LINCOLN NATIONAL
SPECIAL OPPORTUNITIES FUND, INC.
ANNUAL PORTFOLIO COMMENTARY
For the year ended December 31, 2002

Managed by:

[DELAWARE INVESTMENTS LOGO]

The Lincoln National Special Opportunities Fund had a return of -11.8% for the year ended December 31, 2002, while its style specific benchmark, the Russell MidCap Value Index*, returned -9.7% and the broader market index, the S&P MidCap 400 Index**, returned -14.5%.

For 2002, the markets declined for the third year in a row -- the first series of three consecutive years of decline in over 50 years. The Fund's performance lagged the performance of the Russell Mid-Cap Value Index* for the year. The underperformance can be attributed in part to stock selection in media and healthcare stocks. This underperformance was partially offset by stock selection in the utility and finance sectors.

Although U.S. equity markets performed strongly in the fourth quarter of 2002, much of the strength was in lower quality stocks that had, with hindsight, been oversold. We expect the current high level of volatility in stock prices to continue until investors are convinced that a sustained economic recovery has begun and corporate earnings concerns ease. However, the Federal Reserve's recent 50 basis point reduction in short-term interest rates, to levels not seen in 40 years, and improved prospects for further tax cuts, due to the Republican Party's victory in the mid-term Congressional elections, should both be interpreted positively by the equity markets. The hope is that this combination of fiscal and monetary easing will help stimulate increased economic activity in the U.S. in 2003. So, looking forward, we maintain a positive long-term view on both the economy and equity markets and thus remain committed to our process -- blending quantitative screening, fundamental research and portfolio risk control. At year end, the Fund held moderately overweight positions in the finance, healthcare and defense sectors relative to its benchmark, the Russell MidCap Value Index*.

Growth of \$10,000 invested 1/1/93 through 12/31/02

(CHART)

This chart illustrates, hypothetically, that \$10,000 was invested in the Special Opportunities Fund on 1/1/93. As the chart shows, by December 31, 2002, the value of the investment at net asset value, with any dividends and distributions reinvested, would have grown to \$24,631. For comparison, look at how the S&P MidCap 400 Index and the Russell MidCap Value Index did over the same period. The same \$10,000 investment would have grown to \$30,945 and \$28,537, respectively. Past performance is not indicative of future performance. Remember, an investor cannot invest directly in an index.

LINCOLN NATIONAL SPECIAL OPPORTUNITIES FUND, INC.

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2002

THE FUND: Lincoln National Special Opportunities Fund, Inc. (the "Fund") is registered as an open-end, diversified management investment company under the Investment Company Act of 1940, as amended. The Fund's shares are sold only to The Lincoln National Life Insurance Company and Lincoln Life & Annuity Company of New York (the "Companies") for allocation to their variable annuity products and variable universal life products.

The Fund's investment objective is to maximize long-term capital appreciation.

1. SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: LINCOLN NATIONAL SPECIAL OPPORTUNITIES FUND INC - Form N-CSR

The following accounting policies are in accordance with accounting principles generally accepted in the United States and are consistently followed by the Fund.

SECURITY VALUATION: All equity securities are valued at the last quoted sales price as of the time of the regular close of the New York Stock Exchange (NYSE) on the valuation date. If on a particular day an equity security does not trade, then the mean between the bid and asked prices will normally be used. Short-term debt securities having less than 60 days to maturity are valued at amortized cost, which approximates market value. Other securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith under the direction of the Fund's Board of Directors. In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures, or with respect to foreign securities, aftermarket trading or significant events after local market trading (e.g. government actions or pronouncements, trading volume or volatility on markets, exchanges among dealers, or news events).

FEDERAL INCOME TAXES: The Fund intends to continue to qualify for federal income tax purposes as a regulated investment company and make the requisite distributions to shareholders. Accordingly, no provision for federal income taxes has been made in the financial statements.

USE OF ESTIMATES: The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting year. Actual results could differ from those estimates.

OTHER: Security transactions are accounted for on the date the securities are purchased or sold (trade date). Costs used in calculating realized gains and losses on the sale of investment securities are those of the specific securities sold. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis. The Fund declares and distributes dividends from net investment income, if any, semi-annually. Distributions from net realized gains, if any, are declared and distributed annually.

The Fund receives earnings credits from its custodian when positive cash balances are maintained, which are used to offset custody fees. The earnings credits for the year ended December 31, 2002, were approximately \$2,346. The expense paid under the above arrangement is included under custodial fees on the Statement of Operations with the expense offset shown as "expenses paid indirectly".

2. MANAGEMENT FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Effective May 1, 2002, Delaware Management Company (DMC) is responsible for overall management of the Fund's investment portfolio and provides certain administrative services to the Fund. DMC is a series of Delaware Management Business Trust (DMBT), a multi-series business trust registered with the Securities and Exchange Commission as an investment adviser. DMBT is an indirect wholly-owned subsidiary of Lincoln National Corporation (LNC). For its services, DMC receives a management fee at an annual rate of 0.48% of the first \$200 million of the average daily net assets of the Fund, 0.40% of the next \$200 million, and 0.30% of the average daily net assets of the Fund in excess of \$400 million.

Prior to May 1, 2002, Vantage Investment Advisers (VIA), an affiliate of DMC, served as the investment manager to the Fund under identical terms.

Special Opportunities Fund 7

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

During the year ended December 31, 2002, DMC and VIA contractually waived a portion of their management fees in the amount of \$92,455. Effective January 1, 2003, this waiver was discontinued in connection with stockholder approval of the amended Management Agreement as discussed below on December 9, 2002.

If the aggregate annual expenses of the Fund, including the management fee, but excluding taxes, interest, brokerage commissions relating to the purchase or sale of portfolio securities and extraordinary non-recurring expenses, exceed 1.50% of the average daily net assets of the Fund, DMC has agreed to reimburse the Fund in the amount of such excess. No reimbursement was due for the year ended December 31, 2002.

Delaware Service Company, Inc. (DSC), an affiliate of DMC, provides accounting services and other administration support to the Fund. For these services, the Fund pays DSC a monthly fee based on average net assets, subject to certain minimums.

At December 31, 2002, the Fund had payables to affiliates as follows:

Management Fees Payable to DMC	\$153,844
Accounting and Administration Fees Payable to DSC	32,186

On December 9, 2002, stockholders of the Fund approved an amended Management Agreement between the Fund and DMC that is effective January 1, 2003. The Fund will incur additional fees and expenses under the new agreement because certain expenses relating to the administration of the Fund's affairs and the maintenance of the Fund's books and records will be paid by the Fund rather than the investment adviser.

In connection with the amended Management Agreement, the Board of Directors of the Fund approved an Administration Agreement with Lincoln National Life Insurance Company (Lincoln Life), an affiliate of DMC, dated January 1, 2003. Pursuant to the Administration Agreement, Lincoln Life will provide various administrative services necessary for the operation of the Fund. For these services, the Fund will pay Lincoln Life an annual fee of \$15,000 plus the cost of certain support services, such as legal and corporate secretary services.

Certain officers and directors of the Fund are also officers or directors of the Companies and receive no compensation from the Fund. The compensation of unaffiliated directors of the Fund is borne by the Fund.
