| Actual results for the previous fiscal year ended March 31, 2010 | 82,657                                    | (423)            | 7,419           | 3,255        | 23.63                |

**3. Reasons for Revision of Forecast****(1) Consolidated financial forecast**

As for forecasts for consolidated results, both net sales and profits are expected to become higher than the previous forecasts since the demand for power tools has been strong in the overseas market, although the yen value appreciation against major currencies will continue to have some negative impact.

**(2) Non-consolidated financial forecast**

As for forecasts for non-consolidated results, both net sales and profits are expected to become higher than the original forecasts since orders from overseas customers have been recovering and, thus, exports have been strong.

The above forecast is based on the assumption of exchange rates of 80 yen to the U.S. dollar and 110 yen to the euro for the six months ending March 31,2011.

**FORWARD-LOOKING STATEMENTS**

This document contains forward-looking statements based on Makita's own projections and estimates.

The power tools market, where Makita is mainly active, is subject to the effects of rapid shifts in economic conditions, demand for housing, currency exchange rates, changes in competitiveness, and other factors.

Due to the risks and uncertainties involved, actual results could differ substantially from the content of these statements. Therefore, these statements should not be interpreted as representation that such objectives will be achieved.
