Form 10-Q
October 29, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-11840

THE ALLSTATE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

36-3871531
(I.R.S. Employer Identification No.)

Edgar Filing: ALLSTATE CORP - Form 10-Q

2775 Sanders Road, Northbrook, Illinois 60062
(Address of principal executive offices) (Zip Code)

(847) 402-5000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of October 15, 2014, the registrant had 419,433,284 common shares, \$.01 par value, outstanding.

THE ALLSTATE CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. General

Basis of presentation

The accompanying condensed consolidated financial statements include the accounts of The Allstate Corporation (the Corporation) and its wholly owned subsidiaries, primarily Allstate Insurance Company (AIC), a property-liability insurance company with various property-liability and life and investment subsidiaries, including Allstate Life Insurance Company (ALIC) (collectively referred to as the Company or Allstate).

The condensed consolidated financial statements and notes as of September 30, 2014 and for the three-month and nine-month periods ended September 30, 2014 and 2013 are unaudited. The condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring accruals) which are, in the opinion of management, necessary for the fair presentation of the financial position, results of operations and cash flows for the interim periods. These condensed consolidated financial statements and notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The results of operations for the interim periods should not be considered indicative of results to be expected for the full year. All significant intercompany accounts and transactions have been eliminated.

Pending accounting standards

Accounting for Investments in Qualified Affordable Housing Projects

In January 2014, the Financial Accounting Standards Board (FASB) issued guidance which allows entities that invest in certain qualified affordable housing projects through limited liability entities the option to account for these investments using the proportional amortization method if certain conditions are met. Under the proportional amortization method, the entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense or benefit. The guidance is effective for reporting periods beginning after December 15, 2014 and is to be applied retrospectively. The impact of adoption is not expected to be material to the Company's results of operations and financial position.

Revenue from Contracts with Customers

In May 2014, the FASB issued guidance which revises the criteria for revenue recognition. Insurance contracts are excluded from the scope of the new guidance. Under the guidance, the transaction price is attributed to underlying performance obligations in the contract and revenue is recognized as the entity satisfies the performance obligations and transfers control of a good or service to the customer. Incremental costs of obtaining a contract may be capitalized to the extent the entity expects to recover those costs. The guidance is effective for reporting periods

Edgar Filing: ALLSTATE CORP - Form 10-Q

beginning after December 15, 2016 and is to be applied retrospectively. The Company is in the process of evaluating the impact of adoption, which is not expected to be material to the Company's results of operations and financial position.

Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period

In June 2014, the FASB issued guidance which clarifies that a performance target that affects vesting and could be achieved after the requisite service period should be treated as a performance condition and should not be reflected in estimating the grant-date fair value of the award. Compensation costs should reflect the amount attributable to the periods for which the requisite service has been rendered. Total compensation expense recognized during and after the requisite service period (which may differ from the vesting period) should reflect the number of awards that are expected to vest and should be adjusted to reflect the number of awards that ultimately vest. The guidance is effective for reporting periods beginning after December 15, 2015 and may be applied either prospectively or retrospectively. The Company's existing accounting policy for performance targets that affect the vesting of share-based payment awards is consistent with the proposed guidance and as such the impact of adoption is not expected to affect the Company's results of operations or financial position.

2. Earnings per Common Share

Basic earnings per common share is computed using the weighted average number of common shares outstanding, including unvested participating restricted stock units. Diluted earnings per common share is computed using the weighted average number of common and dilutive potential common shares outstanding. For the Company, dilutive potential common shares consist of outstanding stock options and unvested non-participating restricted stock units and contingently issuable performance stock awards.

The computation of basic and diluted earnings per common share is presented in the following table.

(\$ in millions, except per share data)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Numerator:				
Net income	\$ 781	\$ 316	\$ 2,026	\$ 1,459
Less: Preferred stock dividends	31	6	75	6
Net income available to common shareholders	\$ 750	\$ 310	\$ 1,951	\$ 1,453
Denominator:				
Weighted average common shares outstanding	424.5	461.1	435.0	468.2
Effect of dilutive potential common shares:				
Stock options	4.8	4.2	4.7	3.9
Restricted stock units (non-participating) and performance stock awards	1.9	1.8	1.9	1.7
Weighted average common and dilutive potential common shares outstanding	431.2	467.1	441.6	473.8
Earnings per common share - Basic	\$ 1.77	\$ 0.67	\$ 4.49	\$ 3.10
Earnings per common share - Diluted	\$ 1.74	\$ 0.66	\$ 4.42	\$ 3.07

The effect of dilutive potential common shares does not include the effect of options with an anti-dilutive effect on earnings per common share because their exercise prices exceed the average market price of Allstate common shares during the period or for which the unrecognized compensation cost would have an anti-dilutive effect. Options to purchase 3.3 million and 8.4 million Allstate common shares, with exercise prices ranging from \$49.96 to \$62.42 and \$41.16 to \$62.42, were outstanding for the three-month periods ended September 30, 2014 and 2013, respectively, but were not included in the computation of diluted earnings per common share in those periods. Options to purchase 4.5 million and 13.0 million Allstate common shares, with exercise prices ranging from \$45.61 to \$62.42 and \$39.05 to \$62.42, were outstanding for the nine-month periods ended September 30, 2014 and 2013, respectively, but were not included in the computation of diluted earnings per common share in those periods.

3. Disposition

On April 1, 2014, the Company completed the sale of Lincoln Benefit Life Company (LBL), LBL's life insurance business generated through independent master brokerage agencies, and all of LBL's deferred fixed annuity and long-term care insurance business to Resolution Life Holdings, Inc. The gross sale price was \$797 million, representing \$596 million of cash and the retention of tax benefits. The loss on disposition increased by \$28 million, pre-tax, (\$29 million, after-tax) and \$100 million, pre-tax, (\$60 million, after-tax) in the three months and nine months ended September 30, 2014, respectively. The loss on disposition in the three months ended September 30, 2014 included the finalization of certain tax balances and other adjustments. The loss on disposition in the nine months ended September 30, 2014 included a \$22 million, pre-tax, reduction in goodwill.

In conjunction with the sale, the Company was required to establish a trust relating to the business that LBL continues to cede to ALIC. This trust is required to have assets greater than or equal to the statutory reserves ceded by LBL to ALIC, measured on a monthly basis. As of September 30, 2014, the trust holds \$5.08 billion of investments, which are reported in the statement of financial position.

The following table summarizes the assets and liabilities classified as held for sale as of December 31, 2013.

(\$ in millions)

Assets

Investments		
Fixed income securities	\$	10,167
Mortgage loans		1,367
Short-term investments		160
Other investments		289
Total investments		11,983
Cash		--
Deferred policy acquisition costs		743
Reinsurance recoverables, net		1,660
Accrued investment income		109
Other assets		79
Separate Accounts		1,701
Assets held for sale		16,275
Less: Loss accrual		(682)
Total assets held for sale	\$	15,593

Liabilities

Unearned premiums		12
Deferred income taxes		151
Other liabilities and accrued expenses		196
Separate Accounts		1,701
Total liabilities held for sale	\$	14,899

Included in shareholders' equity was \$85 million of accumulated other comprehensive income related to assets held for sale as of December 31, 2013.

4. Supplemental Cash Flow Information

Non-cash modifications of certain mortgage loans, fixed income securities, limited partnership interests and other investments, as well as mergers completed with equity securities, totaled \$105 million and \$271 million for the nine months ended September 30, 2014 and 2013, respectively. Non-cash financing activities include \$46 million and \$93 million related to the issuance of Allstate common shares for vested restricted stock units for the nine months ended September 30, 2014 and 2013, respectively.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Liabilities for collateral received in conjunction with the Company's securities lending program and over-the-counter (OTC) and cleared derivatives are reported in other liabilities and accrued expenses or other investments. The accompanying cash flows are included in cash flows from operating activities in the Condensed Consolidated Statements of Cash Flows along with the activities resulting from management of the proceeds, which are as follows:

(\$ in millions)	Nine months ended September 30,			
	2014		2013	
Net change in proceeds managed				
Net change in short-term investments	\$	(162)	\$	156

-------------------------------	----	--------	----	-------	----	-------	----	--------

Scheduled maturities

The scheduled maturities for fixed income securities are as follows as of September 30, 2014:

(\$ in millions)	Amortized cost	Fair value
Due in one year or less	\$ 3,440	\$ 3,482
Due after one year through five years	25,684	26,410
Due after five years through ten years	15,629	16,319
Due after ten years	8,354	9,423
	53,107	55,634
ABS, RMBS and CMBS	6,509	6,679
Total	\$ 59,616	\$ 62,313

Actual maturities may differ from those scheduled as a result of calls and make-whole payments by the issuers. ABS, RMBS and CMBS are shown separately because of the potential for prepayment of principal prior to contractual maturity dates.

Net investment income

Net investment income is as follows:

(\$ in millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013

Total	\$	(132)	\$	(183)

Rollforwards of the cumulative credit losses recognized in earnings for fixed income securities held as of the end of the period are as follows:

(\$ in millions)	Three months ended September 30,		Nine months ended September 30,					
	2014	2013	2014	2013				
Beginning balance	\$	(424)	\$	(564)	\$	(513)	\$	(617)
Additional credit loss for securities previously other-than-temporarily impaired		(1)		(6)		(2)		(30)
Additional credit loss for securities not previously other-than-temporarily impaired		(5)		(2)		(8)		(19)
Reduction in credit loss for securities disposed or collected		28		43		61		136
Reduction in credit loss for securities the Company has made the decision to sell or more likely than not will be required to sell		--		--		--		--
Change in credit loss due to accretion of increase in cash flows		1		--		2		1
Reduction in credit loss for securities sold in LBL disposition		--		--		59		--
Ending balance	\$	(401)	\$	(529)	\$	(401)	\$	(529)

The Company uses its best estimate of future cash flows expected to be collected from the fixed income security, discounted at the security's original or current effective rate, as appropriate, to calculate a recovery value and determine whether a credit loss exists. The determination of cash flow estimates is inherently subjective and methodologies may vary depending on facts and circumstances specific to the security. All reasonably available information relevant to the collectability of the security, including past events, current conditions, and reasonable and supportable assumptions and forecasts, are considered when developing the estimate of cash flows expected to be collected. That information generally includes, but is not limited to, the remaining payment terms of the security, prepayment speeds, foreign exchange rates, the financial condition and future earnings potential of the issue or issuer, expected defaults, expected recoveries, the value of underlying collateral, vintage, geographic concentration, available reserves or escrows, current subordination levels, third party guarantees and other credit enhancements. Other information, such as industry analyst reports and forecasts, sector credit ratings, financial condition of the bond insurer for insured fixed income securities, and other market data relevant to the realizability of contractual cash flows, may also be considered. The estimated fair value of collateral will be used to estimate recovery value if the Company determines that the security is dependent on the liquidation of collateral for ultimate settlement. If the estimated recovery value is less than the amortized cost of the security, a credit loss exists and an other-than-temporary impairment for the difference between the estimated recovery value and amortized cost is recorded in earnings. The portion of the unrealized loss related to factors other than credit remains classified in accumulated other comprehensive income. If the Company determines that the fixed income security does not have sufficient cash flow or other information to estimate a recovery value for the security, the Company may conclude that the entire decline in fair value is deemed to be credit related and the loss is recorded in earnings.

Unrealized net capital gains and losses

Unrealized net capital gains and losses included in accumulated other comprehensive income are as follows:

(\$ in millions)	Fair value	Gross unrealized		Unrealized net gains (losses)
September 30, 2014		Gains	Losses	
Fixed income securities	\$ 62,313	\$ 2,962	\$ (265)	\$ 2,697
Equity securities	4,335	477	(19)	458
Short-term investments	2,463	--	--	--
Derivative instruments (1)	(4)	1	(9)	(8)
Equity method (EMA) limited partnerships				(5)
Unrealized net capital gains and losses, pre-tax				3,142
Amounts recognized for:				
Insurance reserves (3)				(169)
DAC and DSI (4)				(158)
Amounts recognized				(327)
Deferred income taxes				(988)
Unrealized net capital gains and losses, after-tax				\$ 1,827

(1) Included in the fair value of derivative instruments are \$1 million classified as assets and \$5 million classified as liabilities.

(2) Unrealized net capital gains and losses for limited partnership interests represent the Company's share of EMA limited partnerships' other comprehensive income. Fair value and gross unrealized gains and losses are not applicable.

(3) The insurance reserves adjustment represents the amount by which the reserve balance would increase if the net unrealized gains in the applicable product portfolios were realized and reinvested at current lower interest rates, resulting in a premium deficiency. Although the Company evaluates premium deficiencies on the combined performance of life insurance and immediate annuities with life contingencies, the adjustment primarily relates to structured settlement annuities with life contingencies, in addition to annuity buy-outs and certain payout annuities with life contingencies.

(4) The DAC and DSI adjustment balance represents the amount by which the amortization of DAC and DSI would increase or decrease if the unrealized gains or losses in the respective product portfolios were realized.

(\$ in millions)	Fair value	Gross unrealized		Unrealized net gains (losses)

(1) Included in the fair value of derivative instruments are \$1 million classified as assets and \$14 million classified as liabilities.

Change in unrealized net capital gains and losses

The change in unrealized net capital gains and losses for the nine months ended September 30, 2014 is as follows:

(\$ in millions)	
Fixed income securities	\$ 795
Equity securities	(166)
Derivative instruments	10
EMA limited partnerships	(2)
Investments classified as held for sale	(190)
Total	447
Amounts recognized for:	
Insurance reserves	(169)
DAC and DSI	--
Amounts recognized	(169)
Deferred income taxes	(97)
Increase in unrealized net capital gains and losses, after-tax	\$ 181

Portfolio monitoring

The Company has a comprehensive portfolio monitoring process to identify and evaluate each fixed income and equity security whose carrying value may be other-than-temporarily impaired.

For each fixed income security in an unrealized loss position, the Company assesses whether management with the appropriate authority has made the decision to sell or whether it is more likely than not the Company will be required to sell the security before recovery of the amortized cost basis for reasons such as liquidity, contractual or regulatory purposes. If a security meets either of these criteria, the security's decline in fair value is considered other than temporary and is recorded in earnings.

If the Company has not made the decision to sell the fixed income security and it is not more likely than not the Company will be required to sell the fixed income security before recovery of its amortized cost basis, the Company evaluates whether it expects to receive cash flows sufficient to recover the entire amortized cost basis of the security. The Company calculates the estimated recovery value by discounting the best estimate of future cash flows at the security's original or current effective rate, as appropriate, and compares this to the amortized cost of the security. If the Company does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the fixed income security, the credit loss component of the impairment is recorded in earnings, with the remaining amount of the unrealized loss related to other factors recognized in other comprehensive income.

For equity securities, the Company considers various factors, including whether it has the intent and ability to hold the equity security for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is extended, the equity security's decline in fair value is considered other than temporary and is recorded in earnings.

Edgar Filing: ALLSTATE CORP - Form 10-Q

For fixed income and equity securities managed by third parties, either the Company has contractually retained its decision making authority as it pertains to selling securities that are in an unrealized loss position or it recognizes any unrealized loss at the end of the period through a charge to earnings.

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for fixed income securities) or cost (for equity securities) is below established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential other-than-temporary impairment using all reasonably available information relevant to the collectability or recovery of the security. Inherent in the Company's evaluation of other-than-temporary impairment for these fixed income and equity securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors that may be considered in evaluating whether a decline in fair value is other than temporary are: 1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; 2)

Edgar Filing: ALLSTATE CORP - Form 10-Q

the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and 3) the length of time and extent to which the fair value has been less than amortized cost or cost.

The following table summarizes the gross unrealized losses and fair value of fixed income and equity securities by the length of time that individual securities have been in a continuous unrealized loss position.

(\$ in millions)	Less than 12 months			12 months or more			Total unrealized losses

As of September 30, 2014, \$237 million of unrealized losses are related to securities with an unrealized loss position less than 20% of amortized cost or cost, the degree of which suggests that these securities do not pose a high risk of being other-than-temporarily impaired. Of the \$237 million, \$128 million are related to unrealized losses on investment grade fixed income securities. Investment grade is defined as a security having a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from Standards and Poor's (S&P), Fitch, Dominion, Kroll or Realpoint, a rating of aaa, aa, a or bbb from A.M. Best, or a comparable internal rating if an externally provided rating is not available. Unrealized losses on investment grade securities are principally related to increasing risk-free interest rates or widening credit spreads since the time of initial purchase.

As of September 30, 2014, the remaining \$47 million of unrealized losses are related to securities in unrealized loss positions greater than or equal to 20% of amortized cost or cost. Investment grade fixed income securities comprising \$24 million of these unrealized losses were evaluated based on factors such as discounted cash flows and the financial condition and near-term and long-term prospects of the issue or issuer and were determined to have adequate resources to fulfill contractual obligations. Of the \$47 million, \$22 million are related to below investment grade fixed income securities and \$1 million are related to equity securities. Of these amounts, \$11 million are related to below investment grade fixed income securities that had been in an unrealized loss position greater than or equal to 20% of amortized cost for a period of twelve or more consecutive months as of September 30, 2014.

ABS, RMBS and CMBS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities positions in the respective securitization trusts, security specific expectations of cash flows, and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of (i) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, (ii) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread, and (iii) for ABS and RMBS in an unrealized loss position, credit enhancements from reliable bond insurers, where applicable. Municipal bonds in an unrealized loss position were evaluated based on the quality of the underlying assets. Unrealized losses on equity securities are primarily related to temporary equity market fluctuations of securities that are expected to recover.

As of September 30, 2014, the Company has not made the decision to sell and it is not more likely than not the Company will be required to sell fixed income securities with unrealized losses before recovery of the amortized cost basis. As of September 30, 2014, the Company had the intent and ability to hold equity securities with unrealized losses for a period of time sufficient for them to recover.

Limited partnerships

As of September 30, 2014 and December 31, 2013, the carrying value of equity method limited partnerships totaled \$3.20 billion and \$3.52 billion, respectively. The Company recognizes an impairment loss for equity method limited partnerships when evidence demonstrates that the loss is other than temporary. Evidence of a loss in value that is other than temporary may include the absence of an ability to recover the carrying amount of the investment or the inability of the investee to sustain a level of earnings that would justify the carrying amount of the investment.

As of September 30, 2014 and December 31, 2013, the carrying value for cost method limited partnerships was \$1.14 billion and \$1.44 billion, respectively. To determine if an other-than-temporary impairment has occurred, the Company evaluates whether an impairment indicator has occurred in the period that may have a significant adverse effect on the carrying value of the investment. Impairment indicators may include: significantly reduced valuations of the investments held by the limited partnerships; actual recent cash flows received being significantly less than expected cash flows; reduced valuations based on financing completed at a lower value; completed sale of a material underlying investment at a price significantly lower than expected; or any other adverse events since the last financial statements received that might affect the fair value of the investee's capital. Additionally, the Company's portfolio monitoring process includes a quarterly review of all cost method limited partnerships to identify instances where the net asset value is below established thresholds for certain periods of time, as well as investments that are performing below expectations, for further impairment consideration. If a cost method limited partnership is other-than-temporarily impaired, the carrying value is written down to fair value, generally estimated to be equivalent to the reported net asset value of the underlying funds.

Tax credit funds were reclassified from limited partnership interests to other assets as of June 30, 2014 since the return on these funds is in the form of tax credits rather than investment income. These tax credit funds totaled \$576 million as of September 30, 2014.

Mortgage loans

Mortgage loans are evaluated for impairment on a specific loan basis through a quarterly credit monitoring process and review of key credit quality indicators. Mortgage loans are considered impaired when it is probable that the Company will not collect the contractual principal and interest. Valuation allowances are established for impaired loans to reduce the carrying value to the fair value of the collateral less costs to sell or the present value of the loan's expected future repayment cash flows discounted at the loan's original effective interest rate. Impaired mortgage

Edgar Filing: ALLSTATE CORP - Form 10-Q

loans may not have a valuation allowance when the fair value of the collateral less costs to sell is higher than the carrying value. Valuation allowances are adjusted for subsequent changes in the fair value of the collateral less costs to sell. Mortgage loans are charged off against their corresponding valuation allowances when there is no reasonable expectation of recovery. The impairment evaluation is non-statistical in respect to the aggregate portfolio but considers facts and circumstances attributable to each loan. It is not considered probable that additional impairment losses, beyond those identified on a specific loan basis, have been incurred as of September 30, 2014.

Accrual of income is suspended for mortgage loans that are in default or when full and timely collection of principal and interest payments is not probable. Cash receipts on mortgage loans on nonaccrual status are generally recorded as a reduction of carrying value.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Debt service coverage ratio is considered a key credit quality indicator when mortgage loans are evaluated for impairment. Debt service coverage ratio represents the amount of estimated cash flows from the property available to the borrower to meet principal and interest payment obligations. Debt service coverage ratio estimates are updated annually or more frequently if conditions are warranted based on the Company's credit monitoring process.

The following table reflects the carrying value of non-impaired fixed rate and variable rate mortgage loans summarized by debt service coverage ratio distribution.

(\$ in millions)	September 30, 2014			December 31, 2013		
	Fixed rate mortgage loans	Variable rate mortgage loans	Total	Fixed rate mortgage loans	Variable rate mortgage loans	Total
Debt service coverage ratio distribution						
Below 1.0	\$ 186	\$ --	\$ 186	\$ 153	\$ --	\$ 153
1.0 - 1.25	379	--	379	613	--	613
1.26 - 1.50	1,241	2	1,243	1,233	2	1,235
Above 1.50	2,304	21	2,325	2,562	77	2,639
Total non-impaired mortgage loans	\$ 4,110	\$ 23	\$ 4,133	\$ 4,561	\$ 79	\$ 4,640

Mortgage loans with a debt service coverage ratio below 1.0 that are not considered impaired primarily relate to instances where the borrower has the financial capacity to fund the revenue shortfalls from the properties for the foreseeable term, the decrease in cash flows from the properties is considered temporary, or there are other risk mitigating circumstances such as additional collateral, escrow balances or borrower guarantees.

The net carrying value of impaired mortgage loans is as follows:

(\$ in millions)	September 30, 2014	December 31, 2013
Impaired mortgage loans with a valuation allowance	\$ 10	\$ 81
Impaired mortgage loans without a valuation allowance	--	--
Total impaired mortgage loans	\$ 10	\$ 81
Valuation allowance on impaired mortgage loans	\$ 7	\$ 21

The average balance of impaired loans was \$30 million and \$90 million for the nine months ended September 30, 2014 and 2013, respectively.

The rollforward of the valuation allowance on impaired mortgage loans is as follows:

(\$ in millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013

Edgar Filing: ALLSTATE CORP - Form 10-Q

Beginning balance	\$	9	\$	21	\$	21	\$	42
Net (decrease) increase in valuation allowance		(2)		6		(6)		(11)
Charge offs		--		--		(8)		(4)
Mortgage loans classified as held for sale		--		(2)		--		(2)
Ending balance	\$	7	\$	25	\$	7	\$	25

Payments on all mortgage loans were current as of September 30, 2014 and December 31, 2013.

6. Fair Value of Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Assets and liabilities recorded on the Condensed Consolidated Statements of Financial Position at fair value are categorized in the fair value hierarchy based on the observability of inputs to the valuation techniques as follows:

Level 1: Assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2: Assets and liabilities whose values are based on the following:

- (a) Quoted prices for similar assets or liabilities in active markets;
- (b) Quoted prices for identical or similar assets or liabilities in markets that are not active; or
- (c) Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of the assumptions that market participants would use in valuing the assets and liabilities.

The availability of observable inputs varies by instrument. In situations where fair value is based on internally developed pricing models or inputs that are unobservable in the market, the determination of fair value requires more judgment. The degree of judgment exercised by the Company in determining fair value is typically greatest for instruments categorized in Level 3. In many instances, valuation inputs used to measure fair value fall into different levels of the fair value hierarchy. The category level in the fair value hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company uses prices and inputs that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments.

The Company is responsible for the determination of fair value and the supporting assumptions and methodologies. The Company gains assurance that assets and liabilities are appropriately valued through the execution of various processes and controls designed to ensure the overall reasonableness and consistent application of valuation methodologies, including inputs and assumptions, and compliance with accounting standards. For fair values received from third parties or internally estimated, the Company's processes and controls are designed to ensure that the valuation methodologies are appropriate and consistently applied, the inputs and assumptions are reasonable and consistent with the objective of determining fair value, and the fair values are accurately recorded. For example, on a continuing basis, the Company assesses the reasonableness of individual fair values that have stale security prices or that exceed certain thresholds as compared to previous fair values received from valuation service providers or brokers or derived from internal models. The Company performs procedures to understand and assess the methodologies, processes and controls of valuation service providers. In addition, the Company may validate the reasonableness of fair values by comparing information obtained from valuation service providers or brokers to other third party valuation sources for selected securities. The Company performs ongoing price validation procedures such as back-testing of actual sales, which corroborate the various inputs used in internal models to market observable data. When fair value determinations are expected to be more variable, the Company validates them through reviews by members of management who have relevant expertise and who are independent of those charged with executing investment transactions.

The Company has two types of situations where investments are classified as Level 3 in the fair value hierarchy. The first is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The second situation where the Company classifies securities in Level 3 is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs.

Certain assets are not carried at fair value on a recurring basis, including investments such as mortgage loans, limited partnership interests, bank loans and policy loans. Accordingly, such investments are only included in the fair value hierarchy disclosure when the investment is subject to remeasurement at fair value after initial recognition and the resulting remeasurement is reflected in the condensed consolidated financial statements. In addition,

derivatives embedded in fixed income securities are not disclosed in the hierarchy as free-standing derivatives since they are presented with the host contracts in fixed income securities.

In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Summary of significant valuation techniques for assets and liabilities measured at fair value on a recurring basis

Level 1 measurements

- Fixed income securities: Comprise certain U.S. Treasury fixed income securities. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.
- Equity securities: Comprise actively traded, exchange-listed equity securities. Valuation is based on unadjusted quoted prices for identical assets in active markets that the Company can access.
- Short-term: Comprise actively traded money market funds that have daily quoted net asset values for identical assets that the Company can access.
- Separate account assets: Comprise actively traded mutual funds that have daily quoted net asset values for identical assets that the Company can access. Net asset values for the actively traded mutual funds in which the separate account assets are invested are obtained daily from the fund managers.
- Assets held for sale: Comprise U.S. Treasury fixed income securities, short-term investments and separate account assets. The valuation is based on the respective asset type as described above.

Level 2 measurements

- Fixed income securities:

Edgar Filing: ALLSTATE CORP - Form 10-Q

U.S. government and agencies: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Municipal: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

Corporate, including privately placed: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Also included are privately placed securities valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Foreign government: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

ABS and RMBS: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

CMBS: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads.

Redeemable preferred stock: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

- Equity securities: The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Edgar Filing: ALLSTATE CORP - Form 10-Q

- Short-term: The primary inputs to the valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. For certain short-term investments, amortized cost is used as the best estimate of fair value.
- Other investments: Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active.

OTC derivatives, including interest rate swaps, foreign currency swaps, foreign exchange forward contracts, certain options and certain credit default swaps, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

- Assets held for sale: Comprise U.S. government and agencies, municipal, corporate, foreign government, ABS, RMBS and CMBS fixed income securities, and short-term investments. The valuation is based on the respective asset type as described above.

Level 3 measurements

- Fixed income securities:

Municipal: Comprise municipal bonds that are not rated by third party credit rating agencies but are rated by the National Association of Insurance Commissioners (NAIC). The primary inputs to the valuation of these municipal bonds include quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. Also included are municipal bonds valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Also includes auction rate securities (ARS) primarily backed by student loans that have become illiquid due to failures in the auction market and are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, including the anticipated date liquidity will return to the market.

Corporate, including privately placed: Primarily valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Also included are equity-indexed notes which are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses significant non-market observable inputs, such as volatility. Other inputs include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

ABS, RMBS and CMBS: Valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

- Equity securities: The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements.

Edgar Filing: ALLSTATE CORP - Form 10-Q

- Other investments: Certain OTC derivatives, such as interest rate caps, certain credit default swaps and certain options (including swaptions), are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.
- Assets held for sale: Comprise municipal, corporate, ABS and CMBS fixed income securities. The valuation is based on the respective asset type as described above.
- Contractholder funds: Derivatives embedded in certain life and annuity contracts are valued internally using models widely accepted in the financial services industry that determine a single best estimate of fair value for the embedded derivatives within a block of contractholder liabilities. The models primarily use stochastically determined cash flows based on the contractual elements of embedded derivatives, projected option cost and applicable market data, such as interest rate yield curves and equity index volatility assumptions. These are categorized as Level 3 as a result of the significance of non-market observable inputs.
- Liabilities held for sale: Comprise derivatives embedded in life and annuity contracts. The valuation is the same as described above for contractholder funds.

Assets and liabilities measured at fair value on a non-recurring basis

Mortgage loans written-down to fair value in connection with recognizing impairments are valued based on the fair value of the underlying collateral less costs to sell. Limited partnership interests written-down to fair value in connection with recognizing other-than-temporary impairments are valued using net asset values. The carrying value of the LBL business was written-down to fair value in connection with being classified as held for sale.

The following table summarizes the Company's assets and liabilities measured at fair value on a recurring and non-recurring basis as of September 30, 2014.

(\$ in millions)	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Counterparty and cash collateral netting	Balance as of September 30, 2014
Assets

Total liabilities at fair value	\$ --	\$ (194)	\$ (11,655)	11 \$	(11,838)
% of total liabilities at fair value	-- %	1.6 %	98.5 %	(0.1) %	100.0 %

(1) Includes \$8 million of mortgage loans and \$16 million of limited partnership interests written-down to fair value in connection with recognizing other-than-temporary impairments.

(2) Relates to LBL business held for sale (see Note 3). The total fair value measurement includes \$15,593 million of assets held for sale and \$(14,899) million of liabilities held for sale, less \$12,028 million of assets and \$(246) million of liabilities measured at fair value on a recurring basis.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table summarizes quantitative information about the significant unobservable inputs used in Level 3 fair value measurements.

(\$ in millions)	Fair value		Valuation technique	Unobservable input	Range	Weighted average
September 30, 2014						
Derivatives embedded in life and annuity contracts	\$	(269)	Stochastic cash flow model	Projected option cost	1.0 - 2.0 %	1.76 %
Equity-indexed and forward starting options						
December 31, 2013						
Derivatives embedded in life and annuity contracts	\$	(247)	Stochastic cash flow model	Projected option cost	1.0 - 2.0 %	1.75%
Equity-indexed and forward starting options						
Liabilities held for sale	\$	(246)	Stochastic cash flow model	Projected option cost	1.0 - 2.0 %	1.91%
Equity-indexed and forward starting options						

If the projected option cost increased (decreased), it would result in a higher (lower) liability fair value.

As of September 30, 2014 and December 31, 2013, Level 3 fair value measurements include \$1.12 billion and \$1.27 billion, respectively, of fixed income securities valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable and \$182 million and \$208 million, respectively, of municipal fixed income securities that are not rated by third party credit rating agencies. As of December 31, 2013, Level 3 fair value measurements for assets held for sale include \$319 million of fixed income securities valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. The Company does not develop the unobservable inputs used in measuring fair value; therefore, these are not included in the table above. However, an increase (decrease) in credit spreads for fixed income securities valued based on non-binding broker quotes would result in a lower (higher) fair value, and an increase (decrease) in the credit rating of municipal bonds that are not rated by third party credit rating agencies would result in a higher (lower) fair value.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table presents the rollforward of Level 3 assets and liabilities held at fair value on a recurring basis during the three months ended September 30, 2014.

(1) The effect to net income totals \$110 million and is reported in the Condensed Consolidated Statements of Operations as follows: \$(1) million in realized capital gains and losses, \$15 million in net investment income, \$40 million in interest credited to contractholder funds and \$56 million in life and annuity contract benefits.

(2) Represents purchases for assets and issues for liabilities.

(3) Comprises \$6 million of assets and \$16 million of liabilities.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's independent third-party valuation service provider and as a result the price is stale or has been replaced with a broker quote whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred. Therefore, for all transfers into Level 3, all realized and changes in unrealized gains and losses in the quarter of transfer are reflected in the Level 3 rollforward table.

There were no transfers between Level 1 and Level 2 during the three months and nine months ended September 30, 2014 or 2013.

Transfers into Level 3 during the three months and nine months ended September 30, 2014 and 2013 included situations where a fair value quote was not provided by the Company's independent third-party valuation service provider and as a result the price was stale or had been replaced with a broker quote where the inputs had not been corroborated to be market observable resulting in the security being classified as Level 3. Transfers out of Level 3 during the three months and nine months ended September 30, 2014 and 2013 included situations where a broker quote was used in the prior period and a fair value quote became available from the Company's independent third-party valuation service provider in the current period. A quote utilizing the new pricing source was not available as of the prior period, and any gains or losses related to the change in valuation source for individual securities were not significant.

The following table provides the change in unrealized gains and losses included in net income for Level 3 assets and liabilities held as of September 30.

(\$ in millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013

Liabilities held for sale	--	16	17	16
Total recurring Level 3 liabilities	\$ 9	\$ 24	\$ 12	\$ 93

The amounts in the table above represent the change in unrealized gains and losses included in net income for the period of time that the asset or liability was determined to be in Level 3. These gains and losses total \$8 million for the three months ended September 30, 2014 and are reported as follows: \$(3) million in realized capital gains and losses, \$2 million in net investment income, \$5 million in interest credited to contractholder funds and \$4 million in life and annuity contract benefits. These gains and losses total \$18 million for the three months ended September 30, 2013 and are reported as follows: \$(8) million in realized capital gains and losses, \$2 million in net investment income, \$14

Edgar Filing: ALLSTATE CORP - Form 10-Q

million in interest credited to contractholder funds and \$10 million in life and annuity contract benefits. These gains and losses total \$16 million for the nine months ended September 30, 2014 and are reported as follows: \$(3) million in realized capital gains and losses, \$6 million in net investment income, \$5 million in interest credited to contractholder funds and \$8 million in life and annuity contract benefits. These gains and

losses total \$90 million for the nine months ended September 30, 2013 and are reported as follows: \$(12) million in realized capital gains and losses, \$9 million in net investment income, \$37 million in interest credited to contractholder funds and \$56 million in life and annuity contract benefits.

Presented below are the carrying values and fair value estimates of financial instruments not carried at fair value.

Financial assets

(\$ in millions)	September 30, 2014		December 31, 2013	
	Carrying value	Fair value	Carrying value	Fair value

--	--	--	--	--

The fair value of mortgage loans, including those classified as assets held for sale, is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral. The fair value of cost method limited partnerships is determined using reported net asset values of the underlying funds. The fair value of bank loans, which are reported in other investments or assets held for sale, is based on broker quotes from brokers familiar with the loans and current market conditions. The fair value of agent loans, which are reported in other investments, is based on discounted cash flow calculations that use discount rates with a spread over U.S. Treasury rates. Assumptions used in developing estimated cash flows and discount rates consider the loan's credit and liquidity risks. The fair value measurements for mortgage loans, cost method limited partnerships, bank loans, agent loans and assets held for sale are categorized as Level 3.

Financial liabilities

(\$ in millions)	September 30, 2014		December 31, 2013	
	Carrying value	Fair value	Carrying value	Fair value

--	--	--	--	--

The fair value of contractholder funds on investment contracts, including those classified as liabilities held for sale, is based on the terms of the underlying contracts utilizing prevailing market rates for similar contracts adjusted for the Company's own credit risk. Deferred annuities included in contractholder funds are valued using discounted cash flow models that incorporate market value margins, which are based on the cost of holding economic capital, and the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using market implied interest rates which include the Company's own credit risk. The fair value measurements for contractholder funds on investment contracts and liabilities held for sale are categorized as Level 3.

The fair value of long-term debt is based on market observable data (such as the fair value of the debt when traded as an asset) or, in certain cases, is determined using discounted cash flow calculations based on current interest rates for instruments with comparable terms and considers the Company's own credit risk. The liability for collateral is valued at carrying value due to its short-term nature. The fair value measurements for long-term debt and liability for collateral are categorized as Level 2.

7. Derivative Financial Instruments

The Company uses derivatives to manage risks with certain assets and liabilities arising from the potential adverse impacts from changes in risk-free interest rates, changes in equity market valuations, increases in credit spreads and foreign currency fluctuations, and for asset replication. The Company does not use derivatives for speculative purposes.

Property-Liability uses interest rate swaps, swaptions, futures and options to manage the interest rate risks of existing investments. Portfolio duration management is a risk management strategy that is principally employed by Property-Liability wherein financial futures and interest rate swaps are utilized to change the duration of the portfolio in order to offset the economic effect that interest rates would otherwise have on the fair value of its fixed income securities. Equity index futures and options are used by Property-Liability to offset valuation losses in the equity portfolio during periods of declining equity market values. Credit default swaps are typically used to mitigate the credit risk within the Property-Liability fixed income portfolio. Property-Liability uses equity futures to hedge the market risk related to deferred compensation liability contracts and forward contracts to hedge foreign currency risk associated with holding foreign currency denominated investments and foreign operations.

Asset-liability management is a risk management strategy that is principally employed by Allstate Financial to balance the respective interest-rate sensitivities of its assets and liabilities. Depending upon the attributes of the assets acquired and liabilities issued, derivative instruments such as interest rate swaps, caps, swaptions and futures are utilized to change the interest rate characteristics of existing assets and liabilities to ensure the relationship is maintained within specified ranges and to reduce exposure to rising or falling interest rates. Allstate Financial uses financial futures and interest rate swaps to hedge anticipated asset purchases and liability issuances and futures and options for hedging the equity exposure contained in its equity indexed life and annuity product contracts that offer equity returns to contractholders. In addition, Allstate Financial uses interest rate swaps to hedge interest rate risk inherent in funding agreements. Allstate Financial uses foreign currency swaps and forwards primarily to reduce the foreign currency risk associated with issuing foreign currency denominated funding agreements and holding foreign currency denominated investments. Credit default swaps are typically used to mitigate the credit risk within the Allstate Financial fixed income portfolio.

The Company may also use derivatives to manage the risk associated with corporate actions, including the sale of a business. During 2014 and December 2013, swaptions were utilized to hedge the expected proceeds from the disposition of LBL.

Asset replication refers to the synthetic creation of assets through the use of derivatives and primarily investment grade host bonds to replicate securities that are either unavailable in the cash markets or more economical to acquire in synthetic form. The Company replicates fixed income securities using a combination of a credit default swap and one or more highly rated fixed income securities to synthetically replicate the economic characteristics of one or more cash market securities.

The Company also has derivatives embedded in non-derivative host contracts that are required to be separated from the host contracts and accounted for at fair value with changes in fair value of embedded derivatives reported in net income. The Company's primary embedded derivatives are equity options in life and annuity product contracts, which provide equity returns to contractholders; equity-indexed notes containing equity call options, which provide a coupon payout that is determined using one or more equity-based indices; credit default swaps in synthetic collateralized debt obligations, which provide enhanced coupon rates as a result of selling credit protection; and conversion options in fixed income securities, which provide the Company with the right to convert the instrument into a predetermined number of shares of common stock.

Edgar Filing: ALLSTATE CORP - Form 10-Q

When derivatives meet specific criteria, they may be designated as accounting hedges and accounted for as fair value, cash flow, foreign currency fair value or foreign currency cash flow hedges. Allstate Financial designates certain of its interest rate and foreign currency swap contracts and certain investment risk transfer reinsurance agreements as fair value hedges when the hedging instrument is highly effective in offsetting the risk of changes in the fair value of the hedged item. Allstate Financial designates certain of its foreign currency swap contracts as cash flow hedges when the hedging instrument is highly effective in offsetting the exposure of variations in cash flows for the hedged risk that could affect net income. Amounts are reclassified to net investment income or realized capital gains and losses as the hedged item affects net income.

The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements.

However, the notional amounts specified in credit default swaps where the Company has sold credit protection represent the maximum amount of potential loss, assuming no recoveries.

Fair value, which is equal to the carrying value, is the estimated amount that the Company would receive or pay to terminate the derivative contracts at the reporting date. The carrying value amounts for OTC derivatives are further adjusted for the effects, if any, of enforceable master netting agreements and are presented on a net basis, by counterparty agreement, in the Condensed Consolidated Statements of Financial Position. For certain exchange traded and cleared derivatives, margin deposits are required as well as daily cash settlements of margin accounts. As of September 30, 2014, the Company pledged \$43 million of cash and securities in the form of margin deposits.

For those derivatives which qualify for fair value hedge accounting, net income includes the changes in the fair value of both the derivative instrument and the hedged risk, and therefore reflects any hedging ineffectiveness. For cash flow hedges, gains and losses are amortized from accumulated other comprehensive income and are reported in net income in the same period the forecasted transactions being hedged impact net income.

Non-hedge accounting is generally used for portfolio level hedging strategies where the terms of the individual hedged items do not meet the strict homogeneity requirements to permit the application of hedge accounting. For non-hedge derivatives, net income includes changes in fair value and accrued periodic settlements, when applicable. With the exception of non-hedge derivatives used for asset replication and non-hedge embedded derivatives, all of the Company's derivatives are evaluated for their ongoing effectiveness as either accounting hedge or non-hedge derivative financial instruments on at least a quarterly basis.

Edgar Filing: ALLSTATE CORP - Form 10-Q

The following table provides a summary of the volume and fair value positions of derivative instruments as well as their reporting location in the Condensed Consolidated Statement of Financial Position as of September 30, 2014.

The Company manages its exposure to credit risk by utilizing highly rated counterparties, establishing risk control limits, executing legally enforceable master netting agreements (MNAs) and obtaining collateral where appropriate. The Company uses MNAs for OTC derivative transactions that permit either party to net payments due for transactions and collateral is either pledged or obtained when certain predetermined exposure limits are exceeded. As of September 30, 2014, counterparties pledged \$4 million in cash and securities to the Company, and the Company pledged \$24 million in cash and securities to counterparties which includes \$6 million of collateral posted under MNAs for contracts containing credit-risk-contingent provisions that are in a liability position and \$18 million of collateral posted under MNAs for contracts without credit-risk-contingent liabilities. The Company has not incurred any losses on derivative financial instruments due to counterparty nonperformance. Other derivatives, including futures and certain option contracts, are traded on organized exchanges which require margin deposits and guarantee the execution of trades, thereby mitigating any potential credit risk.

Counterparty credit exposure represents the Company's potential loss if all of the counterparties concurrently fail to perform under the contractual terms of the contracts and all collateral, if any, becomes worthless. This exposure is measured by the fair value of OTC derivative contracts with a positive fair value at the reporting date reduced by the effect, if any, of legally enforceable master netting agreements.

The following table summarizes the counterparty credit exposure by counterparty credit rating as it relates to the Company's OTC derivatives.

Rating (1)	September 30, 2014				December 31, 2013			
	Number of counterparties	Notional amount	Credit exposure	Exposure, net of collateral	Number of counterparties	Notional amount	Credit exposure	Exposure, net of collateral
	(2)	(2)	(2)	(2)	(2)	(2)	(2)	(2)
A+	1	\$ 16	\$ --	\$ --	1	\$ 22	\$ 1	\$ 1
A	4	163	8	3	5	1,628	9	2
A-	1	8	1	1	1	24	1	--
BBB+	1	11	--	--	1	33	3	--
BBB	1	62	--	--	1	76	1	--
Total	8	\$ 260	\$ 9	\$ 4	9	\$ 1,783	\$ 15	\$ 3

(1) Rating is the lower of S&P or Moody's ratings.

Edgar Filing: ALLSTATE CORP - Form 10-Q

(2) Only OTC derivatives with a net positive fair value are included for each counterparty.

Market risk is the risk that the Company will incur losses due to adverse changes in market rates and prices. Market risk exists for all of the derivative financial instruments the Company currently holds, as these instruments may become less valuable due to adverse changes in market conditions. To limit this risk, the Company's senior management has established risk control limits. In addition, changes in fair value of the derivative financial instruments that the Company uses for risk management purposes are generally offset by the change in the fair value or cash flows of the hedged risk component of the related assets, liabilities or forecasted transactions.

Edgar Filing: ALLSTATE CORP - Form 10-Q

Certain of the Company's derivative instruments contain credit-risk-contingent termination events, cross-default provisions and credit support annex agreements. Credit-risk-contingent termination events allow the counterparties to terminate the derivative on certain dates if AIC's, ALIC's or Allstate Life Insurance Company of New York's (ALNY) financial strength credit ratings by Moody's or S&P fall below a certain level or in the event AIC, ALIC or ALNY are no longer rated by either Moody's or S&P. Credit-risk-contingent cross-default provisions allow the counterparties to terminate the derivative instruments if the Company defaults by pre-determined threshold amounts on certain debt instruments. Credit-risk-contingent credit support annex agreements specify the amount of collateral the Company must post to counterparties based on AIC's, ALIC's or ALNY's financial strength credit ratings by Moody's or S&P, or in the event AIC, ALIC or ALNY are no longer rated by either Moody's or S&P.

The following summarizes the fair value of derivative instruments with termination, cross-default or collateral credit-risk-contingent features that are in a liability position, as well as the fair value of assets and collateral that are netted against the liability in accordance with provisions within legally enforceable MNAs.

(\$ in millions)		September 30,	December 31,
		2014	2013
Gross liability fair value of contracts containing credit-risk-contingent features	\$	16	\$ 28
Gross asset fair value of contracts containing credit-risk-contingent features and subject to MNAs		(6)	(11)
Collateral posted under MNAs for contracts containing credit-risk-contingent features		(6)	(14)
Maximum amount of additional exposure for contracts with credit-risk-contingent features if all features were triggered concurrently	\$	4	\$ 3

Credit derivatives - selling protection

Free-standing credit default swaps (CDS) are utilized for selling credit protection against a specified credit event. A credit default swap is a derivative instrument, representing an agreement between two parties to exchange the credit risk of a specified entity (or a group of entities), or an index based on the credit risk of a group of entities (all commonly referred to as the reference entity or a portfolio of reference entities), in return for a periodic premium. In selling protection, CDS are used to replicate fixed income securities and to complement the cash market when credit exposure to certain issuers is not available or when the derivative alternative is less expensive than the cash market alternative. CDS typically have a five-year term.

The following table shows the CDS notional amounts by credit rating and fair value of protection sold.

(\$ in millions)	Notional amount					Total	Fair value
	AA	A	BBB	BB and lower			
September 30, 2014

First-to-default Basket

Municipal	--	100	--	--	100	(15)
Index						
Corporate debt	1	20	55	4	80	2
Total	\$ 21	\$ 145	\$ 120	\$ 4	\$ 290	(11)

In selling protection with CDS, the Company sells credit protection on an identified single name, a basket of names in a first-to-default (FTD) structure or credit derivative index (CDX) that is generally investment grade, and in return receives periodic premiums through expiration or termination of the agreement. With single name CDS, this premium or credit spread generally corresponds to the difference between the yield on the reference entity's public fixed maturity cash instruments and swap rates at the time the agreement is executed. With a FTD

basket, because of the additional credit risk inherent in a basket of named reference entities, the premium generally corresponds to a high proportion of the sum of the credit spreads of the names in the basket and the correlation between the names. CDX is utilized to take a position on multiple (generally 125) reference entities. Credit events are typically defined as bankruptcy, failure to pay, or restructuring, depending on the nature of the reference entities. If a credit event occurs, the Company settles with the counterparty, either through physical settlement or cash settlement. In a physical settlement, a reference asset is delivered by the buyer of protection to the Company, in exchange for cash payment at par, whereas in a cash settlement, the Company pays the difference between par and the prescribed value of the reference asset. When a credit event occurs in a single name or FTD basket (for FTD, the first credit event occurring for any one name in the basket), the contract terminates at the time of settlement. For CDX, the reference entity's name incurring the credit event is removed from the index while the contract continues until expiration. The maximum payout on a CDS is the contract notional amount. A physical settlement may afford the Company with recovery rights as the new owner of the asset.

The Company monitors risk associated with credit derivatives through individual name credit limits at both a credit derivative and a combined cash instrument/credit derivative level. The ratings of individual names for which protection has been sold are also monitored.

In addition to the CDS described above, the Company's synthetic collateralized debt obligations contain embedded credit default swaps which sell protection on a basket of reference entities. The synthetic collateralized debt obligations are fully funded; therefore, the Company is not obligated to contribute additional funds when credit events occur related to the reference entities named in the embedded credit default swaps. The Company's maximum amount at risk equals the amount of its aggregate initial investment in the synthetic collateralized debt obligations.

8. Reserve for Property-Liability Insurance Claims and Claims Expense

The Company establishes reserves for claims and claims expense on reported and unreported claims of insured losses. The Company's reserving process takes into account known facts and interpretations of circumstances and factors including the Company's experience with similar cases, actual claims paid, historical trends involving claim payment patterns and pending levels of unpaid claims, loss management programs, product mix and contractual terms, changes in law and regulation, judicial decisions, and economic conditions. In the normal course of business, the Company may also supplement its claims processes by utilizing third party adjusters, appraisers, engineers, inspectors, and other professionals and information sources to assess and settle catastrophe and non-catastrophe related claims. The effects of inflation are implicitly considered in the reserving process.

Because reserves are estimates of unpaid portions of losses that have occurred, including incurred but not reported (IBNR) losses, the establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimates. The highest degree of uncertainty is associated with reserves for losses incurred in the current reporting period as it contains the greatest proportion of losses that have not been reported or settled. The Company regularly updates its reserve estimates as new information becomes available and as events unfold that may affect the resolution of unsettled claims. Changes in prior year reserve estimates, which may be material, are reported in property-liability insurance claims and claims expense in the Condensed Consolidated Statements of Operations in the period such changes are determined.

Management believes that the reserve for property-liability insurance claims and claims expense, net of reinsurance recoverables, is appropriately established in the aggregate and adequate to cover the ultimate net cost of reported and unreported claims arising from losses which had occurred by the date of the Condensed Consolidated Statements of Financial Position based on available facts, technology, laws and regulations.

9. Reinsurance

Property-liability insurance premiums earned and life and annuity premiums and contract charges have been reduced by reinsurance ceded amounts shown in the following table.

(\$ in millions)	Three months ended				Nine months ended			
	September 30,		September 30,		September 30,		September 30,	
	2014	2013	2014	2013	2014	2013	2014	2013
Property-liability insurance premiums earned	\$	258	\$	254	\$	778	\$	801
Life and annuity premiums and contract charges		89		160		326		482

Property-liability insurance claims and claims expense, life and annuity contract benefits and interest credited to contractholder funds have been reduced by the reinsurance ceded amounts shown in the following table.

(\$ in millions)	Three months ended				Nine months ended			
	September 30,		September 30,		September 30,		September 30,	
	2014	2013	2014	2013	2014	2013	2014	2013
Property-liability insurance claims and claims expense	\$	155	\$	154	\$	373	\$	596
Life and annuity contract benefits		81		117		286		288
Interest credited to contractholder funds		5		8		20		22

10. Capital Structure**Preferred stock**

In March 2014, the Company issued 29,900 shares of 6.625% Noncumulative Perpetual Preferred Stock, Series E, with a \$1.00 par value per share and a liquidation preference of \$25,000 per share, for gross proceeds of \$747.5 million. The proceeds of this issuance were used for general corporate purposes.

In June 2014, the Company issued 10,000 shares of 6.25% Noncumulative Perpetual Preferred Stock, Series F, with a \$1.00 par value per share and a liquidation preference of \$25,000 per share, for gross proceeds of \$250 million. The proceeds of this issuance were used for general corporate purposes.

11. Company Restructuring

Edgar Filing: ALLSTATE CORP - Form 10-Q

The Company undertakes various programs to reduce expenses. These programs generally involve a reduction in staffing levels, and in certain cases, office closures. Restructuring and related charges include employee termination and relocation benefits, and post-exit rent expenses in connection with these programs, and non-cash charges resulting from pension benefit payments made to agents in connection with the 1999 reorganization of Allstate's multiple agency programs to a single exclusive agency program. The expenses related to these activities are included in the Condensed Consolidated Statements of Operations as restructuring and related charges, and totaled \$3 million and \$13 million during the three months ended September 30, 2014 and 2013, respectively, and \$13 million and \$59 million during the nine months ended September 30, 2014 and 2013, respectively.

The following table presents changes in the restructuring liability during the nine months ended September 30, 2014.

(\$ in millions)	Employee costs	Exit costs	Total liability
Balance as of December 31, 2013	\$ 21	\$ 3	\$ 24
Expense incurred	3	1	4
Adjustments to liability	(5)	1	(4)
Payments applied against liability	(12)	(3)	(15)
Balance as of September 30, 2014	\$ 7	\$ 2	\$ 9

The payments applied against the liability for employee costs primarily reflect severance costs, and the payments for exit costs generally consist of post-exit rent expenses and contract termination penalties. As of September 30, 2014, the cumulative amount incurred to date for active programs totaled \$93 million for employee costs and \$56 million for exit costs.

12. Guarantees and Contingent Liabilities

Shared markets and state facility assessments

The Company is required to participate in assigned risk plans, reinsurance facilities and joint underwriting associations in various states that provide insurance coverage to individuals or entities that otherwise are unable to purchase such coverage from private insurers. Underwriting results related to these arrangements, which tend to be adverse, have been immaterial to the Company's results of operations. Because of the Company's participation, it may be exposed to losses that surpass the capitalization of these facilities and/or assessments from these facilities.

Guarantees

The Company provides residual value guarantees on Company leased automobiles. If all outstanding leases were terminated effective September 30, 2014, the Company's maximum obligation pursuant to these guarantees, assuming the automobiles have no residual value, would be \$36 million as of September 30, 2014. The remaining term of each residual value guarantee is equal to the term of the underlying lease that ranges from less than one year to three years. Historically, the Company has not made any material payments pursuant to these guarantees.

The Company owns certain investments that obligate the Company to exchange credit risk or to forfeit principal due, depending on the nature or occurrence of specified credit events for the reference entities. In the event all such specified credit events were to occur, the Company's maximum amount at risk on these investments, as measured by the amount of the aggregate initial investment, was \$4 million as of September 30, 2014. The obligations associated with these investments expire at various dates on or before March 11, 2018.

Related to the sale of LBL on April 1, 2014, ALIC has agreed to indemnify Resolution Life Holdings, Inc. related to representations, warranties and covenants of ALIC, subject to certain contractual limitations as to ALIC's maximum obligation. The representations and warranties made by ALIC will expire by March 31, 2015, except for those pertaining to certain tax items and certain liabilities specifically excluded from the transaction. Management does not believe these indemnification provisions will have a material effect on results of operations, cash flows or financial position of the Company.

Related to the disposal through reinsurance of substantially all of Allstate Financial's variable annuity business to Prudential in 2006, the Company and its consolidated subsidiaries, ALIC and ALNY, have agreed to indemnify Prudential for certain pre-closing contingent liabilities (including extra-contractual liabilities of ALIC and ALNY and liabilities specifically excluded from the transaction) that ALIC and ALNY have agreed to retain. In addition, the Company, ALIC and ALNY will each indemnify Prudential for certain post-closing liabilities that may arise from the acts of ALIC, ALNY and their agents, including certain liabilities arising from ALIC's and ALNY's provision of transition services. The reinsurance agreements contain no limitations or indemnifications with regard to insurance risk transfer, and transferred all of the future risks and responsibilities for performance on the underlying variable annuity contracts to Prudential, including those related to benefit guarantees. Management does not believe this agreement will have a material effect on results of operations, cash flows or financial position of the Company.

In the normal course of business, the Company provides standard indemnifications to contractual counterparties in connection with numerous transactions, including acquisitions and divestitures. The types of indemnifications typically provided include indemnifications for breaches of representations and warranties, taxes and certain other liabilities, such as third party lawsuits. The indemnification clauses are often standard

Edgar Filing: ALLSTATE CORP - Form 10-Q

contractual terms and are entered into in the normal course of business based on an assessment that the risk of loss would be remote. The terms of the indemnifications vary in duration and nature. In many cases, the maximum obligation is not explicitly stated and the contingencies triggering the obligation to indemnify have not occurred and are not expected to occur. Consequently, the maximum amount of the obligation under such indemnifications is not determinable. Historically, the Company has not made any material payments pursuant to these obligations.

The aggregate liability balance related to all guarantees was not material as of September 30, 2014.

Regulation and Compliance

The Company is subject to extensive laws, regulations, administrative directives, and regulatory actions. From time to time, regulatory authorities or legislative bodies seek to influence and restrict premium rates, require premium refunds to policyholders, require reinstatement of terminated policies, restrict the ability of insurers to cancel or non-renew policies, require insurers to continue to write new policies or limit their ability to write new

policies, limit insurers' ability to change coverage terms or to impose underwriting standards, impose additional regulations regarding agent and broker compensation, regulate the nature of and amount of investments, impose fines and penalties for unintended errors or mistakes, and otherwise expand overall regulation of insurance products and the insurance industry. In addition, the Company is subject to laws and regulations administered and enforced by federal agencies and other organizations, including but not limited to the SEC, the FINRA, the EEOC, and the U.S. Department of Justice. The Company has established procedures and policies to facilitate compliance with laws and regulations, to foster prudent business operations, and to support financial reporting. The Company routinely reviews its practices to validate compliance with laws and regulations and with internal procedures and policies. As a result of these reviews, from time to time the Company may decide to modify some of its procedures and policies. Such modifications, and the reviews that led to them, may be accompanied by payments being made and costs being incurred. The ultimate changes and eventual effects of these actions on the Company's business, if any, are uncertain.

Legal and regulatory proceedings and inquiries

The Company and certain subsidiaries are involved in a number of lawsuits, regulatory inquiries, and other legal proceedings arising out of various aspects of its business.

Background

These matters raise difficult and complicated factual and legal issues and are subject to many uncertainties and complexities, including the underlying facts of each matter; novel legal issues; variations between jurisdictions in which matters are being litigated, heard, or investigated; differences in applicable laws and judicial interpretations; the length of time before many of these matters might be resolved by settlement, through litigation, or otherwise; the fact that some of the lawsuits are putative class actions in which a class has not been certified and in which the purported class may not be clearly defined; the fact that some of the lawsuits involve multi-state class actions in which the applicable law(s) for the claims at issue is in dispute and therefore unclear; and the current challenging legal environment faced by large corporations and insurance companies.

The outcome of these matters may be affected by decisions, verdicts, and settlements, and the timing of such decisions, verdicts, and settlements, in other individual and class action lawsuits that involve the Company, other insurers, or other entities and by other legal, governmental, and regulatory actions that involve the Company, other insurers, or other entities. The outcome may also be affected by future state or federal legislation, the timing or substance of which cannot be predicted.

In the lawsuits, plaintiffs seek a variety of remedies which may include equitable relief in the form of injunctive and other remedies and monetary relief in the form of contractual and extra-contractual damages. In some cases, the monetary damages sought may include punitive or treble damages. Often specific information about the relief sought, such as the amount of damages, is not available because plaintiffs have not requested specific relief in their pleadings. When specific monetary demands are made, they are often set just below a state court jurisdictional limit in order to seek the maximum amount available in state court, regardless of the specifics of the case, while still avoiding the risk of removal to federal court. In Allstate's experience, monetary demands in pleadings bear little relation to the ultimate loss, if any, to the Company.

In connection with regulatory examinations and proceedings, government authorities may seek various forms of relief, including penalties, restitution, and changes in business practices. The Company may not be advised of the nature and extent of relief sought until the final stages of the examination or proceeding.

Accrual and disclosure policy

The Company reviews its lawsuits, regulatory inquiries, and other legal proceedings on an ongoing basis and follows appropriate accounting guidance when making accrual and disclosure decisions. The Company establishes accruals for such matters at management's best estimate when the Company assesses that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company does not establish accruals for such matters when the Company does not believe both that it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. The Company's assessment of whether a loss is reasonably possible or probable is based on its assessment of the ultimate outcome of the matter following all appeals. The Company does not include potential recoveries in its estimates of reasonably possible or probable losses. Legal fees are expensed as incurred.

The Company continues to monitor its lawsuits, regulatory inquiries, and other legal proceedings for further developments that would make the loss contingency both probable and estimable, and accordingly accruable, or that could affect the amount of accruals that have been previously established. There may continue to be exposure to loss in excess of any amount accrued. Disclosure of the nature and amount of an accrual is made when there have been sufficient legal and factual developments such that the Company's ability to resolve the matter would not be impaired by the disclosure of the amount of accrual.

When the Company assesses it is reasonably possible or probable that a loss has been incurred, it discloses the matter. When it is possible to estimate the reasonably possible loss or range of loss above the amount accrued, if any, for the matters disclosed, that estimate is aggregated and disclosed. Disclosure is not required when an estimate of the reasonably possible loss or range of loss cannot be made.

For certain of the matters described below in the *Claims related proceedings* and *Other proceedings* subsections, the Company is able to estimate the reasonably possible loss or range of loss above the amount accrued, if any. In determining whether it is possible to estimate the reasonably possible loss or range of loss, the Company reviews and evaluates the disclosed matters, in conjunction with counsel, in light of potentially relevant factual and legal developments.

These developments may include information learned through the discovery process, rulings on dispositive motions, settlement discussions, information obtained from other sources, experience from managing these and other matters, and other rulings by courts, arbitrators or others. When the Company possesses sufficient appropriate information to develop an estimate of the reasonably possible loss or range of loss above the amount accrued, if any, that estimate is aggregated and disclosed below. There may be other disclosed matters for which a loss is probable or reasonably possible but such an estimate is not possible. Disclosure of the estimate of the reasonably possible loss or range of loss above the amount accrued, if any, for any individual matter would only be considered when there have been sufficient legal and factual developments such that the Company's ability to resolve the matter would not be impaired by the disclosure of the individual estimate.

The Company currently estimates that the aggregate range of reasonably possible loss in excess of the amount accrued, if any, for the disclosed matters where such an estimate is possible is zero to \$685 million, pre-tax. This disclosure is not an indication of expected loss, if any. Under accounting guidance, an event is *reasonably possible* if the chance of the future event or events occurring is more than remote but less than likely and an event is *remote* if the chance of the future event or events occurring is slight. This estimate is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimate will change from time to time, and actual results may vary significantly from the current estimate. The estimate does not include matters or losses for which an estimate is not possible. Therefore, this estimate represents an estimate of possible loss only for certain matters meeting these criteria. It does not represent the Company's maximum possible loss exposure. Information is provided below regarding the nature of all of the disclosed matters and, where specified, the amount, if any, of plaintiff claims associated with these loss contingencies.

Due to the complexity and scope of the matters disclosed in the *Claims related proceedings* and *Other proceedings* subsections below and the many uncertainties that exist, the ultimate outcome of these matters cannot be predicted. In the event of an unfavorable outcome in one or more of these matters, the ultimate liability may be in excess of amounts currently accrued, if any, and may be material to the Company's operating results or cash flows for a particular quarterly or annual period. However, based on information currently known to it, management believes that the ultimate outcome of all matters described below, as they are resolved over time, is not likely to have a material effect on the financial position of the Company.

Claims related proceedings

Edgar Filing: ALLSTATE CORP - Form 10-Q

Allstate is vigorously defending a class action lawsuit in Montana state court challenging aspects of its claim handling practices in Montana. The plaintiff alleges that the Company adjusts claims made by individuals who do not have attorneys in a manner that unfairly resulted in lower payments compared to claimants who were represented by attorneys. In January 2012, the court certified a class of Montana claimants who were not represented by attorneys with respect to the resolution of auto accident claims. The court certified the class to cover an indefinite period that commences in the mid-1990 s. The certified claims include claims for declaratory judgment, injunctive relief and punitive damages in an unspecified amount. Injunctive relief may include a claim process by which unrepresented claimants could request that their claims be readjusted. No compensatory damages

are sought on behalf of the class. The Company appealed the order certifying the class. In August 2013, the Montana Supreme Court affirmed in part, and reversed in part, the lower court's order granting plaintiff's motion for class certification and remanded the case for trial. The Company petitioned for rehearing of the Montana Supreme Court's decision, which the Court denied. In January 2014, the Company timely filed a petition for a writ of certiorari with the U.S. Supreme Court seeking review of the Montana Supreme Court's decision. On May 5, 2014, the U.S. Supreme Court denied the petition for a writ of certiorari. The case will continue in Montana state court and all of the Company's various defenses remain available to it. To date no discovery has occurred related to the potential value of the class members' claims. The Company has asserted various defenses with respect to the plaintiff's claims, which have not been finally resolved. In the Company's judgment a loss is not probable.

The Company is vigorously litigating two class action cases in California in which the plaintiffs allege off-the-clock wage and hour claims. One case, involving two classes, is pending in Los Angeles Superior Court and was filed in December 2007. In this case, one class includes auto physical damage adjusters employed in the state of California from January 1, 2005 to the date of final judgment, to the extent the Company failed to pay for off-the-clock work to those adjusters who performed certain duties prior to their first assignments. The other class includes all non-exempt employees in California from December 19, 2006 until January 2010 who received pay statements from Allstate which allegedly did not comply with California law. The other case was filed in the U.S. District Court for the Central District of California in September 2010. In April 2012, the trial court certified the class, and Allstate appealed to the Ninth Circuit Court of Appeals. On September 3, 2014, the Ninth Circuit affirmed the trial court's decision to certify the class, and Allstate filed a motion for rehearing en banc. In addition to off-the-clock claims, the plaintiffs in this case allege other California Labor Code violations resulting from purported unpaid overtime. The class in this case includes all adjusters in the state of California from September 29, 2006 to final judgment. Plaintiffs in both cases seek recovery of unpaid compensation, liquidated damages, penalties, and attorneys' fees and costs. In addition to the California class actions, a case was filed in the U.S. District Court for the Eastern District of New York alleging that no-fault claim adjusters have been improperly classified as exempt employees under New York Labor Law and the Fair Labor Standards Act. The case was filed in April 2011, and the plaintiffs are seeking unpaid wages, liquidated damages, injunctive relief, compensatory and punitive damages, and attorneys' fees. On September 16, 2014, the court certified a class of no-fault adjusters under New York Labor Law and refused to decertify a Fair Labor Standards Act class of no-fault adjusters. In the Company's judgment a loss is not probable.

Other proceedings

The Company is defending certain matters relating to the Company's agency program reorganization announced in 1999. The current focus in these matters relates to a release of claims signed by the vast majority of agents who were participants in the reorganization program. These matters include the following:

- In 2001, the U.S. Equal Employment Opportunity Commission (EEOC) filed suit alleging retaliation under federal civil rights laws (EEOC I), and a putative class action was filed by former employee agents alleging retaliation and age discrimination under the Age Discrimination in Employment Act (ADEA), breach of contract and ERISA violations (Romero I). In 2004, in the consolidated EEOC I and Romero I litigation, the trial court issued a memorandum and order that, among other things, certified classes of agents, including a mandatory class of agents who had signed a release, for purposes of effecting the court's declaratory judgment that the release was voidable at the option of the release signer. The court also ordered that an agent who voided the release must return to Allstate any and all benefits received by the [agent] in exchange for signing the release. The court also stated that, on the undisputed facts of record, there is no basis for claims of age discrimination. In June 2007, the court vacated its prior ruling that the release was voidable and granted the Company's motions for summary judgment on all claims. Plaintiffs appealed and in July 2009, the U.S. Court of Appeals for the Third Circuit vacated the trial court's entry of summary judgment in the Company's favor and remanded the cases to the trial court for additional discovery, including additional discovery related to the validity of the release. The Third Circuit held that if the release is held to be valid, then all of the claims in Romero I and EEOC I are barred. Thus, if the release is upheld, then only the claims in Romero I asserted by the small group of employee agents who did not sign the release would remain for adjudication. In January 2010, following the remand, the cases were assigned to a new judge for further proceedings in the trial court. Plaintiffs filed their Second Amended Complaint in July 2010. Plaintiffs, on behalf of a putative class of approximately 6,300 former employee agents, seek broad but unspecified make whole relief, including back pay, compensatory and punitive damages, liquidated damages, lost investment capital, attorneys' fees and costs, and equitable relief, including reinstatement to employee agent status with all attendant benefits.

Discovery limited to the validity of the release was completed and the parties filed cross motions for summary judgment with respect to the validity of the release. On February 28, 2014, the trial court denied plaintiffs' and Allstate's motions for summary judgment in Romero I and held that the question of whether the releases were knowingly and voluntarily signed under a totality of circumstances test raised factual issues to be resolved at trial. Among other things, the trial court also held that the release, if valid, would bar all claims in Romero I. On March 13, 2014, the trial court denied EEOC's motion for summary judgment and granted Allstate's motion for summary judgment in EEOC I and entered final judgment in favor of Allstate. The EEOC has appealed this decision. On May 23, 2014, plaintiffs moved to certify a class as to certain issues relating to the validity of the release. On October 6, 2014, the court denied class certification and stated, among other things, that multiple individual factors must be considered to determine whether the release was signed knowingly and voluntarily under a totality of circumstances test. The time has expired for plaintiffs to seek an interlocutory appeal of the Court's October 6, 2014 order denying class certification. Trial proceedings are scheduled to commence in the second quarter of 2015 for individual plaintiffs to determine the question of whether their releases were knowingly and voluntarily signed. Despite the length of time that these matters have been pending, to date only limited discovery has occurred related to the damages claimed by individual plaintiffs, and no damages discovery has occurred related to the claims of the putative class. Individual damage claims are subject to variation dependent upon retirement dates, participation in employee benefit programs, and years of service and are also subject to reduction by amounts and benefits received by plaintiffs and putative class members subsequent to their employment termination.

- A putative nationwide class action has also been filed by former employee agents alleging various violations of ERISA (Romero II). These plaintiffs, most of whom are also plaintiffs in Romero I, are challenging certain amendments to the Agents Pension Plan and seek to have service as exclusive agent independent contractors count toward eligibility for benefits under the Agents Pension Plan. Romero II was dismissed with prejudice by the trial court, was the subject of further proceedings on appeal, and was reversed and remanded to the trial court in 2005. In June 2007, the court granted the Company's motion to dismiss the case. Plaintiffs filed a notice of appeal with the Third Circuit. In July 2009, the Third Circuit vacated the district court's dismissal of the case and remanded the case to the trial court for additional discovery, and directed that the case be reassigned to another trial court judge. In its opinion, the Third Circuit held that if the release is held to be valid, then one of plaintiffs' three claims asserted in Romero II is barred. The Third Circuit directed the district court to consider on remand whether the other two claims asserted in Romero II are barred by the release. In January 2010, following the remand, the case was assigned to a new judge (the same judge for the Romero I and EEOC I cases) for further proceedings in the trial court. In April 2010, plaintiffs filed their First Amended Complaint. Plaintiffs seek broad but unspecified "make whole" or other equitable relief, including loss of benefits as a result of their conversion to exclusive agent independent contractor status or retirement from the Company between November 1, 1999 and December 31, 2000. They also seek repeal of the challenged amendments to the Agents Pension Plan with all attendant benefits revised and recalculated for thousands of former employee agents, and attorney's fees and costs. As in Romero I and EEOC I, no discovery related to the damages of the putative class has occurred, and discovery limited to issues relating to the validity of the release has been completed. The parties filed cross motions for summary judgment with respect to the validity of the release. On February 28, 2014, the trial court denied plaintiffs' and Allstate's motions for summary judgment in Romero I and II and held that the question of whether the releases were knowingly and voluntarily signed under a totality of circumstances test raised factual issues to be resolved at trial. Among other things, the trial court also held that the release, if valid, would bar all claims asserted in Romero II. On May 23, 2014, plaintiffs moved to certify a class as to certain issues relating to the validity of the release. On October 6, 2014, the court denied class certification and stated, among other things, that multiple individual factors must be considered to determine whether the release was signed knowingly and voluntarily under a totality of circumstances test. The time has expired for plaintiffs to seek an interlocutory appeal of the Court's October 6, 2014 order denying class certification. Trial proceedings are scheduled to commence in the second quarter of 2015 for individual plaintiffs to determine the question of whether their releases were knowingly and voluntarily signed.

In these matters, the threshold issue of the validity and scope of the release is yet to be fully decided. Based on the trial court's February 28, 2014 ruling, if the validity of the release is decided in favor of the Company, that would preclude any damages being awarded in Romero I and Romero II. The final resolution of these matters is subject to various uncertainties and complexities including how individual trials and possible appeals with respect to the validity of the release will be resolved and how the EEOC's appeal from summary judgment in the Company's

favor will be resolved. Depending upon how these issues are resolved, the Company may or may not have to address the merits of plaintiffs claims relating to the reorganization discussed herein. In the Company's judgment a loss is not probable. Allstate has been vigorously defending these lawsuits and other matters related to its agency program reorganization.

Asbestos and environmental

Allstate's reserves for asbestos claims were \$1.05 billion and \$1.02 billion, net of reinsurance recoverables of \$494 million and \$478 million, as of September 30, 2014 and December 31, 2013, respectively. Reserves for environmental claims were \$211 million and \$208 million, net of reinsurance recoverables of \$66 million and \$60 million, as of September 30, 2014 and December 31, 2013, respectively. Approximately 57% and 55% of the total net asbestos and environmental reserves as of September 30, 2014 and December 31, 2013, respectively, were for incurred but not reported estimated losses.

Management believes its net loss reserves for asbestos, environmental and other discontinued lines exposures are appropriately established based on available facts, technology, laws and regulations. However, establishing net loss reserves for asbestos, environmental and other discontinued lines claims is subject to uncertainties that are much greater than those presented by other types of claims. The ultimate cost of losses may vary materially from recorded amounts, which are based on management's best estimate. Among the complications are lack of historical data, long reporting delays, uncertainty as to the number and identity of insureds with potential exposure and unresolved legal issues regarding policy coverage; unresolved legal issues regarding the determination, availability and timing of exhaustion of policy limits; plaintiffs' evolving and expanding theories of liability; availability and collectability of recoveries from reinsurance; retrospectively determined premiums and other contractual agreements; estimates of the extent and timing of any contractual liability; the impact of bankruptcy protection sought by various asbestos producers and other asbestos defendants; and other uncertainties. There are also complex legal issues concerning the interpretation of various insurance policy provisions and whether those losses are covered, or were ever intended to be covered, and could be recoverable through retrospectively determined premium, reinsurance or other contractual agreements. Courts have reached different and sometimes inconsistent conclusions as to when losses are deemed to have occurred and which policies provide coverage; what types of losses are covered; whether there is an insurer obligation to defend; how policy limits are determined; how policy exclusions and conditions are applied and interpreted; and whether clean-up costs represent insured property damage. Management believes these issues are not likely to be resolved in the near future, and the ultimate costs may vary materially from the amounts currently recorded resulting in material changes in loss reserves. In addition, while the Company believes that improved actuarial techniques and databases have assisted in its ability to estimate asbestos, environmental, and other discontinued lines net loss reserves, these refinements may subsequently prove to be inadequate indicators of the extent of probable losses. Due to the uncertainties and factors described above, management believes it is not practicable to develop a meaningful range for any such additional net loss reserves that may be required.

13. Benefit Plans

The components of net periodic cost for the Company's pension and postretirement benefit plans are as follows:

(\$ in millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Pension benefits				
Service cost	\$ 24	\$ 32	\$ 72	\$ 111
Interest cost	63	66	191	198
Expected return on plan assets	(99)	(100)	(298)	(293)
Amortization of:				
Prior service credit	(14)	(12)	(43)	(13)
Net actuarial loss	29	54	86	184
Settlement loss	11	85	33	104
Net periodic pension cost	\$ 14	\$ 125	\$ 41	\$ 291
Postretirement benefits				
Service cost	\$ 3	\$ 3	\$ 8	\$ 10
Interest cost	6	6	17	23
Amortization of:				
Prior service credit	(6)	(5)	(17)	(17)
Net actuarial gain	(6)	(5)	(17)	(11)
Curtailement gain	--	(181)	--	(181)
Net periodic postretirement credit	\$ (3)	\$ (182)	\$ (9)	\$ (176)

14. Reporting Segments

Summarized revenue data for each of the Company's reportable segments are as follows:

(\$ in millions)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Revenues				
<i>Property-Liability</i>				
Property-liability insurance premiums				
Auto	\$ 4,890	\$ 4,645	\$ 14,426	\$ 13,774
Homeowners	1,740	1,679	5,151	4,925
Other personal lines	418	410	1,244	1,219
Commercial lines	120	114	351	341
