FORM 10-K

**S ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934**

For the fiscal year ended June 30, 2007

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

For the Transition Period From ____ to ____

Commission file number: 33-60032

Buckeye Technologies Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or
organization)

62-1518973
(I.R.S. Employer Identification No.)

1001 Tillman Street, Memphis, Tennessee
(Address of principal executive offices)

38112
(Zip Code)

Registrant's telephone number, including area code (901) 320-8100

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on which Registered
Common Stock, par value \$0.1 per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act
Yes No S

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No S

Note – Checking the box above will not relieve any registrant required to file report pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Indicate by check mark whether registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of “accelerated filer” or “large accelerated filer” in Rule 12b-2 of the Exchange Act. (Check one).

Large accelerated filer

Accelerated filer S

Non-accelerated filer

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will be contained, to the best of registrant’s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. S

Indicate by a check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No S

As of December 31, 2006, the aggregate market value of the registrant’s voting common equity held by non-affiliates, computed by reference to the price at which the common equity was last sold, was approximately \$424.4 million.

As of September 1, 2007, there were outstanding 39,046,082 Common Shares of the Registrant.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of Buckeye Technologies Inc.’s 2007 Annual Proxy Statement to be filed with the commission in connection with the 2007 Annual Meeting of Stockholders are incorporated by reference into Part III and IV.

PART I

Item 1. Business

General

Buckeye Technologies Inc. is a leading producer of value-added cellulose-based specialty products, headquartered in Memphis, Tennessee. We believe that we have leading positions in many of the high-end niche markets in which we compete. We utilize our expertise in polymer chemistry, leading research and development and advanced manufacturing facilities to develop and produce innovative and proprietary products for our customers. We sell our products to a wide array of technically demanding niche markets in which we believe our proprietary products, manufacturing processes and commitment to customer technical service give us a competitive advantage. We are the only manufacturer in the world offering cellulose-based specialty products made from both wood and cotton and utilizing wetlaid and airlaid technologies. As a result, we believe we produce and market a broader range of cellulose-based specialty products than any of our competitors. We produce precisely tailored products designed to meet individual customer requirements. Our focus on specialty niche markets allows us to establish long-term supply positions with key customers. We operate manufacturing facilities in the United States, Canada, Germany and Brazil.

Cellulose is a natural fiber derived from trees and other plants that is used in the manufacture of a wide array of products. The total cellulose market generally can be divided into two categories: commodity and specialty. Manufacturers use commodity cellulose to produce bulk paper and packaging materials, the markets for which are very large but highly cyclical. Specialty cellulose is used to impart unique chemical or physical characteristics to a diverse range of highly engineered products. Specialty cellulose generally commands higher prices, and demand for specialty cellulose is less cyclical than commodity cellulose. We believe the more demanding performance requirements for products requiring specialty cellulose limit the number of participants in our niche markets. Our focus on niche specialty cellulose markets has enabled us to maintain positive cash flows even during cyclical downturns in the commodity cellulose markets.

Company History

We and our predecessors have participated in the specialty cellulose market for over 85 years and have developed new uses for many cellulose-based products. We began operations as an independent company on March 16, 1993, when we acquired the cellulose manufacturing operations of Procter & Gamble located in Memphis, Tennessee and Perry, Florida (the Foley Plant), with Procter & Gamble retaining a 50% limited partnership interest in the Foley Plant. We became a public company in November of 1995 and simultaneously acquired and redeemed Procter & Gamble's remaining interest in the Foley Plant.

In May 1996, we acquired the specialty cellulose business of Peter Temming AG located in Glueckstadt, Germany. In September 1996, we acquired Alpha Cellulose Holdings, Inc., a specialty cellulose producing facility located in Lumberton, North Carolina. In May 1997, we acquired Merfin International Inc., a leading manufacturer of airlaid nonwovens with facilities located in Canada, Ireland and the United States. In October 1999, we acquired essentially all of the assets of Walkisoft, UPM-Kymmene's airlaid nonwovens business. The acquisition of Walkisoft added manufacturing facilities in Steinfurt, Germany and Gaston County, North Carolina. In March 2000, we acquired the intellectual property rights to the Stac-Pac™ folding technology. In August 2000, we acquired the cotton cellulose business of Fibra, S.A. located in Americana, Brazil. In calendar 2001, we commenced operating the world's largest airlaid nonwovens machine at our Gaston, North Carolina facility and started up a cosmetic cotton fiber line at our Lumberton, North Carolina facility.

Due to a decline in demand for cotton content paper, in August 2003, we closed the specialty cotton papers portion of our Lumberton, North Carolina facility. Due to excess airlaid production capacity around the globe we closed our

single-line airlaid nonwovens facility in Cork, Ireland during July 2004. In December 2005, we ceased production at our cotton linter pulp facility in Glueckstadt, Germany. In conjunction with this closure, we upgraded the capability of our Americana, Brazil manufacturing facility. This expansion was completed during fiscal year 2006. See Note 3, Impairment of Long-Lived Assets and Assets Held for Sale, to the Consolidated Financial Statements for further discussion of the Lumberton, North Carolina; Cork, Ireland; and Glueckstadt, Germany closures.

We are incorporated in Delaware and our executive offices are located at 1001 Tillman Street, Memphis, Tennessee. Our telephone number is (901) 320-8100.

Products

Our product lines can be broadly grouped into four categories: chemical cellulose, customized fibers, fluff pulp and nonwoven materials. We manage these products within two reporting segments: specialty fibers and nonwoven materials. The chemical cellulose and customized fibers are derived from wood and cotton cellulose materials using wetlaid technologies. Fluff pulps are derived from wood using wetlaid technology. Wetlaid technologies encompass cellulose manufacturing processes in which fibers are deposited using water. Airlaid nonwoven materials are derived from wood pulps, synthetic fibers and other materials using airlaid technology. Airlaid technology utilizes air as a depositing medium for fibers, one benefit of which is an increased ability as compared to wetlaid processes to mix additional feature-enhancing substances into the material being produced. A breakdown of our major product categories, percentage of sales, product attributes and applications is provided below.

Product Groups	% of Fiscal 2007 Sales	Value Added Attributes	Market for End Use Applications
<i>Specialty Fibers</i>			
Chemical Cellulose	33%		
Food casings		Purity and strength	Hot dog and sausage casings
Rayon industrial cord		Strength and heat stability	High performance tires and hose reinforcement
High purity cotton ethers		High viscosity, purity and safety	Personal care products, low fat dairy products, pharmaceuticals and construction materials
Film for liquid crystal displays		Transparency/clarity, strength and Purity	Laptop and desktop computers and television screens
Customized Fibers	16%		
Filters		High porosity and product life	Automotive, laboratory and industrial filters
Specialty cotton papers		Color permanence and tear resistance	Personal stationery, premium letterhead and currency
Cosmetic Cotton		Absorbency, strength and softness	Cotton balls and cotton swabs
Buckeye UltraFiber 500 ^â		Finishing and crack reduction	Concrete
Fluff Pulp	18%		
Fluff pulp		Absorbency and fluid transport	Disposable diapers, feminine hygiene products and adult incontinence products
<i>Nonwoven Materials</i>	33%		

Airlaid nonwovens

Absorbency, fluid
management and wet strength

Feminine hygiene products,
specialty wipes and mops,
tablecloths, napkins, placemats,
incontinence products and food pads

See Note 14, Segment Information, to the Consolidated Financial Statements for additional information on products.

Raw Materials

Slash pine timber and cotton fibers are the principal raw materials used in the manufacture of our specialty fibers products. These materials represent the largest components of our variable costs of production. The region surrounding the Foley Plant has a high concentration of slash pine timber, which enables us to purchase adequate supplies of a species well suited to our products at an attractive cost. In order to be better assured of a secure source of wood at reasonable prices, we have entered into timber purchase agreements which allow us to purchase a portion of our wood at market prices that are fixed annually or current market prices as stated in the agreements. Additional information is included in Note 16, Commitments, to the Consolidated Financial Statements.

We purchase cotton fiber either directly from cottonseed oil mills or indirectly through agents or brokers. We purchase the majority of our requirements of cotton fiber for the Memphis and Lumberton plants domestically. The majority of the cotton fiber processed in the Americana plant comes from within Brazil.

Fluff pulp is the principal raw material used in the manufacture of our nonwoven materials products. Approximately 65% of our fluff pulp usage is supplied internally and the remainder is purchased from several other suppliers. In addition to fluff pulp, these products are comprised of synthetic fibers, latex polymers, absorbent powders and carrier tissue depending on grade specifications. These materials are also purchased from multiple sources.

The cost and availability of slash pine timber, cotton fiber, and fluff pulp are subject to market fluctuations caused by supply and demand factors. We do not foresee material constraints from pricing or availability for slash pine timber and fluff pulp. We have potential raw material availability issues for our cotton fibers in both North America and Brazil. We have increased our imported cotton linters purchases for Memphis specialty cotton fiber production in order to minimize the impact of current constraints on North American cotton fiber availability. For the near term, this raw material availability will limit growth and put pressure on our margins.

Our manufacturing processes especially for specialty fibers, require significant amounts of fuel oil and natural gas. These manufacturing inputs are subject to significant changes in prices and availability, which could adversely impact our future operating results.

Sales and Customers

Our products are marketed and sold through a highly trained and technically skilled sales force. We maintain sales offices in the United States and Europe. Our worldwide sales are diversified by geographic region as well as end-product application. Our sales are distributed to customers in approximately 60 countries around the world. Our fiscal 2007 sales reflect this geographic diversity, with 43% of sales in North America, 38% of sales in Europe, 9% of sales in Asia, 4% of sales in South America and 6% in other regions. Approximately 82% of our worldwide sales, for fiscal 2007, were denominated in U.S. dollars. Our products are shipped by rail, truck and ocean carrier. Geographic segment data and product sales data are included in Note 14, Segment Information, to the Consolidated Financial Statements.

Sales by geographical destination for the three years ended June 30, 2007 were as follows:

(in millions)

	Sales by Destination								
	2007			2006			2005		
United States	\$	254	33%	\$	230	32%	\$	235	33%
Italy		72	9		66	9		56	8
Germany		66	9		59	8		63	9
Canada		45	6		47	6		48	7

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-K

Japan	38	5	38	5	38	5
Mexico	33	4	25	3	16	2

All other	185	25	195	28	189	26
Total	\$ 769	100%	\$ 728	100%	\$ 713	100%

The high-end, technically demanding specialty niche markets that we serve require a higher level of sales and technical service support than do commodity product sales. Our sales, product development and customer service professionals work with customers in their plants to design products tailored precisely to their product needs and manufacturing processes. In addition to a direct sales force, we also utilize outside sales agents in some parts of the world.

Procter & Gamble is our largest customer, accounting for 12% of our fiscal 2007 net sales. Nonwoven materials account for approximately 62% of the total sales to Procter & Gamble. No other customer accounted for greater than 6% of our fiscal 2007 net sales.

Research and Development

Our research and development activities focus on developing new products, improving existing products, and enhancing process technologies to further reduce costs and respond to environmental needs. We have research and development pilot plant facilities in Memphis, and we employ engineers, scientists and technicians who are focused on advanced products and new applications to drive future growth. Our pilot plant facilities allow us to produce, test and deliver breakthrough products to the market place on a more cost-effective basis while minimizing interruptions to the normal production cycles of our operating plants.

Research and development costs of \$8.3 million, \$9.2 million and \$8.8 million were charged to expense as incurred for the years ended June 30, 2007, 2006 and 2005, respectively.

Competition

There are relatively few specialty fibers producers when compared with the much larger commodity paper pulp markets. The technical demands and unique requirements of the high-purity chemical cellulose or customized fiber pulp user tend to differentiate suppliers on the basis of their ability to meet the customer's particular set of needs, rather than focusing only on pricing. The high-purity chemical cellulose and customized fiber markets are less subject to price variation than commodity paper pulp markets. Major competitors include Archer-Daniels-Midland, Borregaard, Rayonier and Tembec .

We believe that the number of producers is unlikely to grow significantly due to the substantial investment required to enter the mature specialty fibers market and to sufficient existing capacity. However, Sateri has announced that it is adding 250,000 tons of specialty pulp capacity in Brazil in the October-December quarter of 2007, and a former Weyerhaeuser mill in Cosmopolis, Washington with an annual capacity of 155,000 metric tons may restart production. We do not expect that this planned increase in industry capacity will adversely impact Buckeye's specialty fibers business in the current fiscal year. However, it is possible that it could have an impact in the following fiscal year.

Although demand for fluff pulp is generally stable, fluff pulp prices tend to vary together with commodity paper pulp prices because fluff pulp is often produced in mills that also produce commodity paper pulp. Our strategy is to reduce our exposure to fluff pulp by increasing our sales of more specialized wood cellulose into new and existing markets. We also used approximately 47,000 metric tons of fluff pulp from our Foley plant during this fiscal year as a key raw material in our airlaid nonwovens operations. We currently produce less than 7% of the world's supply of fluff pulp. Major competitors include Bowater, International Paper, GP Cellulose, Rayonier and Weyerhaeuser. We understand International Paper is converting one of its mills to begin producing fluff pulp in September 2007 and GP Cellulose announced it is adding capacity at its Brunswick mill, both of which will create additional fluff pulp capacity. The potential added capacity from these two mills is approximately 10% of current industry capacity.

Demand for airlaid nonwovens grew significantly in the 1990's. Since then, significant capacity expansion in 2001, primarily in North America, resulted in the market being oversupplied. Buckeye is the leading supplier of airlaid nonwoven materials worldwide. The markets we compete in also utilize nonwovens materials produced with technologies other than airlaid such as spunlace. Major nonwovens competitors include Ahlstrom, Fiberweb, Concert Industries, Duni, Koch Industries, Kimberly Clark and PGI.

There is limited availability of airlaid nonwoven capacity in Europe, while the North American industry is operating in an environment of excess supply. We understand that Fiberweb is in the process of starting up a new airlaid nonwovens plant in Italy with an annual capacity of approximately 10,000 metric tons per year.

Intellectual Property

At June 30, 2007 and 2006, we had intellectual property assets recorded totaling \$18.0 million and \$25.2 million, respectively. These amounts include patents (including application and defense costs), licenses, trademarks, and tradenames, the majority of which were obtained in the acquisition of airlaid nonwovens businesses and Stac-Pac® technology. We intend to protect our patents and file applications for any future inventions that are deemed to be important to our business operations. The Stac-Pac® packaging technology, a proprietary system for packaging low-density nonwoven materials in compressed cube-shaped bales, is an example of technology we acquired to further differentiate us from our airlaid nonwovens competitors. Stac-Pac® bales facilitate our customers' high-speed production lines with a continuous flow of material. Stac-Pac® units also reduce freight costs by compressing more material in a bale than can be shipped in a traditional roll form, which enables us to ship the bales more effectively in trucks and containers. Additional information is included in Note 1, Accounting Policies, to our Consolidated Financial Statements.

Inflation

We believe that inflation has not had a material effect on our results of operations or on our financial condition during recent periods.

Seasonality

Our business generally is not seasonal to a substantial extent, although we ship somewhat lower specialty fiber volume in the July – September quarter and somewhat lower nonwovens volume is shipped in the October – December quarter.

Employees

As of September 1, 2007, we employed approximately 1,550 employees, of whom approximately 1,100 are employed at our facilities in the United States. Approximately 55% of the U.S. employees are represented by unions at two plants in Perry, Florida and Memphis, Tennessee. Our Foley Plant's labor agreement expires on March 31, 2008 and we will be entering negotiations for a new agreement in the next few months. The agreement for the Memphis Plant is in effect through March 18, 2009. The union at our Canadian facility ratified a new labor agreement effective through June 30, 2009. A national union provides employee representation for non-management workers at our specialty fibers plant in Americana, Brazil.

A works council provides employee representation for non-management workers at our nonwoven materials plant in Steinfurt, Germany.

Our plants in Gaston, King and Lumberton, North Carolina are not unionized.

None of our facilities has had labor disputes or work stoppages in recent history. The Foley and Memphis Plants have not experienced any work stoppages due to labor disputes in over 30 years and 50 years, respectively. We consider our relationships with our employees and their representative organizations to be good. An extended interruption of operations at any of our facilities could have a material adverse effect on our business.

Environmental Regulations and Liabilities

Our operations are subject to extensive general and industry-specific federal, state, local and foreign environmental laws and regulations. We devote significant resources to maintaining compliance with these laws and regulations. We expect that, due to the nature of our operations, we will be subject to increasingly stringent environmental requirements (including standards applicable to wastewater discharges and air emissions) and will continue to incur substantial costs to comply with such requirements. Our failure to comply with environmental laws or regulations could subject us to penalties or other sanctions which could materially affect our business, results of operations or financial condition. Additional information is included in Note 17, Contingencies, to the Consolidated Financial Statements.

Other Information

Our website is www.bkitech.com. We make available, free of charge, through our website under the heading "Investor Relations," annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and any amendments to those filed or furnished, pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934. The information on our website is not part of or incorporated by reference in this Annual Report on Form 10-K.

These reports are also available as soon as reasonably practicable after we electronically file such materials with, or furnish such materials to, the Securities and Exchange Commission, or the SEC. The public may also read and copy

any materials we file with the SEC at the SEC's Public Reference Room at Station Place, 100 F Street NE, Washington, D.C. 20549. The public may obtain information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet site that contains reports, proxy and information statements and other information filed electronically by us, which are available at <http://www.sec.gov>.

Safe Harbor Provisions

This document contains both historical and forward-looking statements. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements within the meaning of section 27A of the Securities Act of 1933, as amended, and section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are not based on historical facts, but rather reflect management's current expectations concerning future results and events.

These forward-looking statements generally can be identified by the use of statements that include phrases such as "believe," "expect," "anticipate," "intend," "plan," "foresee," "likely," "will" or other similar words or phrases. Similarly, statements that describe management's objectives, plans or goals are or may be forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties and other factors that are difficult to predict and which may cause the actual results, performance or achievements to be different from any future results, performance and achievements expressed or implied by these statements.

The following important factors, among others, could affect future results, causing these results to differ materially from those expressed in our forward-looking statements: dependence on a single customer; the ability to obtain additional capital, maintain adequate cash flow to service debt as well as meet operating needs; maintaining satisfactory labor relations; an inability to predict the scope of future environmental compliance costs or liabilities; pricing fluctuations and worldwide economic conditions; competition; and fluctuations in the costs and availability of raw materials.

The forward-looking statements included in this document are only made as of the date of this document and we do not have any obligation to publicly update any forward-looking statements to reflect subsequent events or circumstances.

Item 1a. Risk Factors

In addition to the risks and uncertainties discussed elsewhere in this Annual Report on Form 10-K (particularly in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations), the following are some important factors that could materially impact our results of operations and financial condition.

Risks related to our business

If our significant customer changes its purchasing habits, our business could be adversely impacted.

Procter & Gamble is our largest single customer. We supply Procter & Gamble with fluff pulp and airlaid nonwovens, and sales to Procter & Gamble accounted for approximately 12% of our sales in fiscal year 2007. In the event that Procter & Gamble fails to continue to purchase these products from us in substantial volume, our results of operations and financial condition could be materially and adversely affected, particularly if we are unable to attract new customers.

Our substantial indebtedness could adversely affect our financial health.

As of June 30, 2007, our total debt was approximately \$446 million and our total debt, as a percentage of total capitalization, was 56%. Our level of debt could have a significant adverse future effect on our business. For example:

- we may have limited ability to borrow additional amounts for working capital, capital expenditures, acquisitions, debt service requirements, execution of our growth strategy, research and development costs or other purposes;
- a substantial portion of our cash flow may be used to pay principal and interest on our debt, which will reduce the funds available for working capital, capital expenditures, acquisitions and other purposes;
- our senior secured credit facility covenants require us to meet certain financial objectives and impose other restrictions on business operations. These covenants and those contained in the indentures governing our senior and senior subordinated notes limit our ability to borrow additional funds or dispose of assets and limit our flexibility in planning for and reacting to changes in our business;
- we may be more vulnerable to adverse changes in general economic, industry and competitive conditions and adverse changes in government regulation;
- our debt level and the various covenants contained in the indentures related to our senior notes, senior subordinated notes and the documents governing our other existing indebtedness may place us at a relative competitive disadvantage as compared to certain of our competitors; and

- our borrowings under our senior secured credit facility are at floating rates of interest, which could result in higher interest expense in the event of an increase in interest rates.

Our ability to pay principal of and interest on our senior notes and senior subordinated notes, to service our other debt and to refinance indebtedness when necessary depends on our financial and operating performance, each of which is subject to prevailing economic conditions and to financial, business and other factors beyond our control.

We cannot assure you that we will generate sufficient cash flow from operations or that we will be able to obtain sufficient funding to satisfy all of our obligations. If we are unable to pay our debts, we will be required to pursue one or more alternative strategies, such as selling assets, refinancing or restructuring our indebtedness or selling additional equity capital. However, we cannot assure you that any alternative strategies will be feasible at the time or prove adequate. Also, certain alternative strategies will require the consent of our senior secured lenders before we engage in any such strategy.

8

Our failure to maintain satisfactory labor relations could have a material adverse effect on our business.

If our negotiations with the representatives of the unions, to which many of our employees belong, are not successful, our operations could be subject to interruptions at many of our facilities. As of September 1, 2007, we employed approximately 1,550 employees, of whom approximately 1,100 are employed at our facilities in the United States. Approximately 55% of the U.S. employees are represented by unions at two plants in Perry, Florida and Memphis, Tennessee. Our Foley Plant's labor agreement expires on March 31, 2008. The agreement for the Memphis Plant is in effect through March 18, 2009. The union at our Canadian facility ratified a new labor agreement effective through June 30, 2009.

Employee representation is provided by a national union for non-management workers at our specialty fibers plant in Americana, Brazil, and our nonwoven materials plant in Steinfurt, Germany. Our plants in Gaston, Lumberton and King, North Carolina are not unionized.

None of our facilities has had labor disputes or work stoppages in recent history. The Foley and Memphis Plants have not experienced any work stoppages due to labor disputes in over 30 years and 50 years, respectively. We consider our relationships with our employees and their representative organizations to be good. An extended interruption of operations at any of our facilities could have a material adverse effect on our business.

Problems regarding the negotiation of any labor contracts could also affect our business. The failure to renegotiate labor agreements in a timely manner could lead to a curtailment or stoppage of work at our factories. If we negotiated a labor agreement on unfavorable terms, our production costs will increase. A reduction in production or increasing the costs of production would lower our profits and harm our business.

Compliance with extensive general and industry specific environmental laws and regulations requires significant resources, and the significant associated costs may adversely impact our business.

Our operations are subject to extensive general and industry specific federal, state, local and foreign environmental laws and regulations. We devote significant resources to maintaining compliance with these laws and regulations. We expect that, due to the nature of our operations, we will be subject to increasingly stringent environmental requirements (including standards applicable to wastewater discharges and air emissions) and will continue to incur substantial costs to comply with these requirements. Because it is difficult to predict the scope of future requirements, there can be no assurance that we will not incur material environmental compliance costs or liabilities in the future.

The Foley Plant, located in Perry, Florida, discharges treated wastewater into the Fenholloway River. Under the terms of an agreement with the Florida Department of Environmental Protection ("FDEP"), approved by the U. S. Environmental Protection Agency (the "EPA") in 1995, we agreed to a comprehensive plan to attain Class III ("fishable/swimmable") status for the Fenholloway River under applicable Florida law (the "Fenholloway Agreement"). The Fenholloway Agreement requires us, among other things, to (i) make process changes within the Foley Plant to reduce the coloration of its wastewater discharge, (ii) restore certain wetlands areas, (iii) relocate the wastewater discharge point into the Fenholloway River to a point closer to the mouth of the river, and (iv) provide oxygen enrichment to the treated wastewater prior to discharge at the new location. We have completed the process changes within the Foley Plant as required by the Fenholloway Agreement. In making these in-plant process changes, we incurred significant expenditures, and, we expect to incur significant additional capital expenditures to comply with the remaining obligations under the Fenholloway Agreement.

Based on the requirements of the proposed permit, we expect to incur capital expenditures of approximately \$10 million over the next four years (beginning fiscal year 2008) on in-plant process changes, and additional capital expenditures of approximately \$50 million over at least five years, possibly beginning as early as fiscal year

2012. The amount and timing of these capital expenditures may vary depending on a number of factors. For additional information on environmental matters, see Note 17 to the Consolidated Financial Statements. These possible expenditures could have a material adverse effect on our business, results of operations or financial condition.

Because approximately 67% of our sales are to customers outside the United States, we are subject to the economic and political conditions of foreign nations.

We have manufacturing facilities in four countries and sell products in approximately 60 countries. For the fiscal year ended June 30, 2007, sales of our products outside the United States represented approximately 67% of our sales. The global economy and relative strength or weakness of the U. S. dollar can have a significant impact on our sales. In addition, although approximately 82% of our sales are denominated in U.S. dollars, it is possible that as we expand globally, we will face increased risks associated with operating in foreign countries, including:

- the risk that foreign currencies will be devalued or that currency exchange rates will fluctuate;
- the risk that limitations will be imposed on our ability to convert foreign currencies into U.S. dollars or on our foreign subsidiaries' ability to remit dividends and other payments to the United States;

- the risk that our foreign subsidiaries will be required to pay withholding or other taxes on remittances and other payments to the United States or that the amount of any such taxes will be increased;
- the risk that certain foreign countries may experience hyperinflation;

and

- the risk that foreign governments may impose or increase investment or other restrictions affecting our business.

Any of these risks could have a material adverse effect on our business, results of operations or financial condition.

Exposure to commodity products creates volatility in pricing and profits.

If our research and development efforts do not result in the commercialization of new, proprietary products, we will continue to have significant exposure to fluff pulp, which could result in volatility in sales prices and profits.

Risks related to our industry

We are subject to the cyclical nature of our industry.

The demand and pricing of our products, particularly fluff pulp, are influenced by the much larger market for papermaking pulps which is highly cyclical. The markets for most cellulose and absorbent products are sensitive to both changes in general global economic conditions and to changes in industry capacity. Both of these factors are beyond our control. The price of these products can fluctuate significantly when supply and demand become imbalanced for any reason. Our financial performance can be heavily influenced by these pricing fluctuations and the general cyclical nature of the industries in which we compete. Furthermore, a general economic downturn in a particular country or on an international scale, could reduce the overall sales within our industry, thereby likely reducing our sales. We cannot assure you that current prices will be maintained, that any price increases will be achieved, or that industry capacity utilization will reach favorable levels. The demand, cost and prices for our products may fluctuate substantially in the future and downturns in market conditions could have a material adverse effect on our business, results of operations and financial condition.

Competition and surplus capacity could adversely affect our operating results and financial condition.

The markets for our products are all competitive. Actions by competitors can affect our ability to sell our products and can affect the volatility of the prices at which our products are sold. Other actions by competitors, such as reducing costs or adding low-cost capacity, may adversely affect our competitive position in the products we manufacture and, consequently, our sales, operating income and cash flows. New competitors and the expansion of existing competitors could create a surplus capacity of the goods that we sell, which might cause us to either lose sales or lower the prices of our goods. As examples of existing competitors expanding their production, Sateri has announced that it will add 250,000 tons of specialty pulp capacity in Brazil and Weyerhaeuser could reopen a mill with an annual capacity of 155,000 metric tons. Actions by our competitors and any surplus capacity could cause our profits to decline, affecting our operating results and financial condition.

Market fluctuations in the availability and cost of energy and raw materials are beyond our control and may adversely impact our business.

Energy, chemicals, and raw material costs, including fuel oil, natural gas, electricity, cotton linters, wood, and caustic and other chemicals are a significant operating expense. The prices and availability of raw materials and energy can be volatile and are susceptible to rapid and substantial changes due to factors beyond our control such as changing economic conditions, currency fluctuations, weather conditions, political unrest and instability in energy-producing nations, and supply and demand considerations. We have raw material availability issues in our specialty cotton fibers business in both North America and Brazil. We have increased our imported cotton linters purchases for our Memphis specialty cotton fiber production in order to minimize the impact of current constraints on North American cotton fiber availability. We have limited production at our Americana, Brazil specialty fibers facility because of raw material constraints in Brazil. For the near term, this raw material availability will limit growth and increase our production costs. Additionally, energy and chemical costs have increased substantially in recent years, which has resulted in increased production costs for our products. Increases in production costs could have a material adverse effect on our business, financial condition and results of operations. In addition to increased costs, it is possible that a disruption in supply of natural gas or other fossil fuels could limit our ability to operate our facilities.

Market fluctuations in the availability and cost of transportation are beyond our control and may adversely impact our business.

Our business depends on the transportation of a large number of products, both domestically and internationally. An increase in transportation rates or fuel surcharges and/or a reduction in transport availability in truck, rail and international shipping could negatively impact our ability to provide products to our customers in a timely manner. An increase in international shipping rates or fuel surcharges or a reduction in the availability of vessels could negatively impact our costs and our ability to provide products to our international customers in a timely manner. While we have had adequate transportation availability, there is no assurance that such availability can continue to be effectively managed in the future.

Item 1b. Unresolved Staff Comments

None.

Item 2. Properties

Corporate Headquarters. Our corporate headquarters, research and development laboratories, and pilot plants are located in Memphis, Tennessee.

Specialty Fiber Plants

Memphis Plant. The Memphis Plant is located on approximately 75 acres adjacent to the headquarters complex and has a capacity of approximately 100,000 annual metric tons of cotton cellulose. As of June 30, 2007, the Memphis Plant operated at approximately 80% of its capacity.

Foley Plant. The Foley Plant is located at Perry, Florida, on a 2,900 acre site and has a capacity of approximately 465,000 annual metric tons of wood cellulose. In connection with the acquisition of the Foley Plant, we also own 13,000 acres of real property near the plant site. As of June 30, 2007, the Foley Plant operated at 100% of its capacity.

Lumberton Plant. The Lumberton Plant is located in Lumberton, North Carolina on a 65-acre site and has a capacity of approximately 8,000 annual metric tons of cosmetic cotton fiber. As of June 30, 2007, the Lumberton Plant operated at approximately 90% of its capacity.

Americana Plant. The Americana Plant is located in the city of Americana in the state of Sao Paulo, Brazil on 27 acres and is part of a multi-business industrial site with a capacity of approximately 40,000 annual metric tons of cotton cellulose. As of June 30, 2007, the Americana Plant operated at approximately 60% of its capacity.

Nonwovens Plants

The stated capacity of airlaid nonwovens machines is based upon an assumed mix of products. The flexible nature of the airlaid technology allows for a wide range of materials to be produced. Machine production capability has typically been lower than the stated capacity, often by factors of 10-20%, when adjusted to reflect the actual product mix. Based on current product mix, utilization of our airlaid machines worldwide, as of June 30, 2007, was operating at approximately 80% of capacity.

Delta Plant. The Delta Plant is located in Delta, British Columbia on a 12-acre industrial park site and has a total capacity of approximately 30,000 annual metric tons of airlaid nonwovens (26,000 based on current production mix) from two production lines.

Steinfurt Plant. The Steinfurt Plant is located in Steinfurt, Germany on an 18-acre site and has a total capacity of approximately 30,000 annual metric tons of airlaid nonwovens from two production lines.

Gaston Plant. The Gaston Plant is located in Gaston County near Mt. Holly, North Carolina on an 80-acre site and has a total capacity of approximately 60,000 annual metric tons of airlaid nonwovens (43,000 annual metric tons based on current production mix) from two production lines.

King Plant. The King Plant is located in King, North Carolina and converts airlaid materials and wetlaid papers into wipes, towels and tissues for industrial and commercial uses.

We own our corporate headquarters, the Memphis Plant, the Foley Plant, the Lumberton Plant, the Gaston Plant, the Delta, Canada Plant, the Steinfurt, Germany Plant and the Americana, Brazil Plant. We lease buildings that house the King, North Carolina Plant, the sales offices in Europe and distribution facilities in Savannah, Georgia. All of the facilities located in the United States are pledged as collateral for certain debt agreements.

We believe that our specialty fibers and nonwoven materials manufacturing facilities and administrative buildings are adequate to meet current operating demands.

Item 3. Legal Proceedings

We are involved in certain legal actions and claims arising in the ordinary course of business. We believe that such litigation and claims will be resolved without material adverse effect on our financial position or results of operation.

Item 4. Submission of Matters to a Vote of Security Holders

None

PART II**Item 5. Market for the Registrant's Common Stock and Related Security Holder Matters**

Buckeye Technologies Inc.'s common stock is traded on the New York Stock Exchange under the symbol BKI. There were approximately 4,000 shareholders on September 1, 2007, based on the number of record holders of our common stock and an estimate of the number of individual participants represented by security position listings. The table below sets forth the high and low sales prices for our common stock.

	Year Ended June 30			
	2007		2006	
	High	Low	High	Low
First quarter (ended September 30)	\$ 9.00	\$ 6.84	\$ 10.08	\$ 7.75
Second quarter (ended December 31)	12.72	8.33	8.33	7.18
Third quarter (ended March 31)	14.00	11.16	10.27	7.89
Fourth quarter (ended June 30)	16.25	11.75	9.10	6.97

We did not make any dividend payments during the fiscal years ended June 30, 2007 or 2006, and have no plans to pay dividends in the foreseeable future. We repurchased no shares of our common stock during the fiscal years ended June 30, 2007 or 2006. Due to certain debt agreements we are limited in our ability to make dividend distributions and share repurchases in the future. The amount available will depend on our financial results and ability to comply with certain conditions under our most restrictive debt agreements at the time of distribution or repurchase.

Performance Graph

The line graph below compare the cumulative total stockholder return on our common stock with the cumulative total return of the Standard & Poor's 500 Index and the New York Stock Exchange (NYSE) Paper & Allied Products peer group for the five fiscal years ended June 30, 2007. The graph and table assume that \$100 was invested on June 30, 2002 in each of our common stock, the Standard & Poor's index and the NYSE Paper & Allied Products peer group, and that all dividends were reinvested.

	2002	2003	2004	2005	2006	2007
Buckeye Technologies Inc.	100.00	69.39	117.35	81.33	77.96	157.86
S&P 500	100.00	100.25	119.41	126.96	137.92	166.32
NYSE Paper & Allied Products - SIC Codes 2600-2699 (U.S. & Foreign Cos.)	100.00	84.62	108.78	96.09	101.45	124.14

Item 6. Selected Financial Data**Selected Financial Data**

In thousands, except per share data

	Year Ended June 30				
	2007(a)	2006(b)	2005(c)	2004 (d)	2003 (e)
Operating Data:					
Net sales	\$ 769,321	\$ 728,485	\$ 712,782	\$ 656,913	\$ 641,082
Operating income (loss)	81,211	44,420	57,601	(19,079)	4,496
Cumulative effect of changes in accounting, net of tax	-	-	-	5,720	-
Net income (loss)	30,118	1,980	20,204	(38,190)	(24,894)
Basic earnings (loss) per share	\$ 0.80	\$ 0.05	\$ 0.54	\$ (1.03)	\$ (0.67)
Diluted earnings (loss) per share	\$ 0.79	\$ 0.05	\$ 0.54	\$ (1.03)	\$ (0.67)

Diluted	\$ 0.79	\$ 0.05	\$ 0.54	\$ (1.18)	\$ (0.64)
Balance sheet data:					
Total assets	\$ 951,822	\$ 948,213	\$ 949,737	\$ 970,823	\$ 1,097,855
Total long-term debt (including current portion)	\$ 445,893	\$ 522,090	\$ 538,982	\$ 606,748	\$ 664,475
Ratio of earnings to fixed charges (g)	2.1x	\$ (497)	1.4x	\$ (69,522)	\$ (41,439)

(a) Includes a pretax benefit of \$2,000 (\$1,274 after tax) from a water conservation partnership payment. Includes \$1,867 (\$1,171 after tax) from reversal of accrued interest related to cancellation of a contingent note. Includes a \$2,481 tax benefit from adjustments related to state valuation allowances and credits. Includes a pretax charge of \$1,249 (\$812 after tax) for restructuring costs and \$832 (\$521 after tax) for early extinguishment of debt.

(b) Includes a pretax charge of \$5,616 (\$3,497 after tax) for restructuring and impairment costs. (See Note 3, Impairment of Long-lived Assets and Assets Held for Sale.)

(c) Includes a pretax charge of \$16,905 (\$9,392 after tax) for restructuring and impairment costs. (See Note 3, Impairment of Long-lived Assets and Assets Held for Sale). Includes a pretax charge of \$242 (\$153 after tax) for loss on early extinguishment of debt. Includes a pretax gain of \$7,203 (\$4,682 after tax) for gain on sale of assets held for sale. During fiscal 2005, the IRS completed an audit of our tax return for fiscal year 2002. With the conclusion of this audit, we released the reserve on a tax deduction we claimed relating to

our investment in our former facility in Cork, Ireland and recorded a non-cash tax benefit of \$5,481 to our provision for income taxes.

- (d) Includes a pretax charge of \$51,853 (\$33,522 after tax) for restructuring and impairment costs. Includes \$4,940 (\$3,112 after tax) for loss on early extinguishment of debt. Includes \$5,720 (\$0.15 per share), net of tax, cumulative effect of change in accounting relating to a change in the way we account for planned maintenance activities at our Perry, Florida facility.
- (e) Includes a pretax charge of \$38,139 (\$24,678 after tax) for restructuring and impairment costs.
- (f) Pro forma amounts reflect net income (loss) and earnings (loss) per share as if the changes in accounting methods were applied retroactively.
- (g) Earnings were inadequate to cover fixed charges during fiscal years 2006, 2004, and 2003. Amounts reflect the deficit of earnings to fixed charges. See Exhibit 12.1 for computation.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Results of Operations and Financial Condition ("MD&A") summarizes the significant factors affecting our results of operations, liquidity, capital resources and contractual obligations, as well as discussing our critical accounting policies. This discussion should be read in conjunction with the Consolidated Financial Statements, Notes to the Consolidated Financial Statements, and other sections of this Annual Report on Form 10-K. Our MD&A is composed of four major sections; Executive Summary, Results of Operations, Financial Condition and Critical Accounting Policies.

Executive Summary

Buckeye manufactures and distributes value-added cellulose-based specialty products used in numerous applications, including disposable diapers, personal hygiene products, engine, air and oil filters, concrete reinforcing fibers, food casings, cigarette filters, rayon filaments, acetate plastics, thickeners and papers. Our products are produced in the United States, Canada, Germany and Brazil, and we sell these products in approximately 60 countries worldwide. We generate revenues, operating income and cash flows from two reporting segments: specialty fibers and nonwoven materials. Specialty fibers are derived from wood and cotton cellulose materials using wetlaid technologies. Our nonwoven materials are derived from wood pulps, synthetic fibers and other materials using an airlaid process.

Our strategy is to continue to strengthen our position as a leading supplier of cellulose-based specialty products. We believe that we can continue to expand market share, improve profitability and decrease our exposure to cyclical downturns by pursuing the following strategic objectives: focus on technically demanding niche markets, develop and commercialize innovative proprietary products, strengthen long-term alliances with customers, provide our products at an attractive value, evaluate external growth opportunities that match our specialty market focus, and continue to improve our balance sheet.

Buckeye had an excellent year, with record revenue and the highest earnings in six years. Net sales for fiscal year 2007 were \$769.3 million, a 5.6% increase over the \$728.5 million achieved in fiscal year 2006. We earned net income of \$30.1 million for fiscal year 2007. These results included the following after-tax items: a \$1.3 million benefit from a water conservation partnership payment, a \$1.2 million benefit from reversal of accrued interest related to cancellation of a contingent note owed to Stac-Pac Technologies Inc., a \$2.5 million tax benefit from adjustments related to state valuation allowances and credits, a \$(0.8) million restructuring charge and a \$(0.5) million charge related to early debt retirement.

Our markets continue to be robust. Reliability of our operations is generally good, and we will continue to focus on operations stability and high up-time. Earnings benefited from higher selling prices across all of our businesses. The fluff pulp market remains strong and prices for fluff pulp continued to increase throughout the year. Price increases in high-end specialty fibers and nonwoven materials accounted for two-thirds of the overall selling price increase. We were able to make up for some of the margin erosion experienced over the past several years due to higher energy, chemicals and transportation costs through annual increases in the mid-single digit range for high-end specialty fibers and in the low single digit range for nonwoven materials. Our costs were lower in fiscal 2007 than in the prior year due to lower energy costs, improved capacity utilization at our North American airlaid plants and improvements in our Americana operation, which were partially offset by higher raw material costs in our cotton cellulose and nonwovens materials businesses, increased transportation costs and higher direct costs. As a result of higher selling prices, improved mix and lower costs, our gross margin for the year improved to 17.1% compared to 13.7% for the prior year. Our margins in the just completed quarter were above 20%.

We continue to make progress at our Americana cotton fiber facility in Brazil. Our focus on reliability and efficiency is starting to pay off as our Americana team gains experience operating the new process. We have and expect to continue to reduce costs and increase prices to offset the rising strength of the Brazilian real against the US dollar, and

we are making good progress toward being cash neutral. We expect our performance to continue to improve but we cannot predict when the site will be profitable due to constraints on raw material availability and price.

We continue to establish our global sales and distribution network for UltraFiber 500™, our concrete-reinforcing fiber. UltraFiber 500™ is a niche product for the building industry and is an example of the new product initiatives we are undertaking to reduce our dependency on fluff pulp. For the year ended June 30, 2007, our sales increased by 62% to \$5.5 million from \$3.4 million for the same period in 2006. Our customer base has almost doubled and installations of our dispensers, that provide ready mix operators with significant savings through automation, increased from 100 to 230 units, positioning us for a year of strong sales growth in fiscal 2008. Our goal is to double UltraFiber 500™ fiscal year 2007 sales in 2008.

Strong cash flow generation enabled us to reduce debt by \$75.6 million, including the cancellation of the \$5.0 million Stac-Pac Note, during the year ended June 30, 2007. As a result, our net interest expense for the year was down \$4.4 million (including \$1.9 million reversal of accrued interest related to a contingent note) compared to the previous year. Cash generated from operations in the year just completed was \$111.4 million compared to \$58.7 million in fiscal 2006. We have reduced our long-term debt by approximately \$255 million over the past five years.

The entire organization is involved in Lean Enterprise learning and implementation. We are pleased with the progress we made this year with a significant reduction in working capital and progress in eliminating non-value added activities. We know this is a journey and we have just begun to create a culture that will improve the speed of our business processes, improve product and service quality and reduce cost. Our Lean Enterprise initiative is important and we must improve to stay competitive and avoid complacency. We trained over 60% of our organization, including all officers and site managers, in the basic elements of Lean Thinking during fiscal 2007.

Results of Operations

Consolidated results

The following table compares the components of consolidated operating income for the three fiscal years ended June 30, 2007.

(millions)	Year Ended June 30			\$ Change		Percent Change	
	2007	2006	2005	2007/ 2006	2006/ 2005	2007/ 2006	2006/ 2005
	Net sales	\$ 769.3	\$ 728.5	\$ 712.8	\$ 40.8	\$ 15.7	6 %
Cost of goods sold	637.5	628.7	592.7	8.8	36.0	1	6
Gross margin	131.8	99.8	120.1	32.0	(20.3)	32	(17)
Selling, research and administrative expenses	47.0	47.8	43.3	(0.8)	4.5	(1)	10
Amortization of intangibles and other	2.3	2.0	2.3	0.3	(0.3)	15	(13)
Impairment and restructuring costs	1.3	5.6	16.9	(4.3)	(11.3)	(77)	67
Operating income	\$ 81.2	\$ 44.4	\$ 57.6	\$ 36.8	\$ (13.2)	83 %	(23) %

Net sales were higher during the year ended June 30, 2007, primarily driven by higher selling prices across all segments of our business. The shift from tolling operations to market sales at our Americana specialty fibers facility contributed a positive mix impact. A positive currency impact, due to the strong euro, added to the improvement. Shipment volume was down for the year ended June 30, 2007, mainly due to the closure of our specialty fibers facility in Glueckstadt, Germany.

Net sales increased during fiscal year 2006 primarily due to improved pricing and mix on our products. Demand for high-end specialty fibers helped drive prices higher throughout the year. Higher shipment volumes and increased pricing drove sales of nonwoven materials higher during fiscal year 2006. Additionally, the implementation of the product price surcharge effective October 1, 2005 through March 31, 2006 had a positive impact on revenues. The product price surcharge improved revenues by \$4.7 million for fiscal year 2006.

The gross margin improvement from fiscal year 2006 to fiscal year 2007 was mainly a result of the higher selling prices discussed previously. We also had improved operational results at our Americana plant, lower energy costs, and improved capacity utilization at our North American nonwovens sites. These improvements more than offset increased raw material costs in our cotton fibers and nonwovens business, increased transportation cost and higher plant direct cost.

In fiscal year 2006 versus fiscal year 2005 cost of goods sold and gross margins were negatively impacted by high costs related to increases in the pricing of energy, chemicals and transportation. During fiscal year 2006, these costs were higher by approximately 28% versus fiscal 2005.

Selling, research and administrative expenses decreased slightly in the year ended June 30, 2007. As a percentage of net sales these costs were down from 6.6% in fiscal 2006 to 6.1% in fiscal 2007. The expense reduction was mainly a result of reduced headcount and lower spending on sales commissions.

Increases in selling, research and administrative expenses during fiscal 2006 had a negative impact on our operating margins. Expenses related to the establishment of an UltraFiber 500™ sales force and distribution network, the expensing of share-based payments and the expensing of previously capitalized patent costs contributed to increased costs.

During the second half of the year ended June 30, 2007, we entered into a restructuring program that complements our operations' consolidations and involves consolidation in our European sales offices, product and market development and corporate overhead. We expect the total cost of this program will be approximately \$1.3 million and that it will be completed during the first quarter of the 2008 fiscal year. As a result of this restructuring, 21 positions will be eliminated which we expect to provide annual savings of over \$2.0 million.

Further discussion of revenue, operating trends, impairment and restructuring costs can be found later in this MD&A. Additional information on the impairment and restructuring programs and charges may also be found in Note 3, Impairment of Long-lived Assets and Assets Held for Sale, and Note 4, Restructuring Costs, to the Consolidated Financial Statements of the accompanying consolidated financial statements.

Segment results

Although nonwoven materials, processes, customers, distribution methods and regulatory environment are very similar to specialty fibers, we believe it is appropriate for nonwoven materials to be disclosed as a separate reporting segment from specialty fibers. The specialty fibers segment is an aggregation of cellulosic fibers based on both wood and cotton. We make separate financial decisions and allocate resources based on the sales and operating income of each segment. We allocate selling, research, and administration expense to each segment, and we use the resulting operating income to measure the performance of the two segments. We exclude items that are not included in measuring business performance, such as restructuring costs, asset impairment, amortization of intangibles and certain financing and investing costs.

Specialty fibers

The following table compares specialty fibers net sales and operating income for the three years ended June 30, 2007.

<i>(millions)</i>	Year Ended June 30			\$ Change		Percent Change	
	2007	2006	2005	2007/ 2006	2006/ 2005	2007/ 2006	2006/ 2005
Net sales	\$ 543.8	\$ 515.9	\$ 513.6	\$ 27.9	\$ 2.3	5%	0%
Operating income	63.7	35.8	64.1	27.9	(28.3)	78	(44)

Specialty fibers net sales improved during the year ended June 30, 2007 versus the prior year, primarily driven by higher selling prices and improved product mix, offset partially by the closure of the Glueckstadt plant, which had a negative impact on sales volume.

Strong demand in our high-end specialty and fluff markets allowed us to raise prices during the year. Fluff pulp pricing increased by approximately \$55 per ton on the average during the year ended June 30, 2007 versus the previous year. Average selling prices on our high-end specialty products increased in the mid-single digit range for the year.

Sales pricing and improved product mix were the primary drivers of our operating income improvement. Costs were up compared to the prior year as the impact of lower energy costs was not enough to offset increases in transportation costs, raw material costs and factory direct costs.

We have made good progress at our Americana cotton fiber facility in Brazil. Reduced costs and higher volumes contributed to improved earnings. The focus on reliability and efficiency has been successful and the facility has demonstrated the ability to run at design rate and high reliability. The operation averaged 96 tons per day during the just completed quarter with many days at or above the design rate of 110 tons per day. We are confident that the facility has the capability of 40,000 tons annually. The process is delivering quality products with little offgrade.

The cotton crop in Brazil this year is up 40% from the prior year, but the amount of seed delinted and crushed for oil will not increase as much as we had hoped. We are strengthening relationships with existing raw material suppliers to increase delinting capacity and assisting with their expansion plans. This looks positive, but will take time to implement. In the near term, we will continue to operate the facility at its current rate of approximately 2,000 tons per month.

Although demand for our high-end specialty fibers products and the implementation of a product price surcharge pushed pricing higher during fiscal year 2006, the favorable earnings impact of higher prices was offset by lower volumes due to the closure of our Glueckstadt, Germany cotton specialty fibers facility, the start-up of market operations of our Americana, Brazil facility and production and transportation issues at our Perry, Florida facility.

Average fluff pulp pricing declined by less than 1% during fiscal year 2006 versus fiscal year 2005. For fiscal year 2006, fluff pulp sales accounted for 18% of our consolidated sales. Strong demand in our high-end markets allowed us to raise prices during fiscal year 2006 to partially offset higher costs for energy, chemicals and transportation. However, due to the rapid and continued increase in costs along with the slightly lower prices for fluff pulp, we were unable to maintain our margins at the same level as those realized during fiscal year 2005.

Nonwoven materials

The following table compares nonwoven materials net sales and operating income for the three years ended June 30, 2007.

(millions)	Year Ended June 30			\$ Change		Percent Change	
	2007	2006	2005	2007/ 2006	2006/ 2005	2007/ 2006	2006/ 2005
Net sales	\$ 258.8	\$ 240.9	\$ 226.5	\$ 17.9	\$ 14.4	7 %	6 %
Operating income	21.2	15.9	13.0	5.3	2.9	33	22

A strong market for Nonwoven materials in North America contributed to the increase in net sales during fiscal year 2007 versus fiscal year 2006. Increased demand resulted in higher sales volumes at increased selling prices. We implemented similar sales price increases in Europe during the year, and our sales volume remained stable. Additionally, net sales in Europe saw improvement due to the strengthening of the euro during this time period. Most products sold at our Steinfurt, Germany facility are denominated in euros and translated to US dollars for consolidation purposes.

Operating Income improvement during fiscal year 2007 versus fiscal year 2006 was driven by the increased volumes and selling prices. Increased volumes in North America and the associated improvements in capacity utilization helped to improve operating margins during the year. Higher revenues from increased selling prices largely offset increased raw material costs in North America and Europe.

Operating income improved during the twelve months ended June 30, 2006 versus the same period in 2005. Higher revenue from volume and increased pricing overcame higher raw materials, energy, transportation, and other manufacturing costs to improve operating margins during the period.

Restructuring and impairment activities

During the three years ended June 30, 2007, we entered into various restructuring programs, which resulted in restructuring and impairment charges. In order to continue to provide both specialty fibers and nonwoven materials at attractive values, we will continue to look for ways to reduce costs and optimize our operating structure. The following table summarizes restructuring expense by program and impairment charges for the three years ended June 30, 2007. Following the table is an explanation of the programs and the resulting impairment charges. For further explanation of these charges, see Note 3, Impairment of Long-lived Assets and Assets Held for Sale, and Note 4, Restructuring Costs, to the Consolidated Financial Statements.

<i>(millions)</i>	Year Ended June 30			Total
	2007	2006	2005	Charges
Impairment charges	\$ -	\$ 2.1	\$ 12.3	
Restructuring costs				
2007 Restructuring program	\$ 1.3	\$ -	\$ -	\$ 1.3
2005 Restructuring program	-	3.5	3.0	6.5
2004 Restructuring program	-	-	1.2	3.0
2003 Restructuring programs	-	-	0.4	6.2
Total restructuring costs	\$ 1.3	\$ 3.5	\$ 4.6	\$ 17.0

2007 Restructuring program

In January 2007, we entered into a restructuring program that complements our operations' consolidations and involves consolidation in our European sales offices, product and market development and corporate overhead operations. We anticipate the total cost of this program will be approximately \$1.3 million and will be completed during the first quarter of the 2008 fiscal year. As a result of this restructuring, 21 positions will be eliminated which will provide annual savings of over \$2.0 million.

2005 Restructuring program and impairments

In January 2005, we announced our decision to discontinue producing cotton linter pulp at our Glueckstadt facility. Our decision was due to a combination of factors that had increased the plant's costs to a level at which it was uneconomical to continue operations. The most significant factor impacting cost at the site was the substantial strengthening of the euro over calendar 2003 and 2004. Specialty fibers are normally priced and sold in U.S. dollars around the world. As a majority of Glueckstadt's costs were denominated in euros, this substantial strengthening had a negative impact on Glueckstadt's cost position. Additionally, Glueckstadt's process water, waste treatment and energy costs were more than twice the cost of these utilities at our Memphis, Tennessee cotton-based specialty fibers facility.

Faced with these difficulties, we reduced the number of employees at the facility from approximately 150 to approximately 100 and operated at 55% of capacity during calendar year 2004. After careful consideration, we

decided to close and cease production at Glueckstadt in December 2005. We believe that the closure of our Glueckstadt facility and transfer of the majority of its cotton-based specialty fiber production to our Memphis, Tennessee and Americana, Brazil facilities will yield a more competitive cost structure.

Based on our inability to recover the remaining value of the long-lived assets at the Glueckstadt facility, we determined that these long-lived assets, with a carrying amount of \$15.3 million, were impaired and wrote them down to their estimated fair value of \$3.0 million. This resulted in an impairment charge of \$12.3 million (\$6.5 million after tax), during fiscal year 2005.

During fiscal year 2006, we began to actively market the land and buildings, and the equipment which had carrying values of \$1.6 million and \$0.5 million, respectively. Current markets and third party interest for the land and buildings indicated we would not be able to recover the carrying value through the sales process. Therefore, we wrote down the carrying value of the land and buildings to their fair value less costs to sell of \$0.1 million and recorded an additional impairment charge of \$1.5 million during fiscal year 2006. Subsequent to this impairment, we sold the land and building for \$0.1 million.

As of June 30, 2006, management reevaluated its estimate of fair value less the cost to sell the remaining equipment and determined an additional impairment should be recognized for equipment with a carrying value of \$0.3 million. Therefore, we wrote down the carrying value of the remaining equipment to its fair value less costs to sell of \$0.2 million and recorded an impairment charge of \$0.1 million. In September 2006, the remaining assets were sold for \$0.5 million. Since we previously had written the value of these assets down to \$0.2 million, we recorded a gain on sales of assets held for sale of \$0.3 million. The closure of the Glueckstadt facility resulted in the termination of 103 employees, and restructuring expenses related to the closure of \$6.5 million over fiscal year 2005 and 2006.

2004 Restructuring program and impairments

During fiscal 2004, we initiated the discontinuation of production of nonwoven materials at our Cork, Ireland facility. Subsequent to the closure of this facility, we completed the sale of our related building and equipment. As a result of the sale and disposition of the building and equipment for net proceeds of \$13.1 million (net of \$1.9 million of decommissioning and selling costs), we recognized a net gain of \$7.2 million (\$4.7 million net of tax and \$0.12 per share net of tax) during fiscal 2005. The gain is presented under the "Gain on sale of assets held for sale" caption in the statement of operations.

We continued to meet customer needs for nonwoven materials by producing these products at our facilities in Delta, British Columbia, Canada; Steinfurt, Germany; and Gaston County, North Carolina. This consolidation reduced working capital needs, and we began to realize fully the on-going cost benefit from operating one less facility during the third quarter of fiscal 2005. The closure of the Cork facility and related reorganization of the nonwoven materials segment resulted in the termination of 89 employees and resulted in restructuring expenses totaling \$3.0 million.

2003 Restructuring programs and impairments

In April 2003, we announced the discontinuation of production of cotton linter pulp at our specialty fibers Lumberton, North Carolina facility due to the decline in demand for cotton content paper, eliminating approximately 100 positions. We completed this partial closure in August 2003 but continue to produce cosmetic cotton products at the Lumberton site. During the first quarter of fiscal 2004, we entered into a second phase of this restructuring program. As a result of this restructuring, 78 positions were eliminated. These positions include manufacturing, sales, product development and administrative functions throughout the organization. The total cost of the 2003 programs was \$6.2 million, of which \$0.4 was expensed in fiscal 2005.

During fiscal year 2006, we began to actively market idled cotton linter pulping equipment which had a carrying value of \$1.5 million. Management evaluated its estimate of fair value less the cost to sell the assets and determined an impairment should be recognized for the equipment. We wrote down the carrying value of the equipment to its fair value less costs to sell of \$1.0 million and recorded an impairment charge of \$0.5 million during fiscal year 2006. Subsequent to this impairment, we sold the equipment for net proceeds of \$1.0 million.

Interest expense and amortization of debt costs

Interest expense and amortization of debt costs decreased \$4.7 million for fiscal year 2007 versus fiscal year 2006. This decrease includes the reversal of \$1.9 million of accrued interest related to the cancellation of a contingent note owed to Stac-Pac Technologies Inc. The remaining decrease was primarily due to lower debt levels. The decrease would have been larger, but capitalized interest related to the Americana project reduced last year's interest expense by \$1.3 million that was not replicated in fiscal 2007. The weighted average effective interest rate on our variable rate debt increased from 7.2% at June 30, 2006 to 7.3% at June 30, 2007. See Note 8, Debt, in the Consolidated Financial Statements for further discussion of variable interest rates.

We incurred interest expense and amortization of debt costs of \$43.9 million in fiscal 2006, down \$1.3 million from fiscal 2005. This improvement was primarily the result of lower average debt levels during fiscal 2006 and the impact of the capitalized interest discussed previously. These improvements were partially offset by higher average variable interest rates during fiscal 2006.

Loss on early extinguishment of debt costs

Fiscal year 2007 – During fiscal year 2007 we used cash from operations to redeem \$5 million of our senior subordinated notes due in 2008 and to make voluntary prepayments on our term loan of \$60.8 million. As a result of these partial extinguishments, we wrote-off a portion of deferred financing costs, resulting in non-cash expense of \$0.8 million during fiscal year 2007.

Fiscal year 2006 - On September 26, 2005 we used borrowings on our revolving credit facility to redeem \$15 million of our senior subordinated notes due in 2008. As a result of this partial extinguishment, we wrote-off a portion of deferred financing costs, resulting in non-cash expense of \$0.2 million during fiscal year 2006.

Fiscal year 2005 - On March 23, 2005 we used cash on hand to redeem \$20 million of our senior subordinated notes due in 2008. As a result of this partial extinguishment, we wrote-off a portion of deferred financing costs, resulting in non-cash expense of \$0.2 million during fiscal year 2005.

See Note 8, Debt, in the Consolidated Financial Statements for further discussion of the debt issuance and related extinguishment.

Gain on sale of assets held for sale

In September 2006, the remaining assets located at our Glueckstadt facility were sold for \$0.5 million. Since we had previously written the value of these assets down to \$0.2 million, we recorded a gain on sale of assets held for sale of \$0.3 million during fiscal 2007.

In July 2004, we ceased production of nonwoven materials at our Cork, Ireland facility. Subsequent to the July 2004 closure of the facility, we began to actively market the building and equipment with carrying values of \$4.5 million and \$1.5 million, respectively. In late December of 2004, we completed the sale of the Cork facility building to the Port of Cork Company for \$13.4 million. Although the carrying values of these assets were based on appraisals and available market information at the time of the impairment in March of 2004, the purchase of this building for strategic purposes by the Port of Cork Company was not contemplated in those appraisals. As a result of the sale and disposition of the building and equipment for net proceeds after decommissioning and other expenses of \$13.1 million, we recognized a net gain of \$7.2 million (\$4.7 million net of tax) during fiscal year 2005.

Foreign exchange and other

Foreign exchange and other in fiscal 2007, 2006 and 2005 were \$ 1.9 million, \$(0.4) million and \$(0.6)million, respectively. The income in fiscal 2007 was primarily due to \$2.0 million from a water conversation partnership payment received pursuant to our reduction in the daily water permit limit at the Foley plant. The expense in fiscal 2006 was primarily due to foreign currency losses as a result of the strengthening of the Canadian dollar during the fiscal year. The expense in fiscal 2005 was primarily due to \$0.5 million of expenses related to amending our senior secured credit facility and other financing related costs.

Income tax expense

Our effective tax rate for 2007 was approximately 31% versus (189%) in fiscal 2006 and (2%) in fiscal 2005.

This tax rate includes a tax benefit from reduction in the Tennessee state net operating loss valuation allowance and recognition of Tennessee industrial machinery credits totaling \$2.5 million during the fourth quarter of fiscal 2007 as a result of tax planning.

Our Brazilian valuation allowance increased \$2.5 million in 2007 due to losses associated with the slower than expected start-up of the Americana, Brazil operations.

Effective for transactions occurring after September 30, 2000 the Internal Revenue Service enacted the Extraterritorial Income Exclusion. The income exclusion provides for a reduction of gross income by a percentage of qualifying foreign trade income. In October 2004, the American Jobs Creation Act of 2004 (the Act) was signed into law. In order to comply with international trade rules, the Act repealed the current tax treatment for extraterritorial income. Effective for transactions entered into after December 31, 2004, the extraterritorial income exclusion is subject to a phase-out which was completed on December 31, 2006. For transactions during calendar years 2005 and 2006, the income exclusion was 80% and 60% of the exclusion otherwise allowed, respectively. Our extraterritorial income exclusion benefit was reduced in fiscal 2006 due to this phase-out and was phased-out completely during the second

half of fiscal 2007. The Act provides a tax deduction for domestic manufacturers. The deduction will be phased in during fiscal years 2006 through 2010. Due to our U.S. net operating loss position, this deduction had no impact to fiscal year 2007 other than a slight reduction to alternative minimum taxes. See Note 11, Income Taxes, in the Consolidated Financial Statements for further discussion of income taxes.

Effective June 22, 2006, many of the tax measures introduced in the 2006 Canadian Federal budget were passed into law. Included in the budget was a reduction in the general corporate tax rate to 20.5% for 2008, 20% for 2009, and 19% for 2010 and later years. As a result, the company remeasured its Canadian deferred tax balances based on the reversal pattern of the company's temporary differences, resulting in a \$0.8 million net tax benefit.

During the fourth quarter of fiscal 2005, the IRS completed an audit of our tax return for fiscal year 2002. With the conclusion of this audit, we released the reserve on a tax deduction we claimed relating to our investment in our former facility in Cork, Ireland and recorded a non-cash tax benefit of \$5.5 million to our provision for income taxes.

Financial Condition

Our financial condition continued to improve during fiscal year 2007. We are committed to reducing our debt, strengthening our operations and continuing to improve our profitability and cash flow.

Liquidity and capitalization

We have the following major sources of financing: a senior secured credit facility, senior notes and senior subordinated notes. Our senior secured credit facility, senior notes and senior subordinated notes contain various covenants. We were in compliance with these covenants as of June 30, 2007, and believe we will continue to remain in compliance for the foreseeable future. These sources of financing are described in detail in Note 8, Debt, to the Consolidated Financial Statements.

Our total debt and capital leases decreased \$76.2 million (including the cancellation of the \$5.0 million note owed to Stac-Pac Technologies Inc.) to \$445.9 million at June 30, 2007 from \$522.1 million at June 30, 2006. From June 30, 2005 to June 30, 2006, total debt decreased by \$16.9 million. Our total debt as a percentage of our total capitalization was 56.2% at June 30, 2007 as compared to 64.3% at June 30, 2006 and 66.7% at June 30, 2005.

On June 30, 2007, we had \$14.8 million of cash and cash equivalents and \$65 million borrowing capacity on our old credit facility.

On July 25, 2007, we established a new \$200 million senior secured revolving credit facility with a maturity date of July 25, 2012. This facility amends and restates our existing credit facility. Initially, we used the proceeds from this new credit facility to pay the outstanding balance on the former credit facility plus fees and expenses. The interest rate applicable to borrowings under the revolver is grid based pricing, related to our total leverage ratio, of the agent's prime rate plus 0.25% to 1.00% or a LIBOR-based rate ranging from LIBOR plus 1.25% to LIBOR plus 2.00%. We plan to use the proceeds from this facility to redeem the remaining \$60 million of our 2008 notes, to redeem \$20 million of the 2010 notes in mid-September 2007, and for general corporate purposes. The credit facility is secured by substantially all of our assets located in the United States.

The new credit facility contains covenants customary for financing of this type. The financial covenants include: maximum total leverage ratio of consolidated total debt to consolidated earnings before interest, taxes, depreciation and amortization ("EBITDA"), and minimum ratio of consolidated EBITDA to consolidated interest expense. During fiscal year 2007, we were in compliance with the financial covenants under our old credit facility.

The new credit facility (taking into account the \$33.6 million outstanding on the old term loan) increased borrowing capacity to \$161.4 million. The new credit facility also contains a \$50 million increase option. The portion of this capacity that we could borrow on a particular date will depend on our financial results and ability to comply with certain borrowing conditions under the new revolving credit facility. The commitment fee, on the unused portion of the new revolving credit facility, ranges from 0.25% to 0.40% per annum based on a grid related to our leverage ratio. Total costs for the issuance of the new facility were approximately \$1.3 million and will be amortized to interest expense using the effective interest method over the life of the facility.

Management believes this is sufficient liquidity to meet the needs of the business. We believe we will continue to have positive cash flow and these borrowing conditions are not expected to impact our operating or investing activities, or our ability to service our debt obligations.

Treasury stock

Our Board of Directors has authorized the repurchase of up to 6.0 million shares of our common stock. Under this authorization, we will hold the repurchased shares as treasury stock and such shares will be available for general corporate purposes, including the funding of employee benefit and stock-related plans. We have not repurchased any shares of our common stock since fiscal year 2001. Through June 30, 2007, we had repurchased a total of 5,009,300 shares under the current board authority.

Cash Flow

While we can offer no assurances, we believe that our cash flow from operations, together with current cash and cash equivalents, will be sufficient to fund necessary capital expenditures, meet operating expenses and service our debt obligations for the foreseeable future. Cash and cash equivalents totaled \$14.8 million at June 30, 2007, compared to \$8.7 million at June 30, 2006 and \$9.9 million at June 30, 2005. The following table provides a summary of cash flows for the three years ended June 30, 2007.

<i>(millions)</i>	2007	2006	2005
Operating activities:			
Net income	\$ 30.1	\$ 2.0	\$ 20.2
Noncash charges and credits, net	62.5	49.3	58.3
Changes in operating assets and liabilities, net	18.8	7.4	0.1
Net cash provided by operating activities	111.4	58.7	78.6
Investing activities:			
Purchases of property, plant and equipment	(45.2)	(45.6)	(45.3)
Proceeds from sales of assets	0.5	1.2	13.6
Other investing activities	(0.5)	(0.5)	(0.5)
Net cash used in investing activities	(45.2)	(44.9)	(32.2)
Financing activities:			
Net borrowings (payments) under lines of credit	(3.0)	0.4	0.4
Payments on long-term debt and other	(67.8)	(16.8)	(67.7)
Other financing activities, net	9.9	0.5	2.4
Net cash used in financing activities	(60.9)	(15.9)	(64.9)
Effect of foreign currency rate fluctuations on cash	0.8	0.9	1.2
Net increase (decrease) in cash and cash equivalents	\$ 6.1	\$ (1.2)	\$ (17.3)

Cash provided by operating activities

The \$52.7 million increase in cash flows from operating activities in 2007 was primarily due to improved profits of \$28.1 million, higher accounts payable and current liabilities and deferred taxes. The higher current liabilities were the result of increases in taxes payable, incentive plans and general payables. The change in deferred taxes was a result of our higher profits and the reversal of some federal and state valuation allowances being an offset to our net operating loss.

The \$19.9 million decrease in cash flows from operating activities in 2006 was primarily the result of the decrease in net income in fiscal year 2006. This decrease was partially offset by general improvements in working capital during fiscal 2006. Although the closure of our Glueckstadt plant improved working capital in fiscal 2006, this improvement was partially offset by increased working capital requirements at our Americana, Brazil specialty fibers facility as we moved away from the previous tolling arrangement toward market production.

Net cash used in investing activities

Purchases of property, plant and equipment were consistent during the last three fiscal years. We expect efficiency improvement and energy savings projects, maintenance capital, and environmental spending will result in total capital expenditures of approximately \$48 million for fiscal 2008.

We expect to incur significant capital expenditures in the future to comply with environmental obligations at our Perry, Florida specialty fibers facility. Based on the requirements of the proposed permit, we expect to incur capital expenditures of approximately \$10 million over the next four years (beginning fiscal year 2008) on in-plant process changes, and additional capital expenditures of approximately \$50 million over at least five years, possibly beginning as early as fiscal year 2012. The amount and timing of these capital expenditures may vary depending on a number of factors. For additional information on environmental matters, see Note 17 to the Consolidated Financial Statements.

Net cash used in financing activities

During fiscal year 2007, we used cash from operations and \$9.9 million received from option exercises to reduce our debt and capital leases by \$70.8 million. We are focused on debt reduction with an intermediate term objective of a 50/50 debt to equity balance in our capital structure. (See Note 8, Debt, to the Consolidated Financial Statements for further information.)

During fiscal year 2006 we used cash from operations to finance the capital investments we made at our Americana, Brazil facility, and to redeem, at par, \$15 million principal amount of our high interest rate, 9.25%, senior subordinated notes due in 2008.

Contractual Obligations

The following table summarizes our significant contractual cash obligations as of June 30, 2007. Certain of these contractual obligations are reflected in our balance sheet, while others are disclosed as future obligations under accounting principles generally accepted in the United States.

<i>(millions)</i>	Total	Payments Due by Period ⁽⁶⁾			Greater than 5 years
		Less than 1 year	1-3 years	3-5 years	
Contractual Obligations					
Long-term obligations ⁽¹⁾	\$ 597.4	\$ 37.0	\$ 125.7	\$ 192.6	\$ 242.1
Capital lease obligations ⁽²⁾	0.8	0.5	0.3	-	-
Operating lease obligations ⁽²⁾	1.4	0.9	0.5	-	-
Timber commitments ⁽³⁾	43.6	11.7	25.4	6.5	-
Linter commitments ⁽⁴⁾	17.3	17.3	-	-	-
Other purchase commitments ⁽⁵⁾	34.5	19.6	7.0	4.5	3.4
Total contractual cash obligations	\$ 695.0	\$ 87.0	\$ 158.9	\$ 203.6	\$ 245.5

⁽¹⁾ Amounts include related interest payments. Interest payments for variable debt of \$33.6 million are based on the effective rate as of June 30, 2007 of 7.3%. See Note 8, Debt, to the Consolidated Financial Statements for further information on interest rates.

⁽²⁾ Capital lease obligations represent principal and interest payments. See Note 9, Leases, to the Consolidated Financial Statements for further information.

⁽³⁾ See Note 16, Commitments, to the Consolidated Financial Statements for further information.

⁽⁴⁾ Linter commitments are take-or-pay contracts made in the ordinary course of business that usually are less than one year in length.

⁽⁵⁾ The majority of other purchase commitments are take-or-pay contracts made in the ordinary course of business related to utilities and raw material purchases.

⁽⁶⁾ Less than one year references fiscal 2008; 1-3 years references fiscal 2009 and 2010; 3-5 years references fiscal 2011 and 2012.

Note: Additionally, the cash flow to fund postretirement benefit obligations has an expected net present value of \$24.5 million. The actuarially estimated annual benefit payments net of retiree contributions are as follows: 2008 - \$1.7 million; 2009-2010 - \$3.6 million; 2011 - 2012 - \$3.6 million; and 2013 through 2017 - \$9.9 million. These obligations are not included in the table above as the total obligation is based on the present value of the payments and would not be consistent with the contractual cash obligations disclosures included in the table above. See Note 12, Employee Benefit Plans, to the Consolidated Financial Statements for further information.

Recent Accounting Pronouncements

See Note 2 to our Consolidated Financial Statements for a discussion of recent accounting pronouncements and their impact.

Critical Accounting Policies and Estimates

This discussion and analysis is based upon our consolidated financial statements. Our critical and significant accounting policies are more fully described in Note 1, Accounting Policies, to our Consolidated Financial Statements. Some of our accounting policies require us to make significant estimates and assumptions about future events that affect the amounts reported in our financial statements and the accompanying notes. Future events and their effects cannot be determined with certainty. Therefore, the determination of estimates underlying our financial statements requires the exercise of management's judgment. Actual results could differ from those estimates, and any such differences may be material to our financial statements. Our management exercises critical judgment in the application of our accounting policies in the following areas, which significantly affect our financial condition and results of operation. Management has discussed the development and selection of these critical accounting policies and estimates with the Audit Committee of our Board of Directors and with our independent auditors.

Allowance for doubtful accounts

We provide an allowance for receivables we believe we may not collect in full. Management evaluates the collectibility of accounts based on a combination of factors. In circumstances in which we are aware of a specific customer's inability to meet its financial obligations (i.e., bankruptcy filings or substantial downgrading of credit ratings), we record a specific reserve. For all other customers, we recognize reserves for bad debts based on our historical collection experience. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligations), our estimates of the recoverability of amounts due could be reduced by a material amount.

Bad debt expense for fiscal years 2007, 2006 and 2005 was \$0.3 million, \$0.1 million and \$1.4 million, respectively.

Deferred income taxes and other liabilities

Deferred income tax assets and liabilities are recognized based on the difference between the financial statement and the tax law treatment of certain items. Realization of certain components of deferred tax assets is dependent upon the occurrence of future events. We record a valuation allowance to reduce our net deferred tax assets to the amount we believe is more likely than not to be realized. These valuation allowances can be impacted by changes in tax laws, changes to statutory tax rates, and future taxable income levels and are based on our judgment, estimates and assumptions regarding those future events.

In fiscal 2007, we increased the valuation allowance recorded against certain foreign net operating losses by approximately \$2.5 million and decreased the valuation allowances recorded against certain state net operating losses and tax credits by approximately \$2.4 million.

In the event we were to determine that we would not be able to realize all or a portion of the net deferred tax assets in the future, we would increase the valuation allowance through a charge to income in the period that such determination is made. Conversely, if we were to determine that we would be able to realize our deferred tax assets in the future, in excess of the net carrying amounts, we would decrease the recorded valuation allowance through an increase to income in the period that such determination is made.

We record our world-wide tax provision based on the tax rules and regulations in the various jurisdictions in which we operate. Significant managerial judgment is required in determining our effective tax rate and evaluating our tax

positions. Where we believe that the deduction of an item is supportable for income tax purposes, the item is deducted in our income tax returns. However, where treatment of an item is uncertain, tax contingency reserves are recorded based upon the expected most probable outcome taking into consideration the specific tax regulations and facts of each matter. These reserves are recorded in the consolidated balance sheet in other liabilities. We adjust these reserves when an identifiable event occurs that changes the most probable outcome.

Depreciation

We provide for depreciation on our production machinery and equipment at our cotton cellulose and airlaid nonwovens plants using the units-of-production depreciation method. Under this method, we calculate depreciation based on the expected total productive hours of the assets subject to a minimum level of depreciation. We review our estimate of total productive hours at least annually. If the estimated productive hours of these assets change based on changes in utilization and useful life assumptions, we adjust depreciation expense per unit of production accordingly. We use the straight-line method for determining depreciation on our other capital assets.

Long-lived assets

Long-lived assets are reviewed for impairment when circumstances indicate the carrying value of an asset may not be recoverable. For assets that are held and used, recoverability is evaluated based on the undiscounted cash flows expected to be generated by the asset. If the carrying value of the assets is determined to not be recoverable, we measure the potential impairment by comparing the carrying value of the assets to their fair value. If impairment exists, an adjustment is made to write the asset down to its fair value. Estimated fair values are determined based on quoted market values, discounted cash flows or internal and external appraisals, as applicable. Assets to be disposed of are carried at the lower of carrying value or estimated net realizable value.

Based on the estimated fair values of long-lived assets, we recorded no impairment charges in fiscal year 2007. We recorded \$2.1 million, and \$12.3 million for years ended June 30, 2006, and 2005, respectively. If circumstances change, our estimated fair values may be impacted and have a material effect on our reported financial position and results of operations. See Note 3, Impairment of Long-lived Assets and Assets Held for Sale, of our Consolidated Financial Statements for further information concerning impairment charges.

We have made acquisitions in the past that included a significant amount of goodwill and other intangible assets. We adopted Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (“SFAS 142”), and, as a consequence, discontinued the amortization of goodwill. Under the guidelines of SFAS 142, goodwill is subject to an annual impairment test based on its estimated fair value. Unless circumstances otherwise dictate, we perform our annual impairment testing in the fourth quarter. We will continue to amortize other intangible assets that meet certain criteria over their useful lives. We utilize the present value of expected net cash flows to determine the estimated fair value of our reporting units. This present value model requires management to estimate future net cash flows, the timing of these cash flows and an appropriate discount rate (or weighted average cost of capital) representing the time value of money and the inherent risk and uncertainty of future cash flows. The discount rate is based on independently calculated beta risks for a composite group of companies, our target capital mix and an estimated market risk premium. The assumptions used in estimating future cash flows were consistent with the reporting unit’s internal planning. If the estimated fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is not impaired. The determination of an impairment loss is complex and requires that we make many assumptions and estimates. If our estimates of future cash flows or the underlying assumptions and estimates change, we may need to record impairment losses in the future. See Note 1, “Accounting Policies,” to the Consolidated Financial Statements for further information on long-lived assets.

Item 7a. Qualitative and Quantitative Disclosures About Market Risk

We are exposed to market risk from changes in foreign exchange rates, interest rates, raw material costs and the price of certain commodities used in our production processes. To reduce such risks, we selectively use financial instruments. All hedging transactions are authorized and executed pursuant to clearly defined policies and procedures. Further, we do not enter into financial instruments for trading purposes.

The following risk management discussion and the estimated amounts generated from the sensitivity analyses are forward-looking statements of market risk, assuming that certain adverse market conditions occur. Actual results in the future may differ materially from those projected results due to actual developments in the global financial markets. The analysis methods used to assess and mitigate risks discussed below should not be considered projections of future events or losses.

A discussion of our accounting policies for risk management is included in Note 1, Accounting Policies, in the Notes to the Consolidated Financial Statements.

Interest Rates

The fair value of our long-term public debt is based on an average of the bid and offer prices at year-end. The fair value of the credit facility approximates its carrying value due to its variable interest rate. The carrying value and fair value of long-term debt at June 30, 2007 were \$445.9 million and \$450.8 million and at June 30, 2006 were \$522.1 million and \$497.3 million, respectively. Market risk is estimated as the potential change in fair value resulting from a hypothetical 100 basis point decrease in interest rates and would amount to a \$6.7 million increase in the fair value of long-term debt as of June 30, 2007.

We had \$33.6 million of variable rate long-term debt outstanding at June 30, 2007. At this borrowing level, a hypothetical 100 basis point increase in interest rates would have a \$0.3 million unfavorable impact on our pre-tax earnings and cash flows. The primary interest rate exposures on floating rate debt are with respect to European inter-bank rates and U.S. prime rates.

Foreign Currency Exchange Rates

Foreign currency exposures arise from transactions including firm commitments and anticipated transactions denominated in a currency other than an entity's functional currency. Buckeye and our subsidiaries generally enter into transactions denominated in their respective functional currencies. Our primary foreign currency exposure arises from foreign-denominated revenues and costs and their translation into U.S. dollars. The primary currencies to which we are exposed include the euro, Canadian dollar and the Brazilian real. Our euro exposure is internally hedged for the most part because a high percentage of both the sales and costs at our Steinfurt, Germany plant are denominated in euros. We currently hedge about 50% of our balance sheet exposure to the Canadian dollar and we do not have any hedges in place to protect against fluctuations in the Brazilian real. However, we are continuously evaluating our foreign currency exposure and our hedging policy is subject to change.

We generally view as long-term our investments in foreign subsidiaries with a functional currency other than the U.S. dollar. As a result, we do not generally hedge these net investments. However, we use capital structuring techniques to manage our net investment in foreign currencies as considered necessary. The net investment in foreign subsidiaries translated into dollars using the year-end exchange rates is \$201.3 million and \$196.9 million at June 30, 2007 and 2006, respectively. The potential foreign currency translation loss from investment in foreign subsidiaries resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates amounts to approximately \$18.3 million at June 30, 2007. This change would be reflected in the equity section of our consolidated balance sheet in accumulated other comprehensive loss. The primary foreign currency exposures on our long-term investments are with the euro, Canadian dollar and the Brazilian real.

Availability and Cost of Raw Materials

Amounts paid by us for wood, cotton fiber and fluff pulp represent the largest component of our variable costs of production. The availability and cost of these materials are subject to market fluctuations caused by factors beyond our control, including weather conditions. Significant decreases in availability or increases in the cost of wood or cotton fiber to the extent not reflected in prices for our products, could materially and adversely affect our business, results of operations and financial condition. We have potential raw material availability issues in our specialty cotton fibers business in both North America and Brazil. We have increased our imported cotton linters purchases for our Memphis specialty cotton fiber production facility in order to minimize the impact of the current constraints on North American cotton fiber availability. Currently our production is constrained by lint availability.

Commodities

We are dependent on commodities in our production process. Natural gas, electricity, fuel oil, caustic and other chemicals are just some of the commodities that our processes rely upon. Exposure to these commodities can have a significant impact on our operating performance.

In May 2007, we entered into a seven year electrical power contract for power usage in Brazil. This contract bypasses the local utility company thereby reducing our energy costs by approximately \$0.5 million each year.

In order to minimize market exposure, we may use forward contracts to reduce price fluctuations in a desired percentage of forecasted purchases of fossil fuels over a period of generally less than one year. There were no fossil fuel contracts outstanding at June 30, 2007 or 2006 requiring fair value treatment.

Exposure to commodity products also creates volatility in pricing. If our research and development efforts do not result in the commercialization of new, proprietary products, we will continue to have significant exposure to fluff pulp and other commodity products, which could result in volatility in sales prices and profits.

Industry Cyclical

The demand and pricing of our products, particularly fluff pulp, are influenced by the much larger market for papermaking pulps which is highly cyclical. The markets for most cellulose-based products are sensitive to both changes in general global economic conditions and to changes in industry capacity. Both of these factors are beyond our control. The price of these products can fluctuate significantly when supply and demand become imbalanced for any reason. Financial performance can be heavily influenced by these pricing fluctuations and the general cyclical nature of the industries in which we compete. It is not certain that current prices will be maintained, that any price increases will be achieved, or that industry capacity utilization will reach favorable levels. The demand, cost and prices for our products may thus fluctuate substantially in the future and downturns in market conditions could have a material adverse effect on our business, results of operations and financial condition.

Contingencies

Our operations are subject to extensive general and industry-specific federal, state, local and foreign environmental laws and regulations. We devote significant resources to maintaining compliance with such requirements. We expect that, due to the nature of our operations, we will be subject to increasingly stringent environmental requirements (including standards applicable to wastewater discharges and air emissions) and will continue to incur substantial costs to comply with such requirements. Given the uncertainties associated with predicting the scope of future requirements, there can be no assurance that we will not in the future incur material environmental compliance costs or liabilities. For additional information on environmental matters, see Note 17, Contingencies, to the Consolidated Financial Statements.

Forward-Looking Statements

Except for the historical information contained herein, the matters discussed in this Annual Report are forward-looking statements that involve risks and uncertainties, including, but not limited to, economic, competitive, governmental and technological factors affecting our operations, markets, products, services and prices and other factors. The forward-looking statements included in this document are only made as of date of this document and we undertake no obligation to publicly release the result of any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Item 8. Financial Statements and Supplementary Data

See Index to Financial Statements on page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

We had no changes in or disagreements with Ernst & Young LLP, our independent auditors.

Item 9a. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of our disclosure controls and procedures in ensuring that the information required to be disclosed in our filings under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, including ensuring that such information is accumulated and communicated to Buckeye management as appropriate to allow timely decisions regarding required disclosure. Based on such evaluation, our principal executive and financial officers have concluded that such disclosure controls and procedures were effective, as of June 30, 2007 (the end of the period covered by this Annual Report on Form 10-K).

Assessment of Internal Control Over Financial Reporting

Management's report on our internal control over financial reporting is presented on page F-3 of this Annual Report on Form 10-K. The report of Ernst & Young LLP with respect to internal control over financial reporting is presented on page F-4 of this Annual Report on Form 10-K.

Changes in Internal Control Over Financial Reporting

During our fiscal quarter ended June 30, 2007, no change occurred in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9b. Other Information

None.

27

PART III**Item 10. Directors and Executive Officers of the Registrant***Directors and Executive Officers*

Information regarding members of the Board of Directors will be presented in our 2007 Annual Proxy Statement for the 2007 annual meeting of stockholders and is incorporated herein by reference.

Executive Officers of the Registrant

The names, ages and positions held by our executive officers on September 1, 2007 are:

Name	Age	Position	Elected to Present Position
John B. Crowe	60	Chairman of the Board, Chief Executive Officer and Director	July 2006
Kristopher J. Matula	45	President, Chief Operating Officer and Director	July 2006
Charles S. Aiken	57	Sr. Vice President, Manufacturing	October 2003
Jeffery T. Cook	45	Sr. Vice President, Marketing	February 2006
Sheila Jordan Cunningham	55	Sr. Vice President, General Counsel and Secretary	April 2000
Steven G. Dean	51	Sr. Vice President and Chief Financial Officer	July 2007
Douglas L. Dowdell	49	Sr. Vice President, Specialty Fibers	February 2006
William M. Handel	61	Sr. Vice President, Lean Enterprise	February 2006
Paul N. Horne	52	Sr. Vice President, Product and Market Development	February 2006
Marko M. Rajamaa	46	Sr. Vice President, Nonwovens	October 2006

John B. Crowe*Chairman of the Board, Chief Executive Officer and Director*

Mr. Crowe has served as Chairman of the Board and Chief Executive Officer since July 1, 2006. He served as President and Chief Operating Officer from April 2003 to July 2006. Mr. Crowe was elected as a director of Buckeye in August 2004. He served as Senior Vice President, Wood Cellulose from January 2001 to April 2003. He served as Vice President, Wood Cellulose Manufacturing from January 1998 to January 2001. Prior to joining the Company, he was Executive Vice President/General Manager of Alabama River Pulp and Alabama Pine Pulp Operations, a division of Parsons and Whittemore, Inc. and was Vice President and Site Manager of Flint River Operations, a subsidiary of Weyerhaeuser Company. From 1979 to 1992, he was an employee of Procter & Gamble.

Kristopher J. Matula*President, Chief Operating Officer and Director*

Mr. Matula has served as President and Chief Operating Officer since July 1, 2006. Mr. Matula was elected as a director of Buckeye in April 2007. He served as Executive Vice President and Chief Financial Officer from October 2003 to July 2006. Mr. Matula served as Senior Vice President, Nonwovens and Corporate Strategy from April 2003 to October 2003. He served as Senior Vice President, Nonwovens from January 2001 to April 2003. He served as Senior Vice President, Commercial - Absorbent Products from July 1997 to January 2001 and as Vice President, Corporate Strategy from April 1996 to July 1997. Prior to joining Buckeye in 1994, he held various positions with Procter & Gamble and General Electric.

Charles S. Aiken

Senior Vice President, Manufacturing

Mr. Aiken has served as Senior Vice President, Manufacturing since October 1, 2003. He served as Senior Vice President, Nonwovens Manufacturing from April 2000 to October 2003. He served as Vice President, Business Systems from April 1998 to April 2000 and as Vice President, Foley Plant from June 1995 to April 1998. He was an employee of Procter & Gamble from 1977 to March 1993.

Jeffery T. Cook

Senior Vice President, Marketing

Mr. Cook has served as Senior Vice President, Marketing since February 1, 2006. He served as Senior Vice President, Product and Market Development from February 2005 to February 2006. Mr. Cook served as Vice President, Product and Market Development from July 2003 to February 2005. He served as Vice President of Research and Development, Wood Cellulose from August 1999 to July 2003. He was an employee of Procter and Gamble from 1988 to 1998.

Sheila Jordan Cunningham

Senior Vice President, General Counsel and Secretary

Ms. Cunningham has served as Senior Vice President, General Counsel and Secretary since April 2000. She served as Vice President, General Counsel and Secretary from April 1998 to April 2000. She served as Assistant General Counsel from March 1997 and as Secretary from July 1997 to April 1998. Prior to joining the Company, she was a partner in the law firm of Baker, Donelson, Bearman & Caldwell.

Steven G. Dean

Sr. Vice President and Chief Financial Officer

Mr. Dean has served as Sr. Vice President and Chief Financial Officer since July 1, 2007. He served as Vice President and Chief Financial Officer from July 2006 to July 2007. He served as Vice President and Controller from February 2006 to July 2006. Mr. Dean served as Company Controller from December 2005 to February 2006. Previously, he served as Controller for Buckeye's Specialty Fibers Division from December 2004 to November 2005 and Controller for Buckeye's Nonwovens Division from August 2001 to November 2004. Prior to joining Buckeye in 1999, he held various financial management positions with Thomas & Betts and Hewlett-Packard.

Douglas L. Dowdell

Senior Vice President, Specialty Fibers

Mr. Dowdell has served as Senior Vice President, Specialty Fibers since February 1, 2006. He served as Senior Vice President, Nonwovens from February 2005 to February 2006. Mr. Dowdell served as Vice President, Nonwovens from October 2003 to February 2005. He served as Vice President, Absorbent Wood Fiber Sales from February 2002 to October 2003. He served as Vice President, Nonwovens Business Development from February 2001 to February 2002. He served as Vice President, Absorbent Products Business Development from August 2000 to February 2001. Prior to August 2000 he held several positions in the Company including: Manager, Absorbent Fiber Sales; Manager, Business Development; and Manager, Wood Procurement. He was an employee of Procter & Gamble from 1988 to March 1993.

William M. Handel

Senior Vice President, Lean Enterprise

Mr. Handel has served as Senior Vice President, Lean Enterprise since February 1, 2006. He served as Senior Vice President, Human Resources from April 2000 to February 2006. Mr. Handel served as Vice President, Human Resources from November 1995 to April 2000 and as Human Resources Manager from March 1993 to November 1995. He was an employee of Procter & Gamble from 1974 to March 1993.

Paul N. Horne

Senior Vice President, Product and Market Development

Mr. Horne has served as Senior Vice President, Product and Market Development since February 1, 2006. He served as Senior Vice President, Cotton Cellulose from January 2001 to February 2006. Mr. Horne served as Senior Vice President, Commercial - Specialty Cellulose from July 1997 to January 2001 and as Vice President, North and South American Sales from October 1995 to July 1997. He was an employee of Procter & Gamble from 1982 to March 1993.

Marko M. Rajamaa

Senior Vice President, Nonwovens

Mr. Rajamaa has served as Senior Vice President, Nonwovens since October 26, 2006. He served as Vice President, Nonwovens from February 2006 to October 2006 and as Vice President, Nonwovens Sales – Europe and Middle East from January 2002 to February 2006. Previously, he served as Manager, Nonwoven Sales, Europe, Middle East and Africa from 1999 to 2002. Prior to joining Buckeye in 1999, he held various sales management positions with Walkisoft / UPM-Kymmene.

Code of Business Conduct & Ethics

We have a Code of Business Conduct & Ethics, which applies to all of our directors, officers and employees, including our principal executive officer and senior financial officers. Our Code of Business Conduct & Ethics is available in the corporate governance section of the investor relations page of our website, www.bkitech.com. In addition, we intend to post in the corporate governance section of the investor relations page of our website information regarding any amendment to, or waiver from, the provisions of our Code of Business Conduct & Ethics to

the extent such disclosure is required. The information on our website, however, does not form part of this Report.

Corporate Governance and Compliance with Section 16(a) of the Exchange Act

Information relating to corporate governance and compliance with Section 16(a) of the Exchange Act will be included in our 2007 Annual Proxy Statement and is incorporated herein by reference. As part of this Annual Report on Form 10-K, we are filing the applicable certifications of our Chief Executive Officer and Chief Financial Officer required under Section 302 and 906 of the Sarbanes-Oxley Act of 2002. In addition, on September 7, we filed with the New York Stock Exchange the annual certification of our Chief Executive Officer stating that he is not aware of any violation by Buckeye Technologies Inc. of the New York Stock Exchange's corporate governance listing standards.

Item 11. Executive Compensation

Information relating to this item will be included in our 2007 Annual Proxy Statement and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information relating to this item will be included under the captions "Security Ownership of Certain Beneficial Owners and Management" and "Equity Compensation Plan Information" in our 2007 Annual Proxy Statement and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information relating to this item will be included in our 2007 Annual Proxy Statement and is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

Information regarding principal accountant fees and services will be included in our 2007 Annual Proxy Statement and is incorporated by reference herein.

PART IV**Item 15. Exhibits and Financial Statement Schedules**

- (a) (1) Financial Statements
- See Index to Consolidated Financial Statements and Schedule on page F-1.
- (2) Financial Statement Schedules
- See Index to Consolidated Financial Statements and Schedule on page F-1. All other financial statement schedules are omitted as the information is not required or because the required information is presented in the financial statements or the notes thereto.
- (3) Listing of Exhibits. See exhibits listed under Item 15 (b).

Exhibit 15 (b). Exhibits required by Item 601 of Regulation S-K

Report of Management

The management of Buckeye Technologies Inc. is committed to providing financial reports that are complete, accurate and easily understood.

The consolidated financial statements and financial information included in this report have been prepared in accordance with accounting principles generally accepted in the United States and in the opinion of management fairly and completely present the Company's financial results. Our independent auditor, Ernst & Young LLP, has examined our financial statements and expressed an unqualified opinion.

Ensuring the accuracy of financial statements starts at the top of the Company. Our Board of Directors provides oversight as the representative of the stockholders. Our Audit Committee, consisting entirely of independent Directors, meets regularly with management, internal audit and the independent auditors to review our financial reports.

The Company's senior management, our corporate leadership team, is actively involved in all aspects of the business. This group understands key strategies and monitors financial results. We maintain a system of internal control which provides reasonable assurance that transactions are accurately recorded and assets are safeguarded. All of the Company's officers and financial executives adhere to the Company's Code of Business Conduct and Ethics and provide written confirmation of their compliance annually.

Our Company was built on a foundation of integrity and honesty. We take responsibility for the quality and accuracy of our financial reporting.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended). Our internal control over financial reporting includes, among other things: defined policies and procedures for conducting and governing our business, a written Code of Business Conduct and Ethics adopted by our Board of Directors and applicable to all directors and all officers and employees of Buckeye and our subsidiaries, sophisticated information systems for processing transactions and a properly staffed and professional internal audit department. Mechanisms are in place to monitor the effectiveness of our internal control over financial reporting and actions are taken to correct identified deficiencies. Our procedures for financial reporting include the active involvement of senior management, our Audit Committee and a staff of highly qualified financial and legal professionals.

Management, with the participation of our principal executive and financial officers, assessed our internal control over financial reporting as of June 30, 2007, the end of our fiscal year. Management based its assessment on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria).

Based on this assessment, management has concluded that our internal control over financial reporting was effective as of June 30, 2007.

Our independent registered public accounting firm, Ernst & Young LLP, audited the effectiveness of our internal controls over financial reporting. Ernst & Young has issued their report on the effectiveness of internal control over financial reporting which is included in this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Buckeye Technologies Inc.

We have audited Buckeye Technologies Inc.'s internal control over financial reporting as of June 30, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Buckeye Technologies Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Buckeye Technologies Inc. maintained, in all material respects, effective internal control over financial reporting as of June 30, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Buckeye Technologies Inc. as of June 30, 2007 and 2006 and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended June 30, 2007 of Buckeye Technologies Inc. and our report dated September 5, 2007 expressed an unqualified opinion thereon.

September 5, 2007

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Buckeye Technologies Inc.

We have audited the accompanying consolidated balance sheets of Buckeye Technologies Inc. as of June 30, 2007 and 2006 and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended June 30, 2007. Our audits also included the financial statement schedule listed in Item 15 (a) in this Annual Report of Form 10-K. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Buckeye Technologies Inc. as of June 30, 2007 and 2006, and the consolidated results of its operations and its cash flows for each of the three years in the period ended June 30, 2007, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the financial statement schedule referred to above, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Buckeye Technologies Inc.'s internal control over financial reporting as of June 30, 2007, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated September 5, 2007 expressed an unqualified opinion thereon.

Notes to Consolidated Financial Statements

(In thousands, except share data)

NOTE 1: ACCOUNTING POLICIES

Business Description and Basis of Presentation

Our financial statements are consolidated financial statements of Buckeye Technologies Inc. We manufacture and distribute value-added cellulose-based specialty products used in numerous applications including disposable diapers, personal hygiene products, engine air and oil filters, food casings, rayon filament, acetate plastics, thickeners and papers.

Fiscal Year

Except as otherwise specified, references to years indicate our fiscal year ended June 30, 2007 or ended June 30 of the year referenced.

Reclassifications

Certain prior year amounts have been reclassified to conform to current year classifications.

Principles of Consolidation

The consolidated financial statements include the accounts of Buckeye Technologies Inc. and our subsidiaries, all of which are wholly owned. All significant intercompany accounts and transactions have been eliminated.

Summary of Significant Accounting Policies

Cash and Cash Equivalents

We consider cash equivalents to be temporary cash investments with a maturity of three months or less when purchased.

Inventories

Inventories are valued at the lower of cost or market. The costs of manufactured cotton-based specialty fibers and costs for nonwoven raw materials are generally determined on the first-in, first-out (FIFO) basis. Other manufactured products and raw materials are generally valued on an average cost basis. Manufactured inventory costs include material, labor and manufacturing overhead. Slash pine timber, cotton fibers and chemicals are the principal raw materials used in the manufacture of our specialty fiber products. Fluff pulp is the principal raw material used in our nonwoven materials products. We take physical counts of inventories at least annually, and we review periodically the provision for potential losses from obsolete, excess or slow-moving inventories.

Allowance for Doubtful Accounts

We provide an allowance for receivables we believe we may not collect in full. Management evaluates the collectibility of accounts based on a combination of factors. In circumstances where we are aware of a specific customer's inability to meet its financial obligations (i.e., bankruptcy filings or substantial downgrading of credit ratings), we record a specific reserve. For all other customers, we recognize reserves for bad debts based on our

historical collection experience. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligations), our estimates of the recoverability of amounts due could differ by a material amount.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost. Cost includes the interest cost associated with significant capital additions. Interest capitalized for the years ended June 30, 2007, 2006 and 2005 was \$269, \$1,866 and \$418, respectively. Depreciation on production machinery and equipment at the cotton cellulose and airlaid nonwovens plants is determined by the units-of-production method which is based on the expected productive hours of the assets, subject to a minimum level of depreciation. The straight-line method is used for determining depreciation on other capital assets. Depreciation under the straight-line method is computed over the following estimated useful lives: buildings—30 to 40 years; machinery and equipment—3 to 20 years. Depreciation and amortization expense includes the amortization of assets under capital lease.

Long-Lived Assets

Long-lived assets are reviewed for impairment when circumstances indicate the carrying value of an asset may not be recoverable. For assets that are to be held and used, recoverability is evaluated based on the undiscounted cash flows expected to be generated by the asset. If the carrying values of the assets are determined to not be recoverable, we measure the potential impairment by comparing the carrying value of the assets to their fair value. If impairment exists, an adjustment is made to write the asset down to its fair value. Estimated fair values are determined based on quoted market values, discounted cash flows or internal and external appraisals, as applicable. Assets to be disposed of are carried at the lower of carrying value or fair value less costs to sell. See Note 3 for information concerning impairment charges.

Goodwill is recognized for the excess of the purchase price over the fair value of tangible and identifiable intangible net assets of businesses acquired. Goodwill of businesses acquired is specifically identified to the reporting units to which the businesses belong. We have determined that our reporting units for Goodwill are the same as our operating segments before aggregation. See Note 14, "Segment Information," for further discussion of our operating segments. Goodwill is reviewed at least annually for impairment. Unless circumstances otherwise dictate, we perform our annual impairment testing in the fourth quarter. We utilize the present value of expected net cash flows to determine the estimated fair value of our reporting units. This present value model requires management to estimate future net cash flows, the timing of these cash flows and an appropriate discount rate (or weighted average cost of capital) representing the time value of money and the inherent risk and uncertainty of future cash flows. The discount rate is based on independently calculated beta risks for a composite group of companies, our target capital mix and an estimated market risk premium. The assumptions used in estimating future cash flows were consistent with the reporting unit's internal planning. If the estimated fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is not impaired. The determination of an impairment loss is complex and requires that we make many assumptions and estimates. If our estimates of future cash flows or the underlying assumptions and estimates change, we may need to record impairment losses in the future. No impairment of goodwill was recorded during the years ending June 30, 2007, 2006 and 2005. The change in goodwill resulted from changes in foreign currency exchange rates.

Intellectual Property and Other

At June 30, 2007 and 2006, we had intellectual property totaling \$18,016 and \$25,173, respectively, which includes patents (including application and defense costs), licenses, trademarks, and tradenames, the majority of which were obtained in the acquisition of airlaid nonwovens businesses and Stac-Pac™ technology. During fiscal year 2007, we reduced the amount recorded for Stac-Pac™ patents by \$5,000 when we cancelled a contingent note to Stac-Pac™ Technologies Inc. that was issued in conjunction with the acquisition in 2000. Intellectual property is amortized by the straight-line method over 5 to 20 years and is net of accumulated amortization of \$15,112 and \$14,519 at June 30, 2007 and 2006, respectively. Intellectual property amortization expense of \$2,335, \$2,000 and \$2,280 was recorded during the years June 30, 2007, 2006 and 2005, respectively. Estimated amortization expense for the five succeeding fiscal years follows: \$2,231 in 2008, \$2,233 in 2009, \$2,235 in 2010, \$2,237 in 2011 and \$2,239 in 2012.

Deferred debt costs of \$5,407 and \$7,534 at June 30, 2007 and 2006, respectively are amortized by the effective interest method over the life of the related debt and are net of accumulated amortization of \$7,159 and \$6,901 at June 30, 2007 and 2006, respectively. We recorded amortization of deferred debt costs of \$1,300, \$1,487 and \$1,556 during the years ending June 30, 2007, 2006 and 2005, respectively.

Income Taxes

We provide for income taxes under the liability method. Accordingly, deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the

amounts used for income tax purposes. No provision is made for U.S. income taxes applicable to undistributed earnings of foreign subsidiaries that are indefinitely reinvested in foreign operations. It is not practicable to compute the potential deferred tax liability associated with these undistributed foreign earnings.

Risk Management

We are exposed to certain market risks as a part of our ongoing business operations and use derivative financial instruments, where appropriate, to manage these risks. Derivatives are financial instruments whose value is derived from one or more underlying financial instruments. Examples of underlying instruments are currencies, commodities and interest rates. We record the fair value of all outstanding derivatives in other assets or other liabilities. Gains and losses related to non-designated instruments or the ineffective portion of any hedge are recorded in various costs and expenses, depending on the nature of the derivative.

We periodically use derivatives and other financial instruments to hedge exposures to fossil fuels, interest rates and currency risks. For hedges which meet the Statement of Financial Accounting Standards No. ("SFAS") 133, *Accounting for Derivative Instruments and Hedging Activities*, criteria, we formally designate and document the instrument as a hedge of a specific underlying exposure, as well as the risk management objective and strategy for undertaking each hedge transaction. Because of the high degree of effectiveness between the hedging instrument and the underlying exposure being hedged, fluctuations in the value of the derivative instruments are generally offset by changes in the value or cash flows of the underlying exposures being hedged.

From time to time, we utilize forward foreign exchange contracts for the sale or purchase of foreign currencies. These contracts are not designated as hedging instruments and do not qualify for hedge accounting treatment under the provisions of SFAS No. 133 and SFAS No. 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities*. Mark-to-market gains and losses for forward foreign exchange contracts are recorded in foreign exchange and other.

In order to minimize market exposure, at times we use forward contracts to reduce price fluctuations in a desired percentage of forecasted purchases of fossil fuel over a period of generally less than one year. There were no fossil fuel contracts outstanding at June 30, 2007 or 2006 requiring fair value treatment.

Derivatives are recorded in the consolidated balance sheet at fair value. At June 30, 2007 and 2006, we had no derivatives outstanding.

Credit Risk

We have established credit limits for each customer. We generally require the customer to provide a letter of credit for export sales in high-risk countries. Credit limits are monitored routinely.

Environmental Costs

Liabilities are recorded when environmental assessments are probable and the cost can be reasonably estimated. Generally, the timing of these accruals coincides with the earlier of completion of a feasibility study or our commitment to a plan of action based on the then known facts.

Revenue Recognition

We recognize revenue when the following criteria are met: persuasive evidence of an agreement exists, delivery has occurred, our price to the buyer is fixed and determinable, and collectibility is reasonably assured. Delivery is not considered to have occurred until the customer takes title and assumes the risks and rewards of ownership. The timing of revenue recognition is largely dependent on shipping terms. Discounts and allowances reduce net sales and are comprised of trade allowances, cash discounts and sales returns.

Shipping and Handling Costs

Amounts related to shipping and handling which are billed to a customer in a sales transaction have been classified as revenue. Costs incurred for shipping and handling have been classified as costs of goods sold.

Repairs and Maintenance Costs

Repairs and maintenance costs are expensed as incurred.

Foreign Currency Translation

Management has determined that the local currency of our German, Canadian, and Brazilian subsidiaries is the functional currency, and accordingly European euro, Canadian dollar, and Brazilian real denominated balance sheet accounts are translated into United States dollars at the rate of exchange in effect at fiscal year end. Income and expense activity for the period is translated at the weighted average exchange rate during the period. Translation adjustments are included as a separate component of stockholders' equity.

Transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the local functional currency are included in "Other income (expense)" in the results of

operations. Transaction gains and (losses) of \$18, \$(551) and \$(226) were recorded during the years ended June 30, 2007, 2006 and 2005, respectively. The cumulative amount of Foreign Currency Translation adjustments included in Accumulated Other Comprehensive Income was \$52,526 and \$33,819 for fiscal years 2007 and 2006, respectively.

Use of Estimates

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from the estimates and assumptions used.

Changes in estimates are recognized in accordance with the accounting rules for the estimate, which is typically in the period when new information becomes available to management. Areas where the nature of the estimate makes it reasonably possible that actual results could materially differ from amounts estimated include: impairment assessments on long-lived assets (including goodwill), allowance for doubtful accounts, inventory reserves, income tax liabilities, and contingent liabilities.

Earnings Per Share

Basic earnings per share has been computed based on the average number of common shares outstanding excluding restricted stock. Diluted earnings per share reflects the increase in average common shares outstanding that would result from the assumed exercise of outstanding stock options and restricted stock awards calculated using the treasury stock method.

Stock-Based Compensation

In December 2004, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standard (“SFAS”) 123 (revised 2004), *Share-Based Payments* (“SFAS 123(R)”).

On July 1, 2005 (the first day of our 2006 fiscal year), we adopted SFAS 123(R) using a modified prospective application, as permitted. Accordingly, prior period amounts have not been restated. Under this application, we are required to record compensation expense for all share-based awards granted after the date of adoption and for the unvested portion of previously granted share-based awards that remain outstanding at the date of adoption.

On June 7, 2005, prior to our adoption of SFAS 123(R), the Compensation Committee of our Board of Directors approved the acceleration of vesting of out-of-the-money options with an exercise price greater than \$8.32 to purchase shares of our common stock that remained unvested at June 30, 2005. The acceleration of vesting of these out-of-the-money options was undertaken primarily to eliminate any future compensation expense we would otherwise recognize in our income statement with respect to these options with the implementation of SFAS 123(R). We estimate the compensation expense, before tax, which was avoided as a result of the acceleration, would have totaled approximately \$4,900 (approximately \$2,100 in 2006, \$1,400 in 2007, \$800 in 2008 and \$600 in 2009) based on fair value calculations using the Black-Scholes methodology.

The following table illustrates the effect on net income (loss) and earnings (loss) per share had compensation expense for the employee stock-based awards been recorded during fiscal year 2005 based on the fair value method under SFAS 123(R) which includes the consideration of the accelerated vesting described above.

	Year Ended June 30, 2005
Net income as reported	\$ 20,204
Deduct: Total stock-based compensation expense determined under fair value based method, net of related tax effect	(4,856)
Pro forma net income	\$ 15,348

Earnings per share:

Basic - as reported	\$	0.54
Basic - pro forma	\$	0.41
Diluted - as reported	\$	0.54
Diluted - pro forma	\$	0.41

Stock-based compensation expense was \$785 (\$539 after tax and \$0.01 per share) and \$561 (\$365 after tax and \$0.01 per share) for 2007 and 2006, respectively. See Note 10 for a discussion of the assumptions underlying the pro forma calculations above.

NOTE 2: RECENT ACCOUNTING PRONOUNCEMENTS

The FASB issued FASB Interpretation No. ("FIN") 48, "Accounting for Uncertainty in Income Taxes," on July 13, 2006. The new rules will be effective for us in the first quarter of fiscal 2008. The interpretation provides a consistent framework for accounting for tax positions in accordance with SFAS 109 "Accounting for Income Taxes." At this time, we have not completed our review and assessment of the impact of adoption of FIN 48.

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements* (SFAS 157) and SFAS 158 *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS 158). SFAS 157 provides enhanced guidance for using fair value measurements. It establishes a framework for measuring fair value under GAAP and expands disclosures about fair value measurements. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and for interim periods within those fiscal years. We are currently evaluating the provisions of SFAS 157.

Effective for fiscal year 2007, we adopted the disclosure provisions of SFAS No. 158. SFAS No. 158 requires that the funded status of defined-benefit postretirement plans be recognized in our consolidated balance sheet, with a corresponding adjustment to accumulated other comprehensive income, net of tax. The adjustment to accumulated other comprehensive income at adoption represents the net unrecognized actuarial losses, unrecognized prior service costs, and unrecognized transition obligation remaining from the initial adoption of SFAS No. 106, all of which were previously netted against the plan's funded status in our consolidated balance sheet pursuant to the provisions of SFAS No. 106. These amounts will be subsequently recognized as net periodic benefit cost. Actuarial gains and losses that arise in subsequent periods and are not recognized as net periodic benefit cost in the same periods will be recognized as a component of other comprehensive income. Those amounts will be subsequently recognized as a component of net periodic benefit cost on the same basis as the amounts recognized in accumulated other comprehensive income at adoption of SFAS No. 158. SFAS No. 158 also requires the measurement date of the plan's funded status to be the same as our fiscal year end. However, the measurement date provision is not required to be adopted until fiscal year 2009. See Note 12 for further discussion of the implementation and impact of adoption of SFAS No. 158.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, including an amendment for SFAS 115 ("SFAS 159"). SFAS 159 permits all entities the option to measure most financial instruments and certain other items at fair value at specified election dates and to report related unrealized gains and losses in earnings. The fair value option will generally be applied on an instrument-by-instrument basis and is generally an irrevocable election. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We have evaluated the new statement and have determined that the adoption of SFAS 159 is not expected to have a material effect on our consolidated financial position, results of operation or cash flows.

NOTE 3: IMPAIRMENT OF LONG-LIVED ASSETS AND ASSETS HELD FOR SALE

Lumberton, North Carolina Facility

During fiscal year 2006, we began to actively market idled cotton linter pulping equipment at our Lumberton, North Carolina facility which had a carrying value of \$1,451. Management determined that the classification as held for sale criteria in SFAS No. 144, *Accounting for the Impairment or Disposal of Long-lived Assets* ("SFAS 144"), had been met. Accordingly, management evaluated its estimate of fair value less the cost to sell the assets and determined an impairment should be recognized for the equipment. Current markets and third party interest for the equipment indicated we would not be able to recover the carrying value through the sales process. Therefore, we wrote down the carrying value of the equipment to its fair value less costs to sell of \$963 and recorded an impairment charge of \$488 during fiscal year 2006. Subsequent to this impairment, we sold the equipment for net proceeds of \$963.

Glueckstadt, Germany Facility

In January 2005, we announced our decision to discontinue producing cotton linter pulp at our Glueckstadt, Germany facility. Our decision was due to a combination of factors that had increased the plant's costs to a level at which it was uneconomical to continue operations. The most significant factor impacting cost at the site was the substantial strengthening of the euro over calendar 2003 and 2004. Specialty fibers are normally priced and sold in U.S. dollars around the world. As a majority of Glueckstadt's costs were denominated in euros, this substantial strengthening had a negative impact on Glueckstadt's cost position. Additionally, Glueckstadt's process water, waste treatment and energy costs were more than twice the cost of these utilities at our Memphis, Tennessee cotton-based specialty fibers facility. Faced with these difficulties, we reduced the number of employees at the facility from approximately 150 to approximately 100 and operated at 55% of capacity during calendar year 2004. Based on these factors, we ceased production at Glueckstadt in December of 2005. We believe that the closure of our Glueckstadt facility and transfer of the majority of its cotton-based specialty fiber production to our Memphis, Tennessee and Americana, Brazil facilities will yield a more competitive cost structure.

During fiscal 2005, we evaluated the recoverability of the long-lived assets at the Glueckstadt facility and determined that these long-lived assets, with a carrying amount of \$15,280 (net of \$2,977 of foreign currency translation adjustment), were impaired. Consequently, we wrote these assets down to their estimated fair value of \$2,954, resulting in an impairment charge of \$12,326. This fair value was based on the remaining service potential of the facility through its expected closure in the second quarter of fiscal 2006, plus the estimated salvage value, as we did not believe the facility could be economically utilized for its intended purpose by us or a third party. The fair value analysis used a discount rate incorporating time value of money, expectations about timing and amount of future cash flows, and an appropriate risk premium.

During fiscal year 2006, we began to actively market the land and buildings, and the equipment which had carrying values of \$1,600 and \$496, respectively. Management determined that the classification as held for sale criteria in SFAS 144 had been met. Accordingly, management reevaluated its estimate of fair value less the cost to sell the assets and determined an additional impairment should be recognized for the land and buildings. Current markets and third party interest for the land and buildings indicated we would not be able to recover the carrying value through the sales process. Therefore, we wrote down the carrying value of the land and buildings to their fair value less costs to sell of \$121 and recorded an impairment charge of \$1,469 during fiscal year 2006. Subsequent to this impairment, we sold the land and building for \$127. As of June 30, 2006, management re-evaluated its estimate of fair value less the cost to sell the remaining assets and determined an additional impairment should be recognized for equipment with a carrying value of \$297. Therefore, we wrote down the carrying value of the remaining equipment to its fair value less costs to sell of \$165 and recorded an impairment charge of \$132.

In September 2006, the remaining assets were sold for \$520 and we recognized a net gain of \$355 (\$244 net of tax and \$0.01 per share net of tax) during fiscal 2007. The gain is presented under the “Gain on sale of assets held for sale” caption in the statement of operations.

The carrying value of the equipment was classified as current assets held for sale and is presented under the “Prepaid expenses and other” caption in the balance sheet as of June 30, 2006.

Cork, Ireland Facility

During fiscal 2004, we initiated the discontinuation of production of nonwoven materials at our Cork, Ireland facility. Subsequent to the closure of this facility, we completed the sale of our related building and equipment. As a result of the sale and disposition of the building and equipment for net proceeds of \$13,134 (net of \$1,897 of decommissioning and selling costs), we recognized a net gain of \$7,203 (\$4,682 net of tax and \$0.12 per share net of tax) during fiscal 2005. The gain is presented under the “Gain on sale of assets held for sale” caption in the statement of operations.

NOTE 4: RESTRUCTURING COSTS

During fiscal 2007, we entered into a restructuring program that complements our operations’ consolidations and involves consolidation in our European sales offices, product and market development and corporate overhead. We anticipate the total cost of this program will be approximately \$1,344 and will be completed during the first quarter of the 2008 fiscal year. As a result of this restructuring, 21 positions will be eliminated which will provide annual savings over \$2,000.

During fiscal 2005, we entered into a restructuring program. As part of this program, we discontinued production of cotton-based specialty fibers at our Glueckstadt, Germany facility during December 2005. The closure of the Glueckstadt facility resulted in the termination of 103 employees, and restructuring expenses related to the closure of \$3,516 and \$2,951 in fiscal years 2006 and 2005, respectively.

We discontinued production at our Cork, Ireland nonwovens facility in July 2004. The closure of the Cork facility resulted in the termination of 89 employees and resulted in total restructuring expenses of \$3,046, of which \$1,239 were recorded in fiscal year 2005.

During fiscal 2003, we initiated the first phase of a restructuring program designed to deliver cost reductions through reduced expenses across our company. The main component of this phase was the partial closure of our Lumberton, North Carolina facility resulting in the consolidation of our U.S. cotton linter pulp production at our Memphis, Tennessee facility and included the elimination of approximately 100 positions within the specialty fibers segment. During the first quarter of fiscal 2004, we entered into a second phase of this restructuring program. As a result of this restructuring, 78 positions were eliminated. These positions included manufacturing, sales, product development and administrative functions throughout the organization. The total cost of the two phases of this program was \$6,174, of which \$10 and \$389 were expensed in fiscal years 2006 and 2005, respectively.

Restructuring expenses are included in “Restructuring costs” in our consolidated statements of income. The additional charges below reflect severance and employee benefits accrued over the retention period, and other miscellaneous expenses which are expensed as incurred. Accrual balances are included in “Accrued expenses” in the consolidated balance sheet. The following table summarizes the expenses and accrual balances by reporting segments for the year ended June 30, 2007.

	Year Ended June 30, 2007				
	Accrual Balance as of June 30, 2006	Additional Charges	Payments	Accrual Balance as of June 30, 2007	Program Charges to Date
2005 Restructuring Program

Less current portion	-	1,294
	\$ 445,138	\$ 519,414

Senior Notes

During September 2003, we placed privately \$200,000 in aggregate principal amount of 8.5% senior notes due October 1, 2013 (the "2013 Notes"). In fiscal year 2004, we exchanged these outstanding notes for public notes with the same terms. The notes are unsecured obligations and are senior to any of our subordinated debt. The notes are guaranteed by our direct and indirect domestic subsidiaries that are also guarantors on our senior secured indebtedness. The senior notes are redeemable at our option, in whole or part, at any time on or after October 1, 2008, at redemption prices varying from 104.25% of principal amount to 100% of principal amount on or after October 1, 2011, together with accrued and unpaid interest to the date of redemption.

Senior Subordinated Notes

During July 1996, we completed a public offering of \$100,000 principal amount of 9.25% unsecured Senior Subordinated Notes due September 15, 2008 (the "2008 Notes"). These notes have been redeemable at our option, in whole or in part, at any time since September 15, 2004, at a redemption price of 100% of principal amount together with accrued and unpaid interest to the date of redemption.

During fiscal year 2007, we redeemed \$5,000 of the 2008 notes. We redeemed \$35,000 of the 2008 notes through fiscal year 2006. As a result of these redemptions, we wrote off a portion of the deferred financing costs and

unamortized discount related to the redeemed bonds. During fiscal years 2007, 2006 and 2005, we recorded non-cash expenses of \$26, \$151 and \$242, respectively related to the early extinguishment of this debt.

During June 1998, we completed a private placement of \$150,000 principal amount of 8% unsecured Senior Subordinated Notes due October 15, 2010. In fiscal 1999, we exchanged these outstanding notes for public notes with the same terms. These notes have been redeemable at our option, in whole or in part, at any time since October 15, 2006, at a redemption price of 100% of principal amount together with accrued and unpaid interest to the date of redemption.

Under the indentures governing our senior subordinated notes, as well as the indenture that governs our senior notes, our ability to incur additional debt is limited. Under these indentures, additional debt must be incurred as so-called “ratio debt” or, alternatively, must be permitted in form and amount as “Permitted Indebtedness.” In order to incur ratio debt, a specified consolidated fixed charge coverage ratio (as defined in the indentures) must equal or exceed 2:1 (measured on a rolling four-quarter basis). Falling below the 2:1 ratio does not breach any covenant or constitute an event of default under any of our debt agreements. Currently, we exceed the required 2:1 ratio and as a result, are not limited to the “ratio debt” restrictions under the indentures governing the senior notes and the senior subordinated notes.

Interest Rate Swap

In May 2001, we entered into an interest rate swap on \$100,000 of 8% fixed rate notes maturing in October 2010. The swap converted interest payments from a fixed rate to a floating rate of LIBOR plus 1.97%. This arrangement qualified as a fair value hedge under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. As such, the net effect from the interest rate swap was recorded as part of interest expense. On October 15, 2003, the swap counter party exercised its right to change the termination date of the swap from October 15, 2010 to October 15, 2003. By exercising this right, the swap counter party paid us \$4,000 as an early termination fee, which is being amortized as a reduction to interest expense through October 15, 2010. At June 30, 2007 and 2006 the unamortized portion of the termination fee was recorded as an increase in debt of \$1,881 and \$2,452, respectively. During the years ended June 30, 2007, 2006 and 2005, the swap reduced our interest expense by \$571, \$572 and \$571, respectively and will continue to reduce interest expense through the original termination date.

Revolving Credit Facility

On July 25, 2007, we established a new \$200,000 senior secured revolving credit facility with a maturity date of July 25, 2012. This facility amends and restates the Company's existing credit facility. Initially, we used the proceeds from this new credit facility to pay the outstanding balance on the former credit facility plus fees and expenses. The interest rate applicable to borrowings under the revolver is the agent's prime rate plus 0.25% to 1.00% or a LIBOR-based rate ranging from LIBOR plus 1.25% to LIBOR plus 2.00%. We plan to use the proceeds from this facility to redeem the remaining \$60,000 of our 2008 notes, to redeem \$20,000 of the 2010 notes in mid-September 2007, and for general corporate purposes. The credit facility is secured by substantially all of our assets located in the United States.

We had \$33,622 outstanding on the term loan portion of our old credit facility at an average variable interest rate of 7.32% as of June 30, 2007.

The new credit facility contains covenants customary for financing of this type. The financial covenants include: maximum total leverage ratio of consolidated total debt to consolidated earnings before interest, taxes, depreciation and amortization (“EBITDA”), and minimum ratio of consolidated EBITDA to consolidated interest expense. During fiscal year 2007, we were in compliance with the financial covenants under the old credit facility.

The new credit facility (taking into account the \$33,622 outstanding on the old term loan) increased borrowing capacity to \$161,383. The new credit facility also contains a \$50,000 increase option. The portion of this capacity that we could borrow on a particular date will depend on our financial results and ability to comply with certain borrowing conditions under the new revolving credit facility. The commitment fee, on the unused portion of the new revolving credit facility, ranges from 0.25% to 0.40% per annum based on a grid related to our leverage ratio. Total costs for the issuance of the new facility were approximately \$1,300 and will be amortized to interest expense using the effective interest method over the life of the facility.

Aggregate maturities of long-term debt for the next five fiscal years and beyond are as follows: 2008-\$0, 2009-\$60,000, 2010-\$0, 2011-\$150,000, 2012-\$0 and thereafter \$233,622. Terms of long-term debt agreements

require compliance with certain covenants including interest coverage ratios, and limitations on restricted payments and levels of indebtedness. At June 30, 2007, the amount available for the payment of dividends and/or the acquisition of treasury stock was limited. Under our most restrictive debt agreements the amount available for the payment of dividends and/or the acquisition of treasury stock will depend on our financial results and ability to comply with certain conditions.

F-18

Other

During fiscal year 2007, we reduced the amount recorded for Stac-Pac™ patents by \$5,000 when we cancelled a contingent note to Stac-Pac™ Technologies Inc. that was issued in conjunction with the acquisition in 2000. As a result of this cancellation, we reversed \$1,867 of accrued interest related to this note.

Total cash interest payments for the years ended June 30, 2007, 2006 and 2005 was \$41,043, \$44,303 and \$44,358, respectively.

We had no off-balance sheet financing except for operating leases as disclosed in Note 9.

NOTE 9: LEASES

Capital Leases

We entered into capital lease agreements for certain airlaid nonwovens plant equipment. As of June 30, 2007, the total cost of the assets covered by these agreements was \$2,566 and the accumulated depreciation on these assets was \$419. At June 30, 2007, our future minimum lease payments, including interest totaling \$62, for these assets were as follows: 2008—\$449 and 2009—\$369. Amortization of assets recorded under capital lease agreements is included in depreciation expense.

Operating Leases

We lease office and warehouse facilities and equipment under various operating leases. Operating lease expense was \$2,684, \$2,940 and \$3,371 during the years ended June 30, 2007, 2006 and 2005, respectively. The commitments under the operating leases at June 30, 2007 were as follows: 2008—\$933; 2009—\$337; 2010—\$119; 2011—\$41 and thereafter—\$0.

NOTE 10: COMMON STOCKHOLDERS' EQUITY

Stock Compensation Plans

Our stock option plans provide for the granting of either incentive or nonqualified stock options to employees and non-employee directors. Options are subject to terms and conditions determined by the Compensation Committee of our Board of Directors, and generally are exercisable in increments of 20% per year beginning one year from date of grant and expire ten years from date of grant. During fiscal year 2006, our employee stock option plans and our director plan expired, and no further options can be granted under these plans.

On June 7, 2005, the Compensation Committee of the Board of Directors of Buckeye Technologies Inc. approved the acceleration of vesting of out-of-the-money options with an exercise price greater than \$8.32 to purchase shares of common stock of Buckeye Technologies Inc. that remained unvested at June 30, 2005. Options to purchase 898,150 shares of common stock were subject to this acceleration (see Note 1).

We use the Black-Scholes option-pricing model to calculate the fair value of options for determining our option related compensation expense which is recognized on a pro-rated straight-line basis over the required service period of the award in the "selling, research and administrative expenses" caption of the consolidated statements of income. The key assumptions for this valuation method include the expected life of the option, stock price volatility, risk-free interest rate, dividend yield and forfeiture rate. Many of these assumptions are judgmental and highly sensitive in the determination of compensation expense. Due to the expiration of the plans, no options were granted in fiscal year 2007. The table below indicates the key assumptions used in the option valuation calculations for options

granted during fiscal years 2006 and 2005 and a discussion of our methodology for developing each of the assumptions used in the valuation model:

	2006	2005
Expected lives	6.3 years	5.9 years
Expected volatility	55%	49%
Risk-free interest rate	4.4%	3.7%
Forfeiture rate	11%	-

Expected Lives - This is the period of time over which the options granted are expected to remain outstanding. Options granted have a maximum term of ten years. An increase in the expected life will increase compensation expense.

Expected Volatility - This is a measure of the amount by which a price has fluctuated or is expected to fluctuate. We use actual changes in the market value of our stock to calculate the volatility assumption. We calculate daily market value changes from the date of grant over a past period representative of the expected life of the options to determine volatility. An increase in the expected volatility will increase compensation expense.

Risk-Free Interest Rate - This is the U.S. Treasury rate for the week of the grant having a term approximating the expected life of the option. An increase in the risk-free interest rate will increase compensation expense.

Dividend Yield - We did not make any dividend payments during the last five fiscal years and we have no plans to pay dividends in the foreseeable future. An increase in the dividend yield will decrease compensation expense.

Forfeiture Rate - This is the estimated percentage of options granted that are expected to be forfeited or canceled before becoming fully vested. An increase in the forfeiture rate will decrease compensation expense. The forfeiture rate is based on our historic forfeiture experience. Prior to the implementation of SFAS 123(R), we accounted for forfeitures when they occurred.

The following table summarizes information about our stock option plans for the years ended June 30:

	2007		2006		2005	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding at beginning of year	4,240,400	\$ 13.34	4,765,150	\$ 13.57	5,046,750	\$ 13.35
Granted at market	-	-	358,000	7.64	100,000	10.57
Exercised	(938,950)	10.61	(73,500)	7.47	(270,800)	8.22
Forfeited	(29,600)	7.62	(4,000)	7.62	(67,600)	11.98
Expired	(266,000)	15.50	(805,250)	12.75	(43,200)	16.93
Outstanding at end of year	3,005,850	\$ 14.06	4,240,400	\$ 13.34	4,765,150	\$ 13.57
Exercisable at end of year	2,807,050	\$ 14.52	3,854,800	\$ 13.91	4,716,350	\$ 13.64

The total intrinsic value of options exercised during fiscal years 2007, 2006 and 2005 was \$3,203, \$108 and \$955, respectively. The fair value of options vested during fiscal years 2007, 2006 and 2005 was \$1,205, \$1 and \$6, respectively. Using the Black-Scholes valuation method calculated under the assumptions indicated above, the weighted-average fair value of the grants at market was \$4.37 and \$5.32 per option in 2006 and 2005, respectively. No options were granted during fiscal year 2007. As of June 30, 2007, the total future compensation cost related to non-vested stock option grants was \$712 over a weighted average period of 3.0 years. The aggregate intrinsic value of vested options outstanding, defined as the excess fair value over the exercise price of the options, at June 30, 2007 was \$2,676.

Since our stock option plans expired during fiscal 2006, there were no options available for grant at June 30, 2007 or June 30, 2006. There were 319,200 shares reserved for grants of options at June 30, 2005. The following summary provides information about stock options outstanding and exercisable at June 30, 2007:

Exercise Price	Options	Outstanding		Exercisable	
		Average Exercise Price	Average Remaining Life (Years)	Options	Average Exercise Price
\$ 6.50-\$12.00	1,257,850	\$ 10.00	5.9	1,059,050	\$ 10.45
\$12.01-\$18.00	1,696,792	16.80	1.0	1,696,792	16.80
\$18.01-\$24.00	51,208	23.04	2.5	51,208	23.04
Total	3,005,850	\$ 14.06	3.1	2,807,050	\$ 14.52

Stock options and restricted stock awards that could potentially dilute basic earnings per share in the future, which were not included in the fully diluted computation because the grant prices were greater than the average market price of common shares for the period, were 1,649,000, 4,411,466 and 4,245,071 for the years ended June 30, 2007, 2006 and 2005, respectively.

Restricted Stock Plan

The following table summarizes information about our restricted stock plan for the years ended June 30:

2007	2006	2005
------	------	------

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-K

	Shares	Weighted-Average Price	Shares	Weighted-Average Price	Shares	Weighted-Average Price
Nonvested at beginning of year	291,610	\$ 8.23	51,440	\$ 12.49	42,998	\$ 12.64
Granted at market	5,398	11.95	240,170	7.31	8,898	11.79
Vested	(34,216)	(12.61)	-	-	(282)	(10.94)
Forfeited	-	-	-	-	(174)	(11.79)
Nonvested at end of year	262,792	\$ 7.73	291,610	\$ 8.23	51,440	\$ 12.49

F-20

In August 1997, the Board of Directors authorized a restricted stock plan and set aside 800,000 treasury shares to fund this plan. At June 30, 2007, 343,924 restricted shares had been awarded since inception of the plan. The weighted-average fair value of restricted stock awards is the closing price of the common stock on the New York Stock Exchange on the date of the grant. Although the restricted stock may be voted by the recipient, the restricted stock may not be sold, pledged or otherwise transferred before the recipient's death or the recipient's retirement from Buckeye. Therefore, the vesting period is from the date of grant to the date each employee reaches age 62 (the retirement age defined in the plan). Based on historic experience, the forfeiture rate used for employees whose vesting period is greater than 10 years is 15% and no forfeiture rate is applied for employees whose vesting period is less than 10 years. As of June 30, 2007, the total future compensation cost related to non-vested restricted stock awards was \$1,265 over a weighted average period of 9.4 years.

Treasury Shares

The Board of Directors has authorized the repurchase of 6,000,000 shares of common stock. Repurchased shares will be held as treasury stock and will be available for general corporate purposes, including the funding of employee benefit and stock-related plans. We have not repurchased any shares of our common stock since fiscal year 2001. A total of 5,009,300 shares have been repurchased through June 30, 2007.

NOTE 11: INCOME TAXES

The components of income (loss) before income taxes were taxed under the following jurisdictions:

	Year Ended June 30		
	2007	2006	2005
Domestic	\$ 42,421	\$ 2,505	\$ 18,881
Foreign	1,417	(1,821)	833
Income before income taxes	\$ 43,838	\$ 684	\$ 19,714

Income tax expense (benefit):

	Year Ended June 30		
	2007	2006	2005
Current tax expense:			
Federal	\$ 827	\$ 435	\$ 503
Foreign	5,915	4,458	185
State and other	52	(120)	41
Current tax expense	6,794	4,773	729
Deferred tax expense (benefit):			
Federal	11,402	(2,133)	7,204
Foreign	(2,057)	(2,048)	(2,724)
State and other	(2,394)	(1,381)	515
Deferred tax expense	6,951	(5,562)	4,995
Noncurrent	(25)	(507)	(6,214)
Income tax expense (benefit)	\$ 13,720	\$ (1,296)	\$ (490)

Noncurrent tax relates primarily to matters not resolved with various taxing authorities.

F-21

The difference between reported income tax expense (benefit) and a tax determined by applying the applicable U.S. federal statutory income tax rate to income before income taxes is reconciled as follows:

	Year Ended June 30					
	2007		2006		2005	
Expected tax expense	\$ 15,343	35.0%	\$ 239	35.0%	\$ 6,900	35.0%
Extraterritorial income exclusion	(425)	(1.0)	(1,542)	(225.4)	(1,034)	(5.2)
Effect of foreign operations	(111)	(0.3)	(681)	(99.6)	(1,851)	(12.9)
Change in tax reserves	(25)	(0.1)	362	52.9	(6,214)	(31.5)
Change in valuation allowances	114	0.3	3,842	561.7	1,145	9.3
Adjustment of prior year provision	(1,535)	(3.5)	(1,711)	(250.1)	-	-
State taxes and other, net	359	0.9	(1,805)	(263.9)	564	2.8
Income tax expense (benefit)	\$ 13,720	31.3%	\$ (1,296)	(189.4)%	\$ (490)	(2.5)%

During fiscal year 2007, we increased our valuation allowance related to deferred tax assets for net operating losses of the Americana, Brazil operations by \$2,482. This was almost entirely offset by a reduction of valuation allowances in the amount of \$2,481 related to certain state net operating losses and tax credits due to tax planning efforts by the company. The increase in our valuation allowance in fiscal year 2006 was primarily due to the allowance for losses of the Americana, Brazil operation.

Effective for transactions occurring after September 30, 2000 the Internal Revenue Service enacted the Extraterritorial Income Exclusion. The income exclusion provides for a reduction of gross income by a percentage of qualifying foreign trade income. In October 2004, the American Jobs Creation Act of 2004 (the Act) was signed into law. In order to comply with international trade rules, the Act repealed the current tax treatment for extraterritorial income. Effective for transactions entered into after December 31, 2004, the extraterritorial income exclusion is subject to a phase-out which was completed on December 31, 2006. For transactions during calendar years 2005 and 2006, the income exclusion was 80% and 60% of the exclusion otherwise allowed, respectively. Our extraterritorial income exclusion benefit was reduced in fiscal 2007 due to this phase-out and was phased-out completely during the second half of fiscal 2007. The Act provides a tax deduction for domestic manufacturers. The deduction will be phased in during fiscal years 2006 through 2010. Due to the company's U.S. net operating loss position, this deduction had no impact to fiscal year 2007 other than a slight reduction to alternative minimum taxes.

Effective June 22, 2006, many of the tax measures introduced in the 2006 Canadian Federal budget were passed into law. Included in the budget was a reduction in the general corporate tax rate to 20.5% for 2008, 20% for 2009, and 19% for 2010 and later years. As a result, the company remeasured its Canadian deferred tax balances based on the reversal pattern of our temporary differences, resulting in a \$791 net tax benefit in fiscal 2006.

During the fourth quarter of fiscal 2005, the IRS completed an audit of our tax return for fiscal year 2002. With the conclusion of this audit, we released the reserve on a tax deduction we claimed relating to our investment in our former facility in Cork, Ireland and recorded a non-cash tax benefit of \$5,481 to our provision for income taxes.

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets (liabilities) are as follows:

	June 30	
	2007	2006
Deferred tax liabilities:		
Property, plant and equipment	\$ (85,838)	\$ (88,606)
Inventory	(2,290)	(884)
Other	(16,874)	(17,108)
Total deferred tax liabilities	(105,002)	(106,598)
Deferred tax assets:		
Postretirement benefits	8,899	7,034
Inventory costs	13	141
Net operating losses	53,733	63,373
Nondeductible reserves	2,204	1,960
Credit carryforwards	11,979	9,810
Other	2,763	2,835
Total deferred tax assets	79,591	85,153
Valuation allowances	(11,720)	(10,065)
Deferred tax assets, net of valuation allowances	67,871	75,088
Net deferred tax liability	\$ (37,131)	\$ (31,510)

The valuation allowances at June 30, 2007 and 2006 relate specifically to net operating losses in certain state and foreign jurisdictions. Based on the future reversal of deferred tax liabilities and the actions management has taken and will continue to take to improve financial performance, management believes it is more likely than not that the net deferred tax assets recorded at June 30, 2007 will be fully utilized after consideration of the valuation allowance recorded.

Taxes paid in fiscal 2007 were \$2,162. Taxes paid net of refunds received resulted in no cash taxes paid for fiscal 2006 and we paid \$3,075 in cash taxes during the year ended June 30, 2005.

At June 30, 2007, foreign net operating loss carryforwards total approximately \$51,710, which have no expiration date, federal and state net operating loss carryforwards total approximately \$85,302 and \$156,608, respectively, and expire between 2018 and 2027. Additionally, at June 30, 2007, we have a minimum tax carryforward of \$8,092 which has an indefinite life and general business credits which will expire between 2021 and 2027.

NOTE 12: EMPLOYEE BENEFIT PLANS

Defined Contribution Plans

We have defined contribution retirement plans covering certain U.S. employees. We contribute 1% of the employee's gross compensation plus 1/2% for each year of service up to a maximum of 11% of the employee's gross compensation. During fiscal 2005 we implemented an additional retirement plan for U.S. employees. We match employees' voluntary contributions to their retirement accounts up to the lesser of \$2,000 per year or 2% of their eligible gross earnings. Contribution expense for the retirement plans for the years ended June 30, 2007, 2006 and 2005 was \$7,388, \$7,153 and \$6,743, respectively.

Postretirement Healthcare Plans

We also provide medical, dental, and life insurance postretirement plans covering certain U.S. employees who meet specified age and service requirements. Certain employees who met specified age and service requirements on March 15, 1993 are covered by their previous employer and are not covered by these plans. Our current policy is to fund the cost of these benefits as payments to participants are required. We have established cost maximums to more effectively control future medical costs. Effective July 1, 2002, we amended our postretirement medical plan to, among other things, reduce the level of cost maximums per eligible employee. Effective January 1, 2006, Medicare eligible retirees age 65 or older will not continue coverage under the self-funded plan. Instead they are provided a subsidy towards the purchase of supplemental insurance. This amendment reduced the accumulated postretirement benefit obligation by \$4,089. The benefit obligation reduction is being amortized over 7.75 years.

Effective for fiscal year 2007, we adopted the disclosure provisions of SFAS No. 158. SFAS No. 158 requires that the funded status of defined-benefit postretirement plans be recognized in our consolidated balance sheet, with a corresponding adjustment to accumulated other comprehensive income, net of tax. The adjustment to accumulated other comprehensive income at adoption represents the net unrecognized actuarial losses, unrecognized prior service costs, and unrecognized transition obligation remaining from the initial adoption of SFAS No. 106, all of which were previously netted against the plan's funded status in our consolidated balance sheet pursuant to the provisions of SFAS No. 106. These amounts will be subsequently recognized as net periodic benefit cost. Actuarial gains and losses that arise in subsequent periods and are not recognized as net periodic benefit cost in the same periods will be recognized as a component of other comprehensive income. Those amounts will be subsequently recognized as a component of net periodic benefit cost on the same basis as the amounts recognized in accumulated other comprehensive income at adoption of SFAS No. 158. SFAS No. 158 also requires the measurement date of the plan's funded status to be the same as our fiscal year end. However, the measurement date provision is not required to be adopted until fiscal year 2009.

The adoption of the disclosure provisions of SFAS No. 158 resulted in an increase in accrued postretirement benefits of \$4,817, an increase in deferred tax assets of \$1,782 and a decrease in accumulated other comprehensive income of \$3,035. The adoption of SFAS No. 158 had no effect on our consolidated statement of income for the year ended June 30, 2007 or for any prior period presented, and it will not affect our operating results in future periods.

The components of net periodic benefit costs are as follows:

	Year Ended June 30		
	2007	2006	2005
Service cost for benefits earned	\$ 598	\$ 629	\$ 703
Interest cost on benefit obligation	1,408	1,258	1,432
Amortization of prior service cost	(1,002)	(1,055)	(1,125)
Amortization of actuarial loss	567	597	389
Total cost	\$ 1,571	\$ 1,429	\$ 1,399

The following table provides a reconciliation of the changes in the plans' benefit obligations over the two-year period ending June 30, 2007, and a statement of the plans' funded status as of June 30, 2007 and 2006:

	June 30	
	2007	2006
Change in benefit obligation:		
Obligation at beginning of year	\$ 22,459	\$ 22,567
Service cost	598	629
Interest cost	1,408	1,258
Participant contributions	565	328
Actuarial loss (gain)	1,289	(703)
Benefits paid	(1,755)	(1,620)
Obligation at end of year	24,564	22,459
Change in plan assets:		
Fair value of plan assets at beginning of year	-	-
Employer contributions	1,190	1,292
Plan participant contributions	565	328
Benefits paid	(1,755)	(1,620)
Fair value of plan assets at end of year	-	-
Funded status at end of year	(24,564)	(22,459)

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-K

Unrecognized prior service credit	-	(5,550)
Unrecognized loss	-	8,642
Other	(1,687)	(1,536)
Accrued post retirement benefit obligation	(26,251)	(20,903)
Less current portion included in accrued expenses	1,742	1,536
Noncurrent obligation recognized in the consolidated balance sheet	\$ (24,509)	\$ (19,367)

F-24

As a result of the adoption of SFAS No. 158 on June 30, 2007, the accrued benefit obligation recorded on the consolidated balance sheet at June 30, 2007 reflects the accumulated benefit obligation less any portion that is currently funded. The accumulated actuarial loss and prior service cost that had not yet been reflected in the net periodic benefit costs were included in accumulated other comprehensive income at June 30, 2007, as follows:

Prior service credit	\$ 4,548
Accumulated actuarial loss	(9,365)
Decrease in accumulated other comprehensive income due to SFAS No. 158	(4,817)
Tax effect	1,782
Decrease in accumulated other comprehensive income due to SFAS No. 158, net of tax	\$ (3,035)

The prior service credit and accumulated actuarial loss included in other comprehensive income and expected to be recognized in net periodic benefit cost during the fiscal year ended June 30, 2008 is \$(1,002), \$(628) net of tax) and \$583 (\$366 net of tax), respectively.

Expected annual benefit payments net of retiree contributions are as follows: 2008 - \$1,742; 2009 - \$1,783; 2010 - \$1,782; 2011 - \$1,805, 2012 - \$1,802 and 2013 to 2017 - \$9,853.

The weighted average assumptions used to determine benefit obligations were as follows:

	2007	2006
Discount rate	5.90%	6.25%
Measurement date	April 30, 2007	April 30, 2006

The weighted average assumptions used to determine net periodic benefit cost were as follows:

	2007	2006	2005
Discount rate	6.25%	5.75%	6.50%
Measurement date	April 30, 2006	April 30, 2005	April 30, 2004

The weighted average annual assumed rate of increase in the per capita cost of covered benefits (i.e. health care cost trend rate) for the medical plans is 9.0% and 10.0% for 2007 and 2006, respectively. The rate is assumed to decline gradually to 5.0% in 2011 and remain level thereafter. The effect of the health care cost trend rate diminishes as the net employer cost approaches the net employer cost cap, hence; for the fiscal years ending June 30, 2007 and 2006, the health care cost trend rate assumption does not have a significant effect on the amounts reported.

We use currently available high quality long-term corporate bond indices to determine the appropriate discount rate. Due to the long-term nature of these indexes, they have a similar maturity to expected benefit payments.

The Medicare Modernization Act provided prescription drug benefits to Medicare eligible participants effective January 1, 2006. Since our plan only provides a subsidy toward supplemental Medicare insurance coverage, there is no impact on our plan as a result of the Medicare Modernization Act.

NOTE 13: SIGNIFICANT CUSTOMER

Net sales to The Procter & Gamble Company and its affiliates for the years ended June 30, 2007, 2006 and 2005 were 12%, 13% and 14%, respectively, of total net sales. Nonwoven materials accounted for 62%, 60% and 56% of these sales in fiscal years 2007, 2006 and 2005, respectively. The remainder of these sales were derived from the specialty

fiber segment.

F-25

NOTE 14: SEGMENT INFORMATION

We report results for two segments, specialty fibers and nonwoven materials. The specialty fiber segment is an aggregation of cellulosic fibers based on both wood and cotton. Management makes financial decisions and allocates resources based on the sales and operating income of each segment. We allocate selling, research, and administration expenses to each segment and management uses the resulting operating income to measure the performance of the segments. The financial information attributed to these segments is included in the following table:

		Specialty Fibers	Nonwoven Materials	Corporate	Total
Net sales	2007 \$	543,831 \$	258,843 \$	(33,353) \$	769,321
	2006	515,855	240,873	(28,243)	728,485
	2005	513,588	226,492	(27,298)	712,782
Operating income (loss)	2007	63,671	21,233	(3,693)	81,211
	2006	35,842	15,919	(7,341)	44,420
	2005	64,148	12,963	(19,510)	57,601
Depreciation and amortization of intangibles	2007	31,770	16,047	3,775	51,592
	2006	29,945	15,835	3,398	49,178
	2005	28,159	16,904	3,388	48,451
Total assets	2007	479,121	270,168	202,533	951,822
	2006	472,559	276,589	199,065	948,213
	2005	467,736	285,338	196,663	949,737
Capital expenditures	2007	36,614	4,316	4,270	45,200
	2006	42,410	1,939	1,242	45,591
	2005	39,356	3,690	2,283	45,329

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Management evaluates operating performance of the specialty fibers and nonwoven materials segments, excluding amortization of intangibles, the impact of impairment of long-lived assets and charges related to restructuring. Therefore, the corporate segment includes operating elements such as segment eliminations, amortization of intangibles, impairment of long-lived assets and charges related to restructuring. Corporate net sales represents the elimination of intersegment sales included in the specialty fibers reporting segment. We account for intersegment sales as if the sales were to third parties, that is, at current market prices. Certain partially impaired assets are included in the total assets for the reporting segments, but the associated asset impairment charges are included in the corporate category. These asset impairment charges and the segments they relate to are discussed further in Note 3. Corporate assets primarily include cash, goodwill and intellectual property.

Our identifiable product lines are chemical cellulose, customized fibers, fluff pulp and nonwoven materials. Chemical cellulose is used to impart purity, strength and viscosity in the manufacture of diverse products such as food casings, cigarette filters, rayon filament, acetate fibers, thickeners for consumer products, cosmetics and pharmaceuticals. Customized fibers are used to provide porosity, color permanence, strength and tear resistance in filters, premium letterhead, currency paper and personal stationery as well as absorbency and softness in cotton balls and cotton swabs. Fluff pulp and nonwoven materials are used to increase absorbency and fluid transport in products such as disposable diapers, feminine hygiene products and adult incontinence products. Additionally, nonwoven materials are used to enhance fluid management and strength in wipes, tabletop items, food pads, household wipes and mops. The following provides relative net sales to unaffiliated customers by product line:

	Year Ended June 30		
	2007	2006	2005
Chemical cellulose	33%	32%	32%

Edgar Filing: BUCKEYE TECHNOLOGIES INC - Form 10-K

Customized fibers	16%	17%	18%
Fluff pulp	18%	18%	18%
Nonwoven materials	33%	33%	32%
	100%	100%	100%

F-26

We are domiciled in the United States and have manufacturing operations in the United States, Canada, Germany and Brazil. The following provides a summary of net sales to unaffiliated customers, based on point of origin, long-lived assets by geographic areas and net sales by point of destination:

Net sales by point of origin:	Year Ended June 30					
	2007		2006		2005	
United States	\$ 578,047	75%	\$ 539,233	74%	\$ 503,367	71%
Germany	104,031	14	120,970	17	133,088	19
Other	87,243	11	68,282	9	76,327	10
Total	\$ 769,321	100%	\$ 728,485	100%	\$ 712,782	100%

Net sales by point of destination:	Year Ended June 30					
	2007		2006		2005	
North America	\$ 332,825	43%	\$ 302,527	42%	\$ 299,192	42%
Europe	288,754	38	274,157	38	271,806	38
Asia	71,967	9	76,851	10	70,390	10
South America	28,072	4	25,865	4	29,091	4
Other	47,703	6	49,085	6	42,303	6
Total	\$ 769,321	100%	\$ 728,485	100%	\$ 712,782	100%

Long-lived assets by geographical area:	As of June 30		
	2007	2006	2005
United States	\$ 458,421	\$ 464,637	\$ 482,113
Canada	137,911	134,102	125,099
Germany	53,596	54,658	59,294
Brazil	73,970	66,195	36,633
Other	40	89	94
Total long-lived assets	\$ 723,938	\$ 719,681	\$ 703,233

NOTE 15: RESEARCH AND DEVELOPMENT EXPENSES

Research and development costs of \$8,316, \$9,182 and \$8,785 were charged to expense as incurred for the years ended June 30, 2007, 2006 and 2005, respectively.

NOTE 16: COMMITMENTS

We have significant purchase contracts for both timber and energy under separate agreements expiring at various dates through fiscal year 2014. Under two separate timber contracts we are required to purchase certain timber from specified tracts of land that is available for harvest. The energy contract is for our Americana, Brazil operation and requires us to purchase a minimum amount of contracted energy each year. The contract prices under the terms of the timber agreements are fixed annually based on market prices and the contract prices under the energy contract are adjusted annually based on inflation indices. At June 30, 2007, total estimated annual purchase obligations for those agreements noted above were as follows: 2008—\$13,700; 2009—\$14,700; 2010—\$15,200; 2011—\$8,800; 2012—\$2,300; thereafter—\$3,400. Purchases under these agreements for the years ended June 30, 2007, 2006 and 2005 were \$11,988; \$12,978 and \$13,672, respectively.

NOTE 17: CONTINGENCIES

Our operations are subject to extensive general and industry-specific federal, state, local and foreign environmental laws and regulations. We devote significant resources to maintaining compliance with these laws and regulations. We expect that, due to the nature of our operations, we will be subject to increasingly stringent environmental requirements (including standards applicable to wastewater discharges and air emissions) and will continue to incur substantial costs to comply with these requirements. Because it is difficult to predict the scope of future requirements, there can be no assurance that we will not incur material environmental compliance costs or liabilities in the future.

The Foley Plant, located in Perry, Florida, discharges treated wastewater into the Fenholloway River. Under the terms of an agreement with the Florida Department of Environmental Protection (“FDEP”), approved by the U. S. Environmental Protection Agency (“the EPA”) in 1995, we agreed to a comprehensive plan to attain Class III (“fishable/swimmable”) status for the Fenholloway River under applicable Florida law (the “Fenholloway Agreement”). The Fenholloway Agreement requires us, among other things, to (i) make process changes within the Foley Plant to reduce the coloration of its wastewater discharge, (ii) restore certain wetlands areas, (iii) relocate the wastewater discharge point into the Fenholloway River to a point closer to the mouth of the river, and (iv) provide oxygen enrichment to the treated wastewater prior to discharge at the new location. We have completed the process changes within the Foley Plant as required by the Fenholloway Agreement. In making these in-plant process changes, we incurred significant expenditures, and, as discussed in the following paragraph, we expect to incur significant additional capital expenditures to comply with the remaining obligations under the Fenholloway Agreement.

The EPA objected to the draft National Pollutant Discharge Elimination System (NPDES) permit prepared in connection with the Fenholloway Agreement and requested additional environmental studies to identify possible alternatives to the relocation of the wastewater discharge point. The studies' focus was to determine if more cost effective technologies are available to address both Class III water quality standards for the Fenholloway River and the anticipated EPA "cluster rules" applicable to wastewater discharges from dissolving kraft pulp mills, like the Foley Plant. While these studies were being conducted, implementation of the non in-plant process changes required by the Fenholloway Agreement was deferred. The studies have been completed, and the EPA provided comments to FDEP on the steps that would be required to overcome the EPA's objections to the draft NPDES permit. In August 2005 FDEP redrafted the Buckeye NPDES permit to address the EPA's comments, and has completed the required public review and comment process. The formal Notice of Intent to Issue Permit was issued in November 2005, without EPA objection. The proposed permit was subsequently challenged by some members of the public and an administrative hearing to address the issues was subsequently scheduled for April 2007. The April 2007 administrative hearing was continued and has yet to be rescheduled. In the interim, Buckeye has been working with the agencies to correct some technical errors in the proposed permit. The proposed permit recognizes that the in-plant process changes already completed and the additional process changes planned as part of the draft NPDES permit will satisfy the EPA's cluster rule requirements applicable to dissolving kraft pulp mills. Based on the requirements of the proposed permit, we expect to incur capital expenditures of approximately \$10,000 over the next four years (beginning fiscal year 2008) on in-plant process changes, and additional capital expenditures of approximately \$50,000 over at least five years, possibly beginning as early as fiscal year 2012. The amount and timing of these capital expenditures may vary depending on a number of factors including when the permit is issued and whether the upcoming hearing results in changes to the proposed permit. A proposed permit condition requiring certain studies could result in additional treatment costs beyond these expected under the draft permit.

The EPA and FDEP have listed the Fenholloway River as an impaired water (not meeting all applicable water quality standards) under the Clean Water Act for certain pollutants. The permitting proceedings discussed above are expected to address these water-quality issues.

The Foley Plant is also subject to FDEP and EPA air emission standards. The EPA had recently adopted new boiler air emission regulations that are applicable to the Foley Plant and plans had been developed to comply with these regulations. However, these regulations have now been vacated and the impact of the anticipated revision of these regulations is not yet known.

We are involved in certain legal actions and claims arising in the ordinary course of business. It is the opinion of management that such litigation and claims will be resolved without a materially adverse effect on our financial statements as a whole.

NOTE 18: FAIR VALUES OF FINANCIAL INSTRUMENTS

For certain of our financial instruments, including cash and cash equivalents, short-term investments, accounts receivable and accounts payable, the carrying amounts approximate fair value due to their short maturities. The fair value of our long-term public debt is based on an average of the bid and offer prices. The fair value of the credit facilities approximates its carrying value due to its variable interest rate. The carrying value and fair value of long-term debt and capital leases at June 30, 2007 were \$445,893 and \$450,833, respectively and at June 30, 2006 were \$522,090 and \$497,256, respectively.

NOTE 19: QUARTERLY RESULTS OF OPERATIONS (UNAUDITED)

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
<i>Year ended June 30, 2007</i>				
Net sales	\$ 191,406	\$ 184,730	\$ 193,009	\$ 200,176

(1) During the fourth quarter of fiscal 2007, we incurred a pretax benefit of \$2,000 (\$1,274 after tax) from a water partnership payment, \$1,867 (\$1,171 after tax) from reversal of accrued interest related to cancellation of a contingent note, and a \$2,481 tax benefit from adjustments related to state valuation allowances and credits.

NOTE 20: SUBSEQUENT EVENTS

We announced on August 17, 2007 our intention to call for redemption prior to their maturity \$60,000 in aggregate principal amount of our outstanding 9 ¼% Senior Subordinated Notes due 2008 (the "2008 Notes") and will redeem on September 17, 2007, in accordance with their terms. Upon completion of this redemption, none of the 2008 Notes will remain outstanding. A formal notice of redemption has been sent separately to the affected holders of the 2008 Notes, in accordance with the terms of the indenture for the 2008 Notes. We plan to finance this redemption using our new revolving credit facility.

We announced on August 28, 2007 our intention to call for redemption prior to their maturity \$20,000 in aggregate principal amount of our outstanding 8% Senior Subordinated Notes due 2010 (the "2010 Notes") and will redeem on September 24, 2007, in accordance with their terms. Upon completion of this redemption, \$130,000 of the 2010 Notes will remain outstanding. A formal notice of redemption has been sent separately to the affected holders of the 2010 Notes, in accordance with the terms of the indenture for the 2010 Notes. We plan to finance this redemption using our new revolving credit facility.

NOTE 21: CONDENSED CONSOLIDATING FINANCIAL STATEMENTS

The guarantor subsidiaries presented below represent our subsidiaries that are subject to the terms and conditions outlined in the indenture governing the senior notes and that guarantee the notes, jointly and severally, on a senior unsecured basis. The non-guarantor subsidiaries presented below represent the foreign subsidiaries which do not guarantee the senior notes. Each subsidiary guarantor is 100% owned directly or indirectly by Buckeye Technologies

Inc. and all guarantees are full and unconditional.

Supplemental financial information for Buckeye Technologies Inc. and our guarantor subsidiaries and non-guarantor subsidiaries for the senior notes is presented in the following tables.
