Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class:

Name of Each Exchange on Which Registered:

Common Stock; Euro .01 par value

New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:
none

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES ☐ NO ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES ☐ NO ☐

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES ☐ NO ☐

Edgar Filing: CHICAGO BRIDGE & IRON CO N V - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendments to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act)
YES ☐ NO ☐

Aggregate market value of common stock held by non-affiliates, based on a New York Stock Exchange closing price of \$39.82 as of June 30, 2008 was \$3,842,520,814.

The number of shares outstanding of the registrant's common stock as of February 1, 2009 was 95,586,771.

PART I

Item 1. *Business*

Founded in 1889, Chicago Bridge & Iron Company N.V. and Subsidiaries (CB&I or the Company) is one of the world's leading engineering, procurement and construction (EPC) companies. Our stock currently trades on the New York Stock Exchange (NYSE) under the ticker symbol CBI. CB&I is a major integrated EPC service provider and process technology licensor, delivering comprehensive solutions to customers in the energy and natural resource industries. With more than 80 locations and approximately 19,000 employees worldwide, we capitalize on our global expertise and local knowledge to safely and reliably deliver projects virtually anywhere. During 2008, we executed approximately 600 projects in over 70 countries for customers in a variety of industries.

Segment Financial Information

Segment financial information by geographic area of operation and similar products and services can be found in the section entitled Results of Operations in Item 7 and Financial Statements and Supplementary Data in Item 8.

Market Sectors

Within our operating segments, we serve under four broad market sectors: Liquefied Natural Gas (LNG), Energy Processes, Steel Plate Structures, and Lummus Technology. Through these market sectors, we offer services both independently and on an integrated basis.

Liquefied Natural Gas. LNG terminals and similar facilities are used for the production, handling, storage and distribution of liquefied gases. We specialize in providing liquefaction and regasification facilities consisting of terminals, tanks, and associated systems. We also provide LNG tanks on a stand-alone basis. Customers for these facilities are international oil companies, regional oil and gas companies, and national oil companies and include such companies as CNOOC, Exxon, Golden Pass LNG, Isle of Grain LNG, Peru LNG, Qatar Petroleum, Southern LNG and Woodside.

Energy Processes. CB&I has extensive experience in a number of energy processes, including offshore structures, refinery process units, petrochemical process units, gas processing facilities, power plants, pipelines, hydrogen/synthesis gas plants, and sulfur removal and recovery. Customers in energy processes include major energy and petrochemical companies such as Chevron, ConocoPhillips, Hunt Oil, Nexen, Shell, Sunoco and Valero.

Steel Plate Structures. CB&I's capabilities for steel structures include above ground storage tanks, elevated storage tanks, pressure vessels, and other specialty structures such as processing facilities and nuclear containment vessels. Customers for these structures include oil and gas companies around the world such as ADNOC, British Gas, Chevron, Kinder Morgan, Qatar Petroleum, Shell, Suncor, and nuclear technology companies such as Westinghouse.

Lummus Technology. CB&I offers licensed technology for customers in the petrochemical, refining and gas processing industries, as well as heat transfer equipment and performance catalysts. Customers in this sector include companies such as Chevron, SABIC, Shell and Sinopec.

Certain Acquisitions

2007

On November 16, 2007, we acquired all of the outstanding shares of Lummus Global (Lummus) from Asea Brown Boveri Ltd. (ABB) for a purchase price of approximately \$820.9 million, net of cash acquired and including transaction costs. Lummus operations include on/near shore engineering, procurement, construction and technology operations. Lummus supplies a comprehensive range of services to the global oil, gas and petrochemical industries, including the design and supply of production facilities, refineries and petrochemical plants.

Table of Contents

Competitive Strengths

Our core competencies, which we believe are significant competitive strengths, include:

Strong Health, Safety and Environmental (HSE) Performance. Because of our long and outstanding safety record, we are sometimes invited to bid on projects for which other competitors do not qualify. According to the U.S. Bureau of Labor Statistics, the national Lost Workday Case Incidence Rate for construction companies similar to CB&I was 2.6 per 100 full-time employees for 2007 (the latest reported year), while our rate for 2008 was only 0.16 per 100. Our excellent HSE performance also translates directly to lower cost, timely completion of projects, and reduced risk to our employees, subcontractors and customers.

Worldwide Record of Excellence. We have an established record as a leader in the international engineering and construction industry by providing consistently superior project performance for 119 years.

Global Execution Capabilities. With a global network of some 80 sales and operations offices, established supplier relationships and available workforces, we have the ability to rapidly mobilize people, materials and equipment to execute projects in locations ranging from highly industrialized countries to some of the world's more remote regions. Additionally, due primarily to our long-standing presence in numerous markets around the world, we have a prominent position as a local contractor in global energy and industrial markets.

Fabrication. We are one of the few EPC and process technology contractors with in-house fabrication facilities which allow us to offer customers the option of modular construction, when feasible. In contrast to traditional onsite stick built construction, modular construction enables modules to be built within a tightly monitored shop environment and allows us to better control quality, minimize weather delays and expedite schedules. Once completed, the modules are shipped and assembled at the project site.

Licensed Lummus Technologies. We offer a broad, state-of-the-art portfolio in gas processing, refining and petrochemical technologies. Being able to provide licensed technologies sets CB&I apart from our competitors and presents opportunities for increased profitability. Combining technology with EPC capabilities strengthens CB&I's presence throughout the project life cycle, allowing us to capture additional market share in the important higher margin growth sectors.

Recognized Expertise. Our in-house engineering team includes internationally recognized experts in oil and gas processes and facilities, modular design and fabrication, cryogenic storage and processing and bulk liquid storage and systems. Several of our senior engineers are long-standing members of committees that have helped develop worldwide standards for storage structures and process vessels for the petroleum industry, including the American Petroleum Institute and the American Society of Mechanical Engineers.

Strong Focus on Project Risk Management. We are experienced in managing the risk associated with bidding on and executing complex projects. Our position as an integrated EPC service provider allows us to execute global projects on a competitively bid and negotiated basis. We offer our customers a range of contracting options, including fixed-price, cost reimbursable and hybrid approaches.

Management Team with Extensive Engineering and Construction Industry Experience. Members of our senior leadership team have an average of approximately 25 years of experience in the engineering and construction industry.

Growth Strategy

On an opportunistic basis, we may pursue additional growth through selective acquisitions of businesses or assets that will expand or complement our current portfolio of services and meet our stringent acquisition criteria. The combination of CB&I and Lummus creates one of the world's leading construction and process engineering companies, with a broad range of multinational customers in the energy and natural resource industries. The offering of both EPC services and technology further differentiates CB&I from its competitors, and the combination of the complementary platforms has resulted in an organization with formidable resources at each stage of the project life cycle.

Table of Contents**Competition**

We operate in a competitive environment. Technology performance, price, timeliness of completion, quality, safety record and reputation are the principal competitive factors within the industry. There are numerous regional, national and global competitors that offer services similar to ours.

Marketing and Customers

Through our global network of sales offices, we contract directly with hundreds of customers in the energy and natural resources industries. We rely primarily on direct contact between our technically-qualified sales and engineering staff and our customers' engineering and contracting departments. Dedicated sales employees are located throughout our global offices.

Our significant customers, with many of which we have had longstanding relationships, are primarily in the hydrocarbon sector and include major petroleum and petrochemical companies (see the "Market Sectors" section for a listing of our significant customers).

We are not dependent upon any single customer on an ongoing basis and do not believe the loss of any single customer would have a material adverse effect on our business. For the year ended December 31, 2008, we had one customer in our Central and South America ("CSA") segment that accounted for approximately 10% of our total revenue. Revenue from Peru LNG totaled approximately \$598.2 million or 10% of our total revenue. For the year ended December 31, 2007, we had one customer within our Europe, Africa and Middle East ("EAME") segment that accounted for more than 10% of our total revenue. Revenue from South Hook LNG totaled approximately \$542.2 million or 12% of our total 2007 revenue. For the year ended December 31, 2006, we had one customer within our North America segment and one within our EAME segment that each accounted for more than 10% of our total revenue. Revenue from Valero Energy Corporation totaled approximately \$353.5 million or 11% of our total 2006 revenue, and revenue from South Hook LNG totaled approximately \$515.4 million or 16% of our total 2006 revenue.

Backlog/New Awards

We had a backlog of work to be completed on contracts totaling \$5.7 billion as of December 31, 2008, compared with \$7.7 billion as of December 31, 2007. Due to the timing of awards and the long-term nature of some of our projects, approximately 40% of our backlog may not be completed in the current fiscal year. New awards were approximately \$4.3 billion for the year ended December 31, 2008, compared with \$6.2 billion for the year ended December 31, 2007. Our new awards by reporting segment were as follows:

	Years Ended December 31,	
	2008	2007
	(In thousands)	
EPC		
North America	\$ 2,215,890	\$ 1,958,368
Europe, Africa and Middle East	694,178	1,082,524
Asia Pacific	480,065	610,340
Central and South America	391,456	2,540,511
Lummus Technology	505,203	11,500
Total New Awards	\$ 4,286,792	\$ 6,203,243

Types of Contracts

Our contracts are usually awarded on a competitive bid and negotiated basis. We offer our customers a range of contracting options, including fixed-price, cost reimbursable and hybrid approaches. Each contract is designed to optimize the balance between risk and reward.

Table of Contents

Raw Materials and Suppliers

The principal raw materials that we use are metal plate, structural steel, pipe, fittings, catalysts, proprietary equipment and selected engineered equipment such as pumps, valves, compressors, motors and electrical and instrumentation components. Most of these materials are available from numerous suppliers worldwide with some furnished under negotiated supply agreements. We anticipate being able to obtain these materials for the foreseeable future. The price, availability and schedule validities offered by our suppliers, however, may vary significantly from year to year due to various factors. These include supplier consolidations, supplier raw material shortages and costs, surcharges, supplier capacity, customer demand, market conditions, and any duties and tariffs imposed on the materials.

We make planned use of subcontractors where it assists us in meeting customer requirements with regard to schedule, cost or technical expertise. These subcontractors may range from small local entities to companies with global capabilities, some of which may be utilized on a repetitive or preferred basis. We anticipate being able to locate and contract with qualified subcontractors in all global areas where we do business.

Environmental Matters

Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as laws of other nations, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties to whom we have purchased or sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred.

We believe that we are currently in compliance, in all material respects, with all environmental laws and regulations. We do not anticipate that we will incur material capital expenditures for environmental controls or for investigation or remediation of environmental conditions during 2009 or 2010.

Patents

CBI has numerous active patents and patent applications throughout the world, the majority of which are associated with technologies licensed by our Lummus Technology sector. However, none is so essential that its loss would materially affect our business.

Employees

We employed 18,818 persons worldwide as of December 31, 2008. With respect to our total number of employees as of December 31, 2008, we had 8,523 salaried employees and 10,295 hourly and craft employees. The number of hourly and craft employees varies in relation to the number and size of projects we have in process at any particular time. The percentage of our employees represented by unions generally ranges between 10 and 20 percent. CB&I has agreements with various unions representing groups of its employees at project sites in the United States (U.S.), Canada, the United Kingdom (U.K.), Australia and various other countries. We have multiple agreements with various unions, the terms of which generally extend up to three years.

We enjoy good relations with our unions and have not experienced a significant work stoppage in any of our facilities in more than 10 years. Additionally, to preserve our project management and technological expertise as core competencies, we recruit, develop and maintain ongoing training programs for engineers and field supervision personnel.

Table of Contents

Available Information

We make available our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to those reports, filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act), free of charge through our internet website at www.cbi.com as soon as reasonably practicable after we electronically file such material with or furnish it to the Securities Exchange Commission (the SEC).

The public may read and copy any materials we file with or furnish to the SEC at the SEC s Public Reference Room at 100 F Street NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website that contains the Company s filings and other information regarding issuers who file electronically with the SEC at www.sec.gov.

Table of Contents

Item 1A. Risk Factors

Any of the following risks (which are not the only risks we face) could have material adverse effects on our financial condition, operating results and cash flow.

Risk Factors Relating to Our Business

The Global Financial and Economic Crisis Could Adversely Impact Us due to Cancellation of Projects, Delay in the Award of New Projects, or Factors Affecting the Availability of our Lending Facilities, Resulting in Reductions in Revenue, Cash Flow, and Earnings, Loss of Personnel Due to Reductions in Force, and Non-Compliance with Lending Covenants.

It is difficult to predict what impact the global financial and economic crisis will have on us. Some of our customers, suppliers and subcontractors have traditionally accessed commercial financing and capital markets to fund their operations, and the availability of funding from those sources could be uncertain in the near term.

We could also be impacted as a result of the current global financial and economic crisis if our customers delay or cancel projects, if our customers experience a material change in their ability to pay us, we are unable to meet our lending covenants, or the banks associated with our current, committed and unsecured revolving credit facility, committed and unsecured letter of credit and term loan agreements and uncommitted revolving credit facilities were to cease or reduce operations.

Our ability to remain in compliance with our lending covenants also could be impacted by circumstances or conditions beyond our control caused by the global financial and economic crisis, including but not limited to, changes in currency exchange or interest rates, performance of pension plan assets, or changes in actuarial assumptions.

Therefore, while we remain cautiously optimistic about the near future, it is difficult to forecast the impact of this crisis on us.

We Could Lose Money if We Fail to Execute Within Our Cost Estimates on Fixed-Price, Lump-Sum Contracts.

A portion of our net revenue is derived from fixed-price, lump-sum contracts. Under these contracts, we perform our services and execute our projects at a fixed price and, as a result, benefit from cost savings, but we may be unable to recover any cost overruns. If we do not execute the contract within our cost estimates, we may incur losses or the project may not be as profitable as we expected. The revenue, cost and gross profit realized on such contracts can vary, sometimes substantially, from the original projections due to changes in a variety of factors, including but not limited to:

costs incurred in connection with modifications to a contract (change orders) that may be unapproved by the customer as to scope and/or price;

unanticipated costs (claims), including costs for customer-caused delays, errors in specifications or designs, or contract termination;

unanticipated technical problems with the structures or systems being supplied by us, which may require that we spend our own money to remedy the problem;

changes in the costs of components, materials, labor or subcontractors;

failure to properly estimate costs of engineering, materials, equipment or labor;

difficulties in obtaining required governmental permits or approvals;

changes in laws and regulations;

changes in labor conditions;

project modifications creating unanticipated costs;

Table of Contents

delays caused by weather conditions;

our suppliers or subcontractors failure to perform; and

exacerbation of any one or more of these factors as projects grow in size and complexity.

These risks are exacerbated if the duration of the project is long-term because there is an increased risk that the circumstances upon which we based our original bid will change in a manner that increases costs. In addition, we sometimes bear the risk of delays caused by unexpected conditions or events.

Our Use of the Percentage-of-Completion Method of Accounting Could Result in a Reduction or Reversal of Previously Recorded Revenue and Profit.

Revenue is primarily recognized using the percentage-of-completion method. Our contracts are awarded on a competitive bid and negotiated basis. We offer our customers a range of contracting options, including fixed-price, cost reimbursable and hybrid approaches. Contract revenue is primarily recognized based on the percentage that actual costs-to-date bear to total estimated costs. We utilize this cost-to-cost approach as we believe this method is less subjective than relying on assessments of physical progress. We follow the guidance of Statement of Position 81-1,

Accounting for Performance of Construction-Type and Certain Production-Type Contracts, (SOP 81-1) for accounting policies relating to our use of the percentage-of-completion method, estimating costs, revenue recognition, including the recognition of profit incentives, combining and segmenting contracts and unapproved change order/claim recognition. Under the cost-to-cost approach, the most widely recognized method used for percentage-of-completion accounting, the use of estimated cost to complete each contract is a significant variable in the process of determining recognized revenue and is a significant factor in the accounting for contracts. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known, including the reversal of any profit recognized in prior periods. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates.

Our Recent Acquisitions or Any Prospective Acquisitions that We Undertake Could Be Difficult to Integrate, Disrupt Our Business, Dilute Stockholder Value and Harm Our Operating Results.

We may continue to pursue growth through the opportunistic and strategic acquisition of companies or assets that will enable us to broaden the types of projects we execute and also expand into new markets. Our opportunity to grow through prospective acquisitions may be limited if we cannot identify suitable companies or assets, reach agreement on potential strategic acquisitions on acceptable terms or for other reasons. Our recent or future acquisitions may be subject to a variety of risks, including:

difficulties in the integration of operations and systems;

the key personnel and customers of the acquired company may terminate their relationships with the acquired company;

we may experience additional financial and accounting challenges and complexities in areas such as tax planning, treasury management, financial reporting and internal controls;

we may assume or be held liable for risks and liabilities (including for environmental-related costs) as a result of our acquisitions, some of which we may not discover during our due diligence;

our ongoing business may be disrupted or receive insufficient management attention; and

we may not be able to realize the cost savings or other financial benefits we anticipated.

If one or more of these risks are realized, it could have an adverse impact on our operations. Future acquisitions may require us to obtain additional equity or debt financing, which may not be available on attractive terms. Moreover, to the extent an acquisition transaction financed by non-equity consideration results in additional goodwill, it will reduce our tangible net worth, which might have an adverse effect on our credit and bonding capacity.

Table of Contents

Our Business is Dependent upon Major Construction Projects from our Clients, the Unpredictable Timing of Which May Result in Significant Fluctuations in our Cash Flow and Earnings due to Timing Between the Award of the Project and Payment Under the Contract.

Our cash flow and earnings are dependent upon major construction projects in cyclical industries, including the hydrocarbon refining, natural gas and water industries. The selection of, timing of or failure to obtain projects, delays in awards of projects, cancellations of projects or delays in completion of contracts could result in significant periodic fluctuations in our cash flows. Moreover, construction projects for which our services are contracted may require significant expenditures by us prior to receipt of relevant payments by a customer and such expenditures could reduce our cash flows and necessitate increased borrowings under our credit facilities.

We Could be Exposed to Credit Risk from a Customer's Financial Difficulties Especially in Light of the Global Financial and Economic Crisis.

The majority of our accounts receivable and all contract work in progress are from clients in various industries and locations throughout the world. Most contracts require payments as the projects progress or in certain cases advance payments. We may be exposed to potential credit risk if our customers should encounter financial difficulties.

Our New Awards and Liquidity May Be Adversely Affected by Bonding and Letter of Credit Capacity.

A portion of our new awards requires the support of bid and performance surety bonds or letters of credit, as well as advance payment and retention bonds, which can enhance our cash flows. Our primary use of surety bonds is to support water and wastewater treatment and standard tank projects in the U.S., while letters of credit are generally used to support most other types of projects. A restriction, reduction, or termination of our surety bond agreements could limit our ability to bid on new project opportunities, thereby limiting our new awards, or increase our letter of credit utilization in lieu of bonds, thereby reducing availability under our credit facilities. A restriction, reduction or termination of our letter of credit facilities could also limit our ability to bid on new project opportunities or could significantly change the timing of project cash flows, resulting in increased borrowing needs.

Our Revenue and Earnings May Be Adversely Affected by a Reduced Level of Activity in the Hydrocarbon Industry Especially in Light of the Global Financial and Economic Crisis.

In recent years, demand from the worldwide hydrocarbon industry has been the largest generator of our revenue. Numerous factors influence capital expenditure decisions in the hydrocarbon industry, including:

- current and projected oil and gas prices;
- exploration, extraction, production and transportation costs;
- the discovery rate and size of new oil and gas reserves;
- the sale and expiration dates of leases and concessions;
- local and international political and economic conditions, including war or conflict;
- technological advances;
- the ability of oil and gas companies to generate capital; and

demand for hydrocarbon production.

In addition, changing taxes, price controls, and laws and regulations may reduce or affect the level of activity in the hydrocarbon industry. These factors are beyond our control. Reduced activity in the hydrocarbon industry could result in a reduction of major projects available in the industry, which may result in a reduction of our revenue and earnings and possible under-utilization of our assets.

Table of Contents

Intense Competition in the Engineering and Construction and Process Technology Industries Could Reduce Our Market Share and Earnings.

We serve markets that are highly competitive and in which a large number of multinational companies compete. In particular, the EPC and process technology markets are highly competitive and require substantial resources and capital investment in equipment, technology and skilled personnel. Competition also places downward pressure on our contract prices and margins. Intense competition is expected to continue in these markets, presenting us with significant challenges in our ability to maintain strong growth rates and acceptable margins. If we are unable to meet these competitive challenges, we could lose market share to our competitors and experience an overall reduction in our earnings.

Our Projects Expose Us to Potential Professional Liability, Product Liability, or Warranty or Other Claims.

We engineer and construct (and our structures typically are installed in) large industrial facilities in which system failure can be disastrous. We may also be subject to claims resulting from the subsequent operations of facilities we have installed. In addition, our operations are subject to the usual hazards inherent in providing engineering and construction services, such as the risk of work accidents, fires and explosions. These hazards can cause personal injury and loss of life, business interruptions, property damage, pollution and environmental damage. We may be subject to claims as a result of these hazards.

Although we generally do not accept liability for consequential damages in our contracts, any catastrophic occurrence in excess of insurance limits at project sites where our structures are installed or services are performed could result in significant professional liability, product liability, warranty and other claims against us. These liabilities could exceed our current insurance coverage and the fees we derive from those structures and services. These claims could also make it difficult for us to obtain adequate insurance coverage in the future at a reasonable cost. Clients or subcontractors that have agreed to indemnify us against such losses may refuse or be unable to pay us. A partially or completely uninsured claim, if successful, could result in substantial losses and reduce cash available for our operations.

We May Experience Increased Costs and Decreased Cash Flow Due to Compliance with Environmental Laws and Regulations, Liability for Contamination of the Environment or Related Personal Injuries.

We are subject to environmental laws and regulations, including those concerning:

emissions into the air;

discharge into waterways;

generation, storage, handling, treatment and disposal of waste materials; and

health and safety.

Our businesses often involve working around and with volatile, toxic and hazardous substances and other highly regulated materials, the improper characterization, handling or disposal of which could constitute violations of U.S. federal, state or local laws and regulations and laws of other nations, and result in criminal and civil liabilities. Environmental laws and regulations generally impose limitations and standards for certain pollutants or waste materials and require us to obtain permits and comply with various other requirements. Governmental authorities may seek to impose fines and penalties on us, or revoke or deny issuance or renewal of operating permits for failure to comply with applicable laws and regulations. We are also exposed to potential liability for personal injury or property

damage caused by any release, spill, exposure or other accident involving such substances or materials. We may incur liabilities that may not be covered by insurance policies, or, if covered, the dollar amount of such liabilities may exceed our policy limits or fall within applicable deductible or retention limits. A partially or completely uninsured claim, if successful and of significant magnitude, could cause us to suffer a significant loss and reduce cash available for our operations.

The environmental health and safety laws and regulations to which we are subject are constantly changing, and it is impossible to predict the effect of such laws and regulations on us in the future. We cannot assure you that our

Table of Contents

operations will continue to comply with future laws and regulations or that these laws and regulations will not cause us to incur significant costs or adopt more costly methods of operation.

In connection with the historical operation of our facilities, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties to whom we have sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred.

We Are and Will Continue to Be Involved in Litigation That Could Negatively Impact Our Earnings and Financial Condition.

We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects, technology licenses and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites. Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment or technologies, design or other engineering services or project construction services provided by our subsidiaries. Management does not currently believe that pending contractual, employment-related personal injury or property damage claims will have a material adverse effect on our earnings or liquidity.

We May Not Be Able to Fully Realize the Revenue Value Reported in Our Backlog.

We had a backlog of work to be completed on contracts totaling \$5.7 billion as of December 31, 2008. Backlog develops as a result of new awards, which represent the revenue value of new project commitments received by us during a given period. Backlog consists of projects which have either (i) not yet been started or (ii) are in progress but are not yet complete. In the latter case, the revenue value reported in backlog is the remaining value associated with work that has not yet been completed. The revenue projected in our backlog may not be realized, or if realized, may not result in earnings as a result of poor project or contract performance. From time to time, projects are cancelled that appeared to have a high certainty of going forward at the time they were recorded as new awards. In the event of a project cancellation, we may be reimbursed for certain costs but typically have no contractual right to the total revenue reflected in our backlog. In addition to being unable to recover certain direct costs, cancelled projects may also result in additional unrecoverable costs due to the resulting under-utilization of our assets.

Political and Economic Conditions, Including War or Conflict, in Non-U.S. Countries in Which We Operate Could Adversely Affect Us.

A significant number of our projects are performed outside the U.S., including in developing countries with political and legal systems that are significantly different from those found in the U.S. We expect non-U.S. sales and operations to continue to contribute materially to our earnings for the foreseeable future. Non-U.S. contracts and operations expose us to risks inherent in doing business outside the U.S., including:

unstable economic conditions in the non-U.S. countries in which we make capital investments, operate and provide services;

the lack of well-developed legal systems in some countries in which we operate, which could make it difficult for us to enforce our contracts;

expropriation of property;

restrictions on the right to receive dividends from joint ventures, convert currency or repatriate funds; and

political upheaval and international hostilities, including risks of loss due to civil strife, acts of war, guerrilla activities, insurrections and acts of terrorism.

Political instability risks may arise from time to time on a country-by-country (not geographic segment) basis where we happen to have a large active project. We do not believe we have any material risks at the present time attributable to political instability.

Table of Contents

We Are Exposed to Possible Losses from Foreign Currency Exchange Rates.

We are exposed to market risk from changes in foreign currency exchange rates. Our exposure to changes in foreign currency exchange rates arises from receivables, payables, forecasted transactions and firm commitments from international transactions, as well as intercompany loans used to finance non-U.S. subsidiaries. We may incur losses from foreign currency exchange rate fluctuations if we are unable to convert foreign currency in a timely fashion. We seek to minimize the risks from these foreign currency exchange rate fluctuations primarily through a combination of contracting methodology and, when deemed appropriate, the use of foreign currency forward contracts. In circumstances where we utilize forward contracts, our results of operations might be negatively impacted if the underlying transactions occur at different times or in different amounts than originally anticipated. We do not use financial instruments for trading or speculative purposes.

Our Goodwill and Other Intangible Assets Could be Impaired and Result in a Charge to Income.

We have accounted for our acquisitions, including the 2007 acquisition of Lummus, using the purchase method of accounting. Under the purchase method we have recorded, at fair value, assets acquired and liabilities assumed, and we recorded as goodwill, the difference between the cost of the acquisitions and the sum of the fair value of tangible and identifiable intangible assets acquired, less liabilities assumed. Definite-lived intangible assets have been segregated from goodwill and recorded based upon expected future recovery of the underlying assets. At December 31, 2008, our goodwill balance was \$962.3 million, \$738.8 million of which is attributable to the excess of the purchase price of Lummus over the fair value of assets and liabilities acquired. The remainder is attributable to past acquisitions within our North America and EAME segments. In accordance with Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets (SFAS No. 142), definite-lived intangible assets are initially recorded at fair value and amortized over their anticipated useful lives, while goodwill balances are not amortized but instead are reviewed for impairment at least annually via a two-phase process, absent any indicators of impairment. The first phase screens for impairment, while the second phase, if necessary, measures impairment. We have elected to perform our annual analysis of goodwill during the fourth quarter of each year based upon balances as of the beginning of the fourth quarter. Impairment testing of goodwill is accomplished by comparing an estimate of discounted future cash flows to the net book value of each applicable reporting unit. Upon completion of our 2008 impairment test for goodwill, no impairment charge was necessary. However, in the future, if our remaining goodwill or other intangible assets were determined to be impaired, the impairment would result in a charge to income from operations in the year of the impairment with a resulting decrease in our recorded net worth.

If We Are Unable to Attract and Retain Key Personnel, Our Business Could Be Adversely Affected.

Our future success depends on our ability to attract, retain and motivate highly skilled personnel in various areas, including engineering, project management, procurement, project controls, finance and senior management. If we do not succeed in retaining and motivating our current employees and attracting new high quality employees, our business could be adversely affected.

Uncertainty in Enforcing U.S. Judgments Against Netherlands Corporations, Directors and Others Could Create Difficulties for Holders of Our Securities in Enforcing Any Judgments Obtained Against Us.

We are a Netherlands company and a significant portion of our assets are located outside the U.S. In addition, members of our management and supervisory boards may be residents of countries other than the U.S. As a result, effecting service of process on each person may be difficult, and judgments of U.S. courts, including judgments against us or members of our management or supervisory boards predicated on the civil liability provisions of the federal or state securities laws of the U.S., may be difficult to enforce.

Risk Factors Associated with Our Common Stock

If We Fail to Meet Expectations of Securities Analysts or Investors due to Fluctuations in Our Revenue or Operating Results, Our Stock Price Could Decline Significantly.

Our revenue and earnings may fluctuate from quarter to quarter due to a number of factors, including the selection of, timing of, or failure to obtain projects, delays in awards of projects, cancellations of projects, delays in

Table of Contents

the completion of contracts and the timing of approvals of change orders or recoveries of claims against our customers. It is likely that in some future quarters our operating results may fall below the expectations of securities analysts or investors. In this event, the trading price of our common stock could decline significantly.

Certain Provisions of Our Articles of Association and Netherlands Law May Have Possible Anti-Takeover Effects.

Our Articles of Association and the applicable law of The Netherlands contain provisions that may be deemed to have anti-takeover effects. Among other things, these provisions provide for a staggered board of Supervisory Directors, a binding nomination process and supermajority shareholder voting requirements for certain significant transactions. Such provisions may delay, defer or prevent takeover attempts that shareholders might consider in the best interests of shareholders. In addition, certain U.S. tax laws, including those relating to possible classification as a controlled foreign corporation described below, may discourage third parties from accumulating significant blocks of our common shares.

We Have a Risk of Being Classified as a Controlled Foreign Corporation and Certain Shareholders Who Do Not Beneficially Own Shares May Lose the Benefit of Withholding Tax Reduction or Exemption Under Dutch Legislation.

As a company incorporated in The Netherlands, we would be classified as a controlled foreign corporation for U.S. federal income tax purposes if any U.S. person acquires 10% or more of our common shares (including ownership through the attribution rules of Section 958 of the Internal Revenue Code of 1986, as amended (the Code), each such person, a U.S. 10% Shareholder) and the sum of the percentage ownership by all U.S. 10% Shareholders exceeds 50% (by voting power or value) of our common shares. We do not believe we are a controlled foreign corporation. However, we may be determined to be a controlled foreign corporation in the future. In the event that such a determination were made, all U.S. 10% Shareholders would be subject to taxation under Subpart F of the Code. The ultimate consequences of this determination are fact-specific to each U.S. 10% Shareholder, but could include possible taxation of such U.S. 10% Shareholder on a pro rata portion of our income, even in the absence of any distribution of such income.

Under the double taxation convention in effect between The Netherlands and the U.S. (the Treaty), dividends paid by Chicago Bridge & Iron Company N.V. (CB&I N.V.) to certain U.S. corporate shareholders owning at least 10% of the voting power of CB&I N.V. are generally eligible for a reduction of the 15% Netherlands withholding tax to 5%, unless the common shares held by such residents are attributable to a business or part of a business that is, in whole or in part, carried on through a permanent establishment or a permanent representative in The Netherlands. Dividends received by exempt pension organizations and exempt organizations, as defined in the Treaty, are completely exempt from the withholding tax. A holder of common shares other than an individual will not be eligible for the benefits of the Treaty if such holder of common shares does not satisfy one or more of the tests set forth in the limitation on benefits provisions of Article 26 of the Treaty. According to an anti-dividend stripping provision, no exemption from, reduction of, or refund of, Netherlands withholding tax will be granted if the ultimate recipient of a dividend paid by CB&I N.V. is not considered to be the beneficial owner of such dividend. The ability of a holder of common shares to take a credit against its U.S. taxable income for Netherlands withholding tax may be limited.

If We Sell or Issue Additional Common Shares, Your Share Ownership Could be Diluted.

Part of our business strategy is to expand into new markets and enhance our position in existing markets throughout the world through acquisition of complementary businesses. In order to successfully complete targeted acquisitions or fund our other activities, we may issue additional equity securities that could dilute our earnings per share (EPS) and your share ownership.

Table of Contents

FORWARD-LOOKING STATEMENTS

This Form 10-K contains forward-looking information (as defined in the Private Securities Litigation Reform Act of 1995) that involves risk and uncertainty. The forward-looking statements may include, but are not limited to, (and you should read carefully) any statements containing the words expect, believe, anticipate, project, estimate, predict, intend, should, could, may, might, or similar expressions or the negative of any of these terms. Any statements in this Form 10-K that are not based on historical fact are forward-looking statements and represent our best judgement as to what may occur in the future.

Forward-looking statements involve known and unknown risks and uncertainties. In addition to the material risks listed under Item 1A. Risk Factors above that may cause our actual results, performance or achievements or business conditions to be materially different from those expressed or implied by any forward-looking statements, the following are some, but not all, of the factors that might cause or contribute to such differences:

The impact of the current, and the potential worsening of, turmoil in worldwide financial and economic markets or current weakness in the credit markets on us, our backlog and prospects and clients, or any aspect of our credit facilities including compliance with lending covenants;

our ability to realize cost savings from our expected execution performance of contracts;

the uncertain timing and the funding of new contract awards, and project cancellations and operating risks;

cost overruns on fixed price or similar contracts whether as the result of improper estimates or otherwise;

risks associated with labor productivity;

risks associated with percentage-of-completion accounting;

our ability to settle or negotiate unapproved change orders and claims;

changes in the costs or availability of, or delivery schedule for, equipment, components, materials, labor or subcontractors;

adverse impacts from weather affecting our performance and timeliness of completion, which could lead to increased costs and affect the costs or availability of, or delivery schedule for, equipment, components, materials, labor or subcontractors;

increased competition;

fluctuating revenue resulting from a number of factors, including a decline in energy prices and the cyclical nature of the individual markets in which our customers operate;

lower than expected activity in the hydrocarbon industry, demand from which is the largest component of our revenue;

lower than expected growth in our primary end markets, including but not limited to LNG and energy processes;

risks inherent in acquisitions and our ability to obtain financing for proposed acquisitions;

our ability to integrate and successfully operate acquired businesses and the risks associated with those businesses;

the weakening, non-competitiveness, unavailability of, or lack of demand for, our intellectual property rights;

failure to keep pace with technological changes;

failure of our patents or licensed technologies to perform as expected or to remain competitive, current, in demand, profitable or enforceable;

adverse outcomes of pending claims or litigation or the possibility of new claims or litigation, and the potential effect on our business, financial condition and results of operations;

Table of Contents

lack of necessary liquidity to finance expenditures prior to the receipt of payment for the performance of contracts and to provide bid, performance, advance payment and retention bonds and letters of credit securing our obligations under our bids and contracts;

proposed and actual revisions to U.S. and non-U.S. tax laws, and interpretation of said laws, Dutch tax treaties with foreign countries, and U.S. tax treaties with non-U.S. countries (including, but not limited to The Netherlands), that seek to increase income taxes payable;

political and economic conditions including, but not limited to, war, conflict or civil or economic unrest in countries in which we operate; and

a downturn or disruption in the economy in general.

Although we believe the expectations reflected in our forward-looking statements are reasonable, we cannot guarantee future performance or results. We are not obligated to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. You should consider these risks when reading any forward-looking statements.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

We own or lease the properties used to conduct our business. The capacities of these facilities depend upon the components of the structures being fabricated and constructed. The mix of structures is constantly changing, and, consequently, we cannot accurately state the extent of utilization of these facilities. We believe these facilities are adequate to meet our current requirements. The following list summarizes our principal properties:

Location	Type of Facility	Interest
<i>North America</i>		
Beaumont, Texas	Fabrication facility	Owned
Beaumont, Texas	Engineering and operations office	Leased
Birmingham, Alabama	Warehouse	Owned
Bloomfield, New Jersey	Administrative and engineering office	Leased
Bolingbrook, Illinois	Administrative and operations office	Leased
Bourbonnais, Illinois	Warehouse	Owned
Clive, Iowa	Fabrication facility and operations office	Owned
Fort Saskatchewan, Canada	Warehouse, fabrication facility and operations office	Owned
Franklin, Tennessee	Warehouse	Owned
Houston, Texas	Fabrication facility and operations office	Owned
Houston, Texas	Engineering offices	Leased
Houston, Texas	Warehouse	Leased
Niagara Falls, Canada	Engineering office	Leased
Plainfield, Illinois	Engineering office	Leased
Richardson, Texas	Engineering office	Leased

San Luis Obispo, California	Warehouse and fabrication facility	Owned
Tyler, Texas	Fabrication facilities	Owned
Tyler, Texas	Engineering and operations offices	Owned/Leased
The Woodlands, Texas	Administrative office	Owned

Table of Contents

Location	Type of Facility	Interest
<i>Europe, Africa and Middle East</i>		
Ajman, United Arab Emirates	Engineering office	Leased
Al Aujam, Saudi Arabia	Fabrication facility and warehouse	Owned
Al-Khobar, Saudi Arabia	Engineering and administrative office	Leased
Brno, Czech Republic	Engineering office	Owned
Cairo, Egypt	Engineering office	Leased
Dammam, Saudi Arabia	Operations and sales office	Leased
Dubai, United Arab Emirates	Engineering, operations, administrative office and warehouse	Leased
The Hague, The Netherlands	Engineering office	Leased

West Bay, Doha Qatar	Operations office	Leased
Wiesbaden, Germany	Engineering office	Leased
<i>Asia Pacific</i>		
Beijing, China	Engineering and operations office	Leased
Kwinana, Australia	Fabrication facility and warehouse	Owned
New Delhi, India	Engineering office	Leased
Perth, Australia	Engineering, sales and operations office	Leased
Shanghai, China	Sales and operations office	Leased
Singapore	Engineering and administrative office	Leased

We also own or lease a number of sales, administrative and field construction offices, warehouses and equipment maintenance centers strategically located throughout the world.

Item 3. Legal Proceedings

We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects, technology licenses and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites. Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment or technologies, design or other engineering services or project construction services provided by our subsidiaries. Management does not currently believe that pending contractual, employment-related personal injury or property damage claims will have a material adverse effect on our earnings or liquidity.

Antitrust Proceedings In October 2001, the U.S. Federal Trade Commission (the "FTC" or the "Commission") filed an administrative complaint (the "Complaint") challenging our February 2001 acquisition of certain assets of the Engineered Construction Division of Pitt-Des Moines, Inc. ("PDM") that we acquired together with certain assets of the Water Division of PDM (the Engineered Construction and Water Divisions of PDM are hereafter sometimes referred to as the "PDM Divisions"). The Complaint alleged that the acquisition violated Federal antitrust laws by threatening to substantially lessen competition in four specific business lines in the U.S.: liquefied nitrogen, liquefied oxygen and liquefied argon (LIN/LOX/LAR) storage tanks; liquefied petroleum gas (LPG) storage tanks; liquefied natural gas (LNG) storage tanks and associated facilities; and field erected thermal vacuum chambers (used for the testing of satellites) (the "Relevant Products").

In June 2003, an FTC Administrative Law Judge ruled that our acquisition of PDM assets threatened to substantially lessen competition in the four business lines identified above and ordered us to divest within 180 days of a final order

all physical assets, intellectual property and any uncompleted construction contracts of the PDM Divisions that we acquired from PDM to a purchaser approved by the FTC that is able to utilize those assets as a viable competitor. Subsequent to June 2003, we continued to pursue various legal remedies.

Table of Contents

On September 15, 2008, we filed a divestiture application with the FTC intended to resolve the matter. The proposed divestiture included a license to use our cryogenic tank technology and the sale of certain construction equipment to Matrix Service Co. (Matrix). It also contemplated the subcontract of approximately \$20.0 million of cryogenic and LNG tank work in the U.S. to Matrix over the next several years. In addition, it provided for the transfer of approximately 70 engineering and construction personnel to Matrix, along with the procedures necessary to enhance its competitiveness in the product lines as specified in the Order and Opinion. On November 28, 2008 the FTC approved our divestiture application. On December 20, 2008 we completed the agreement and closed the transaction. The transaction did not have a material effect on our financial statements.

Asbestos Litigation We are a defendant in lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed at various locations. We have never been a manufacturer, distributor or supplier of asbestos products. Through December 31, 2008, we have been named a defendant in lawsuits alleging exposure to asbestos involving approximately 4,700 plaintiffs, and of those claims, approximately 1,400 claims were pending and 3,300 have been closed through dismissals or settlements. Through December 31, 2008, the claims alleging exposure to asbestos that have been resolved have been dismissed or settled for an average settlement amount per claim of approximately one thousand dollars. With respect to unasserted asbestos claims, we cannot identify a population of potential claimants with sufficient certainty to determine the probability of a loss and to make a reasonable estimate of liability, if any. We review each case on its own merits and make accruals based on the probability of loss and our ability to estimate the amount of liability and related expenses, if any. We do not currently believe that any unresolved asserted claims will have a material adverse effect on our future results of operations, financial position or cash flows and at December 31, 2008 we had accrued \$2.4 million for liability and related expenses. While we continue to pursue recovery for recognized and unrecognized contingent losses through insurance, indemnification arrangements or other sources, we are unable to quantify the amount, if any, that may be expected to be recoverable because of the variability in the coverage amounts, deductibles, limitations and viability of carriers with respect to our insurance policies for the years in question.

Environmental Matters Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as laws of other nations, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties to whom we have purchased or sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred.

We believe that we are currently in compliance, in all material respects, with all environmental laws and regulations. We do not anticipate that we will incur material capital expenditures for environmental controls or for investigation or remediation of environmental conditions during 2009 or 2010.

Item 4. *Submission of Matters to a Vote of Security Holders*

No matters were submitted to a vote of security holders during the fourth quarter ended December 31, 2008.

Table of Contents**PART II****Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Our common stock is traded on the NYSE. As of February 2, 2009, we had approximately 70,000 shareholders. The following table presents the range of common stock prices on the NYSE and the cash dividends paid per share of common stock by quarter for the years ended December 31, 2008 and 2007:

	Range of Common Stock Prices			Dividends per Share
	High	Low	Close	
Year Ended December 31, 2008				
Fourth Quarter	\$ 19.32	\$ 5.12	\$ 10.05	\$ 0.04
Third Quarter	\$ 40.20	\$ 15.90	\$ 19.24	\$ 0.04
Second Quarter	\$ 49.82	\$ 37.50	\$ 39.82	\$ 0.04
First Quarter	\$ 63.50	\$ 35.21	\$ 39.24	\$ 0.04
Year Ended December 31, 2007				
Fourth Quarter	\$ 63.22	\$ 41.49	\$ 60.44	\$ 0.04
Third Quarter	\$ 44.84	\$ 30.00	\$ 43.06	\$ 0.04
Second Quarter	\$ 40.19	\$ 30.10	\$ 37.74	\$ 0.04
First Quarter	\$ 31.50	\$ 25.79	\$ 30.75	\$ 0.04

Any future cash dividends will depend upon our results of operations, financial condition, cash requirements, availability of surplus and such other factors as our Board of Directors may deem relevant.

The following table summarizes information, as of December 31, 2008, relating to our equity compensation plans pursuant to which grants of options or other rights to acquire our common shares may be granted from time to time:

Equity Compensation Plan Information

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans
Equity compensation plans approved by security holders	1,394,538	\$ 15.90	4,127,842
Equity compensation plans not approved by security holders	N/A	N/A	N/A

holders			
Total	1,394,538	\$ 15.90	4,127,842

Table of Contents

The following table summarizes the number of shares repurchased through our stock repurchase program during the fourth quarter of 2008:

Issuer Purchases of Equity Securities(2)

Period	a) Total Number of Shares Purchased	b) Average Price Paid per Share	c) Total Number of Shares Purchased as Part of Publicly Announced Plan	d) Maximum Number of Shares that May Yet Be Purchased Under the Plan(1)
October 2008 (10/1/08 - 10/31/08)	244,700	\$ 18.7074	2,584,700	7,015,300
November 2008 (11/1/08 - 11/30/08)				
December 2008 (12/1/08 - 12/31/08)				
Total	244,700	\$ 18.7074	2,584,700	7,015,300

(1) On May 8, 2008, our shareholders voted on and we announced the extension through November 8, 2009 of our existing stock repurchase program (the 2007 Stock Repurchase Program). Under the 2007 Stock Repurchase Program, the authorized amount of total repurchases cannot exceed 10% of our issued share capital (or approximately 9,600,000 shares).

(2) Table does not include shares withheld for tax purposes or forfeitures under our equity plans.

Table of Contents**Item 6. Selected Financial Data**

We derived the following summary financial and operating data for the five years ended December 31, 2004 through 2008 from our audited Consolidated Financial Statements, except for Other Data. You should read this information together with Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements, including the related notes, appearing in Item 8. Financial Statements and Supplementary Data.

- (1) Other operating (income) loss, net, generally represents (gains) losses on the sale of property, plant and equipment.
- (2) New awards represent the value of new project commitments received by us during a given period. These commitments are included in backlog until work is performed and revenue is recognized or until cancellation. Backlog may also fluctuate with currency movements.
- (3) Included in our 2007 results of operations were the operating results of Lummus from the acquisition date of November 16, 2007.
- (4) Included in our 2008 results of operations were charges totaling approximately \$457,000 associated with additional projected costs to complete the South Hook and Isle of Grain II projects in the United Kingdom (the U.K. Projects.). For additional information regarding these projects, see the Results of Operations section in Item 7.

Table of Contents**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following Management's Discussion and Analysis of Financial Condition and Results of Operations is provided to assist readers in understanding our financial performance during the periods presented and significant trends which may impact our future performance. This discussion should be read in conjunction with our Consolidated Financial Statements and the related notes thereto included within Item 8. Financial Statements and Supplementary Data.

CB&I is an integrated EPC provider and major process technology licensor. Founded in 1889, CB&I provides conceptual design, technology, engineering, procurement, fabrication, construction, commissioning and associated maintenance services to customers in the energy and natural resource industries.

RESULTS OF OPERATIONS

Our new awards, revenue and income from operations by reporting segment are as follows:

	Years Ended December 31,		
	2008	2007	2006
	(In thousands)		
New Awards (1)			
EPC			
North America	\$ 2,215,890	\$ 1,958,368	\$ 2,753,121
Europe, Africa and Middle East	694,178	1,082,524	1,143,941
Asia Pacific	480,065	610,340	324,445
Central and South America	391,456	2,540,511	207,776
Lummus Technology	505,203	11,500	
Total new awards	\$ 4,286,792	\$ 6,203,243	\$ 4,429,283
Revenue			
EPC			
North America	\$ 2,195,479	\$ 1,946,484	\$ 1,676,694

- (1) New awards represent the value of new project commitments received by us during a given period. These commitments are included in backlog until work is performed and revenue is recognized or until cancellation.

Table of Contents

2008 VERSUS 2007

Current Market Conditions As a result of the current volatility and uncertainty in the world markets and difficulties associated with obtaining financing, our clients may be re-evaluating the timing of, or need for, proposed projects. Although our identified 2009 opportunities indicate that a significant portion of our prospective projects are with international and national oil companies, the majority of which are capable of funding projects from their internal resources, given the market volatility and uncertainty, there is a risk that our current and prospective projects may be delayed or canceled.

We continue to have a broad diversity within the entire energy project spectrum, with over half of our 2008 and anticipated 2009 revenue coming from outside the United States. In 2008, LNG projects totaled approximately 44% of revenues, Energy Processes projects accounted for nearly 28%, Steel Plate Structure revenues accounted for 21%, and the remaining 7% of revenues were from Lummus Technology. This revenue mix will continue to evolve consistent with changes in our backlog mix as well as shifts in future global demand. With the reduced price of crude oil and the drop in gasoline consumption in the United States, refinery investments projected for 2009 have slowed. However, we currently anticipate that investment in Steel Plate Structures and Energy Processes projects will remain strong in many parts of the world. LNG investment also continues, with liquefaction projects increasing in comparison to regasification projects in certain geographies.

While our bank lines remain in place to provide us the necessary flexibility and availability to take advantage of the global market for our services, the availability of such lending facilities and our ability to remain in compliance with our lending covenants could be impacted by the economic crisis.

Results Overview We realized revenue of approximately \$5.9 billion for 2008, representing an approximate 36% increase over 2007, with growth in all segments. Over half of this increase was a result of our acquired Lummus operations. Our new awards of \$4.3 billion were lower than both 2007 new awards of \$6.2 billion and our expectations for the current year, primarily due to delay of several expected opportunities to 2009, including an anticipated Colombian refinery project award within our CSA segment. This anticipated award is expected to be valued in excess of \$1.0 billion.

During 2008 we recognized a \$457.0 million charge associated with additional projected costs to complete the U.K. Projects, as described below. Our gross profit, excluding these charges, was \$690.2 million, or approximately 11.0% of revenue, representing solid execution of beginning of the year backlog and 2008 new awards, and the contribution of our higher gross profit Lummus Technology business acquired in the fourth quarter of 2007.

New Awards/Backlog The \$4.3 billion of 2008 new awards represented a decrease of \$1.9 billion, or 31%, compared with 2007. North America's new awards, which comprised more than half of our total 2008 awards, increased 13% over 2007 due to the impact of significant awards in Canada and the U.S. Significant awards in Canada included a \$400.0 million oil sands storage terminal and a \$150.0 million LNG peak shaving facility, while the U.S. benefited from the award of two nuclear containment vessels, valued at \$336.0 million. New awards in our EAME segment decreased 36% due to 2007 including a significant U.K. LNG terminal award, valued at approximately \$500.0 million, partly offset by 2008 awards within the acquired EPC business of Lummus. New awards in our Asia Pacific (AP) segment decreased 21% due to 2007 including a large Australian LNG storage facility award, valued in excess of \$373.0 million, partly offset by 2008 awards including a steel plate structures project in Australia and additional tanks at an LNG import terminal in China. Lummus Technology's 2008 awards included heat transfer equipment for a petrochemical complex in the Middle East, valued at approximately \$140.0 million, and licensing and engineering for a petrochemical complex in India. New awards in our CSA segment decreased 85% due to the impact of the significant Peru LNG liquefaction and Chile LNG regasification terminal awards during 2007.

We have experienced a move in the marketplace away from lump-sum turnkey as the preferred approach for major EPC energy projects and a shift to a combination of cost reimbursable, modular fabrication, engineering services and hybrid contracts, which provide for risk-sharing between the owner and the contractor. Our new awards have reflected this shift, in addition to smaller steel plate structure and energy processes projects.

Backlog at December 31, 2008 was \$5.7 billion, compared to approximately \$7.7 billion at December 31, 2007.

Table of Contents

Revenue Revenue in 2008 of \$5.9 billion represented an increase of \$1.6 billion, or 36%, compared with 2007. Revenue increased in all reporting segments, representing growth of \$249.0 million, or 13%, in the North America segment, \$208.4 million, or 16%, in the EAME segment, \$54.4 million, or 12%, in the AP segment, \$672.0 million, or 107%, in the CSA segment and \$397.7 million in the Lummus Technology segment. The following factors contributed to our revenue increase when compared to 2007, despite the wind-down of the U.K. Projects revenue in our EAME segment:

Approximately 57% of the revenue increase, or \$897.2 million, is attributable to the results of our November 2007 Lummus acquisition. Total Lummus Technology revenue during 2008 of \$438.7 million reflects the strength of proprietary equipment sales and process licensing to the gas, refining and petrochemical sectors. The balance of Lummus 2008 revenue of \$563.2 million is included primarily within our EAME segment.

We began the year with significant LNG backlog, contributing to the revenue growth in our CSA, North America and AP segments.

Our CSA segment experienced growth in energy processes work in South America.

We experienced growth of steel plate structure work in Canada.

We experienced increased steel plate structure growth in the Middle East and engineering projects in the U.K.

Gross Profit Gross profit in 2008 was \$233.2 million, or 3.9% of revenue, compared with gross profit of \$356.8 million, or 8.2% of revenue, in 2007. The decrease in gross profit as a percentage of revenue is primarily attributable to the following factors:

Continued poor labor productivity, significant weather delays and the need to supplement critical subcontractor areas adversely impacted the schedules for the U.K. Projects and necessitated substantial expenditures during 2008 well above previous estimates. Consequently, the schedule for achieving first gas for the South Hook LNG project was delayed to early 2009 and projected costs increased. The project is currently ready for first gas and is awaiting its first LNG delivery. While experiencing similar issues during 2008, the Isle of Grain II LNG project received first gas in line with our revised schedule in November 2008 and achieved gas out in late December 2008. As a result of the aforementioned, we recognized charges to earnings of \$358.0 million and \$99.0 million during 2008 for South Hook and Isle of Grain II, respectively. If weather factors, labor productivity and subcontractor performance on the South Hook LNG project were to decline from amounts utilized in our current estimates, our schedule for gas out and project completion, and our future results of operations would be negatively impacted. Charges for the South Hook project during 2007 totaled approximately \$97.7 million.

Gross profit in the North America segment was unfavorably impacted by increased forecasted materials and associated construction labor costs on a project in the U.S., the majority of which were incurred during the first quarter of 2008. Additionally, gross profit in our North America segment was favorably impacted during 2007 by a cancellation provision on an LNG tank project in Canada.

Our gross profit excluding the \$457.0 million charge for the U.K. Projects was \$690.2 million or approximately 11.0% of revenue. The improvement over 2007 is primarily a result of the contribution of the Lummus Technology business and solid project execution on existing backlog.

Equity Earnings Equity earnings of \$41.1 million during 2008 were generated from technology licensing and catalyst sales for various proprietary technologies in joint venture investments within our Lummus Technology business.

Selling and Administrative Expenses Selling and administrative expenses were \$215.5 million, or 3.6% of revenue, in 2008, compared with \$153.7 million, or 3.5% of revenue, in 2007. The increase in absolute dollars relates to incremental costs associated with our Lummus business and growth in global administrative support costs, partly offset by lower 2008 performance based compensation expense.

Income from Operations Income from operations during 2008 was \$35.2 million compared to \$205.6 million during 2007. As described above, our 2008 results were unfavorably impacted by charges for the U.K. Projects

Table of Contents

in our EAME segment. Additionally, higher selling and administrative costs and intangibles amortization expense were partially offset by significant equity earnings during 2008.

Interest Expense and Interest Income Interest expense for 2008 was \$21.1 million, compared with \$7.3 million for 2007. The increase of \$13.8 million is primarily due to higher average debt levels resulting from borrowings utilized to fund a portion of our Lummus acquisition. Borrowings associated with the Lummus acquisition included a \$200.0 million five-year term loan and periodic borrowings under our revolving credit facility. Interest income for 2008 was \$8.4 million, compared with \$31.1 million for 2007. The decrease of \$22.7 million is due to lower short-term investment levels resulting from cash utilized to fund U.K. project costs and the balance of our Lummus acquisition.

Income Tax Expense Income tax expense for 2008 was \$37.5 million, or 166.3% of pre-tax income, versus \$57.4 million, or 25.0% of pre-tax income, for 2007. We did not provide an income tax benefit for \$128.0 million of our net losses realized in the U.K. during the second half of 2008, which has significantly increased our tax rate compared to 2007. We expect our 2009 rate to fall within the range of 30% to 34%.

We operate in more than 80 locations worldwide and, therefore, are subject to the jurisdiction of multiple taxing authorities. Determination of taxable income in any given jurisdiction requires the interpretation of applicable tax laws, regulations, treaties, tax pronouncements and other tax agreements. As a result, we are subject to tax assessments in such jurisdictions, including assessments related to the determination of taxable income, transfer pricing and the application of tax treaties, among others. We believe we have adequately provided for any such known or anticipated assessments. We believe that the majority of the amount currently provided under Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of SFAS No. 109, Accounting for Income Taxes (FIN 48) will not be settled in the next twelve months and such possible settlement will not have a significant impact on our liquidity.

Minority Interest in Income Minority interest in income for 2008 and 2007 was \$6.2 million and \$6.4 million, respectively. The changes compared with 2007 are commensurate with the levels of operating income for the contracting entities.

Prospective Change in Reporting Segments Over the past several years, we have experienced worldwide demand in our end markets. With the addition of the Lummus organization last year, our ability to respond to that demand has placed us in the tier of global contractors who have the unique capability to meet customers' needs across a broad spectrum of technology and project services.

As a result of the aforementioned, beginning in the first quarter 2009, our management structure and internal and public segment reporting will be aligned based upon three distinct project business sectors, rather than our historical practice of reporting based upon discrete geographic regions. These three project business sectors will be CB&I Lummus (which includes Energy Processes and LNG terminal projects), CB&I Steel Plate Structures, and Lummus Technology.

Our 2008 results discussed above have been reported in accordance with the geographic segment structure that was in place during 2008.

2007 VERSUS 2006

New Awards/Backlog New awards in 2007 of \$6.2 billion, increased \$1.8 billion, or 40% compared with 2006. Approximately 41% of our new awards during 2007 were for contracts awarded within our CSA segment, while 32% were for contracts awarded in North America. North America's new awards decreased 29% due to the impact of a

significant LNG import terminal award in the U.S. during 2006, valued at \$1.1 billion. Significant awards in North America during 2007 included two refinery expansion projects and an LNG expansion project, all awarded in the U.S. New awards in our EAME segment decreased 5% as a result of the impact of growth on the U.K. LNG import terminals and major awards in the Middle East during 2006, partly offset by a U.K. LNG terminal award during 2007, valued at approximately \$500.0 million. New awards in our AP segment increased 88% primarily due to an LNG storage facility award in Australia, valued in excess of \$373.0 million. New awards in our CSA segment increased 1123%, due to an LNG liquefaction award in Peru, valued in excess of \$1.5 billion, and an LNG regasification terminal award in Chile, valued at approximately \$775.0 million.

Table of Contents

Due to our strong performance in new awards and approximately \$1.2 billion of backlog acquired with our acquisition of Lummus, our backlog increased from \$4.6 billion in 2006 to \$7.7 billion in 2007.

Revenue Revenue in 2007 of \$4.4 billion increased \$1.2 billion, or 40%, compared with 2006. During 2007, revenue increased 16% in the North America segment, 19% in the EAME segment, 88% in the AP segment, and more than fourfold in the CSA segment. The increase in our North America segment was primarily a result of progress on the U.S. LNG import terminal awarded in the second half of 2006. Increased revenue within our EAME segment resulted from the impact of growth on an existing LNG project in the U.K. and stronger steel plate structure activity in the Middle East. Revenue growth in the AP segment was a result of progress on a significant project in Australia. CSA's increase was a result of the significant increase in new awards during the year. Total 2007 revenue contributed by our acquisition of Lummus was approximately \$104.6 million.

Gross Profit Gross profit in 2007 was \$356.8 million, or 8.2% of revenue, compared with \$281.8 million, or 9.0% of revenue, in 2006. The 2007 and 2006 results were impacted by several key factors including the following:

Our North America segment was favorably impacted during 2007 by the strong steel plate structure markets in the U.S. and Canada and a cancellation provision associated with an LNG tank project in Canada. These favorable impacts were partially offset by charges to earnings during the first half of 2007 of approximately \$19.8 million associated with costs on a project that closed in a loss position. These charges related primarily to higher than anticipated labor costs and modifications to our field execution approach. Our 2006 results were impacted by increased forecasted construction costs to complete several projects.

Our EAME segment was unfavorably impacted by increased forecasted construction costs on a project in the U.K. We increased our forecasted costs to complete the project during 2007 primarily as a result of lower than expected labor productivity and schedule impacts, which increased our project management and field labor estimates and associated subcontract costs. As a result of the cumulative revisions to its estimated costs to complete, the project incurred charges to earnings of \$97.7 million during 2007.

The impact of the above project was partly offset by stronger steel plate structure activity in the Middle East during 2007.

Our AP segment was favorably impacted by the higher level of revenue in the region.

Our CSA segment benefited from the significant new awards in the first half of 2007, while 2006 was impacted by negative cost adjustments on several projects.

The results of our acquired Lummus business contributed to our 2007 gross profit.

Selling and Administrative Expenses Selling and administrative expenses were \$153.7 million, or 3.5% of revenue, in 2007, compared with \$133.8 million, or 4.3% of revenue, in 2006. Despite a 40% increase in revenue during 2007, our selling and administrative expenses increased only \$19.9 million, including \$10.2 million associated with the operations of our acquisition of Lummus, as a result of effective cost controls.

Income from Operations During 2007, income from operations was \$205.6 million, representing a \$59.9 million increase compared with 2006. As described above, our results were favorably impacted by higher revenue volume, partially offset by lower gross profit percentage levels and increased selling and administrative expenses.

Interest Expense and Interest Income Interest expense increased \$2.5 million from 2006 to \$7.3 million, due to higher average debt levels resulting from borrowings to fund a portion of our acquisition of Lummus and the impact of a

favorable settlement of contingent tax obligations during 2006. Borrowings associated with the acquisition of Lummus included short-term revolver borrowings (which were fully repaid as of December 31, 2007) and a \$200.0 million five-year term loan. The final of three equal annual installments of \$25.0 million was paid in mid-2007 associated with our senior notes. Interest income increased \$10.7 million from 2006 to \$31.1 million primarily due to higher short-term investment levels prior to the acquisition of Lummus in November 2007 and higher associated yields.

Table of Contents

Income Tax Expense Income tax expense for 2007 and 2006 was \$57.4 million, or 25.0% of pre-tax income, and \$38.1 million, or 23.6% of pre-tax income, respectively. The rate increase compared with 2006 was primarily due to the U.S./non-U.S. income mix and the recording of tax reserves.

Minority Interest in Income Minority interest in income in 2007 was \$6.4 million compared with minority interest in income of \$6.2 million in 2006. The changes compared with 2006 were commensurate with the levels of operating income for the contracting entities.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2008, cash and cash equivalents totaled \$88.2 million.

Operating During 2008, our operations generated \$26.3 million of cash flows due primarily to higher payable levels across all geographic regions as well as lower receivable balances within our EAME segment. These increases were partially offset by an increase in unbilled revenue balances in North America and payments to fund the losses on the U.K. Projects.

The recent turmoil in the worldwide financial markets caused a significant decrease in the value of assets held by our pension plans as of December 31, 2008. Lower than anticipated rates of return on certain plan investments has resulted in the recording of deferred losses within accumulated other comprehensive loss in shareholder's equity on the Consolidated Balance Sheet, in accordance with the applicable provisions of SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS No. 158). As a result, our future pension costs and contributions could increase over historical levels.

Investing During 2008, we incurred \$124.6 million for capital expenditures, primarily in support of projects and facilities in our North America and EAME segments.

We continue to evaluate and selectively pursue opportunities for additional expansion of our business through acquisition of complementary businesses. These acquisitions, if they arise, may involve the use of cash or may require further debt or equity financing.

Financing During 2008, net cash flows used in financing activities totaled \$122.7 million, including stock repurchases totaling \$80.6 million. Uses of cash also included \$15.4 million for the payment of dividends and an installment payment on our term loan in the fourth quarter totaling \$40.0 million. Cash provided by financing activities included \$10.5 million from the issuance of shares for stock-based compensation and \$3.1 million of benefits associated with tax deductions in excess of recognized stock-based compensation cost.

Our primary internal source of liquidity is cash flow generated from operations. Capacity under a revolving credit facility is also available, if necessary, to fund operating or investing activities. We have a five-year \$1.1 billion, committed and unsecured revolving credit facility, which terminates in October 2011. As of December 31, 2008, no direct borrowings were outstanding under the revolving credit facility, but we had issued \$294.9 million of letters of credit under the five-year facility. Such letters of credit are generally issued to customers in the ordinary course of business to support advance payments, as performance guarantees, or in lieu of retention on our contracts. As of December 31, 2008, we had \$805.1 million of available capacity under this facility. The facility contains a borrowing sublimit of \$550.0 million and certain restrictive covenants, the most restrictive of which include a maximum leverage ratio, a minimum fixed charge coverage ratio and a minimum net worth level, among other restrictions. The facility also places restrictions on us with regard to subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, and mergers and acquisitions, among other restrictions.

In addition to the revolving credit facility, we have three committed and unsecured letter of credit and term loan agreements (the "LC Agreements") with Bank of America, N.A., as administrative agent, JPMorgan Chase Bank, National Association, and various private placement note investors. Under the terms of the LC Agreements, either banking institution can issue letters of credit (the "LC Issuers"). In the aggregate, the LC Agreements provide up to \$275.0 million of capacity. As of December 31, 2008, no direct borrowings were outstanding under the LC Agreements, but we had issued \$273.4 million of letters of credit among all three tranches of the LC Agreements. Tranche A, a \$50.0 million facility, and Tranche B, a \$100.0 million facility, are both five-year facilities which

Table of Contents

terminate in November 2011 and were fully utilized at December 31, 2008. Tranche C, an eight-year, \$125.0 million facility expiring in November 2014, had \$1.6 million of available capacity at December 31, 2008. The LC Agreements contain certain restrictive covenants, the most restrictive of which include a minimum net worth level, a minimum fixed charge coverage ratio and a maximum leverage ratio. The LC Agreements also include restrictions with regard to subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, affiliate transactions, sales and leasebacks, and mergers and acquisitions, among other restrictions. In the event of default under the LC Agreements, including our failure to reimburse a draw against an issued letter of credit, the LC Issuer could transfer its claim against us, to the extent such amount is due and payable by us under the LC Agreements, to the private placement lenders, creating a term loan that is due and payable no later than the stated maturity of the respective LC Agreement. In addition to quarterly letter of credit fees and, to the extent that a term loan is in effect, we would be assessed a floating rate of interest over LIBOR.

We also have various short-term, uncommitted revolving credit facilities across several geographic regions of approximately \$1.3 billion. These facilities are generally used to provide letters of credit or bank guarantees to customers in the ordinary course of business to support advance payments, as performance guarantees, or in lieu of retention on our contracts. At December 31, 2008, we had available capacity of \$575.2 million under these uncommitted facilities. In addition to providing letters of credit or bank guarantees, we also issue surety bonds in the ordinary course of business to support our contract performance.

In addition, we have a \$160.0 million unsecured term loan facility (the "Term Loan") with JPMorgan Chase Bank, National Association, as administrative agent, and Bank of America, N.A., as syndication agent. Interest under the Term Loan is based upon LIBOR plus an applicable floating spread, and paid quarterly in arrears. We also have an interest rate swap that provides for an interest rate of approximately 6.57%, inclusive of the applicable floating spread. The Term Loan will continue to be repaid in equal installments of \$40.0 million per year, with the last principal payment due in November 2012. The Term Loan contains similar restrictive covenants to the ones noted above for the revolving credit facility.

We could be impacted as a result of the current global financial and economic crisis if our customers delay or cancel projects, if our customers experience a material change in their ability to pay us, we are unable to meet our restrictive covenants, or the banks associated with our current, committed and unsecured revolving credit facility, committed and unsecured letter of credit and term loan agreements and uncommitted revolving credit facilities were to cease or reduce operations.

We were in compliance with all restrictive lending covenants as of December 31, 2008; however, our ability to remain in compliance could be impacted by circumstances or conditions beyond our control caused by the global financial and economic crisis, including but not limited to, changes in currency exchange or interest rates, performance of pension plan assets, or changes in actuarial assumptions.

For a further discussion of letters of credit and surety bonds, as well as the Term Loan, see Notes 8 and 11 to our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

As of December 31, 2008, the following commitments were in place to support our ordinary course obligations:

Commitments	Total	Amounts by Expiration Period			After 5 Years
		Less than 1 Year	1-3 Years	4-5 Years	
		(In thousands)			

Edgar Filing: CHICAGO BRIDGE & IRON CO N V - Form 10-K

Letters of credit/bank guarantees	\$ 1,328,401	\$ 626,342	\$ 659,046	\$ 40,163	\$ 2,850
Surety bonds	193,761	155,355	38,406		
Total commitments	\$ 1,522,162	\$ 781,697	\$ 697,452	\$ 40,163	\$ 2,850

Note: Letters of credit include \$32,949 of letters of credit issued in support of our insurance program.

Table of Contents

Contractual obligations at December 31, 2008 are summarized below:

Contractual Obligations	Total	Payments Due by Period			After 5 Years
		Less than 1 Year	1-3 Years (In thousands)	4-5 Years	
Term loan(1)	\$ 185,924	\$ 50,504	\$ 93,130	\$ 42,290	\$
Operating leases	292,803	48,333	61,772	54,512	128,186
Purchase obligations(2)					
Self-insurance obligations(3)	7,589	7,589			
Pension funding obligations(4)	16,210	16,210			
Postretirement benefit funding obligations(4)	3,500	3,500			
Unrecognized tax benefits(5)					
Total contractual obligations	\$ 506,026	\$ 126,136	\$ 154,902	\$ 96,802	\$ 128,186

- (1) Interest under our \$160.0 million term loan is calculated based upon LIBOR plus an applicable floating spread paid quarterly in arrears. However, as we entered into an interest rate swap that effectively fixes an interest rate of approximately 6.57%, our obligations noted above include interest accruing at this fixed rate.
- (2) In the ordinary course of business, we enter into purchase commitments to satisfy our requirements for materials and supplies for contracts that have been awarded. These purchase commitments, that are to be recovered from our customers, are generally settled in less than one year. We do not enter into long-term purchase commitments on a speculative basis for fixed or minimum quantities.
- (3) Amount represents expected 2009 payments associated with our self-insurance program. Payments beyond one year have not been included in the table as amounts are not determinable on a year-by-year basis.
- (4) Amounts represent expected 2009 contributions to fund our defined benefit and other postretirement plans, respectively. Contributions beyond one year have not been included as amounts are not determinable.
- (5) Payments for reserved tax contingencies are not included as the timing of specific tax payments is not determinable.

During the fourth quarter, the equity and credit markets experienced dramatic turmoil. A continuation of this level of volatility in the credit markets may increase costs associated with issuing letters of credit under our short-term, uncommitted credit facilities. Notwithstanding these adverse conditions, we believe that cash on hand, funds generated by operations, amounts available under existing, committed credit facilities and external sources of liquidity, such as the issuance of debt and equity instruments, will be sufficient to finance capital expenditures, the settlement of commitments and contingencies (as more fully described in Note 11 to our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data) and working capital needs for the foreseeable future. However, there can be no assurance that such funding will be available, as our ability to generate cash flows from operations and our ability to access funding under the revolving credit facility and LC agreements may be

impacted by a variety of business, economic, legislative, financial and other factors, which may be outside of our control. Additionally, while we currently have significant, uncommitted bonding facilities, primarily to support various commercial provisions in our engineering and construction and technology contracts, a termination or reduction of these bonding facilities could result in the utilization of letters of credit in lieu of performance bonds, thereby reducing our available capacity under the revolving credit facility. Although we do not anticipate a reduction or termination of the bonding facilities, there can be no assurance that such facilities will be available at reasonable terms to service our ordinary course obligations.

We are a defendant in a number of lawsuits arising in the normal course of business and we have in place appropriate insurance coverage for the type of work that we have performed. As a matter of standard policy, we review our litigation accrual quarterly and as further information is known on pending cases, increases or decreases, as appropriate, may be recorded in accordance with SFAS No. 5, Accounting for Contingencies (SFAS No. 5).

Table of Contents

For a discussion of current litigation, including lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed, see Note 11 to our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

OFF-BALANCE SHEET ARRANGEMENTS

We use operating leases for facilities and equipment when they make economic sense, including sale-leaseback arrangements. We have no other significant off-balance sheet arrangements.

NEW ACCOUNTING STANDARDS

For a discussion of new accounting standards, see the applicable section included within Note 2 to our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

CRITICAL ACCOUNTING ESTIMATES

The discussion and analysis of financial condition and results of operations are based upon our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data, which have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis, based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Our management has discussed the development and selection of our critical accounting estimates with the Audit Committee of our Supervisory Board of Directors. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our Consolidated Financial Statements:

Revenue Recognition Revenue is primarily recognized using the percentage-of-completion method. Our contracts are awarded on a competitive bid and negotiated basis. We offer our customers a range of contracting options, including fixed-price, cost reimbursable and hybrid approaches. Contract revenue is primarily recognized based on the percentage that actual costs-to-date bear to total estimated costs. We utilize this cost-to-cost approach as we believe this method is less subjective than relying on assessments of physical progress. We follow the guidance of SOP 81-1 for accounting policies relating to our use of the percentage-of-completion method, estimating costs, revenue recognition, including the recognition of profit incentives, combining and segmenting contracts and unapproved change order/claim recognition. Under the cost-to-cost approach, the most widely recognized method used for percentage-of-completion accounting, the use of estimated cost to complete each contract is a significant variable in the process of determining recognized revenue and is a significant factor in the accounting for contracts. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known, including the reversal of any profit recognized in prior periods. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates.

Contract revenue reflects the original contract price adjusted for approved change orders and estimated minimum recoveries of unapproved change orders and claims. We recognize revenue associated with unapproved change orders and claims to the extent that related costs have been incurred when recovery is probable and the value can be reliably estimated. At December 31, 2008 and 2007, we had projects with outstanding unapproved change orders/claims of approximately \$50.0 and \$96.3 million, respectively, factored into the determination of their revenue and estimated costs. If the final settlements are less than the recorded unapproved change orders and claims, our results of operations

could be negatively impacted.

Losses expected to be incurred on contracts in progress are charged to earnings in the period such losses become known. For projects in a significant loss position, we recognized losses of approximately \$453.0 million and \$117.6 million during 2008 and 2007, respectively. There were no significant losses recognized on projects during 2006.

Table of Contents

Credit Extension We extend credit to customers and other parties in the normal course of business only after a review of the potential customer's creditworthiness. Additionally, management reviews the commercial terms of all significant contracts before entering into a contractual arrangement. We regularly review outstanding receivables and provide for estimated losses through an allowance for doubtful accounts. In evaluating the level of established reserves, management makes judgments regarding the parties' ability to make required payments, economic events and other factors. As the financial condition of these parties changes, circumstances develop or additional information becomes available, adjustments to the allowance for doubtful accounts balance may be required.

Financial Instruments Although we do not engage in currency speculation, we periodically use forward contracts to mitigate certain operating exposures, as well as hedge intercompany loans utilized to finance non-U.S. subsidiaries. Hedge contracts utilized to mitigate operating exposures are generally designated as cash flow hedges under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS No. 133). Therefore, gains and losses, exclusive of forward points and credit risk, are included in accumulated other comprehensive income/loss on the Consolidated Balance Sheets until the associated offsetting underlying operating exposure impacts our earnings. Gains and losses associated with instruments deemed ineffective during the period, if any, and instruments for which we do not seek hedge accounting treatment, including those to hedge intercompany loans, are recognized within cost of revenue in the Consolidated Statements of Operations. Additionally, changes in the fair value of forward points are recognized within cost of revenue in the Consolidated Statements of Operations.

We have also entered a swap arrangement to hedge against interest rate variability associated with our \$160.0 million term loan. The swap arrangement is designated as a cash flow hedge under SFAS No. 133, as the critical terms matched those of the term loan at inception and as of December 31, 2008. We will continue to assess hedge effectiveness of the swap transaction prospectively. Our other financial instruments are not significant.

Income Taxes Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using tax rates in effect for the years in which the differences are expected to reverse. A valuation allowance is provided to offset any net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The final realization of the deferred tax asset depends on our ability to generate sufficient taxable income of the appropriate character in the future and in appropriate jurisdictions. We did not provide for an income tax benefit for net losses recognized in the U.K. during the third and fourth quarters of 2008. We have not provided a valuation allowance against our remaining U.K. net operating loss carryforward asset of approximately \$80.0 million as we believe that it is more likely than not that it will be utilized from future earnings and contracting strategies.

Under the guidance of FIN 48, we provide for income taxes in situations where we have and have not received tax assessments. Taxes are provided in those instances where we consider it probable that additional taxes will be due in excess of amounts reflected in income tax returns filed worldwide. As a matter of standard policy, we continually review our exposure to additional income taxes due and as further information is known, increases or decreases, as appropriate, may be recorded in accordance with FIN 48.

Estimated Reserves for Insurance Matters We maintain insurance coverage for various aspects of our business and operations. However, we retain a portion of anticipated losses through the use of deductibles and self-insured retentions for our exposures related to third-party liability and workers' compensation. Management regularly reviews estimates of reported and unreported claims through analysis of historical and projected trends, in conjunction with actuaries and other consultants, and provides for losses through insurance reserves. As claims develop and additional information becomes available, adjustments to loss reserves may be required. If actual results are not consistent with our assumptions, we may be exposed to gains or losses that could be material. A hypothetical ten percent change in our self-insurance reserves at December 31, 2008 would have impacted our pre-tax income by approximately

\$3.2 million for the year ended December 31, 2008.

Recoverability of Goodwill Effective January 1, 2002, we adopted SFAS No. 142, which states that goodwill and indefinite-lived intangible assets are no longer to be amortized but are to be reviewed annually for impairment. The goodwill impairment analysis required under SFAS No. 142 requires us to allocate goodwill to our reporting units, compare the fair value of each reporting unit with our carrying amount, including goodwill, and then, if necessary, record a goodwill impairment charge in an amount equal to the excess, if any, of the carrying

Table of Contents

amount of a reporting unit's goodwill over the implied fair value of that goodwill. The primary method we employ to estimate these fair values is the discounted cash flow method. This methodology is based, to a large extent, on assumptions about future events which may or may not occur as anticipated, and such deviations could have a significant impact on the estimated fair values calculated. These assumptions include, but are not limited to, estimates of future growth rates, discount rates and terminal values of reporting units. For further discussion regarding goodwill and other intangibles, see Note 5 to our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data. Our goodwill balance at December 31, 2008, was \$962.3 million, including \$738.8 million associated with the acquisition of Lummus during the fourth quarter of 2007.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

We are exposed to market risk associated with changes in foreign currency exchange rates, which may adversely affect our results of operations and financial condition. One exposure to fluctuating exchange rates relates to the effects of translating the financial statements of our non-U.S. subsidiaries, which are denominated in currencies other than the U.S. dollar, into the U.S. dollar. The foreign currency translation adjustments are recognized within shareholders' equity in accumulated other comprehensive income/loss as cumulative translation adjustment, net of any applicable tax. We generally do not hedge our exposure to potential foreign currency translation adjustments.

Another form of foreign currency exposure relates to our non-U.S. subsidiaries' normal contracting activities. We generally try to limit our exposure to foreign currency fluctuations in most of our contracts through provisions that require customer payments in U.S. dollars, the currency of the contracting entity, or other currencies corresponding to the currency in which costs are incurred. As a result, we generally do not need to hedge foreign currency cash flows for contract work performed. However, where construction contracts do not contain foreign currency provisions, we generally use forward exchange contracts to hedge foreign currency exposure of forecasted transactions and firm commitments. At December 31, 2008, the outstanding notional value of these cash flow hedge contracts was \$175.6 million. Our primary foreign currency exchange rate exposure hedged includes the Chilean Peso, Euro, Peruvian Nuevo Sol, British Pound, Norwegian Krone, Japanese Yen, Swiss Franc and Czech Republic Koruna. The gains and losses on these contracts are intended to offset changes in the value of the related exposures. The unrealized hedge fair value loss associated with instruments for which we do not seek hedge accounting treatment totaled \$3.2 million and was recognized within cost of revenue in the 2008 Consolidated Statement of Operations. Additionally, we exclude forward points, which represent the time value component of the fair value of our derivative positions, from our hedge assessment analysis. This time value component is recognized as ineffectiveness within cost of revenue in the consolidated statement of operations and was an unrealized loss totaling approximately \$0.5 million during 2008. As a result, our total unrealized hedge fair value loss recognized within cost of revenue for 2008 was \$3.7 million. The total net fair value of these contracts, including the foreign currency exchange loss related to ineffectiveness was \$10.7 million. The terms of our contracts extend up to two years. The potential change in fair value for these contracts from a hypothetical ten percent change in quoted foreign currency exchange rates would have been approximately \$1.1 million and \$2.0 million at December 31, 2008 and 2007, respectively.

During the fourth quarter of 2007 we entered into a swap arrangement to hedge against interest rate variability associated with our term loan. The swap arrangement is designated as a cash flow hedge under SFAS No. 133 as the critical terms matched those of the term loan at inception and as of December 31, 2008.

In circumstances where intercompany loans and/or borrowings are in place with non-U.S. subsidiaries, we will also use forward contracts which generally offset any translation gains/losses on the underlying transactions. If the timing or amount of foreign-denominated cash flows vary, we incur foreign exchange gains or losses, which are included within cost of revenue in the Consolidated Statements of Operations. We do not use financial instruments for trading or speculative purposes.

The carrying value of our cash and cash equivalents, accounts receivable, accounts payable and notes payable approximates their fair values because of the short-term nature of these instruments. At December 31, 2008 and 2007, the fair value of our long-term debt, based on the current market rates for debt with similar credit risk and maturity, approximated the value recorded on our Consolidated Balance Sheet as interest is based upon LIBOR plus an applicable floating spread and is paid quarterly in arrears. See Note 9 to our Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data for quantification of our financial instruments.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal controls over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. Included in our system of internal control are written policies, an organizational structure providing division of responsibilities, the selection and training of qualified personnel and a program of financial and operations reviews by our professional staff of corporate auditors.

Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the underlying transactions, including the acquisition and disposition of assets; (ii) provide reasonable assurance that our assets are safeguarded and transactions are executed in accordance with management's and our directors' authorization and are recorded as necessary to permit preparation of our financial statements in accordance with generally accepted accounting principles; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting. Our evaluation was based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on our evaluation under the framework in *Internal Control - Integrated Framework*, our principal executive officer and principal financial officer concluded our internal control over financial reporting was effective as of December 31, 2008. The conclusion of our principal executive officer and principal financial officer is based on the recognition that there are inherent limitations in all systems of internal control, including the possibility of human error and the circumvention or overriding of controls. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our internal control over financial reporting as of December 31, 2008 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which is included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Supervisory Board and Shareholders of
Chicago Bridge & Iron Company N.V.

We have audited Chicago Bridge & Iron Company N.V. and subsidiaries' internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Chicago Bridge & Iron Company N.V. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Chicago Bridge & Iron Company N.V. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Chicago Bridge & Iron Company N.V. and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedule for each of the three years in the period ended December 31, 2008 listed in the Index at Item 15. Our report dated February 24, 2009 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Supervisory Board and Shareholders of
Chicago Bridge & Iron Company N.V.

We have audited the accompanying consolidated balance sheets of Chicago Bridge & Iron Company N.V. and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of operations, shareholders equity, and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedule for each of the three years in the period ended December 31, 2008 listed in the Index at Item 15. These consolidated financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Chicago Bridge & Iron Company N.V. and subsidiaries at December 31, 2008 and 2007, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Chicago Bridge & Iron Company N.V. and subsidiaries' internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 24, 2009 expressed an unqualified opinion thereon.

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except share data)

1. ORGANIZATION AND NATURE OF OPERATIONS

Organization CB&I is an integrated EPC service provider and major process technology licensor. Founded in 1889, CB&I provides conceptual design, technology, engineering, procurement, fabrication, construction, commissioning and associated maintenance services to customers in the energy and natural resource industries.

Nature of Operations Projects for the worldwide natural gas, petroleum and petrochemical industries accounted for a majority of our revenue in 2008, 2007 and 2006. Numerous factors influence capital expenditure decisions in this industry, which are beyond our control. Therefore, no assurance can be given that our business, financial condition, results of operations or cash flows will not be adversely affected because of reduced activity due to current global economic conditions, the price of oil or changing taxes, price controls and laws and regulations related to the petroleum and petrochemical industry.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting and Consolidation These financial statements are prepared in accordance with U.S. GAAP. The Consolidated Financial Statements include all majority-owned subsidiaries. Investments in affiliates with ownership ranging from 20% to 50% are accounted for by the equity method whereas investments with ownership of less than 20% are accounted for at cost. Significant intercompany balances and transactions are eliminated in consolidation. Certain prior year balances have been reclassified to conform to our current year presentation. Specifically, project balances associated with previously acquired Lummus operations have been reclassified from accounts payable, accrued liabilities and other non-current liabilities to contracts in progress on our December 31, 2007 Consolidated Balance Sheet.

Use of Estimates The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, the disclosed amounts of contingent assets and liabilities, and the reported amounts of revenue and expenses. We believe the most significant estimates and judgments are associated with revenue recognition on engineering and construction and technology contracts, recoverability tests that must be periodically performed with respect to goodwill and intangible asset balances, valuation of accounts receivable, financial instruments and deferred tax assets, and the determination of liabilities related to self-insurance programs. If the underlying estimates and assumptions upon which the financial statements are based change in the future, actual amounts may differ from those included in the accompanying Consolidated Financial Statements.

Revenue Recognition Revenue is primarily recognized using the percentage-of-completion method. Our contracts are awarded on a competitive bid and negotiated basis. We offer our customers a range of contracting options, including fixed-price, cost reimbursable and hybrid approaches. Contract revenue is primarily recognized based on the percentage that actual costs-to-date bear to total estimated costs. We utilize this cost-to-cost approach as we believe this method is less subjective than relying on assessments of physical progress. We follow the guidance of SOP 81-1 for accounting policies relating to our use of the percentage-of-completion method, estimating costs, revenue recognition, including the recognition of profit incentives, combining and segmenting contracts and unapproved change order/claim recognition. Under the cost-to-cost approach, the most widely recognized method used for percentage-of-completion accounting, the use of estimated cost to complete each contract is a significant variable in the process of determining recognized revenue and is a significant factor in the accounting for contracts. The

cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known, including the reversal of any profit recognized in prior periods. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates.

Contract revenue reflects the original contract price adjusted for approved change orders and estimated minimum recoveries of unapproved change orders and claims. We recognize revenue associated with unapproved

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

change orders and claims to the extent that related costs have been incurred when recovery is probable and the value can be reliably estimated. At December 31, 2008 and 2007, we had projects with outstanding unapproved change orders/claims of approximately \$50,000 and \$96,336, respectively, factored into the determination of their revenue and estimated costs.

Losses expected to be incurred on contracts in progress are charged to earnings in the period such losses become known. For projects in a significant loss position, we recognized losses of approximately \$453,000 and \$117,566 during 2008 and 2007, respectively. There were no significant losses recognized on projects during 2006.

Costs and estimated earnings to date in excess of progress billings (Unbilled Revenue) on contracts represent the cumulative revenue recognized less the cumulative billings to the customer. Unbilled Revenue is reported as contracts in progress with costs and estimated earnings exceeding related progress billings on the Consolidated Balance Sheets. Any billed revenue that has not been collected is reported as accounts receivable. The timing of when we bill our customers is generally based upon advance billing terms or contingent upon completion of certain phases of the work, as stipulated in the contract. Progress billings in accounts receivable at December 31, 2008 and 2007 included contract retentions totaling \$32,900 and \$58,780, respectively, to be collected within one year. Contract retentions collectible beyond one year are included in non-current contract retentions on the Consolidated Balance Sheets and totaled \$1,973 (of which \$792 is expected to be collected in 2010) and \$3,389 at December 31, 2008 and 2007, respectively. Cost of revenue includes direct contract costs such as material and construction labor, and indirect costs which are attributable to contract activity.

Precontract Costs Precontract costs are generally charged to cost of revenue as incurred, but, in certain cases, may be deferred to the balance sheet if specific probability criteria are met. There were no significant precontract costs deferred as of December 31, 2008 or 2007.

Research and Development Expenditures for research and development activities, which are charged to expense as incurred within cost of revenue, amounted to \$20,126 in 2008, \$5,499 in 2007 and \$4,738 in 2006.

Depreciation and Amortization Property and equipment are recorded at cost and depreciated on a straight-line basis over their estimated useful lives: buildings and improvements, 10 to 40 years; plant and field equipment, 2 to 20 years. Renewals and betterments, which substantially extend the useful life of an asset, are capitalized and depreciated. Leasehold improvements are amortized over the lesser of the life of the asset or the applicable lease term. Depreciation expense was \$54,205 in 2008, \$35,768 in 2007 and \$26,454 in 2006.

Impairment of Long-Lived Assets Management reviews tangible assets and finite-lived intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If an evaluation is required, the estimated cash flows associated with the asset or asset group will be compared to the asset's carrying amount to determine if an impairment exists.

In accordance with SFAS No. 142, goodwill and indefinite-lived intangibles are no longer amortized but instead are tested for impairment annually or more frequently if indicators of impairment arise. We use a fair value approach to identify potential goodwill impairment, utilizing a discounted cash flow model. Goodwill impairment is tested at the reporting unit level which is determined in accordance with SFAS 142. Finite-lived identifiable intangible assets are amortized on a straight-line basis over estimated useful lives ranging from 2 to 20 years. See Note 5 for additional

discussion relative to goodwill impairment testing and intangible asset amortization.

Per Share Computations Basic earnings per share (EPS) is calculated by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the assumed conversion of dilutive securities, consisting of employee stock options, restricted shares, performance shares (where performance criteria have been met) and directors' deferred fee shares.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following schedule reconciles the net (loss) income and shares utilized in the basic and diluted EPS computations:

	Years Ended December 31,		
	2008	2007	2006
Net (loss) income	\$ (21,146)	\$ 165,640	\$ 116,968
Weighted average shares outstanding basic	95,401,943	95,666,251	96,811,342
Effect of stock options/restricted shares/performance shares(1)		1,079,510	1,615,633
Effect of directors' deferred fee shares(1)		63,204	82,353
Weighted average shares outstanding diluted	95,401,943	96,808,965	98,509,328
Net (loss) income per share			
Basic	\$ (0.22)	\$ 1.73	\$ 1.21
Diluted	\$ (0.22)	\$ 1.71	\$ 1.19

- (1) The effect of stock options and restricted, performance and directors' deferred fee shares were not included in the calculation of diluted EPS for 2008 as they were antidilutive due to the net loss for the year.

Cash Equivalents Cash equivalents are considered to be all highly liquid securities with original maturities of three months or less.

Concentrations of Credit Risk The majority of accounts receivable and contract work in progress are from clients in the natural gas, petroleum and petrochemical industries around the world. Most contracts require payments as projects progress or in certain cases, advance payments. We generally do not require collateral, but in most cases can place liens against the property, plant or equipment constructed or terminate the contract if a material default occurs. We maintain reserves for potential credit losses.

Foreign Currency The nature of our business activities involves the management of various financial and market risks, including those related to changes in currency exchange rates. The effects of translating financial statements of foreign operations into our reporting currency are recognized in accumulated other comprehensive (loss) income within shareholders' equity on the Consolidated Balance Sheets, as cumulative translation adjustment, net of tax, which includes tax credits associated with the translation adjustment, where applicable. Foreign currency exchange (losses) gains are included in the consolidated statements of operations within cost of revenue, and totaled (\$20,714) in 2008, \$4,885 in 2007 and (\$3,356) in 2006.

Financial Instruments Although we do not engage in currency speculation, we periodically use forward contracts to mitigate certain operating exposures, as well as hedge intercompany loans utilized to finance non-U.S. subsidiaries. Hedge contracts utilized to mitigate operating exposures are generally designated as cash flow hedges under

SFAS No. 133. Therefore, gains and losses, exclusive of forward points and credit risk, are included in accumulated other comprehensive (loss) income on the Consolidated Balance Sheets until the associated offsetting underlying operating exposure impacts our earnings. Gains and losses associated with instruments deemed ineffective during the period, if any, and instruments for which we do not seek hedge accounting treatment, including those to hedge intercompany loans, are recognized within cost of revenue in the Consolidated Statements of Operations. Additionally, changes in the fair value of forward points are recognized within cost of revenue in the Consolidated Statements of Operations. At December 31, 2008, we continued to hedge against interest rate variability associated with our \$160.0 million term loan through the use of a swap arrangement. The swap arrangement is designated as a cash flow hedge under SFAS No. 133, as the critical terms matched those of the term loan at inception and as of December 31, 2008. We will continue to assess hedge effectiveness of the swap transaction prospectively. Our other financial instruments are not significant.

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock Plans Effective January 1, 2006, we adopted SFAS No. 123(R) utilizing the modified prospective transition method. See Note 13 for additional discussion relative to our stock plans.

Income Taxes Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis using tax rates in effect for the years in which the differences are expected to reverse. A valuation allowance is provided to offset any net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The final realization of the deferred tax asset depends on our ability to generate sufficient taxable income of the appropriate character in the future and in appropriate jurisdictions.

On January 1, 2007, we adopted the provisions of FIN 48, which clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, and disclosure.

Under the guidance of FIN 48, we provide for income taxes in situations where we have and have not received tax assessments. Taxes are provided in those instances where we consider it probable that additional taxes will be due in excess of amounts reflected in income tax returns filed worldwide. As a matter of standard policy, we continually review our exposure to additional income taxes due and as further information is known, increases or decreases, as appropriate, may be recorded in accordance with FIN 48.

Our unrecognized income tax benefits as of December 31, 2008, totaled \$20,209. If these income tax benefits are ultimately recognized, \$16,062 would affect the effective tax rate. Below is a reconciliation of our unrecognized income tax benefits for 2008:

Unrecognized tax benefits at the beginning of the year	\$ 24,467
Increases as a result of:	
Tax positions taken during the current period	420
Decreases as a result of:	
Tax positions taken during the current period	(2,355)
Adjustments to tax positions taken on Lummus acquisition	(2,323)
Unrecognized income tax benefits at the end of the year	\$ 20,209

We are subject to taxation in the U.S. and various states and foreign jurisdictions. We have significant operations in the U.S., The Netherlands, Canada, the U.K., Pacific Rim and South America. Tax years remaining subject to examination by worldwide tax jurisdictions vary by country and legal entity, but are generally open for tax years ending after 2001, and in certain cases back to 1997.

To the extent penalties, if any, would be assessed on any underpayment of income tax, such amounts are accrued and classified as a component of income tax expense in our financial statements. Penalties and associated interest recognized within income tax and interest expense, respectively, on our consolidated statement of operations were not

significant. As of December 31, 2008, accrued balances for interest and penalties were not significant.

We do not anticipate significant changes in the balance of our unrecognized tax benefits in the next twelve months.

New Accounting Standards The FASB has issued SFAS No. 157, Fair Value Measurements (SFAS No. 157), which defines fair value, establishes a framework for measuring fair value and expands disclosure of fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements, and accordingly, does not require any new fair value measurements.

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

SFAS No. 157 became effective for financial statements issued for fiscal years beginning after November 15, 2007. The adoption of this standard in 2008 has not had a material impact on our consolidated financial position, results of operations or cash flows. However, in accordance with FSP No. FAS 157-2, Effective Date of FASB Statement No. 157, which allows for the deferral of the effective date for application of SFAS No. 157 to nonfinancial assets and liabilities, we only partially applied SFAS No. 157 during 2008. We have not applied the provisions of SFAS No. 157 to long-lived assets acquired as part of the Lummus acquisition nor reporting units measured at fair value for purposes of the first step in our annual goodwill impairment test. SFAS No. 157 is anticipated to be applied to these items beginning in the first quarter of 2009 in accordance with the FSP. For specific disclosures under this standard, see Note 9 to our Consolidated Financial Statements.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS 141(R)). SFAS 141(R) establishes principles and requirements for how the acquirer in a business combination recognizes and measures, in its financial statements, the identifiable assets acquired, the liabilities assumed, any controlling interest in the business and the goodwill acquired. SFAS 141(R) further requires that acquisition related costs and costs associated with restructuring or exiting activities of an acquired entity be expensed as incurred. Additionally, SFAS 141(R) establishes disclosure requirements associated with the nature and financial effects of the business combination. SFAS 141(R) is effective for fiscal years beginning on or after December 15, 2008, and the provisions of this standard will be applied to prospective acquisitions. Upon adoption, this standard will not have a material impact on our consolidated financial position and results of operations. However, if the Company enters into any business combinations after the adoption of SFAS No. 141(R), a transaction may significantly impact the Company's consolidated financial position and results of operations as compared to the Company's recent acquisitions, accounted for under existing U.S. GAAP requirements, due to the changes described above.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS 160 also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS 160 is effective for fiscal years beginning on or after December 15, 2008. We do not anticipate that the adoption of SFAS 160 will have a material impact on our consolidated financial position, results of operations, or cash flows.

In March 2008, the FASB issued Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities, (SFAS 161). SFAS 161 requires companies holding derivative instruments to disclose information that should allow financial statement readers to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133 and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. SFAS 161 is effective for fiscal years beginning after November 15, 2008. We do not anticipate that the adoption of SFAS 161 will have a material impact on our consolidated financial position, results of operations, or cash flows.

In April 2008, the FASB issued FASB Staff Position (FSP) No. FAS 142-3, Determination of the Useful Life of Intangible Assets (FSP FAS 142-3). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used for purposes of determining the useful life of a recognized intangible asset

under SFAS No. 142, Goodwill and Other Intangible Assets (SFAS No. 142). FSP FAS 142-3 is intended to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141(R) and other accounting principles generally accepted in the United States. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008, and the provisions of this standard will be applied to prospective acquisitions. The

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

implementation of this standard will not have a material impact on our consolidated financial position and results of operations.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (SFAS No. 162). SFAS No. 162 is intended to improve financial reporting by identifying a consistent framework, or hierarchy, for selecting accounting principles to be used in preparing financial statements of nongovernmental entities that are presented in conformity with U.S. GAAP. SFAS No. 162 will be effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board Auditing amendments to AU Section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*. We do not anticipate that the adoption of SFAS No. 162 will have a material impact on our Consolidated Financial Statements.

In June 2008, the FASB issued FSP No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and therefore need to be included in the earnings allocation for purposes of calculating earnings per share under the two-class method described in SFAS No. 138, *Earnings per Share*. FSP EITF 03-6-1 requires companies to treat unvested share-based payment awards that have non-forfeitable rights to dividends or dividend equivalents as a separate class of securities in calculating earnings per share. FSP EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008. We do not anticipate that the adoption of FSP EITF 03-6-1 will have a material impact on our earnings per share.

3. ACQUISITIONS

On November 16, 2007, we acquired all of the outstanding shares of Lummus from ABB for a purchase price of \$820,871, net of cash acquired and including transaction costs. Lummus's operations include on/near shore engineering, procurement, construction and technology operations. Lummus supplies a comprehensive range of services to the global oil, gas and petrochemical industries, including the design and supply of production facilities, refineries and petrochemical plants.

Purchase Price Allocation

The aggregate purchase price noted above has been allocated to the major categories of assets and liabilities acquired based upon their estimated fair values at the acquisition date, which are based, in part, upon outside appraisals for certain assets, including specifically-identified intangible assets. The excess of the purchase price over the estimated fair value of the net assets acquired totaling \$750,933 was recorded as goodwill.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table summarizes the final purchase price allocation of the Lummus net assets acquired at the date of acquisition:

Current assets	\$ 408,530
Property, plant and equipment	11,893
Goodwill (Note 5)	750,933
Other intangible assets (Note 5)	242,200
Other non-current assets	221,528
 Total assets acquired	 1,635,084
Current liabilities	571,619
Non-current liabilities	150,377
 Total liabilities assumed	 721,996
 Total net assets acquired	 \$ 913,088
 Total transaction costs	 9,731
Total cash acquired	(101,948)
 Net purchase price	 \$ 820,871

As part of our purchase price allocation for the Lummus acquisition, we accrued approximately \$17,000 of employee termination costs in conjunction with our effort to reduce the size of an acquired engineering operation. These termination costs are anticipated to be paid within the next twelve to eighteen months.

The change in our purchase price allocation since December 31, 2007 relates to reclassification of project balances from accounts payable, accrued liabilities and other non-current liabilities to contracts in progress to conform with our current year presentation, as well as the finalization of contingency adjustments associated with certain in-process projects.

Supplemental Pro Forma Data (Unaudited)

The following unaudited pro forma condensed combined financial statements gives effect to the acquisition of Lummus by CB&I, accounted for as a business combination using the purchase method of accounting as if the transaction had occurred at the beginning of 2006 and 2007, respectively. These unaudited pro forma combined financial statements are not intended to represent or be indicative of the results that actually would have been realized had CB&I and Lummus been a combined company during the specified periods.

Years Ended December 31,
2007 2006

Pro forma revenue	\$ 5,235,508	\$ 4,113,669
Pro forma net income	\$ 182,618	\$ 32,718
Pro forma net income per share:		
Basic	\$ 1.91	\$ 0.34
Diluted	\$ 1.89	\$ 0.33

4. CONTRACTS IN PROGRESS

Contract terms generally provide for progress billings on advance terms or based upon completion of certain phases of the work. The excess of costs and estimated earnings for construction contracts over progress billings on

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

contracts in progress is reported as a current asset and the excess of progress billings over costs and estimated earnings on contracts in progress is reported as a current liability as follows:

	December 31,	
	2008	2007
Contracts in Progress		
Revenue recognized on contracts in progress	\$ 15,328,773	\$ 13,079,445
Billings on contracts in progress	(15,990,835)	(13,844,832)
	\$ (662,062)	\$ (765,387)
Shown on balance sheet as:		
Contracts in progress with costs and estimated earnings exceeding related progress billings	\$ 307,656	\$ 357,933
Contracts in progress with progress billings exceeding related costs and estimated earnings	(969,718)	(1,123,320)
	\$ (662,062)	\$ (765,387)

5. GOODWILL AND OTHER INTANGIBLES***Goodwill***

General At December 31, 2008 and 2007, our goodwill balances were \$962,305 and \$942,344, respectively, attributable to the excess of the purchase price over the fair value of assets and liabilities acquired associated with our acquisition of Lummus, as well as previous acquisitions within our North America and EAME segments. The fair value associated with the Lummus acquisition was allocated to the Lummus EPC businesses included within our North America and EAME segments and the Lummus Technology segment based upon their relative estimated fair values.

The increase in goodwill during 2008 primarily relates to purchase price allocation adjustments associated with the acquisition of Lummus, as described in Note 3, partially offset by a reduction in accordance with SFAS No. 109, where U.S. tax goodwill exceeded book goodwill in our North America segment, and the impact of foreign currency translation.

The change in goodwill by segment for 2007 and 2008 is as follows:

	Lummus		
North America	EAME	Technology	Total

Balance at December 31, 2006	\$	201,150	\$	28,310	\$		\$	229,460
Acquisitions		46,251		229,794		438,805		714,850
Tax goodwill in excess of book goodwill		(1,961)						(1,961)
Foreign currency translation				(5)				(5)
Balance at December 31, 2007		245,440		258,099		438,805		942,344
Purchase price allocation adjustments				37,178		(1,095)		36,083
Tax goodwill in excess of book goodwill		(1,998)						(1,998)
Foreign currency translation				(14,124)				(14,124)
Balance at December 31, 2008	\$	243,442	\$	281,153	\$	437,710	\$	962,305

Impairment Testing SFAS No. 142 states that goodwill and indefinite-lived intangible assets are no longer amortized to earnings, but instead are reviewed for impairment at least annually via a two-phase process, absent any indicators of impairment. The first phase screens for impairment, while the second phase, if necessary, measures

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

impairment. We have elected to perform our annual analysis of goodwill during the fourth quarter of each year based upon balances as of the beginning of the fourth quarter. Impairment testing of goodwill is accomplished by comparing an estimate of discounted future cash flows to the net book value of each applicable reporting unit. Upon completion of our 2008 impairment test for goodwill, no impairment charge was necessary. There can be no assurance that future goodwill impairment tests will not result in charges to earnings.

Other Intangible Assets

The following table provides our other intangible asset balances as of December 31, 2008 and 2007, as well as weighted-average useful lives for each major intangible asset class and in total:

	December 31, 2008		December 31, 2007	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortized intangible assets (weighted average life)				
Technology (15 years)(1)	\$ 204,020	\$ (15,944)	\$ 206,376	\$ (2,417)
Tradenames (9 years)	38,877	(7,568)	38,817	(1,390)
Backlog (4 years)	14,717	(4,608)	14,800	(517)
Lease Agreements (5 years)	3,184	1,167	6,600	180
Non-compete agreements (7 years)	3,005	(481)	6,200	(2,855)
Total amortizable intangible assets (13 years)	\$ 263,803	\$ (27,434)	\$ 272,793	\$ (6,999)

- (1) The value of developed technology acquired as part of the Lummus acquisition was based upon the individual technologies' ability to generate earnings in excess of those associated with standard products. The valuation included an analysis of current and potential industry and competitive factors, including market share, barriers to entry, pricing, competitor and customer technologies, research and development budgets, patent protection and potential for product line extensions.

The change in other intangibles during 2008 relates to additional amortization expense, the impact of foreign currency translation and finalization of values of acquired Lummus-related intangibles. Intangible amortization for the years ended 2008, 2007 and 2006 was \$24,039, \$3,996, and \$1,572, respectively. For the years ended 2009, 2010, 2011, 2012 and 2013 amortization of existing intangibles is anticipated to be \$23,631, \$24,042, \$24,042, \$22,336, and \$16,059, respectively.

6. EQUITY INVESTMENTS

Our investments, which are accounted for by the equity method and are attributable to our purchase of Lummus, consist of the following:

	% Ownership	Years Ended December 31,	
		2008	2007
Chevron-Lummus Global LLC (CLG)	50.0%	\$ 82,096	\$ 77,693
Catalytic Distillation Technologies (CD Tech)	50.0%	41,586	38,836
Other various	Various	6,349	1,306
		\$ 130,031	\$ 117,835

Dividends received for the CLG and CD Tech investments during 2008 totaled approximately \$24,000 and \$7,500, respectively. Dividends received for the CLG investment during 2007 totaled approximately \$13,500.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Equity income, for the aforementioned investments, consists of:

	Years Ended December 31,	
	2008	2007
Chevron-Lummus Global LLC	\$ 29,521	\$ 4,292
Catalytic Distillation Technologies	11,000	814
Other various	571	
	\$ 41,092	\$ 5,106

CLG

This entity provides license/basic engineering services and catalyst supply for deep conversion (e.g., hydrocracking), residual hydroprocessing and lubes processing. The business primarily concentrates on converting/upgrading heavy/sour crude that is produced in the refinery process to more marketable products.

CD Tech

This entity provides license/basic engineering and catalyst supply for catalytic distillation applications, including gasoline desulphurization and alkylation processes.

Combined summarized income statement and balance sheet information for CLG and CD Tech is as follows:

	Years Ended December 31,	
	2008	2007(1)
Revenue	\$ 271,238	\$ 50,472
Gross profit	128,009	15,889
Income from operations	80,550	10,522
Net income	76,789	10,606

	Years Ended December 31,	
	2008	2007
Current assets	\$ 186,765	\$ 190,055
Non-current assets	31,901	25,887

Edgar Filing: CHICAGO BRIDGE & IRON CO N V - Form 10-K

Current liabilities	55,909	70,410
Non-current liabilities	11,115	7,679

- (1) Summarized income statement information for 2007 includes results from the acquisition date of November 16, 2007.

In accordance with Rule 3-09 of Regulation S-X, consolidated financial statements and accompanying notes of CLG, which constitutes a significant subsidiary, will be filed subsequently as an amendment to this Form 10-K.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****8. DEBT**

The following summarizes our outstanding debt at December 31:

	2008	2007
Current:		
Current maturity of long-term debt	\$ 40,000	\$ 40,000
Other(1)	523	930
Current debt	\$ 40,523	\$ 40,930
Long-Term:		
Term loan:		
\$160,000 term loan maturing November 2012. Principal due in annual installments of \$40,000. Interest at prime rate plus a margin or the British Bankers Association settlement rate plus a margin as described below(2)	120,000	160,000
Revolving credit facility:		
\$1,100,000 five-year revolver expiring October 2011. Interest at prime plus a margin or the British Bankers Association settlement rate plus a margin		
LC agreements:		
\$50,000 five-year, letter of credit and term loan facility expiring November 2011. Interest on term loans at 1.85% over the British Bankers Association settlement rate		
\$100,000 five-year, letter of credit and term loan facility expiring November 2011. Interest on term loans at 1.90% over the British Bankers Association settlement rate		
\$125,000 eight-year, letter of credit and term loan facility expiring November 2014. Interest on term loans at 2.00% over the British Bankers Association settlement rate		
Long-term debt	\$ 120,000	\$ 160,000

(1) Other current debt as of December 31, 2008 and 2007, consists of short-term borrowings under commercial credit facilities classified as notes payable on our Consolidated Balance Sheets.

(2) We have a \$160,000, unsecured Term Loan with JPMorgan Chase Bank, N.A., as administrative agent and Bank of America, N.A., as syndication agent. Interest under the Term Loan is based upon LIBOR plus an applicable floating spread, and paid quarterly in arrears. We also have an interest rate swap that provides for an interest rate of approximately 6.57%, inclusive of the applicable floating spread. The Term Loan will continue to be repaid in equal principal installments of \$40,000 per year, with the last principal payment due in November 2012. The Term Loan contains certain restrictive covenants, the most significant of which include a minimum net worth level, a minimum fixed charge coverage ratio and a maximum leverage ratio. The Term Loan also includes restrictions with regard to subsidiary indebtedness, sales of assets, liens, investments, type of business conducted,

affiliate transactions, sales and leasebacks, and mergers and acquisitions, among other restrictions.

As of December 31, 2008, no direct borrowings were outstanding under our committed and unsecured five-year \$1,100,000 revolving credit facility, which terminates in October 2011, but we had issued \$294,872 of letters of credit under the facility. Such letters of credit are generally issued to customers in the ordinary course of business to support advance payments, as performance guarantees, or in lieu of retention on our contracts. As of December 31, 2008, we had \$805,128 of available capacity under the facility for future operating or investing needs. The facility contains a borrowing sublimit of \$550,000 and similar restrictive covenants to those noted above for the term loan. In addition to interest on debt borrowings, we are assessed quarterly commitment fees on the unutilized portion of

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the credit facility as well as letter of credit fees on outstanding instruments. The interest, letter of credit fee and commitment fee percentages are based upon our quarterly leverage ratio.

In addition to the revolving credit facility, we have three committed and unsecured letter of credit and term loan agreements (the "LC Agreements") with Bank of America, N.A., as administrative agent, JPMorgan Chase Bank, N.A., and various private placement note investors. Under the terms of the LC Agreements, either banking institution can issue letters of credit (the "LC Issuers"). In the aggregate, the LC Agreements provide up to \$275,000 of capacity. As of December 31, 2008, no direct borrowings were outstanding under the LC Agreements, but we had issued \$273,371 of letters of credit among all three tranches of LC Agreements. Tranche A, a \$50,000 facility, and Tranche B, a \$100,000 facility, are both five-year facilities which terminate in November 2011 and were fully utilized at December 31, 2008. Tranche C, an eight-year, \$125,000 facility expiring in November 2014, had \$1,629 of available capacity at December 31, 2008. The LC Agreements contain certain restrictive covenants, the most significant of which include a minimum net worth level, a minimum fixed charge coverage ratio and a maximum leverage ratio. The LC Agreements also include restrictions with regard to subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, affiliate transactions, sales and leasebacks, and mergers and acquisitions, among other restrictions. In the event of default under the LC Agreements, including our failure to reimburse a draw against an issued letter of credit, the LC Issuer could transfer its claim against us, to the extent such amount is due and payable by us under the LC Agreements, to the private placement lenders, creating a term loan that is due and payable no later than the stated maturity of the respective LC Agreement. In addition to quarterly letter of credit fees and to the extent that a term loan is in effect, we would be assessed a floating rate of interest over LIBOR.

Additionally, we have various other short-term, uncommitted revolving credit facilities across several geographic regions of approximately \$1,335,362. These facilities are generally used to provide letters of credit or bank guarantees to customers in the ordinary course of business to support advance payments, as performance guarantees or in lieu of retention on our contracts. At December 31, 2008, we had available capacity of \$575,205 under these uncommitted facilities. In addition to providing letters of credit or bank guarantees, we also issue surety bonds in the ordinary course of business to support our contract performance.

We were in compliance with all restrictive lending covenants as of December 31, 2008.

Capitalized interest was insignificant in 2008, 2007 and 2006.

9. FINANCIAL INSTRUMENTS

Forward Contracts Although we do not engage in currency speculation, we periodically use forward contracts to mitigate certain operating exposures, as well as to hedge intercompany loans utilized to finance non-U.S. subsidiaries.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of December 31, 2008, our outstanding contracts to hedge intercompany loans and certain operating exposures are summarized as follows:

Currency Sold	Currency Purchased	Contract Amount(1)	Weighted Average Contract Rate
Forward contracts to hedge intercompany loans:(2)			
U.S. Dollar	Euro	\$ 118,884	0.77
U.S. Dollar	Australian Dollar	\$ 86,665	1.52
U.S. Dollar	British Pound	\$ 74,945	0.67
U.S. Dollar	Canadian Dollar	\$ 63,510	1.22
U.S. Dollar	Singapore Dollar	\$ 6,554	1.53
U.S. Dollar	Czech Republic Koruna	\$ 5,047	19.49
U.S. Dollar	South African Rand	\$ 2,182	10.23
Forward contracts to hedge certain operating exposures:(3)			
U.S. Dollar	Chilean Peso	\$ 87,209	540.44
U.S. Dollar	Euro	\$ 58,535	0.74
U.S. Dollar	Peruvian Nuevo Sol	\$ 9,473	2.73
U.S. Dollar	British Pound	\$ 8,105	0.67
U.S. Dollar	Norwegian Krone	\$ 90	7.03
British Pound	Euro	£ 3,006	1.24
British Pound	Japanese Yen	£ 2,492	187.53
British Pound	Swiss Francs	£ 1,740	2.32
British Pound	Norwegian Krone	£ 319	10.56
Euro	Czech Republic Koruna	803	23.09

- (1) Represents the notional U.S. dollar equivalent at inception of the contract, with the exception of forward contracts to sell: 3,006 British Pounds for 3,725 Euros, 2,492 British Pounds for 467,321 Japanese Yen, 1,740 British Pounds for 4,030 Swiss Francs, 319 British Pounds for 3,368 Norwegian Krone and 803 Euros for 18,533 Czech Republic Koruna. These contracts are denominated in British Pounds and Euros and their notional value equates to approximately \$12,150 at December 31, 2008.
- (2) These contracts, for which we do not seek hedge accounting treatment under SFAS No. 133, generally mature within seven days of year-end and are marked-to-market within cost of revenue in the Consolidated Statement of Operations, generally offsetting any translation gains/losses on the underlying transactions. At December 31, 2008, the total fair value loss from these contracts was \$14,184 and of the total mark-to-market, \$17,894 was recorded in other current assets and \$3,710 was recorded in accrued liabilities on the Consolidated Balance Sheet.
- (3) Represent primarily forward contracts that hedge forecasted transactions and firm commitments and generally mature within two years of year-end. Certain of our hedges are designated as cash flow hedges under SFAS No. 133. We exclude forward points, which represent the time value component of the fair value of our

derivative positions, from our hedge assessment analysis. This time value component is recognized as ineffectiveness within cost of revenue in the Consolidated Statement of Operations and was an unrealized loss totaling approximately \$530 during 2008. The unrealized hedge fair value loss associated with instruments for which we do not seek hedge accounting treatment totaled \$3,150 and was recognized within cost of revenue in the Consolidated Statement of Operations. Our total unrealized hedge fair value loss recognized within cost of revenue for the year ended December 31, 2008 was \$3,680. At December 31, 2008, the total fair value loss from our outstanding forward contracts was \$10,737, including the total foreign currency exchange loss related to ineffectiveness. Of the total mark-to-market, \$6,188 was recorded in other current assets, \$14,917 was

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

recorded in accrued liabilities and \$2,008 was recorded in other non-current liabilities on the Consolidated Balance Sheet.

Interest Rate Swap We have entered a swap arrangement to hedge against interest rate variability associated with our \$160,000 term loan. The swap arrangement is designated as a cash flow hedge under SFAS No. 133, as the critical terms matched those of the term loan at inception and as of December 31, 2008. We will continue to assess hedge effectiveness of the swap transaction prospectively. At December 31, 2008, the total fair value of our interest rate swap was \$6,661 and was recorded in other non-current liabilities on the Consolidated Balance Sheet.

SFAS 157

As discussed in Note 2 to the Consolidated Financial Statements, we adopted SFAS 157 during 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about assets and liabilities measured at fair value. The standard provides a consistent definition of fair value which focuses on exit price and prioritizes, within a measurement of fair value, the use of market-based inputs over entity-specific inputs. The standard also establishes a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date.

Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. Market practice assumes all counterparties have the same credit rating, however, credit valuation adjustments are necessary when the market price is not reflective of the credit quality of the counterparty. In addition, valuation adjustments are necessary to reflect our credit quality in the valuation of our liabilities. We reviewed our derivative valuations using all available evidence, including recent transactions in the marketplace and indicative pricing services. The adoption of SFAS 157 has not had a material impact on our Consolidated Balance Sheet, Statement of Operations or Statement of Cash Flows as of December 31, 2008.

Valuation Hierarchy The three levels of the valuation hierarchy under SFAS 157 are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following is a description of the valuation methodologies used for our instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy:

Derivatives Exchange-traded derivatives that are valued using quoted prices are classified within level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange; thus, our derivative positions are classified within level 2 of the valuation hierarchy, as they are valued using internally-developed models that use, as their basis, readily observable market parameters. Our derivatives include basic interest rate swaps and forward contracts. In some cases, derivatives may be valued based upon models with significant unobservable market parameters. These would be classified within level 3 of the valuation hierarchy. As of December 31, 2008, we did not have any level 3 classifications.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents our financial instruments carried at fair value as of December 31, 2008, by caption on the Consolidated Balance Sheet and by SFAS 157 valuation hierarchy (as described above):

	Quoted Market Prices in Active Markets (Level 1)	Internal Models with Significant Observable Market Parameters (Level 2)(1)	Internal Models with Significant Unobservable Market Parameters (Level 3)	Total Carrying Value in the Consolidated Balance Sheet
Assets				
Other current assets	\$	\$ 24,082	\$	\$ 24,082
Other non-current assets				
Total assets at fair value	\$	\$ 24,082	\$	\$ 24,082
Liabilities				
Accrued liabilities	\$	\$ (18,627)	\$	\$ (18,627)
Other non-current liabilities		(8,669)		(8,669)
Total liabilities at fair value	\$	\$ (27,296)	\$	\$ (27,296)

- (1) These fair values are inclusive of outstanding forward contracts to hedge intercompany loans and certain operating exposures, as well as the swap arrangement entered to hedge against interest rate variability associated with our \$160,000 term loan. The total assets at fair value above represent the maximum loss that we would incur if the applicable counterparties failed to perform according to the hedge contracts.

Fair Value The carrying value of our cash and cash equivalents, accounts receivable, accounts payable and notes payable approximates their fair values because of the short-term nature of these instruments. At December 31, 2008 and 2007, the fair value of our long-term debt, based on current market rates for debt with similar credit risk and maturities, approximated the value recorded on our Consolidated Balance Sheets as interest is based upon LIBOR plus an applicable floating spread and is paid quarterly in arrears.

10. RETIREMENT BENEFITS

Defined Contribution Plans We sponsor multiple contributory defined contribution plans for eligible employees with various features including voluntary pre-tax salary deferral features, matching contributions, and savings plan contributions in the form of cash or our common stock to be determined annually. For the years ended December 31, 2008, 2007 and 2006, we expensed \$49,167, \$25,255 and \$17,573, respectively, for these plans.

In addition, we sponsor several other defined contribution plans that cover salaried and hourly employees for which we do not provide contributions. The cost of these plans was not significant to us in 2008, 2007 or 2006.

Defined Benefit and Other Postretirement Plans We currently sponsor various defined benefit pension plans covering certain employees in our North America, EAME and Lummus Technology segments. In connection with our acquisition of Lummus in 2007, we assumed certain pension obligations.

We also provide certain health care and life insurance benefits for our retired employees through three health care and life insurance benefit programs. In connection with the Lummus acquisition, we assumed certain postretirement benefit obligations related to their employees. Retiree health care benefits are provided under an established formula, which limits costs based on prior years of service of retired employees. These plans may be changed or terminated by us at any time.

We use a December 31 measurement date for all of our plans. During 2009, we expect to contribute \$16,210 and \$3,500 to our defined benefit and other postretirement plans, respectively.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables provide combined information for our defined benefit and other postretirement plans:

	Defined Benefit Plans			Other Postretirement Plans

(1) The acquisition line item above reflects amounts associated with our 2007 acquisition of Lummus.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The accumulated benefit obligation for all defined benefit plans was \$444,402 and \$506,655 at December 31, 2008 and 2007, respectively.

The following table reflects information for defined benefit plans with an accumulated benefit obligation in excess of plan assets:

	December 31,	
	2008	2007
Projected benefit obligation	\$ 153,349	\$ 67,051
Accumulated benefit obligation	\$ 147,208	\$ 63,971
Fair value of plan assets	\$ 80,241	\$ 7,223

	Defined Benefit Plans		Other Postretirement Plans	
	2008	2007	2008	2007
Weighted-Average Assumptions				
<i>Weighted-average assumptions used to determine benefit obligations at December 31,</i>				
Discount rate	5.89%	5.51%	6.53%	6.08%
Rate of compensation increase(1)	3.09%	4.03%	n/a	n/a
<i>Weighted-average assumptions used to determine net periodic benefit cost for the years ended December 31,</i>				
Discount rate	5.51%	5.35%	6.33%	5.83%
Expected long-term return on plan assets(2)	5.86%	6.67%	n/a	n/a
Rate of compensation increase(1)	3.09%	4.03%	n/a	n/a

(1) The rate of compensation increase in the table relates solely to the defined benefit plans that factor compensation increases into the valuation. The rate of compensation increase for our other plans is not applicable as benefits under certain plans are based upon years of service, while the remaining plans primarily cover retirees, whereby future compensation is not a factor.

(2) The expected long-term rate of return on the defined benefit plan assets was derived using historical returns by asset category and expectations for future capital market performance.

The following table includes the plans' expected benefit payments for the next 10 years (with respect to the other postretirement plans, the amounts shown below represent the Company's expected payments for these plans for the

referenced years as these plans are unfunded):

Year	Defined Benefit Plans	Other Postretirement Plans
2009	\$ 20,658	\$ 3,500
2010	\$ 22,325	\$ 3,834
2011	\$ 24,805	\$ 4,014
2012	\$ 25,315	\$ 4,199
2013	\$ 26,627	\$ 4,346
2014-2018	\$ 144,005	\$ 24,172

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The defined benefit plans' assets consist primarily of short-term fixed-income funds and long-term investments, including equity and fixed-income securities. The following table provides weighted-average asset allocations at December 31, 2008 and 2007, by asset category:

Asset Category	Target Allocations		Plan Assets at December 31,	
	2008	2007	2008	2007
Equity securities	25-40%	30-40%	29%	36%
Debt securities	55-70%	50-65%	68%	59%
Real estate	0-5%	0-5%	0%	0%
Other	0-15%	0-15%	3%	5%
Total	100%	100%	100%	100%

Our investment strategy for defined benefit plan assets is to maintain a diverse portfolio to maximize a return over the long-term, subject to an appropriate level of risk. Our defined benefit plans' assets are managed by external investment managers with oversight by our internal investment committee.

The recent turmoil in the worldwide financial markets caused a significant decrease in the value of assets held by our pension plans as of December 31, 2008. Lower than anticipated rates of return on certain plan investments, partly offset by the impact of higher discount rates, has resulted in the recording of net deferred losses within accumulated other comprehensive loss in shareholder's equity on the Consolidated Balance Sheet, in accordance with the applicable provisions of SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS No. 158). As a result, future pension costs and contributions could increase over historical levels.

We maintain multiple medical plans for retirees. One of our plans in the U.S. offers a defined dollar benefit; therefore, a one percentage point increase or decrease in the assumed rate of medical inflation would not affect the accumulated postretirement benefit obligation, service cost or interest cost. Under another plan in the U.S., health care cost trend rates are projected at annual rates ranging from 10.5% in 2009 down to 5% in 2015. Under our program in the U.K., the assumed rate of health care cost inflation is a level 7.75% per annum. Increasing/(decreasing) the assumed health care cost trends by one percentage point for our programs is estimated to increase/(decrease) the total of the service and interest cost components of net postretirement health care cost for the year ended December 31, 2008 and the accumulated postretirement benefit obligation at December 31, 2008 as follows:

	1-Percentage-Point Increase	1-Percentage-Point Decrease
Effect on total of service and interest cost	\$ 66	\$ (60)

Effect on postretirement benefit obligation	\$	968	\$	(915)
---	----	-----	----	-------

Multi-employer Pension Plans We made contributions to certain union sponsored multi-employer pension plans of \$15,586, \$11,985, and \$7,264 in 2008, 2007 and 2006, respectively. Benefits under these defined benefit plans are generally based on years of service and compensation levels. Under U.S. legislation regarding such pension plans, a company is required to continue funding its proportionate share of a plan's unfunded vested benefits in the event of withdrawal (as defined by the legislation) from a plan or plan termination. We participate in a number of these pension plans, and the potential obligation as a participant in these plans may be significant. The information required to determine the total amount of this contingent obligation, as well as the total amount of accumulated benefits and net assets of such plans, is not readily available.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****11. COMMITMENTS AND CONTINGENCIES**

Leases Certain facilities and equipment, including project-related field equipment, are rented under operating leases that expire at various dates through 2022. Rent expense on operating leases totaled \$69,233, \$45,994, and \$25,687 in 2008, 2007 and 2006, respectively.

Future minimum payments under non-cancelable operating leases having initial terms of one year or more are as follows:

	Amount
2009	\$ 48,333
2010	32,141
2011	29,631
2012	27,712
2013	26,800
Thereafter	128,186
Total	\$ 292,803

In the normal course of business, we enter into lease agreements with cancellation provisions as well as agreements with initial terms of less than one year. The costs related to these leases have been reflected in rent expense but have been appropriately excluded from the future minimum payments presented above.

Legal Proceedings We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects, technology licenses and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites. Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment or technologies, design or other engineering services or project construction services provided by our subsidiaries. Management does not currently believe that pending contractual, employment-related personal injury or property damage claims will have a material adverse effect on our earnings or liquidity.

Antitrust Proceedings In October 2001, the U.S. Federal Trade Commission (the "FTC" or the "Commission") filed an administrative complaint (the "Complaint") challenging our February 2001 acquisition of certain assets of the Engineered Construction Division of Pitt-Des Moines, Inc. ("PDM") that we acquired together with certain assets of the Water Division of PDM (the Engineered Construction and Water Divisions of PDM are hereafter sometimes referred to as the "PDM Divisions"). The Complaint alleged that the acquisition violated Federal antitrust laws by threatening to substantially lessen competition in four specific business lines in the U.S.: liquefied nitrogen, liquefied oxygen and liquefied argon (LIN/LOX/LAR) storage tanks; liquefied petroleum gas (LPG) storage tanks; liquefied natural gas (LNG) storage tanks and associated facilities; and field erected thermal vacuum chambers (used for the testing of

satellites) (the Relevant Products).

In June 2003, an FTC Administrative Law Judge ruled that our acquisition of PDM assets threatened to substantially lessen competition in the four business lines identified above and ordered us to divest within 180 days of a final order all physical assets, intellectual property and any uncompleted construction contracts of the PDM Divisions that we acquired from PDM to a purchaser approved by the FTC that is able to utilize those assets as a viable competitor. Subsequent to June 2003, we continued to pursue various legal remedies.

On September 15, 2008, we filed a divestiture application with the FTC intended to resolve the matter. The proposed divestiture included a license to use our cryogenic tank technology and the sale of certain construction equipment to Matrix Service Co. (Matrix). It also contemplated the subcontract of approximately \$20,000 of cryogenic and LNG tank work in the U.S. to Matrix over the next several years. In addition, it provided for the

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

transfer of approximately 70 engineering and construction personnel to Matrix, along with the procedures necessary to enhance its competitiveness in the product lines as specified in the Order and Opinion. On November 28, 2008 the FTC approved our divestiture application. On December 20, 2008 we completed the agreement and closed the transaction. The transaction did not have a material effect on our financial statements.

Asbestos Litigation We are a defendant in lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed at various locations. We have never been a manufacturer, distributor or supplier of asbestos products. Through December 31, 2008, we have been named a defendant in lawsuits alleging exposure to asbestos involving approximately 4,700 plaintiffs, and of those claims, approximately 1,400 claims were pending and 3,300 have been closed through dismissals or settlements. Through December 31, 2008, the claims alleging exposure to asbestos that have been resolved have been dismissed or settled for an average settlement amount per claim of approximately one thousand dollars. With respect to unasserted asbestos claims, we cannot identify a population of potential claimants with sufficient certainty to determine the probability of a loss and to make a reasonable estimate of liability, if any. We review each case on its own merits and make accruals based on the probability of loss and our ability to estimate the amount of liability and related expenses, if any. We do not currently believe that any unresolved asserted claims will have a material adverse effect on our future results of operations, financial position or cash flow and at December 31, 2008 we had accrued \$2,395 for liability and related expenses. While we continue to pursue recovery for recognized and unrecognized contingent losses through insurance, indemnification arrangements or other sources, we are unable to quantify the amount, if any, that may be expected to be recoverable because of the variability in the coverage amounts, deductibles, limitations and viability of carriers with respect to our insurance policies for the years in question.

Environmental Matters Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as laws of other nations, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties to whom we have purchased or sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred.

We believe that we are currently in compliance, in all material respects, with all environmental laws and regulations. We do not anticipate that we will incur material capital expenditures for environmental controls or for investigation or remediation of environmental conditions during 2009 or 2010.

Letters of Credit/Bank Guarantees/Surety Bonds

Ordinary Course Commitments In the ordinary course of business, we may obtain surety bonds and letters of credit, which we provide to our customers to secure advance payment, our performance under the contracts, or in lieu of retention being withheld on our contracts. In the event of our non-performance under a contract and an advance being made by a bank pursuant to a draw on a letter of credit, the advance would become a borrowing under a credit facility and thus our direct obligation. Where a surety incurs such a loss, an indemnity agreement between the parties and us

may require payment from our excess cash or a borrowing under our revolving credit facilities. When a contract is completed, the contingent obligation terminates and the bonds or letters of credit are returned. At December 31, 2008, we had provided \$1,489,213 of surety bonds and letters of credit to support our contracting activities in the ordinary course of business. This amount fluctuates based on the mix and level of contracting activity.

Insurance We have elected to retain portions of anticipated losses, if any, through the use of deductibles and self-insured retentions for our exposures related to third-party liability and workers' compensation. Liabilities in

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

excess of these amounts are the responsibilities of an insurance carrier. To the extent we are self-insured for these exposures, reserves (Note 7) have been provided based on management's best estimates with input from our legal and insurance advisors. Changes in assumptions, as well as changes in actual experience, could cause these estimates to change in the near term. Our management believes that the reasonably possible losses, if any, for these matters, to the extent not otherwise disclosed and net of recorded reserves, will not be material to our financial position or results of operations. At December 31, 2008, we had outstanding surety bonds and letters of credit of \$32,949 relating to our insurance program.

Income Taxes Under the guidance of FIN 48, we provide for income taxes in situations where we have and have not received tax assessments. Taxes are provided in those instances where we consider it probable that additional taxes will be due in excess of amounts reflected in income tax returns filed worldwide. As a matter of standard policy, we continually review our exposure to additional income taxes due and as further information is known, increases or decreases, as appropriate, may be recorded in accordance with FIN 48.

12. SHAREHOLDERS' EQUITY

Stock Held in Trust From time to time, we grant restricted shares to key employees under our Long-Term Incentive Plan (see Note 13). The restricted shares are transferred to a rabbi trust (the "Trust") and held until the vesting restrictions lapse, at which time the shares are released from the Trust and distributed to the employees.

Treasury Stock Under Dutch law and our Articles of Association, we may hold no more than 10% of our issued share capital at any time.

Accumulated Other Comprehensive (Loss) Income The components of accumulated other comprehensive (loss) income are as follows:

	Currency	Unrealized Loss on Debt	Minimum Pension Liability Adjustment	Unrealized Fair Value of Cash Flow Hedges(2)	Unrecognized Net Prior Service Pension Credits(3)	Unrecognized Net Actuarial Pension Losses(3)	Accumulated Other Comprehensive Income (Loss)
Balance at January 1, 2006	\$ (14,772)	\$ (75)	\$ (1,710)	\$ (2,029)	\$	\$	\$ (18,586)
Change in 2006 [net of tax of (\$3,337), (\$26), (\$719), (\$998), (\$410) and \$1,677]	6,375	59	1,710	2,329	1,196	(4,900)	6,769
	(8,397)	(16)		300	1,196	(4,900)	(11,817)

Balance at December 31, 2006							
Change in 2007 [net of tax of (\$3,626), (\$6), \$0, (\$2,200), (\$63) and (\$996)]	10,593	16		18,469	(321)	2,912	31,669
Balance at December 31, 2007	2,196			18,769	875	(1,988)	19,852
Change in 2008 [net of tax of \$14,452, \$6,488, \$79, and \$1,305]	(44,899)			(29,432)	(150)	(11,625)	(86,106)
Balance at December 31, 2008	\$ (42,703)	\$	\$	\$ (10,663)	\$ 725	\$ (13,613)	\$ (66,254)

(1) No longer applicable under SFAS No. 158.

(2) Represents the fair value of cash flow hedges, which are utilized to mitigate foreign currency exposures on operating cash flows. The total unrealized fair value loss on these cash flow hedges recorded in accumulated other comprehensive loss under the provisions of SFAS No. 133 as of December 31, 2008, totaled \$10,663, net

Table of Contents

CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

of tax of \$4,160. Of this amount, \$5,978 of unrealized loss, net of tax of \$1,182, is expected to be reclassified into earnings during the next 12 months due to settlement of the related contracts. Offsetting the unrealized loss on cash flow hedges is an unrealized gain on the underlying transactions, to be recognized when settled. See Note 9 for additional discussion relative to our financial instruments.

- (3) During the fiscal year ending December 31, 2009, we expect to recognize (\$245) and \$227 of previously unrecognized net prior service pension credits and net actuarial pension losses, respectively.

13. STOCK PLANS

Total stock-based compensation expense, inclusive of our employee stock purchase plan (ESPP) and our Long-Term Incentive Plan (the Incentive Plan), of \$18,675, \$16,914 and \$16,271, was recognized in 2008, 2007 and 2006, respectively, as selling and administrative expense in the accompanying Consolidated Statements of Operations. The total recognized tax benefit related to our share-based compensation expense for all of our stock plans was \$5,145, \$4,899 and \$4,508 in 2008, 2007 and 2006, respectively.

During 2001, the shareholders adopted an employee stock purchase plan under which sale of 2,000,000 shares of our common stock was authorized. Employees may purchase shares at a 15% discount on a quarterly basis through regular payroll deductions of up to 8% of their compensation. The shares are purchased at 85% of the closing price per share on the first trading day following the end of the calendar quarter. Compensation expense of \$1,898, \$1,181 and \$990 was recognized in 2008, 2007 and 2006, respectively, as selling and administrative expense in the accompanying consolidated statement of operations for the difference between the fair value on the date of purchase and the price paid. As of December 31, 2008, 163,320 shares remained available for purchase.

Under the Incentive Plan, we can issue shares in the form of stock options, restricted shares or performance shares. This plan is administered by the Organization and Compensation Committee of our Board of Supervisory Directors, which selects persons eligible to receive awards and determines the number of shares and/or options subject to each award, the terms, conditions, performance measures, and other provisions of the award. Of the 19,727,020 shares authorized for grant under the Incentive Plan, 3,964,522 shares remain available for future stock option, restricted share or performance share grants to employees and directors at December 31, 2008. As of December 31, 2008, there was \$21,045 of unrecognized compensation cost related to share-based payments, which is expected to be recognized over a weighted-average period of 1.7 years.

We receive a tax deduction for certain stock option exercises during the period the options are exercised, generally for the excess of the price at which the options are sold over the exercise prices of the options. In addition, we receive a tax deduction upon the vesting of restricted stock and performance shares for the price of the award at the date of vesting. In accordance with SFAS No. 123(R), our consolidated statement of cash flows presents the benefits of tax deductions for share-based compensation in excess of recognized compensation cost as financing cash flows. During 2008, \$3,113 of excess tax benefits was reported as a financing cash flow.

Stock Options Stock options are generally granted at the market value on the date of grant and expire after 10 years. Options granted to executive officers and other key employees typically vest over a two- to seven-year period, while options granted to Supervisory Directors vest over a one-year period. The share-based expense for these awards was determined based on the calculated Black-Scholes fair value of the stock option at the date of grant applied to the total

number of options that were anticipated to fully vest. The weighted-average per share fair value of options granted during 2008, 2007 and 2006 was \$14.19, \$13.68 and \$11.44, respectively. The aggregate intrinsic value of options exercised during 2008, 2007 and 2006 was \$1,663, \$22,735 and \$27,074, respectively. From the

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

exercise of stock options in 2008, we received net cash proceeds of \$382 and realized an actual income tax benefit of \$238. The following table represents stock option activity for 2008:

	Number of Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life (in Years)	Aggregate Intrinsic Value
Outstanding options at beginning of year	1,194,536	\$ 11.19		
Granted	289,370	\$ 32.45		
Forfeited	8,982	\$ 23.72		
Exercised	80,386	\$ 4.56		
Outstanding options at end of period(1)	1,394,538	\$ 15.90	5.2	\$ 2,859
Exercisable options at end of period	763,743	\$ 7.41	3.1	\$ 2,551

(1) Of the outstanding options at the end of the period, we currently estimate that 1,342,201 shares will ultimately vest. These shares have a weighted-average per share exercise price of \$15.56, a weighted-average remaining contractual life of 5.1 years and an aggregate intrinsic value of \$2,831.

Using the Black-Scholes option-pricing model, the fair value of each option grant was estimated on the date of grant based on the following weighted-average assumptions:

	2008	2007	2006
Risk-free interest rate	2.85%	4.59%	4.72%
Expected dividend yield	0.38%	0.53%	0.48%
Expected volatility	47.46%	41.67%	42.69%
Expected life in years	6	6	6

The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant. Expected volatility is based on the historical volatility of our stock. We also use historical information to estimate option exercises and employee termination within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding.

Restricted Shares Our Incentive Plan also allows for the issuance of restricted stock awards that may not be sold or otherwise transferred until certain restrictions have lapsed. The unearned stock-based compensation related to these awards is amortized to compensation expense over the period the restrictions lapse. Restricted shares granted to employees generally vest over four years with graded vesting and are recognized as compensation cost on a straight-line basis over the vesting period. Restricted shares granted to directors vest over one year. The share-based compensation expense for our restricted share awards was determined based on the market price of our stock at the date of grant applied to the total number of shares that were anticipated to fully vest.

During 2008, 499,695 restricted shares (including 35,200 directors' shares subject to restrictions) were granted with a weighted-average per share grant-date fair value of \$42.19. During 2007, 433,938 restricted shares (including 35,200 directors' shares subject to restrictions) were granted with a weighted-average per share grant-date fair value of \$31.89. During 2006, 480,531 restricted shares (including 30,800 directors' shares subject to restrictions) were granted with a weighted-average per share grant-date fair value of \$23.81. The total fair value of restricted shares vested was \$12,696, \$8,112 and \$3,067 during 2008, 2007 and 2006, respectively.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table represents restricted share activity for 2008:

	2008		Weighted-Average per Share Grant-Date Fair Value
Nonvested restricted stock			
Nonvested restricted stock at beginning of year	784,307	\$	27.40
Nonvested restricted stock granted	464,495	\$	42.42
Nonvested restricted stock forfeited	58,047	\$	30.22
Nonvested restricted stock distributed	281,450	\$	25.54
Nonvested restricted stock at end of year	909,305	\$	35.11
Directors shares subject to restrictions			
Directors shares subject to restrictions at beginning of year	35,200	\$	38.63
Directors shares subject to restrictions granted(1)	35,200	\$	39.18
Directors shares subject to restrictions distributed(1)	39,600	\$	37.88
Directors shares subject to restrictions at end of year	30,800	\$	41.18

(1) In conjunction with the departure of one of our directors in September 2008, 4,400 shares that were granted during the second quarter of 2008 were distributed during the third quarter of 2008.

Performance Shares Performance shares generally vest over three years and are expensed ratably over the vesting term, subject to achievement of specific Company performance goals. Stock-based compensation expense for these awards is determined based on the market price of our stock at the date of grant applied to the total number of shares that were anticipated to fully vest. As the applicable performance conditions were not met during 2008, we recognized no associated compensation expense and the associated performance shares will not be distributed. However, during 2008, 256,198 performance shares were granted with a weighted-average per share grant-date fair value of \$45.36. During 2007, 192,655 performance shares were granted with a weighted-average per share grant-date fair value of \$30.48. During 2006, there were no performance share grants.

The changes in common stock, additional paid-in capital and stock held in trust since December 31, 2007 primarily relate to activity associated with our stock plans. Our treasury stock also reflects the impact of our stock repurchase program.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The principal temporary differences included in deferred income taxes reported on the December 31, 2008 and 2007 balance sheets were:

	December 31,	
	2008	2007
Current Deferred Taxes		
Tax benefit of non-U.S. operating losses and credits	30,827	
Contract revenue and costs	3,179	9,913
Employee compensation and benefit plan reserves	4,693	5,310
Legal reserves	3,523	2,621
Other	9,724	2,556
Current deferred tax asset	\$ 51,946	\$ 20,400
Non-Current Deferred Taxes		
Tax benefit of U.S. State operating losses and credits, net	461	1,270
Tax benefit of non-U.S. operating losses and credits	187,327	154,968
Employee compensation and benefit plan reserves	16,957	14,161
Non-U.S. activity	11,805	
Insurance and legal reserves	4,502	5,389
Non-current deferred tax asset	221,052	175,788
Less: valuation allowance	(125,296)	(111,976)
Non-current deferred tax asset	95,756	63,812
Non-U.S. activity		(4,818)
Depreciation and amortization	(65,665)	(51,078)
Other	(1,275)	(1,766)
Non-current deferred tax liability	(66,940)	(57,662)
Net non-current deferred tax asset	\$ 28,816	\$ 6,150
Net deferred tax asset	\$ 80,762	\$ 26,550

As of December 31, 2008, neither Netherlands income taxes from dividends and other profit remittances, nor Canadian, U.S., or other withholding taxes have been accrued on the estimated \$539,000 of undistributed earnings of our Canadian, U.S., and subsidiary companies thereof, because it is our intention not to remit these earnings. We intend to permanently reinvest the undistributed earnings of our Canadian subsidiary and our U.S. companies and their subsidiaries and our non-European Union Dutch subsidiaries in their businesses and, therefore, have not provided for

deferred taxes on such unremitted foreign earnings. The determination of any unrecognized deferred tax liability related to permanently reinvested earnings is not practical. We did not record any Netherlands deferred income taxes on undistributed earnings of our other subsidiaries and affiliates at December 31, 2008. If any such undistributed earnings were distributed, the Netherlands participation exemption should become available under current law to significantly reduce or eliminate any resulting Netherlands income tax liability.

As of December 31, 2008, we had no U.S.-Federal net operating loss carryforwards (NOL s). As of December 31, 2008, we had U.S.-State NOL s of approximately \$10,506, net of apportionment. We believe that it is more likely than not that \$6,581 of the U.S.-State NOL s, net of apportionment, will not be utilized. Therefore, a valuation allowance has been placed against \$6,581 of U.S.-State NOL s. The U.S.-State NOL s will expire from 2009 to 2028. As of December 31, 2008, we had Non-U.S. NOL s totaling \$789,000, including \$377,000 in the U.K. and \$412,000 from other Non-U.S. subsidiaries. We believe that it is more likely than not that \$97,000 of U.K. NOL s will not be utilized and accordingly, a valuation allowance has been placed against these U.K. NOL s.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Additionally, we believe it is more likely than not that \$317,000 of other Non-U.S. NOL s (\$280,000 of which were acquired in the Lummus acquisition) will not be utilized, for which valuation allowance has been established. Our valuation allowance increased from \$411,000 at December 31, 2007 to \$414,000 at December 31, 2008, primarily related to foreign currency movements and the addition of valuation allowance in the U.K. Excluding NOL s having an indefinite carryforward, the Non-U.S. NOL s will expire from 2009 to 2023.

15. SEGMENT INFORMATION

During 2008, we managed our operations by four geographic segments; North America, Europe, Africa and Middle East, Asia Pacific and Central and South America. The EPC component of our 2007 Lummus acquisition was integrated into our North America and EAME segments based upon the geographic location of their operations, while results of the technology component of the Lummus acquisition are reported separately as they offer separate services.

The Chief Executive Officer evaluates the performance of these segments based on revenue and income from operations. Each segment s performance reflects an allocation of corporate costs, which was based primarily on revenue. For the year ended December 31, 2008, we had one customer within our CSA segment that accounted for more than 10% of our total revenue. Revenue for this customer totaled approximately \$598,247 or 10% of our total revenue. Intersegment revenue is not material.

The following table presents revenue by reporting segment:

	Years Ended December 31,		
	2008	2007	2006
Revenue			
EPC			
North America	\$ 2,195,479	\$ 1,946,484	\$ 1,676,694
Europe, Africa and Middle East	1,515,950	1,307,578	1,101,813
Asia Pacific	496,422	442,042	234,764
Central and South America	1,298,458	626,415	112,036
Lummus Technology	438,672	40,973	
Total revenue	\$ 5,944,981	\$ 4,363,492	\$ 3,125,307

The following table indicates revenue for individual countries in excess of 10% of consolidated revenue during any of the three years ended December 31, 2008, based on where we performed the work:

	Years Ended December 31,		
	2008	2007	2006
United States	\$ 1,815,087	\$ 1,667,259	\$ 1,520,107

United Kingdom	\$	507,256	\$	825,726	\$	766,937
Peru	\$	598,913	\$	342,152	\$	35,895

Lummus Technology	11,828	97	

Total capital expenditures	\$ 124,595	\$ 88,308	\$ 80,352
----------------------------	------------	-----------	-----------

Our revenue earned and assets attributable to operations in The Netherlands were not significant in any of the three years ended December 31, 2008. Our long-lived assets are considered to be net property and equipment.

Approximately 64% of these assets were located in the U.S. at December 31, 2008, while the other 36% were strategically located throughout the world.

Table of Contents**CHICAGO BRIDGE & IRON COMPANY N.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Revenue by market sector is shown below:

	Years Ended December 31,		
	2008	2007	2006
Revenue			
Liquefied natural gas	\$ 2,630,809	\$ 2,396,327	\$ 1,390,197
Energy processes	1,642,048	970,990	1,039,611
Steel plate structures	1,233,452	955,202	695,499
Lummus Technology	438,672	40,973	
Total revenue	\$ 5,944,981	\$ 4,363,492	\$ 3,125,307

Prospective Change in Reporting Segments Over the past several years, we have experienced worldwide demand in our end markets. With the addition of the Lummus organization last year, our ability to respond to that demand has placed us in the tier of global contractors who have the unique capability to meet customers' needs across a broad spectrum of technology and project services.

As a result of the aforementioned, beginning in the first quarter of 2009, our management structure and internal and public segment reporting will be aligned based upon three distinct project business sectors, rather than our historical practice of reporting based upon discrete geographic regions. These three project business sectors will be CB&I Lummus (includes our energy processes and LNG projects), CB&I Steel Plate Structures, and Lummus Technology.

Our 2008 results discussed above have been reported in-line with the geographic segment structure that was in place during 2008.

16. QUARTERLY OPERATING RESULTS (UNAUDITED)

Quarterly Operating Results The following table sets forth our selected unaudited consolidated statement of operations information on a quarterly basis for the years ended December 31, 2008 and 2007:

Quarter Ended 2008(1)	March 31	June 30	Sept. 30	Dec. 31
	(In thousands, except per share data)			
Revenue	\$ 1,439,424	\$ 1,428,461	\$ 1,563,709	\$ 1,513,387
Gross profit (loss)	\$ 126,023	\$ (157,974)	\$ 100,725	\$ 164,376
Net income (loss)	\$ 42,173	\$ (140,454)	\$ 8,554	\$ 68,581
Net income (loss) per share basic	\$ 0.44	\$ (1.47)	\$ 0.09	\$ 0.73
Net income (loss) per share diluted	\$ 0.43	\$ (1.47)	\$ 0.09	\$ 0.72

Quarter Ended 2007	March 31	June 30	Sept. 30	Dec. 31(2)
	(In thousands, except per share data)			
Revenue	\$ 857,305	\$ 1,011,367	\$ 1,171,752	\$ 1,323,068
Gross Profit	\$ 83,339	\$ 62,159	\$ 107,376	\$ 103,975
Net income	\$ 36,595	\$ 26,116	\$ 58,738	\$ 44,191
Net income per share basic	\$ 0.38	\$ 0.27	\$ 0.61	\$ 0.46
Net income per share diluted	\$ 0.38	\$ 0.27	\$ 0.61	\$ 0.46

- (1) Our operating results during 2008 included pre-tax charges of approximately \$21,000, \$317,000, \$86,000 and \$33,000, for the first through fourth quarters, respectively, associated with additional projected costs to complete the U.K. Projects.
- (2) The operating results of Lummus were included in our 2007 results of operations from the acquisition date of November 16, 2007 and had a \$104,641 and \$10,391 impact on our revenue and income from operations for the fourth quarter of 2007.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Management's Report on Internal Control Over Financial Reporting

Management's Report on Internal Control Over Financial Reporting, which can be found in Item 8. Financial Statements and Supplementary Data, is incorporated herein by reference.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this annual report on Form 10-K, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon such evaluation, the CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures are effective to ensure information required to be disclosed in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms.

Attestation Report of the Independent Registered Public Accounting Firm

Our internal control over financial reporting has been audited by Ernst & Young LLP, an independent registered public accounting firm, as indicated in their report, which can be found in Item 8. Financial Statements and Supplementary Data and is incorporated herein by reference.

Changes in Internal Controls Over Financial Reporting

There were no changes in our internal controls over financial reporting that occurred during the three month period ended December 31, 2008, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Management's report on internal controls as of December 31, 2008 is included in Item 8. Financial Statements and Supplementary Data.

Item 9B. *Other Information*

None.

Table of Contents**PART III****Item 10. Directors, Executive Officers and Corporate Governance**

We have adopted a code of ethics that applies to the CEO, the CFO and the Corporate Controller, as well as our directors and all employees. Our code of ethics can be found at our Internet website www.cbi.com and is incorporated herein by reference.

We submitted a Section 12(a) CEO certification to the NYSE in 2008. Also during 2008, we filed with the SEC certifications, pursuant to Rule 13A-14 of the Securities Exchange Act of 1934 as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, as Exhibits 31.1 and 31.2 to this Form 10-K.

The following table sets forth certain information regarding the Supervisory Directors of Chicago Bridge & Iron Company N.V. (CB&I N.V.), nominees to the Supervisory Board and the executive officers of Chicago Bridge & Iron Company (CBIC).

Name	Age	Position(s)
Supervisory Directors		
Jerry H. Ballengee	71	Supervisory Director and Non-Executive Chairman of CB&I N.V.
Philip K. Asherman	58	Supervisory Director; President and Chief Executive Officer of CBIC
L. Richard Flury	61	Supervisory Director
J. Charles Jennett	68	Supervisory Director

Luciano Reyes	38	Nominee for Supervisory Director (Vice President and Treasurer of CBIC)
Westley S. Stockton	37	

Nominee for Supervisory Director (Vice President, Corporate
Controller and Chief Accounting Officer of CBIC)

W. Craig Kissel

58 Independent Nominee for Supervisory Director

There are no family relationships between any executive officers and Supervisory Directors. Executive officers of CBIC are elected annually by the CBIC Board of Directors.

Table of Contents

JERRY H. BALLENGEE has served as non-executive Chairman since 2006 and as a Supervisory Director of the Company since 1997. He is Chairman of the Strategic Initiatives Committee and is a member of the Corporate Governance Committee and Nominating Committee. Mr. Ballengee served as Chairman of the Board of Morris Material Handling Company from 2001 to 2006. He served as President and Chief Operating Officer of Union Camp Corporation from 1994 to 1999, and as a member of the Board of Directors of that company from 1988 until 1999. Prior, he held various other executive positions.

L. RICHARD FLURY has served as a Supervisory Director of the Company since 2003, and as a consultant to the Supervisory Board since 2002. He is Chairman of the Corporate Governance Committee, and a member of the Audit Committee, the Nominating Committee and the Strategic Initiatives Committee. Previously, Mr. Flury served as Chief Executive, Gas and Power for BP plc from 1998 until his retirement in 2001. He served as Executive Vice President of Amoco, responsible for managing the Exploration and Production sector, from 1996 to 1998. Prior, he served in various other executive capacities with Amoco since 1988. Mr. Flury is also a director of Questar Corporation and Callon Petroleum Corporation.

J. CHARLES JENNETT has served as a Supervisory Director of the Company since 1997. He is Chairman of the Supervisory Board's Nominating Committee, and a member of the Organization and Compensation Committee and Corporate Governance Committee. Dr. Jennett served as President of Texas A&M International University from 1996 to 2001. Upon his retirement in 2001, he was bestowed the title of President Emeritus. From 1992 to 1996, he was Provost and Vice President of Academic Affairs at Clemson University. Dr. Jennett currently serves as a private engineering consultant.

LARRY D. McVAY has been a Supervisory Director since 2008 and is a member of the Audit Committee, Strategic Initiatives Committee and Corporate Governance Committee. Mr. McVay has served as Managing Director of Edgewater Energy Partners, LLC since 2007 and worked 39 years for Amoco, BP and TNK-BP. In his last assignment with BP, McVay served as the Chief Operating Officer of TNK-BP in Moscow from 2003 until his retirement from BP in 2006. From 2000 to 2003, he held the position of Technology Vice President, Operations, and Vice President of Health, Safety and Environment for BP, based in London. Previously, Mr. McVay served in numerous senior level managerial positions for Amoco. Mr. McVay is currently on the Board of Directors of Callon Petroleum Company and Praxair.

GARY L. NEALE has served as a Supervisory Director since 1997 and is Chairman of the Organization and Compensation Committee and a member of the Corporate Governance Committee. Mr. Neale served as Chairman of the Board of NiSource, Inc. from 1993 to 2007 and as Chief Executive Officer from 1993 to 2005. He has also served as Chairman of the Board and a director of Northern Indiana Public Service Company since 1989, and as a director of Modine Manufacturing Company (heat transfer products) since 1977.

MICHAEL L. UNDERWOOD has served as a Supervisory Director since 2007 and is Chairman of the Audit Committee and a member of the Organization and Compensation Committee and the Corporate Governance Committee. Mr. Underwood worked the majority of his 35-year career in public accounting at Arthur Andersen LLP, where he was a partner. He moved to Deloitte & Touche LLP as a director in 2002, retiring in 2003. He is currently a director and Chairman of the Audit Committee of Dresser-Rand Group.

MARSHA C. WILLIAMS has served as a Supervisory Director of the Company since 1997. She is a member of the Audit Committee, Corporate Governance Committee and the Organization and Compensation Committee. Ms. Williams currently serves as Senior Vice President and Chief Financial Officer of Orbitz Worldwide, a position she has held since 2007. From 2002 to 2007, she served as Executive Vice President and Chief Financial Officer of Equity Office Properties Trust, a public real estate investment trust. She served as Chief Administrative Officer of Crate & Barrel from 1998 to 2002, and as Treasurer of Amoco Corporation from 1993 to 1998. Ms. Williams is a

director of Davis Funds, Modine Manufacturing Company, Inc. and Fifth Third Bancorp.

PHILIP K. ASHERMAN has been President and Chief Executive Officer of CB&I since 2006 and a Managing Director since 2004. He joined CB&I in 2001 as a senior executive and was promoted to Executive Vice President that same year, reporting directly to the Chairman and CEO. Prior to joining CB&I, Mr. Asherman served as Senior Vice President of Fluor Global Services and held other executive positions with Fluor Daniel, Inc. operating

Table of Contents

subsidiaries, including President of its mining and minerals operating group and President of an industrial operating group. He previously held a number of regional executive positions in Europe, South America and Asia.

BETH A. BAILEY was promoted to Executive Vice President and Chief Administration Officer in December 2008, with corporate responsibility for all Information Technology, Facilities and Human Resources. Ms. Bailey joined CB&I in 1972, serving in positions of increasing responsibility most recently as Executive Vice President and Chief Information Officer.

RONALD A. BALLSCHMIEDE has served as Executive Vice President and Chief Financial Officer since 2006. Prior to joining CB&I, he was a partner with Deloitte & Touche LLP since 2002. Previously, he worked for Arthur Andersen LLP from 1977 to 2002, becoming a partner in 1989 where he led the financial statements audits for a number of major manufacturing and construction companies.

RONALD E. BLUM assumed the role of President, CB&I Steel Plate Structures in December 2008. Previously, he served as Executive Vice President - Global Business Development since 2006 and as Vice President - Global LNG Sales from 2004 to 2006. Prior to that time, he held a series of positions with increasing responsibility at CB&I and PDM Engineered Construction.

DAVID A. DELMAN has served as Executive Vice President and Chief Legal Officer, and Secretary for CB&I's Supervisory Board of Directors since joining CB&I in 2007. Previously, he was a partner in the international law firm of Pepe & Hazard LLC, specializing in engineering and construction industry issues. From 1992 to 2000, Mr. Delman worked for Fluor Corporation, serving as associate general counsel from 1996.

DANIEL M. MCCARTHY serves as President, Lummus Technology, a position he has held since December 2008. He previously served as Executive Vice President - Lummus Technology, a position he has held since joining CB&I as part of the Lummus acquisition in 2007. Prior to that, he was an Executive Vice President of Lummus. He has held various management positions within the technology businesses of Lummus since its inception in 1987, assuming senior management responsibility for the business in 2004 and for the Lummus Houston EPC Execution Center in 2006.

LASSE PETTERSON joined CB&I in February 2009. Previously, Mr. Petterson was CEO of Gearbulk, the world's largest operator of gantry craned vessels and served from 2002 to 2006 as President and Chief Operating Officer of AMEC Inc. USA, a project management engineering and construction company. From 1980 to 2002, he worked in various international executive and operations assignments for Aker Kvaerner, serving as President of both the Oil & Gas division and the Maritime division.

EDGAR C. RAY has served as Executive Vice President - Corporate Planning since 2007. He joined CB&I in 2003, serving as Senior Vice President - Global Marketing until 2007. Prior to joining CB&I, Mr. Ray was Executive Director of Strategy and Marketing for Fluor Corporation.

JOHN W. REDMON assumed the role of President, CB&I Lummus, the company's EPC business, in December 2008. He served as Executive Vice President - Operations from 2006 and previously, led CB&I's Risk Management group overseeing CB&I's Project Controls, Procurement, Estimating, and Health, Safety, and Environment groups. He served as Executive Vice President of BE&K, Inc. from 1998 to 2006 and Chief Operating Officer of that company from 1999 to 2006. Mr. Redmon began working for Brown & Root, Inc. in 1968 where he served in various positions of increasing responsibility, culminating in the position of Executive Vice President and Chief Operating Officer.

LUCIANO REYES has served as Vice President and Treasurer since February 2006 and previously held positions of increasing responsibility in CB&I's Treasury Department since joining the company in 1998. Prior to joining CB&I,

Mr. Reyes held financial positions with USG and with several financial institutions.

WESTLEY S. STOCKTON has held the position of Vice President, Corporate Controller and Chief Accounting Officer since June 2008, previously serving as Vice President Financial Operations. Mr. Stockton, a Certified Public Accountant, has worked for CB&I in various financial and M&A positions since 2002. Prior to joining CB&I, he worked for both PriceWaterhouseCoopers and Arthur Andersen in audit-related roles.

W. CRAIG KISSEL worked for American Standard from 1980 until his retirement in 2008, most recently as President of Trane Commercial Systems, a leading supplier of air conditioning and heat systems. From 1998 to 2003, he was President of American Standard's Vehicle Control Systems business in Brussels, Belgium. Prior, he held various management positions at Trane, including Executive Vice President and Group Executive of Trane's North American Unitary Products business. From 2001 to 2008, Mr. Kissel served as Chairman of American Standard's Corporate Ethics and Integrity Council responsible for developing the company's ethical business standards.

PART IV

Item 15. *Exhibits and Financial Statement Schedules*

Financial Statements

The following Consolidated Financial Statements and Reports of Independent Registered Public Accounting Firms included under Item 8 of Part II of this report are herein incorporated by reference.

Reports of Independent Registered Public Accounting Firm

Consolidated Statements of Operations For the years ended December 31, 2008, 2007 and 2006

Consolidated Balance Sheets As of December 31, 2008 and 2007

Consolidated Statements of Cash Flows For the years ended December 31, 2008, 2007 and 2006

Consolidated Statements of Changes in Shareholders Equity For the years ended December 31, 2008, 2007 and 2006

Notes to Consolidated Financial Statements

Financial Statement Schedules

Schedule II Supplemental Information on Valuation and Qualifying Accounts and Reserves for each of the years ended December 31, 2008, 2007 and 2006 can be found on page 79 of this report.

Schedules, other than the one above, have been omitted because the schedules are either not applicable or the required information is shown in the Consolidated Financial Statements or notes thereto previously included under Item 8 of Part II of this report.

In accordance with Rule 3-09 of Regulation S-X, consolidated financial statements and accompanying notes of Chevron-Lummus Global LLC, a 50 percent or less owned affiliate that constitutes a significant subsidiary, will be filed subsequently as an amendment to this Form 10-K.

Quarterly financial data for the years ended December 31, 2008 and 2007 is shown in the Notes to Consolidated Financial Statements previously included under Item 8 of Part II of this report.

Exhibits

The Exhibit Index on page 80 and Exhibits being filed are submitted as a separate section of this report.
