² Dell's EBITDA used in these condensed consolidated statements of financial condition was obtained from the "Dell Special Committee Investor Presentation, June 2013", filed with the SEC on Schedule 14A on June 24, 2013 (see page 34, footnote 2). Actual EBITDA of \$3.577 billion is based on Final FY14 Board Case EBITDA of \$3.254 billion, plus \$323 million to add-back for the loss of DFS income. Pro Forma EBITDA of \$3.254 billion is the Final FY14 Board Case EBITDA as disclosed by Dell on Schedule 14A filed on June 24, 2013.

EBITDA is a non-GAAP financial measure. Dell has not provided a reconciliation for EBITDA to the most comparable GAAP financial measure. On July 15, 2013, Dell filed an amendment to Schedule 14A amending and restating the "Dell Supplemental Investor Materials" filed as definitive additional materials with the SEC on July 5, 2013 to include a non-GAAP financial measures reconciliation table as Appendix A, which stated the following:

1 Includes merger-related costs, which consist of transaction expenses associated with Dell’s proposed merger as well as expenses associated with special performance-based retention cash awards granted to certain key employees in Q1 FY14

2 Assuming a tax rate of 23.4% and weighted average share count of 1,748mm on benefits of approximately \$250 million, which primarily relate to vendor settlements

There are limitations to the use of the non-GAAP financial measures presented in this presentation. Dell's non-GAAP financial measures may not be comparable to similarly titled measures of other companies. Other companies, including companies in Dell's industry, may calculate the non-GAAP financial measures differently than Dell, limiting the usefulness of those measures for comparative purposes. In addition, items such as amortization of purchased intangible assets represent the loss in value of intangible assets over time. The expense associated with this loss in value is not included in the non-GAAP financial measures and such measures, therefore, do not reflect the full economic effect of such loss. Further, items such as severance and facility actions, acquisition-related costs, and other charges that are excluded from the non-GAAP financial measures can have a material impact on earnings. Dell's management compensates for the foregoing limitations by relying primarily on GAAP results and using non-GAAP financial measures supplementally or for projections when comparable GAAP financial measures are not available. The non-GAAP financial measures are not meant to be considered as indicators of performance in isolation from or as a substitute for gross margin, operating expenses, operating income, net income, and earnings per share prepared in accordance with GAAP, and should be read only in conjunction with financial information presented on a GAAP basis. See above for reconciliations of each non-GAAP financial measure to its most directly comparable GAAP financial measure. We encourage you to review the reconciliations in conjunction with the presentation of the non-GAAP financial measures for each of the periods presented.

The following is a summary of the costs and other items excluded from the most comparable GAAP financial measures to calculate non-GAAP financial measures:

- **Severance and Facility Actions and Acquisition-related Costs** – Severance and facility action costs are primarily related to facilities charges, including accelerated depreciation and severance and benefits for employees terminated pursuant to cost synergies related to strategic acquisitions and actions taken as part of a comprehensive review of costs. Acquisition-related charges are expensed as incurred and consist primarily of retention payments, integration costs, and other costs. Retention payments include stock-based compensation and cash incentives awarded to employees, which are recognized over the vesting period. Integration costs primarily include IT costs related to the integration of IT systems and processes, costs related to the integration of employees, consulting expenses, and for acquisitions made prior to Fiscal 2013, costs related to full-time employees who were working on the integration. Severance and facility actions and acquisition-related charges are inconsistent in amount and are significantly impacted by the timing and nature of these events. Therefore, although Dell may incur these types of expenses in the future, it believes that eliminating these charges for purposes of calculating the non-GAAP financial measures presented above facilitates a more meaningful evaluation of Dell's current operating performance and comparisons to Dell's past operating performance.
- **Amortization of Intangible Assets** – Amortization of purchased intangible assets consists primarily of amortization of customer relationships, acquired technology, non-compete covenants, and trade names purchased in connection with business acquisitions. Dell incurs charges related to the amortization of these intangibles, and those charges are included in Dell's Consolidated Financial Statements. Amortization charges for purchased intangible assets are significantly impacted by the timing and magnitude of Dell's acquisitions. Accordingly, these charges may vary in amount from period to period. Dell excludes these charges for purposes of calculating the non-GAAP financial measures presented above to facilitate a more meaningful evaluation of Dell's current operating performance and comparisons to Dell's past operating performance.
- **Other Items** – Dell also adjusts GAAP financial results for expenses associated with Dell's proposed merger. These expenses consist of professional fees incurred by Dell in connection with Dell's proposed merger as well as the reimbursement of transaction-related expenses incurred by certain participants approved by a special committee of the Board of Directors. In addition, Dell adjusts GAAP financial results for special retention cash bonus awards granted to certain key employees in the first quarter of Fiscal 2014 that will be payable in March 2014. Dell is excluding these expenses for the purpose of calculating the non-GAAP financial measures presented above because Dell believes

these items are outside our ordinary course of business and do not contribute to a meaningful evaluation of Dell's current operating performance or comparisons to Dell's past operating performance. In addition, previously disclosed non-GAAP financial measures have been further adjusted to exclude certain vendor settlements.

- The aggregate adjustment for income taxes is the estimated combined income tax effect for the adjustments mentioned above. The tax effects are determined based on the tax jurisdictions where the above items were incurred.

Icahn urges Dell stockholders to refer to Dell's Definitive Proxy Statement and other Dell materials filed with the SEC for further and detailed information concerning Dell's calculation of EBITDA.
