EFC BANCORP, INC.
Notes to Consolidated Financial Statements

Note 1: BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of EFC Bancorp, Inc. (the Company) and its wholly-owned subsidiary, Elgin Financial Savings Bank (the Bank) and its wholly-owned subsidiary, Fox Valley Service Corp. Certain amounts for the prior year have been reclassified to conform to the current year presentation.

In the opinion of the management of the Company, the accompanying consolidated financial statements include all normal recurring adjustments necessary for a fair presentation of the financial position and results of operations for the periods presented. All significant intercompany transactions have been eliminated in consolidation. These interim financial statements have been prepared according to the rules and regulations of the Securities and Exchange Commission and therefore certain information and footnote disclosures normally included in financial statements presented in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year. It is suggested that the accompanying unaudited consolidated financial statements be read in conjunction with the Company's 2000 Annual Report on Form 10-K. Currently, other than investing in various securities, the Company does not directly transact any material business other than through the Bank. Accordingly, the discussion herein addresses the operations of the Company as they are conducted through the Bank.

Note 2: COMPREHENSIVE INCOME

The Company's comprehensive income for the three month periods ended March 31, 2001 and 2000 are as follows:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following analysis discusses changes in the financial condition at March 31, 2001 and results of operations for the three months ended March 31, 2001, and should be read in conjunction with the Company's Unaudited Consolidated Financial Statements and the notes thereto, appearing in Part I, Item 1 of this document.

Forward-Looking Statements

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Company, are generally identified by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project," or similar expressions. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and the subsidiaries include, but are not limited to, changes in: interest rates, general economic conditions, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area and accounting principles and guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Company and its business, including additional factors that could materially affect the Company's financial results, is included in the Company's filings with the SEC, including its 2000 Annual Report on Form 10-K.

The Company does not undertake and specifically disclaims any obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Comparison of Financial Condition at March 31, 2001 and December 31, 2000

Total assets at March 31, 2001 were \$601.6 million, which represented an increase of \$18.4 million, or 3.2%, compared to \$583.2 million at December 31, 2000. The increase in total assets was primarily as a result of an increase in loans receivable of \$12.7 million, or 2.8%, to \$472.5 million at March 31, 2001 from \$459.8 million at December 31, 2000. Of the \$12.7 million increase, \$7.1 million represents loans purchased. The increase in loans receivable was primarily attributable to strong loan demand during the period. The growth in total assets was funded by increases in borrowed money and deposits. Borrowed money, representing FHLB advances, increased by \$10.0 million to \$150.2 million at March 31, 2001 from \$140.2 million at December 31, 2000. Deposits increased \$4.8 million to \$374.3 million at March 31, 2001 from \$369.5 million at December 31, 2000. Stockholders' equity increased by \$376,000 to \$67.7 million at March 31, 2001 from \$67.3 million at December 31, 2000. The increase in stockholders' equity was primarily the result of the Company's net income during the period and a \$591,000 increase in the Company's accumulated other comprehensive income relating to its available-for-sale investment portfolio, offset by stock repurchases and dividends paid.

Comparison of Operating Results For the Three Months Ended March 31, 2001 and 2000

General. The Company's net income decreased \$61,000, to \$902,000 for the three months ended March 31, 2001, from \$963,000 for the three months ended March 31, 2000.

Interest Income. Interest income increased \$1.5 million, or 16.3%, to \$10.7 million for the three months ended March 31, 2001, compared with \$9.2 million for the same period in 2000. The increase in interest income was primarily due to an increase in average interest-earning assets, which increased by \$79.6 million, or 15.9%, to \$580.5 million for the three months ended March 31, 2001 from \$500.9 million for the comparable period in 2000, and an increase in the average yield on interest-earning assets by 2 basis points to 7.36% for the three months ended March 31, 2001 from 7.34% for the three months ended March 31, 2000.

Mortgage loan interest income increased by \$1.0 million for the three months ended March 31, 2001 compared with the same period in 2000. The average balance of mortgage loans increased \$44.3 million, while the loan yield increased by 18 basis points from 7.42% to 7.60%. Interest income from investment securities, mortgage-backed securities and short term deposits increased by \$116,000 for the three months ended March 31, 2001, compared with the same period in 2000. This increase resulted from a combination of an increase in average balance of \$17.4 million and offset by a 65 basis point decrease in yield.

Interest Expense. Interest expense increased by \$1.4 million, or 27.0%, to \$6.5 million for the three months ended March 31, 2001 from \$5.1 million for the three months ended March 31, 2000. This increase resulted from the combination of an increase in the average balance of interest-bearing liabilities, and an overall increase in the average rate paid on those interest-bearing liabilities. The average balance of interest-bearing liabilities increased by \$75.0 million, or 17.4%, to \$505.3 million at March 31, 2001 from \$430.3 million at March 31, 2000. This change reflects a \$27.7 million increase in the deposit accounts, with the remaining \$47.3 million increase attributable to advances from the FHLB-Chicago. The average rate paid on combined deposits and borrowed money increased by 39 basis points to 5.14% for the three months ended March 31, 2001 from 4.75% for the three months ended March 31, 2000.

Net Interest Income Before Provision for Loan Losses. Net interest income before provision for loan losses increased \$117,000, or 2.9%, to \$4.2 million for the three months ended March 31, 2001 from \$4.1 million for the comparable period in 2000. The net interest margin as a percent of interest-earning assets decreased by 37 basis points to 2.89% for the three months ended March 31, 2001 from 3.26% for the comparable period in 2000.

Provision for Loan Losses. The provision for loan losses increased by \$30,000, to \$90,000 for the three months ended March 31, 2001 from \$60,000 in 2000. At March 31, 2001, December 31, 2000 and March 31, 2000, non-performing loans totaled \$5.0 million, \$4.5 million and \$1.0 million, respectively. At March 31, 2001, the ratio of the allowance for loan losses to non-performing loans was 39.8% compared to 41.5% at December 31, 2000 and 154.2% at March 31, 2000. The ratio of the allowance to total loans was 0.42%, 0.41% and 0.39%, at March 31, 2001, December 31, 2000 and March 31, 2000, respectively. There were no charge-offs for the three months ended March 31, 2001 and 2000. Management periodically calculates an allowance sufficiency analysis based upon the portfolio composition, asset classifications, loan-to-value ratios, potential impairments in the loan portfolio, and other factors.

Noninterest Income. Noninterest income totaled \$342,000 and \$266,000 for the three months ended March 31, 2001 and 2000, respectively. The increase in noninterest income is primarily attributable to an increase in insurance and brokerage commission income of \$60,000 and an increase in service fees of \$20,000.

Noninterest Expense. Noninterest expense increased \$224,000, to \$3.0 million for the three months ended March 31, 2001 from \$2.8 million for the comparable period in 2000. Compensation and benefits increased by \$157,000. This increase was primarily due to a combination of annual salary increases, the addition of staff and increases in employee health insurance costs. The additional staff expenses are primarily attributed to the opening of the Bank's new East Dundee, Illinois branch and the hiring of marketing and human resource personnel. All other operating expenses, including advertising, marketing, postage, communications, data processing and other office expense increased by a combined \$68,000, or 5.3%, to \$1.4 million for the three months ended March 31, 2001 from \$1.3 million for the three months ended March 31, 2000. Management continues to emphasize the importance of expense management and control while continuing to provide expanded banking services to a growing market base.

Income Tax Expense. Income tax expense totaled \$505,000 for the three months ended March 31, 2001 and 2000. The effective tax rate was 35.9% and 34.4% for the three months ended March 31, 2001 and 2000, respectively.

Liquidity and Capital Resources

The Bank's primary sources of funds are savings deposits, proceeds from the principal and interest payments on loans and proceeds from the maturity of securities and borrowings from the FHLB-Chicago. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit outflows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition.

The primary investing activities of the Bank are the origination of residential one-to-four-family loans and, to a lesser extent multi-family and commercial real estate, construction and land, commercial and consumer loans and the purchase of mortgage-backed and mortgage-related securities. In addition, the Bank purchases loans, consisting of single-family, multi-family and commercial real estate. Deposit flows are affected by the level of interest rates, the interest rates and products offered by the local competitors, the Bank and other factors.

The Bank's most liquid assets are cash and interest-bearing demand accounts. The levels of these assets are dependent on the Bank's operating, financing, lending and investing activities during any given period. At March 31, 2001, cash and interest-bearing demand accounts totaled \$36.7 million, or 6.1% of total assets.

See the "Consolidated Statements of Cash Flows" in the Unaudited Consolidated Financial Statements included in this Form 10-Q for the sources and uses of cash flows for operating, investing and financing activities for the three months ended March 31, 2001 and 2000.

At March 31, 2001, the Bank exceeded all of its regulatory capital requirements. The following is a summary of the Bank's regulatory capital ratios at March 31, 2001:

Total Capital to Total Assets	10.42%
Total Capital to Risk-Weighted Assets	16.30%
Tier I Leverage Ratio	10.34%
Tier I to Risk-Weighted Assets	16.16%

At March 31, 2001, the Company had a Total Capital to Total Assets ratio of 11.25%.

On February 21, 2001, the Company announced its first quarter dividend of \$0.1225 per share. The dividend was paid on April 10, 2001 to stockholders of record on March 30, 2001.

Recent Accounting Pronouncements

The Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," in June 1998. SFAS No. 133 standardizes the accounting for derivative instruments, including certain derivative instruments embedded in other contracts. During June, 1999, the FASB issued Statement of Financial Accounting Standards No. 137, "Accounting for Derivative Instruments and Hedging Activities-Deferral of the Effective Date of FASB Statement No. 133 an amendment of FASB Statement No. 133," ("SFAS 137") that delayed SFAS 133 until fiscal years beginning after June 15, 2000. The FASB issued Statement No. 138, "Accounting for Certain Derivative Instruments and Certain Hedging Activities an amendment of FASB Statement No. 133" in June, 2000, which addresses various implementation issues relating to SFAS No. 133. The adoption of SFAS No. 133 in January 2001 did not have a material impact on the Company's results of operations or financial condition.

"SFAS" No. 140 "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", was issued by the "FASB" in September 2000. SFAS No. 140 supercedes and replaces FASB SFAS No. 125, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities". Accordingly, SFAS No. 140 is now the authoritative accounting literature for transfers and servicing of financial assets and extinguishments of liabilities. SFAS No. 140 also includes several additional disclosure requirements in the area of securitized financial assets and collateral arrangements. The provisions of SFAS No. 140 related to transfers of financial assets are to be applied to all transfers of assets occurring after March 31, 2001. The collateral recognition and disclosure provisions in SFAS No. 140 were effective for fiscal years ending December 31, 2000. The Company anticipates that the adoption of SFAS No. 140 will not have a material impact on the Company's results of operations or financial condition.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The Bank's interest rate sensitivity is monitored by management through the use of a Net Portfolio Value Model which generates estimates of the change in the Bank's net portfolio value ("NPV") over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. The NPV ratio, under any interest rate scenario, is defined as the NPV in that scenario divided by the market value of assets in the same scenario. The model assumes estimated prepayment rates, reinvestment rates and deposit decay rates. The Sensitivity Measure is the decline in the NPV ratio, in basis points, caused by a 2% increase or decrease in rates, whichever produces a larger decline. The higher the institution's Sensitivity Ratio, the greater its exposure to interest rate risk is considered to be. The following NPV Table sets forth the Bank's NPV as of March 31, 2001.

(In thousands)

Change in Interest Rates in Basis Points (Rate Shock)	Net Portfolio Value			NPV as % of Portfolio Value of Assets	
	Amount	\$ Change	% Change	NPV Ratio	% Change

Certain shortcomings are inherent in the methodology used in the above interest rate risk measurements. Modeling changes in NPV require the making of certain assumptions which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the NPV Table presented assumes that the composition of the Bank's interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the NPV Table provides an indication of the Bank's interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on the Bank's net interest income and may differ from actual results.
