Timberland Bancorp, Inc. and Subsidiary
Notes to Unaudited Condensed Consolidated Financial Statements

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Presentation: The accompanying unaudited condensed consolidated financial statements for Timberland Bancorp, Inc. ("Company") were prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with instructions for Form 10-Q and, therefore, do not include all disclosures necessary for a complete presentation of financial condition, results of operations, and cash flows in conformity with GAAP. However, all adjustments which are, in the opinion of management, necessary for a fair presentation of the interim condensed consolidated financial statements have been included. All such adjustments are of a normal recurring nature. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended September 30, 2014 ("2014 Form 10-K"). The unaudited condensed consolidated results of operations for the three months ended December 31, 2014 are not necessarily indicative of the results that may be expected for the entire fiscal year ending September 30, 2015.

(b) Principles of Consolidation: The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Timberland Bank ("Bank"), and the Bank's wholly-owned subsidiary, Timberland Service Corp. All significant intercompany transactions and balances have been eliminated in consolidation.

(c) Operating Segment: The Company has one reportable operating segment which is defined as community banking in western Washington under the operating name, "Timberland Bank."

(d) The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

(e) Certain prior period amounts have been reclassified to conform to the December 31, 2014 presentation with no change to net income or total shareholders' equity previously reported.

(2) PREFERRED STOCK SOLD IN TROUBLED ASSET RELIEF PROGRAM ("TARP") CAPITAL PURCHASE PROGRAM ("CPP")

On December 23, 2008, the Company received \$16.64 million from the U.S. Treasury Department ("Treasury") as a part of the Treasury's CPP, which was established as part of the TARP. The Company sold 16,641 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A ("Series A Preferred Stock"), with a liquidation value of \$1,000 per share and a related warrant to purchase 370,899 shares of the Company's common stock at an exercise price of \$6.73 per share (subject to anti-dilution adjustments) at any time through December 23, 2018. The Series A Preferred Stock paid a 5.0% dividend through December 20, 2013, the date of its redemption.

On November 13, 2012, the Company's outstanding 16,641 shares of Series A Preferred Stock were sold by the Treasury as part of its efforts to manage and recover its investments under the TARP. While the sale of the shares of Series A Preferred Stock to new owners did not result in any proceeds to the Company and did not change the Company's capital position or accounting for these securities, it did eliminate restrictions put in place by the Treasury on TARP recipients.

On June 12, 2013, the Treasury sold, to private investors, the warrant to purchase up to 370,899 shares of the Company's common stock. The sale of the warrant to new owners did not result in any proceeds to the Company and

did not change the Company's capital position or accounting for the warrant.

During the year ended September 30, 2013, the Company purchased and retired 4,576 shares of its Series A Preferred Stock for \$4.32 million; a \$255,000 discount from the liquidation value. The discount from the liquidation value on the repurchased shares was recorded as an increase to retained earnings and included in net income to common shareholders in the computation of net income per common share. On December 20, 2013, the Company redeemed the remaining 12,065 shares of its Series A Preferred Stock at the liquidation value of \$12.07 million.

(3) INVESTMENT SECURITIES

Held to maturity and available for sale investment securities have been classified according to management's intent and are as follows as of December 31, 2014 and September 30, 2014 (in thousands):

Total	\$19	\$—	1	\$998	\$(44)	2	\$1,017	\$(44)

The Company has evaluated these securities and has determined that the decline in their value is temporary. The unrealized losses are primarily due to changes in market interest rates and spreads in the market for mortgage-related

products. The fair value of these securities is expected to recover as the securities approach their maturity dates and/or as the pricing spreads narrow on mortgage-related securities. The Company has the ability and the intent to hold the investments until the market value recovers. Furthermore, as of December 31, 2014, management does not have the intent to sell any of the securities

classified as available for sale where the estimated fair value is below the recorded value and believes that it is more likely than not that the Company will not have to sell such securities before a recovery of cost or recorded value if previously written down.

In accordance with GAAP, the Company bifurcates OTTI into (1) amounts related to credit losses which are recognized through earnings and (2) amounts related to all other factors which are recognized as a component of other comprehensive income (loss).

To determine the component of the gross OTTI related to credit losses, the Company compared the amortized cost basis of each OTTI security to the present value of its revised expected cash flows, discounted using its pre-impairment yield. The revised expected cash flow estimates for individual securities are based primarily on an analysis of default rates and prepayment speeds included in third-party analytic reports. Significant judgment by management is required in this analysis that includes, but is not limited to, assumptions regarding the collectability of principal and interest, net of related expenses, on the underlying loans.

The following table presents a summary of the significant inputs utilized to measure management's estimate of the credit loss component on OTTI securities as of December 31, 2014 and September 30, 2014:

	Range		Weighted	
	Minimum	Maximum	Average	
December 31, 2014				
Constant prepayment rate	6.00	% 15.00	% 9.87	%
Collateral default rate	0.01	% 16.97	% 5.96	%
Loss severity rate	0.15	% 60.00	% 35.81	%
September 30, 2014				
Constant prepayment rate	6.00	% 15.00	% 10.59	%
Collateral default rate	0.01	% 22.34	% 7.41	%
Loss severity rate	0.16	% 75.17	% 45.81	%

The following tables present the OTTI for the three months ended December 31, 2014 and 2013 (in thousands):

	Three Months Ended		Three Months Ended	
	December 31, 2014		December 31, 2013	
	Held To	Available	Held To	Available
	Maturity	For Sale	Maturity	For Sale
Total OTTI	\$—	\$—	\$(3) \$—
Adjustment for portion recorded as other comprehensive income (loss) before taxes (1)	—	—	1	—
Net OTTI recognized in earnings (2)	\$—	\$—	\$(2) \$—

(1) Represents OTTI related to all other factors.

(2) Represents net recoveries (OTTI) related to credit losses.

The following table presents a roll-forward of the credit loss component of held to maturity and available for sale debt securities that have been written down for OTTI with the credit loss component recognized in earnings and the remaining impairment loss related to all other factors recognized in other comprehensive income (loss) for the three months ended December 31, 2014 and 2013 (in thousands):

	Three Months Ended December 31,	
	2014	2013
Beginning balance of credit loss	\$ 1,654	\$ 2,084
Additions:		
Credit losses for which OTTI was not previously recognized	—	2
Subtractions:		
Realized losses previously recorded as credit losses	(17) (40
Ending balance of credit loss	\$ 1,637	\$ 2,046

There was a \$45,000 gain on sale of investment securities available for sale for the three months ended December 31, 2014. There was no realized loss on sale of securities for the three months ended December 31, 2013. During the three months ended December 31, 2014, the Company recorded a net \$17,000 realized loss (as a result of the securities being deemed worthless) on 11 held to maturity residential MBS, of which the entire amount had been recognized previously as a credit loss. During the three months ended December 31, 2013, the Company recorded a \$40,000 realized loss (as a result of the securities being deemed worthless) on 14 held to maturity residential MBS and six available for sale residential MBS, of which the entire amount had been recognized previously as a credit loss.

The amortized cost of residential mortgage-backed and agency securities pledged as collateral for public fund deposits, federal treasury tax and loan deposits, FHLB collateral, retail repurchase agreements and other non-profit organization deposits totaled \$4.63 million and \$6.22 million at December 31, 2014 and September 30, 2014, respectively.

The contractual maturities of debt securities at December 31, 2014 were as follows (dollars in thousands). Expected maturities may differ from scheduled maturities as a result of the prepayment of principal or call provisions.

	Held to Maturity		Available for Sale	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due within one year	\$—	\$—	\$—	\$—
Due after one year to five years	3,020	3,032	21	17
Due after five to ten years	26	26	—	—
Due after ten years	2,155	3,150	468	511
Total	\$5,201	\$6,208	\$489	\$528

(4) GOODWILL

The Company performed its fiscal year 2014 goodwill impairment test during the quarter ended June 30, 2014 with the assistance of a third-party firm specializing in goodwill impairment valuations for financial institutions. The third-party analysis was conducted as of May 31, 2014 and concluded that the recorded value of goodwill as of May 31, 2014 was not impaired.

The goodwill impairment test involves a two-step process. Step one of the goodwill impairment test estimates the fair value of the reporting unit. If the estimated fair value of the Company's sole reporting unit, the Bank, under step one

exceeds the recorded value of the reporting unit, goodwill is not considered impaired and no further analysis is necessary. If the estimated fair value of the Company's sole reporting unit is less than the recorded value, then a step two test, which calculates the fair value of assets and liabilities to calculate an implied value of goodwill, is performed.

Step one of the goodwill impairment test estimated the fair value of the reporting unit utilizing a discounted cash flow income approach analysis, a public company market approach analysis, a merger and acquisition market approach analysis and a trading price market approach analysis in order to derive an enterprise value for the Company.

The discounted cash flow income approach analysis uses a reporting unit's projection of estimated operating results and cash flows and discounts them using a rate that reflects current market conditions. The projection uses management's estimates of economic and market conditions over the projected period including growth rates in loans and deposits, estimates of future expected changes in net interest margins and cash expenditures. Key assumptions used by the Company in its discounted cash flow model (income approach) included an annual loan growth rate that ranged from 3.00% to 5.10%, an annual deposit growth rate that ranged from 2.80% to 4.00% and a return on assets that ranged from 0.70% to 1.00%. In addition to the above projections of estimated operating results, key assumptions used to determine the fair value estimate under the approach were the discount rate of 13.6% and the residual capitalization rate of 10.6%. The discount rate used was the cost of equity capital. The cost of equity capital was based on the capital asset pricing model ("CAPM"), modified to account for a small stock premium. The small stock premium represents the additional return required by investors for small stocks based on the Stocks, Bonds, Bills and Inflation 2013 Yearbook. Beyond the approximate five-year forecast period, residual free cash flows were estimated to increase at a constant rate into perpetuity. These cash flows were converted to a residual value using an appropriate residual capitalization rate. The residual capitalization rate was equal to the discount rate minus the expected long-term growth rate of cash flows. Based on historical results, the economic climate, the outlook for the industry and management's expectations, a long-term growth rate of 3.0% was estimated.

The public company market approach analysis estimates the fair value by applying cash flow multiples to the reporting unit's operating performance. The multiples were derived from comparable publicly traded companies with operating and investment characteristics similar to those of the Company. Key assumptions used by the Company included the selection of comparable public companies and performance ratios. In applying the public company analysis, the Company selected eight publicly traded institutions based on similar lines of business, markets, growth prospects, risks and firm size. The performance ratios included price to earnings (last twelve months), price to earnings (current year to date), price to book value, price to tangible book value and price to deposits.

The merger and acquisition market approach analysis estimates the fair value by using merger and acquisition transactions involving companies that are similar in nature to the Company. Key assumptions used by the Company included the selection of comparable merger and acquisition transactions and the valuation ratios to be used. The analysis used banks located in Washington or Oregon that were acquired after January 1, 2012. The valuation ratios from these transactions for price to earnings and price to tangible book value were then used to derive an estimated fair value of the Company.

The trading price market approach analysis used the closing market price at May 30, 2014 of the Company's common stock, traded on the NASDAQ Global Market to determine the market value of total equity capital.

A key assumption used by the Company in the public company market approach analysis and the trading price market approach analysis was the application of a control premium. The Company's common stock is thinly traded and therefore management believes reflects a discount for illiquidity. In addition, the trading price of the Company's common stock reflects a minority interest value. To determine the fair market value of a majority interest in the Company's stock, premiums were calculated and applied to the indicated values. Therefore, a control premium was applied to the results of the public company market approach analysis and the trading price market approach analysis because the initial value conclusion was based on minority interest transactions. Merger and acquisition studies were analyzed to conclude that the difference between the acquisition price and a company's stock price prior to acquisition indicates, in part, the price effect of a controlling interest. Based on the evaluation of mergers and acquisition studies, a control premium of 25% was used.

The results of the Company's step one test indicated that the the reporting unit's fair value was more than its recorded value and, therefore, step two of the analysis was not necessary.

A significant amount of judgment is involved in determining if an indicator of goodwill impairment has occurred. Such indicators may include, among others: a significant decline in the expected future cash flows; a sustained, significant decline in the Company's stock price and market capitalization; a significant adverse change in legal factors or in the business climate; adverse assessment or action by a regulator; and unanticipated competition. Key assumptions used in the annual goodwill impairment test are highly judgmental and include: selection of comparable companies, amount of control premium, projected cash flows and discount rate applied to projected cash flows. Any change in these indicators or key assumptions could have a significant negative impact on the Company's financial condition, impact the goodwill impairment analysis or cause the Company to perform a goodwill impairment analysis more frequently than once per year.

As of December 31, 2014, management believed that there had been no events or changes in the circumstances since May 31, 2014 that would indicate a potential impairment of goodwill. No assurances can be given, however, that the Company will not record an impairment loss on goodwill in the future.

(5) LOANS RECEIVABLE AND ALLOWANCE FOR LOAN LOSSES

Loans receivable and loans held for sale consisted of the following at December 31, 2014 and September 30, 2014 (dollars in thousands):

	December 31, 2014		September 30, 2014		
	Amount	Percent	Amount	Percent	
Mortgage loans:					
One- to four-family (1)	\$ 103,021	16.7	% \$ 98,534	16.2	%

Credit Quality Indicators

The Company uses credit risk grades which reflect the Company's assessment of a loan's risk or loss potential. The Company categorizes loans into risk grade categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors such as the estimated fair value of the collateral. The Company uses the following definitions for credit risk ratings as part of the ongoing monitoring of the credit quality of its loan portfolio:

Pass: Pass loans are defined as those loans that meet acceptable quality underwriting standards.

Watch: Watch loans are defined as those loans that still exhibit acceptable quality, but have some concerns that justify greater attention. If these concerns are not corrected, a potential for further adverse categorization exists. These concerns could relate to a specific condition peculiar to the borrower, its industry segment or the general economic environment.

Special Mention: Special mention loans are defined as those loans deemed by management to have some potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in the deterioration of the payment prospects of the loan. Assets in this category do not expose the Company to sufficient risk to warrant a substandard classification.

Substandard: Substandard loans are defined as those loans that are inadequately protected by the current net worth and paying capacity of the obligor, or of the collateral pledged. Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the repayment of the debt. If the weakness or weaknesses are not corrected, there is the distinct possibility that some loss will be sustained.

Loss: Loans in this classification are considered uncollectible and of such little value that continuance as bankable assets is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this loan even though partial recovery may be realized in the future.

Edgar Filing: TIMBERLAND BANCORP INC - Form 10-Q

The following table lists the loan credit risk grades utilized by the Company that serve as credit quality indicators by portfolio segment at December 31, 2014 and September 30, 2014 (in thousands):

December 31, 2014	Loan Grades				Total
	Pass	Watch	Special Mention	Substandard

Impaired Loans

A loan is considered impaired when it is probable that the Company will be unable to collect all contractual principal and interest payments due in accordance with the original or modified terms of the loan agreement. Impaired loans are measured based on the estimated fair value of the collateral less the estimated cost to sell if the loan is considered collateral dependent. Impaired loans that are not considered to be collateral dependent are measured based on the present value of expected future cash flows.

The categories of non-accrual loans and impaired loans overlap, although they are not coextensive. The Company considers all circumstances regarding the loan and borrower on an individual basis when determining whether an impaired loan should be placed on non-accrual status, such as the financial strength of the borrower, the estimated collateral value, reasons for the delay, payment record, the amount past due and the number of days past due.

Edgar Filing: TIMBERLAND BANCORP INC - Form 10-Q

The following is a summary of information related to impaired loans by portfolio segment as of December 31, 2014 and for the three months then ended (in thousands):

	Recorded Investment	Unpaid Principal Balance (Loan Balance Plus Charge Off)	Related Allowance	YTD Average Recorded Investment (1)	YTD Interest Income Recognized (1)	YTD Cash Basis Interest Income Recognized (1)

Edgar Filing: TIMBERLAND BANCORP INC - Form 10-Q

The following table sets forth information with respect to the Company's non-performing assets at December 31, 2014 and September 30, 2014 (dollars in thousands):

	December 31, 2014	September 30, 2014		
Loans accounted for on a non-accrual basis:				
Mortgage loans:				
One- to four-family	\$4,296	\$4,376		
Commercial	1,439	1,468		
Construction – custom and owner/builder	156	—		
Land	4,357	4,564		
Consumer loans:				
Home equity and second mortgage	564	498		
Other	—	3		
Total loans accounted for on a non-accrual basis	10,812	10,909		
Accruing loans which are contractually past due 90 days or more	—	812		
Total of non-accrual and 90 days past due loans	10,812	11,721		
Non-accrual investment securities	1,057	1,101		
OREO and other repossessed assets, net	8,220	9,092		
Total non-performing assets (1)	\$20,089	\$21,914		
Troubled debt restructured loans on accrual status (2)	\$12,337	\$16,804		
Non-accrual and 90 days or more past due loans as a percentage of loans receivable	1.85	% 2.03		%
Non-accrual and 90 days or more past due loans as a percentage of total assets	1.44	% 1.57		%
Non-performing assets as a percentage of total assets	2.68	% 2.94		%
Loans receivable (3)	\$583,917	\$576,179		
Total assets	\$749,917	\$745,565		

(1) Does not include troubled debt restructured loans on accrual status.

(2) Does not include troubled debt restructured loans totaling \$2.0 million and \$2.3 million reported as non-accrual loans at December 31, 2014 and September 30, 2014, respectively.

(3) Includes loans held for sale and before the allowance for loan losses.

Troubled debt restructured loans are loans for which the Company, for economic or legal reasons related to the borrower's financial condition, has granted a significant concession to the borrower that it would otherwise not consider. The loan terms which have been modified or restructured due to a borrower's financial difficulty include but are not limited to: a reduction in the stated interest rate; an extension of the maturity at an interest rate below current market; a reduction in the face amount of the debt; a reduction in the accrued interest; or re-aging, extensions, deferrals and renewals. Troubled debt restructured loans are considered impaired loans and are individually evaluated

for impairment. Troubled debt restructured loans can be classified as either accrual or non-accrual. Troubled debt restructured loans are classified as non-performing loans unless they have been

performing in accordance with their modified terms for a period of at least six months. The Company had \$14.37 million in troubled debt restructured loans included in impaired loans at December 31, 2014 and had no commitments to lend additional funds on these loans. The Company had \$19.09 million in troubled debt restructured loans included in impaired loans at September 30, 2014 and had no commitments to lend additional funds on these loans. The allowance for loan losses allocated to troubled debt restructured loans at December 31, 2014 and September 30, 2014 was \$210,000 and \$994,000, respectively.

The following table sets forth information with respect to the Company's troubled debt restructured loans by interest accrual status as of December 31, 2014 and September 30, 2014 (in thousands):

	December 31, 2014		
	Accruing	Non-Accrual	Total
Mortgage loans:			
One- to four-family	\$2,624	\$171	\$2,795
Multi-family	3,306	—	3,306
Commercial	5,359	1,439	6,798
Land	750	272	1,022
Consumer loans:			
Home equity and second mortgage	298	152	450
Total	\$12,337	\$2,034	\$14,371
	September 30, 2014		
	Accruing	Non-Accrual	Total
Mortgage loans:			
One- to four-family	\$2,634	\$233	\$2,867
Multi-family	3,317	—	3,317
Commercial	9,960	1,468	11,428
Land	594	431	1,025
Consumer loans:			
Home equity and second mortgage	299	152	451
Total	\$16,804	\$2,284	\$19,088

There were no new troubled debt restructured loans during the three months ended December 31, 2014. The following table sets forth information with respect to the Company's troubled debt restructured loans by portfolio segment that occurred during the the year ended September 30, 2014 (dollars in thousands):

September 30, 2014	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	End of Period Balance
One-to four-family (1)	1	\$ 42	\$42	\$42
Commercial (1)	1	157	157	153
Total	2	\$ 199	\$199	\$195

(1) Modifications were a result of a reduction in the stated interest rate.

(6) NET INCOME PER COMMON SHARE

Basic net income per common share is computed by dividing net income to common shareholders by the weighted average number of common shares outstanding during the period, without considering any dilutive items. Diluted net income per common share is computed by dividing net income to common shareholders by the weighted average number of common shares and common stock equivalents for items that are dilutive, net of shares assumed to be repurchased using the treasury stock method at the average share price for the Company's common stock during the period. The dividend and related accretion for the amount of the Company's Series A Preferred Stock outstanding for the respective period was deducted from net income and the discount on the redemption of Series A Preferred Stock was added to net income in computing net income to common shareholders. Common stock equivalents arise from the assumed conversion of outstanding stock options and the outstanding warrant to purchase common stock. Shares owned by the Bank's ESOP that have not been allocated are not considered to be outstanding for the purpose of computing basic and diluted net income per common share. At December 31, 2014 and 2013, there were 156,020 and 191,916 shares, respectively, that had not been allocated under the Bank's ESOP.

Information regarding the calculation of basic and diluted net income per common share for the three months ended December 31, 2014 and 2013 is as follows (dollars in thousands, except per share amounts):

	Three Months Ended December 31,	
	2014	2013
	(In thousands, except for per share data)	
Basic net income per common share computation		
Numerator – net income	\$ 1,727	\$ 1,611
Preferred stock dividends	—	(136)
Preferred stock discount accretion	—	(70)
Net income to common shareholders	\$ 1,727	\$ 1,405
Denominator – weighted average common shares outstanding	6,891,952	6,853,683
Basic net income per common share	\$ 0.25	\$ 0.20
Diluted net income per common share computation		
Numerator – net income	\$ 1,727	\$ 1,611
Preferred stock dividends	—	(136)
Preferred stock discount accretion	—	(70)
Net income to common shareholders	\$ 1,727	\$ 1,405
Denominator – weighted average common shares outstanding	6,891,952	6,853,683
Effect of dilutive stock options (1)	36,819	29,596
Effect of dilutive stock warrant	134,769	95,106
Weighted average common shares and common stock equivalents	7,063,540	6,978,385
Diluted net income per common share	\$ 0.24	\$ 0.20

(1) For the three months ended December 31, 2014 and 2013, average options to purchase 122,000 and 125,198 shares of common stock, respectively, were outstanding but not included in the computation of diluted net income per

common share because their effect would have been anti-dilutive.

(7) STOCK PLANS AND STOCK BASED COMPENSATION

Stock Option Plans

Under the Company's stock option plans (the 1999 Stock Option Plan and the 2003 Stock Option Plan), the Company was able to grant options for up to a combined total of 1,622,500 shares of common stock to employees, officers and directors. Shares issued may be purchased in the open market or may be issued from authorized and unissued shares. The exercise price of each option equals the fair market value of the Company's common stock on the date of grant. Generally, options vest in 20% annual installments on each of the five anniversaries from the date of the grant. At December 31, 2014, there were no options for shares available for future grant under the 2003 Stock Option Plan or the 1999 Stock Option Plan.

Activity under the plans for the three months ended December 31, 2014 and 2013 is as follows:

	Three Months Ended December 31, 2014		Three Months Ended December 31, 2013	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Options outstanding, beginning of period	221,400	\$7.49	162,946	\$6.96
Exercised	(5,300)) 4.62	(2,600)) 4.59
Granted	—	—	106,000	9.00
Forfeited	(200)) 4.55	—	—
Options outstanding, end of period	215,900	\$7.57	266,346	\$7.10
Options exercisable, end of period	69,500	\$6.18	83,946	\$8.09

The aggregate intrinsic value of options outstanding at December 31, 2014 was \$655,000.

At December 31, 2014, there were 146,400 unvested options with an aggregate grant date fair value of \$363,000, all of which the Company assumes will vest. The aggregate intrinsic value of unvested options at December 31, 2014 was \$348,000. There were 37,700 options with an aggregate grant date fair value of \$86,000 that vested during the three months ended December 31, 2014.

At December 31, 2013, there were 182,400 unvested options with an aggregate grant date fair value of \$429,000. There were 14,600 options with an aggregate grant date fair value of \$26,000 that vested during the three months ended December 31, 2013.

The Company uses the Black-Scholes option pricing model to estimate the fair value of stock-based awards with the weighted average assumptions noted in the following table. The risk-free interest rate is based on the U.S. Treasury rate of a similar term as the stock option at the particular grant date. The expected life is based on historical data, vesting terms and estimated exercise dates. The expected dividend yield is based on the most recent quarterly dividend on an annualized basis in effect at the time the options were granted, adjusted, if appropriate for management's expectations regarding future dividends. The expected volatility is based on historical volatility of the Company's stock price. There were no options granted during the three months ended December 31, 2014. There were 106,000 options granted during the three months ended December 31, 2013 with an aggregate grant date fair value of \$267,000.

The weighted average assumptions used for options granted during the three months ended December 31, 2013 were:

	2013	
Expected volatility	39	%

Expected term (in years)	5	
Expected dividend yield	2.56	%
Risk free interest rate	1.35	%
Grant date fair value per share	\$2.52	

Stock Grant Plan

The Company adopted the MRDP in 1998 for the benefit of employees, officers and directors of the Company. The objective of the MRDP was to retain personnel of experience and ability in key positions by providing them with a proprietary interest in the Company.

The MRDP allowed for the issuance to participants of up to 529,000 shares of the Company's common stock. Awards under the MRDP were made in the form of shares of common stock that are subject to restrictions on the transfer of ownership and are subject to a five-year vesting period. Compensation expense is the amount of the fair value of the common stock at the date of the grant to the plan participants and is recognized over a five-year vesting period, with 20% vesting on each of the five anniversaries from the date of the grant.

No MRDP shares were granted during the three months ended December 31, 2014 or 2013. At December 31, 2014, no shares were available for future awards under the MRDP.

At December 31, 2014, there were no unvested MRDP shares. There were no MRDP shares that vested during the three months ended December 31, 2014.

At December 31, 2013, there were no unvested MRDP shares. There were 3,254 MRDP shares that vested during the three months ended December 31, 2013 with an aggregated grant date fair value of \$23,000. At December 31, 2013, no shares were available for future awards under the MRDP.

Expense for Stock Compensation Plans

Compensation expense during the three months ended December 31, 2014 and 2013 for all stock-based plans were as follows:

	Three Months Ended December 31,			
	2014		2013	
	(in thousands)			
	Stock	Stock	Stock	Stock
	Options	Grants	Options	Grants
Compensation expense	\$28	\$—	\$22	\$2
Related tax benefit recognized	\$2	\$—	\$—	\$—

As of December 31, 2014, the compensation expense yet to be recognized for stock options that have been awarded but not vested for the years ending September 30 is as follows (in thousands):

	Stock
	Options
Remainder of 2015	\$79
2016	106
2017	98
2018	67
2019	9
Total	\$359

(8) FAIR VALUE MEASUREMENTS

GAAP requires disclosure of estimated fair values for financial instruments. Such estimates are subjective in nature, and significant judgment is required regarding the risk characteristics of various financial instruments at a discrete point in time. Therefore, such estimates could vary significantly if assumptions regarding uncertain factors were to change. In addition, as the Company normally intends to hold the majority of its financial instruments until maturity,

it does not expect to realize many of the estimated amounts disclosed. The disclosures also do not include estimated fair value amounts for certain items which are not defined as financial instruments but which may have significant value. The Company does not believe that it would be practicable to estimate a representational fair value for these types of items as of December 31, 2014 and September 30, 2014. Because GAAP excludes certain items from fair value disclosure requirements, any aggregation of the fair value amounts presented would not represent the underlying value of the Company.

Accounting guidance regarding fair value measurements defines fair value and establishes a framework for measuring fair value in accordance with GAAP. Fair value is the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The following definitions describe the levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2: Significant observable inputs other than quoted prices included within Level 1, such as quoted prices in markets that are not active, and inputs other than quoted prices that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions market participants would use in pricing an asset or liability based on the best information available in the circumstances.

The Company used the following methods and significant assumptions to estimate fair value on a recurring basis:

Investment Securities Available for Sale

The estimated fair value of MBS and other investments are based upon the assumptions market participants would use in pricing the security. Such assumptions include quoted market prices (Level 1), market prices of similar securities or observable inputs (Level 2).

Mutual Funds

The estimated fair value of mutual funds are based upon quoted market price assumptions (Level 1).

The following table summarizes the balances of assets and liabilities measured at estimated fair value on a recurring basis at

December 31, 2014 (in thousands):

	Estimated Fair Value			Total
	Level 1	Level 2	Level 3	
Available for sale investment securities				
MBS:				
U.S. government agencies	\$—	\$528	\$—	\$528
Mutual funds	966	—	—	966
Total	\$966	\$528	\$—	\$1,494

There were no transfers among Level 1, Level 2 and Level 3 during the three months ended December 31, 2014.

The following table summarizes the balances of assets and liabilities measured at estimated fair value on a recurring basis at September 30, 2014 (in thousands):

	Estimated Fair Value			Total
	Level 1	Level 2	Level 3	
Available for sale investment securities				
MBS:				
U.S. government agencies	\$—	\$1,899	\$—	\$1,899
Mutual funds	958	—	—	958
Total	\$958	\$1,899	\$—	\$2,857

There were no transfers between Level 1, Level 2 and Level 3 during the year ended September 30, 2014.

The Company may be required, from time to time, to measure certain financial assets and financial liabilities at fair value on a nonrecurring basis in accordance with GAAP. These include assets that are measured at the lower of cost or market value that were recognized at fair value below cost at the end of the period.

The Company uses the following methods and significant assumptions to estimate fair value on a non-recurring basis:

Impaired Loans: The specific reserve for collateral dependent impaired loans was based on the estimated fair value of the collateral less estimated costs to sell, if applicable. The estimated fair value of impaired loans is calculated using the collateral value method or on a discounted cash flow basis. In some cases, adjustments were made to the appraised values due to various factors including age of the appraisal, age of comparables included in the appraisal, and known changes in the market and in the collateral. Such adjustments may be significant and typically result in a Level 3 classification of the inputs for determining fair value. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Investment Securities: The estimated fair value of investment securities are based upon the assumptions market participants would use in pricing the security. Such assumptions include quoted market prices (Level 1), market prices of similar securities or observable inputs (Level 2) and unobservable inputs such as dealer quotes, discounted cash flows or similar techniques (Level 3).

OREO and Other Repossessed Assets, net: The Company's OREO and other repossessed assets are initially recorded at estimated fair value less estimated costs to sell. This amount becomes the property's new basis. Estimated fair value was generally determined by management based on a number of factors, including third-party appraisals of estimated fair value in an orderly sale. Estimated costs to sell were based on standard market factors. The valuation of OREO and other repossessed assets is subject to significant external and internal judgment (Level 3).

The following table summarizes the balances of assets measured at estimated fair value on a non-recurring basis at December 31, 2014, and the total losses resulting from these estimated fair value adjustments for the three months ended December 31, 2014 (in thousands):

	Estimated Fair Value			Total Losses
	Level 1	Level 2	Level 3	
Impaired loans:				
Mortgage loans:				
One-to four-family	\$—	\$—	\$3,564	\$118
Multi-family	—	—	3,279	—
Commercial	—	—	1,477	—
Land	—	—	2,355	4
Consumer loans:				
Home equity and second mortgage	—	—	285	11
Total impaired loans (1)	—	—	10,960	133
Investment securities – held to maturity (2):				
MBS - private label residential	—	16	—	—
OREO and other repossessed assets (3)	—	—	8,220	44
Total	\$—	\$16	\$19,180	\$177

(1) The loss represents charge-offs on collateral dependent loans for estimated fair value adjustments based on the estimated fair value of the collateral, net of estimated costs to sell, if applicable.

(2) The loss represents OTTI credit-related charges on held to maturity MBS.

(3) The loss represents adjustments resulting from management's periodic reviews of the recorded value to determine whether the property continues to be recorded at the lower of its recorded book value or estimated fair value, net of

estimated costs to sell.

The following table summarizes the balances of assets and liabilities measured at estimated fair value on a non-recurring basis at September 30, 2014, and the total losses resulting from these estimated fair value adjustments for the year ended September 30, 2014 (in thousands):

	Estimated Fair Value			Total Losses
	Level 1	Level 2	Level 3	
Impaired loans:				
Mortgage loans:				
One-to four-family	\$—	\$—	\$3,655	\$1,106
Multi-family	—	—	3,278	—
Commercial	—	—	5,334	463
Land	—	—	3,779	260
Consumer loans:				
Home equity and second mortgage	—	—	284	47
Total impaired loans (1)	—	—	16,330	1,876
Investment securities – held to maturity (2):				
MBS - private label residential	—	40	—	31
OREO and other repossessed assets (3)	—	—	9,092	605
Total	\$—	\$40	\$25,422	\$2,512

The loss represents charge-offs on collateral dependent loans for estimated fair value adjustments based on the (1) estimated fair value of the collateral, net of estimated costs to sell, if applicable. Fair value is the recorded investment less the related allowance.

(2) The loss represents OTTI credit-related charges on held to maturity MBS.

The loss represents adjustments resulting from management's periodic reviews of the recorded value to determine (3) whether the property continues to be recorded at the lower of its recorded book value or estimated fair value, net of estimated costs to sell.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis as of December 31, 2014 (dollars in thousands):

	Estimated Fair Value	Valuation Technique(s)	Unobservable Input(s)	Range
Impaired loans	\$10,960	Market approach	Appraised value of underlying collateral less selling costs	NA
OREO and other repossessed assets	\$8,220	Market approach	Lower of appraised value or listing price less selling costs	NA

The following methods and assumptions were used by the Company in estimating fair value of its other financial instruments:

Cash and Cash Equivalents: The estimated fair value of financial instruments that are short-term or re-price frequently and that have little or no risk are considered to have an estimated fair value equal to the recorded value.

CDs Held for Investment: The estimated fair value of financial instruments that are short-term or re-price frequently and that have little or no risk are considered to have an estimated fair value equal to the recorded value.

Investment securities: See descriptions above.

FHLB Stock: No ready market exists for this stock, and it has no quoted market value. However, redemption of this stock has historically been at par value. During the three months ended December 31, 2014, 545 shares of FHLB

stock were redeemed from the Company at par value. Accordingly, par value is deemed to be a reasonable estimate of fair value.

Loans Receivable, Net: The fair value of non-impaired loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers for the same remaining maturities. Prepayments are based on the historical experience of the Bank. Fair values for impaired loans are estimated using the methods described above.

Loans Held for Sale: The estimated fair value is based on quoted market prices obtained from the Federal Home Loan Mortgage Corporation.

Accrued Interest: The recorded amount of accrued interest approximates the estimated fair value.

Deposits: The estimated fair value of deposits with no stated maturity date is included at the amount payable on demand. The estimated fair value of fixed maturity certificates of deposit is computed by discounting future cash flows using the rates currently offered by the Bank for deposits of similar remaining maturities.

FHLB Advances: The estimated fair value of FHLB advances is computed by discounting the future cash flows of the borrowings at a rate which approximates the current offering rate of the borrowings with a comparable remaining life.

Off-Balance-Sheet Instruments: Since the majority of the Company's off-balance-sheet instruments consist of variable-rate commitments, the Company has determined that they do not have a distinguishable estimated fair value.

The estimated fair values of financial instruments were as follows as of December 31, 2014 and September 30, 2014 (in thousands):

	December 31, 2014				
	Recorded Amount	Total	Level 1	Level 2	Level 3

(9) RECENT ACCOUNTING PRONOUNCEMENTS

In January 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") No. 2014-04, Receivables - Troubled Debt Restructurings by Creditors. The guidance clarifies when an in-substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of the residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and the real estate property recognized. ASU No. 2014-04 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The guidance can be adopted using a modified retrospective transition method or a prospective transition method. The adoption of ASU No. 2014-04 is not expected to have a material impact on the Company's condensed consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. This guidance implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of ASU No. 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract and (v) recognize revenue when (or as) the entity satisfies a performance obligation. ASU No. 2014-09 is effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2016. The adoption of ASU No. 2014-09 is not expected to have a material impact on the Company's condensed consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-11, Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures, which changes the accounting for repurchase-to-maturity transactions and repurchase financing arrangements. It also requires additional disclosures about repurchase agreements and other similar transactions. The ASU aligns the accounting for repurchase-to-maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase

agreements. Going forward, these transactions would all be accounted for as secured borrowings. This ASU is effective for the first interim or annual period beginning after December 15, 2014. The adoption of ASU No. 2014-11 is not expected to have a material impact on the Company's condensed consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-14, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure. The ASU addresses the classification of foreclosed loans that are either fully or partially guaranteed under government programs. ASU No. 2014-14 clarifies that upon foreclosure of fully or partially guaranteed loans which are guaranteed under government programs and meet certain conditions, the creditor will be required to reclassify the previously existing mortgage loan to a separate other receivable from the guarantor, measured at the amount of the loan balance (principal and interest) that it expects to collect from the guarantor. ASU No. 2014-14 will be effective for fiscal years, and interim periods within those years, beginning after December 15, 2014 for public organizations. The adoption of ASU No. 2014-14 is not expected to have a material impact on the Company's condensed consolidated financial statements.

In January 2015, the FASB issued ASU No. 2015-01, Income Statement - Extraordinary and Unusual Items (Subtopic 225-20). The ASU eliminates the need to separately classify, present and disclose extraordinary events. The disclosure of events or transactions that are unusual or infrequent in nature will be included in other guidance. The amendments in this ASU are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. The adoption of ASU No. 2015-01 is not expected to have a material impact on the Company's condensed consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

As used in this Form 10-Q, the terms "we," "our" and "Company" refer to Timberland Bancorp, Inc. and its consolidated subsidiaries, unless the context indicates otherwise. When we refer to "Bank" in this Form 10-Q, we are referring to Timberland Bank, a wholly-owned subsidiary of Timberland Bancorp, Inc. and the Bank's wholly-owned subsidiary, Timberland Service Corporation.

The following analysis discusses the material changes in the condensed consolidated financial condition and results of operations of the Company at and for the three months ended December 31, 2014. This analysis as well as other sections of this report contains certain "forward-looking statements."

Certain matters discussed in this Quarterly Report on Form 10-Q may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 concerning our future operations. These statements relate to our financial condition, results of operations, plans, objectives, future performance or business. Forward-looking statements are not statements of historical fact, are based on certain assumptions and often include the words "believes," "expects," "anticipates," "estimates," "forecasts," "intends," "plans," "targets," "potentially," "projects," "outlook" or similar expressions or future or conditional verbs such as "may," "will," "should," "would" and "could." Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, assumptions and statements about future economic performance and projections of financial items. These forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated or implied by our forward-looking statements, including, but not limited to: the credit risks of lending activities, including changes in the level and trend of loan delinquencies and write-offs and changes in our allowance for loan losses and provision for loan losses that may be impacted by deterioration in the housing and commercial real estate markets which may lead to increased losses and non-performing assets in our loan portfolio, and may result in our allowance for loan losses not being adequate to cover actual losses, and require us to materially increase our loan loss reserves; changes in general economic conditions, either nationally or in our market areas; changes in the levels of general interest rates, and the relative differences between short and long term interest rates, deposit interest rates, our net interest margin and funding sources; fluctuations in the demand for loans, the number of unsold homes, land and other properties and

fluctuations in real estate values in our market areas; secondary market conditions for loans and our ability to sell loans in the secondary market; results of examinations of us by the Board of Governors of the Federal Reserve System ("Federal Reserve") and of our bank subsidiary by the FDIC, the Washington State Department of Financial Institutions, Division of Banks or other regulatory authorities, including the possibility that any such regulatory authority may, among other things, institute an informal or formal enforcement action against us or our bank subsidiary which could require us to increase our allowance for loan losses, write-down assets, change our regulatory capital position or affect our ability to borrow funds or maintain or increase deposits or impose additional requirements and restrictions on us, any of which could adversely affect our liquidity and earnings; legislative or regulatory changes that adversely affect our business including changes in regulatory policies and principles, or the interpretation of regulatory capital or other rules, including as a result of Basel III; the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act and implementing regulations; our ability to attract and retain deposits; increases in premiums for deposit insurance; our ability to control operating costs and expenses; the use of estimates in determining fair value of certain

of our assets, which estimates may prove to be incorrect and result in significant declines in valuation; difficulties in reducing risk associated with the loans on our consolidated balance sheet; staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our work force and potential associated charges; the failure or security breach of computer systems on which we depend; our ability to retain key members of our senior management team; costs and effects of litigation, including settlements and judgments; our ability to implement our business strategies; our ability to successfully integrate any assets, liabilities, customers, systems, and management personnel we may acquire into our operations and our ability to realize related revenue synergies and cost savings within expected time frames and any goodwill charges related thereto; our ability to manage loan delinquency rates; increased competitive pressures among financial services companies; changes in consumer spending, borrowing and savings habits; the availability of resources to address changes in laws, rules, or regulations or to respond to regulatory actions; our ability to pay dividends on our common stock; adverse changes in the securities markets; inability of key third-party providers to perform their obligations to us; changes in accounting policies and practices, as may be adopted by the financial institution regulatory agencies or the FASB, including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods; the economic impact of war or any terrorist activities; other economic, competitive, governmental, regulatory, and technological factors affecting our operations; pricing, products and services; and other risks detailed in our reports filed with the Securities and Exchange Commission, including our 2014 Form 10-K.

Any of the forward-looking statements that we make in this Form 10-Q and in the other public statements we make are based upon management's beliefs and assumptions at the time they are made. We do not undertake and specifically disclaim any obligation to publicly update or revise any forward-looking statements included in this report or to update the reasons why actual results could differ from those contained in such statements, whether as a result of new information, future events or otherwise. We caution readers not to place undue reliance on any forward-looking statements. These risks could cause our actual results for fiscal 2015 and beyond to differ materially from those expressed in any forward-looking statements by, or on behalf of us, and could negatively affect the Company's financial condition and results of operations as well as its stock price performance.

Overview

Timberland Bancorp, Inc., a Washington corporation, is the holding company for Timberland Bank. The Bank opened for business in 1915 and serves consumers and businesses across Grays Harbor, Thurston, Pierce, King, Kitsap and Lewis counties, Washington with a full range of lending and deposit services through its 22 branches (including its main office in Hoquiam). At December 31, 2014, the Company had total assets of \$749.92 million and total shareholders' equity of \$84.27 million. The Company's business activities generally are limited to passive investment activities and oversight of its investment in the Bank. Accordingly, the information set forth in this report relates primarily to the Bank's operations.

The profitability of the Company's operations depends primarily on its net interest income after provision for loan losses. Net interest income is the difference between interest income, which is the income that the Company earns on interest-earning assets, which are primarily loans and investments, and interest expense, the amount the Company pays on its interest-bearing liabilities, which are primarily deposits and borrowings. Net interest income is affected by changes in the volume and mix of interest earning assets, interest earned on those assets, the volume and mix of interest bearing liabilities and interest paid on those interest bearing liabilities. Management strives to match the re-pricing characteristics of the interest earning assets and interest bearing liabilities to protect net interest income from changes in market interest rates and changes in the shape of the yield curve.

The provision for loan losses is dependent on changes in the loan portfolio and management's assessment of the collectability of the loan portfolio as well as prevailing economic and market conditions. The provision for loan losses reflects the amount that the Company believes is adequate to cover estimated credit losses in its loan portfolio.

Net income is also affected by non-interest income and non-interest expenses. For the three month period ended December 31, 2014, non-interest income consisted primarily of service charges on deposit accounts, gain on sale of loans, ATM and debit card interchange transaction fees, an increase in the cash surrender value of BOLI and other operating income. Non-interest income is reduced by net OTTI losses on investment securities and losses on the sale of investment securities. Non-interest expenses consisted primarily of salaries and employee benefits, premises and equipment, advertising, ATM and debit card processing expenses, OREO and other repossessed asset expenses, postage and courier expenses, professional fees, deposit insurance premiums, other insurance premiums, state and local taxes, loan administration and foreclosure expenses, deposit operation expenses and data processing expenses and telecommunication expenses. Non-interest income and non-interest expenses are affected by the growth of our operations and growth in the number of loan and deposit accounts.

Results of operations may be affected significantly by general and local economic and competitive conditions, changes in market interest rates, governmental policies and actions of regulatory authorities.

The Bank is a community-oriented bank which has traditionally offered a variety of savings products to its retail customers while concentrating its lending activities on real estate mortgage loans. Lending activities have been focused primarily on the origination of loans secured by real estate, including residential construction loans, one- to four-family residential loans, multi-family loans and commercial real estate loans. The Bank originates adjustable-rate residential mortgage loans that do not qualify for sale in the secondary market. The Bank also originates commercial business loans and other consumer loans.

Critical Accounting Policies and Estimates

The Company has identified several accounting policies that as a result of judgments, estimates and assumptions inherent in those policies, are critical to an understanding of the Company's Condensed Consolidated Financial Statements. Critical accounting policies and estimates are discussed in the Company's 2014 Form 10-K under Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operation – Critical Accounting Policies and Estimates." That discussion highlights estimates the Company makes that involve uncertainty or potential for substantial change. There have been no material changes in the Company's critical accounting policies and estimates as previously disclosed in the Company's 2014 Form 10-K.

Comparison of Financial Condition at December 31, 2014 and September 30, 2014

The Company's total assets increased by \$4.35 million, or 0.6%, to \$749.92 million at December 31, 2014 from \$745.57 million at September 30, 2014. The increase in total assets was primarily due to increases in net loans receivable and CDs held for investment, partially offset by decreases in total cash and cash equivalents, investment securities and OREO and other repossessed assets.

Net loans receivable increased by \$7.84 million, or 1.4%, to \$573.60 million at December 31, 2014 from \$565.75 million at September 30, 2014. The increase was primarily due to increases in one-to four-family loans and commercial business loans. These increases to net loans receivable were partially offset by decreases in land loans and multi-family loans.

Total deposits increased by \$2.87 million, or 0.5%, to \$617.99 million at December 31, 2014 from \$615.12 million at September 30, 2014. The increase was primarily a result of increases in savings account balances and N.O.W. account balances, which were partially offset by decreases in non-interest bearing accounts balances and certificates of deposit account balances.

Shareholders' equity increased by \$1.49 million, or 1.8%, to \$84.27 million at December 31, 2014 from \$82.78 million at September 30, 2014. The increase in shareholders' equity was primarily due to net income of \$1.73 million for the quarter, which was partially offset by dividend payments of \$352,000 to common shareholders.

A more detailed explanation of the changes in significant balance sheet categories follows:

Cash and Cash Equivalents and CDs Held for Investment: Cash and cash equivalents and CDs held for investment increased by \$153,000, or 0.1%, to \$108.35 million at December 31, 2014 from \$108.20 million at September 30, 2014. The increase was primarily due to a \$2.15 million increase in CDs held for investment which was partially offset by a \$2.00 million decrease in cash and cash equivalents.

Investment Securities: Investment securities decreased by \$1.46 million, or 17.9%, to \$6.70 million at December 31, 2014 from \$8.16 million at September 30, 2014, primarily due to the sale of \$1.22 million in agency

mortgaged-backed securities and scheduled amortization and prepayments. The sale of the investment securities resulted in a \$45,000 gain. For additional information on investment securities, see Note 3 of the Notes to Unaudited Condensed Consolidated Financial Statements contained in “Item 1, Financial Statements.”

Loans: Net loans receivable increased by \$7.84 million, or 1.4%, to \$573.60 million at December 31, 2014 from \$565.75 million at September 30, 2014. The increase in the portfolio was primarily a result of a \$4.49 million increase in one- to four-family loans, a \$2.40 million increase in commercial business loans, a \$759,000 increase in commercial real estate loans, a \$756,000 increase in construction and land development loans, a \$587,000 increase in total consumer loans and a \$584,000 decrease in the undisbursed portion of construction loans in process. These increases in net loans receivable were partially offset by a \$956,000 decrease in land loans and a \$783,000 decrease in multi-family loans.

Loan originations decreased \$2.86 million, or 5.4% to \$50.09 million for the three months ended December 31, 2014 from \$52.95 million for the three months ended December 31, 2013. The Company continued to sell longer-term fixed rate loans for asset liability management purposes and to generate non-interest income. Sales of fixed rate one-to four-family mortgage loans decreased \$2.10 million, or 20.5%, to \$8.16 million for the three months ended December 31, 2014 compared to \$10.26 million for the three months ended December 31, 2013 as refinance demand for single family loans decreased.

For additional information, see Note 5 of the Notes to Unaudited Condensed Consolidated Financial Statements contained in "Item 1, Financial Statements."

Premises and Equipment: Premises and equipment decreased by \$105,000, or 0.6%, to \$17.57 million at December 31, 2014 from \$17.68 million at September 30, 2014. The decrease was primarily due to depreciation.

OREO (Other Real Estate Owned): OREO and other repossessed assets decreased by \$872,000, or 9.6%, to \$8.22 million at December 31, 2014 from \$9.09 million at September 30, 2014. The decrease was primarily due to the disposition of five OREO properties totaling \$902,000 and OREO fair value write-downs of \$44,000, partially offset by the addition of \$74,000 in OREO properties and other repossessed assets. At December 31, 2014, total OREO and other repossessed assets consisted of 37 individual properties. The properties consisted of 23 land parcels totaling \$3.91 million, four commercial real estate properties totaling \$2.19 million, nine single-family homes totaling \$1.98 million and one multi-family property of \$142,000.

Goodwill and CDI: The recorded amount of goodwill of \$5.65 million at December 31, 2014 was unchanged from September 30, 2014. The recorded amount of the CDI decreased \$3,000, or 100.0%, to none at December 31, 2014 from \$3,000 at September 30, 2014. The decrease was due to scheduled amortization of the CDI.

Deposits: Deposits increased by \$2.87 million, or 0.5%, to \$617.99 million at December 31, 2014 from \$615.12 million at September 30, 2014. The increase was primarily a result of a \$2.60 million increase in savings accounts, a \$1.01 million increase in N.O.W. checking accounts and a \$129,000 increase in money market accounts. These increases were partially offset by a \$476,000 decrease in non-interest bearing checking accounts and a \$392,000 decrease in certificates of deposit accounts.

FHLB Advances: The Company has short- and long-term borrowing lines with the FHLB with total credit available on the lines equal to 25% of the Bank's total assets, limited by available collateral. Borrowings are considered short-term when the original maturity is less than one year. At December 31, 2014 FHLB advances and other borrowings consisted of long-term FHLB advances with scheduled maturities at various dates in fiscal 2017 which bear interest at rates ranging from 3.69% to 4.34%. A portion of these advances may be called by the FHLB at a date earlier than the scheduled maturity date. FHLB advances remained unchanged at \$45.00 million at December 31, 2014 and September 30, 2014.

Shareholders' Equity: Total shareholders' equity increased by \$1.49 million, or 1.8%, to \$84.27 million at December 31, 2014 from \$82.78 million at September 30, 2014. The increase was primarily due to net income of \$1.73 million for the three months ended December 31, 2014, which was partially offset by the payment of \$352,000 in dividends on the Company's common stock.

Comparison of Operating Results for the Three Months Ended December 31, 2014 and 2013

Net income increased \$116,000, or 7.2%, to \$1.73 million for the quarter ended December 31, 2014 from \$1.61 million for the quarter ended December 31, 2013. Net income to common shareholders increased \$322,000 or 22.9%, to \$1.73 million for the quarter ended December 31, 2014 from \$1.41 million for the quarter ended December 31,

2013. Net income per diluted common share increased \$0.04, or 20.00%, to \$0.24 for the quarter ended December 31, 2014 from \$0.20 for the quarter ended December 31, 2013. The increase in net income was primarily due to an increase in net interest income.

For the quarter ended December 31, 2013, net income available to common shareholders was net of a dividend accrual and discount accretion related to our Series A Preferred Stock of \$206,000, or approximately \$0.03 per diluted common share. These preferred stock adjustments were not required in the quarter ended December 31, 2014 due to the redemption of the remaining Series A Preferred Stock in December 2013.

A more detailed explanation of the income statement categories is presented below.

Net Interest Income: Net interest income increased by \$244,000, or 3.78% to \$6.70 million for the quarter ended December 31, 2014 from \$6.46 million for the quarter ended December 31, 2013. The net interest margin increased to 3.88%

for the quarter ended December 31, 2014 from 3.78% for the quarter ended December 31, 2013 primarily due to the increase in the average balance of loans receivable and the collection of non-accrual interest.

Total interest and dividend income increased by \$205,000 or 2.7%, to \$7.69 million for the quarter ended December 31, 2014 from \$7.48 million for the quarter ended December 31, 2013 as the yield on interest bearing assets increased to 4.45% from 4.37%. The increase in the weighted average yield on interest-bearing assets was primarily due to the collection of \$125,000 of non-accrual interest on two loans. Total interest expense decreased by \$39,000 or 3.8%, to \$983,000 for the quarter ended December 31, 2014 from \$1.02 million for the quarter ended December 31, 2013 as the average rate paid on interest-bearing liabilities decreased to 0.70% for the quarter ended December 31, 2014 from 0.73% for the quarter ended December 31, 2013 and the average balance of interest-bearing liabilities decreased by \$4.57 million. The decrease in funding costs was primarily a result of CDs repricing at lower market rates and a \$6.78 million decrease in the average balance of CDs.

Average Balances, Interest and Average Yields/Cost

The following tables set forth, for the periods indicated, information regarding average balances of assets and liabilities as well as the total dollar amounts of interest income from average interest-bearing assets and interest expense on average interest-bearing liabilities and average yields and costs. Such yields and costs for the periods indicated are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the periods presented. (Dollars in thousands)

	Three Months Ended December 31,						
	2014			2013			
	Average Balance	Interest and Dividends	Yield/ Cost	Average Balance	Interest and Dividends	Yield/ Cost

Total liabilities and shareholders' equity	\$751,334			\$743,549			
Net interest income		\$6,703			\$6,459		
Interest rate spread			3.75	%		3.64	%
Net interest margin (4)			3.88	%		3.78	%
Ratio of average interest-bearing assets to average interest-bearing liabilities			124.71	%		122.37	%

(1) Interest yield on loans and investment securities is calculated assuming a 30/360 basis; interest yield on all other categories is based on 365/365 interest basis.

(2) Average balances include loans and investment securities on non-accrual status.

(3) Includes FHLB advances with original maturities of one year or greater.

(4) Net interest income divided by total average interest-bearing assets, annualized.

Rate Volume Analysis

The following table sets forth the effects of changing rates and volumes on the net interest income of the Company. Information is provided with respect to the (i) effects on interest income attributable to changes in volume (changes in volume multiplied by prior rate), and (ii) effects on interest income attributable to changes in rate (changes in rate multiplied by prior volume), and (iii) the net change (sum of the prior columns). Changes in rate/volume have been allocated to rate and volume variances based on the absolute values of each. (In thousands)

	Three months ended December 31, 2014 compared to three months ended December 31, 2013 increase (decrease) due to		
	Rate	Volume	Net Change
Interest-bearing assets:			
Loans receivable (1)	\$(56)	\$247	\$191
Investment securities	(9)	13	4
Dividends from mutual funds and FHLB stock	(1)	—	(1)

Total net decrease in expense on interest-bearing liabilities	(24)	(15)	(39)
Net (decrease) increase in net interest income	\$(19)	\$263	\$244

(1) Includes loans originated for sale.

Provision for Loan Losses: There was no provision for loan losses for the quarters ended December 31, 2014 and 2013. Net charge-offs for the quarter ended December 31, 2014 decreased to \$105,000 from \$391,000 for the quarter ended December 31, 2013.

The Company has established a comprehensive methodology for determining the provision for loan losses. On a quarterly basis the Company performs an analysis that considers pertinent factors underlying the quality of the loan portfolio. The factors include changes in the amount and composition of the loan portfolio, historic loss experience for various loan segments, changes in economic conditions, delinquency rates, a detailed analysis of impaired loans, and other factors to determine an appropriate level of allowance for loan losses. Based on its comprehensive analysis, management believes the allowance for loan losses of \$10.32 million at December 31, 2014 (1.77% of loans receivable and loans held for sale and 96% of non-performing loans) was adequate to provide for probable losses based on an evaluation of known and inherent risks in the loan portfolio at that date. Impaired loans are subjected to an impairment analysis to determine an appropriate reserve amount to be allocated to each loan. The aggregate principal impairment reserve amount determined at December 31, 2014 was \$2.59 million compared to \$2.59 million at December 31, 2013. The allowance for loan losses was \$10.75 million (1.90% of loans receivable and loans held for sale and 75% of non-performing loans) at December 31, 2013.

While management believes the estimates and assumptions used in its determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will not be proved incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be

required will not adversely impact the Company's consolidated financial condition and results of operations. In addition, the determination of the amount of the Company's allowance for loan losses is subject to review by bank regulators as part of the routine examination process, which may result in the establishment of additional reserves based upon their analysis of information available to them at the time of their examination. Any material increase in the allowance for loan losses would adversely affect the Company's financial condition and results of operations. For additional information, see Note 5 of the Notes to Unaudited Condensed Consolidated Financial Statements contained in "Item 1, Financial Statements."

Non-interest Income: Total non-interest income decreased \$72,000 or 3.3%, to \$2.12 million for the quarter ended December 31, 2014 from \$2.20 million for the quarter ended December 31, 2013. The decrease in non-interest income was primarily due to a \$107,000 decrease in service charges on deposits and \$66,000 decrease in gain on sale of loans, which was partially offset by a \$45,000 increase in ATM and debit card interchange transaction fees and a \$45,000 increase in gain on sale of investment securities. The decrease in service charges on deposits was primarily due to a decreased number of checking account overdrafts and the decrease in gain on sale of loans was primarily due to a decrease in the dollar volume of fixed-rate one- to four-family loans sold during the current quarter. The increase in ATM and debit card interchange transaction fees was primarily due to an increase in debit card transactions and the \$45,000 gain on sale of investment securities was due to the sale of \$1.22 million of agency mortgage-backed securities.

Non-interest Expense: Total non-interest expense increased by \$33,000, or 0.5%, to \$6.27 million for the quarter ended December 31, 2014 from \$6.24 million for the quarter ended December 31, 2013. The increased expenses were primarily due to a \$112,000 increase in ATM and debit card processing expense, a \$49,000 increase in data processing and telecommunications expense and smaller increases in several other categories. These increases were partially offset by an \$83,000 decrease in OREO and other repossessed asset expense and a \$66,000 decrease in loan administration and foreclosure expense. The increases in ATM and debit card interchange fee expense and data processing and telecommunications expense were primarily a result of higher ongoing expenses associated with the Company's recent technology upgrades, which included outsourcing the core processing system and upgrading its electronic funds transfer platform. The decrease in OREO and other repossessed assets expense was primarily due to a reduction in the level of fair value write-downs during the current quarter and a decrease in property tax expense on OREOs. The decrease in loan administration and foreclosure expense was primarily a result of decreased foreclosure related activity.

Provision for Federal Income Taxes: The provision for federal income taxes increased \$23,000, or 2.9%, to \$825,000 for the quarter ended December 31, 2014 from \$802,000 for the quarter ended December 31, 2013, primarily as a result of increased income before federal income taxes. The Company's effective tax rate was 32.33% for the quarter ended December 31, 2014 and 33.24% for the quarter ended December 31, 2013.

Liquidity

The Company's primary sources of funds are customer deposits, proceeds from principal and interest payments on loans and investment securities, proceeds from the sale of loans, proceeds from maturing securities and maturing CDs held for investment, FHLB advances, and other borrowings. While maturities and the scheduled amortization of loans are a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition.

Liquidity management is both a short and long-term responsibility of the Bank's management. The Bank adjusts its investments in liquid assets based upon management's assessment of (i) expected loan demand, (ii) projected loan

sales, (iii) expected deposit flows, and (iv) yields available on interest-bearing deposits. Excess liquidity is invested generally in interest-bearing overnight deposits and other short-term investments.

The Bank generally maintains sufficient cash and short-term investments to meet short-term liquidity needs. At December 31, 2014, the Bank's regulatory liquidity ratio (net cash, and short-term and marketable assets, as a percentage of net deposits and short-term liabilities) was 16.52%.

The Company's total cash and cash equivalents decreased by \$2.00 million, or 2.8% to \$70.36 million at December 31, 2014 from \$72.35 million at September 30, 2014. If the Bank requires funds that exceed its ability to generate them internally, it has additional borrowing capacity with the FHLB, the Federal Reserve Bank of San Francisco ("FRB") and Pacific Coast Bankers' Bank ("PCBB"). At December 31, 2014 the Bank maintained an uncommitted credit facility with the FHLB that provided for immediately available advances up to an aggregate amount equal to 25% of total assets, limited by available collateral. The

Bank also has a Variable Amount Letter of Credit ("VLOC") of up to \$7.00 million with the FHLB for the purpose of collateralizing Washington State public deposits. Any amount pledged by the FHLB under the VLOC reduces the Bank's available borrowing amount under the FHLB advance agreement. At December 31, 2014, the Bank had \$45.00 million in advances outstanding and \$7.00 million pledged under the VLOC, which left \$134.28 million available for additional borrowings. The Bank maintains a short-term borrowing line with the FRB with available total credit based on eligible collateral. At December 31, 2014, the Bank had \$42.76 million available for borrowings with the FRB and there was no outstanding balance on this borrowing line. The Bank also maintains a \$10.00 million overnight borrowing line with PCBB. At December 31, 2014, the Bank did not have an outstanding balance on this borrowing line.

The Bank's primary investing activity is the origination of one- to four-family mortgage loans, commercial mortgage loans, construction loans, consumer loans, and commercial business loans. At December 31, 2014, the Bank had loan commitments totaling \$53.54 million and undisbursed construction loans in process totaling \$28.83 million. The Bank anticipates that it will have sufficient funds available to meet current loan commitments. CDs that are scheduled to mature in less than one year from December 31, 2014 totaled \$98.33 million. Historically, the Bank has been able to retain a significant amount of its non-brokered CDs as they mature. At December 31, 2014, the Bank had \$3.19 million in brokered CDs.

Capital Resources

Timberland Bancorp, Inc. is a bank holding company registered with the Federal Reserve. Bank holding companies are subject to capital adequacy requirements of the Federal Reserve under the Bank Holding Company Act of 1956, as amended, and the regulations of the Federal Reserve. Timberland Bank, as a state-chartered, federally insured savings bank, is subject to the capital requirements established by the FDIC.

The capital adequacy requirements are quantitative measures established by regulation that require Timberland Bancorp, Inc. and the Bank to maintain minimum amounts and ratios of capital. Federally-insured state-chartered banks are required to maintain minimum levels of regulatory capital. Under current FDIC regulations, insured state-chartered banks generally must maintain (i) a ratio of Tier 1 leverage capital to total assets of at least 3.0%, (4.0% to 5.0% for all but the most highly rated banks), (ii) a ratio of Tier 1 capital to risk weighted assets of at least 4.0% and (iii) a ratio of total capital to risk weighted assets of at least 8.0%. The Federal Reserve requires Timberland Bancorp, Inc. to maintain capital adequacy that generally parallels the FDIC requirements. At December 31, 2014, Timberland Bancorp, Inc. and the Bank each exceeded all applicable capital requirements.

The following table compares the Company's and the Bank's actual capital amounts at December 31, 2014 to its minimum regulatory capital requirements at that date (dollars in thousands):

	Actual Amount	Ratio	Regulatory Minimum To Be "Adequately Capitalized"		To Be "Well Capitalized" Under Prompt Corrective Action Provisions		
			Amount	Ratio	Amount	Ratio	
Tier 1 leverage capital:

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no material changes in information concerning market risk from the information provided in the Company's Form 10-K for the fiscal year ended September 30, 2014.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: An evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) was carried out under the supervision and with the participation of the Company's Chief Executive Officer, Chief Financial Officer and several other members of the Company's senior management as of the end of the period covered by this report. The Company's Chief Executive Officer and Chief Financial Officer concluded that as of December 31, 2014 the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) accumulated and communicated to the Company's management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

(b) **Changes in Internal Controls:** There have been no changes in our internal control over financial reporting (as defined in 13a-15(f) of the Exchange Act) that occurred during the quarter ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. The Company continued, however, to implement suggestions from its internal auditor and independent auditors to strengthen existing controls. The Company does not expect that its disclosure controls and procedures and internal control over financial reporting will prevent all errors and fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been

detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns in controls or procedures can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals

under all potential future conditions; as over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Neither the Company nor the Bank is a party to any material legal proceedings at this time. From time to time, the Bank is involved in various claims and legal actions arising in the ordinary course of business.

Item 1A. Risk Factors

There have been no material changes in the Risk Factors previously disclosed in Item 1A of the Company's 2014 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None to be reported.
