* Non-income producing security.

~ The face amount is denominated in U.S. Dollars, unless otherwise noted.

† Value determined based on Level 1 inputs — See Note 1.

† Value determined based on Level 2 inputs — See Note 1.

¹ All or a portion of these securities have been physically segregated in connection with borrowings and reverse repurchase agreements. As of January 31, 2016, the total value of the positions segregated was \$239,028,507.

² Perpetual maturity.

³ Rate indicated is the 7-day yield as of January 31, 2016.

Security is a 144A or Section 4(a)(2) security. The total market value of 144A or Section 4(a)(2) securities is \$61,556,883 (cost \$67,593,762), or 31.2% of total net assets. These securities have been determined to be liquid under guidelines established by the Board of Trustees.

⁵ Zero coupon rate security.

⁶ Security is a step up/step down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity.

⁷ Security becomes an accreting bond after March 1, 2018, with a 2.00% principal accretion rate.

⁸ Security is an accreting bond until December 15, 2017, with a 4.00% principal accretion rate, and then accretes at a 2.00% principal accretion rate until maturity.

⁹ Variable rate security. Rate indicated is rate effective at January 31, 2016.

Total	\$84,293,878	\$281,663,503	\$ -	\$365,957,381
Liabilities:				
Forward Foreign Currency Exchange Contracts	\$-	\$200,041	\$ -	\$200,041
Total	\$-	\$200,041	\$ -	\$200,041

Please refer to the detailed portfolio for the breakdown of investment type by industry category.

The Fund did not hold any Level 3 securities during the period ended January 31, 2016.

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. Transfers between valuation levels, if any, are in comparison to the valuation levels at the end of the previous fiscal year, and are effective using the fair value as of the end of the current fiscal period.

For the period ended January 31, 2016, there were no transfers between valuation levels.

NOTES TO SCHEDULE OF INVESTMENTS (Unaudited) January 31, 2016

For information on the Advent Claymore Convertible Securities and Income Fund II's (the "Fund") policy regarding valuation of investments and other significant accounting policies, please refer to the Fund's most recent semiannual or annual shareholder report.

Note
1 –
Accounting
Policies:

The Fund operates as an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 Financial Services –

Investment
Companies.

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of the significant accounting policies followed by the Fund.

Equity securities listed on an exchange are valued at the last reported sale price on the primary exchange on which they are traded. Equity securities traded on an exchange or on the other over-the-counter market and for

which there are no transactions on a given day are valued at the mean of the closing bid and ask prices. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Equity securities not listed on a securities exchange or NASDAQ are valued at the mean of the closing bid and ask prices. Debt securities are valued by independent pricing services or dealers using the mean of the closing bid and ask prices for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. If sufficient market activity is limited or does not exist, the pricing providers or broker-dealers may utilize proprietary valuation models which consider market characteristics such as

benchmark yield curves, option-adjusted spreads, credit spreads, estimated default rates, coupon rates, anticipated timing of principal repayments, underlying collateral, or other unique security features in order to estimate relevant cash flows, which are then discounted to calculate a security's fair value.

Exchange-traded funds and listed closed-end funds are valued at the last sale price or official closing price on the exchange where the security is principally traded. Swaps are valued daily by independent pricing services or dealers using the mid price.

Forward foreign currency exchange contracts are valued daily at current exchange rates. Futures contracts are valued using the settlement price established each day on the

exchange on
which they are
traded.

Exchange-traded
options are
valued at the
closing price, if
traded that day. If
not traded, they
are valued at the
mean of the bid
and ask prices on
the primary
exchange on
which they are
traded.

Short-term
securities with
remaining
maturities of 60
days or less are
valued at market
price, or if a
market price is
not available, at
amortized cost,
provided such
amount
approximates
market value.

The Fund values
money market
funds at net asset
value.

Short-term
securities with
remaining
maturities of 60
days or less at the
time of purchase
are valued at
amortized cost,
which
approximates
market value.

For those
securities where
quotations or
prices are not
available, the

valuations are determined in accordance with procedures established in good faith by management and approved by the Board of Trustees. A valuation committee consisting of representatives from investment management, fund administration, legal and compliance is responsible for the oversight of the valuation process of the Fund and convenes monthly, or more frequently as needed. The valuation committee reviews monthly Level 3 fair valued securities methodology, price overrides, broker quoted securities, price source changes, illiquid securities, unchanged priced securities, halted securities, price challenges, fair valued securities sold and back testing trade prices in relation to prior day closing prices.

On a quarterly basis, the valuations and methodologies of all Level 3 fair valued securities are presented to the Fund's Board of Trustees.

Valuations in accordance with these procedures are intended to reflect each security's (or asset's) fair value. Such fair value is the amount that the Fund might reasonably expect to receive for the security (or asset) upon its current sale. Each such determination is based on a consideration of all relevant factors, which are likely to vary from one security to another. Examples of such factors may include, but are not limited to: (i) the type of security, (ii) the initial cost of the security, (iii) the existence of any contractual restrictions on the security's disposition, (iv) the price and extent of public trading in similar securities of the

issuer or of comparable companies, (v) quotations or evaluated prices from broker-dealers and/or pricing services, (vi) information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange traded securities), (vii) an analysis of the company's financial statements, and (viii) an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold (e.g. the existence of pending merger activity, public offerings or tender offers that might affect the value of the security). There were no securities fair valued in accordance with such procedures established by the Board of Trustees as of January 31, 2016.

GAAP requires disclosure of fair

valuation measurements as of each measurement date. In compliance with GAAP, the Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and summarized in the following fair value hierarchy:

Level 1 - quoted prices in active markets for identical securities.

Level 2 - quoted prices in inactive markets or other significant observable inputs (e.g. quoted prices for similar securities; interest rates; prepayment

speed; credit risk;
yield curves).

Level 3 -
significant
unobservable
inputs (e.g.
discounted cash
flow analysis;
non-market
based methods
used to
determine fair
value).

Observable
inputs are those
based upon
market data
obtained from
independent
sources, and
unobservable
inputs reflect the
Fund's own
assumptions
based on the best
information
available. A
financial
instrument's level
within the fair
value hierarchy is
based on the
lowest level of
any input both
individually and
in aggregate that
is significant to
the fair value
measurement.
The inputs or
methodology
used for valuing
securities are not
necessarily an
indication of the
risk associated
with investing in
those securities.

The following are certain inputs and techniques that are generally utilized to evaluate how to classify each major type of investment in accordance with GAAP.

Equity Securities (Common and Preferred Stock) –

Equity securities traded in active markets where market quotations are readily available are categorized as Level 1.

Equity securities traded in inactive markets and certain foreign equities are valued using inputs which include broker quotes, prices of securities closely related where the security held is not trading but the related security is trading, and evaluated price quotes received from independent pricing providers. To the extent that these inputs are observable, such securities are

categorized as
Level 2. To the
extent that these
inputs are
unobservable,
such securities
are categorized
as Level 3.

Convertible Bonds & Notes – Convertible bonds and notes are valued by independent pricing providers who employ matrix pricing models utilizing various inputs such as market prices, broker quotes, prices of securities with comparable maturities and qualities, and closing prices of corresponding underlying securities. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Corporate Bonds & Notes – Corporate bonds and notes are valued by independent pricing providers who employ matrix pricing models utilizing various inputs such as market prices, broker quotes, prices of

securities with comparable maturities and qualities, and closing prices of corresponding underlying securities. To the extent that these inputs are observable, such securities are categorized as Level 2. To the extent that these inputs are unobservable, such securities are categorized as Level 3.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and categorized in Level 1 of the fair value hierarchy.

Over-the-counter (OTC) derivative contracts including forward foreign currency exchange contracts and option contracts derive their value from underlying asset prices, indices, reference rates, and other inputs.

Depending on the product and terms of the transaction, the fair value of the OTC derivative products can be

modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments, and the pricing inputs are observed from actively quoted markets. These OTC derivatives are categorized within Level 2 of the fair value hierarchy.

Note
2 –
Federal
Income
Taxes:

As of January 31, 2016, the cost and related gross unrealized appreciation and depreciation on investments for tax purposes excluding forward foreign currency exchange contracts and foreign currency translations are as

Edgar Filing: Advent Claymore Convertible Securities & Income Fund II - Form N-Q

follows:

Cost of Investments for Tax Purposes	Gross Tax Unrealized Appreciation	Gross Tax Unrealized Depreciation		Net Tax Unrealized Depreciation on Investments	Net Tax Unrealized Appreciation on Derivatives and Foreign Currency
\$ 390,445,555	\$ 4,066,689	\$ (30,161,383)		\$ (26,094,694)	\$ 1,406,817

Note
3
– Forward Foreign Currency Exchange Contracts:

As of January 31, 2016, the following forward foreign currency exchange contracts were outstanding:

Classification
Scheme.

Item 2. Controls and Procedures.

(a) The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) as of a date within 90 days of the filing date of this report and have concluded, based on such evaluation, that the registrant's disclosure controls and procedures were effective, as of that date, in ensuring that information required to be disclosed by the registrant on this Form N-Q was recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) There was no change in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the registrant's last fiscal quarter that has materially affected or is reasonably likely to materially affect the registrant's internal control over financial reporting.

Item 3. Exhibits.

A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940, as amended (17 CFR 270.30a-2(a)), is attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Advent Claymore Convertible Securities and Income Fund II
