SEMI-ANNUAL REPORT

A Letter to Shareholders

THIS PAGE NOT PART OF YOUR FUND REPORT

Dear Shareholder

Over the past several months, financial markets have been buffeted by the housing recession, the credit market unraveling and related liquidity freeze and steadily rising commodity prices. Counterbalancing these difficulties were booming export activity, a robust non-financial corporate sector and, notably, aggressive and timely monetary and fiscal policy actions.

Amid the market tumult, the Federal Reserve Board (the Fed) intervened with a series of moves to bolster liquidity and ensure financial market stability. Since September 2007, the central bank slashed the target federal funds rate 325 basis points (3.25%), bringing the rate to 2.0% as of period-end. Of greater magnitude, however, were the Fed s other policy decisions, which included opening the discount window directly to broker dealers and investment banks and backstopping the unprecedented rescue of Bear Stearns.

The Fed s response to the financial crisis helped to improve credit conditions and investor mood. After hitting a low point on March 17 (coinciding with the collapse of Bear Stearns), equity markets found a welcome respite in April, when the S&P 500 Index of U.S. stocks posted positive monthly performance for the first time since October 2007. International markets, which outpaced those of the U.S. for much of 2007, saw a reversal in that trend, as effects of the credit crisis and downward pressures on growth were far-reaching.

In contrast to equity markets, Treasury securities rallied (yields fell as prices correspondingly rose), as a broad flight-to quality theme persisted. The yield on 10-year Treasury issues, which touched 5.30% in June 2007 (its highest level in five years), fell to 4.04% by year-end and to 3.77% by April 30. Treasury issues relinquished some of their gains in April, however, as investor appetite for risk returned and other high-quality fixed income sectors outperformed.

Problems within the monoline insurance industry and the failure of auctions for auction rate securities plagued the municipal bond market, driving yields higher and prices lower across the curve. However, in conjunction with the more recent shift in sentiment, the sector delivered strong performance in the final month of the reporting period.

Overall, the major benchmark indexes generated results that generally reflected heightened investor risk aversion:

Total Returns as of April 30, 2008	6-month	12-month
U.S. equities (S&P 500 Index)	(9.64)%	(4.68)%
Small cap U.S. equities (Russell 2000 Index)	(12.92)	(10.96)
International equities (MSCI Europe, Australasia, Far East Index)	(9.21)	(1.78)
Fixed income (Lehman Brothers U.S. Aggregate Index)	4.08	6.87
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	1.47	2.79
High yield bonds (Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index)	(0.73)	(0.80)

Past performance is no guarantee of future results. Index performance shown for illustrative purposes only.

BlackRock Dividend Achievers[™] Trust

Investment Objective

BlackRock Dividend Achievers[™] Trust (BDV) seeks to provide total return through a combination of current income and capital appreciation by investing in common stocks that pay above average dividends and have the potential for capital appreciation.

Performance

For the six months ended April 30, 2008, the Trust returned (12.19)% based on market price, with dividends reinvested. The Trust s return based on net asset value (NAV) was (11.96)%, with dividends reinvested. For the same period, the benchmark Mergent Broad Dividend Achievers Index returned (7.11)% on a NAV basis. The Trust s performance was hindered by its emphasis on higher-yielding stocks, which underperformed the broad market. The focus on yield also resulted in a relatively significant exposure to financials, the weakest-performing sector during the period. In contrast, the Trust s performance benefited from a focus on large-capitalization stocks, which outperformed their small-cap counterparts.

BlackRock Enhanced Dividend Achievers[™] Trust

Investment Objective

BlackRock Enhanced Dividend Achievers[™] Trust (BDJ) seeks to provide current income and current gains, with a secondary objective of long-term capital appreciation. The Trust seeks to achieve these objectives by investing in common stocks that pay above average dividends and have the potential for capital appreciation and by utilizing an option writing strategy to enhance distributions paid to the Trust s shareholders.

Performance

For the six months ended April 30, 2008, the Trust returned (5.62)% based on market price, with dividends reinvested. The Trust s return based on NAV was (10.11)%, with dividends reinvested. For the same period, the benchmark Mergent Broad Dividend Achievers Index returned (7.11)% on a NAV basis. The Trust s performance was hindered by its emphasis on higher-yielding stocks, which underperformed the broad market. The focus on yield also resulted in a relatively significant exposure to financials, the weakest-performing sector during the period. In contrast, a focus on large-capitalization stocks proved advantageous, as the group outpaced its small-capitalization counterparts. During the market downturn, the income generated from writing (i.e. selling) call options provided additional benefit to the portfolio.

BlackRock Strategic Dividend Achievers[™] Trust

Investment Objective

BlackRock Strategic Dividend Achievers[™] Trust (BDT) seeks to provide total return through a combination of current income and capital appreciation.

Performance

For the six months ended April 30, 2008, the Trust returned (6.74)% based on market price, with dividends reinvested. The Trust s return based on NAV was (7.38)%, with dividends reinvested. For the same period, the benchmark Mergent Broad Dividend Achievers Index returned (7.11)% on a NAV basis. The Trust s performance was hindered by an emphasis on higher-yielding stocks, which underperformed the broad market. A lack of exposure to mega-cap energy stocks also was a detractor. In contrast, the Trust s considerable exposure to smaller regional banks, and at the same time, avoidance of the largest troubled banks, benefited comparative results for the period.

BlackRock EcoSolutions Investment Trust

Investment Objective

BlackRock EcoSolutions Investment Trust (BQR) seeks to provide current income, current gains and long-term capital appreciation.

Performance

For the six months ended April 30, 2008, the Trust returned (4.84)% based on market price, with dividends reinvested. The Trust s return based on NAV was 0.60%, with dividends reinvested. For the same period, the closed-end Lipper Sector Equity Funds category posted an average return of (5.89)% on a NAV basis. The Trust s performance was aided by its holdings in fertilizer and crop science companies, as well as those in water-related industrials. Heightened investor risk aversion due to financial market instability caused some areas of the new energy segment to struggle. Trust performance in the water utility sector was lackluster, with some weakness in U.S. companies.

BlackRock Global Energy and Resources Trust

Investment Objective

BlackRock Global Energy and Resources Trust (BGR) seeks to provide total return through a combination of current income and capital appreciation. The Trust attempts to achieve this objective by investing primarily in equity securities of companies engaged in the energy and natural resources business and equity derivatives with exposure to the energy and natural resources industry.

Performance

For the six months ended April 30, 2008, the Trust returned 13.08% based on market price, with dividends reinvested. The Trust s return based on NAV was 13.00%, with dividends reinvested. For the same period, the closed-end Lipper Sector Equity Funds category returned (5.89)% on a NAV basis. The Trust s comparative performance was enhanced mainly by stock selection in oil and gas exploration and production companies, which benefited from higher oil and gas prices. Positions in coal producers also contributed positively to performance amid a favorable supply-and-demand environment for electricity in Asian countries. Holdings in oil and gas refiners and transportation companies slightly hindered the relative return.

SEMI-ANNUAL REPORT

BlackRock Global Equity Income Trust

Investment Objective

BlackRock Global Equity Income Trust (BFD) seeks current income and current gains, with a secondary objective of long-term capital appreciation. The Trust seeks to achieve these objectives by investing in a diversified portfolio of domestic and foreign common stocks that pay dividends and writing (selling) stock index call options with respect to a portion of its common stock portfolio.

Performance

For the six months ended April 30, 2008, the Trust returned (8.27)% based on market price, with dividends reinvested. The Trust s return based on NAV was (8.27)%, with dividends reinvested. For the same period, the benchmark MSCI World Index returned (9.37)% on a NAV basis. The Trust s call-writing strategy offset some of the negative effects of a downturn in the equity markets. Specifically, management has discretion to increase or decrease the percentage of call-writing in the portfolio, and its decisions during this period of market volatility benefited performance. Management believes that these actions also have positioned the Trust to benefit from a market recovery.

BlackRock Global Opportunities Equity Trust

Investment Objective

BlackRock Global Opportunities Equity Trust (BOE) seeks current income and current gains, with a secondary objective of long-term capital appreciation. The Trust seeks to achieve its objectives by investing primarily in equity securities issued by companies located in countries throughout the world and utilizing an option writing strategy to enhance current gains.

Performance

For the six months ended April 30, 2008, the Trust returned (3.63)% on a market price basis, with dividends reinvested. The Trust s return based on NAV was (4.72)%, with dividends reinvested. For the same period, the benchmark MSCI World Index posted a return of (9.37)%. The Trust s outperformance during the period was primarily attributed to strong stock selection, particularly within the materials sector. Sector allocation also contributed positively, as underweight positions in financials and consumer discretionary and overweights in consumer staples, energy and utilities aided return comparisons.

SEMI-ANNUAL REPORT

BlackRock Real Asset Equity Trust

Investment Objective

BlackRock Real Asset Equity Trust (BCF) seeks to provide total return through a combination of current income, current gains and capital appreciation. The Trust attempts to achieve this objective by investing primarily in equity securities of companies engaged in energy, natural resources and basic materials businesses and companies engaged in associated businesses and equity derivatives with exposure to those companies.

Performance

For the six months ended April 30, 2008, the Trust returned 4.30% based on market price, with dividends reinvested. The Trust s return based on NAV was 4.57%, with dividends reinvested. For the same period, the closed-end Lipper Sector Equity Funds category returned (5.89)% on a NAV basis. The Trust s comparative performance was enhanced most notably by stock selection in diversified metals and mining, oil and gas exploration and production and coal producers. Commodity prices have continued to benefit from strong supply-and-demand fundamentals, along with a weaker U.S. dollar and a low interest-rate environment in the U.S.

BlackRock S&P Quality Rankings Global Equity Managed Trust

Investment Objective

BlackRock S&P Quality Rankings Global Equity Managed Trust (BQY) seeks to provide total return through a combination of current income and capital appreciation. The Trust attempts to achieve this objective by investing primarily in equity securities of issuers that pay above average dividends and have the potential for capital appreciation.

Performance

For the six months ended April 30, 2008, the Trust returned (8.70)% based on market price, with dividends reinvested. The Trust s return based on NAV was (10.38)%, with dividends reinvested. For the same period, the benchmark MSCI World Index returned (9.37)% on a NAV basis. An emphasis on higher-yielding stocks hampered the Trust s performance, as these securities underperformed the broad market for the period. An underweight relative to the benchmark in the materials sector also detracted from results. In contrast, a greater exposure to higher-quality stocks benefited the Trust s comparative performance, as these issues marginally outperformed lower-quality stocks globally.

SEMI-ANNUAL REPORT

BlackRock World Investment Trust

Investment Objective

BlackRock World Investment Trust (BWC) seeks current income, dividends and gains, with a secondary objective of long-term capital appreciation. The Trust seeks to achieve its objectives by investing primarily in equity securities issued by companies located in countries throughout the world and utilizing an option writing strategy to enhance current gains. The Trust seeks to generate current dividends and income by investing in equity securities that pay dividends and also by investing up to 25% of its total assets in debt securities from time to time when the Trust believes that it is advantageous to do so.

Performance

For the six months ended April 30, 2008, the Trust returned (1.03)% based on market price, with dividends reinvested. The Trust s return based on NAV was (4.18)%, with dividends reinvested. For the same period, the benchmark MSCI World Index returned (9.37)% on a NAV basis. The Trust s comparative performance was enhanced primarily by strong stock selection, particularly within the materials sector. The Trust s underweight exposure versus the benchmark in the financials and consumer discretionary sectors, as well as overweight allocations to consumer staples, energy and utilities, also benefited the relative return for the semi-annual period.
