**IMPORTANT NOTICES REGARDING PRIVACY,  
DELIVERY OF SHAREHOLDER DOCUMENTS,  
PORTFOLIO HOLDINGS AND PROXY VOTING**

**Privacy.** The Eaton Vance organization is committed to ensuring your financial privacy. Each of the financial institutions identified below has in effect the following policy ("Privacy Policy") with respect to nonpublic personal information about its customers:

Only such information received from you, through application forms or otherwise, and information about your Eaton Vance fund transactions will be collected. This may include information such as name, address, social security number, tax status, account balances and transactions.

None of such information about you (or former customers) will be disclosed to anyone, except as permitted by law (which includes disclosure to employees necessary to service your account). In the normal course of servicing a customer's account, Eaton Vance may share information with unaffiliated third parties that perform various required services such as transfer agents, custodians and broker/dealers.

Policies and procedures (including physical, electronic and procedural safeguards) are in place that are designed to protect the confidentiality of such information.

We reserve the right to change our Privacy Policy at any time upon proper notification to you. Customers may want to review our Policy periodically for changes by accessing the link on our homepage: [www.eatonvance.com](http://www.eatonvance.com).

Our pledge of privacy applies to the following entities within the Eaton Vance organization: the Eaton Vance Family of Funds, Eaton Vance Management, Eaton Vance Investment Counsel, Boston Management and Research, and Eaton Vance Distributors, Inc.

In addition, our Privacy Policy only applies to those Eaton Vance customers who are individuals and who have a direct relationship with us. If a customer's account (i.e. fund shares) is held in the name of a third-party financial adviser/broker-dealer, it is likely that only such adviser's privacy policies apply to the customer. This notice supersedes all previously issued privacy disclosures.

For more information about Eaton Vance's Privacy Policy, please call 1-800-262-1122.

**Delivery of Shareholder Documents.** The Securities and Exchange Commission permits funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called "householding" and it helps eliminate duplicate mailings to shareholders.

**Eaton Vance, or your financial adviser, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial adviser, otherwise.**

If you would prefer that your Eaton Vance documents not be househanded, please contact Eaton Vance at 1-800-262-1122, or contact your financial adviser.

Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial adviser.

**Portfolio Holdings.** Each Eaton Vance Fund and its underlying Portfolio (if applicable) will file a schedule of its portfolio holdings on Form N-Q with the SEC for the first and third quarters of each fiscal year. The Form N-Q will be available on the Eaton Vance website [www.eatonvance.com](http://www.eatonvance.com), by calling Eaton Vance at 1-800-262-1122 or in the EDGAR database on the SEC's website at [www.sec.gov](http://www.sec.gov). Form N-Q may also be reviewed and copied at the SEC's public reference room in Washington, D.C. (call 1-800-732-0330 for information on the operation of the public reference room).

**Proxy Voting.** From time to time, funds are required to vote proxies related to the securities held by the funds. The Eaton Vance Funds or their underlying Portfolios (if applicable) vote proxies according to a set of policies and procedures approved by the Funds' and Portfolios' Boards. You may obtain a description of these policies and procedures and information on how the Funds or Portfolios voted proxies relating to Portfolio securities during the most recent 12 month period ended June 30, without charge, upon request, by calling 1-800-262-1122. This description is also available on the SEC's website at [www.sec.gov](http://www.sec.gov).

**LETTER TO SHAREHOLDERS**

**Thomas J. Fetter**

**President**

Like all fixed-income markets, the municipal bond market responds to many factors, from changes in interest rates and economic trends to fluctuations in municipal bond issuance. Another key variable is the policy of the Federal Reserve, the nation's central bank, known popularly as The Fed. In this edition of our educational series, we will discuss the Fed and its importance to the nation's economy and financial markets.

**Founded in the wake of crisis, the Federal Reserve plays a vital role...**

The Federal Reserve System was established by the Federal Reserve Act of 1913 in the wake of a series of financial crises, the most recent of which the Panic of 1907 had caused bank failures, a rash of bankruptcies, a dramatic loss of confidence and a severe economic downturn. Congress was determined to create a central bank that provided a vigilant monetary policy, price stability, a more elastic currency and more careful supervision over the nation's banks.

**The Open Market Committee: influencing the money supply and credit conditions...**

The Fed has a number of tools at its disposal to adjust monetary policy. Of these, the most commonly used tools are open market operations. The Federal Open Market Committee (FOMC) meets regularly to review inflation, credit conditions and the overall health of the economy. The Fed uses its own research, as well as that of other key economic agencies, to review its various policy options. Treasury, corporate and municipal bond investors alike eagerly await the transcripts of FOMC meetings for a hint of future interest rate trends.

If it deems a change necessary in short-term rates, the Fed will announce an adjustment to its target for the Federal Funds rate its primary market instrument. To effect that change, the FOMC issues a directive to the trading desk of the Federal Reserve Bank of New York, whose responsibility it is to implement the policy.

**Open market operations: The Fed intervenes...**

If the Fed sees weakness in the economy and little threat of inflation, it may make outright purchases of Treasury securities either from the street or privately from foreign central banks thus adding reserves to the banking system. This action tends to lower interest rates, increase loans and stimulate economic activity. In so doing, the Fed is said to be *easing* monetary policy.

On the other hand, if the Fed sees the economy overheating and inflation looming, it may sell Treasury securities, thus draining reserves from the system. This action tends to raise rates, discourage consumer and business borrowing and dampen economic activity. In this case, the Fed is said to be *tightening* monetary policy.

While changes in Fed policy primarily affect short-term rates, long-term rates are determined by inflationary expectations. However, the Fed's actions can have a significant effect on market psychology and, over time, impact market rates across the borrowing spectrum for homebuyers seeking mortgages, businesses seeking bank loans and municipal bond issuers.

**Fed-watching: A continuing pre-occupation of the market...**

Interpreting the Federal Reserve's actions has long been of keen interest to bond market investors. Until the mid-1990s, analysts needed to keep daily tabs on bank reserves and the Fed's daily open market activity to determine a change in monetary policy. Starting in February 1994, however, the Fed began to indicate specifically its target Federal Funds rate. That marked a significant change, as analysts were now free to focus less on current policy and more on future potential changes in policy.

Throughout its history, the Federal Reserve has contributed to a more stable and safer monetary system. As that history unfolds, investors will surely continue to monitor its activities closely.

Sincerely,

/s/ Thomas J. Fetter  
Thomas J. Fetter  
President  
July 6, 2005

**Eaton Vance Municipal Income Trusts as of May 31, 2005**

**MARKET RECAP**

The U.S. economy continued to generate moderate growth during the six months ended May 31, 2005, although surging energy prices and high interest rates were a continuing concern for investors.

**Signs of a somewhat weaker economy in the first half of 2005...**

The nation's Gross Domestic Product grew by 3.8% in the first quarter of 2005, according to final Commerce Department figures, matching a 3.8% rise in the fourth quarter of 2004. However, manufacturing slowed in some areas, especially in durable goods. Consumer spending and a strong housing market remained the twin pillars of growth, although signs of strain were evident in those areas. Consumers were increasingly hard-pressed by soaring oil prices, which translated to higher costs for heating oil and gasoline, as well as lower savings rates.

Meanwhile, the housing sector remained very strong, although analysts expressed concern over real estate speculation. Further concerns centered on heavily mortgaged homeowners whose adjustable-rate loans may be vulnerable to rising interest rates. Capital spending, which started 2005 strongly, weakened as the period progressed as businesses curtailed investment somewhat, very likely in response to higher energy and transportation costs. Purchases of equipment and software were especially weak. The trade gap widened further, aggravated by weak export growth. The slow export market has been especially vexing in light of the prolonged weakness of the dollar.

**Job growth was erratic in the first half of 2005...**

Job creation increased in 2005, although the rate of job growth varied dramatically from month to month. Many employers indicated some uneasiness with the uncertainty of the economy and the continuing unpredictability of energy costs. In the service sector, health care and business services remained primary sources of new employment.

**Municipal bond yields exceeded Treasury yields**

**Principal and interest payments of Treasury securities are guaranteed by the U.S. government.**

---

**\*GO yields are a compilation of a representative variety of general obligations and are not necessarily representative of a Trust yield. Statistics as of May 31, 2005.**

**Past performance is no guarantee of future results.**

**Source: Bloomberg, LP.**

In the goods-producing segment, construction remained strong, while manufacturing continued to suffer from weak export demand.

**The Federal Reserve continued to raise short-term interest rates in 2005...**

Inflation accelerated somewhat during the period, an increase apparent not only in core energy costs, but also in finished products, a sign that producers are passing their higher energy costs along to consumers. The Federal Reserve hiked short-term interest rates, suggesting it will continue to raise rates to keep the economy from growing too quickly and to keep inflation under control. Beginning in June 2004, the Fed increased its Federal Funds rate—a key short-term interest rate barometer—on nine occasions, raising that benchmark from 1.00% to 3.25% (as of the most recent rate hike in June 2005).

Against this backdrop, the municipal bond market generated solid gains for the period. For the six months ended May 31, 2005, the Lehman Brothers Municipal Bond Index—an unmanaged index of longer-term, investment-grade, municipal debt securities made up of issues larger than \$50 million—had a total return of 3.51%.\*

---

\* It is not possible to invest directly in an Index. The Index's total return does not reflect expenses that would have been incurred if an investor individually purchased or sold the securities represented in the Index.

*The views expressed throughout this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. These views are subject to change at any time based upon market or other conditions, and the investment adviser disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a fund are based on many factors, may not be relied on as an indication of trading intent on behalf of any Eaton Vance fund.*

**Eaton Vance California Municipal Income Trust as of May 31, 2005**

**INVESTMENT UPDATE**

**The Trust**

Based on share price (the Trust is a closed-end fund traded on the American Stock Exchange), the Trust had a total return of -0.55% for the six months ended May 31, 2005. That return was the result of a decrease in share price from \$15.16 on November 30, 2004 to \$14.60 on May 31, 2005 and the reinvestment of \$0.481 in monthly dividends.(1)

Based on net asset value, the Trust had a total return of 7.45% for the six months ended May 31, 2005. That return was the result of an increase in net asset value per share from \$15.07 on November 30, 2004 to \$15.68 on May 31, 2005, and the reinvestment of all distributions.

In comparison, the Lehman Brothers Municipal Bond Index a broad-based, unmanaged index of longer-term, investment-grade, municipal debt securities made up of issues larger than \$50 million had a total return of 3.51% for the six months ended May 31, 2005.(2)

Based on the last dividend of the semiannual period and a share price of \$14.60, the Trust had a market yield of 6.16% at May 31, 2005.(3) The Trust's market yield is equivalent to a taxable yield of 10.45%.(4) The dividend declared on June 30, 2005 reflects a reduction of the monthly dividend of \$0.007833 per share.

**Portfolio Manager**

**Management Discussion**

California's job creation improved in late 2004 and early 2005. Business services, construction, financial services and health care generated strong new employment. Government sector losses, a result of the continuing budget deficit, remained a drag on job growth. The state's jobless rate was 5.3% in May 2005, down from 6.3% a year ago.

Hospital bonds constituted the Trust's largest sector weighting at May 31, 2005. The Trust's investments included bonds issued by local facilities, as well as statewide community development authority bonds, for a wide range of hospitals throughout the state.

## Edgar Filing: EATON VANCE MICHIGAN MUNICIPAL INCOME TRUST - Form N-CSRS

Special tax revenue bonds were a large investment. Many California communities have issued these bonds in recent years to meet the infrastructure needs that have accompanied rapid growth. The Trust's investments included a geographically diversified mix of financing authorities and unified school districts.

Insured\* transportation bonds were key investments for the Trust. Holdings included issues for regional highway authorities, selected Puerto Rico highway bonds, San Francisco's rapid transit authority and Los Angeles County's METRO, which runs the county's bus and rail service.

At May 31, 2005, the Trust had leverage in the amount of approximately 34% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Trust performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Trust's current performance may be lower or higher than the quoted return.*

**Management Discussion**

Florida's economy remained among the fastest growing state economies. Florida tourism registered strong gains, due, in part, to the lure of a weak dollar for foreign visitors. Immigration by retirees and those relocating for work boosted the construction and service sectors. Growth was not uniform across the state, however, as some areas were slow to recover from last year's hurricanes. The state's May 2005 jobless rate was 4.0%, down from 4.8% a year ago.

Insured\* water and sewer constituted the Trust's largest sector weighting at May 31, 2005. Water and sewer bond revenues come from non-discretionary water bill payments, and as such, are attractive investments in all economic scenarios.

Insured\* transportation bonds were major investments. The Trust's investments included a port commission, turnpike and expressway authorities, local and regional airport authorities and selected Puerto Rico highway authority bonds.

Insured\* electric utilities were among the Trust's prominent holdings. Investments included issues for Jupiter Island and Jacksonville that financed system upgrades, as well as Guam and Puerto Rico issues.

At May 31, 2005, the Trust had leverage in the amount of approximately 35% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Management Discussion

Massachusetts' economy made further advances in the first half of 2005. Service sector employment in health and education increased during the period, while the leisure and tourism sectors were also strong. Manufacturing remained a weak spot in the Commonwealth's employment picture. The jobless rate was 4.8% in May 2005, down from 5.2% a year ago.

Education and insured\* education bonds were among the Trust's largest sector weightings at May 31, 2005. The education sector generally has more defensive characteristics in an uncertain economy than economically sensitive sectors. The Trust focused on bonds of well-regarded institutions at the university and secondary level with continuing strong applicant demand.

The Trust was selective within the hospital sector, given that industry's continuing challenges. Investments represented a broad geographical mix across the Commonwealth facilities with marketable health care specialties and what we believe are sound fundamentals.

Insured\* non-sector specific, miscellaneous bonds also provided opportunities for the Trust. Investments included issues for a new convention center and for a public television foundation.

At May 31, 2005, the Trust had leverage in the amount of approximately 34% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

*Past performance is no guarantee of future results. **Management Discussion**

Michigan's economy turned in a poor performance in the first half of 2005. While less severe than in 2004, manufacturing which accounts for about 16% of Michigan jobs posted further losses. The service sector trade, retail, health care registered modest gains during the period. The state's May 2005 jobless rate was 7.1%, up from 7.0% a year ago.

Hospital bonds were the Trust's largest sector weighting at May 31, 2005. The Trust's investments were primarily state hospital finance authority bonds. Facilities were from a diverse range throughout the state and represented

institutions with good market share and what we believe are sound management and well-regarded teaching affiliations.

The Trust has a large commitment in general obligations(GOs). Given Michigan's troubled economy, management focused on school district bonds in communities with a relatively strong local job climate and a solid tax base.

Insured\* escrowed bonds were among the Trust's largest commitments. Escrowed bonds are essentially refinanced like a homeowner refinances a mortgage. Because they are backed by Treasury bonds, escrowed bonds are considered to be of the highest quality.

At May 31, 2005, the Trust had leverage in the amount of approximately 35% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Trust performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Performance is for the stated time period only; due to market volatility, the Trust's current performance may be lower or higher than the quoted return.*

**Eaton Vance New Jersey Municipal Income Trust as of May 31, 2005**

**INVESTMENT UPDATE**

**The Trust**

Based on share price (the Trust is a closed-end fund traded on the American Stock Exchange), the Trust had a total return of -1.79% for the six months ended May 31, 2005. That return was the result of a decrease in share price from \$15.54 on November 30, 2004 to \$14.78 on May 31, 2005 and the reinvestment of \$0.480 in monthly dividends.(1)

Based on net asset value, the Trust had a total return of 6.95% for the six months ended May 31, 2005. That return was the result of an increase in net asset value per share from \$14.81 on November 30, 2004 to \$15.34 on May 31, 2005, and the reinvestment of all distributions.

In comparison, the Lehman Brothers Municipal Bond Index an unmanaged index of longer-term, investment-grade, municipal debt securities made up of issues larger than \$50 million had a total return of 3.51% for the six months ended May 31, 2005.(2)

Based on the last dividend of the semiannual period and a share price of \$14.78, the Trust had a market yield of 5.72% at May 31, 2005.(3) The Trust's market yield is equivalent to a taxable yield of 9.67%.(4) The dividend declared on June 30, 2005 reflects a reduction of the monthly dividend of \$0.005833 per share.

**Management Discussion**

In the first half of 2005, New Jersey enjoyed its strongest showing since 2000. Leisure, business services, trade, transportation, and utilities generated the lion's share of new jobs. Manufacturing remained among New Jersey's weakest sectors. The state's May 2005 jobless rate was 3.9%, down from 4.9% a year ago, and below the national rate.

Hospital bonds constituted the Trust's largest sector weighting at May 31, 2005. In a very cost-conscious hospital climate, the Trust focused on health care financing authority bonds for facilities that management believes are well managed, financially strong and leading care providers in their communities.

Insured\* transportation bonds constituted another large focus for the Trust. Investments included issues for regional and state port authorities, turnpike authorities and Newark's marine terminal.

Insured\* general obligations (GOs) were a large investment for the Trust. Management emphasized local board of education and school district bonds of communities with a sound property tax base. The Trust focused on issues with good call protection either long-dated calls or non-callable bonds.

At May 31, 2005, the Trust had leverage in the amount of approximately 34% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value or share price (as applicable) with all distributions reinvested. **Management Discussion**

In the first half of 2005, New York State continued its recovery, registering impressive employment growth. Business services, education, health care and tourism have been the main sources of growth. Gains in finance have been modest, while the state continued to shed manufacturing jobs. The state's May 2005 jobless rate was 5.0%, down from 5.8% a year ago.

Electric utilities bonds were the Trust's largest sector weighting at May 31, 2005. These essential services bonds are considered less subject to economic fluctuations than more discretionary services or purchases because their revenues derive from relatively stable utility bill payments.

Hospital bonds played a significant role in the Trust. Management remained very selective, focusing on the more competitive county and New York City-based institutions with what we believe to be sound management, lean cost

structures and good market share.

Transportation bonds were a continued focus of the Trust. As the nation's business and financial capital, transportation plays a key role in New York's economy. The Trust's holdings included issues for port authorities, rapid transit facilities and Puerto Rico highway authority bonds.

At May 31, 2005, the Trust had leverage in the amount of approximately 34% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

*Past performance is no guarantee of future results. ### **Management Discussion**

Ohio's economy continued its slow improvement in the first half of 2005, although manufacturing remained vulnerable to a soft auto industry, corporate restructurings and technology-driven productivity gains. Among expanding industries, business services, health care and education generated impressive employment growth. The state's May 2005 jobless rate was 6.1%, unchanged from a year ago.

Hospital bonds were the Trust's largest weighting at May 31, 2005. The Trust remained very selective, focusing on the more competitive institutions that have what we believe are favorable demographic and market positions, sound cost structures and in-demand health care specialties.

## Edgar Filing: EATON VANCE MICHIGAN MUNICIPAL INCOME TRUST - Form N-CSRS

Insured\* general obligations (GOs) were key investments for the Trust. Against the backdrop of a slow-to-recover manufacturing sector, the Trust sought to use insured\* school district GOs as a counterweight against the possibility of a downturn in local tax revenues.

The Trust maintained selective investments in industrial development revenue bonds, with exposure in cyclical as well as defensive industries. The Trust's investments included issues for airlines and air freight, several auto manufacturers and a beverage producer.

At May 31, 2005, the Trust had leverage in the amount of approximately 35% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

**Management Discussion**

Pennsylvania job creation gained some momentum in late 2004 and early 2005, although the pace of growth was unevenly distributed. Business, education, tourism, construction and health care were the primary areas of growth, while manufacturing continued to shed jobs. The Commonwealth's May 2005 jobless rate was 4.8%, down from 5.5% a year ago.

Insured\* education bonds constituted the Trust's largest sector weighting at May 31, 2005. With the education sector enjoying more predictable revenues than many cyclical sectors, the Trust's investments included issues for some of the Commonwealth's most prominent colleges and universities.

Insured\* escrowed/prerefunded bonds remained a large commitment in the Trust. Escrowed bonds are pre-refunded and backed by Treasury bonds, most often as the result of a refinancing of existing higher-coupon debt. Escrowed issues are attractive for their high quality and may provide above-average coupons.

In the competitive hospital sector, the Trust remained very selective. Management focused on insured\* bonds of facilities it believes have an advantage due to what it deems marketable health care services, superior management and a sound financial profile.

At May 31, 2005, the Trust had leverage in the amount of approximately 35% of the Trust's total assets. The Trust uses leverage through the issuance of preferred shares. Use of financial leverage creates an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater volatility of net asset value and market price of common shares).

## Edgar Filing: EATON VANCE MICHIGAN MUNICIPAL INCOME TRUST - Form N-CSRS

The Trust invests primarily in debt securities issued by California municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2005,

51.8% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 7.7% to 19.3% of total investments.

(1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At May 31, 2005, the aggregate value of the securities is \$19,913,192 or 17.7% of the Trust's net assets.

(2) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

(3) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

(4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

Eaton Vance Massachusetts Municipal Income Trust as of May 31, 2005

PORTFOLIO OF INVESTMENTS (Unaudited) CONT'D

AMBAC - AMBAC Financial Group, Inc.

AMT - Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Trust invests primarily in debt securities issued by Massachusetts municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2005, 41.7% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 3.1% to 15.9% of total investments.

- (1) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At May 31, 2005, the aggregate value of the securities is \$7,554,918 or 17.8% of the Trust's net assets.
- (3) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.
- (4) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

## Eaton Vance New Jersey Municipal Income Trust as of May 31, 2005

### PORTFOLIO OF INVESTMENTS (Unaudited) CONT'D

AMBAC - AMBAC Financial Group, Inc.

AMT - Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Trust invests primarily in debt securities issued by New Jersey municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2005, 41.8% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.7% to 25.4% of total investments.

- (1) When-issued security.
- (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At May 31, 2005, the aggregate value of the securities is \$10,353,848 or 14.6% of the Trust's net assets.
- (3) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.
- (4) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (5) Security (or a portion thereof) has been segregated to cover when-issued securities.
- (6) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.
- (7) Security is subject to a shortfall and forbearance agreement.

MBIA - Municipal Bond Insurance Association

The Trust invests primarily in debt securities issued by New York municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2005, 25.4% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.7% to 14.2% of total investments.

(1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At May 31, 2005, the aggregate value of the securities is \$16,062,711 or 18.6% of the Trust's net assets.

(2) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

(3) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

(4) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

Eaton Vance Ohio Municipal Income Trust as of May 31, 2005

PORTFOLIO OF INVESTMENTS (Unaudited) CONT'D

The Trust invests primarily in debt securities issued by Ohio municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2005, 48.0% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 4.3% to 17.2% of total investments.

(1) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At May 31, 2005, the aggregate value of the securities is \$8,702,421 or 20.0% of the Trust's net assets.

(2) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

(3) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

(4) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

AMT - Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance, Inc.

MBIA - Municipal Bond Insurance Association

XLCA - XL Capital Assurance, Inc.

The Trust invests primarily in debt securities issued by Pennsylvania municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at May 31, 2005, 65.6% of the securities in the portfolio of investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.6% to 23.6% of total investments.

(1) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.

(2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At May 31, 2005, the aggregate value of the securities is \$5,332,602 or 13.1% of the Trust's net assets.

(3) Security has been issued as a leveraged inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.

(4) Security has been issued as an inverse floater bond. The stated interest rate represents the rate in effect at May 31, 2005.
