For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements - Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial reporting purposes as follows:

Level 1 — unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 — other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 — unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to the Fund's most recent financial statements as contained in its semi-annual report.

The following tables summarize the inputs used as of May 31, 2012 in determining the fair valuation of the Fund's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2   | Level 3     | Total       |

| Total            | \$6,426,613 | \$(93,000,000) | —       | \$(86,573,387) |

There were no transfers between Level 1 and Level 2 during the period ended May 31, 2012.

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee to determine the fair value of certain of the Fund's Level 3 investments as of May 31, 2012:

|                 | Value     | Valuation Techniques        | Unobservable Inputs <sup>1</sup> | Range of Unobservable Inputs | Weighted Average of Unobservable Inputs <sup>2</sup> |
|-----------------|-----------|-----------------------------|----------------------------------|------------------------------|--|
| <b>Assets:</b>  |           |                             |                                  |                              |  |
| Common Stocks   | \$ 6,034  | Market Comparable Companies | EBITDA Multiple                  | 5.0x                         | 5.0x   |
| Corporate Bonds | 2,007,205 | Market Comparable Companies | EBITDA Multiple                  | 5.0x                         | 5.0x   |

|                          |              |                 |          |     |     |
|--------------------------|--------------|-----------------|----------|-----|-----|
| Floating Rate Loan       |              | Estimated Final | Probable |     |     |
| Interests                | 1,193,561    | Distribution    | Outcome  | 50% | 50% |
| <b>Total<sup>3</sup></b> | \$ 3,206,800 |                 |          |     |     |

<sup>1</sup>A change to the unobservable input may result in a significant change to the value of the investment as follows:

| Unobservable Input | Impact to Value if Input Increases | Impact to Value if Input Decreases |
|--------------------|------------------------------------|------------------------------------|
| EBITDA Multiple    | Increase                           | Decrease                           |
| Probable Outcome   | Increase                           | Decrease                           |

<sup>2</sup>Unobservable inputs are weighted based on the value of the investments included in the range.

Does not include Level 3 investments with values derived utilizing prices from prior transactions or third party pricing information without adjustment for which such inputs are unobservable. See above valuation input table for values of such Level 3 investments. A significant change in the unobservable inputs could result in a significantly lower or higher value in such Level 3 investments.
