DIANA SHIPPING INC. REPORTS FINANCIAL RESULTS  
FOR THE FIRST QUARTER ENDED MARCH 31, 2008

DECLARES CASH DIVIDEND OF \$0.85 PER SHARE  
FOR THE FIRST QUARTER

ATHENS, GREECE, May 14, 2008 – Diana Shipping Inc. (NYSE: DSX), a global shipping transportation company specializing in dry bulk cargoes, today reported net income of \$53.2 million for the first quarter of 2008. This compared to net income of \$21.4 million reported in the first quarter of 2007.

Voyage and time charter revenues were \$78.9 million for the first quarter of 2008, compared to \$38.5 million for the same period of 2007, due to an increase in prevailing time charter rates and the increase in operating days due to the enlargement of the Company's fleet.

Dividend Declaration

The Company has declared a cash dividend on its common stock of \$0.85 per share, based on its results of operations during the first quarter ended March 31, 2008. The cash dividend will be payable on or about June 5, 2008 to shareholders of record as of May 28, 2008. The Company has 74.4 million shares of common stock outstanding.

Chairman and Chief Executive Officer's Comments

"This is certainly our strongest quarter ever and we believe that results for the remainder of the year will be equally strong, based on the fact that we have already secured \$241 million to \$247 million in revenues for the 95% to 97% of the operating days remaining for the year 2008. It should be noted that for the entire same period last year the gross revenues were \$152 million. Our shareholders are being rewarded through the dividends for actively participating in the dry bulk industry today. Our latest dividend declaration of \$0.85 per share is confirmation of the present favourable market conditions, but more importantly we believe that it also reflects the outcome of our prudent vessel acquisition and chartering strategy," said Simeon Palios, Chairman and Chief Executive Officer of Diana Shipping.

(1) Time charter equivalent rates, or TCE rates, are defined as our voyage and time charter revenues less voyage expenses during a period divided by the number of our available days during the period, which is consistent with industry standards. Voyage expenses include port charges, bunker (fuel) expenses, canal charges and commissions. TCE rate is a standard shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charter hire rates for vessels on voyage charters are generally not expressed in per day amounts while charter hire rates for vessels on time charters are generally expressed in such amounts.

(2) Daily vessel operating expenses, which include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses, are calculated by dividing vessel operating expenses by ownership days for the relevant period.
