Message from the Managements

We are pleased to present the outline of operation and financial results for Makita's 98th interim period, ended September 30, 2009.

on Consolidated Operating Result as Interim Period

During the six months (the period) ended September 30, 2009, the housing markets slowed down in Western Europe. Capital expenditures and individual consumption decreased due to the shrinkage of economic activity in Eastern Europe and Russia. In North America, stimulus packages and other measures resulted in improvement in individual consumption and corporate production. Nevertheless, economic conditions remained severe with the recovery of business confidence being hindered by a sense of excess capacity among corporations. In Asia, economies showed a moderate recovery trend: the Chinese economy recovered and exports and individual consumption in Southeast Asia improved. In Japan, the government's stimulus package spurred production in some industries, but general economic conditions remained severe as evidenced from a high unemployment rate and shrinking public investment.

In the power tools market, some emerging countries showed signs of recovery due to active public investment and resource development. However, developed countries such as Japan, Europe and the United States continued to suffer a slump in demand with housing starts remaining at low levels and competition becoming even fiercer.

Under these circumstances, Makita directed our development efforts toward introducing smaller and lighter tools. At the same time, we strove to enhance our existing products. For example, we incorporated our proprietary low-vibration technology, which had originally been used for large drilling tools for stone and very well received, into our medium and small drilling tools. In production side, we curtailed production volume at each factory in order to improve inventory level. We also exerted efforts toward establishing a global production structure of the group in order to quickly and flexibly respond to rapid changes in demand. In sales side, Makita strove to expand sales of our gardening equipments, such as ones incorporating the environmentally friendly compact four-stroke engine. We also stepped up efforts to maintain and improve the quality of our sales and services based on direct communication with customers, which remains one of our group's fortes.

on Consolidated Net Sales decreased due to the Global Recession and the Stronger Yen against Other Currencies

In our consolidated financial results for the period, consolidated net sales decreased by 32.4% to 118,681 million yen from the same period of the previous year, mainly due to the decrease in demand for power tools in the face of the worldwide slowdown in economic growth and the unfavorable impact of the stronger yen against other currencies. Incomes were affected by the decline in the rate of operation of our production site. This decline resulted from the production volume reduction carried out in response to the decrease in demand and in order to improve inventory level. As a result, the ratio of cost of sales increased. Our selling, general, administrative and other expenses decreased by only 18.9% compared with the same period of the previous year despite our group-wide cost reduction efforts. As a result, operating income decreased by 58.8% to 14,866 million yen (operating income ratio: 12.5%). Income before income taxes decreased by 50.2% from the same period of the previous year to 17,271 million yen (income before income taxes ratio: 14.6%). Net income attributable to Makita Corporation decreased by 57.3% to 10,622 million yen (net income attributable to Makita Corporation ratio: 9.0%).

1

English Translation of CHUKAN-KI JIGYOU NO GOHOUKOKU originally issued in Japanese

Table of Contents

Net sales by geographic area were as follows:

Net sales in Japan decreased by 14.6% from the same period of the previous year to 20,831 million yen, affected by the housing market remaining sluggish. Sales in gardening equipments were robust but insufficient to compensate for the decreased demand for power tools.

In Europe, net sales decreased by 37.9% from the same period of the previous year to 51,652 million yen. Construction demand declined in Western Europe. Demand for power tools also decreased due to the slowdown of the Russian economy and the financial recession in Eastern Europe.

Net sales in North America decreased by 31.1% to 17,789 million yen. This decrease resulted mainly from the continuing weakness in inventory investment by retailers caused by the sluggish U.S. housing market and the financial recession.

Net sales in Asia decreased by 34.5% from the same period of the previous year to 8,620 million yen. This decrease resulted from the continuing weakness in construction demand.

Net sales in Central and South America and Oceania were sluggish mainly due to the appreciation of the yen against local currencies from the same period of the previous year, although demand on a local currency basis was robust in Brazil and Australia, the hubs of the regional economies. Net sales in Central and South America decreased by 30.1% from the same period of the previous year to 7,398 million yen. Net sales in Oceania decreased by 23.2% from the same period of the previous year to 6,533 million yen. Net Sales in the Middle East and Africa decreased by 41.2% to 5,858 million yen from the same period of the previous year, due to a decline in construction demand.

Outlook for the year ending March 31, 2010 and Issue to be Addressed

Regarding the future outlook, the competition in the power tools market is becoming harsher since the market has remained weak globally. Although some signs of modest recovery have been seen in Asia and emerging countries, the future of the global economy is still uncertain, and the movement in the foreign exchange market is unpredictable. It is expected that the business conditions for Makita will remain severe for the time being.

Under these circumstances, Makita aims to establish high brand recognition and become a Strong Company capable of acquiring and maintaining the top market share as an international total supplier of power tools for professional use, pneumatic tools, gardening equipments and other tools in each international region. To achieve these objectives, we will put focus on maintaining and expanding our efforts to develop new products that guarantee great satisfaction to professional users, our global production structure realizing both high quality and cost competitiveness at the same time, and the best marketing and after-sale service structure of the power tools industry in Japan and in international regions.

With the aim of promoting the development and expansion of engine-powered gardening equipments, Makita established Tokyo Technical Center in Tachikawa, Tokyo on October 1, 2009. The Center will conduct R&D for improving environmental performance, which is the major challenge facing the two-stroke engine.

The Interim Cash Dividends of 15 Yen Per Share

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of at least 30%, with a lower limit on annual cash dividends of 18 yen per share.

For the interim period under review, Makita declared to pay a dividend of 15 yen per share, as announced in April 2009.

Based on its dividend policy, Makita's board of directors will decide on proposals for the dividend for the end of the fiscal year at their meeting to approve the financial statements after they are finalized near the end of April 2010. Their proposals will be presented for discussion and final approval at the Ordinary General Meeting of Shareholders.

We look forward to the continuing support and cooperation of our shareholders.

November 2009

Masahiko Goto

President, Representative Director

Table of Contents

Feature Section

n Tokyo Technical Center has been established

On October 1, 2009, the Company established Tokyo Technical Center in Tachikawa, Tokyo aiming to strengthen the development function for and to increase product lines of engine-powered gardening equipments. In the field of the gardening equipments, the Company has expanded product lines of electric-powered or cordless tools. The Center will place emphasis on strengthening product lines of engine-powered tools by promoting mainly research, development and designing of environment-friendly two-stroke engines (with 40ml or less displacement) and chain saws.

n Makita has continued customer-oriented sales activities

Makita has worked hard to develop new products that provide great satisfaction to professional users and established the best marketing and after-sale service structure in the industry so that customers can use our products without worry. During the first six months ended September 30, 2009, the business conditions for Makita were very severe, affected by global recession and appreciation of the yen value against other currencies.

Under such circumstances, Makita has continued customer-oriented sales activities. As part of these activities, we have relocated our Nagoya Office, one of core sales branch in Japan, to a newly-constructed building in Nagoya. As for international sales offices, our sales subsidiary in France constructed a new office building and we established a sales office in Norway.

Through these activities, the sales and after-sale service structure of Makita has been strengthened. We believe that our managerial efforts during the current severe business conditions will become a foundation that supports our growth once the economy begins to recover. We will further continue our diligent efforts to grow into a stronger company and to maintain the confidence from our customers.

n Makita product in the permanent exhibition of the Memorial Museum of Cosmonautics in Russia

In Moscow, the Capital of Russia, Cordless Driver Drill 6213D is exhibited in the permanent exhibition area of the Memorial Museum of Cosmonautics. The product is exhibited in the Tools Drawer equipped in the Spaceship exhibition area. In the caption plate titled Tools equipped in the spaceship, it is explained that the tools were mainly used in the space station Mir and other spaceships.

We will continue diligent efforts to deliver our products that receive confidence from professional users around the world and further promote diffusion of Makita brands.

Basic policy regarding profit distribution and to repurchases of its outstanding shares

Makita's basic policy on the distribution of profits was established in the fiscal year ended March 31, 2004 is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on consolidated net income attributable to Makita Corporation after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.
