Re: Unaudited First-Quarter 2008 Financial Statements

Overview of First-Quarter 2008 Record Financial Results

CBOE delivered its best quarter ever for the three months ended March 31, 2008, posting pre-tax earnings of \$52.8 million on revenues of \$104.3 million. Robust trading volume generated strong growth in transaction fees, resulting in a 34 percent increase in total revenues and a 74 percent increase in pre-tax earnings for the first quarter of 2008 compared with last year's first quarter. First-quarter 2008 marks CBOE's ninth consecutive quarter of year-over-year, double-digit gains in revenues and earnings.

In the first quarter of 2008, CBOE extended the revenue momentum generated in 2007. Total revenues for the quarter hit a record \$104.3 million, primarily due to higher transaction fees. Transaction fees rose 40 percent to \$82.2 million during the first quarter of 2008, up from \$58.8 million in the first quarter of 2007, driven by higher trading volume. Total contracts traded for the quarter were up 37 percent to 282.5 million from 205.6 million in last year's first quarter. CBOE's average daily volume of options contracts traded was 4.6 million contracts during the first three months of 2008, a 37 percent increase compared with 3.4 million contracts during the comparable period last year. Additionally, the transaction fee per contract increased nearly 2

percent to \$0.291 for the quarter from \$0.286 in last year's first quarter, contributing to the upsurge in transaction fees. The gain experienced in the average rate per contract primarily reflects a greater percentage of the overall trading volume concentrated in CBOE's higher-margin product categories.

The other line items included in total revenues represented \$3.1 million of the \$26.5 million favorable variance. The largest increase from CBOE's other sources of revenues was an increase of \$0.8 million in other member fees, which primarily resulted from higher revenues derived from hybrid electronic quoting fees and trade match reports. In addition, investment income continues to show positive growth, up \$0.6 million, reflecting higher levels of excess funds generated from CBOE's positive operating results.

Operating Leverage Drives Margins to Record Level

Total expenses for the first quarter of 2008 were \$51.6 million, an increase of \$4.0 million, or 8 percent, compared with the same period in 2007. This increase primarily reflects the net impact of higher expenses related to employee costs, royalty fees and other expenses, which were offset partially by a favorable variance in facilities costs. Employee costs were up \$0.4 million for the quarter primarily due to accrued expenses related to annual incentive awards which are aligned with the company's improved financial performance. Royalty fees increased \$2.4 million. These fees are variable, rising in tandem with the growth in trading volume in CBOE's licensed products. Other expenses were up \$2.0 million for the first quarter due to the higher expense incurred for DPM market linkage, the program that reimburses DPMs for the cost of linking orders to markets at other exchanges. The \$0.8 million positive variance in facilities costs resulted from a real estate tax refund received in the first quarter relating to prior real estate tax payments that were contested.

Excluding royalty fees, which are variable expenses correlated with volume growth, total expenses for the first quarter of 2008 were \$43.1 million compared with \$41.5 million for the same period last year, representing an increase of \$1.6 million, or 4 percent.

CBOE's ongoing efforts to maintain tight control of expenses is evidenced by our operating margin expansion. CBOE's operating margin, representing income before taxes divided by total revenues, increased to 50.6 percent for the quarter compared with 38.9 percent for the same period last year. Our ability to continue to grow our margins underscores the operating leverage and scalability built into CBOE's operating model.

Strong, Debt-Free Balance Sheet

Working capital (current assets minus current liabilities) increased by \$29.0 million to \$202.9 million during the first quarter of 2008. At March 31, 2008, cash and investments were \$243.4 million, up \$62.0 million from December 31, 2007. The growth in revenues and prepaid transaction fees, net of cash expenses and capital expenditures, drove these increases.

Capital expenditures for the first quarter of 2008 were \$10.0 million and primarily relate to systems hardware and capitalized software as CBOE continues to invest in expanding its systems

capacity and enhancing systems capabilities. Free cash flow, another measure of liquidity, defined as net cash provided by operating activities less capital expenditures, was \$64.9 million in the first quarter of 2008.
