Chairman's
Letter to Shareholders

Dear Shareholders,

These are perplexing times for investors. The global economy continues to struggle. The solutions being implemented in the eurozone to deal with the debt crises of many of its member countries are not yet seen as sufficient by the financial markets. The political paralysis in the U.S. has prevented the compromises necessary to deal with the fiscal imbalance and government spending priorities. The efforts by individual consumers, governments and financial institutions to reduce their debts are increasing savings but reducing demand for the goods and services that drive employment. These developments are undermining the rebuilding of confidence by consumers, corporations and investors that is so essential to a resumption of economic growth.

Although it is painfully slow, progress is being made. In Europe, the turnover of a number of national governments reflects the realization by politicians and voters alike that leaders who practiced business as usual had to be replaced by leaders willing to face problems and accept the hard choices needed to resolve them. The recent coordinated efforts by central banks in the U.S. and Europe to provide liquidity to the largest European banks indicates that these monetary authorities are committed to facilitating a recovery in the European banking sector.

In the U.S., the failure of the congressionally appointed Debt Reduction Committee was a blow to those who hoped for a bipartisan effort to finally begin addressing the looming fiscal crisis. Nevertheless, Congress and the administration cannot ignore the issue for long. The Bush era tax cuts are scheduled to expire on December 31, 2012, and six months later the \$1.2 trillion of mandatory across-the-board spending cuts under the Budget Control Act of 2011 begin to go into effect. Any legislative modification would require bipartisan support and the prospects for a bipartisan solution are unclear. The impact of these two developments would be a mixed blessing: a meaningful reduction in the annual budget deficit at the cost of slowing the economic recovery.

It is in these particularly volatile markets that professional investment management is most important. Skillful investment teams who have experienced challenging markets and remain committed to their investment disciplines are critical to the success of an investor's long-term objectives. In fact, many long-term investment track records are built during challenging markets when managers are able to protect investors against these economic crosscurrents. Experienced investment teams know that volatile markets put a premium on companies and investment ideas that will weather the short-term volatility and that compelling values and opportunities are opened up when markets overreact to negative developments. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner
Chairman of the Board

Portfolio managers Michael Hamilton and Chris Drahn, CFA discuss key investment strategies and the six-month performance of these eight Nuveen Funds. With 23 years of investment experience, Michael assumed portfolio management responsibility for the Connecticut and Massachusetts Funds in January 2011. Chris, who has 32 years of financial industry experience, took on portfolio management responsibility for NOM in January 2011.

What key strategies were used to manage these Funds during the six-month reporting period ended November 30, 2011?

During this reporting period, municipal bond prices generally rallied as yields declined across the municipal curve. The decline in yields was attributable in part to the continued depressed levels of municipal bond issuance. Tax-exempt volume, which had been limited in 2010 by issuers' extensive use of taxable Build America Bonds (BABs), generally continued to drift lower in 2011. For the six months ended November 30, 2011, national municipal issuance was down 17% compared with the same period in 2010, while issuance declined 14% in Massachusetts and 10% in Missouri during the same period. In Connecticut, municipal issuance rose by just 2% during this period.

In addition, finding appropriate insured municipal bonds, especially new insured issues, remained a challenge for the Funds with an insured mandate, such as NGX, due to the continued severe decline in insured issuance. Over the past few years, most municipal bond insurers had their credit ratings downgraded, and only one insurer currently insures new municipal bonds. As a result, the supply of insured municipal securities has decreased dramatically. Through November 30, 2011, issuance of new insured paper in 2011 accounted for just 5% of total municipal issuance, down 46% from the eleven months ended November 2010. Even though NGX may now invest up to 20% of its net assets in uninsured investment-grade credits rated BBB- or higher, the combination of tight municipal supply, little insured issuance, and relatively lower yields meant few attractive opportunities for this Fund during this period.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by a national rating agency.

Despite the constrained issuance of tax-exempt municipal bonds and relatively lower yields, we continued to take a bottom-up approach to discovering what we thought were undervalued sectors and individual credits with the potential to perform well over the long term. During this period, the Connecticut Funds took advantage of attractive opportunities to add to their holdings in the health care sector, purchasing a variety of names across all four Funds, including bonds issued for Sacred Heart Hospital, Lawrence Memorial Hospital, and hospitals in Danbury, Middlesex and Hartford. In the Massachusetts Funds, we found value in several sectors, including general obligation credits, student loan bonds, higher education issues, sales tax revenue bonds, as well as health care credits in NMB. NOM added utilities and continuing care retirement community credits, higher education bonds (e.g., Washington University, Webster University), and health care credits, including St. Luke Episcopal Hospital in St. Louis and Capital Region Medical Center in Jefferson City. When state paper was scarce, the Connecticut Funds and NOM took advantage of their ability to invest a portion of their net assets in buying tax-exempt territorial bonds, including Puerto Rico sales tax bonds in NOM, to keep the Funds invested.

Our focus in these Funds generally was on purchasing bonds with intermediate and longer maturities in order to keep the Funds' durations within their targeted objectives to help maintain their yield curve positioning. The purchase of longer bonds also enabled us to take advantage of more attractive yields at the longer end of the municipal yield curve. From a quality perspective, the Connecticut and Massachusetts Funds emphasized lower-rated credits, while NOM's purchases were diversified across the credit quality categories, with the majority rated A. Because the issuance of new municipal supply continued to be limited, we monitored the secondary, as well as the primary, market for attractive opportunities.

Cash for new purchases was generated primarily by the proceeds from bond calls and maturing bonds. The elevated number of bond calls provided a meaningful source of liquidity, which drove much of our activity during this period as we worked to redeploy the proceeds to keep the Funds fully invested. The Connecticut Funds and NOM also sold some bonds with short maturities or short call dates, while the Massachusetts Funds trimmed their positions in bonds rated AAA. Overall, selling was relatively minimal, as the bonds in our portfolios generally offered higher yields than those available in the current marketplace.

As of November 30, 2011, all of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement.

How did the Funds perform?

Nuveen Investments 7

For the six months ended November 30, 2011, the cumulative returns on common share net asset value (NAV) for all seven of the non-insured Connecticut, Massachusetts and Missouri Funds exceeded the returns for their respective state's Standard & Poor's (S&P) Municipal Bond Index as well as the S&P National Municipal Bond Index. NOM also outperformed the average return for the Lipper Other States Municipal Debt Funds Classification Average, while the remaining six non-insured Funds trailed this Lipper average. Shareholders should note that the performance of the Lipper Other States classification represents the overall average of returns for funds from ten different states with a wide variety of municipal market conditions, making direct comparisons less meaningful. For the same period, NGX outperformed the S&P Massachusetts Municipal Bond Index and underperformed the national S&P Insured Municipal Bond Index and the Lipper Single-State Insured Municipal Debt Funds Classification Average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocation. In addition, the use of structural leverage was an important positive factor affecting the Funds' performance. Leverage is discussed in more detail later in this report.

During this period, municipal bonds with intermediate and longer maturities generally outperformed those with shorter maturities, with bonds at the longest end of the municipal yield curve posting the strongest returns. Duration and yield curve positioning was a net positive contributor to the performance of all of the Funds in this report except NGX. Overall, NOM was advantageously situated in terms of duration and yield curve positioning. NMT and NMB also were overweighted in the outperforming longer end of the curve and underweighted in the underperforming shorter part of the curve. Although the Connecticut Funds tended to be overweighted to the shortest end of the curve that produced the weakest returns, this was more than offset by the Funds' relative underweighting in medium term bonds and heavy overweighting in bonds with longer maturities. However, NGX was not as well positioned for the environment of this period, with an overweight in the short end of the curve and underexposure to the long end; this was the main component of the Fund's underperformance for this period. NGX's positioning was largely the result of the severe decline in new insured municipal issuance, as previously discussed. As the maturities on the insured bonds in NGX's portfolio shortened, it became very difficult to find new insured bonds with longer maturities to replace them and thereby extend NGX's duration. Recent changes to NGX's investment policies as discussed in more detail later in this report.

Credit exposure also played a role in performance during these six months, as lower-rated bonds, especially those rated BBB, generally outperformed higher-quality bonds rated AAA and AA. Overall, credit exposure was positive for NMT, NMB and NOM, all of which were overweighted in bonds rated BBB and underweighted in bonds rated AAA and AA. In the Connecticut Funds, the impact of the Funds' credit allocations was relatively neutral. In the insured NGX, the Fund's heavy weighting of AAA and AA bonds and underexposure to bonds rated BBB detracted from its performance for the period.

Holdings that generally made positive contributions to the Funds' returns during this period included zero coupon bonds and health care, industrial development revenue (IDR), transportation and education credits. All of these Funds (except NGX) were overweighted in health care, especially NFC and NOM, which boosted their performance. The Massachusetts and Connecticut Funds also had heavy weightings in the education sector. In addition, NMT and NMB benefited from their holdings of multi-family housing bonds. NOM, which added to its position in Puerto Rico sales tax bonds during this period, was rewarded as these bonds performed well for the six months.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, were the poorest performing market segment during this period. The underperformance of these bonds can be attributed primarily to their shorter effective maturities and higher credit quality. Among these eight Funds, NGX was heavily overweighted in pre-refunded bonds, while NGK and NGO also had double-digit allocations to pre-refunded bonds, which negatively impacted their performance. In addition, NMB held two health care credits—Northern Berkshire Community Hospital System and Quincy Medical Center—that detracted from the Fund's performance as the hospitals continued to work through financial issues, including bankruptcy.

APPROVED FUND MERGERS

On August 1, 2011, the Funds' Board of Trustees approved a series of reorganizations for all the Connecticut funds included in this report. The reorganizations are intended to create a single larger state Fund, which would potentially offer shareholders the following benefits:

- Lower Fund expense ratios (excluding the effects of leverage), as fixed costs are spread over a larger asset base;
- Enhanced secondary market trading, as larger Funds potentially make it easier for investors to buy and sell fund shares;
- Lower per share trading costs through reduced bid/ask spreads due to a larger common share float; and
- Increased Fund flexibility in managing the structure and cost of leverage over time.

The approved reorganizations are as follows:

| Acquired Funds | Acquiring Fund |
|--|--|
| Nuveen Connecticut Dividend Advantage Municipal Fund (NFC) | Nuveen Connecticut Premium Income Municipal Fund (NTC) |
| Nuveen Connecticut Dividend Advantage Municipal Fund 2 (NGK) | |
| Nuveen Connecticut Dividend Advantage Municipal Fund 3 (NGO) | |

A special meeting of shareholders for the purpose of voting on the reorganizations was held on December 19, 2011 and subsequently adjourned to January 31, 2012 because a sufficient number of shareholders did not vote by the original meeting date and in order to allow shareholders more time to cast their votes.

If shareholders approve the reorganizations, and upon the closing of the reorganizations, the Acquired Fund will transfer substantially all of its assets to the Acquiring Fund in exchange for common and preferred shares of the Acquiring Fund, and the assumption by the Acquiring Fund of the liabilities of the Acquired Fund. The Acquired Fund will then be liquidated, dissolved and terminated in accordance with its Declaration of Trust.

If shareholders approve the reorganizations, Acquired Fund shareholders will become shareholders of the Acquiring Fund. Holders of common shares will receive newly issued common shares of the Acquiring Fund, the aggregate net asset value of which will be equal to the aggregate net asset value of the common shares of the Acquired Fund held immediately prior to the reorganizations (including for this purpose fractional Acquiring Fund shares to which shareholders would be entitled). Fractional shares will be sold on the open market and shareholders will receive cash in lieu of such fractional shares. Holders of MTP Shares of each Acquired Fund will receive on a one-for-one basis newly issued MTP Shares of the Acquiring Fund, in exchange for MTP Shares of the Acquired Fund held immediately prior to the reorganization, with such new Acquiring Fund MTP Shares having the same terms as exchanged MTP Shares of the Acquired Fund.

FUND POLICY CHANGES

On October 31, 2011, the Board of Trustees of NGX approved changes to the Fund's fundamental investment policy regarding its investment in insured municipal securities and recommended submitting the changes to shareholders for approval at its annual shareholder meeting. NGX held its annual meeting December 16, 2011 and the meeting was subsequently adjourned to January 31, 2012.

If shareholders approve the changes, NGX will eliminate the investment policy requiring it, under normal circumstances, to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. The change is designed to provide the Adviser with more flexibility regarding the types of securities available for investment by NGX.

As noted previously, over the past few years most municipal bond insurers have had their credit ratings downgraded and only one insurer is currently insuring new municipal bonds. As a result, the supply of insured municipal securities has decreased dramatically and the long-term viability of the municipal bond insurance market is uncertain. NGX is not changing its investment objective. In addition, if shareholders approve the changes, NGX, as a non-fundamental investment policy, will invest at least 80% of its managed assets in municipal securities that pay interest exempt from the federal alternative minimum tax applicable to individuals and will change its name to Nuveen Massachusetts AMT-Free Municipal Income Fund, Inc.

Fund Leverage and
Other Information

IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of all these Funds relative to the comparative indexes was the Funds' use of leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of these Funds over this reporting period.

RECENT DEVELOPMENTS REGARDING THE FUNDS' REDEMPTION OF AUCTION RATE PREFERRED SHARES

Shortly after their respective inceptions, each of the Funds issued auction rate preferred shares (ARPS) to create structural leverage. As noted in past shareholder reports, the weekly auctions for those ARPS shares began in February 2008 to consistently fail, causing the Funds to pay the so called "maximum rate" to ARPS shareholders under the terms of the ARPS in the Funds' charter documents. As of May 31, 2011, the Funds redeemed all of their outstanding ARPS at par and since then have relied upon inverse floating rate securities and MuniFund Term Preferred (MTP) Shares to create effective and structural leverage, respectively.

During 2010 and 2011, certain Nuveen leveraged closed-end funds (excluding all the Funds included in this report) received a demand letter from a law firm on behalf of purported holders of common shares of each such fund, alleging that Nuveen and the funds' officers and Board of Directors/Trustees breached their fiduciary duties related to the redemption at par of the funds' ARPS. In response, the Board established an ad hoc Demand Committee consisting of certain of its disinterested and independent Board members to investigate the claims. The Demand Committee retained independent counsel to assist it in conducting an extensive investigation. Based upon its investigation, the Demand Committee found that it was not in the best interests of each fund or its shareholders to take the actions suggested in the demand letters, and recommended that the full Board reject the demands made in the demand letters. After reviewing the findings and recommendation of the Demand Committee, the full Board of each fund unanimously adopted the Demand Committee's recommendation.

Subsequently, the funds that received demand letters were named in a consolidated complaint as nominal defendants in a putative shareholder derivative action captioned Martin Safier, et al. v. Nuveen Asset Management, et al. that was filed in the Circuit Court of Cook County, Illinois, Chancery Division (the “Cook County Chancery Court”) on February 18, 2011 (the “Complaint”). The Complaint, filed on behalf of purported holders of each fund’s common shares, also named Nuveen Fund Advisors, Inc. as a defendant, together with current and former Officers and interested Directors/Trustees of each of the funds (together with the nominal defendants, collectively, the “Defendants”). The Complaint contained the same basic allegations contained in the demand letters. The Defendants filed a motion to dismiss the suit and on December 16, 2011, the court granted that motion dismissing the Complaint. The plaintiffs failed to file an appeal of the court’s decision within the required time period, resulting in the final disposition of the suit.

MTP Shares

As of November 30, 2011, the Funds have issued and outstanding MTP Shares, as shown in the accompanying table.

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment and Market Risk. An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Price Risk. Shares of closed-end investment companies like these Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Inverse Floater Risk. The funds invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the fund could lose more than its original principal investment.

Common Share Dividend and
Share Price Information

DIVIDEND INFORMATION

The monthly dividends of NTC, NMT and NOM remained stable throughout the six-month reporting period ended November 30, 2011, while NFC, NGK, NGO, NMB and NGX each had one reduction in their monthly dividends, effective September 2011.

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of November 30, 2011, all of the Funds in this report except NMB and NGX had positive UNII balances, based upon our best estimate, for tax purposes and positive UNII balances for financial reporting purposes. NMB and NGX had positive UNII balances, based upon our best estimate, for tax purposes and negative UNII balances for financial reporting purposes.

COMMON SHARE REPURCHASES AND SHARE PRICE INFORMATION

Since the inception of the fund's repurchase programs, the Funds have not repurchased any of their outstanding common shares.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal

Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

- (5) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (6) MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investment is 34.5%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

(UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities for more information.
