1. General information

1.1 The Group's business and general information

Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria ("Cresud" or the "Company") was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier's shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

In 2002, Cresud acquired a 19.85% interest in IRSA Inversiones y Representaciones Sociedad Anónima ("IRSA"), a real estate company related to certain shareholders of Cresud. In 2009, Cresud increased its ownership percentage in IRSA to 55.64% and IRSA became Cresud's principal subsidiary.

Cresud and its subsidiaries are collectively referred to hereinafter as the Group. See Note 2.3 to the Consolidated Financial Statements as of June 30, 2013 and 2012 for a description of the Group's companies.

As of March 31, 2014, the Group operates in two major lines of business: (i) Agricultural business, (ii) Investment and Development Properties business. See Note 7 to the Unaudited Condensed Interim Consolidated Financial Statements as of June 30, 2013 and 2012 for a description of the Group's segments.

The Group's Agricultural business operations are comprised of crop production, cattle feeding, raising and fattening, milk production, sugarcane production and brokerage activities. The Group's Agro-industrial business operations are conducted through its subsidiary, Cactus Argentina S.A., and are engaged in cattle feeding services in specialized feedlots primarily for third parties. Feedlots provide accommodation, health care and animal feeding services based on specialized diets. The Group currently has agricultural operations and investments in Argentina, Brazil, Paraguay and Bolivia.

The business line known as urban property and investments also includes the Group's financial transactions. The Group's Investment and Development Properties business operations are conducted primarily through its subsidiary IRSA and IRSA's principal subsidiary, Alto Palermo S.A. ("APSA"). Through APSA, the Group primarily owns, manages and develops shopping centers across Argentina. APSA has also a direct 20% stake in a credit card company. Through IRSA, the Group primarily owns, manages and develops a portfolio of office and other rental properties in Buenos Aires, the capital of Argentina. Through IRSA or APSA, the Group also develops residential properties for sale. The Group, through IRSA, is also involved in the operation of branded hotels. 2. Basis of preparation of the Unaudited Condensed Interim Consolidated Financial Statements (Continued)

The Condensed Interim Consolidated Financial Statements corresponding to the nine-month periods ended as of March 31, 2014 and 2013 have not been audited. The Company's management believes they include all necessary adjustments to fairly present the results of each period. Results for the nine-month periods ended March 31, 2014 and 2013 do not necessarily reflect proportionally the Company's results for the complete fiscal year.

2.2 Significant Accounting Policies

The accounting policies applied in the preparation of these Unaudited Condensed Interim Consolidated Financial Statements are consistent with those applied in the preparation of the information under IFRS as of June 30, 2013. Most significant accounting policies are described in note 2 included in the Consolidated Financial Statements as of June 30, 2013 and 2012.

2.3 Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Consolidated Financial Statements, the significant judgments made by Management in applying the Group's accounting policies and the main sources of uncertainty were the same applied by the Group in the preparation of the annual consolidated financial statements for the year ended as of June 30, 2013, save for changes in accrued income tax, provision for legal claims and allowance for doubtful accounts.

2.4 Comparative information

Amounts as of March 31, 2013 and June 30, 2013, which are disclosed for comparative purposes have been taken from the Condensed Interim Consolidated Financial Statements as of such dates. The financial statements originally issued have been subject to certain reclassifications required in order to present these figures comparatively with this period.

2. Basis of preparation of the Unaudited Condensed Interim Consolidated Financial Statements (Continued)

During the period, the Argentine Peso devalued against the US\$ and other currencies by around 32%, which has an impact in comparative information presented in these Financial Statements, due mainly to the currency exposure of our income and costs of Agricultural Business and of income from urban property and investments business line, especially from the “office and other rental properties” segment, and our net assets and liabilities in foreign currency as detailed in Note 40.

3. Seasonal effects on operations

The operations of the Group’s agricultural business are also subject to seasonal effects. The harvests and sale of grains (corn, soybean and sunflower) generally take place between February and June every year. Wheat is generally harvested between November and January. In Bolivia, weather conditions make it possible to have two soybeans, corn and barley seasons and, therefore, these crops are harvested in April and October, whereas wheat and sunflower are harvested in August and September, respectively. Other segments of the agricultural business, such as beef cattle and milk production tend to be more stable. However, beef cattle and milk production is generally larger during the second quarter, when conditions are more favorable. In case of sugar cane, harvest and sale take place between May and November of each year. As a result, there may be material fluctuations in the agricultural business results across quarters.

The operations of the Group’s shopping centers are also subject to seasonal effects, which affect the level of sales recorded by lessees. During summer time (January and February), the lessees of shopping centers experience the lowest sales levels in comparison with the winter holidays (July) and December (Christmas) when they tend to record peaks of sales. Apparel stores generally change their collections during the spring and the fall, which impacts positively on shopping mall sales. Sale discounts at the end of each season also affect the business. As a consequence, a higher level of revenues is generally expected in the second half of the year rather than the first in shopping center operations.

5. Financial risk management

The group's diverse activities are exposed to a variety of financial risk: market risk (including foreign currency risk, interest rate risk and price risk) credit risk, liquidity risk and capital risk.

The Condensed Interim Consolidated Financial Statements do not include all the information and disclosures of the risk management, so they should be read together with the annual consolidated financial statements as of June 30, 2013. There have been no changes in the risk management or risk management policies applied by the Group since the fiscal year-end.

Since June 30, 2013 at the date of these financial statements, there have been no significant changes in business or economic circumstances affecting the fair value of the Company's financial assets or liabilities (either measured at fair value or amortized cost), except for our investment in Supertel Hospitality Inc. ("Supertel"), which fair value was affected by the decrease in the market value of its common shares, because of the suspension of dividends' payment. This had been decided in order to fortify its financial situation. Neither have been transfers between the several tiers used in estimating the fair value of the Company's financial instruments.

6. Segment information (Continued)

At the time of assessing the performance of business segments and deciding upon the allocation of resources, the Executive Committee uses information on operating income assets and liabilities of each such segment. In the Unaudited Condensed Consolidated Financial Statements, the transactions and balances between related parties which may affect more than one segment are eliminated. In order to obtain clear information that may be useful for Management's decision making, the Group has defined that, as from the nine-month period ending March 31, 2014, such transactions will not be eliminated for segment reporting purposes.

The comparative information presented as from such period has been adjusted retrospectively for the sake of comparability.

The following tables present reconciliation between the total results of segment operations and the results of operations as per the statement of income. The adjustments relate to the presentation of the results of operations of joint ventures accounted for under the equity method under IFRS and the non-elimination of the inter-segment transactions as explained in the preceding paragraph.

16. Financial instruments by category

Determining fair values

IFRS 9 defines the fair value of a financial instrument as the amount for which a financial asset could be exchanged, or a financial liability settled, between knowledgeable, willing parties in an arm's length transaction. All financial instruments recognized at fair value are allocated to one of the valuation hierarchy levels of IFRS 7. This valuation hierarchy provides for three levels. The initial basis for the allocation is the "economic investment class". Only if this does not result in an appropriate allocation the Company deviates from such an approach in individual cases. The allocation reflects which of the fair values derive from transactions in the market and where valuation is based on models because market transactions are lacking.

In the case of Level 1, valuation is based on non-adjusted quoted prices in active markets for identical financial assets or liabilities that the Group can refer to at the date of the statement of financial position. A market is deemed active if transactions take place with sufficient frequency and in sufficient quantity for price information to be available on an ongoing basis. Since a quoted price in an active market is the most reliable indicator of fair value, this should always be used if available. The financial instruments the Group has allocated to this level mainly comprise equity investments, mutual funds, government bonds and corporate bonds for which quoted prices in active markets are available. In the case of shares, the Group allocates them to this level when either a stock market price is available or prices are provided by a price quotation on the basis of actual market transactions.

16. Financial instruments by category (Continued)

In the case of Level 2, fair value is determined by using valuation methods based on inputs directly or indirectly observable in the market. If the financial instrument concerned has a fixed contract period, the inputs for valuation must be observable for the whole of this period. The financial instruments the Group has allocated to this level mainly comprise interest rate swaps and foreign currency future contracts.

In the case of Level 3, the Group uses valuation techniques not based on inputs observable in the market. This is only permissible insofar as no observable market data are available. The inputs used reflect the Group's assumptions regarding the factors which market players would consider in their pricing. The Group uses the best available information for this, including internal company data. The financial instruments that the Group has allocated to this level mainly comprise shares and warrants of Supertel.

As of March 31, 2014, the Group has determined that Arcos del Gourmet S.A.'s stock option is a Level 3 financial instrument and its fair value at the end of the period is zero.

Since June 30, 2013, there have been no transfers between the several tiers used in estimating the fair value of the Group's financial instruments, or reclassifications among their respective categories.

The Group's Finance Division has a team in place in charge of estimating valuation of financial assets required to be reported in the financial statements, including the fair value of Level 3 instruments. The team directly reports to the Chief Financial Officer (CFO).

The CFO and the valuation team discuss the valuation methods and results upon the acquisition of an asset and, if necessary, on a quarterly basis, in line with the Group's quarterly reports.

According to the Group's policy, transfers among the several categories of valuation tiers are recognized when occurred, or when there are changes in the prevailing circumstances requiring the transfer.

16. Financial instruments by category (Continued)

The following table presents the changes in Level 3 instruments for the nine-month period ended March 31, 2014:

	Call option for the shares of Arcos	Warrants of Supertel	Shares of Supertel	Total
Balance as of June 30, 2013	-	16,949	139,120	156,069
Acquisition				-
Total losses for the period (i)	-	(16,949)	(81,997)	(98,946)
Balance as of March 31, 2014	-	-	57,123	57,123

(i) The loss is not realized as of March 31, 2014 and is accounted for under “Other financial results” in the Statement of Income (Note 33)

Upon initial recognition (January, 2012), the consideration paid for the Shares and Warrants was assigned to both instruments based on the relative fair values of those instruments upon acquisition. The fair value of these instruments exceeded the transaction price and were determined using a valuation technique that uses inputs not observable in the market. As a result of the use of this technique, the Group has not recognized a gain at the time of initial recognition in the amount of US\$ 7.9 million.

On March 31, 2014, the fair value of warrants of Supertel as determined pursuant to the indicated method was lower than the gain not recognized upon initial recording; therefore, warrants are valued at zero.

According to Group estimates, all factors being constant, a 10% decline in the price of the underlying assets of Level 3 shares and warrants of Supertel (data observed in the market) as of March 31, 2014, would reduce pre-tax income by Ps. 2.6 million.

According to Group estimates, all factors being constant, a 10% increase in the credit spread (data which is not observable in the market) of shares and warrants of Supertel used in the valuation model applied to Level 3 financial instruments as of March 31, 2014, would reduce pre-tax income by Ps. 7.5 million. The rate used as of March 31, 2014 was 14.25%.

16. Financial instruments by category (Continued)

When no quoted prices in an active market are available, fair values (particularly with derivatives) are based on recognized valuation methods. The Company uses a range of valuation models for the measurement of Level 2 and Level 3 instruments, details of which may be obtained from the following table:

(ii) On January 9, 2014, RES entered into a credit facility of up to US\$ 2.0 million with Supertel Hospitality Inc. (SPPR). In the event SPPR successfully carries out an initial public offering not later than April 15, 2014, RES agrees to swap (capitalize) the balance of the loan at such time for shares of SPPR. In the event that SPPR fails to make an initial public offering within the term agreed, RES is entitled to a debt-for-equity swap until July 9, 2015 (subject to any limitation on shareholding that may apply). Since SPPR did not make a share public offering before April 15, 2014, the lending interest rate increased by 12.5% per annum. July 9, 2015. In such a case, the price at which debt will be swapped by equity shall be the higher of (a) the weighted average price of common shares of the company within a term of 5 days prior to the date RES decides to exercise the debt-for-equity swap option or (b) the higher of market price and book value.

26. Taxation (Continued)

The Group did not recognize deferred income tax assets of Ps. 64.2 million and Ps. 70.1 million as of March 31, 2014 and June 30, 2013, respectively. Although management believes that it will become profitable in the foreseeable future, as a result of the history of recent losses incurred during the development phase of the different Group's business operations and the lack of verifiable and objective evidence due to the limited operating history of the Group itself, the Board of Directors has determined that there is sufficient uncertainty as to the generation of sufficient income to utilize the losses within a reasonable timeframe, therefore, no deferred tax asset is recognized in relation to these losses.

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the consolidated entities as follows:

	March 31, 2014	March 31, 2013
Tax calculated at the tax rates applicable to profits in the respective countries	307,032	(108,484)
Permanent differences:		
Share of loss of associates and joint ventures	24,446	4,825
Unrecognized tax losses	1,088	13,824
Non-taxable income	23,888	62,760
Non-deductible items	-	(3,237)
Non-punishable items	-	(1,166)
Others	1,519	731
Income tax expense	357,973	(30,747)

Special Reserve

Pursuant to CNV General Ruling No. 609/12, the Company set up a special reserve, to reflect the positive difference between the balance at the beginning of retained earnings disclosed in the first financial statements prepared according to IFRS and the balance at closing of retained earnings disclosed in the last financial statements prepared in accordance with previously effective accounting standards.
