FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-33652

FIRST FINANCIAL NORTHWEST, INC.
(Exact name of registrant as specified in its charter)

Washington 26-0610707
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification Number)

201 Wells Avenue South, Renton, Washington 98057
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (425) 255-4400

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES X NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES X NO

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company ____

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: As of August 2, 2016, 13,326,616 shares of the issuer's common stock, \$0.01 par value per share, were outstanding.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Description of Business

First Financial Northwest, Inc. ("First Financial Northwest"), a Washington corporation, was formed on June 1, 2007 for the purpose of becoming the holding company for First Financial Northwest Bank ("the Bank") in connection with the conversion from a mutual holding company structure to a stock holding company structure completed on October 9, 2007. First Financial Northwest's business activities generally are limited to passive investment activities and oversight of its investment in First Financial Northwest Bank. Accordingly, the information presented in the consolidated financial statements and accompanying data, relates primarily to First Financial Northwest Bank. First Financial Northwest is a bank holding company, having converted from a savings and loan holding company on March 31, 2015, and as a bank holding company is subject to regulation by the Federal Reserve Bank of San Francisco. First Financial Northwest Bank is regulated by the Federal Deposit Insurance Corporation ("FDIC") and the Washington State Department of Financial Institutions ("DFI").

First Financial Northwest Bank is headquartered in Renton, Washington, where its main, full service retail branch is located. In addition, the Bank opened branches in Mill Creek, Washington in the third quarter of 2015 and Edmonds, Washington in the first quarter of 2016. A fourth branch location opened in July 2016 at The Landing in Renton, Washington. The Bank's primary market area consists of King, Snohomish, Pierce and Kitsap counties, Washington.

The Bank is a portfolio lender, originating one-to-four family residential, multifamily, commercial real estate, construction/land development, business, and consumer loans. Loans are primarily funded by deposits from the general public, supplemented by borrowings from the Federal Home Loan Bank of Des Moines ("FHLB") and deposits raised in the national brokered deposit market.

As used throughout this report, the terms "we," "our," "us," or the "Company" refer to First Financial Northwest, Inc. and its consolidated subsidiary First Financial Northwest Bank, unless the context otherwise requires.

Note 2 - Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). Accordingly, they do not include all of the information and footnotes required by U.S. Generally Accepted Accounting Principles ("GAAP") for complete financial statements. These unaudited interim consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the SEC. In our opinion, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of the unaudited interim consolidated financial statements in accordance with GAAP have been included. All significant intercompany balances and transactions between the Company and its subsidiaries have been eliminated in consolidation. Operating results for the six months ended June 30, 2016, are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. In preparing the unaudited consolidated financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change relate to the allowance for loan and lease losses ("ALLL"), the valuation of other real estate owned ("OREO") and the underlying collateral of impaired loans, deferred tax assets, and the fair value of financial instruments.

The Company's activities are considered to be a single industry segment for financial reporting purposes. The Company is engaged in the business of attracting deposits from the general public and originating and purchasing

loans for its portfolio. Substantially all income is derived from a diverse base of commercial, multifamily, and residential real estate loans, consumer lending activities, and investments.

Certain amounts in the unaudited interim consolidated financial statements for prior periods have been reclassified to conform to the current unaudited financial statement presentation with no effect on consolidated net income or stockholders' equity.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 3 - Recently Issued Accounting Pronouncements

In January 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-01, Financial Instruments--Overall, Recognition and Measurement of Financial Assets and Financial Liabilities. ASU 2016-01 requires equity investments (except those accounted for under the equity method of accounting) to be measured at fair value with changes in fair value recognized in net income. The amendments in this ASU also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in instrument-specific credit risk. In addition, the ASU eliminates the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet. The ASU also clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. The amendments in this ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early application is permitted for fiscal years or interim periods that have not yet been issued if adopted at the beginning of the fiscal year. The adoption of ASU 2016-01 is not expected to have a material impact on the Company's consolidated financial statements.

In February 2016, FASB issued ASU No. 2016-02, Leases (Topic 842). ASU No. 2016-02 requires lessees to recognize on the balance sheet the assets and liabilities arising from operating leases. A lessee should recognize a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. A lessee should include payments to be made in an optional period only if the lessee is reasonably certain to exercise an option to extend the lease or not to exercise an option to terminate the lease. For a finance lease, interest payments should be recognized separately from amortization of the right-of-use asset in the statement of comprehensive income. For operating leases, the lease cost should be allocated over the lease term on a generally straight-line basis. The amendments in ASU 2016-02 are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application of the amendments in the ASU is permitted. The adoption of ASU 2016-02 is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, FASB issued ASU No. 2016-06, Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments. Topic 815 requires that embedded derivatives be separated from the host contract and accounted for separately as derivatives if certain criteria are met, including the "clearly and closely related" criterion. The amendments in this ASU clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. An entity performing the assessment under the amendments is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. The amendments in this ASU apply to all entities that are issuers of or investors in debt instruments (or hybrid financial instruments that are determined to have a debt host) with embedded call (put) options. This ASU applies to all entities that are issuers of or investors in debt instruments (or hybrid financial instruments that are determined to have a debt host) with embedded call (put) options. The ASU is effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. Adoption of ASU 2016-06 is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, FASB issued ASU No. 2016-09, Compensation--Stock Compensation (Topic 718). This ASU was issued as part of the FASB's Simplification Initiative and addresses accounting for share-based payment transactions, including income tax consequences and classification on the statement of cash flows. Under this ASU, all excess tax benefits and deficiencies should be recognized as income tax expense or benefit in the income statement. The tax

effect of vested or exercised awards should be reported separately in the period in which they occur. In the statement of cash flows, excess tax benefits should be classified with other income tax cash flows as an operating activity. Entities have the option of accounting for forfeitures when they occur or to estimate the number of awards that are expected to vest. The amendments in this ASU are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted in any interim or annual period. First Financial Northwest has adopted ASU 2016-09 with no material impact on the Company's consolidated financial statements.

In June 2016, FASB issued ASU No. 2016-13, Financial Instruments--Credit Losses (Topic 326). This ASU replaces the existing incurred loss impairment methodology that recognizes credit losses when a probable loss has been incurred with new methodology where loss estimates are based upon lifetime expected credit losses. The amendments in this ASU require a financial asset that is measured at amortized cost to be presented at the net amount expected to be collected. The income statement would then reflect the measurement of credit losses for newly recognized financial assets as well as changes to the expected credit losses that have taken place during the reporting period. The measurement of expected credit losses will be based on historical information, current conditions, and reasonable and supportable forecasts that impact the collectability of the reported amount. Available-for-sale securities will bifurcate the fair value mark and establish an allowance for credit losses through the income statement for the

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

credit portion of that mark. The interest portion will continue to be recognized through accumulated other comprehensive income or loss. The change in allowance recognized as a result of adoption will occur through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the ASU is adopted. The amendments in this ASU are effective for fiscal years beginning after December 15, 2019 with early adoption permitted after December 15, 2018. We are evaluating the impact of the adoption of ASU 2016-13.

Note 4 - Investments

Investments available-for-sale are summarized as follows at the dates indicated:

	June 30, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(In thousands)			
Mortgage-backed investments:				
Fannie Mae	\$47,808	\$ 1,076	\$ (24)	\$48,860
Freddie Mac	24,010	639	—	24,649
Ginnie Mae	12,194	128	(79)	12,243
Municipal bonds	12,824	778	—	13,602
U.S. Government agencies	12,749	212	(11)	12,950
Corporate bonds	24,008	55	(339)	23,724
Total	\$133,593	\$ 2,888	\$ (453)	\$136,028
	December 31, 2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(In thousands)			
Mortgage-backed investments:				
Fannie Mae	\$50,288	\$ 260	\$ (227)	\$50,321
Freddie Mac	26,011	243	(117)	26,137
Ginnie Mae	13,802	44	(114)	13,732
Municipal bonds	11,787	277	—	12,064
U.S. Government agencies	13,541	89	(88)	13,542
Corporate bonds	14,010	4	(245)	13,769
Total	\$129,439	\$ 917	\$ (791)	\$129,565

The tables below summarize the aggregate fair value and gross unrealized loss by length of time those investment securities have been continuously in an unrealized loss position at the dates indicated. At both June 30, 2016 and December 31, 2015, we had no municipal bonds in an unrealized loss position.

On a quarterly basis, management makes an assessment to determine whether there have been any events or economic circumstances to indicate that a security on which there is an unrealized loss is impaired on an other-than-temporary basis. The Company considers many factors including the severity and duration of the impairment, recent events specific to the issuer or industry, and for debt securities, external credit ratings and recent downgrades. Securities on which there is an unrealized loss that is deemed to be an other-than-temporary impairment ("OTTI") are written down to fair value. If the Company intends to sell a debt security, or it is likely that the Company will be required to sell the debt security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If the Company does not intend to sell the debt security and it is not likely that it will be required to sell the debt security but does not expect to recover the entire amortized cost basis of the debt security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a debt security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the debt security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income ("OCI"). Impairment losses related to all other factors are presented as separate categories within OCI. At June 30, 2016 and December 31, 2015, the Company had 14 securities and 43 securities in an unrealized loss position, respectively, of which three were in an unrealized loss position for 12 months or more. Management reviewed the financial condition of the entities issuing municipal or corporate bonds at June 30, 2016 and December 31, 2015, and determined that an OTTI charge was not warranted.

The amortized cost and estimated fair value of investments available-for-sale at June 30, 2016, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Investments not due at a single maturity date, primarily mortgage-backed investments, are shown separately.

Under Washington state law, in order to participate in the public funds program the Company is required to pledge eligible securities as collateral in an amount equal to 100% of the public deposits held. Investment securities with market values of \$15.8 million and \$17.4 million were pledged as collateral for public deposits at June 30, 2016 and December 31, 2015, respectively, both of which exceeded the collateral requirements established by the Washington Public Deposit Protection Commission.

For the three and six months ended June 30, 2016, we had calls on investment securities of \$385,000, and \$430,000, respectively, with no gain or loss. For the three and six months ended June 30, 2015, we had calls on investment securities of \$1.5 million and \$1.6 million, respectively, with no gain or loss. There were no sales of investment securities during the six months ended June 30, 2016 or 2015.

Note 5 - Loans Receivable

Loans receivable are summarized as follows at the dates indicated:

	June 30, 2016	December 31, 2015
	(In thousands)	
One-to-four family residential:		
Permanent owner occupied	\$ 146,762	\$ 147,229
Permanent non-owner occupied	104,970	106,543
	251,732	253,772
Multifamily:		
Permanent	132,189	122,747
Construction ⁽¹⁾	35,565	21,115
	167,754	143,862
Commercial real estate:		
Permanent	285,449	244,211
Land ⁽²⁾	16,822	8,290
	302,271	252,501
Construction/land development:		
One-to-four family residential	64,312	52,233
Multifamily ⁽¹⁾	41,716	25,551
Land development ⁽²⁾	5,773	8,768
	111,801	86,552
Business	7,208	7,604
Consumer	6,333	6,979
Total loans	847,099	751,270
Less:		
Loans in process ("LIP")	68,979	53,854
Deferred loan fees, net	1,940	2,881
Allowance for loan and lease losses ("ALLL")	10,134	9,463
Loans receivable, net	\$ 766,046	\$ 685,072

⁽¹⁾ Construction/land development excludes construction loans that will convert to permanent loans. The Company considers these loans to be "rollovers" in that one loan is originated for both the construction loan and permanent financing. These loans are classified according to the underlying collateral. At June 30, 2016 the Company had \$35.6 million or 21.2% of its total multifamily portfolio in these rollover loans, as compared to \$21.1 million or 14.7% at December 31, 2015. At June 30, 2016, and December 31, 2015, none of the Company's commercial real estate portfolio or one-to-four family residential portfolio included these rollover loans.

⁽²⁾ At June 30, 2016, and December 31, 2015, \$16.8 million and \$8.3 million, respectively, of commercial real estate loans were not included in the construction/land development category because the Company classifies raw land or buildable lots (where we do not intend to finance the construction) as commercial real estate land loans.

At June 30, 2016, loans totaling \$405.7 million were pledged to secure borrowings from the FHLB of Des Moines compared to \$365.1 million at December 31, 2015.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

The Company has issued loans to officers and directors on the same terms as comparable loans to unrelated parties. The outstanding balance of these loans was \$69,000 at June 30, 2016 and \$118,000 at December 31, 2015.

ALLL. The Company maintains an ALLL as a reserve against probable and inherent risk of losses in its loan portfolios. The ALLL is comprised of a general reserve component for loans evaluated collectively for loss and a specific reserve component for loans evaluated individually. When an issue is identified and it is determined that the loan needs to be classified as nonperforming and/or impaired, an evaluation of the discounted expected cash flows is done and an appraisal may be obtained on the collateral. Based on this evaluation, additional provision for loan loss or charge-offs is recorded prior to the end of the financial reporting period.

The following tables summarize changes in the ALLL and loan portfolio by loan type and impairment method at the dates and for the periods shown:

Troubled Debt Restructurings. Certain loan modifications are accounted for as troubled debt restructured loans ("TDRs"). At June 30, 2016, the TDR portfolio totaled \$36.9 million, of which two loans totaling \$189,000 were on nonaccrual status because they had previously not performed in accordance with the terms of their restructure. As of June 30, 2016, they were both current, however they will remain on nonaccrual status until they have performed for six months and are expected to continue to perform. At December 31, 2015, the TDR portfolio totaled \$42.3 million, of which one loan of \$131,000 was not performing in accordance with the terms of its restructure and was on nonaccrual status.

The following tables present loans that were modified as TDRs within the periods indicated and their recorded investment both before and after the modification:

At June 30, 2016, the Company had no commitments to extend additional credit to borrowers whose loan terms have been modified in TDRs. All TDRs are also classified as impaired loans and are included in the loans individually evaluated for impairment as part of the calculation of the ALLL.

The TDRs that occurred during the three and six months ended June 30, 2016 and 2015, were the result of granting the borrower interest rate concessions and/or interest-only payments and advancing the maturity date for a period of time ranging from

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

one to three years. No loans accounted for as TDRs were charged-off to the ALLL for the three and six months ended June 30, 2016 and 2015.

TDRs that default after they have been modified are typically evaluated individually on a collateral basis. Any additional impairment is charged to the ALLL. For the three months ended June 30, 2016 and the three and six months ended June 30, 2015, no loans that had been modified in the previous 12 months defaulted. During the six months ended June 30, 2016, one commercial loan of \$495,000 that had been modified with an interest rate concession and advancement of maturity date within the previous 12 months missed one payment, but was current as of June 30, 2016.

Credit Quality Indicators. The Company utilizes a nine-category risk rating system and assigns a risk rating for all credit exposures. The risk rating system is designed to define the basic characteristics and identify risk elements of each credit extension. Credits risk rated 1 through 5 are considered to be "pass" credits. Pass credits include assets, such as cash secured loans with funds on deposit with the Bank, where there is virtually no credit risk. Pass credits also include credits that are on the Company's watch list, where the borrower exhibits potential weaknesses, which may, if not checked or corrected, negatively affect the borrower's financial capacity and threaten their ability to fulfill debt obligations in the future. Credits classified as special mention are risk rated 6 and possess weaknesses that deserve management's close attention. Special mention assets do not expose the Company to sufficient risk to warrant adverse classification in the substandard, doubtful or loss categories. Substandard credits are risk rated 7. An asset is considered substandard if it is inadequately protected by the current net worth and payment capacity of the borrower or of any collateral pledged.

Substandard assets include those characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful are risk rated 8 and have all the weaknesses inherent in those credits classified as substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable, on the basis of currently existing facts, conditions, and values. Assets classified as loss are risk rated 9 and are considered uncollectible and cannot be justified as a viable asset for the Company. There were no loans classified as doubtful or loss at June 30, 2016 and December 31, 2015.

The following tables represent a summary of loans by type and risk category at the dates indicated:

Note 6 - Other Real Estate Owned

OREO includes properties acquired by the Company through foreclosure and deed in lieu of foreclosure. The following table is a summary of OREO activity during the periods shown:

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Balance at beginning of period	\$3,405	\$5,575	\$3,663	\$9,283
Loans transferred to OREO	—	—	—	140
Gross proceeds from sale of OREO	(985)	(1,207)	(988)	(5,535)
(Loss) gain on sale of OREO	(89)	2	(87)	531
Market value adjustments	—	46	(257)	(4)
Balance at end of period	\$2,331	\$4,416	\$2,331	\$4,416

During the second quarter of 2016, two OREO properties plus one parcel of a multi-parcel property with a combined book value of \$1.1 million were sold, generating a net loss of \$89,000. OREO at June 30, 2016 consisted of \$2.3 million in commercial real estate properties.

Note 7 - Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company determines the fair values of its financial instruments based on the fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair values. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect its estimate for market assumptions.

Valuation inputs refer to the assumptions market participants would use in pricing a given asset or liability using one of the three valuation techniques. Inputs can be observable or unobservable. Observable inputs are those assumptions that market participants would use in pricing the particular asset or liability. These inputs are based on market data and are obtained from an independent source. Unobservable inputs are assumptions based on the Company's own information or estimate of assumptions used by market participants in pricing the asset or liability. Unobservable inputs are based on the best and most current information available on the measurement date.

All inputs, whether observable or unobservable, are ranked in accordance with a prescribed fair value hierarchy:

Level 1 - Quoted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable.

Level 3 - Instruments whose significant value drivers are unobservable.

The tables below present the balances of assets measured at fair value on a recurring basis (there were no transfers between Level 1, Level 2 and Level 3 recurring measurements) at the dates indicated:

	Fair Value Measurements for Identical Assets (Level 1)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(In thousands)			
Impaired loans (included in loans receivable, net) ⁽¹⁾	\$42,557	\$ —	\$ —	\$ 42,557
OREO	3,663	—	—	3,663
Total	\$46,220	\$ —	\$ —	\$ 46,220

⁽¹⁾ Total fair value of impaired loans is net of \$732,000 of specific reserves on performing TDRs.

The fair value of impaired loans is calculated using the collateral value method or on a discounted cash flow basis. Inputs used in the collateral value method include appraised values, less estimated costs to sell. Some of these inputs may not be observable in the marketplace. Appraised values may be discounted based on management's knowledge of the marketplace, subsequent changes in market conditions, or management's knowledge of the borrower.

OREO properties are measured at the lower of their carrying amount or fair value, less estimated costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less estimated costs to sell, an impairment loss is recognized.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a nonrecurring basis at June 30, 2016 and December 31, 2015.

	June 30, 2016			Range (Weighted Average)
	Fair Value	Valuation Technique	Unobservable Input(s)	
	(Dollars in thousands)

Fair value estimates, methods, and assumptions are set forth below for the Company's financial instruments:

•

Financial instruments with book value equal to fair value: The fair value of financial instruments that are short-term or reprice frequently and that have little or no risk are considered to have a fair value equal to book value. These instruments include cash on hand and in banks, interest-earning deposits, FHLB stock, accrued interest receivable, accrued interest payable, and investment transactions payable. FHLB stock is not publicly-traded, however it may be

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

redeemed on a dollar-for-dollar basis, for any amount the Bank is not required to hold, subject to the FHLB's discretion. The fair value is therefore equal to the book value.

Investments available-for-sale: The fair value of all investments, excluding FHLB stock, was based upon quoted market prices for similar investments in active markets, identical or similar investments in markets that are not active and model-derived valuations whose inputs are observable.

Loans receivable: For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair value of fixed-rate loans is estimated using discounted cash flow analysis, utilizing interest rates that would be offered for loans with similar terms to borrowers of similar credit quality. As a result of current market conditions, cash flow estimates have been further discounted to include a credit factor. The fair value of nonperforming loans is estimated using the fair value of the underlying collateral.

Liabilities: The fair value of deposits with no stated maturity, such as statement savings, NOW and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows using current interest rates for certificates of deposit with similar remaining maturities. The fair value of FHLB advances is estimated based on discounting the future cash flows using current interest rates for debt with similar remaining maturities.

Off balance sheet commitments: No fair value adjustment is necessary for commitments made to extend credit, which represents commitments for loan originations or for outstanding commitments to purchase loans. These commitments are at variable rates, are for loans with terms of less than one year and have interest rates which approximate prevailing market rates, or are set at the time of loan closing.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business. The fair value has not been estimated for assets and liabilities that are not considered financial instruments.

Note 8 - Stock-Based Compensation

In June 2016, First Financial Northwest's shareholders approved the First Financial Northwest, Inc. 2016 Equity Incentive Plan ("2016 Plan"). This plan provides for the granting of incentive stock options ("ISO"), non-qualified stock options ("NQSO"), restricted stock and restricted stock units until June 2026. The 2016 Plan established 1,400,000 shares available to grant with a maximum of 400,000 of these shares available to grant as restricted stock awards. Each share issued as a restricted stock award counts as two shares towards the total shares available to award.

Under the 2016 Plan, the vesting date for each option award or restricted stock award is determined by an award committee and specified in the award agreement. In the case of restricted stock awards granted in lieu of cash payments of director's fees, the grant date is used as the vesting date.

As a result of the approval of the 2016 Plan, the First Financial Northwest, Inc. 2008 Equity Incentive Plan ("2008 Plan") was frozen and no additional awards will be made. Under the 2008 Plan as of June 30, 2016, there were 611,756 available stock options and 74,478 available restricted stock awards. Upon approval of the new plan, these shares are no longer available to be awarded and the ungranted restricted stock awards were no longer reserved for issuance. Restricted stock awards and stock options that were granted under the 2008 Plan will continue to vest and be

available for exercise, subject to the 2008 Plan provisions. At June 30, 2016, there were 1,371,896 total shares available for grant under the 2016 Plan, with 385,948 shares available for award as restricted stock.

For the three months ended June 30, 2016 and 2015, total compensation expense for the Plan was \$290,000, and \$110,000, respectively, and the related income tax benefit was \$101,500 and \$39,000, respectively.

For the six months ended June 30, 2016 and 2015, total compensation expense for the Plan was \$383,000 and \$219,000, respectively, and the related income tax benefit was \$134,000 and \$77,000, respectively.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Included in the above compensation for the three and six months ended June 30, 2016, director's compensation of \$180,000 was recognized as a result of the awarding and vesting of restricted shares in lieu of cash payments of directors' fees, with a related income tax benefit of \$63,000.

Stock Options

Under the 2008 Plan, stock option awards were granted with an exercise price equal to the market price of First Financial Northwest's common stock at the grant date. These option awards have a vesting period of five years, with 20% vesting on the anniversary date of each grant date, and a contractual life of 10 years. Any unexercised stock options will expire ten years after the grant date or sooner in the event of the award recipient's death, disability or termination of service with the Company or the Bank.

Under the 2016 Plan, the exercise price and vesting period for stock options are determined by the award committee and specified in the award agreement, however, the exercise price shall not be less than the fair market value of a share as of the grant date. Any unexercised stock option will expire 10 years after the award date or sooner in the event of the award recipient's death, disability, retirement, or termination of service.

The fair value of each option award is estimated on the grant date using a Black-Scholes model that uses the following assumptions. The dividend yield is based on the current quarterly dividend in effect at the time of the grant. Historical employment data is used to estimate the forfeiture rate. The historical volatility of the Company's stock price over a specified period of time is used for the expected volatility assumption. First Financial Northwest bases the risk-free interest rate on the U.S. Treasury Constant Maturity Indices in effect on the date of the grant. First Financial Northwest elected to use the "Share-Based Payments" method permitted by the SEC to calculate the expected term. This method uses the vesting term of an option along with the contractual term, setting the expected life at the midpoint.

Beginning in 2016, a cashless exercise of vested stock options may occur by the option holder surrendering the number of options valued at the current stock price at the time of exercise to cover the total cost to exercise. The surrendered options are canceled and are unavailable for reissue.

A summary of the Company's stock option plan awards and activity for the three and six months ended June 30, 2016, follows:

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES

Exercisable at June 30, 2016	484,320	9.70	3.24	1,733,760

	For the Six Months Ended June 30, 2016			Aggregate Intrinsic Value
	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term in Years	
Outstanding at January 1, 2016	884,260	\$ 10.11		
Granted	—			
Exercised	(55,673)	9.78		
Canceled	(82,267)			
Forfeited or expired	(20,000)	12.05		
Outstanding at June 30, 2016	726,320	10.12	4.78	2,305,420
Vested and expected to vest assuming a 3% forfeiture rate over the vesting term	719,060	10.11	4.75	2,288,270
Exercisable at June 30, 2016	484,320	9.70	3.24	1,733,760

As of June 30, 2016, there was \$723,967 of total unrecognized compensation cost related to nonvested stock options granted under the Plan. The cost is expected to be recognized over the remaining weighted-average vesting period of 3.15 years. There were no stock options granted during the three and six months ended June 30, 2016 under either the 2008 Plan or 2016 Plan.

Restricted Stock Awards

The 2008 Plan authorized the grant of restricted stock awards to directors, advisory directors, officers and employees. Compensation expense is recognized over the vesting period of the awards based on the fair value of the stock at the grant date. The restricted stock awards' fair value is equal to the stock price on the grant date. Shares awarded as restricted stock vest ratably over a five-year period beginning at the grant date with 20% vesting on the anniversary date of each grant date.

The 2016 Plan authorizes the grant of restricted stock awards subject to vesting periods or terms as defined by the award committee and specified in the award agreement. Restricted stock awards granted in lieu of cash payments for directors' fees are subject to immediate vesting on the grant date unless the award agreement provides otherwise. During the second quarter of 2016, there were 14,052 restricted shares granted to directors in lieu of cash payments for directors' fees that vested immediately.

A summary of changes in nonvested restricted stock awards for the three and six months ended June 30, 2016, follows:

31

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

	For the Three Months Ended June 30, 2016	
	Shares	Weighted-Average Grant Date Fair Value
Nonvested at April 1, 2016	47,800	\$ 8.95
Granted	14,052	12.81
Vested	(14,052)	12.81
Forfeited	—	
Nonvested at June 30, 2016	47,800	8.95
Expected to vest assuming a 3% forfeiture rate over the vesting term	46,366	8.95

	For the Six Months Ended June 30, 2016	
	Shares	Weighted-Average Grant Date Fair Value
Nonvested at January 1, 2016	47,800	\$ 8.95
Granted	14,052	12.81
Vested	(14,052)	12.81
Forfeited	—	
Nonvested at June 30, 2016	47,800	8.95
Expected to vest assuming a 3% forfeiture rate over the vesting term	46,366	8.95

As of June 30, 2016, there was \$267,967 of total unrecognized compensation costs related to nonvested shares granted as restricted stock awards. The cost is expected to be recognized over the remaining weighted-average vesting period of 1.57 years.

Note 9 - Federal Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. These calculations are based on many complex factors including estimates of the timing of reversals of temporary differences, the interpretation of federal income tax laws, and a determination of the differences between the tax and the financial reporting basis of assets and liabilities. Actual results could differ significantly from the estimates and interpretations used in determining the current and deferred income tax assets and liabilities.

Under GAAP, a valuation allowance is required to be recognized if it is “more likely than not” that a portion of the deferred tax asset will not be realized. Our policy is to evaluate our deferred tax assets on a quarterly basis and record a valuation allowance for our deferred tax asset if we do not have sufficient positive evidence indicating that it is more likely than not that some or all of the deferred tax asset will be realized. At June 30, 2016, it was determined that the full deferred tax asset would be realized in future periods and no valuation allowance was required.

Our effective tax rate for the first six months of 2016 was 32.2%. During the second quarter of 2016, we surrendered a \$10.2 million BOLI policy, and used the proceeds to purchase a new BOLI policy. The increase in cash surrender value of the policy was previously excluded from taxable income, however due to the early surrender of the policy, we recognized additional taxable noninterest income of \$182,000 and incurred a 10% penalty of \$18,000. Partially offsetting these increases, we recognized an additional tax benefit as a result of the exercise by officers and directors of certain non-qualified stock options. Estimated compensation expense is accrued to the deferred tax asset over the vesting period of the options. When these options were exercised, the actual stock price for our common stock was higher than previously estimated, resulting in an increase to actual compensation expense above the amount previously accrued and recognition of a tax benefit.

FIRST FINANCIAL NORTHWEST, INC. AND SUBSIDIARIES
 SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

The Company has prepared federal tax returns through December 31, 2015, at which time the Company had an alternative minimum tax credit carryforward totaling \$1.4 million which has no expiration date.

Note 10 - Earnings Per Share

Per the provisions of FASB ASC 260, Earnings Per Share, nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of EPS pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. ESOP shares are considered outstanding for basic and diluted earnings per share when the shares are committed to be released. Certain of the Company's nonvested restricted stock awards qualify as participating securities.

Net income is allocated between the common stock and participating securities pursuant to the two-class method, based on their rights to receive dividends, participate in earnings, or absorb losses. Basic earnings per common shares is computed by dividing net earnings available to common shareholders by the weighted-average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

The following table presents a reconciliation of the components used to compute basic and diluted earnings per share for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
	(Dollars in thousands, except share data)			
Net income	\$1,440	\$ 2,368	\$3,265	\$ 4,597
Less: Earnings allocated to participating securities	(5)	(11)	\$(11)	\$(21)
Earnings allocated to common shareholders	\$1,435	\$ 2,357	\$3,254	\$ 4,576
Basic weighted average common shares outstanding	12,390,234	13,756,336	12,567,464	13,895,872
Dilutive stock options	120,704	133,487	132,619	136,596
Dilutive restricted stock grants	19,782	26,491	18,072	24,730
Diluted weighted average common shares outstanding	12,530,720	13,916,314	12,718,155	14,057,198
Basic earnings per share	\$0.12	\$ 0.17	\$0.26	\$ 0.33
Diluted earnings per share	\$0.11	\$ 0.17	\$0.26	\$ 0.33

Potential dilutive shares are excluded from the computation of earnings per share if their effect is anti-dilutive. For the three and six months ended June 30, 2016, options to purchase an additional 60,000 shares of common stock were not included in the computation of diluted earnings per share because the incremental shares under the treasury stock method of calculation resulted in them being anti-dilutive. For the three and six months ended June 30, 2015, options to purchase an additional 225,000 were excluded as their effect would be anti-dilutive.

Note 11 - Subsequent Events

Dutch Auction Tender Offer

On July 13, 2016, First Financial Northwest announced the commencement of a modified Dutch auction tender offer for up to \$40.0 million in value of shares of our common stock at a price within (and including) the range of \$13.00 to \$14.00 per share. The tender offer will expire at 12:00 midnight, New York City time, on August 9, 2016, unless extended by First Financial Northwest. Tenders of common stock must be made prior to the expiration of the tender offer and may be withdrawn at any time prior to the expiration of the tender offer. The tender offer is subject to terms and conditions described in the Offer to Purchase

33

filed with the SEC on July 13, 2016 and distributed to shareholders. First Financial Northwest intends to finance the tender offer from available cash on hand.

This report is not an offer to purchase or a solicitation of an offer to sell First Financial Northwest's securities. The solicitation and the offer to purchase the securities will only be made pursuant to the Offer to Purchase and related materials. First Financial Northwest filed a Tender Offer Statement on Schedule TO with the SEC with respect to the tender offer on July 13, 2016.

First Financial Northwest's shareholders are advised to read the Schedule TO (including an offer to purchase, a related letter of transmittal and other offer documents), as each may be amended or supplemented from time to time, and any other relevant documents filed with the SEC when they become available, before making any decision with respect to the tender offer because these documents contain important information about the proposed transaction and the parties thereto.

Investors and shareholders may obtain free copies of the Schedule TO, as amended or supplemented from time to time, and other documents filed by the Company, at the SEC's website at www.sec.gov, by contacting the Company by mail at Investor Relations, First Financial Northwest, Inc., 201 Wells Avenue South, Renton, Washington 98057, or through the investor relations portion of the Company's website at www.ffnw.com.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

Certain matters discussed in this Quarterly Report on Form 10-Q constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to our financial condition, results of operations, plans, objectives, future performance or business. Forward-looking statements are not statements of historical fact, are based on certain assumptions and are generally identified by use of the words "believes," "expects," "anticipates," "estimates," "forecasts," "intends," "plans," "targets," "potentially," "probably," "projects," "outlook" or similar or future or conditional verbs such as "may," "will," "should," "would" and "could." Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, assumptions and statements about, among other things, expectations of the business environment in which we operate, projections of future performance or financial items, perceived opportunities in the market, potential future credit experience, and statements regarding our mission and vision. These forward-looking statements are based upon current management expectations and may, therefore, involve risks and uncertainties. Our actual results, performance, or achievements may differ materially from those suggested, expressed, or implied by forward-looking statements as a result of a wide variety or range of factors including, but not limited to: the credit risks of lending activities, including changes in the level and trend of loan delinquencies and write-offs, that may be affected by deterioration in the housing and commercial real estate markets, and may lead to increased losses and nonperforming assets in our loan portfolio, and may result in our allowance for loan losses not being adequate to cover actual losses, and require us to materially increase our reserves; changes in general economic conditions, either nationally or in our market areas; changes in the levels of general interest rates, and the relative differences between short and long term interest rates, deposit interest rates, our net interest margin and funding sources; fluctuations in the demand for loans, the number of unsold homes and other properties and fluctuations in real estate values in our market areas; results of examinations of us by the Federal Reserve Bank of San Francisco and our bank subsidiary by the Federal Deposit Insurance Corporation ("FDIC"), the Washington State Department of Financial Institutions, Division of Banks ("DFI") or other regulatory authorities, including the possibility that any such regulatory authority may initiate an enforcement action against the Company or the Bank which could require us to increase our reserve for loan losses, write-down assets, change our regulatory capital position, affect our ability to borrow funds or maintain or increase deposits, or impose additional requirements or restrictions on us, any

of which could adversely affect our liquidity and earnings; our ability to pay dividends on our common stock; our ability to attract and retain deposits; increases in premiums for deposit insurance; our ability to control operating costs and expenses; the use of estimates in determining the fair value of certain of our assets, which estimates may prove to be incorrect and result in significant declines in valuation; difficulties in reducing risk associated with the loans on our balance sheet; staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our work force and potential associated charges; computer systems on which we depend could fail or experience a security breach; our ability to retain key members of our senior management team; costs and effects of litigation, including settlements and judgments; our ability to implement our branch expansion strategy; our ability to successfully integrate any assets, liabilities, customers, systems, and management personnel we have acquired or may in the future acquire into our operations and our ability to realize related revenue synergies and cost savings within expected time frames and any goodwill charges related thereto; our ability to manage loan delinquency rates; costs and effects of litigation, including settlements and judgments; increased competitive pressures among financial services

companies; changes in consumer spending, borrowing and savings habits; legislative or regulatory changes that adversely affect our business including changes in regulatory policies and principles, including the interpretation of regulatory capital or other rules, including as a result of Basel III; the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd Frank Act") and the implementing regulations; the availability of resources to address changes in laws, rules, or regulations or to respond to regulatory actions; adverse changes in the securities markets; inability of key third-party providers to perform their obligations to us; changes in accounting policies and practices, as may be adopted by the financial institution regulatory agencies or the Financial Accounting Standards Board, including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods; the economic impact of war or any terrorist activities; other economic, competitive, governmental, regulatory, and technological factors affecting our operations; pricing, products and services; and other risks detailed in our filings with the U.S. Securities and Exchange Commission ("SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2015 ("2015 Form 10-K"). Any of the forward-looking statements that we make in this Form 10-Q and in the other public reports and statements we make may turn out to be wrong because of the inaccurate assumptions we might make, because of the factors illustrated above or because of other factors that we cannot foresee. Because of these and other uncertainties, our actual future results may be materially different from those expressed in any forward-looking statements made by or on our behalf. Therefore, these factors should be considered in evaluating the forward-looking statements, and undue reliance should not be placed on such statements. We undertake no responsibility to update or revise any forward-looking statements.

Overview

First Financial Northwest Bank ("the Bank") is a wholly-owned subsidiary of First Financial Northwest, Inc. ("the Company") and, as such, comprises substantially all of the activity for First Financial Northwest. First Financial Northwest Bank was a community-based savings bank until February 4, 2016, when the Bank converted to a Washington chartered commercial bank reflecting the commercial banking services it now provides to its customers. Our full-service banking office in Renton, Washington serves primarily King County, and also Pierce, Snohomish and Kitsap counties. Additional branches opened in Mill Creek, Washington in September 2015 and Edmonds, Washington in March 2016. Further expanding our market presence in King County, the Bank opened a fourth location at The Landing, in Renton, Washington, in July 2016. Improved technology from the conversion to a new core data processor in August 2015 allows the Bank to better meet the needs of our customers as we seek to broaden the demographics of our customer base.

First Financial Northwest Bank's business consists predominantly of attracting deposits from the general public, combined with borrowing from the Federal Home Loan Bank of Des Moines ("FHLB") and raising funds in the wholesale market, then utilizing these funds to originate one-to-four family residential, multifamily, commercial real estate, construction/land development, business, and consumer loans. Our current business strategy emphasizes commercial real estate, construction, one-to-four family residential, and multifamily lending. Recently, improvements in the economy, employment rates, stronger real estate prices, and a general lack of new housing inventory in certain areas in the Puget Sound region have led to our significantly increasing originations of construction loans for properties located in our market area. We anticipate that construction lending will continue to be a strong element of our total loan portfolio in future periods. We will continue to take a disciplined approach in our construction and land development lending by concentrating our efforts on smaller one-to-four residential loans to builders known to us. On a limited basis, we also will provide multifamily loans to developers with proven success in this type of construction. In addition, we are geographically expanding our loan portfolio through loan purchases or loan participations of commercial and multifamily real estate loans that are outside of our primary market area. We recently hired a loan officer with extensive experience in California to further support our efforts to geographically diversify our loan portfolio through direct originations, loan participations, or loan purchases.

In support of our strategic growth plan, the Bank is seeking niche expansion opportunities. We have employees with the language and experience to meet the specific deposit and lending needs of the Chinese/American sector, including

real estate developers involved in the EB-5 Immigrant Investor Program. In addition, we are developing a national line of business to originate and service high quality aircraft loans. These loans will be collateralized by new or used, single-engine piston aircraft to light jets for business or personal use. The loans will initially range from \$250,000 to \$4.0 million and will rely heavily on the asset value of the collateral. We expect to begin originating loans in this area in the third quarter of 2016.

Our primary source of revenue is interest income, which is the income that we earn on our loans and investments. Interest expense is the interest that we pay on our deposits and borrowings. Net interest income is the difference between interest income and interest expense. Changes in levels of interest rates affect interest income and interest expense differently and, thus, impacts our net interest income.

An offset to net interest income is the provision for loan losses which is required to establish the allowance for loan and lease losses ("ALLL") at a level that adequately provides for probable losses inherent in our loan portfolio. As our loan portfolio increases or due to an increase for probable losses inherent in our loan portfolio, our ALLL may increase, resulting in a decrease

to net interest income. Improvements in loan risk ratings, increases in property values, or receipt of recoveries of amounts previously charged off may partially or fully offset any increase to ALLL due to loan growth or an increase in probable loan losses.

Noninterest income is generated from various loan or deposit fees, increases in the cash surrender value of bank owned life insurance ("BOLI"), and commissions earned on our investment services brokerage relationship. This income is increased or partially offset by any net gain or loss on sales of investment securities.

Our noninterest expenses consist primarily of salaries and employee benefits, professional fees, regulatory assessments, occupancy and equipment, and other general and administrative expenses. Salaries and employee benefits consist primarily of the salaries and wages paid to our employees, payroll taxes, expenses for retirement, and other employee benefits. Professional fees include legal services, auditing and accounting services, computer support services, and other professional services in support of strategic plans. Occupancy and equipment expenses, which are the fixed and variable costs of buildings and equipment, consist primarily of real estate taxes, depreciation expenses, maintenance, and costs of utilities. Also included in noninterest expense are changes to the Company's unfunded commitment reserve which are reflected in general and administrative expenses. The reserve is based on the amount believed by management to be sufficient to absorb estimated probable losses related to unfunded credit facilities, and reflects changes in the amounts that the Company has committed to fund but has not yet disbursed.

Critical Accounting Policies

Our significant accounting policies are fundamental to understanding our results of operations and financial condition because they require that we use estimates and assumptions that may affect the value of our assets or liabilities and our financial results. These policies are critical because they require management to make difficult, subjective, and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or by using different assumptions. These policies govern the ALLL, the valuation of OREO, and the calculation of deferred taxes, fair values, and other-than-temporary impairments on the market value of investments. These policies and estimates are described in further detail in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 1, Summary of Significant Accounting Policies with the 2015 Form 10-K. There have not been any material changes in the Company's critical accounting policies and estimates as compared to the disclosure contained in the 2015 Form 10-K.

Comparison of Financial Condition at June 30, 2016 and December 31, 2015

Total assets were \$999.2 million at June 30, 2016, an increase of 2.0%, from \$979.9 million at December 31, 2015. The following table details the \$19.3 million net change in the composition of our assets at June 30, 2016 from December 31, 2015.

	Balance at June 30, 2016	Change from December 31, 2015	Percent Change
(Dollars in thousands)			
Cash on hand and in banks	\$6,051	\$ 338	5.9 %
Interest-earning deposits	31,454	(68,544)	(68.5)
Investments available-for-sale, at fair value	136,028	6,463	5.0
Loans receivable, net	766,046	80,974	11.8
Premises and equipment, net	18,206	499	2.8
FHLB stock, at cost	7,631	1,494	24.3
Accrued interest receivable	3,158	190	6.4

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

Deferred tax assets, net	3,438	(1,118)	(24.5)
OREO	2,331	(1,332)	(36.4)
BOLI, net	23,700	391		1.7
Prepaid expenses and other assets	1,193	(32)	(2.6)
Total assets	\$999,236	\$ 19,323		2.0 %

Interest-earning deposits. Our interest-earning deposits, consisting primarily of funds held at the Federal Reserve Bank of San Francisco, decreased \$68.5 million, or 68.5%, at June 30, 2016, as compared to December 31, 2015. During the six months ended June 30, 2016, excess cash held at the Federal Reserve Bank, combined with a \$36.0 million net increase in

FHLB advances was used primarily to fund the \$81.0 million increase in net loans receivable, a \$6.5 million increase in investment securities, and the \$15.2 million decline in deposits.

Investments available-for-sale. Our investments available-for-sale portfolio increased by \$6.5 million during the first six months of 2016. To enhance interest income, we purchased two subordinated debt instruments issued by well capitalized financial institutions located in southern California in the amounts of \$5.0 million each, increasing our corporate bonds by \$10.0 million. These notes carry fixed interest rates of 6.0% and 6.5% for the initial five years, then convert to floating rate instruments that reprice quarterly for the remainder of their ten year terms. In addition, we purchased three fixed rate municipal bonds for \$1.5 million and one fixed rate mortgage-backed security for \$1.8 million for a combined yield on securities purchased of 5.14%. We did not sell any securities during the first six months of 2016, however, we received partial calls on three securities for a total of \$430,000. At June 30, 2016, corporate bonds issued by financial institutions represented \$23.7 million or 17.4% of our investments available-for-sale and municipal bonds represented 10.0% of our investments available-for-sale. These purchases were part of our investment portfolio restructuring strategy to transition our investment portfolio to securities with longer maturity periods, higher yields, and primarily fixed rates in order to enhance our interest income.

In addition to the purchase and call activity, we received principal repayments of \$8.2 million on our investments available-for-sale. The net unrealized gain of our investments available-for-sale had a pre-tax increase of \$2.3 million during the six months ended June 30, 2016.

The effective duration of the investments available-for-sale at June 30, 2016, was 2.9% as compared to 3.2% at December 31, 2015. Effective duration is a measure that attempts to quantify the anticipated percentage change in the value of an investment security (or portfolio) in the event of a 100 basis point change in market yields. Since the Bank's portfolio includes securities with embedded options (including call options on bonds and prepayment options on mortgage-backed securities), management believes that effective duration is an appropriate metric to use as a tool when analyzing the Bank's investment securities portfolio, as effective duration incorporates assumptions relating to such embedded options, including changes in cash flow assumptions as interest rates change.

Loans receivable. Net loans receivable increased \$81.0 million during the first six months of 2016. During this time period, we supplemented our loan originations by purchasing \$49.8 million in performing loans from another financial institution, consisting of \$37.8 million in commercial real estate and \$12.0 million in multifamily loans. The loans were purchased at a 2.0% - 3.0% premium and are intended to be held to maturity. The purchases consisted of 13 loans ranging in size from \$1.3 million to \$8.2 million and are secured by properties in Washington, California, Oregon, Utah, Colorado and Arizona. The Company plans to continue to purchase loan pools that meet our credit standards, secured by properties outside of its primary market area, to augment its loan originations.

During the first six months of 2016, total multifamily loans increased by \$23.9 million and commercial real estate loans increased \$49.8 million. Included in the increase in multifamily loans was a \$14.5 million increase in multifamily construction loans that will rollover to permanent loans upon completion of construction. In addition, construction and land development loans increased by \$25.2 million. The growth in both of these categories is reflected in the \$15.1 million increase in LIP to \$69.0 million at June 30, 2016 as these loans typically fund over a 12 to 18 month period. Lastly, one-to-four family residential loans decreased by \$2.0 million and business and consumer loans decreased by \$396,000 and \$646,000, respectively during the six months ended June 30, 2016.

The following table details the types of commercial real estate, multifamily and construction and development loans in our portfolio:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	June 30, 2016	December 31, 2015
(In thousands)		
Residential:		
Multifamily	\$105,773	\$ 104,408
Micro-unit apartments	26,416	18,339
Total Residential	132,189	122,747
Non-residential:		
Office	97,375	78,297
Retail	95,649	76,813
Mobile home park and land	23,290	23,630
Warehouse	15,479	17,845
Storage	38,130	40,238
Mixed use	15,526	7,388
Total Non-residential	285,449	244,211
Construction and development:		
Non-residential	22,595	17,058
Residential ⁽¹⁾	64,312	52,233
Multifamily	77,281	46,666
Total construction and development	164,188	115,957
Total commercial real estate	\$581,826	\$ 482,915

The majority of our loan portfolio continues to be focused in our primary market area, however we are also seeking geographic diversification of our loan portfolio. The collateral underlying the pools of loans purchased during the six months ended June 30, 2016 are located throughout the West Coast. In addition, we are pursuing opportunities for loan participations outside our primary market area that meet our investment and credit quality objectives. During the first quarter of 2016, we hired an employee in the state of California whose focus is directly originating new commercial and multifamily real estate loans as well as analyzing loan participation and loan purchase opportunities in the San Francisco Bay area. The following table details geographic concentrations in our loan portfolio, shown net of LIP:

	At June 30, 2016						
	One-to-four family residential	Multifamily	Commercial real estate	Construction/land development	Business	Consumer	Total
	(In thousands)						
King County	\$184,476	\$ 89,752	\$ 149,818	\$ 55,657	\$ 7,208	\$ 5,365	\$492,276
Pierce County	42,088	16,156	37,267	—	—	836	96,347
Snohomish County	9,386	5,553	31,545	5,765	—	43	52,292
Kitsap County	4,707	5,941	968	—	—	78	11,694
Other Washington Counties	10,782	17,108	50,970	2,928	—	11	81,799
Outside Washington	293	11,716	31,703	—	—	—	43,712
Total loans, net LIP	\$251,732	\$ 146,226	\$ 302,271	\$ 64,350	\$ 7,208	\$ 6,333	\$778,120

Our five largest borrowing relationships, which represent 10.5% of our net loans, increased by \$4.4 million from December 31, 2015 to June 30, 2016. At June 30, 2016 all five borrowers were current on their loan payments. We monitor the performance of these borrowing relationships very closely due to their concentration risk in relation to the entire loan portfolio. The following table details our five largest lending relationships at June 30, 2016:

Borrower ⁽¹⁾	Number of Loans	One-to-Four		Commercial Real Estate	Construction/Land Development	Consumer	Aggregate Balance of Loans ⁽³⁾
		Family Residential ⁽²⁾	Multifamily				
(Dollars in thousands)							
Real estate investor	4	\$496	\$ —	\$ 18,183	\$ —	\$ —	\$ 18,679
Real estate investor	11	—	16,824	845	—	—	17,669
Real estate investor	5	472	—	14,956	—	8	15,436
Real estate builder	3	—	—	8,820	5,623	—	14,443
Real estate investor	2	—	—	14,323	—	—	14,323
Total	25	\$968	\$ 16,824	\$ 57,127	\$ 5,623	\$ 8	\$ 80,550

(1) The composition of borrowers represented in the table may change between periods.

(2) All of the one-to-four family residential are owner occupied.

(3) Net of LIP.

The ALLL increased to \$10.1 million at June 30, 2016 from \$9.5 million at December 31, 2015 and represented 1.3% and 1.4% of total loans receivable at June 30, 2016 and December 31, 2015, respectively. The ALLL consists of two components, the general allowance and the specific reserves. The increase in the ALLL, primarily a result of growth in our loan portfolio, consisted of an \$840,000 increase in the general reserve and a \$168,000 decrease in the specific reserves. For additional information, see "Comparison of Operating Results for the Three Months Ended June 30, 2016 and 2015-Provision for Loan Losses" discussed below.

We believe that the ALLL at June 30, 2016 was adequate to absorb the probable and inherent risks of loss in the loan portfolio at that date. While we believe the estimates and assumptions used in our determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will be proven correct in the future, that the actual amount of future losses will not exceed the amount of past provisions, or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. Future additions to the allowance may become necessary based upon changing economic conditions, the level of problem loans, business conditions, credit concentrations, increased loan balances, or changes in the underlying collateral of the loan portfolio. In addition, the determination of the amount of our ALLL is subject to review by bank regulators as part of the routine examination process, which may result in the establishment of additional loss reserves or the charge-off of specific loans against established loss reserves based upon their judgment of information available to them at the time of their examination.

As we work with our borrowers that face difficult financial circumstances, we explore various options available to minimize our risk of loss. At times, the best option for our customers and the Bank is to modify the loan for a period of time, usually one year or less. Certain loan modifications are accounted for as troubled debt restructured loans ("TDRs"). These modifications have included a reduction in interest rate on the loan for a period of time, advancing the maturity date of the loan, or allowing interest-only payments for a specific time frame. These modifications are granted only when there is a reasonable and attainable restructured loan plan that has been agreed to by the borrower and is considered to be in the Bank's best interest.

The following table presents a breakdown of our TDRs at the dates indicated:

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

	June 30, 2016	December 31, 2015	June 30, 2015	Six Month Change	One Year Change
(Dollars in thousands)					
Nonperforming TDRs:					
One-to-four family residential	\$ 189	\$ 131	\$—	\$58	\$189
Total nonperforming TDRs	189	131	—	58	189
Performing TDRs:					
One-to-four family residential	30,116	35,099	38,189	(4,983)	(8,073)
Multifamily	1,580	1,594	1,609	(14)	(29)
Commercial real estate	4,941	5,392	7,765	(451)	(2,824)
Consumer	43	43	43	—	—
Total performing TDRs	36,680	42,128	47,606	(5,448)	(10,926)
Total TDRs	\$36,869	\$ 42,259	\$47,606	\$(5,390)	\$(10,737)
% TDRs classified as performing	99.5	%99.7	% 100.0	%	%

Our TDRs decreased \$5.4 million at June 30, 2016 compared to December 31, 2015 as a result of principal repayments and loan payoffs. There were no new TDRs added during the first six months of 2016. At June 30, 2016, two TDRs were on nonaccrual status although current on their payments. There were no committed but undisbursed funds in connection with our TDRs and impaired loans. The largest TDR relationship at June 30, 2016, totaled \$10.0 million and was comprised of \$9.3 million in one-to-four family residential rental properties and \$762,000 in owner occupied commercial property, all located in King County.

Loans are considered past due if a scheduled principal or interest payment is due and unpaid for 30 days or more. At June 30, 2016, total past due loans comprised 0.09% of total loans receivable, net of LIP, as compared to 0.18% at December 31, 2015.

Nonperforming assets decreased to \$3.4 million at June 30, 2016, compared to \$4.7 million at December 31, 2015. The following table presents detailed information on our nonperforming assets at the dates indicated:

	June 30, 2016	December 31, 2015	June 30, 2015	Six Month Change	One Year Change
(Dollars in thousands)					
Nonperforming loans:					
One-to-four family residential	\$1,019	\$ 996	\$252	\$23	\$767
Multifamily	—	—	1,683	—	(1,683)
Commercial real estate	—	—	407	—	(407)
Consumer	64	89	73	(25)	(9)
Total nonperforming loans	1,083	1,085	2,415	(2)	(1,332)
OREO	2,331	3,663	4,416	(1,332)	(2,085)
Total nonperforming assets ⁽¹⁾	\$3,414	\$ 4,748	\$6,831	\$(1,334)	\$(3,417)
Nonperforming assets as a percent of total assets	0.34	%0.48	% 0.72	%	%

⁽¹⁾ The difference between nonperforming assets reported above, and the totals reported by other industry sources, is due to their inclusion of all TDRs as nonperforming loans, although 99.5% of our TDRs were performing in

accordance with their restructured

40

terms at June 30, 2016. The remaining 0.5% of TDRs at June 30, 2016 that were nonperforming are reported above as nonperforming loans.

Nonaccrual loans are loans that are 90 days or more delinquent or other loans which, in management's opinion, the borrower is unable to meet scheduled payment obligations. Nonaccrual loans remained stable at \$1.1 million at June 30, 2016, and December 31, 2015. During the first six months of 2016, two loans with a total balance of \$100,000 were transferred to nonaccrual status and were offset by \$82,000 in principal payments and payoffs of nonaccrual loans and a \$19,000 charge-off of a consumer loan during this period.

The three largest nonaccrual loans in the loan portfolio at June 30, 2016, included a \$320,000 owner occupied single family residence in Snohomish County, which is current on its loan payments, a \$169,000 owner occupied single family residence in King County, and a \$155,000 owner occupied single family residence in King County, which is current on its loan payments.

We continue to focus our efforts on converting nonaccrual loans to OREO and subsequently selling the properties. By taking ownership of these properties, we can generally convert nonearning assets into earning assets on a more timely basis than which may otherwise be the case. Our success in this area is reflected by the continued improved ratio of our nonperforming assets as a percent of total assets, which declined to 0.34% at June 30, 2016, compared to 0.48% at December 31, 2015.

OREO. OREO includes properties acquired by the Bank through foreclosure or deed in lieu of foreclosure. At June 30, 2016, OREO was \$2.3 million, a decrease of \$1.4 million from \$3.7 million at December 31, 2015. The decrease in OREO during the first six months of 2016 was a result of \$1.1 million in property sales and \$257,000 in market valuation adjustments. During the second quarter of 2016, the Bank sold a \$164,000 non-residential land development project, a \$728,000 commercial property, and a \$182,000 parcel of a multi-parcel commercial property, generating a net loss of \$87,000.

The three largest OREO properties at June 30, 2016 were an office building valued at \$837,000 located in Pierce County, undeveloped land valued at \$506,000 located in Kitsap County, and a retail building valued at \$505,000 in Mason County.

The following table presents a breakdown of our OREO by county and number of properties at June 30, 2016:

	County			Total OREO	Number of Properties	Percent Total OREO
	Pierce	Kitsap	Mason			
(Dollars in thousands)						
OREO:						
Commercial real estate ⁽¹⁾	\$ 1,320	\$ 506	\$ 505	\$ 2,331	5	100.0%
Total OREO	\$ 1,320	\$ 506	\$ 505	\$ 2,331	5	100.0%

⁽¹⁾ Of the five properties classified as commercial real estate, two are office/retail buildings and three are undeveloped lots.

Deposits. During the first six months of 2016, deposits decreased \$15.2 million to \$660.2 million at June 30, 2016, compared to \$675.4 million at December 31, 2015. Deposit accounts consisted of the following:

June 30, 2016	Change from	Percent Change
------------------	----------------	-------------------

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

December
31, 2015

(Dollars in thousands)

Noninterest-bearing	\$25,137	\$(4,255)	(14.5)%
NOW	17,062	801	4.9
Statement savings	31,143	2,816	9.9
Money market	197,129	(14,307)	(6.8)

Certificates of deposit, brokered	65,612	(539)	(0.8)
	\$660,210	\$(15,197)	(2.3)

41

During the first six months of 2016, noninterest-bearing checking accounts decreased by \$4.3 million and money market accounts decreased by \$14.3 million. Non-interest checking accounts decreased by \$8.2 million during the first quarter of 2016, then grew by \$4.0 million during the second quarter as a result of our new branches. The money market accounts at June 30, 2016, include \$31.2 million of short-term deposits from large construction developers that are part of the EB-5 Immigrant Investor Program to fund development projects. Withdrawals occur as their projects progress and are expected to continue over the next 12 months.

Brokered certificates of deposits decreased by \$539,000 during the six months ended June 30, 2016, as we redeemed \$14.6 million of certificates, replacing them with \$14.1 of brokered certificates of deposit at lower rates and with the same maturity periods as the called certificates. While brokered certificates of deposit may carry a higher cost than our retail certificates, their remaining maturity periods of two to less than five years, along with the enhanced call features of these deposits, assist us in our efforts to manage interest rate risk.

At both June 30, 2016 and December 31, 2015, we held \$16.0 million in public funds, nearly all of which were retail certificates of deposit.

Advances. We use advances from the FHLB as an alternative funding source, to reduce interest rate risk, and to leverage our balance sheet. Total FHLB advances at June 30, 2016 and December 31, 2015 were \$161.5 million and \$125.5 million, respectively. During the first six months of 2016, we paid off two advances at their scheduled maturity dates for \$34.0 million, which carried a 0.81% interest rate, and \$20.0 million, which carried a 0.70% interest rate. In June 2016, we obtained a \$90.0 million seven year, one-month Member Option Variable-rate Advance from the FHLB. This advance will reprice monthly and allows prepayment without penalties on the repricing dates. This advance was taken to replace the maturing advances, year-to-date, and provide additional funding for loan growth. Of our total FHLB advances, \$50.0 million is due to mature within one year, with the remaining \$111.5 million due in two to seven years.

Stockholders' Equity. Total stockholders' equity decreased \$1.2 million during the first six months of 2016 to \$169.5 million at June 30, 2016, from \$170.7 million at December 31, 2015 primarily due to common stock repurchases. Retained earnings increased \$1.7 million to \$44.6 million during the first six months of 2016 due to \$3.3 million of net income partially offset by \$1.5 million of shareholder dividends.

The following table shows cash dividends paid per share and the related dividend payout ratio for the periods indicated:

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
Dividend declared per common share	\$0.06	\$0.06	\$0.12	\$0.12
Dividend payout ratio ⁽¹⁾	51.8 %	35.3 %	46.4 %	36.4 %

(1) Dividends paid per common share divided by basic earnings per common share

As part of the strategy to increase shareholder value, the Company has been repurchasing shares. In October 2015, the Company's board of directors authorized the purchase of an additional 1,410,000 shares of the Company's common stock, or 10% of the shares outstanding. In 2015, 364,054 shares were repurchased under this plan at an average price of \$12.61 per share. From January 1, 2016 through April 27, 2016, when the plan expired, 436,145 additional shares were repurchased at an average price of \$13.37, with a total of 800,199 shares repurchased under this plan at an average price of \$13.02.

Additional paid-in-capital decreased \$5.0 million during the six months ended June 30, 2016 as a combined result of \$6.9 million used to repurchase the 436,145 shares, partially offset by a \$1.3 million increase from the exercise of stock options. Accumulated other comprehensive gain increased \$1.5 million from an accumulated other comprehensive loss as a result of improvements in after-tax valuation adjustments on investments available-for-sale.

Comparison of Operating Results for the Three Months Ended June 30, 2016 and 2015

General. Net income for the three months ended June 30, 2016 was \$1.4 million, or \$0.11 per diluted share as compared to net income of \$2.4 million, or \$0.17 per diluted share for the quarter ended June 30, 2015. The \$928,000 decline in net income during the second quarter of 2016 was primarily a result of recognition of a \$600,000 provision for loan losses as compared to a

\$500,000 recapture of provision for the quarter ended June 30, 2015. In addition, noninterest expense increased \$1.2 million for the second quarter of 2016 as compared to the same quarter in 2015. Partially offsetting these decreases to net income, net interest income increased \$615,000 and noninterest income increased \$351,000 during the second quarter of 2016 as compared to the second quarter of 2015.

Net Interest Income. Net interest income for the quarter ended June 30, 2016 increased \$615,000 to \$8.2 million, as compared to \$7.6 million for the second quarter in 2015 due primarily to growth in our interest income due to an increase in the average balance of interest-earning assets and shift from lower yielding interest-earning deposits to higher yielding investment securities and loan receivables.

The following table details the change in net interest income due to changes in yield or cost, or changes in the average balance of the related asset or liability:

	Three Months Ended June 30, 2016 Compared to June 30, 2015 Net Change		
	Rate	Volume	Total
	(In thousands)		
Interest-earning assets:			
Loan receivable, net	\$(417)	\$ 807	\$ 390
Investments available-for-sale	186	76	262
Interest-earning deposits	22	(40)	(18)
FHLB stock	41	—	41
Total net change in income on interest-earning assets	(168)	843	675
Interest-bearing liabilities:			
Statement savings	1	2	3
Money market	47	38	85
Certificates of deposit, retail	99	(46)	53
Certificates of deposit, brokered	(31)	(2)	(33)
Advances from the FHLB	(19)	(29)	(48)
Total net change in expense on interest-bearing liabilities	97	(37)	60
Total net change in net interest income	\$(265)	\$ 880	\$ 615

The \$390,000 increase in loan interest income during the second quarter of 2016 as compared to the same period in 2015 was a result of a \$61.9 million increase in the average outstanding loan balance partially offset by a decrease in yield of 23 basis points. The addition of \$49.8 million in purchased loans during 2016 contributed significantly to the increase in the average loan balance.

During the second quarter of 2016, interest income from our investments available-for-sale increased by \$262,000 as compared to the same period in 2015. The average balance of our investments available-for-sale for the three months ended June 30, 2016, increased by \$17.8 million as compared to the same period last year as we restructured our investments available-for-sale portfolio through the sale of \$25.6 million of lower yielding investment securities, utilizing the proceeds received to purchase higher yielding, long-term investment securities, resulting in an increase in the average yield of 56 basis points.

The Federal Reserve Bank's federal funds rate increase in December 2015 positively impacted both the rate paid on our interest-earning deposits and dividend received on our FHLB stock. The average rate earned on interest-earning

deposits increased 22 basis points for the quarter ended June 30, 2016, as compared to the same period last year. The merger of the FHLB Seattle with the FHLB Des Moines in the second quarter of 2015 also resulted in a significant increase in dividends received on the stock we are required to hold at the FHLB. FHLB dividends increased to \$44,000 for the second quarter of 2016 compared to \$3,000 for the second quarter of 2015.

Partially offsetting the increase in interest income, interest expense increased by \$60,000 for the three months ended June 30, 2016 as compared to the same period in 2015. Our average balance and average cost of money market accounts increased

\$46.7 million and nine basis points, respectively, for the three months ended June 30, 2016 as compared to the same period in 2015 resulting in an additional \$85,000 of interest expense during the three months ended June 30, 2016 due primarily to the short-term deposits from large construction developers that are part of the EB-5 Immigrant Investor Program. Further contributing to the increase in interest expense, an increase of 13 basis points paid on our retail certificates of deposit more than offset the \$17.6 million decrease in the average balance of these deposits resulting in a net increase of \$53,000. The early call and subsequent replacement of certain brokered certificates of deposit resulted in a decrease to interest expense of \$33,000 as the cost of these funds decreased by 18 basis points for the quarter ended June 30, 2016 as compared to the quarter ended June 30, 2015. Decreases in both the average balance and rate paid for FHLB advances resulted in a \$48,000 reduction in interest paid to the FHLB for short and long term advances.

The following table compares detailed average balances, related interest income or interest expense, associated yields and rates, and the resulting net interest margin for the three months ended June 30, 2016 and 2015. Nonaccrual loans are included in the average balance of net loans receivable and are considered to carry a zero yield.

Provision for Loan Losses. Management recognizes that loan losses may occur over the life of a loan and that the ALLL must be maintained at a level necessary to absorb specific losses on impaired loans and probable losses inherent in the loan portfolio. Our methodology for analyzing the ALLL consists of two components: general and specific reserves. The general reserve is determined by applying factors to our various groups of loans. Management considers factors such as charge-off history, the prevailing economy, the regulatory environment, competition, geographic and loan type concentrations, policy and underwriting standards, nature and volume of the loan portfolio, managements' experience level, our loan review and grading systems, the value of underlying collateral and the level

of problem loans in assessing the ALLL. The specific reserve component is created when management believes that the collectability of a specific loan has been impaired and a loss is probable. The specific reserves are

44

computed using current appraisals, listed sales prices, and other available information, less costs to complete, if any, and costs to sell the property. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or if future events differ from current estimates.

During the quarter ended June 30, 2016, management evaluated the adequacy of the ALLL and concluded that additional provision for loan losses in the amount of \$600,000 was appropriate for the quarter. For the quarter ended June 30, 2015, a \$500,000 recapture of the provision for loan losses was recorded. For the second quarter of 2016, the provision for loan losses was primarily a result of growth in our loan portfolio. In comparison, the recapture reported in the second quarter of 2015 was primarily a result of recoveries of \$595,000 on loans previously charged off.

The following table summarizes selected financial data related to our ALLL and loan portfolio. All loan balances and ratios are calculated using loan balances that are net of LIP. There were no charge-offs during the quarters ended June 30, 2016 and 2015.

	At or For the Three Months Ended June 30,	
	2016	2015
	(Dollars in thousands)	
Total loans receivable, net of LIP, end of period	\$778,120	\$672,426
Average loans receivable during period	726,109	664,195
ALLL balance at beginning of period	9,471	10,508
Provision (recapture of provision) for loan losses	600	(500)
Recoveries:		
One-to-four family	63	518
Commercial real estate	—	57
Business	—	—
Consumer	—	20
Total recoveries	63	595
Net recovery	63	595
ALLL balance at end of period	\$10,134	\$10,603
ALLL as a percent of total loans, net of LIP	1.30	% 1.58 %
Ratio of net recoveries to average net loans receivable (annualized)	0.03	0.36

Noninterest Income. Noninterest income increased \$351,000 to \$708,000 for the quarter ended June 30, 2016, from \$357,000 for the same quarter in 2015. The following table provides a detailed analysis of the changes in the components of noninterest income:

	Three Months Ended June 30, 2016			Change from June 30, 2015	Percent Change
	(Dollars in thousands)				
Service fees on deposit accounts	\$29	\$ —	—		%
Loan service fees	81	44	118.9		
BOLI change in cash surrender value	225	89	65.4		
Investment sales commissions	281	258	1,121.7		
Other	92	(41)	(30.3)		
Total noninterest income	\$708	\$ 350	98.3		

The increase in the quarter ended June 30, 2016, compared to the quarter ended June 30, 2015, primarily related to an increase in other income from our wealth management services as a result of \$281,000 of investment sales commissions generated by referred accounts with a wealth management advisor through First Financial Wealth Services. These services, which began in May 2015, allow us to offer a broader range of wealth management solutions to appropriately meet the needs of our customers.

During the quarter ended June 30, 2016, we replaced one of our BOLI policies with a higher yielding policy that increased noninterest income from BOLI during the quarter. In addition, we added \$20.0 million in new BOLI policies in April 2015, bringing our BOLI policy total to \$23.7 million as of June 30, 2016. We recognize the increase in cash surrender value of these policies, which represents the increase in underlying investments, as noninterest income, which assists in offsetting expenses for employee benefits. For the second quarter of 2016, noninterest income of \$225,000 was recognized on these policies as compared to \$136,000 in the second quarter of 2015.

Noninterest Expense. Noninterest expense increased \$1.2 million to \$6.1 million for the second quarter of 2016 from \$4.9 million for the comparable quarter in 2015.

The following table provides a detailed analysis of the changes in the components of noninterest expense:

	Three Months Ended June 30, 2016	Change from June 30, 2015	Percent Change	
	(Dollars in thousands)			
Salaries and employee benefits	\$3,841	\$590	18.1	%
Occupancy and equipment	488	174	55.4	
Professional fees	561	103	22.5	
Data processing	251	63	33.5	
Loss (gain) on sale of OREO property, net	89	91	(4,550.0)	
OREO market value adjustments	—	46	(100.0))
OREO related expenses, net	(14)	(55)	(134.1))
Regulatory assessments	117	1	0.9	
Insurance and bond premiums	86	(3)	(3.4))
Marketing	40	(14)	(25.9))
Other general and administrative	613	202	49.1	
Total noninterest expense	\$6,072	\$1,198	24.6	%

Expenses for salaries and employee benefits increased \$590,000 for the second quarter of 2016 as compared to the same period in 2015 primarily as a result of increases in salaries and in the number of employees. As a result of our new branches in Edmonds and Mill Creek and the development of new products, the number of employees increased by 12 from June 30, 2015 to 118 total employees at June 30, 2016. In addition, annual increases were effective in the first quarter of 2016.

Loss (gain) on the sale of OREO property changed from a \$2,000 net gain in the second quarter of 2015 to an \$89,000 net loss for the second quarter of 2016. The loss in 2016 was primarily the result of the sale of a \$728,000 commercial property.

Occupancy and equipment expense increased by \$174,000 primarily as a result of the addition of lease expense related to the new branch offices in Edmonds, Mill Creek, and The Landing, in Renton, Washington.

A component of other general and administrative expenses, the reserve for unfunded commitments increased during the second quarter of 2016, resulting in \$153,000 of additional expense. This unfunded commitment reserve expense can vary significantly each quarter, based on the amount believed by management to be sufficient to absorb estimated probable losses related to unfunded credit facilities, and reflects changes in the amounts that the Company has committed to fund but has not yet disbursed. The increase in our construction lending activity was the primary reason for the increase in the quarter ended June 30, 2016.

Federal Income Tax Expense. Our statutory income tax rate is 35%. We recorded federal income tax provisions of \$779,000 and \$1.2 million for the quarters ended June 30, 2016, and 2015, respectively, as a result of our consolidated pretax net income. Our effective tax rate for the quarter ended June 30, 2016 increased to 35.1% as a result of the early surrender of a BOLI policy, requiring us to recognize the previously excluded noninterest income as taxable income. In addition, we incurred a 10% penalty of \$18,000 on the early surrender of the BOLI policy, as discussed above.

Comparison of Operating Results for the Six Months Ended June 30, 2016 and 2015

General. Net income for the six months ended June 30, 2016 was \$3.3 million, or \$0.26 per diluted share as compared to net income of \$4.6 million, or \$0.33 per diluted share for the six months ended June 30, 2015. Significantly contributing to the decline in net income during the first six months of 2016 was the recognition of a \$500,000 provision for loan loss in 2016 as

compared to a \$600,000 recapture of provision in 2015. In addition, noninterest expense increased \$2.7 million for the first six months of 2016 as compared to the same period in 2015. Partially offsetting these decreases to net income, net interest income increased \$874,000 and noninterest income increased \$740,000 during the first six months of 2016 as compared to the first six months of 2015.

Net Interest Income. Net interest income for the six months ended June 30, 2016 increased \$874,000 to \$16.0 million, as compared to \$15.1 million for the same period in 2015. The increase was a reflection of our strategy to deploy excess cash to fund increases in our loans receivable and available-for-sale investment securities and thereby increase our interest income, while continuing to reduce our cost of funds.

The following table details the change in net interest income due to changes in yield or cost, or changes in the average balance of the related asset or liability:

	Six Months Ended June 30, 2016 Compared to June 30, 2015 Net Change		
	Rate	Volume	Total
	(In thousands)		
Interest-earning assets:			
Loan receivable, net	\$(508)	\$1,049	\$541
Investments available-for-sale	305	120	425
Interest-earning deposits	80	(49)	31
FHLB stock	86	—	86
Total net change in income on interest-earning assets	(37)	1,120	1,083
Interest-bearing liabilities:			
NOW	1	(1)	—
Statement savings	2	3	5
Money market	91	92	183
Certificates of deposit, retail	178	(118)	60
Certificates of deposit, brokered	17	12	29
Advances from the FHLB	(9)	(59)	(68)
Total net change in expense on interest-bearing liabilities	280	(71)	209
Total net change in net interest income	\$(317)	\$1,191	\$874

Loan interest income increased \$541,000 during the first six months of 2016 as compared to the same period in 2015 as a result of a \$40.5 million increase in our average loans receivable partially offset by a 15 basis point reduction in yield. The \$49.8 million purchase of loans during the first half of 2016 contributed significantly to the increase in the average loan balance and were purchased at a 2.0% - 3.0% premium, which is amortized against interest income over the remaining maturity of the loans.

During the first six months of 2016, interest income from our investments available-for-sale increased by \$425,000 as our average balance increased by \$14.1 million and our yield increased 47 basis points as compared to the same period last year. Beginning in mid-2015, we began to restructure our investment available-for-sale portfolio by selling off shorter term, low-yielding investment securities and replacing them with longer term, higher-yielding investment securities.

The Federal Reserve Bank's federal funds rate increase in December 2015 positively impacted both the rate paid on our interest-earning deposits and dividend received on our FHLB stock. The average rate earned on interest-earning

deposits increased 26 basis points for the six months ended June 30, 2016, as compared to the same period last year. The merger of the FHLB Seattle with the FHLB Des Moines in the second quarter of 2015 also resulted in a significant increase in dividends received on the stock we are required to hold at the FHLB. FHLB dividends increased to \$86,000 for the six months ended June 30, 2016 compared to \$5,000 for the six months ended June 30, 2015.

Partially offsetting the increase in interest income, our interest expense increased by \$209,000 during the first six months of 2016 as compared to the same period in 2015. Money market interest expense increased by \$183,000 during the six months

ended June 30, 2016 as a result of a \$56.6 million increase in the average balance of these deposits and a nine basis point increase in the cost of these funds as compared to the same period last year. Much of this increase was due to the short-term deposits from large construction developers that are part of the EB-5 Immigrant Investor Program. In addition, the cost of our certificates of deposit increased \$89,000 in total, primarily due to an eleven basis point increase in the cost of retail certificates of deposit, which more than offset the \$22.8 million decrease in the average balance of retail certificates of deposit. Partially offsetting these increases in interest expense, the cost of our FHLB advances decreased by \$68,000 for the first six months of 2016 as compared to the same period in 2015. The reduction was a result of both a \$12.5 million decrease in the average outstanding balance and a two basis point reduction in the average rate paid. Several advances were paid off at maturity from October 2015 through March 2016 and were not fully replaced until late in the second quarter of 2016.

The following table compares detailed average balances, associated yields and rates, and the resulting changes in interest and dividend income or expense for the six months ended June 30, 2016 and 2015. Nonaccrual loans are included in the average balance of net loans receivable and are considered to carry a zero yield.

	Six Months Ended June 30,

Provision for Loan Losses. During the six months ended June 30, 2016 and 2015, management evaluated the adequacy of the ALLL and concluded that additional provision for loan loss in the amount of \$500,000 was appropriate for the period. The provision during the first six months of 2016 was primarily a reflection of the \$80.1 million growth in net loans receivable. For 2015, the first six months recapture of \$600,000 was primarily a result of recoveries of \$1.1 million, partially offset by charge-offs of \$340,000.

Edgar Filing: First Financial Northwest, Inc. - Form 10-Q

The following table summarizes selected financial data related to our ALLL and loan portfolio. All loan balances and ratios are calculated using loan balances that are net of LIP.

	At or For the Six Months Ended June 30,	
	2016	2015
	(Dollars in thousands)	
Total loans receivable, net of LIP, end of period	\$778,120	\$672,426
Average loans receivable during period	706,606	666,061
ALLL balance at beginning of period	9,463	10,491
Provision (recapture of provision) for loan losses	500	(600)
Charge-offs:		
One-to-four family	—	(25)
Multifamily	—	(281)
Consumer	(19)	(34)
Total charge-offs	(19)	(340)
Recoveries:		
One-to-four family	85	691
Commercial real estate	104	57
Business	—	3
Consumer	1	301
Total recoveries	190	1,052
Net recovery	171	712
ALLL balance at end of period	\$10,134	\$10,603
ALLL as a percent of total loans, net of LIP	1.30	% 1.58 %
Ratio of net recoveries to average net loans receivable (annualized)	0.05	0.43

Noninterest Income. Noninterest income increased \$740,000 to \$1.2 million for the six months ended June 30, 2016, from \$448,000 for the same period in 2015. The following table provides a detailed analysis of the changes in the components of noninterest income:

	Six Months Ended June 30, 2016	Change from June 30, 2015	Percent Change
	(Dollars in thousands)		
Service fees on deposit accounts	\$44	\$ 1	2.3 %
Loan service fees	129	73	130.4
BOLI change in cash surrender value	390	234	150.0
Investment sales commissions	491	468	2,034.8
Other	134	(36)	(21.2)
Total noninterest income	\$1,188	\$ 740	165.2

The \$234,000 increase in noninterest BOLI income was primarily a result of \$20.0 million of BOLI policies added in April 2015. Investment sales commissions increased by \$468,000 for the first two quarters of 2016 as compared to the same period in 2015. The commissions recognized in 2015 represent the initial two months of the Company offering wealth management services.

Noninterest Expense. Noninterest expense increased \$2.7 million for the six months ended June 30, 2016 as compared to the same period in 2015.

The following table provides a detailed analysis of the changes in the components of noninterest expense:

49

	Six Months Ended June 30, 2016	Change from June 30, 2015	Percent Change	
	(Dollars in thousands)			
Salaries and employee benefits	\$7,615	\$950	14.3	%
Occupancy and equipment	996	344	52.8	
Professional fees	1,029	217	26.7	
Data processing	441	93	26.7	
Loss (gain) on sales of OREO property, net	87	618	(116.4))
OREO market value adjustments	257	253	6,325.0	
OREO-related expenses, net	(34)	(27)	385.7)
Regulatory assessments	237	5	2.2	
Insurance and bond premiums	174	(7)	(3.9))
Marketing	78	(9)	(10.3))
Other general and administrative	965	244	33.8	
Total noninterest expense	\$11,845	\$2,681	29.3	%

Salaries and employee benefits expense increased \$950,000 for the first six months of 2016 as compared to the same period in 2015. The number of employees increased from June 30, 2015 to June 30, 2016, as we added employees to support our core conversion project and branch expansions. Occupancy and equipment expense increased by \$344,000 as a result of the addition of three leases for the Mill Creek, Edmonds, and Renton Landing branches.

The loss on sale of OREO properties resulted in an increase to noninterest expense of \$618,000 in the first six months of 2016 as compared to the same period in 2015. During the first six months of 2015, sales of seven OREO properties for \$5.5 million generated a \$531,000 net gain. In comparison, for the same period in 2016, sales of two OREO properties plus a portion of a multi-parcel property for \$988,000 generated a net loss of \$87,000. In addition, market valuation adjustments to properties in our OREO inventory resulted in additional \$257,000 expense for the first six months of 2016 as compared to only \$4,000 for the same period in 2015. A land development project in Kitsap County was written down based on a purchase and sale agreement received in the first quarter of 2016. The sale subsequently fell through, but was deemed to represent the market value of the property.

General and administrative expenses increased by \$244,000 partially as a result of the \$172,000 increase in the reserve for unfunded commitments, reflecting the increase in construction lending and related increase in committed but undisbursed funds. In addition, subscription expense increased by \$49,000 and state taxes increased by \$33,000 as a result of increased taxable income and new local taxes in 2016.

Federal Income Tax Expense. Our statutory income tax rate is 35%. We recorded federal income tax provisions of \$1.5 million and \$2.4 million for the year-to-date ended June 30, 2016, and 2015 as a result of our consolidated net income. Our effective tax rate for the six months ended June 30, 2016 was 32.2% as a result of the early surrender of a BOLI policy, as discussed above.

Liquidity

We are required to have enough cash flow in order to maintain sufficient liquidity to ensure a safe and sound operation. We maintain cash flows above the minimum level believed to be adequate to meet the requirements of normal operations, including potential deposit outflows. On a daily basis, we review and update cash flow projections to ensure that adequate liquidity is maintained.

Our primary sources of funds are customer deposits, cash flow from the loan and investment portfolios, advances from the FHLB, and to a lesser extent, brokered certificates of deposit. These funds, together with equity, are used to make loans, acquire investment securities and other assets, and fund continuing operations. At June 30, 2016, retail certificates of deposit scheduled to mature in one year or less totaled \$142.8 million. Management's practice is to maintain deposit rates at levels that are competitive with other local financial institutions. While maturities and the scheduled amortization of loans are a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by the level of interest rates, economic conditions and competition. We measure our liquidity based on our ability to fund our assets and to meet liability obligations when they come due. Liquidity (and funding) risk occurs when funds cannot be raised at reasonable prices or in a reasonable time frame to meet our normal or

unanticipated obligations. We regularly monitor the mix between our assets and our liabilities to manage effectively our liquidity and funding requirements.

When deposits are not readily available and/or cost effective to provide the funds for our assets, we use alternative funding sources. These sources include, but are not limited to: advances from the FHLB, wholesale funding, brokered deposits, federal funds purchased and dealer repurchase agreements, as well as other short-term alternatives. These funding sources are generally collateral dependent. We may also liquidate assets to meet our funding needs. The balance of our investments available-for-sale increased \$6.5 million from December 31, 2015 to \$136.0 million at June 30, 2016 and represents a ready source of cash if needed. The balance of our interest-earning deposits decreased by \$68.5 million from December 31, 2015 to June 30, 2016, as we shifted cash into higher yielding assets. At June 30, 2016, the Bank maintained credit facilities with the FHLB totaling \$405.7 million with an outstanding balance of \$161.5 million. At June 30, 2016, we also had available a total of \$35.0 million credit facilities with other financial institutions, with no balance outstanding. For additional information, see the Consolidated Statements of Cash Flows in Item 1 of this Form 10-Q.

To assist in our funds acquisition and interest rate risk management efforts, management utilizes the national brokered deposit market and maintained a balance at June 30, 2016 of \$65.6 million of brokered certificates of deposit. In contrast to most retail certificate of deposit offerings which provide the depositor with an option to withdraw their funds prior to maturity, subject to an early withdrawal penalty, certificates of deposit acquired in the brokered market limits the depositor ability to withdraw the funds before the end of the term (except in the case of death or adjudication of incompetence of a depositor) which greatly reduces early redemption risk associated with retail deposits. This strategy may include, but is not necessarily limited to, raising longer term deposits (with terms greater than three years) that assist the Bank in its interest rate risk management efforts. At June 30, 2016, brokered certificates of deposit had a remaining weighted-average maturity of 3.1 years. These certificates also provide the Bank the option to redeem the deposit after six months, a favorable distinction compared to retail certificate of deposit terms that are offered in our local market. With these redemption limitations and call features, the cost of these brokered deposits is generally higher than our retail certificate of deposit offerings. Consequently, as we increase our brokered deposits, our cost of funds may increase.

First Financial Northwest is a separate legal entity from the Bank and, on a stand-alone level, must provide for its own liquidity and pay its own operating expenses and cash dividends. First Financial Northwest's primary sources of funds consist of dividends from the Bank, although there are regulatory restrictions on the ability of the Bank to pay dividends. At June 30, 2016, the Company (on an unconsolidated basis) had liquid assets of \$46.3 million and short-term liabilities of \$93,000.

On July 13, 2016, First Financial Northwest announced the launch of a modified Dutch auction tender offer for up to \$40.0 million in value of shares of our common stock at a price within (and including) the range of \$13.00 to \$14.00 per share. The tender offer will expire at 12:00 midnight, New York City time, on August 9, 2016, unless extended by First Financial Northwest. Tenders of common stock must be made prior to the expiration of the tender offer and may be withdrawn at any time prior to the expiration of the tender offer. The tender offer is subject to terms and conditions described in the Offer to Purchase filed with the SEC on July 13, 2016 and distributed to shareholders. First Financial Northwest intends to finance the tender offer from available cash on hand.

This report is not an offer to purchase or a solicitation of an offer to sell First Financial Northwest's securities. The solicitation and the offer to purchase the securities will only be made pursuant to the Offer to Purchase and related materials. First Financial Northwest filed a Tender Offer Statement on Schedule TO with the SEC with respect to the tender offer on July 13, 2016.

First Financial Northwest's shareholders are advised to read the Schedule TO (including an offer to purchase, a related letter of transmittal and other offer documents), as each may be amended or supplemented from time to time, and any

other relevant documents filed with the SEC when they become available, before making any decision with respect to the tender offer because these documents contain important information about the proposed transaction and the parties thereto.

Investors and shareholders may obtain free copies of the Schedule TO, as amended or supplemented from time to time, and other documents filed by the Company, at the SEC's website at www.sec.gov, by contacting the Company by mail at Investor Relations, First Financial Northwest, Inc., 201 Wells Avenue South, Renton, Washington 98057, or through the investor relations portion of the Company's website at www.ffnwb.com.

On a monthly basis, we estimate our liquidity sources and needs for the next six months. Also, we determine funding concentrations and our need for sources of funds other than deposits. This information is used by our Asset/Liability Management Committee ("ALCO") in forecasting funding needs and investing opportunities. We believe that our current liquidity position and our expected operating results are sufficient to fund all of our existing commitments.

As of June 30, 2016, the Bank and consolidated Company exceeded all regulatory capital requirements and the Bank was considered "well capitalized" under regulatory capital guidelines of the FDIC. The following table provides our capital requirements and actual results.

52

	At June 30, 2016					
	Actual		For Minimum Capital Adequacy Purposes		To be Categorized as "Well Capitalized"	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(dollars in thousands)						
Tier I leverage capital (to average assets)						
Bank only	\$ 115,100	12.02%	\$ 38,311	4.00%	\$ 47,888	5.00%
Consolidated	168,651	17.55	38,448	4.00	48,060	5.00
Common equity tier I ("CET1") (to risk-weighted assets)						
Bank only	115,100	14.42	35,913	4.50	51,874	6.50
Consolidated	168,651	21.04	36,074	4.50	52,107	6.50
Tier I risk-based capital (to risk-weighted assets)						
Bank only	115,100	14.42	47,884	6.00	63,845	8.00
Consolidated	168,651	21.04	48,099	6.00	64,132	8.00
Total risk-based capital (to risk-weighted assets)						
Bank only	125,086	15.67	63,845	8.00	79,807	10.00
Consolidated	178,683	22.29	64,132	8.00	80,165	10.00

In addition to the minimum CET1, Tier 1 and total capital ratios, the Bank will have to maintain a capital conservation buffer consisting of additional CET1 capital equal to 2.5% of risk-weighted assets above the required minimum levels in order to avoid limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses based on percentages of eligible retained income that could be utilized for such actions. This new capital conservation buffer requirement began to be phased in starting in January 2016 at 0.625% of risk-weighted assets and will increase each year until fully implemented in January 2019.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

General. Our Board of Directors has approved an asset/liability management policy to guide management in maximizing net interest income by managing the differences in terms between interest-earning assets and interest-bearing liabilities while maintaining acceptable levels of liquidity, capital adequacy, interest rate sensitivity, credit risk, and profitability. The policy established an ALCO, comprised of certain members of senior management and the Board of Directors. The Committee's purpose is to manage, coordinate, and communicate our asset/liability position consistent with our business plan and Board-approved policy. The ALCO meets quarterly to review various areas including:

- economic conditions;
- interest rate outlook;
- asset/liability mix;
- interest rate risk sensitivity;
- current market opportunities to promote specific products;
- historical financial results;
- projected financial results; and
- capital position.

Additionally, the Committee reviews current and projected liquidity needs. As part of its procedures, the ALCO regularly reviews our interest rate risk by modeling the impact that changes in interest rates may have on earnings, particularly net interest income. The market value of portfolio equity, which is the net present value of an institution's existing assets less its liabilities and off-

balance sheet instruments, is also modeled under several scenarios of changing interest rates. In both cases, results are evaluated and compared with the maximum potential change that is authorized by the Board of Directors.

Our Risk When Interest Rates Change. The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Our loans generally have longer maturities than our deposits. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

We have utilized the following strategies in our efforts to manage interest rate risk:

- we have attempted, where possible, to extend the maturities of our deposits which typically fund our long-term assets;
- we have invested in securities with relatively short average lives, generally less than eight years; and,
- we have added adjustable-rate securities to our investment portfolio.

We have conducted research into the possibility of utilizing derivative instruments to limit the impact of interest rate changes on earnings, prepayment penalties and cash flows and to lower our cost of borrowing while taking into account variable interest rate risk. We are considering using interest rate swaps as a tool to lower the cost of certain FHLB advances as compared to the fixed rates offered by the FHLB for its longer term advances. Interest rate contracts may expose us to the risk of loss associated with variations in the spread between the interest rate contract and the hedged item. In addition, these contracts carry volatility risk that the expected uncertainty relating to the price of the underlying asset differs from what is anticipated. If interest rate swaps we enter into prove ineffective, it could result in volatility in our operating results, including potential losses, which could have a material adverse effect on our results of operations and cash flows.

Brokered Deposits. During the third quarter of 2014, management added the national brokered deposit market as an additional source of funds and to assist efforts in managing interest rate risk. Utilizing brokered deposits might result in increased regulatory scrutiny, as such deposits are not viewed as favorably as core retail deposits and there can be no assurance that the Bank will be allowed to include brokered deposits in its deposit mix in the future. While management will attempt to weigh the benefits of brokered deposits against the costs and risks, there can be no assurance that its conclusions will necessarily be aligned with those of the Bank's regulators.

How We Measure the Risk of Interest Rate Changes. We monitor our interest rate sensitivity on a quarterly basis to measure the change in net interest income in varying rate environments. Management uses various assumptions to evaluate the sensitivity of our operations to changes in interest rates. Although management believes these assumptions are reasonable, the interest rate sensitivity of our assets and liabilities on net interest income and the market value of portfolio equity could vary substantially if different assumptions were used or actual experience differs from these assumptions. Although certain assets and liabilities may have similar maturities or periods of repricing, they may react differently to changes in market interest rates. The interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types of assets and liabilities lag behind changes in market interest rates. Non-uniform changes and fluctuations in market interest rates across various maturities will also affect the results presented. In addition, certain assets, such as adjustable-rate mortgage loans, have features which restrict changes in interest rates on a short-term basis and over the life of the asset. A portion of our adjustable-rate loans have interest rate floors below which the loan's contractual interest rate may not adjust. Approximately 38.7% of our total loans were adjustable-rate loans at June 30, 2016. At that date, \$156.5 million, or 52.0% of these loans were at their floor, with a weighted-average interest rate of 4.3%.

The inability of our loans to adjust downward can contribute to increased income in periods of declining interest rates. However, when loans are at their floors, there is a risk that our interest income may not increase as rapidly as our cost

of funds during periods of increasing interest rates. Furthermore, in the event of a significant change in interest rates, prepayment and early withdrawal levels would likely deviate from those assumed. Finally, the ability of many borrowers to service their debt may decrease in the event of an interest rate increase. We consider all these factors in monitoring our interest rate exposure.

The assumptions we use are based upon a combination of proprietary and market data that reflect historical results and current market conditions. These assumptions relate to interest rates, loan prepayments, deposit decay rates and the market value of certain assets under the various interest rate scenarios. We use market data to determine prepayments and maturities of loans, investments and borrowings and use our own assumptions on deposit decay rates. The exception to this is time deposits, which are modeled to reprice to market rates upon their stated maturities. We also assume that non-maturity deposits can be maintained with rate adjustments not directly proportionate to the change in market interest rates, based upon our historical deposit decay rates which are substantially lower than market decay rates. We have demonstrated in the past that the tiering structure of our deposit accounts during changing rate environments results in relatively lower volatility and less than market rate changes in our interest expense for deposits. We tier our deposit accounts by balance and rate, whereby higher balances within an account earn higher rates of interest. Therefore, deposits that are not very rate sensitive (generally, lower balance tiers) are separated from deposits that are rate sensitive (generally, higher balance tiers). When interest rates rise, we do not have to raise interest rates proportionately on less rate sensitive accounts to retain these deposits. These assumptions are based upon our analysis of our customer base, competitive factors and historical experience.

Our income simulation model examines changes in net interest income in which interest rates were assumed to remain at their base level, instantaneously increase by 100, 200 and 300 basis points or decline immediately by 100 basis points. Reductions of rates by 200 and 300 basis points were not reported due to the current low rate environment.

The following table illustrates the change in our net interest income at June 30, 2016 that would occur in the event of an instantaneous change in interest rates equally across all maturities, with no effect given to any steps that we might take to counter the effect of that interest rate movement.

Net Interest Income Change at June 30, 2016

Basis Point Change in Rates	Net Interest Income	% Change
(Dollars in thousands)		
+300	\$30,287	(6.95)%
+200	31,099	(4.45)
+100	31,893	(2.02)
Base	32,549	—
(100)	32,718	0.52

The following table illustrates the change in our net portfolio value (“NPV”) at June 30, 2016 that would occur in the event of an immediate change in interest rates equally across all maturities, with no effect given to any steps that we might take to counter the effect of that interest rate movement.

Basis Point Change in Rates	Net Portfolio Value ⁽¹⁾			Net Portfolio as % of Portfolio Value of Assets NPV Ratio ⁽³⁾		Market Value of Assets ⁽⁵⁾
	Amount	\$ Change ⁽²⁾	% Change	NPV Ratio ⁽³⁾	% Change ⁽⁴⁾	
	(Dollars in thousands)					
+300	\$154,973	\$(35,698)	(18.72)%	16.37%	(3.50)%	\$946,436
+200	168,064	(22,607)	(11.86)	17.29	(2.22)	971,856
+100	180,975	(9,696)	(5.09)	18.14	(0.95)	997,781
Base	190,671	—	—	18.69	—	1,020,095
(100)	190,907	236	0.12	18.45	0.02	1,034,714

(1) The net portfolio value is the difference between the present value of the discounted cash flows of assets and liabilities and represents the market value of the Company's equity for any given interest rate scenario. Net portfolio value is useful for determining, on a market value basis, how equity changes in response to various interest rate scenarios. Large changes in net portfolio value reflect increased interest rate sensitivity and generally more volatile earnings streams.

(2) The increase or decrease in net portfolio value at the indicated interest rates compared to the net portfolio value assuming no change in interest rates.

(3) Net portfolio value divided by the market value of assets.

(4) The increase or decrease in the net portfolio value divided by the market value of assets.

(5) The market value of assets represents the value of assets under the various interest rate scenarios and reflects the sensitivity of those assets to interest rate changes.

The net interest income and net portfolio value tables presented above are predicated upon a stable balance sheet with no growth or change in asset or liability mix. In addition, the net portfolio value is based upon the present value of discounted cash flows using our estimates of current replacement rates to discount the cash flows. The effects of changes in interest rates in the net interest income table are based upon a cash flow simulation of our existing assets and liabilities and assuming that delinquency rates would not change as a result of changes in interest rates, although

there can be no assurance that this will be the case. Delinquency rates may change when interest rates change as a result of changes in the loan portfolio mix, underwriting conditions, loan terms or changes in economic conditions that have a delayed effect on the portfolio. Even if interest rates change in the designated amounts, there can be no assurance that our assets and liabilities would perform as set forth above. Also, a change in U.S. Treasury rates in the designated amounts accompanied by a change in the shape of the Treasury yield curve would cause changes to the net portfolio value and net interest income other than those indicated above.

At June 30, 2016, we did not have any derivative financial instruments or trading accounts for any class of financial instruments, nor have we engaged in hedging activities or purchased off-balance sheet derivative instruments. However, we continue to review such instruments and may utilize them for interest rate risk management in the future. Interest rate risk continues to be one of our primary risks, as other types of risks, such as foreign currency exchange risk and commodity pricing risk do not arise in the normal course of our business activities and operations.

Item 4. Controls and Procedures

The management of First Financial Northwest, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Securities Exchange Act of 1934 (“Exchange Act”). A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that its objectives are met. Also, because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Additionally, in designing disclosure controls and procedures, our management was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. As a result of these inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Furthermore, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Evaluation of Disclosure Controls and Procedures: An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) was carried out under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer (Principal Financial Officer) and several other members of our senior management as of the end of the period covered by this report. Our Chief Executive Officer and Chief (a) Financial Officer concluded that, as of June 30, 2016, our disclosure controls and procedures were effective in ensuring that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Controls: In the quarter ended June 30, 2016, there was no change in our internal control over (b) financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1. Legal Proceedings

From time to time, we are engaged in various legal proceedings in the ordinary course of business, none of which are currently considered to have a material impact on our financial position or results of operations.

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in Part I, Item 1A of our 2015 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

(c) The following table summarizes First Financial Northwest's common stock repurchases during the second quarter of 2016, under the repurchase plan effective November 2, 2015 through April 27, 2016:

57

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Repurchased as Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Repurchased Under the Plan
April 1 - April 30, 2016	122,058	\$ 13.38	122,058	—
May 1 - May 31, 2016	—	—	—	—
June 1 - June 30, 2016	—	—	—	—
	122,058		122,058	

On October 29, 2015, the Board of Directors authorized the repurchase of up to 1,410,000 shares of the Company's common stock, or 10% of the Company's outstanding shares. This plan expired on April 27, 2016, at which time 800,199 shares had been repurchased at an average price per share of \$13.02. The Company will not repurchase shares during the period of the tender offer and for at least ten days after the completion of the tender offer. See Note 11 - Subsequent Events in Item 1 of this report.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Not applicable.

Item 6. Exhibits and Financial Statement Schedules

(a) Exhibits

- 3.1 Articles of Incorporation of First Financial Northwest ⁽¹⁾
- 3.2 Amended and Restated Bylaws of First Financial Northwest ⁽²⁾
- 4.0 Form of stock certificate of First Financial Northwest ⁽¹⁾
- 10.1 Amended Employment Agreement between First Savings Bank Northwest and Joseph W. Kiley III ⁽³⁾
- 10.2 Form of Change in Control Severance Agreement for Executive Officers ⁽⁴⁾
- 10.3 Form of Supplemental Executive Retirement Agreement entered into by First Savings Bank with Joseph W. Kiley III ⁽⁵⁾
- 10.4 2008 Equity Incentive Plan ⁽⁶⁾
- 10.5 Forms of incentive and non-qualified stock option award agreements ⁽⁷⁾
- 10.6 Form of restricted stock award agreement ⁽⁷⁾
- 10.7 Settlement Agreement and Mutual Release with the Stilwell Group ⁽⁸⁾
- 10.8 Amendment No. 1 to the Settlement Agreement and Releases with the Stilwell Group ⁽⁹⁾
- 10.9 Amendment No. 2 to the Settlement Agreement and Releases with the Stilwell Group ⁽¹⁰⁾
- 10.10 Employment Agreement between First Savings Bank Northwest and Richard P. Jacobson ⁽³⁾
- 31.1 Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act
- 31.2 Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act
- 32 Certification of Chief Executive Officer and Chief Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act

101 The following materials from First Financial Northwest's Quarterly Report on Form 10-Q for the quarter ended June 30, 2016, formatted in Extensible Business Reporting Language (XBRL): (1) Consolidated Balance Sheets; (2) Consolidated Income Statements; (3) Consolidated Statements of Comprehensive Income; (4) Consolidated Statements of Stockholders' Equity; (5) Consolidated Statements of Cash Flows; and (6) Selected Notes to Consolidated Financial Statements.
