The Fund may invest in "zero coupon" securities. A zero coupon security does not pay a regular interest coupon to the holder of the security comes from accretion of the difference between the original purchase price of the security and is effectively paid at maturity. Such securities are included in the Portfolio of Investments with a 0.000% coupon. Such securities generally are more volatile than the market prices of securities that pay interest periodically.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise indicated.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be certain mortgage-backed securities that are subject to periodic principal paydowns.
- (3) Ratings: Using the higher of Standard & Poor's Group ("Standard & Poor's") or Moody's Investor Service, Inc. ("Moody's"). Ratings of Baa by Moody's are considered to be below investment grade.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which entitle the holder to the principal and interest on the investments. Such investments are normally considered to be equivalent to AAA rated securities.
