6SEE NOTES TO FUND'S INVESTMENTS

Notes to Fund's investments

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. In order to value the securities, the fund uses the following valuation techniques: Equity securities held by the fund are valued at the last sale price or official closing price on the exchange where the security was acquired or most likely will be sold. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Debt obligations are valued based on the evaluated prices provided by an independent pricing vendor or from broker-dealers. Independent pricing vendors utilize matrix pricing which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing vendor. Securities that trade only in the over-the-counter (OTC) market are valued using bid prices. Certain short-term securities with maturities of 60 days or less at the time of purchase are valued at amortized cost.

Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed. Trading in foreign securities may be completed before the daily close of trading on the NYSE. Significant events at the issuer or market level may affect the values of securities between the time when the valuation of the securities is generally determined and the close of the NYSE. If a significant event occurs, these securities may be fair valued, as determined in good faith by the fund's Pricing Committee, following procedures established by the Board of Trustees. The fund uses fair value adjustment factors provided by an independent pricing vendor to value certain foreign securities in order to adjust for events that may occur between the close of foreign exchanges or markets and the close of the NYSE.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of January 31, 2015, by major security category or type:

	Total market value at 1-31-15	Level 1 quoted price	Level 2 significant observable inputs	Level 3 significant unobservable inputs

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value. Transfers into or out of Level 3 represent the beginning value of any security or instrument where a change in the level has occurred from the beginning to the end of the period and in all cases were transferred into Level 1. In addition, securities were transferred from Level 3 since observable market data became available due to the increased market activity of these securities.

Investments in securities	Common stocks	Preferred stocks	Corporate bonds	Total
Balance as of 10-31-14	\$7,880,493	\$1,060,500	\$14,201,901	\$23,142,894
Realized gain (loss)	-	(9,500) -	(9,500)
Change in unrealized appreciation (depreciation)	291,916	-	(81,803) 210,113
Purchases	5,000,000	3,028,500	-	8,028,500
Sales	-	(1,000,000) -	(1,000,000)
Transfers into Level 3	-	-	-	-
Transfers out of Level 3	(1,648,938) (1,060,500) -	(2,709,438)
Balance as of 1-31-15	\$11,523,471	\$2,019,000	\$14,120,098	\$27,662,569
Change in unrealized at period end*	\$291,916	-	(81,803) \$210,113

*Change in unrealized appreciation (depreciation) attributable to Level 3 securities held at the period end.

The valuation techniques and significant amounts of unobservable inputs used in the fair value measurement of the fund's Level 3 securities are outlined in the table below. These amounts exclude valuations provided by a broker, which amounted to \$3,937,500.

	Fair value at 1-31-15	Valuation technique	Unobservable Inputs	Input/ Range
Common Stocks	\$3,240,000	Market Approach	Midpoint IPO range	\$12
			Discount for lack of marketability	10%
	\$3,283,471	Market Approach	Book value multiple	1.04x
	\$5,000,000	Market Approach	Discount for lack of marketability	10%
	\$11,523,471		Prior / recent transaction	\$1,000.00
Preferred Securities	\$2,019,000	Market Approach	Prior / recent transaction	\$1,009.50
Corporate Bonds	\$10,182,598	Market Approach	Yield spread	100 bps - 208 bps (weighted average 154.08 bps)
Total	\$23,725,069			

A change to unobservable inputs of the fund's Level 3 securities may result in changes to the fair value measurement, as follows:

Unobservable input	Impact to valuation if input increases	Impact to valuation if input decreases
Midpoint IPO range	Increase	Decrease
Discount for lack of marketability	Decrease	Increase
Book value multiple / market comparable companies	Increase	Decrease
Prior / recent transactions	Increase	Decrease
Yield spread	Decrease	Increase

Repurchase agreements. The fund may enter into repurchase agreements. When the fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. Collateral received by the fund for repurchase agreements is disclosed in the Fund's investments as part of the caption related to the repurchase agreement.

Repurchase agreements are typically governed by the terms and conditions of the Master Repurchase Agreement and/or Global Master Repurchase Agreement (collectively, MRA). Upon an event of default, the non-defaulting party

may close out all transactions traded under the MRA and net amounts owed. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline or the counterparty may have insufficient assets to pay back claims resulting from close-out of the transactions.

For additional information on the fund's significant accounting policies, please refer to the fund's most recent semiannual or annual shareholder report.
