Notes to Unaudited Condensed Consolidated Financial Statements (Unaudited) (dollars in thousands, except share data)

1.

Basis of Reporting

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial statements and with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, do not include all of the information and footnotes required by GAAP for complete financial statements. These interim statements should be read in conjunction with the financial statements and notes thereto included in the AmTrust Financial Services, Inc. ("AmTrust" or the "Company") Annual Report on Form 10-K for the year ended December 31, 2010, previously filed with the Securities and Exchange Commission ("SEC") on March 15, 2011. The balance sheet at December 31, 2010 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements.

These interim consolidated financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair presentation of the results for the interim period and all such adjustments are of a normal recurring nature. The results of operations for the interim period are not necessarily indicative, if annualized, of those to be expected for the full year. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

A detailed description of the Company's significant accounting policies and management judgments is located in the audited consolidated financial statements for the year ended December 31, 2010, included in the Company's Form 10-K filed with the SEC.

All significant inter-company transactions and accounts have been eliminated in the consolidated financial statements. To facilitate period-to-period comparisons, certain reclassifications have been made to prior period consolidated financial statement amounts to conform to current period presentation. There was no effect on net income from the change in presentation.

2. Recent Accounting Pronouncements

With the exception of those discussed below, there have been no recent accounting pronouncements or changes in accounting pronouncements during the six months ended June 30, 2011, as compared to those described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, that are of significance, or potential significance, to the Company.

In June 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-05 Comprehensive Income (Topic 220). This update requires that all non-owner charges in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-step approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. The updated guidance is effective for fiscal years and interim periods beginning on or after December 15, 2011 and is to be applied on a retrospective basis to the beginning of the annual period of adoption. Early adoption is permitted and the amendment does not require any transition disclosure. The Company is currently assessing the impact of the adoption of this guidance, but does not anticipate any material impact on its results of operations, financial position or liquidity.

In May 2011, the FASB issued ASU No. 2011-04, Fair Value Measurement (Topic 820). The ASU generally aligns the principles for fair value measurements and the related disclosure requirements under GAAP and International Financial Reporting Standards ("IFRS"). ASU 2011-04 changes certain fair value measurement principles and enhances the disclosure requirements, particularly for Level 3 fair value measurements. The amendment is effective on a prospective basis for interim and annual reporting periods beginning after December 15, 2011 and early adoption is not permitted. The Company is currently assessing the impact of the adoption of this guidance, but does not anticipate any material impact on its results of operations, financial position or liquidity.

On April 29, 2011, the FASB amended its guidance on accounting for repurchase agreements. The amendments eliminate the criteria to assess whether a transferor must have the ability to repurchase or redeem the financial assets in order to demonstrate effective control over the transferred asset. Under the amended guidance, a transferor maintains effective control over transferred financial assets (and thus accounts for the transfer as a secured borrowing) if there is an agreement that both entitles and obligates the transferor to repurchase the financial assets before maturity and if all of the following conditions previously required are met: (i) financial assets to be repurchased or redeemed are the same or substantially the same as those transferred; (ii) repurchase or redemption date before maturity at a fixed or determinable price; and (iii) the agreement is entered into contemporaneously with, or in contemplation of, the transfer. As a result, more arrangements could be accounted for as secured borrowings rather than sales. The updated guidance is effective on a prospective basis for interim and annual reporting periods beginning on or after December 15, 2011, and early adoption is prohibited. The Company is currently evaluating the impact of the adoption of this new guidance on its consolidated results of operations and financial condition.

In April 2011, the FASB issued updated guidance to clarify whether a modification or restructuring of a receivable is considered a troubled debt restructuring, i.e., whether the creditor has granted a concession and whether the debtor is experiencing financial difficulties. A modification or restructuring that is considered a troubled debt restructuring will result in the creditor having to account for the receivable as being impaired and will also result in additional disclosure of the creditors' troubled debt restructuring activities. The updated guidance is effective for the first interim period beginning on or after June 15, 2011 and is to be applied on a retrospective basis to the beginning of the annual period of adoption. The adoption of this guidance is not expected to have a material impact on the Company's results of operations, financial position or liquidity.

In December 2010, the FASB issued authoritative guidance on disclosure of supplementary pro forma information for business combinations. The new guidance specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period. The new guidance became effective for the Company on January 1, 2011. The adoption of this guidance is not expected to have a material impact on the Company's results of operations, financial position or liquidity.

In October 2010, the FASB issued updated guidance to address the diversity in practice for the accounting for costs associated with acquiring or renewing insurance contracts. This guidance modifies the definition of acquisition costs to specify that a cost must be directly related to the successful acquisition of a new or renewal insurance contract in order to be deferred. If application of this guidance would result in the capitalization of acquisition costs that had not previously been capitalized by a reporting entity, the entity may elect not to capitalize those costs. The updated guidance is effective on either a retrospective or prospective basis for interim and annual reporting periods beginning after December 15, 2011, with early adoption permitted as of the beginning of a company's annual period. The Company is currently evaluating the impact of the adoption of this new guidance on its consolidated results of operations and financial condition.

3. Investments

(a) Available-for-Sale Securities

The original cost, estimated market value and gross unrealized appreciation and depreciation of available-for-sale securities as of June 30, 2011, are presented in the table below:

	Original or amortized	Gross unrealized	Gross unrealized	Market
(Amounts in Thousands)	cost	gains	losses	value
Preferred stock	\$ 6,029	\$ 357	\$ 42	\$ 6,344
Common stock	13,175	1,456	1,608	13,023
U.S. treasury securities	92,204	1,928	328	93,804
U.S. government agencies	18,224
