THE PERFORMANCE OF COMPANHIA VALE

DO RIO DOCE IN THE THIRD QUARTER 2004

Except where otherwise indicated, the operating and financial information contained in this press release is presented based on the consolidated figures in accordance with accounting principles generally accepted in the United States of America (US GAAP). Except for the information on investments and market behavior, this information is based on quarterly financial statements reviewed by independent auditors. The principal subsidiaries of CVRD that are consolidated are: Caemi, PPSA, Alunorte, Albras, RDM, RDME, RDMN, Urucum Mineração, Docenave, Ferrovia Centro-Atlântica (FCA), Itaco, CVRD Overseas and Rio Doce International Finance.

PROFITABLE GROWTH AND NEW RECORDS

Rio de Janeiro, November 10, 2004 – Companhia Vale do Rio Doce (CVRD) achieved a new record-high net earnings of US\$943 million, US\$0.82 per share, for the third quarter of 2004 (3Q04). This was 101.5% higher than the net earnings of US\$468 million reported in third quarter 2003 (3Q03), and 87.1% more than the 2Q04 net earnings of US\$504 million.

Net earnings in the first nine months of 2004 were US\$1.852 billion compared with US\$1.278 billion in the first nine months of 2003 (9M03).

ROE (return on equity), based on rolling last-12-months (LTM) earnings, was 32.7%, compared with 39.8% in 3Q03, and 31.8% in 2Q04.

Operating earnings adjusted EBIT^(F) of US\$886 million, were also a record, 76.9% more than in 3Q03 (US\$501 million), and 6.5% higher than in 2Q04 (US\$832 million). The adjusted EBIT margin of 40.8% was the second highest in the company's history, the highest-ever being the 43.3% of 2Q04, and was 580 basis points (bp) higher than the operating margin of 35.0% for 3Q04.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

Cash flow, measured as adjusted EBITDA⁽²⁾, reached a quarterly record of US\$1.007 billion, 59.8% higher than a year before (3Q03), and 3.7% higher than in the previous quarter (2Q04).

Adjusted EBITDA in the first nine months of 2004 reached US\$2.721 billion, compared to US\$1.562 billion in the same period of 2003, which represents an increase of 74.2%.

CVRD distributed dividends of US\$0.68 per share in 2004, 15.7% higher than in 2003 and 29.7% higher than in 2002.

US GAAP

Several other records were achieved in 3Q04:

Gross revenue of US\$2.287 billion was 54.2% higher than in 3Q03, and 12.5% higher than in 2Q04.

Shipments of iron ore and pellets totaled 60.453 million tons, 29.7% higher than in 3Q03, and 8.3% higher than in 2Q04.

Kaolin sales reached 319 thousand tons, vis-à-vis 293 thousand tons in 2Q04.

Bauxite sales were 652 thousand tons, beating the previous record (1Q04) of 545 thousand tons.

General cargo (i.e. total cargo excluding iron ore and pellets) transported for clients on CVRD's railroads reached 7.968 billion net ton-kilometers (ntk), compared with 7.632 billion in 2Q04.

3Q04 was the first full quarter of shipments of copper concentrate produced by Sossego, the copper mine located in the Carajás Mineral Province, in the state of Pará, Brazil totaling 96 thousand tons of concentrate in the quarter, generating revenue of US\$70 million.

CVRD's capital expenditures in 3Q04 totaled US\$424 million, and in the first nine months of the year totaled US\$1.270 billion. In the quarter, US\$238.1 million was spent in growth capex on mineral exploration and projects. All these projects are on schedule and will become new platforms of value creation over the next two years.

The reduction of financial leverage and increase in interest coverage ratios, even with significant capital expenditure and dividend distribution, shows the company's financial strength.

The continued profitable growth has been made possible by the good execution of the Company's strategy, appropriate financial policy, and rigid cost control, while also being facilitated by the favorable world market for mineral products.

BUSINESS OUTLOOK

The global economy has been growing at 5% per year, the highest rate since 1976. This synchronized expansion has been accompanied by considerable pressure on the supply of mineral products and logistics infrastructure, especially due to intense consumption by China.

US GAAP

The US continues to lead the worldwide economic recovery, with GDP growth accelerating again in 3Q04, to an annual rate of 3.7%. After a brief period of slowdown, industrial production in Japan has shown signs of increased vitality in recent months. Japan's Ministry of Economy, Trade and Industry (METI) forecasts steel production of 28.9 million tons in 4Q04, and 112.8 million tons in 2004, the highest annual volume since 1974.

In contrast, recovery in the Euro zone is very moderate, and still depends on export performance.

China, in accordance with its government's objective of correcting imbalances in its economy, is showing macroeconomic performance indicators that suggest a process of soft landing.

The year-on-year rate of increase in bank credit in China is declining continuously – it reached 14% at the end of August, after a peak of 23.9% at the end of August 2003. Growth in fixed assets investment is also declining after a five-year peak in January of this year; and 12-month consumer price inflation shows signs of stabilizing at around 5.2% per year. Finally, annualized GDP growth, although still high, was 9.1% to the end of 3Q04, its lowest growth rate since 1Q03.

The recent increase in interest rates, in our view, aims to influence expectations, demonstrating to economic agents that the People's Bank of China continues to have a firm determination to stabilize the economy – potentially facilitating this task. We see no significant reason to change our expectations for the future performance of the Chinese economy, and demand for ores and metals as a consequence of this movement.

Brazil has been posting annualized growth rates of more than 6% since 4Q03, and, in contrast to the successive shocks that slowed its performance in 1995–2002, its economy is now benefiting from the benign global scenario. The more stable domestic environment, created by appropriate macroeconomic policies, is creating the foundations to make the recovery sustainable.

The global economy is undergoing a new oil shock, apparently accompanied by a change in long-term equilibrium oil prices. Any correction of this situation will require efforts for conservation, and the development of alternative energy sources – significant results not being expected from either in the short term. We do, however, expect the impact on global growth and inflation to be very limited in comparison with the effects of similar shocks in the past. The credibility that the world's principal central banks have won for combating inflation removes the stimulus to pass-through cost increases to prices, and makes the use of tight monetary policies – which could otherwise produce recessionary effects in the short term – unnecessary.

As with all economic cycles, the current expansion of the world economy, after a strong acceleration, is now entering a consolidation phase. Leading indicators of economic activity suggest growth rates should be lower in the future, but high enough to maintain the pressure on demand for ores and metals.

Significant growth in world steel production continues: 8.3% year-on-year in the first nine months of 2003, and 9.2% year-on-year in 3Q04.

China's steel production in the first nine months of 2004, according to the International Iron and Steel Institute (IISI), was 191.6 million tons, 20% higher than in 9M03.

US GAAP

In the same nine-month period, China's iron ore imports reached 151 million tons, a year-on-year increase of 40.4 million tons or 36.5% and 2.8 million tons more than in the whole of 2003.

There are no signs of a reduction in global demand; on the contrary, pressure on existing production capacity is stronger than last year. The market for fines, lumps and pellets continues to be firm, with strong demand in Asia, Europe and South America.

Simultaneously, with the continuing imbalance between global supply and demand for alumina, spot prices have again reached US\$400 per ton FOB. The strong demand from China which imported 4.43 million tons in the first nine months of this year and problems on the supply side have increased relative scarcity. We expect this deficit to continue in 2005, helping to maintain a firm price level for producers.

IMPORTANT RECENT EVENTS

Among several important recent developments are (i) a forward split of our stock, and (ii) regularization of the situation of our Shareholder Debentures held by ADR holders.

Also important were (iii) signing of long-term contracts for the supply of iron ore and manganese ferro-alloys, and (iv) in terms of asset management, the startup of the Candonga hydroelectric power plant, and the sale of our stake in PPSA. Finally, (v) a cooperation agreement was signed with JBIC.

Stock split and shareholder debentures

The Extraordinary General Shareholders Meeting held on August 18 approved a three-for-one forward split of the company's shares, to reposition the stock price after a substantial rise and facilitate transactions by retail investors. The company now has 1,165,677,168 shares, of which 749,949,429 are common shares and 415,727,739 are preferred shares.

The Central Bank of Brazil issued an authorization for investors who held shares in the company through ADRs on April 18, 1997 to regularize the registry of their Shareholder Debentures, issued by CVRD in 1997. This enables these investors who held CVRD's ADRs prior to privatization to benefit freely from these assets i.e., allowing these investors proper use of their rights.

Long-term contracts

In this quarter, CVRD signed three new long-term contracts for supply of iron ore:

- (1) Shougang Group of China 11.3 million tons of iron ore over 2004-2012.
- (2) JFE Steel Corporation of Japan 70 million tons of iron ore over 2005-2014.
- (3) Sumitomo Metals of Japan 20 million tons of iron ore over 2005-2014.

In the last 12 months CVRD has signed contracts with clients for supply of a total of 555 million tons of iron ore and pellets over periods of up to 10 years. This helps establish a good degree of predictability for the future performance of the company's sales, facilitating planning of expansion of production capacity.

The company also signed a contract for sale of manganese ferro-alloys to Corus, totaling annual supply of 30,000 tons over three years.

US GAAP

This contract represents a change in the paradigm of the commercial relationship in the global ferro-alloys market. Previously this raw material was supplied through spot market transactions. The change is very positive for suppliers and consumers, enabling the optimization of production planning.

Startup of the Candonga hydroelectric power plant

The Candonga power plant, with installed capacity of 140 MW and average output of 64.5 MW, equivalent to 565,020 MWh/year, started up commercial generation. CVRD's share of this output is the same as its 50% share in the consortium that built the plant, and is being channeled to supply its operational units in the States of Minas Gerais and Espírito Santo.

This is the fourth CVRD project to start up in 2004. The others are Pier III of the Ponta da Madeira maritime terminal, iron ore capacity expansion at Carajás to 70 million tons/year, and the Sossego copper mine.

Sale of PPSA

CVRD sold all of its interest in PPSA to its subsidiary Caemi for US\$117.8 million. The shares sold were 85.6% of PPSA's voting stock and 82.0% of its total capital. The aim of the transaction was to consolidate the kaolin business in Caemi, which already operates in kaolin through Cadam. Completion of the sale is still subject to some conditions precedent.

Cooperation agreement with JBIC

The company signed a cooperation agreement with Japan Bank for International Cooperation (JBIC), to stimulate the flow of information on CVRD's projects for expansion in infrastructure and mining. In the past, JBIC has taken part in the financing of projects that have been important for the growth of the company, and is consolidating its role as a source of long-term funding for the company for this purpose.

SALES VOLUME AND REVENUE

Record gross revenue: US\$2.287 billion

CVRD's gross operating revenue in 3Q04 was US\$2.287 billion, a quarterly record for the company and 12.5% higher than in 2Q04.

The main factor in the US\$254 million increase in revenue from 2Q04 was the expansion in unit volume, representing US\$ 180 million (70.9% of the increase). The increase in prices was responsible for the remaining US\$74 million.

Total revenue in the first nine months of this year reached US\$6.051 billion, 57.0% higher than in 9M03 of US\$3.855 billion.

Record shipments of iron ore and pellets

Sales of ferrous minerals – iron ore, pellets, manganese and ferro-alloys – produced revenue of US\$1.579 billion in 3Q04, 69.0% of the company's total revenue. Shipments of iron ore generated US\$1.093 billion, pellets US\$281 million, pelletizing plant operation services at Tubarão US\$12 million, manganese ore US\$20 million and ferro-alloys US\$169 million.

US GAAP

The total revenue from sales to Europe, CVRD's main market, was US\$699 million, or 30.6% of the company's total revenue. The domestic market contributed US\$621 million (27.2% of the total), China US\$277 million (12.1%), Japan US\$200 million (8.7%), and the rest of Asia US\$87 million (3.8%).

Shipments of iron ore and pellets totaled 60.453 million tons, 29.7% more than in 3Q03 and 8.3% higher than in 2Q04. In the first nine months of the year unit volume of iron ore and pellets reached 169.2 million tons compared with 130.6 million in 9M03, representing an increase of 29.6%.

Sales of iron ore in 3Q04 were 53.606 million tons and sales of pellets were 6.847 million tons.

The company acquired 4.023 million tons of iron ore from mining companies operating in the Iron Quadrangle, in the state of Minas Gerais, to complement its own production and meet the growing demand from clients. These purchases were 11.5 million tons in the first nine months of the year, 59.2% higher than in 9M03.

The average sale price of iron ore was US\$20.39 per ton and that of pellets was US\$41.04 per ton.

The Chinese market, with 11.340 million tons, continues to be the main export destination for iron ore and pellets, accounting for 18.8% of CVRD's volume sold in 3Q04. In the first nine months of 2004 sales to China reached 28.4 million tons against 19.3 million in 9M03. Germany accounted for 10.3%, Japan for 9.5%, and France for 4.7%. The domestic market accounted for 23.5% of CVRD's sales.

Manganese ore sales, at 313 thousand tons in the quarter, were 31.5% higher year-on-year, and 54.2% higher than in 2Q04. The considerable expansion in manganese shipments, and the increase in average price of 38.3% year-on-year, and 17.9% from 2Q04 reflect the resumption of full production at the Azul mine in Carajás, and the strong global demand. Between January and August 2004, total Chinese manganese ore imports reached 2.9 million tons, an increase of 53.7% compared to the same period in 2003, which illustrates the strong global demand.

Sales of ferro-alloys, of 156 thousand tons, were 16.4% higher than in 3Q03 and 13.9% higher than in 2Q04. In the first nine months of the year shipments totaled 492 thousand tons, 40.6% higher year-on-year.

Revenue of US\$327 million from aluminum products

The aluminum production chain bauxite, alumina and primary aluminum provided revenue of US\$327 million, 13.1% higher than in 2Q04 and 14.3% of CVRD's total revenue.

Alumina sales were 508 thousand tons, 51.2% more than in 2Q04 (336 thousand tons). On the other hand, sales in the first nine months of 2004 amounted to 1.326 million tons, compared to 1.897 million tons in the same period of 2003. This reduction can be explained by the swaps, which impacted sales positively last year. In counterbalance for the higher volumes computed last year, the total volume shipped this year might be lower than what would be possible according to the production level of Alunorte, that reached 1.905 million tons in September, 2004.

Average price for alumina shipments in 3Q04 was US\$255.91, up 28.3% vis-à-vis 3Q03, and 3.6% from 2Q04.

Sales of primary aluminum, at 101 thousand tons, were 15.1% lower than in 2Q04 (119 thousand tons), due to temporal differences in shipment dates. Average sale price was US\$1,752.48/ton, 6.4% higher than in 2Q04.

US GAAP

First full quarter of copper shipments

This was the first full quarter of shipments from the Sossego copper mine: 96 thousand tons of copper concentrate were sold, generating revenue of US\$70 million.

Good performance in industrial minerals; record kaolin sales

Potash provided sales revenue of US\$35 million, 1.5% of CVRD's 3Q04 revenue, up 25.0% year-on-year, and 12.9% from the previous quarter.

The Taquari-Vassouras mine still has some operating restrictions since the capacity expansion project is in progress. As a result, there was a slight reduction in volumes sold in the quarter, from 161 thousand tons in 2Q04 to 166 thousand tons. The increase in revenue came from the increase in average price, to US\$217.39 per ton in the quarter, reflecting the strong demand for the product. This is an increase of 53.7% vis-à-vis 3Q03, and 16.4% from 2Q04.

Kaolin sales produced revenue of US\$41 million, 1.8% of CVRD's total and 5.1% higher than in 2Q04, with record unit sales volume of 319 thousand tons, 8.9% higher than the 293 thousand tons sold in 2Q04. Increase in kaolin sales will be possible in the future by the use of the idle capacity of PPSA.

Logistics: record in railroad transportation, productivity gains and safety improvement

CVRD's logistics services provided revenue of US\$232 million in 3Q04, an increase of 45.9% from the US\$159 million of 3Q03, and an increase of 5.5% from US\$220 million in 2Q04. Logistic services provided 10.1% of the company's revenue in the quarter.

Rail transportation of general cargo for clients on the Carajás Railroad (EFC), the Vitória-Minas Railroad (EFVM) and the Centro-Atlântica Railroad (FCA) contributed US\$164 million, port services provided US\$43 million and coastal shipping and port support services US\$25 million.

CVRD's railroads carried 7.968 billion ntk of general cargo for clients, 8.1% more than in 3Q03 and 4.4% higher than in 2Q04. The main cargos were steel industry raw materials and products (43.5%), farm products (35.5%) and fuels (9.8%).

In the 9M04, CVRD railroads transported 21.8 billion ntk compared to 19.9 ntk in 9M03.

Revenue per 1,000 ntk increased on the three railroads: on EFVM, from US\$16.08 in 2Q04 to US\$16.48 in 3Q04; on EFC, from US\$13.94 to US\$15.63, and on FCA from US\$20.62 to US\$20.80.

Both EFVM and EFC made productivity gains in locomotive operation: in ntk per HP, EFVM increased from 8.53 in 2Q04 to 9.11 in the third quarter; and EFC increased from 15.18 to 16.57. There was a small reduction in locomotive operational productivity in the FCA, from 1.33 in 2Q04 to 1.28 this quarter.

In energy efficiency, there was also progressive improvement. EFVM consumed 2.24 liters per gross ton-kilometer (gtk), and EFC consumed 1.40 liters/gtk compared with 2.28 and 1.41 liters/gtk, respectively, in 2Q04. FCA showed a slight increase, from 7.55 in 2Q04 to 7.64 in 3Q04, but this is lower than its 1Q04 result of 7.79 liters/gtk.

US GAAP

One of the most important goals of CVRD in the railroad operation has been the increase in safety. Therefore, the comparison between the number of accidents which occurred in 2000 with the annualized numbers corresponding to the recorded accidents which occurred in the first ten months of 2004 shows significant improvement: there was a reduction of 22.7% at FCA, 69.1% at EFVM and of 42.1% at EFC. The number of accidents is higher at FCA, where efforts are being undertaken to obtain significant improvement in its indices.

The company's ports and port terminals handled 7.634 million tons of cargo for clients, in line with that of 2Q04.

US GAAP**Record operating earnings: US\$886 million**

3Q04 operating earnings, measured as adjusted EBIT, reached US\$886 million, a new record: 6.5% higher than the previous record of US\$832 million of 2Q04 and 76.8% higher than the US\$501 million of 3Q03.

In the first nine months of 2004, the operating earnings reached US\$2.301 billion, a growth of 83.8% vis-a-vis the US\$1.252 billion reached in the first nine months of 2003.

Adjusted EBIT margin was 40.8%, 250 bp less than the record 43.3% margin of 2Q04, and 580 bp above the 35.0% of a year earlier (3Q03).

EBIT was US\$54 million higher than in the prior quarter, reflecting the increase of US\$253 million in net revenue, partially offset by the US\$141 million increase in cost of goods sold (COGS).

Fundamentally, the increase in COGS resulted from the production expansion and the marginal impact of the *real* appreciation during the period as most of CVRD's costs are *real*-denominated. The main causes of the increase in COGS from 2Q04 to 3Q04 were: (a) increase of US\$46 million on cost of outsourced services; (b) increase of US\$24 million on material; (c) US\$19 million increase in acquisition of other products; (d) increase of US\$10 million in depreciation and exhaustion.

COGS BREAKDOWN

Demurrage expenses, an indicator of the disequilibrium between global iron ore supply and demand, reached US\$14 million in the 3Q04, amounting to US\$40 million in the first nine months of 2004, compared to US\$29 million in the first nine months of last year.

Three other factors had a negative effect on operating earnings from 2Q04 to 3Q04. First, other operational expenses increased US\$43 million, on provisions for tax-related contingencies. Second, research and development expenses increased US\$9 million, reflecting the acceleration of the company's mineral exploration program. Third, sales, general and administrative expenses increased US\$6 million accompanying the increase in production and sales.

Adjusted EBIT margin in the ferrous minerals division was 45.0%, 80 bp less than the 45.8% adjusted EBIT margin of 2Q04, and 610 bp higher than in 3Q03.

The adjusted EBIT margin of the aluminum business was 44.4%, close to the record margin of 47.5% obtained in 2Q04, which was due not only to price increases but also to operational excellence.

US GAAP

Adjusted EBIT margin in logistics services was 27.2%, 90 bp lower than the 28.1% achieved in 2Q04 and 310 bp lower than the 3Q03 adjusted EBIT margin of 30.3%.

QUARTERLY CASH FLOW SURPASSES THE ONE BILLION DOLLAR MARK

Cash flow, measured as adjusted EBITDA was US\$1.007 billion, the first time in CVRD's history that its quarterly cash flow has exceeded US\$1 billion. This new record is a symbol of the change in the scale of CVRD's operations and efficiency standards.

Also, this record took place in a quarter when the Brazilian currency, the Real, appreciated against the US dollar, a negative factor in the dollar-denominated value for adjusted EBITDA.

Adjusted EBITDA in the 12 months to September 30, 2004 was US\$3.289 billion. 3Q04 is the tenth successive quarter in which CVRD posted growth in LTM adjusted EBITDA which was 64.5% higher than that of 3Q03.

The increase of US\$36 million in adjusted EBITDA from 2Q04 to 3Q04 basically reflects: the US\$54 million increase in adjusted EBIT, the US\$23 million increase in depreciation, amortization and depletion, partially offset by the US\$41 million reduction in dividends received.

In 3Q04 CVRD received dividends of US\$19 million, from Samarco, vis-à-vis US\$60 million in 2Q04.

The business areas contributed to the company's adjusted EBITDA in the quarter in the following proportions: ferrous minerals 71.7%, aluminum 15.1%, logistics 9.9% and non-ferrous minerals 3.3%.

NET EARNINGS REACHED AN ALL-TIME HIGH: US\$943 MILLION

CVRD's 3Q04 net earnings of US\$943 million were 101.5% higher than in 3Q03 (US\$468 million), and up 87.1% from 2Q04 (US\$504 million).

3Q04 earnings were positively influenced by a US\$314 million profit on the sale of the 20.11% interest in CST (4.42% of CST's voting stock and 29.96% of its non-voting stock). The sale of CVRD's remaining 7.91% stake in CST will take place until May 2005, as announced in the press release published on June 28, 2004.

Other than this capital gain, the increase in net earnings from 2Q04 to 3Q04 reflect: (a) a US\$54 million increase in operating earnings; and (b) an increase of US\$322 million in the result of monetary and exchange rate variation, derived from the appreciation of the Real.

On the other hand, factors reducing the 3Q04 net earnings were:

- (a) US\$160 million increase in income tax and social contribution;
- (b) Reduction of approximately US\$23 million in equity income, from US\$150 million in 2Q04 to US\$127 million in 3Q04.
- (c) US\$68 million increase in net financial expenses.

The fall in equity income is due to the reduction in the participation in CST. The contribution from the participations in steel industry decreased from US\$92 million in the 2Q04 to US\$50 million in 3Q04, while those of the aluminum and iron ore/pellet participations increased, respectively, from US\$18 million and US\$32 million in 2Q04 to US\$20 million and US\$50 million in 3Q04.

Losses of US\$36 million were realized in 3Q04 on hedge transactions to protect against market risks (volatility of FX rates, interest rates and commodity prices). In 2Q04, hedge transactions produced a gain of US\$23 million.

| Total | 89 | 150 | 127 |

US GAAP**DEBT: LEVERAGE AND COVERAGE INDICES CONTINUE TO IMPROVE**

CVRD's total debt on September 30, 2004 was US\$4.418 billion, US\$96 million less than the US\$4.514 billion outstanding as of June 30, 2004.

Short-term debt was reduced by US\$43 million from the end of 2Q04, and long-term debt by US\$53 million. In percentage terms short-term debt was significantly reduced from 32.0% of total debt at the end of 3Q03, to 22.2% at the end of 3Q04.

Net debt (4) fell substantially, from US\$3.455 billion at the end of June to US\$2.479 billion on September 30, 2004. This was due to the increase in the cash balance which was generated by the strong cash flow from operations during the quarter, of US\$1.1 billion, and the proceeds from the sale of shares of CST of US\$415 million. Such cash position should change as a result of the payment of dividends at the end of October 2004.

Due to the considerable increase in 12-month rolling adjusted EBITDA, which was US\$3.289 billion at the end of September, the leverage ratio total debt / LTM adjusted EBITDA fell to 1.34x at end of 3Q04, and total debt / enterprise value(5) was 16.2%, vis-à-vis 21.7% at the end of 2Q04.

There was a strong improvement in interest coverage as well, measured as LTM adjusted Ebitda / LTM interest payments (6), from 11.51x at the end of 2003 to 13.00x at the end of 3Q04.

US GAAP**SOWING SEEDS FOR FUTURE GROWTH: CAPEX OF US\$424 MILLION**

CVRD's capital expenditure totaled US\$424 million in 3Q04, and US\$1,270.3 million in the first nine months of the year.

The figures on capital expenditure are preliminary and subject to revision due to the implementation of the Enterprise Resource Planning system, as informed in the 2003 20-F report.

US\$238.1 million was allocated to growth capex, of which US\$21.5 million was spent in mineral exploration, and US\$185.9 million was allocated to maintenance of existing operations (stay-in-business capex). For the first nine months of 2004, growth capex was US\$798.4 million and stay in business capex, US\$471.9 million.

Of the amount invested in mineral exploration on 3Q04, 39.7% was spent in the Brazilian state of Pará (including Carajás), 22.3% in Minas Gerais, 6.3% in Piauí, 4.8% in other Brazilian states, and 26.9% in other countries. Exploration efforts in the quarter were primarily directed to prospecting for copper, nickel, gold, bauxite and manganese.

All the projects that are being developed by the company are progressing according to their established timetables. Furthermore, all the projects to expand production capacity in iron ore and alumina that are currently in progress are supported by medium and long-term sales contracts.

In 2004 CVRD concluded the Sossego Copper Mine, the expansion of iron ore production at Carajás to 70 million tons, the Pier III Maritime Terminal at the Ponta da Madeira Port, and the Candonga hydroelectric power plant.

Projects under development

| | Capim Branco I e II hydroelectric power plants | 6 | 9 | 13 | 28 | Both are on the Araguari River in Minas Gerais state. They will have generation capacity of 240MW and 210MW respectively. Both are scheduled for start up in 2006. |

SELECTED FINANCIAL INDICATORS FOR THE MAIN NON-CONSOLIDATED AFFILIATES AND JOINT VENTURES

Selected financial indicators for the Company's main non-consolidated affiliates and joint ventures are available on CVRD's Quarterly Financial Statements, on the Company's website, www.cvr.com.br, investor relations.

CONFERENCE CALL/WEBCAST

On Friday, November 12, CVRD will be holding a conference call/webcast at 12:00 pm, local time (Rio de Janeiro, Brazil), 9:00 am United States Eastern Standard Time and 2:00 pm British Standard Time. Instructions to participate in these events are available on CVRD's website, www.cvr.com.br, investor relations. A recording of CVRD's conference call/webcast will be available for a period of 90 days after November 12, 2004.

| Research & Development | (22) | (27) | (36) |
| Other operating expenses | (23) | (43) | (86) |
| Adjusted EBIT | 501 | 832 | 886 |

(2) Adjusted EBITDA

The term EBITDA refers to a financial measure that is defined as earnings (losses) before interest, taxes, depreciation and amortisation; we use the term Adjusted EBITDA to reflect that our financial measure also excludes monetary gains/losses, equity in results of affiliates and joint ventures less dividends received from those companies, changes in provision for losses on equity investments, adjustments for changes in accounting practices, minority interests and non-recurring expenses. However, Adjusted EBITDA is not a measure determined under GAAP in the United States of America and may not be comparable to similarly titled measures reported by other companies. Adjusted EBITDA should not be construed as a substitute for operating income or as a better measure of liquidity than cash flow from operating activities, which are determined in accordance with GAAP. We have presented Adjusted EBITDA to provide additional information with respect to our ability to meet future debt service, capital expenditure and working capital requirements. The following schedule reconciles Adjusted EBITDA to net cash provided by (used in) operating activities reported on our Consolidated Statements of Cash Flows, which we believe is the most directly comparable GAAP measure:

RECONCILIATION BETWEEN ADJUSTED EBITDA VS. OPERATING CASH FLOW

US\$ million

| | <u>3Q03</u> | <u>2Q04</u> | <u>3Q04</u> |
|--------------------------------------|-------------|-------------|--------------|
| Operating cash flow | 435 | 700 | 1,107 |
| Income tax | (41) | 41 | 285 |
| Monetary and Foreign Exchange Losses | 44 | (46) | 41 |
| Financial Expenses | 62 | 60 | 113 |
| Net Working Capital | 140 | 221 | (436) |

This communication may include declarations which represent the expectations of the Company's Management about future results or events. All such declarations, when based on future expectations and not on historical facts, involve various risks and uncertainties. The Company cannot guarantee that such declarations turn out to be correct. Such risks and uncertainties include factors relative to the Brazilian economy and capital markets, which are volatile and may be affected by developments in other countries; factors relative to the iron ore business and its dependence on the steel industry, which is cyclical in nature; and factors relative to the high degree of competitiveness in industries in which CVRD operates. To obtain additional information on factors which could cause results to be different from those estimated by the Company, please consult the reports filed with the Comissão de Valores Mobiliários (CVM Brazilian stock exchange regulatory authority) and the U.S. Securities and Exchange Commission SEC, including the most recent Annual Report CVRD Form 20F.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Companhia Vale do Rio Doce

We have reviewed the accompanying unaudited condensed consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of September 30, 2004, and the unaudited condensed consolidated statements of income, of cash flows and of changes in stockholders' equity for the three-month periods ended September 30 and June 30, 2004 and September 30, 2003 and for the nine-month periods ended September 30, 2004 and 2003, respectively. This interim financial information is the responsibility of the Company's management. The unaudited financial information of certain affiliates, the equity in earnings which total US\$15 million and US\$37 million for the three and nine-month periods ended September 30, 2003, respectively, were reviewed by other independent accountants whose reports thereon have been furnished to us.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews and the reports of the other accountants, we are not aware of any material modifications that should be made to the condensed consolidated interim financial information referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of December 31, 2003, and the related consolidated statements of income, of cash flows and of changes in stockholders' equity for the year then ended (not presented herein) and in our report dated February 20, 2004, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2003 is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

As discussed in Note 4 to the financial statements, the Company changed its method of accounting for asset retirement obligations, as from January 1, 2003 and, as discussed in Note 5 to the financial statements, the Company also changed its accounting policy for consolidation of variable interest entities as from January 1, 2004.

Notes to the Condensed Consolidated Financial Information
Expressed in millions of United States dollars, unless otherwise stated (Unaudited)

1 The Company and its operations

Companhia Vale do Rio Doce (CVRD) is a limited liability company, duly organized and existing under the laws of the Federative Republic of Brazil. Our operations are carried out through CVRD and its subsidiary companies, joint ventures and affiliates, and mainly consist of mining, non-ferrous metal production and logistics, as well as energy, aluminum and steel activities. Further details of our operations and those of our joint ventures and affiliates are described in Note 8.

The main operating subsidiaries we consolidate are as follows:

| Subsidiary | % ownership | Head office location | Principal activity |
|--|-------------|----------------------|-------------------------------------|
| Alumina do Norte do Brasil S.A. - Alunorte | 57 | Brazil | Aluminum |
| Alumínio Brasileiro S.A. - Albras (8) | 51 | Brazil | Aluminum |
| CADAM S.A (CADAM) (2) (4) | 37 | Brazil | Kaolin |
| CELMAR S.A. - Indústria de Celulose e Papel (3) | 100 | Brazil | Forestry |
| CVRD Overseas Ltd. | 100 | Cayman Island | Trading |
| Ferrovias Centro-Atlântica S.A. (4) | 100 | Brazil | Logistics |
| Ferteco Mineração S.A. - FERTECO (3) | 100 | Brazil | Iron ore and Pellets |
| Itabira Rio Doce Company Ltd. - ITACO | 100 | Cayman Island | Trading |
| Mineração Serra do Sossego S.A. (5) | 100 | Brazil | Copper |
| Minerações Brasileiras Reunidas S.A. - MBR (4) (7) | 56 | Brazil | Iron ore |
| Navegação Vale do Rio Doce S.A. - DOCENAVE | 100 | Brazil | Shipping |
| Pará Pigmentos S.A. | 76 | Brazil | Kaolin |

(1) Development stage companies

(2) Through Caemi Mineração e Metalurgia S.A. (CAEMI)

(3) Merged with CVRD on August 29, 2003

- (4) Consolidated as from September 2003
- (5) Merged with CVRD on December 30, 2003
- (6) Formerly Sibra-Eletrosiderúrgica Brasileira S.A.
- (7) Through Caemi Mineração e Metalurgia S.A. and Belém Administrações e Participações Ltda.
- (8) Consolidated as from January 1, 2004 (See Note 4)

2 Basis of consolidation

All majority-owned subsidiaries where we have both share and management control are consolidated, with elimination of all significant intercompany accounts and transactions. Additionally Alumínio Brasileiro S.A. ALBRAS is consolidated as from January 1, 2004 under FIN 46R (note 4). Investments in unconsolidated affiliates and joint ventures are reported at cost plus our equity in undistributed earnings or losses. Included in this category are certain joint ventures in which we have majority ownership but, by force of shareholders' agreements, do not have effective management control. We provide for losses on equity investments with negative stockholders' equity where applicable (see Note 8).

We evaluate the carrying value of our listed investments relative to publicly available quoted market prices. If the quoted market price is below book value, and such decline is considered

F - 8

other than temporary, we write-down our equity investments to quoted market value.

We define joint ventures as businesses in which we and a small group of other partners each participate actively in the overall entity management, based on a shareholders agreement. We define affiliates as businesses in which we participate as a minority stockholder but with significant influence over the operating and financial policies of the investee.

Investments in unincorporated joint ventures, formed for the purpose of investing in electrical energy projects, are proportionately consolidated.

3 Summary of significant accounting policies

Our condensed consolidated interim financial information for the three-month periods ended September 30, 2004 and 2003 and June 30, 2004 and for the nine month periods ended September 30, 2004 and 2003 is unaudited. However, in our opinion, such condensed consolidated financial information includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for interim periods. The results of operations for the nine month period ended September 30, 2004 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2004.

In preparing the consolidated financial statements, we are required to use estimates to account for certain assets, liabilities, revenues and expenses. Our consolidated financial statements therefore include various estimates concerning the selection of useful lives of property, plant and equipment, provisions necessary for contingent liabilities, fair values assigned to assets and liabilities acquired in business combinations, income tax valuation allowances, employee post-retirement benefits and other similar evaluations, actual results may vary from our estimates.

Exchange rates at September 30, 2004 and December 31, 2003 were R\$2.8586: US\$1.00 and R\$2.8892: US\$1.00, respectively.

4 Change in accounting practices

In June 2001, the FASB issued SFAS 143 - Accounting for Asset Retirement Obligations . We adopted SFAS 143 as from January 1, 2003, and as a consequence an additional \$26 for asset retirement obligations was recorded as Others - long-term liabilities , a net increase of \$11 in mine development costs was registered within Property, plant and equipment and a resulting charge of \$10 was registered as Change in Accounting Practice for Asset Retirement Obligations on the Statement of Income, net of income tax (\$15 gross of deferred income tax). Over time the liabilities will be accreted for the change in their present value and initial capitalized costs will be amortized over the useful lives of the related assets.

In December 2003, the FASB issued FIN 46R Consolidation of Variable Interest Entities, (revised December 2003) . The primary objectives of FIN 46R are to provide guidance on the identification of entities for which control is achieved through means other than through voting rights (variable interest entities or VIEs) and how to determine when and which business enterprise should consolidate the VIE (the primary beneficiary). This new model for consolidation applies to an entity in which either (1) the equity investors (if any) do not have a controlling financial interest or (2) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. In addition, FIN 46R requires that both the primary beneficiary and all other enterprises with a significant variable interest in a VIE make additional disclosures regarding the nature, purpose, size and activities of the VIE and the enterprise's maximum exposure to loss as a result of its involvement with the VIE. Alumínio Brasileiro S.A ALBRAS was identified as a VIE and was consolidated as from January 1, 2004.

5 Recently-issued accounting pronouncements

F - 9

Emerging Issue Task Force No. 04-03 (EITF 04-03), *Mining assets: Impairment and Business Combinations* and No. 03-01 (EITF 03-01), *The Meaning of Other Than Temporary Impairment and its Application to Certain Investments* were issued in March, 2004.

The Company does not expect any significant impacts on its financial statements arising from these new pronouncements.

6 Income taxes

Income taxes in Brazil comprise federal income tax and social contribution, which is an additional federal tax. The statutory composite enacted tax rate applicable in the periods presented is 34% represented by a 25% federal income tax rate plus a 9% social contribution rate.

The amount reported as income tax expense in our consolidated financial statements is reconciled to the statutory rates as follows:

| | Three-month periods ended | | | Nine months ended September 30 | |
|---|---------------------------|-------------------|-----------------------|-----------------------------------|-------------------|
| | September 30, 2004 | June 30, 2004 | September 30, 2003 | 2004 | 2003 |
| Income before income taxes, equity results and minority interests | <u>1,122</u> | <u>500</u> | <u>388</u> | <u>2,033</u> | <u>1,357</u> |
| Federal income tax and social contribution expense at statutory enacted rates | (381) | (171) | (132) | (691) | (461) |
| Adjustments to derive effective tax rate: | | | | | |
| Tax benefit on interest attributed to stockholders | 50 | 44 | 107 | 149 | 229 |
| Exempt foreign income (expenses) | 143 | 21 | 9 | 178 | (33) |
| Difference on tax basis of equity investees | (75) | (16) | | (105) | |
| Tax incentives | 32 | 3 | 8 | 44 | 48 |
| Valuation allowance reversal | 19 | 52 | 4 | 71 | 13 |
| Other non-taxable gains (losses) | (12) | 3 | 4 | 1 | (27) |
| | <u> </u> | <u> </u> | <u> </u> | <u> </u> | <u> </u> |
| Federal income tax and social contribution expense in consolidated statements of income | <u>(224)</u> | <u>(64)</u> | <u> </u> | <u>(353)</u> | <u>(231)</u> |

We have certain tax incentives relative to our iron ore and manganese operations in Carajás and relative to alumina in Barcarena. The incentives relative to iron ore and manganese comprise full income tax exemption on defined production levels up to 2005 and partial exemption up to 2013. Both incentives relative to alumina expire in 2010. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed in the form of cash dividends.

7 Inventories

| | September 30, 2004 | December 31, 2003 |
|--------------------------------------|-------------------------------|------------------------------|
| Finished products | | |
| Iron ore and pellets | 170 | 146 |
| Manganese and ferroalloys | 126 | 78 |
| Alumina | 18 | 20 |
| Aluminum | 53 | |
| Copper | 7 | |
| Kaolin | 16 | 16 |
| Others | 5 | 8 |
| Spare parts and maintenance supplies | 306 | 237 |
| | <u>701</u> | <u>505</u> |

(1) During the quarter ended September 30, 2003 CVRD acquired an additional 4.42% of the voting shares and 5.64% of the preferred shares, representing 5.17% of CST's total capital for \$60. On July 30, 2004 we sold 4.42% of the voting shares and 20.11% of the preferred shares;

(2) Investment sold in 2003;

(3) Consolidated as from September, 2003, after acquisition of control;

(4) Investment includes goodwill of \$38 in 2004 and \$ 37 in 2003;

(5) Albras was consolidated as from January 1, 2004.

9 Stockholders equity

On August 18, 2004 the Extraordinary General Shareholders' Meeting approved the forward stock split. Each existing share, common and preferred, was split into three shares.

After the split the Company's capital comprises 1,165,677,168 shares, of which 749,949,429 common shares 415,727,739 class A preferred shares, including three special class shares without par value (Golden Share). The share/ADR proportion will be maintained at 1/1; therefore, each common and preferred share, will continue to be represented by one ADR supported by one common share (NYSE: RIO) or by one ADR supported by one class A preferred share (NYSE: RIOPR) respectively.

For comparative purposes we considered the effects of the split as it had occurred consistently in all periods presented.

10 Pension plans

| | <u> </u> | <u> </u> | <u> </u> | <u> </u> | <u> </u> |
| Net periodic pension cost | 3 | 3 | 3 | 9 | 8 |
| | <u> </u> | <u> </u> | <u> </u> | <u> </u> | <u> </u> |

Employer contributions

We previously disclosed in our consolidated financial statements for the year ended December 31, 2003, that we expected to contribute \$14 to our pension plan in 2004. As of September 30, 2004, \$11 of contributions have been made. We do not expect any change in our previous estimate.

11 Commitments and contingencies

- (a) At September 30, 2004, we had extended guarantees for borrowings obtained by affiliates and joint ventures in the amount of \$7, of which \$6 is denominated in United States dollars and the remaining \$1 in local currency, as follows:

| Affiliate or Joint Venture | Amount of guarantee | Denominated currency | Purpose | Final maturity | Counter guarantees |
|----------------------------|---------------------------|-------------------------|---------|-------------------|-----------------------|
|----------------------------|---------------------------|-------------------------|---------|-------------------|-----------------------|

| | | | | | |
|---------|----------|------|-------------------|------|------|
| SAMARCO | 6 | US\$ | Debt guarantee | 2008 | None |
| VALESUL | 1 | R\$ | Debt guarantee | 2007 | None |
| | <u>7</u> | | | | |

We expect no losses to arise as a result of the above guarantees. We charge commission for extending these guarantees in the case of Samarco.

We have not provided any significant guarantees since January 1, 2003 which would require fair value adjustments under FIN 45 – Guarantor’s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others .

- (b) CVRD and its subsidiaries are defendants in numerous legal actions in the normal course of business. Based on the advice of our legal counsel, management believes that the provision made against contingent losses is sufficient to cover probable losses in connection with such actions.

The provision for contingencies and the related judicial deposits are composed as follows:

| | September 30, 2004 | | December 31, 2003 | |
|---------------------|-----------------------------------|----------------------|-----------------------------------|----------------------|
| | Provision for contingencies | Judicial deposits | Provision for contingencies | Judicial deposits |
| Labor claims | 192 | 89 | 177 | 66 |
| Civil claims | 162 | 64 | 167 | 54 |
| Tax related actions | 427 | 315 | 285 | 279 |
| Others | 7 | 4 | 6 | 8 |
| | 788 | 472 | 635 | 407 |

Labor related actions principally comprise employee claims for (i) payment of time spent traveling from their residences to the work-place, (ii) additional payments for alleged dangerous or unhealthy working conditions and (iii) various other matters, often in connection with disputes about the amount of indemnities paid upon dismissal.

Civil actions principally relate to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted.

Tax related actions principally comprise our challenges of certain revenue taxes, VAT and of the tax on financial movements CPMF.

We continue to vigorously pursue our interests in all the above actions but recognize that probably we will incur some losses in the final instance, for which we have made provisions.

Our judicial deposits are made as required by the courts for us to be able to enter or continue a legal action. When judgment is favorable to us, we receive the deposits back; when unfavorable, the deposits are delivered to the prevailing party.

Contingencies settled in the nine-month period ended September 30, 2004 and 2003, three-month period ended September 30, 2004, and 2003 and June 30, 2004 aggregated \$39, \$191, \$2, \$138 and \$14, respectively, and additional provisions aggregated \$63, \$114, \$11, \$66 and \$13, respectively.

In addition to the contingencies for which we have made provisions we have possible losses in connection with tax contingencies totaling \$320 at September 30, 2004, for which no provision is maintained.

- (c) We are defendants in two actions seeking substantial compensatory damages brought by the Municipality of

Itabira, State of Minas Gerais, which we believe are without merit. Due to the remote likelihood that any loss will arise there from no provision has been made in the financial statements with respect to these two actions.

- (d) We are committed under a take-or-pay agreement to purchase approximately 42,391 thousand metric tons of bauxite from Mineração Rio do Norte S.A. - MRN at a formula price, calculated based on the current London Metal Exchange (LME) quotation for aluminum. Based on a market price of US\$20.45 per metric ton as of September 30, 2004, it represents the following total commitment:

F- 13

| | |
|---------------------|---------|
| 2004 as from July | 14,210 |
| 2005 | 56,840 |
| 2006 | 56,840 |
| 2007 | 56,840 |
| 2008 | 56,840 |
| 2009 and thereafter | 625,326 |
| | 866,896 |

- (e) We and BNDES entered into a contract, known as the Mineral Risk Contract, in March 1997, relating to prospecting authorizations for mining regions where drilling and exploration are still in their early stages. The Mineral Risk Contract provides for the joint development of certain unexplored mineral deposits in approximately two million identified hectares of land in the Carajás region, as well as proportional participation in any financial benefits earned from the development of such resources. Iron ore and manganese deposits already identified and subject to development are specifically excluded from the Mineral Risk Contract.

Pursuant to the Mineral Risk Contract, we and BNDES each agreed to provide \$205, which represents half of the \$410 in expenditures estimated as necessary to complete geological exploration and mineral resource development projects in the region through to April 28, 2009. We will oversee these projects and BNDES will advance us half of our costs on a quarterly basis. Under the Mineral Risk Contract, as of September 30, 2004, the remaining contributions towards exploration and development activities totaled \$68. In the event that either of us wishes to conduct further exploration and development after having spent such \$205, the contract provides that each party may either choose to match the other party's contributions, or may choose to have its financial interest proportionally diluted. If a party's participation in the project is diluted to an amount lower than 40% of the amount invested in connection with exploration and development projects, then the Mineral Risk Contract provides that the diluted party will lose all the rights and benefits provided for in the Mineral Risk Contract and any amounts previously contributed to the project.

Under the Mineral Risk Contract, BNDES has agreed to compensate us through a finder's fee production royalty on their share of mineral resources that are discovered and placed into production. This finder's fee is equal to 3.5% of the revenues derived from the sale of gold, silver and platinum group metals and 1.5% of the revenues derived from the sale of other minerals, including copper, except for gold and other minerals discovered at Serra Leste, for which the finder's fee is equal to 6.5% of revenues.

- (f) At the time of our privatization in 1997, we issued shareholder revenue interests known in Brazil as debentures to our then-existing shareholders, including the Brazilian Government. The terms of the debentures, were set to ensure that our pre-privatization shareholders, including the Brazilian Government, would participate alongside us in potential future financial benefits that we are able to derive from exploiting our mineral resources. On March 26, 2004 as a result of exploiting our mineral resources we declared a distribution on these debentures in the amount of \$2, payable as from April 1, 2004. There is no significant difference between the book value and quoted market price of these debentures.
- (g) We use various judgments and assumptions when measuring our environmental liabilities and asset retirement obligations. Changes in circumstances, law or technology may affect our estimates and we periodically review the amounts accrued and adjust them as necessary. Our accruals do not reflect unasserted claims because we are currently not aware of any such issues. Also the amounts provided are not reduced by any potential recoveries

under cost sharing, insurance or indemnification arrangements because such recoveries are considered uncertain. The changes are demonstrated as follows:

12 Segment and geographical information

In 1999 we adopted SFAS 131 Disclosures about Segments of an Enterprise and Related Information with respect to the information we present about our operating segments. SFAS 131 introduced a management approach concept for reporting segment information, whereby such information is required to be reported on the basis that the chief decision-maker uses internally for evaluating segment performance and deciding how to allocate resources to segments. Our business segments are currently organized as follows:

Ferrous products comprises iron ore mining and pellet production, as well as the Northern and Southern transportation systems, including railroads, ports and terminals, as they pertain to mining operations. Manganese mining and ferroalloys are also included in this segment.

Non-ferrous products comprises the production of kaolin, potash and copper.

Logistics comprises our transportation systems as they pertain to the operation of our ships, ports and railroads for third-party cargos.

Holdings divided into the following sub-groups:

Aluminum comprises aluminum trading activities, alumina refining, aluminum metal smelting and investments in joint ventures and affiliates engaged in bauxite mining.

Others comprises our investments in joint ventures and affiliates engaged in other businesses.

Information presented to top management with respect to the performance of each segment is generally derived directly from the accounting records maintained in accordance with accounting practices generally accepted in Brazil together with certain minor inter-segment allocations.

13 Derivative financial instruments

Volatility of interest rates, exchange rates and commodity prices are the main market risks to which we are exposed - all three are managed through derivative operations. These have the exclusive aim of reducing exposure to risk. We do not use derivatives for speculation purposes.

We monitor and evaluate our derivative positions on a regular basis and adjust our strategy in response to market conditions. We also periodically review the credit limits and credit worthiness of our counter-parties in these transactions. In view of the policies and practices established for operations with derivatives, management considers the occurrence of non-measurable risk situations as unlikely.

The asset (liability) balances and the movement in fair value of derivative financial instruments is as follows (the quarterly information is unaudited):

| | Gold | Interest rates (LIBOR) | Currencies | Alumina | Aluminum | Total |
|--|-------------------|---------------------------------------|-------------------|-------------------|-------------------|-------------------|

F-20

Final maturity dates for the above instruments are as follows:

| | |
|------------------------|----------|
| Gold | Dec 2008 |
| Interest rates (LIBOR) | Oct 2007 |
| Currencies | Dec 2011 |
| Alumina | Dec 2008 |
| Aluminum | Dec 2006 |

Albras entered into a 20 years contract to purchase power from Eletronorte to provide power for its industrial activities which became effective as from June 1, 2004. The contract includes a price adjustment related to LME aluminum prices.

The price adjustment related to LME is an embedded derivative as defined by SFAS 133, which is valued at fair value with variations recorded in the income statement. The fair value variation for the period up to September 30, 2004 was \$22.

14 Subsequent Event

Additional dividend payment on October 29

On October 13, 2004 the Board of Directors of CVRD, approved the payment of an additional dividend in the amount of \$250 to be paid on October 29, 2004, \$150 of which in the form of interest shareholders equity and \$100 in the form of dividends.

Therefore, on October 29, 2004, a total amount of \$525 was distributed to shareholders, which includes the second installment of the minimum dividend announced on January 28, of \$275 and the additional dividend of \$250.

CVRD sells its stake in PPSA

On October 20, 2004 CVRD announces that it has transferred its stake in Pará Pigmentos S.A. (PPSA) to its subsidiary Caemi. CVRD owned 82.0% of the total capital of PPSA and 60.2% of the total capital of Caemi. The objective of this sale is the consolidation of CVRD's kaolin business in Caemi which is already a player in the global kaolin market through its subsidiary CADAM.

Supplemental Financial Statements

The following unaudited information provides additional details in relation to certain financial ratios.

EBITDA - Earnings Before Interest, Income Tax, Depreciation and Amortization

- (a) EBITDA represents operating income plus depreciation, amortization and depletion plus impairment/gain on sale of property, plant and equipment plus dividends received from equity investees.
- (b) EBITDA is not a US GAAP measure and does not represent cash flow for the periods presented and should not be considered as an alternative to net income (loss), as an indicator of our operating performance or as an alternative to cash flow as a source of liquidity.
- (c) Our definition of EBITDA may not be comparable with EBITDA as defined by other companies.
- (d) Although EBITDA, as defined above, does not provide a US GAAP measure of operating cash flows, our management uses it to measure our operating performance and it is commonly used by financial analysts in evaluating our business.

Selected financial indicators for the main affiliates and joint ventures are available on the Company's website, www.cvrd.com.br, under investor relations
