or more substantial acquisitions. These acquisition opportunities require confidentiality and from time to time give rise to bidding scenarios that require quick responses by Interpublic. Although there is uncertainty that any of these discussions will result in definitive agreements or the completion of any transactions, the announcement of any such transaction may lead to increased volatility in the trading price of the shares of Interpublic.

Moreover, the success of recent or contemplated future acquisitions will depend on the effective integration of newly-acquired businesses into Interpublic's current activities. Important factors for integration include realization of anticipated synergies and the ability to retain new personnel and clients.

Investors should evaluate any statement in light of these important factors.

Accelerated Growth Potential

=====

Revenue Upsides

- Allows Interpublic companies to cross sell TNO services not previously available, e.g. diversity marketing, advocacy advertising, analytic modeling
- Allows select TNO brands to accelerate strategic expansion via Interpublic
- Enhances upside potential for FCB to offer more services and more geographic coverage to existing and new clients
-
- Aligning standalone entities offers new international coverage, higher visibility/rankings = stronger new business potential
- Allows all TNO companies to cross sell Interpublic services not previously

Edgar Filing: TRUE NORTH COMMUNICATIONS INC - Form 425

available; e.g. NFO (research), Jack Morton (meetings and events), Octagon (sports marketing)

Revenue and profit benefits from above are all incremental

23

Accelerated Growth Potential

- Current TNO ratio of advertising to other marketing services approximately 60/40, comparable to Interpublic
 - TNO already has substantial mass in these faster growing specialties
 - Considerable further upside to expand these services with Interpublic infrastructure and resources
- Interpublic has proven track record in accelerating international growth of established domestic brands; e.g. Draft, Jack Morton, Golin Harris
- Collectively will examine independent agencies and specialized marketing services to determine optimal alignment going forward
- TNO has track record of organic growth and improving margins; under Interpublic, margins are expected to accelerate further

Again, all benefits from above are incremental
