funding. We have borrowed funds domestically and continue to believe we have the ability to do so at reasonable interest rates; however, additional borrowings would result in increased interest expense in the future.

As described in Note 2, Acquisition, to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q, in September 2014, we entered into a tender offer bid agreement with Starbucks Japan and our joint venture partner, Sazaby League, Ltd., to acquire the remaining 60.5% ownership interest in Starbucks Japan for approximately \$880 million, through a two-step tender offer. In the first quarter of fiscal 2015, we funded the first tender offer step

with \$509 million in offshore cash. At the close of the second tender offer period, which ended on December 22, 2014, we funded the second tender offer step with \$258 million in offshore cash, but did not complete the second tender offer or obtain control of these shares until the settlement date of December 29, 2014, which was the first day of our second quarter of fiscal 2015. Subsequent to the completion of the second tender offer step, we commenced a cash-out procedure under Japanese law to acquire all remaining shares. On March 26, 2015, we obtained control of these shares, resulting in 100% ownership of Starbucks Japan. We expect to fund the cash-out with approximately \$113 million in offshore cash in the third quarter of fiscal 2015.

We consider the majority of undistributed earnings of our foreign subsidiaries and equity investees as of March 29, 2015 to be indefinitely reinvested and, accordingly, no U.S. income and foreign withholding taxes have been provided on such earnings. We have not, nor do we anticipate the need to, repatriate funds to the U.S. to satisfy domestic liquidity needs; however, in the

Table of Contents

event that we need to repatriate all or a portion of our foreign cash to the U.S. we would be subject to additional U.S. income taxes, which could be material. We do not believe it is practicable to calculate the potential tax impact of repatriation, as there is a significant amount of uncertainty around the calculation, including the availability and amount of foreign tax credits at the time of repatriation, tax rates in effect, and other indirect tax consequences associated with repatriation.

Other than normal operating expenses and the completion of the cash-out procedure described above related to funding the acquisition of Starbucks Japan, cash requirements for the remainder of fiscal 2015 are expected to consist primarily of capital expenditures for new company-operated stores; remodeling and refurbishment of, and equipment upgrades for, existing company-operated stores; systems and technology investments in the stores and in the support infrastructure; and additional investments in manufacturing capacity. Total capital expenditures for fiscal 2015 are expected to be approximately \$1.4 billion.

During the second quarter of fiscal 2015, our Board of Directors declared a quarterly cash dividend to shareholders of \$0.16 per share to be paid on May 22, 2015 to shareholders of record as of the close of business on May 7, 2015. We repurchased 8.6 million shares of common stock (\$342.4 million) during the first two quarters of fiscal 2015 under the current share repurchase authorization. The number of remaining shares authorized for repurchase as of March 29, 2015 totaled 23.1 million.

Cash Flows

Cash provided by operating activities was \$2.0 billion for the first two quarters of fiscal 2015, compared to cash used by operating activities of \$983.5 million for the same period in fiscal 2014. The increase was primarily driven by lapping the prior year payment of \$2.8 billion for the Kraft arbitration matter. The remaining change of \$220.5 million was primarily due to increased earnings, partially offset by changes in working capital accounts mainly due to timing. Cash used by investing activities for the first two quarters of fiscal 2015 totaled \$872.8 million, compared to \$549.0 million for the same period in fiscal 2014. The change was primarily due to the use of cash to acquire Sazaby's 39.5% ownership interest in Starbucks Japan in the first quarter of fiscal 2015.

Cash used by financing activities for the first two quarters of fiscal 2015 totaled \$975.4 million, compared to cash provided of \$157.4 million for the same period in fiscal 2014. The change was primarily due to lapping the receipt of proceeds from the issuance of long-term debt in the first quarter of fiscal 2014, as well as cash used to fund the second tender offer step of the Starbucks Japan acquisition in the second quarter of fiscal 2015. Also contributing was increased cash returned to shareholders through higher dividend payments and share repurchases compared to the first two quarters of fiscal 2014.

Contractual Obligations

In Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 10-K, we disclosed that we had \$8.7 billion in total contractual obligations as of September 28, 2014. There have been no material changes to this total obligation during the period covered by this 10-Q outside of the addition of our estimated minimum future rental payments of approximately \$476.8 million under the acquired non-cancelable operating leases and lease financing arrangements resulting from the acquisition of Starbucks Japan discussed in Note 2, Acquisition, to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q.

Off-Balance Sheet Arrangements

There has been no material change in our off-balance sheet arrangements discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in the 10-K.

Commodity Prices, Availability and General Risk Conditions

Commodity price risk represents our primary market risk, generated by our purchases of green coffee and dairy products, among other items. We purchase, roast and sell high quality whole bean arabica coffee and related products and risk arises from the price volatility of green coffee. In addition to coffee, we also purchase significant amounts of dairy products to support the needs of our company-operated stores. The price and availability of these commodities directly impact our results of operations and we expect commodity prices, particularly coffee, to impact future results of operations. For additional details see Product Supply in Item 1 of the 10-K, as well as Risk Factors in Item 1A of the 10-K.

Seasonality and Quarterly Results

Our business is subject to seasonal fluctuations, including fluctuations resulting from the holiday season in December. Excluding the impact of our \$2.8 billion cash payment in the first quarter of fiscal 2014 related to the Kraft arbitration matter, our cash flows from operations are considerably higher in the first fiscal quarter than the remainder of the year. This is largely driven by cash received as Starbucks Cards are issued to and loaded by customers during the holiday season. Since revenues from the Starbucks Card are recognized upon redemption and not when cash is loaded onto them, the impact of seasonal fluctuations on the consolidated statements of earnings is much less pronounced. Quarterly results are affected by the timing of

Table of Contents

the opening of new stores and the closing of existing stores. For these reasons, results for any quarter are not necessarily indicative of the results that may be achieved for the full fiscal year.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 1, Summary of Significant Accounting Policies, to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the commodity price risk, foreign currency exchange risk, equity security price risk, or interest rate risk discussed in Item 7A of the 10-K.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that material information required to be disclosed in our periodic reports filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer as appropriate, to allow timely decisions regarding required disclosure.

During the second quarter of fiscal 2015, we carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, of the effectiveness of the design and operation of the disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based upon that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this report (March 29, 2015).

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during our most recently completed fiscal quarter that materially affected or are reasonably likely to materially affect internal control over financial reporting except as noted below:

We acquired Starbucks Japan during the first quarter of fiscal 2015 (see Note 2, Acquisition, to the condensed consolidated financial statements included in Item 1 of Part I of this 10-Q). As permitted by the Securities and Exchange Commission Staff interpretive guidance for newly acquired businesses, management excluded Starbucks Japan from its evaluation of internal control over financial reporting as of March 29, 2015. We are in the process of documenting and testing Starbucks Japan's internal controls over financial reporting and plan to incorporate Starbucks Japan in our evaluation of internal controls over financial reporting beginning in the first quarter of fiscal 2016. Starbucks Japan contributed \$1.8 billion to our consolidated total assets as of March 29, 2015, and \$291.3 million and \$32.5 million to our consolidated net revenues and operating income, respectively, for the quarter ended March 29, 2015. Starbucks Japan contributed \$484.1 million and \$62.2 million to our consolidated net revenues and operating income, respectively, for the two quarters ended March 29, 2015.

The certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 are filed as exhibits 31.1 and 31.2 to this 10-Q.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

Starbucks is party to various legal proceedings arising in the ordinary course of business, including, at times, certain employment litigation cases that have been certified as class or collective actions, but is not currently a party to any legal proceeding that management believes could have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in the 10-K.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Information regarding repurchases of our common stock during the quarter ended March 29, 2015, as adjusted to give effect to the two-for-one stock split discussed in Note 1, Summary of Significant Accounting Policies, included in Item 1 of Part I of this 10-Q:

Period ⁽¹⁾	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs ⁽²⁾
December 29, 2014 — January 25, 2015	1,785,218	\$40.60	1,785,218	24,331,814
January 26, 2015 — February 22, 2015	805,400	44.65	805,400	23,526,414
February 23, 2015 — March 29, 2015	379,812	47.15	379,812	23,146,602
Total	2,970,430	\$42.53	2,970,430	

⁽¹⁾ Monthly information is presented by reference to our fiscal months during the second quarter of fiscal 2015.

The share repurchase program is conducted under authorizations made from time to time by our Board of Directors. The shares reported in the table are covered by the November 15, 2012 publicly announced Board

⁽²⁾ authorization to repurchase up to 50 million shares, as adjusted to give effect to the two-for-one stock split discussed in Note 1, Summary of Significant Accounting Policies, included in Item 1 of Part I of this 10-Q. This authorization has no expiration date.
