Form 10-Q
August 14, 2008

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

(MARK ONE)

☒ QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2008

☐ TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE EXCHANGE ACT

For the transition period from _____ to _____

Commission file number: 000-32603

ARBIOS SYSTEMS, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or
organization)

91-1955323

(I.R.S. Employer Identification No.)

1050 Winter Street, Suite 1000, Waltham, MA

(Address of principal executive offices)

02451

(Zip Code)

(781) 839-7292

(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer ☐

Non-accelerated filer ☐

(do not check if a smaller reporting company)

Accelerated filer ☐

Smaller reporting company ☒

Edgar Filing: ARBIOS SYSTEMS INC - Form 10-Q

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes ☐ No ☒

On August 8, 2008, there were 25,792,747 shares of common stock, \$.001 par value per share, issued and outstanding.

Arbios Systems, Inc. (A Development Stage Company)
Notes to Condensed Financial Statements (Unaudited)
Six Months Ended June 30, 2008

(1) Basis of Presentation

Arbios Systems, Inc., a Delaware corporation (the “Company”), seeks to develop, manufacture and market liver assist devices to meet the urgent need for therapy of liver failure.

On October 30, 2003, Historical Autographs U.S.A., Inc. and Arbios Technologies, Inc. (“ATI”) consummated a reverse merger, in which ATI became the wholly owned subsidiary of Historical Autographs U.S.A., Inc. Concurrently with the merger, Historical Autographs U.S.A., Inc. changed its name to Arbios Systems, Inc. and is herein referred to as “Arbios Systems”. The stockholders of ATI transferred ownership of one hundred percent of all the issued and outstanding shares of their capital stock of ATI in exchange for 11,930,598 newly issued shares, or approximately 91%, of the common stock, \$.001 par value, of Arbios Systems. At that time, the former management of Arbios Systems resigned and was replaced by the same persons who served as officers and directors of ATI. Inasmuch as the former owners of ATI controlled the combined entity after the merger, the combination was accounted for as a purchase by ATI as acquirer, for accounting purposes in accordance with Statement of Financial Accounting Standards, (“SFAS”) No. 141: “Business Combinations” using reverse merger accounting, and no adjustments to the carrying values of the assets or liabilities of the acquired entity were required. Proforma operating results, as if the acquisition had taken place at the beginning of the period, have not been presented as the operations of the acquiree were negligible. The financial position and results of operations of Arbios Systems is included in the statements of the Company from the date of acquisition.

On July 25, 2005, Arbios Systems completed its reincorporation as a Delaware corporation by merging with and into Arbios Systems, Inc., a Delaware corporation (“Arbios”). The foregoing merger was approved by the Company’s stockholders at the annual meeting of stockholders held on July 7, 2005. In order to consolidate the functions and operations of Arbios and ATI, on July 26, 2005, ATI merged into Arbios. As a result, Arbios now owns all of the assets of ATI and all of the operations of the two companies have been consolidated into Arbios. Unless the context indicates otherwise, references herein to the “Company” during periods prior to July 26, 2005 include Arbios Systems, a Nevada corporation and ATI.

The unaudited condensed financial statements and notes are presented as permitted by Form 10-Q. These unaudited condensed financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Certain information and footnote disclosures, normally included in financial statements prepared in accordance with generally accepted accounting principles, have been omitted pursuant to such SEC rules and regulations. In the opinion of the management of the Company, the accompanying unaudited condensed financial statements include all adjustments, including those that are normal and recurring considered necessary to present fairly the financial position of the Company as of June 30, 2008, and the results of operations for the periods presented. These unaudited condensed financial statements should be read in conjunction with the Company's audited financial statements and the accompanying notes included in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2007 as filed with the SEC. The Company expects that its operating results will fluctuate for the foreseeable future. Therefore, period-to-period comparisons should not be relied upon as predictive of the results in future periods. The results of operations for the six months ended June 30, 2008 are not necessarily indicative of the results to be expected for any subsequent periods or for the entire 2008 fiscal year.

(2) Going Concern

The Company’s financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America, which contemplate continuation of the Company on a going concern basis, and which

contemplate the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has incurred a net operating loss of \$2,239,534 for the six months ended June 30, 2008 and an accumulated deficit of \$21,554,506 at June 30, 2008. The Company's lack of adequate cash reserves to sustain ongoing operations after the end of the third quarter of 2008 raises substantial doubt about the Company's ability to continue as a going concern.

The Company reduced its staffing levels by 2 employees and 1 consultant in the first quarter of 2008 to reduce its administrative expenses. Thereafter, in July 2008, the Company terminated all of its remaining employees to help maintain its cash reserves until a strategic transaction or financing is achieved (two officers continue to provide services to the Company as consultants). If the Company is unsuccessful in its efforts to raise additional funds through the sale of additional equity securities or a strategic transaction, the Company will not have the ability to continue as a going concern after the end of the third quarter of 2008. If the Company is unable to obtain financing, it will wind down operations and thereafter will either seek sale of the assets, attempt to license its technologies, or seek a merger with another company. While the Company hopes to pursue development of its product candidates, any significant continued development is contingent upon significant additional funding or a strategic partnership. The amount and timing of future capital requirements will depend on numerous factors, including the number and characteristics of product candidates that the Company pursues, the conduct of clinical studies, the status and timelines of regulatory submissions, the costs associated with protecting patents and other proprietary rights, the ability to complete strategic collaborations and the availability of third-party funding, if any. The Company may also seek additional funding through corporate collaborations and other financing vehicles. If funds are obtained through arrangements with collaborative partners or others, the Company may be required to relinquish rights to its technologies or product candidates.

No assurance can be given that the Company will be successful in raising additional capital. Furthermore, there can be no assurance, assuming the Company successfully raises additional equity, that the Company will achieve profitability or positive cash flow. If the Company is unable to raise additional capital for the Company by the end of the third quarter 2008, the Company will not be able to meet its obligations and will have to cease all operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

(3) Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements," or SFAS 157. SFAS 157 establishes a single authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair-value measurements. SFAS 157 applies only to fair value measurements that are already required or permitted by other accounting standards (except for measurements of share-based payments) and is expected to increase the consistency of those measurements. Accordingly, SFAS 157 does not require any new fair value measurements. However, for some entities, the application of SFAS 157 will change current practice. SFAS 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The adoption of FAS 157 did not have a material impact on the financial position or results of operations.

In February 2007, the FASB issued FASB Statement No.159: "The Fair Value Option for Financial Assets and Financial Liabilities - including an amendment of FASB Statement No. 115" ("FAS 159"). This statement permits entities to choose to measure many financial instruments and certain other items at fair value and is expected to expand the use of fair value measurement. FASB 159 is effective for fiscal years beginning after November 15, 2007. The Company has adopted FAS 159 and the adoption did not have a material impact on the financial position or results of operations.

On June 27, 2007, the FASB reached a final consensus on EITF Issue No. 07-03: "Accounting for Advance Payments for Goods or Services to Be Used in Future Research and Development Activities" ("EITF 07-03"). Currently, under FASB Statement No. 2: "Accounting for Research and Development Costs," nonrefundable advance payments for future research and development activities for materials, equipment, facilities and purchased intangible assets that have no alternative future use are expensed as incurred. EITF 07-03 addresses whether such non-refundable advance payments for goods or services that have no alternative future use and that will be used or rendered for research and development activities should be expensed when the advance payments are made or when the research and development activities have been performed. The consensus reached by the FASB requires companies involved in research and development activities to capitalize such non-refundable advance payments for goods and services

pursuant to an executory contractual arrangement because the right to receive those services in the future represents a probable future economic benefit. Those advance payments will be capitalized until the goods have been delivered or the related services have been performed. Entities will be required to evaluate whether they expect the goods or services to be rendered. If an entity does not expect the goods to be delivered or services to be rendered, the capitalized advance payment will be charged to expense. The consensus on EITF 07-03 is effective for financial statements issued for fiscal years beginning after December 15, 2007, and interim periods within those fiscal years. Earlier application is not permitted. Entities are required to recognize the effects of applying the guidance in EITF 07-03 prospectively for new contracts entered into after the effective date. In accordance with EITF 07-03, the Company does evaluate its research and development contracts and payments within the guidance of EITF 07-03 and either expenses or capitalizes such payments based upon the contract terms.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities". The new standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable users of the financial statements to better understand the effects on an entity's financial position, financial performance, and cash flows. It is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Company is evaluating the impact of adopting SFAS 161 on our financial statements.

(4) Stock-Based Compensation:

On January 1, 2008, in accordance with the established Board of Director's compensation program, the Company granted 90,000 options to purchase common stock to Board members with an exercise price of \$0.69 per share, the closing market price of the Company's common stock on the date of grant, valued at approximately \$47,229, which vest on a monthly pro-rata basis over one year. The fair value of the options was determined using the Black Scholes option pricing model utilizing the following assumptions: risk free interest rate 2.98%, stock price volatility 0.84, expected life 7 years, dividend yield 0%.

On January 28, 2008, the Company granted 70,000 options to purchase common stock to employees with an exercise price of \$0.60 per share, the closing market price of the Company's common stock on the date of grant, valued at approximately \$32,000, which vest upon the achievement of a performance milestone by December 31, 2008. The fair value of the options was determined using the Black Scholes option pricing model utilizing the following assumptions: risk free interest rate 2.98%, stock price volatility 0.84, expected life 7 years, dividend yield 0%. The Company estimates that as of June 30, 2008 it is not probable that the performance objective will be met, and in accordance with SFAS 123R, the incremental vesting charges incurred through March 31, 2008 of approximately \$5,800 is reversed during the second quarter of 2008.

On January 28, 2008, the Company issued 25,000 shares of restricted stock with restrictions that are removed upon achievement of a performance milestone by December 31, 2008, to an advisor and current member of the Board of Directors as compensation for services at a price of \$0.01 per share. The approximate \$15,000 value of these restricted shares, based on the closing price of the Company's common stock on the date of issuance, was expensed with a corresponding increase in additional paid in capital. The Company estimates that as of June 30, 2008 it is not probable that the performance objective will be met, and in accordance with SFAS 123R, the incremental vesting charges incurred through March 31, 2008 of \$15,000 is reversed during the second quarter of 2008.

On March 25, 2008, the Company issued 250,000 options to purchase common stock with an exercise price of \$0.30 per share, the closing market price of the Company's common stock on the date of grant, to employees as a retention incentive and to compensate employees for a salary deferral that begins on April 1, 2008, which options were valued at approximately \$57,000 and vest as long as the employee remains with the Company until a financing is achieved. These options are considered performance based options. The Company estimates that as of June 30, 2008 it is not probable that the performance objective will be met, and in accordance with SFAS 123R, the incremental vesting charges incurred through March 31, 2008 of approximately \$4,000 is reversed during the second quarter of 2008. The fair value of the options was determined using the Black Scholes option pricing model utilizing the following assumptions: risk free interest rate 2.48%, stock price volatility 0.84, expected life 7 years, dividend yield 0%.

On April 29, 2008, the Company entered into an agreement with a fund raising firm and issued 214,286 shares of common stock at a price of \$0.28 per share as compensation plus other agreed upon terms. The value of the shares, based on the closing price of the Company's common stock on the date of grant, was recorded as a deferred financing expense of \$60,000 with a corresponding increase in additional paid in capital. An additional \$30,000 cash retainer was also recorded as a deferred financing cost for legal and other expenses. These costs were subsequently expensed as of June 30, 2008 due to the termination of the agreement.

During the three months ended June 30, 2008 and 2007, the Company recognized equity based compensation expense for stock options of \$29,000 and \$99,000, respectively, which was recognized in the Statement of Operations. During the six months ended June 30, 2008 and 2007, the Company recognized equity based compensation expense for stock options of \$76,000 and \$190,000, respectively, which was recognized in the Statement of Operations. As of June 30, 2008, the total compensation costs related to non-vested awards not yet recognized is \$244,000 which will be recognized over the next 1.45 years. As of June 30, 2008, there were 2,856,677 options to purchase common stock outstanding under the Company's 2005 Stock Option Plan.

(5) Warrant Extension

On February 15, 2008, the Company amended outstanding warrants to purchase an aggregate of 900,000 shares of common stock of the Company, which have an exercise price of \$1.00 per share (the "Warrants"). The Warrants were originally issued in 2003 in connection with certain financing transactions and were scheduled to expire on February 15, 2008. The amendment extends the expiration date of the Warrants until February 15, 2010. The value of the extension of the warrants was calculated using the Black Scholes pricing model and resulted in a charge of approximately \$176,000, which was recorded in the statement of operations during the first quarter of 2008.

In addition, the Warrants contain a call provision whereby the Company can require the holders of the Warrants to exercise them if the Company's common stock trades at a level of at least \$3.25 per share for 20 consecutive trading days (the "Call Provision"). In addition to amending the expiration date of the Warrants as described in the preceding paragraph, the Company amended the Call Provision by lowering the trading price at which the Call Provision may be triggered from \$3.25 per share to \$2.25 per share.

(6) Subsequent Event

On August 5, 2008, the Company announced that it was suspending its operations to focus its efforts on obtaining financing or consummating a strategic transaction. In connection with the suspension of its operations, the Company on July 31, 2008 terminated the employment of Shawn Cain, President and Chief Executive Officer, Scott Hayashi, Chief Financial Officer, Jacek Rozga, MD, Ph.D., Chief Scientific Officer, and Susan Papalia, Vice President of Clinical Affairs. Upon the termination of their employments, each of the foregoing officers executed the Company's standard severance/termination agreement, and each of these officers received a severance payment in the following amount: Shawn Cain (\$46,250, representing three month's salary), Scott Hayashi (\$20,833, representing two month's salary), Jacek Rozga (\$33,333, representing two month's salary), and Susan Papalia (\$28,333, representing two month's salary).

Pursuant to a Consulting Agreement, dated August 1, 2008, Mr. Cain has agreed to continue to provide services to the Company as a part-time consultant for a period of 30 days at a rate of \$5,000 per month. The Consulting agreement is renewable for consecutive 30-day periods upon joint agreement. Under the terms of the consulting agreement, Mr. Cain will act as the interim principal executive officer of the Company.

Pursuant to a Consulting Agreement, dated August 1, 2008, Mr. Hayashi has agreed to continue to provide services to the Company as a part-time consultant for a period of 30 days at a rate of \$5,000 per month. The Consulting agreement is renewable for consecutive 30-day periods upon joint agreement. Mr. Hayashi will act as the Company's interim

Chief Financial Officer.

14

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

SAFE HARBOR STATEMENT

In addition to historical information, the information included in this Quarterly Report on Form 10-Q contains forward-looking statements, such as those pertaining to our capital resources, our ability to complete the research and development of our product candidates, and our ability to obtain regulatory approval for our product candidates. Forward-looking statements involve numerous risks and uncertainties and should not be relied upon as predictions of future events. Certain such forward-looking statements can be identified by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates," or "anticipates" or other variations thereof or comparable terminology, or by discussions of strategy, plans or intentions. Such forward-looking statements are necessarily dependent on assumptions, data or methods that may be incorrect or imprecise and may be incapable of being realized. The following factors, among others, including those risks set forth under "Factors That May Affect our Business And Our Future Results and Market Price of Our Stock," included in Item 6 "Management's Discussion and Analysis of Plan of Operation" of our Annual Report on Form 10-KSB for the year ended December 31, 2007 and other filings we make with the Securities and Exchange Commission could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: need for a significant amount of additional capital, lack of revenue, uncertainty of product development, ability to obtain regulatory approvals in the United States and other countries, and competition. Readers are cautioned not to place undue reliance on forward-looking statements, which reflect our management's analysis only. We assume no obligation to update forward-looking statements.

Overview

To date, we have been principally engaged in research and development of our product candidates, management of clinical trials, raising capital and recruitment of additional scientific and management personnel and advisors. We have not marketed or sold any products and have not generated any revenues from commercial activities; however, from inception, we have recorded revenues of approximately \$321,000 of Small Business Innovation Research, or SBIR, grants that have been awarded by the United States Small Business Administration.

In August 2008, we suspended all of our operations in order to focus exclusively on obtaining financing or consummating a strategic transaction. We hope to obtain additional financing through the sale of additional equity and possibly through strategic alliances with larger pharmaceutical or biomedical companies. In order to preserve our remaining cash resources, the company's remaining employees were released from employment, except for Shawn Cain, our President and CEO, and Scott Hayashi, our CFO, who will continue to provide services to us as part-time consultants on a month-to-month basis while they seek funding and strategic alternatives. Based on our current budget and estimated expenses, we believe that we only have cash available to fund our reduced level of operations until the end of the third quarter of 2008. If we do not obtain financing or enter into a strategic transaction by the end of the third quarter of 2008, we will then need to consider other options, including liquidation of the company.

To date, our plan of operations for the next 12 months primarily involved research and development activities, including clinical trials for the SEPET™ Liver Assist Device and the preparation and submission of an application for a CE Mark for European marketing approval which is subject to completion of a financing. We submitted an IDE application for SEPET™ in March 2005 and commenced clinical trials for SEPET™ in the third quarter of 2005. In the third quarter of 2007, we completed the Phase I feasibility clinical trial for SEPET™. Based upon the results of the feasibility study, we submitted an IDE application to the FDA seeking approval to initiate a pivotal trial of SEPET™. Following a meeting with the FDA in the summer of 2007, the FDA granted us conditional approval of the IDE application in February 2008 to begin the pivotal clinical trial while we respond to the FDA's conditions and request for additional information. After additional discussions with the FDA, we submitted a revised IDE application to the FDA and in May 2008 the FDA granted us approval of the revised IDE to begin segment one of the pivotal trial of

SEPETTM. Based on the revised trial design, we expect that there will be three segments to the pivotal trial of SEPETTM at up to 24 clinical sites in the United States and Europe. We hope to begin enrolling patients for the first segment of the trial in clinical sites in Germany in 2008 if we are able to complete our critical fundraising efforts. There is no assurance that our current trial design with co-primary endpoints which measure survival and a two-stage change in hepatic encephalopathy will enable us to attract sufficient capital to continue our planned operations and activities. Depending on the amount of financing we receive in the near future, if any, we may devote the remaining company resources toward a European approval strategy through our CE Marking efforts which commenced in April 2008 and temporarily delay our U.S. regulatory approval strategy if we are unable to raise sufficient capital.

In August 2008, we suspended all of our current operations, including clinical trials, until we raise sufficient cash to continue our operations. There is no guarantee that we will be able to raise sufficient capital in the next few months to support operations. Accordingly, the actual amounts we may expend on research and development and related clinical activities during the next 12 months is unknown and will depend on whether, and how much financing we are able to obtain. Based on our current estimates, we believe that we do not have sufficient financial resources to conduct our planned operations for the next two months and that our current cash and cash equivalents are budgeted to last until the end of the third quarter of 2008. The amount of funds that we need to raise in the short term to fund our operations is relatively small because of our reduced level of operations. However, under our agreements with Immunocept LLC, we are obligated to raise substantially more funds this year in order to maintain our licenses. Under those licenses, we will need to raise an aggregate of at least \$5.2 million during 2008 in order to maintain the license to the Immunocept patent portfolio, and there is a possibility that the license may revert to a non-exclusive basis if we are unsuccessful in raising these funds. Accordingly, failure to raise additional capital in the near future could result in the termination of our operations, the loss of significant patents, and eventually in our liquidation.

Critical Accounting Policies

This discussion is based on our unaudited condensed financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these unaudited condensed financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates its estimates, including those related to revenue recognition, impairment of long-lived assets and their useful lives, including finite lived intangible costs, accrued liabilities and certain expenses. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates under different assumptions or conditions.

Our significant accounting policies are summarized in Note 1 to our audited financial statements for the year ended December 31, 2007 included in our Annual Report on Form 10-KSB as filed with the Securities and Exchange Commission. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our unaudited condensed financial statements:

Development Stage Enterprise

We are a development stage enterprise as defined by the Financial Accounting Standards Board's, or FASB, Statement of Financial Accounting Standards, or SFAS, No. 7, "Accounting and Reporting by Development Stage Enterprises." We are devoting substantially all of our present efforts to research and development. All losses accumulated since our inception have been considered part of our development stage activities.

Short Term Investments

Short-term investments generally mature between three and twelve months. Short term investments consist of U.S. government agency notes purchased at a discount with interest accruing to the notes full value at maturity. All of our short-term investments are classified as available-for-sale and are carried at fair market value which approximates cost plus accrued interest.

Patents

In accordance with SFAS No. 2, "Accounting for Research and Development Costs," the costs of intangibles we purchased from others for use in research and development activities and that have alternative future uses are

capitalized and amortized. We capitalize certain patent rights that are believed to have future economic benefit. The licensed capitalized patents costs were recorded based on the estimated value of the equity security issued by us to the licensor. The value ascribed to the equity security took into account, among other factors, our stage of development and the value of other companies developing extracorporeal bioartificial liver assist devices. These patent rights are amortized using the straight-line method over the remaining life of the patent. Certain patent rights received in conjunction with purchased research and development costs have been expensed. Legal costs incurred in obtaining, recording and defending patents are expensed as incurred.

Stock-Based Compensation

Commencing January 1, 2006, we adopted SFAS No. 123R, "Share Based Payment", or SFAS 123R, which requires all share based payments, including grants of stock options, to be recognized in the income statement as an operating expense, based on fair values.

Prior to adopting SFAS 123R, we accounted for stock-based employee compensation under Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," as allowed by SFAS No. 123, the predecessor to SFAS 123R, "Accounting for Stock-Based Compensation," the predecessor to SFAS 123R. Accordingly, we have applied the modified prospective method in adopting SFAS 123R whereby periods prior to adoption have not been restated.

Accounting for Uncertainty in Income Taxes

In July 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes," or FIN 48. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements and prescribes a recognition threshold of more-likely-than-not to be sustained upon examination. Measurement of the tax uncertainty occurs if the recognition threshold has been met. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. In the normal course of business we are subject to examination by taxing authorities. At present, there are no ongoing audits or unresolved disputes with the various tax authorities that we file with. Given our substantial net operating loss carryforwards as well as historical operating losses, the adoption of FIN 48 on January 1, 2007 did not have any effect on our financial position, results of operations or cash flows as of or for the period ended June 30, 2008.

Results of Operations

Since we are still developing our product candidates and do not have any products available for sale, we have not yet generated any revenue from sales. Inception to date revenue represents revenue recognized from a SBIR government grant.

General and administrative expenses of \$492,000 and \$770,000 were incurred for the three months ended June 30, 2008 and 2007, respectively. General and administrative expenses for the three months ended June 30, 2008 decreased by \$278,000 over the prior year level. The decrease is primarily attributed to a \$91,000 decrease in legal fees and a \$119,000 decline in payroll costs due to staff reductions, salary deferrals and non-payment of 2008 bonuses. In addition, there was an overall decline in virtually all expense categories in an effort to reduce general and administrative costs. General and administrative expenses of \$1,212,000 and \$1,626,000 were incurred for the six months ended June 30, 2008 and 2007, respectively. General and administrative expenses for the six months ended June 30, 2008 decreased by \$414,000 over the prior year level. The decrease primarily reflects a \$183,000 decrease in payroll costs from staff reductions, a \$180,000 non recurring contingency charge incurred in 2007 and an overall decline in virtually all expense categories in an effort to reduce general and administrative costs.

Research and development expenses of \$346,000 and \$529,000 were incurred for the three months ended June 30, 2008 and 2007, respectively. The research and development expenses for the three months ended June 30, 2008 decreased by \$183,000 over the comparable prior year level due to \$138,000 less in consulting costs primarily from regulatory consultants utilized in 2007 and a decline of \$19,000 in payroll costs due to non-payment of bonus payments in 2008. Research and development expenses of \$1,056,000 and \$1,560,000 were incurred for the six months ended June 30, 2008 and 2007, respectively. The research and development expenses for the six months ended June 30, 2008 decreased by \$504,000 over the comparable prior year levels due to \$375,000 in costs related to the Immunocept, LLC patent portfolio acquisition in March 2007 and a decline in SEPET™ development costs of \$233,000 in 2008, the development of which has been placed on hold until additional capital is secured and a decline

in consultant costs of \$85,000 also related to the SEPET™ program. These declines are offset in part by an increase of \$70,000 in SEPET™ clinical development costs to produce a second generation cartridge design, and salary cost of \$93,000 due to the addition of two employees.

Interest income of \$8,000 and \$56,000 was earned for the three months ended June 30, 2008 and 2007, respectively. Interest income of \$28,000 and \$75,000 was earned for the six months ended June 30, 2008 and 2007, respectively. The change in interest income primarily reflects lower cash and cash equivalent balances in 2008 from prior year levels and fluctuations of the interest rate in our cash account.

Our net loss was \$830,000 and \$1,243,000 for the three months ended June 30, 2008 and 2007, respectively. Our net loss was \$2,240,000 and \$3,112,000 for the six months ended June 30, 2008 and 2007, respectively. The decrease in net loss for the three and six months ended June 30, 2008 compared to the comparable periods in 2007 is primarily attributable to the reductions in research and development program activities and a decrease in general and administrative expenditures as we endeavored to conserve cash and secure additional capital.

Liquidity and Capital Resources

As of June 30, 2008, we had cash of approximately \$989,000 and current liabilities of approximately \$1,008,000. We have long term contract obligations of \$150,000 related to patent acquisitions and we do not have any bank credit lines. To date, we have funded our operations primarily from the sale of debt and equity securities and to a lesser extent, SBIR grants.

As of the date of the filing of the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2008, we estimate that we do not have cash to operate until approximately the end of the third quarter of 2008. We are continuing to pursue fund-raising possibilities through the sale of our equity securities or strategic transactions. If we are unsuccessful in our efforts to raise additional funds through the sale of additional equity securities, we will not have the ability to continue as a going concern after the end of the third quarter of 2008. While we hope to pursue development of our product candidates, any continued development by us is contingent upon significant additional funding or a strategic partnership. The amount and timing of our future capital requirements will depend on numerous factors, including the financial markets in general, and the perceived value of our company and our assets in particular. While we are pursuing raising equity funding, we may also seek funding through corporate collaborations and other financing vehicles. If funds are obtained through arrangements with collaborative partners or others, we may be required to relinquish rights to our technologies or product candidates.

We do not currently anticipate that we will derive any revenue from either product sales or from governmental research grants in the foreseeable future. The cost of completing the development of our product candidates and of obtaining all required regulatory approvals to market our product candidates is substantially greater than the amount of funds we currently have available and substantially greater than the amount we could possibly receive under any governmental grant program. As a result, we will have to obtain significant additional funds after the date of this report. We cannot be sure that we will be able to obtain additional funding from either of these sources or that we will enter into strategic alliances, or that the terms under which we obtain such funding or of any such strategic alliance will be beneficial to us or our shareholders.

The following is a summary of our contractual cash obligations for the following fiscal years:

Contractual Obligations	Total	2008	2009	2010	2011
Short-Term Leases	\$ 14,588	\$ 14,588	\$ -	\$ -	\$ -
License Agreement	250,000	-	100,000	150,000	-
Total	\$ 264,588	\$ 14,588	\$ 100,000	\$ 150,000	\$ -

We do not believe that inflation has had a material impact on our business or operations.

We do not engage in trading activities involving non-exchange traded contracts. In addition, we have no financial guarantees, debt or lease agreements or other arrangements that could trigger a requirement for an early payment or that could change the value of our assets.

Off- Balance Sheet Arrangements

We are not a party to any off-balance sheet arrangements.

ITEM 3. Qualitative and Quantitative Disclosures about Market Risk.

Not applicable as we are a smaller reporting company.

ITEM 4T. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures. As of the end of the period covered by this report, our company conducted an evaluation, under the supervision and with the participation of our Interim Chief Executive Officer and Chief Financial Officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) of the Securities Exchange Act of 1934, as amended, or the Exchange Act). Based on this evaluation, our Interim Chief Executive Officer and Chief Financial Officer concluded that our company's disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosures.

(b) Changes in Internal Controls. There was no change in our internal controls, which are included within disclosure controls and procedures, during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls.

(c) Limitations on the Effectiveness of Controls. Our management, including our interim chief executive officer and chief financial officer, does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within an organization have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake.

Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving our stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

None.

19

ITEM 1A. Risk Factors.

Information regarding risk factors appears under “Factors That May Affect our Business And Our Future Results and Market Price of Our Stock,” included in Item 6 “Management’s Discussion and Analysis of Plan of Operation” of our Annual Report on Form 10-KSB for the year ended December 31, 2007 as filed with the Securities and Exchange Commission. Except as set forth below, there have been no material changes from the risk factors previously disclosed in that Annual Report on Form 10-KSB.

We are in imminent danger of liquidation and the loss of our entire business if we do not raise additional funds or enter into a strategic transaction in the immediate future.

As of the date of the filing of this report, we only have sufficient cash available to fund our operations until approximately the end of the third quarter of 2008. In order to preserve our limited cash resources, we have suspended all of our operations and have terminated all employees (only our Chief Executive Officer and our Chief Financial Officer continue to provide services to us as part time consultants). We are currently seeking additional funding from various sources and are considering certain strategic transactions to either fund and re-instate our operations or to otherwise preserve the value of our patents and technologies. However, we do not have any agreements in place for either additional funding or for any strategic transactions, and no assurance can be given that we will be able to obtain additional financing or enter into a strategic transaction. If we do not raise additional funds in the immediate future or otherwise protect our business and assets in a strategic transaction, we will have to consider filing for bankruptcy or otherwise liquidating our company. In either case, our shareholders will lose their investment in our securities.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

ITEM 3. Defaults Upon Senior Securities.

None.

ITEM 4. Submission of Matters to a Vote of Security Holders.

None.

ITEM 5. Other Information.

None.

ITEM 6. Exhibits.
