-

Item 1.01 Entry into a Material Definitive Agreement

On June 23, 2005, Lockheed Martin Corporation's Board of Directors amended the Lockheed Martin Management Incentive Compensation Plan (MICP). A copy of the MICP, as amended, is filed as Exhibit 99 to this report and is incorporated herein by reference. The amendments are effective for the 2005 plan year and increase the targeted percentage of base salary potentially payable as incentive compensation for specified management participant positions, including the Chief Executive Officer and Executive Vice Presidents.

Under the MICP, executives have the opportunity to earn incentive compensation based on an assessment of their performance under individual and business unit (or corporate) goals by the Management Development and Compensation Committee and the Stock Option Subcommittee (together the Committee) of the Board of Directors. Each eligible participant is assigned a targeted percentage (ranging from 15 percent to 125 percent) of base salary determined by the level of importance and responsibility of the participant's position in the Corporation. The MICP also permits the Committee or the Board of Directors to adopt a different targeted percentage for any elected officer. The amount of incentive compensation generated by the target percentage is adjusted upwards or downwards after assessment by the Committee of business area and/or corporate performance, as well as an individual's contribution to that performance. Following adjustment for business area and/or corporate and individual performance ratings, the bonuses payable under the MICP to participants can range from 0 percent to 195 percent of the targeted percentage.

Each year the Committee examines compensation information compiled by an independent executive compensation consultant from a group of 25 publicly held companies (referred to as the Comparator Group) of a size, complexity and quality similar to that of the Corporation. The increase in the targeted percentages effected by the amendment is intended to more closely align the Corporation's annual incentive compensation targets to the ranges for similar positions in the Corporation's Comparator Group.
