ALERIS INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

SEPTEMBER 30, 2005

(amounts in thousands, except per share data)

NOTE A - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2005 are not necessarily indicative of the results that may be expected for the year ending December 31, 2005. The accompanying financial statements include the accounts of Aleris International, Inc. and all of its subsidiaries (collectively, except where the context otherwise requires, referred to as we, us, our or similar terms). All intercompany accounts and transactions have been eliminated. For further information, refer to the consolidated financial statements and footnotes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2004. Certain reclassifications have been made to prior period statements to conform to the current period presentation.

NOTE B - INVENTORIES

The components of inventories are:

	September 30, 2005	December 31, 2004
	<u> </u>	<u> </u>
Finished goods	\$ 83,635	\$ 88,328
Raw materials	87,689	89,790
Work in process	59,708	63,170
Supplies	20,648	20,922
	<u> </u>	<u> </u>
	<u>\$ 251,680</u>	<u>\$ 262,210</u>

NOTE C ACQUISITIONS

Commonwealth Industries, Inc.

Edgar Filing: Aleris International, Inc. - Form 10-Q

On December 9, 2004, we completed our acquisition of Commonwealth Industries, Inc. Commonwealth is a manufacturer of common alloy aluminum sheet, selling its products to end-users for use in building and construction products, transportation equipment and automotive parts, consumer durables as well as to distributors. The results of Commonwealth's operations have been included in our consolidated income statement for the three and nine months ended September 30, 2005. The purchase price paid, totaling \$184,259, has been allocated to the assets acquired and liabilities assumed based upon an estimate of their fair values as of the acquisition date. The purchase price allocation is preliminary and a final determination of the required purchase accounting adjustments will be made upon the finalization of an independent appraisal of the fair value of acquired property and equipment, the determination of the fair value of certain other acquired assets and liabilities, the completion of our integration plans and the final determination of the acquired federal and state net operating loss and tax credit carry forwards.

In connection with the acquisition, we announced plans to restructure and relocate our corporate headquarters and to consolidate certain duplicative general and administrative functions, including the accounting, finance, human resource and treasury functions, at both Commonwealth and Aleris. Our initial integration plans resulted in the recognition of approximately \$7,796 in the preliminary allocation of the purchase price related to severance, relocation and other employee benefits to be paid to Commonwealth employees to be terminated or relocated. Of the 54 Commonwealth employees expected to be terminated, approximately 45 have left their positions as of September 30, 2005 with the remaining employees to be terminated by January 31, 2006. During the second quarter, management announced plans to restructure the rolled products segment's customer service function resulting in the recognition of an additional \$1,419 in the allocation of purchase price related to severance and relocation benefits. Of the 15 rolled products personnel that are expected to be terminated by September 30, 2006 as a result of this phase of our integration plans, four have left their positions as of September 30, 2005. As additional aspects of our integration plans, including the elimination or consolidation of other administrative functions, are finalized and communicated, additional adjustments to the preliminary purchase price allocation may be required. We expect to complete our integration efforts by December 31, 2005.

The restructuring and consolidation plans also resulted in the reduction of 47 Aleris corporate personnel for which we recorded charges totaling \$10,754 during the fourth quarter of 2004. During the first nine months of 2005, we recorded restructuring and merger-related charges totaling \$2,451 associated with these terminations, the relocation of certain personnel to our new Beachwood, Ohio headquarters and the resignation of the former president of our aluminum recycling business. Approximately 40 former Aleris employees had left their positions as of September 30, 2005. Additionally, in the first quarter of 2005, management determined that certain idled assets at our Wendover, Utah recycling facility would not be relocated and utilized at another recycling facility. As a result, we determined that the book value of these assets was not supportable by estimated future cash flows and we recorded an \$804 non-cash impairment charge to reduce the assets to their estimated fair values at March 31, 2005. During the second quarter of 2005, we vacated a portion of our former headquarters location in Irving, Texas and have recorded charges totaling \$593 related to the remaining contractual lease payments net of expected sublease income and \$239 of asset impairments. During the third quarter, we terminated this lease agreement and recorded an additional charge of \$632 for the lease termination and \$102 of asset impairments. These restructuring and merger-related charges are not allocated to a particular segment.

The following table shows certain severance and other employee benefits, asset write-downs and lease termination costs recognized through the preliminary purchase price allocation or included in the provision for restructuring and merger-related charges from January 1, 2005 to September 30, 2005:

	<u>Balance at January 1, 2005</u>	<u>Accruals</u>	<u>Payments/ Utilization</u>	<u>Balance at September 30, 2005</u>
Amounts recognized in the preliminary purchase price allocation:				
Severance and other employee benefits	\$ 3,707	\$ 1,419	\$ (3,251)	\$ 1,875
Included in the provision for restructuring and merger-related charges:				
Severance and other employee benefits	\$ 2,065	\$ 2,451	\$ (3,615)	\$ 901
Asset write-downs		1,145	(1,145)	
Lease termination costs		1,225	(252)	973

The following unaudited pro forma financial information for the nine months ended September 30, 2004 presents our combined results of operations as if the acquisition of Commonwealth had occurred on January 1, 2004. The unaudited pro forma information is not necessarily indicative of the consolidated results of operations that would have occurred had the acquisition of Commonwealth been made at the beginning of the period presented or the future results of the combined operations.

	<u>Nine months ended September 30, 2004</u>
Revenues	\$ 1,666,596
Gross profit	112,998
Net loss	(6,305)
Loss per share:	
Basic and diluted	\$ (0.23)
Weighted average shares outstanding:	
Basic and diluted	28,018

Aleris Latasa Reciclagem

In August 2005, we acquired Aleris Latasa Reciclagem (formerly Tomra Latasa Reciclagem), an aluminum recycler in Sao Paulo, Brazil, for a net cash purchase price of approximately \$17,380. The preliminary allocation of the purchase price to the net assets acquired resulted in goodwill of approximately \$9,000. This goodwill has been attributed to our international operating segment. A final determination of the

Edgar Filing: Aleris International, Inc. - Form 10-Q

allocation of the purchase price is dependent upon the completion of an independent appraisal of the fair value of acquired long-lived assets and the completion of our integration plans. Pro forma financial information has not been provided as the results of operations would not materially impact our consolidated results of operations.

NOTE D - LONG-TERM DEBT

Our long-term debt is summarized as follows:

	September 30, 2005	December 31, 2004
Amended and restated senior credit facility, expiring in December 2008	\$	\$ 50,798
10 ³ / ₈ % Senior Secured Notes, due October 6, 2010, net	207,814	208,872
9% Senior Notes, due November 15, 2014	125,000	125,000
VAW-IMCO credit facilities	20,857	8,140
7.65% Morgantown, Kentucky Solid Waste Disposal Facilities Revenue Bonds-1996 Series, Due May 1, 2016, net	5,710	5,707
7.45% Morgantown, Kentucky Solid Waste Disposal Facilities Revenue Bonds-1997 Series, Due May 1, 2022	4,600	4,600
6.00% Morgantown, Kentucky Solid Waste Disposal Facilities Revenue Bonds-1998 Series, Due May 1, 2023	4,100	4,100
Morgantown, Kentucky Solid Waste Disposal Facilities Revenue Bonds-2004 Series, Due May 1, 2029, net	4,971	4,970
Other	164	212
Subtotal	373,216	412,399
Less current maturities	8,882	61
Total	\$ 364,334	\$ 412,338

As of September 30, 2005, no amounts were outstanding under our amended and restated \$325,000 senior credit facility. Under this facility, we are subject to a borrowing base limitation based on eligible domestic inventory and receivables. As of September 30, 2005, we estimate that our borrowing base would have supported borrowings of \$259,574 after giving effect to outstanding letters of credit of \$15,109. As of September 30, 2005, our total borrowing base was approximately \$274,683.

The terms of our senior credit facility include, among other covenants, (i) prohibitions against incurring certain indebtedness and granting liens, (ii) limitations on dividends and repurchases of shares of capital stock, and (iii) limitations on capital expenditures, investments and acquisitions. Under the amended and restated terms of the senior credit facility, we are permitted to pay dividends of up to \$5,000 per year. The indebtedness under the senior credit facility is secured by the Company's and its co-borrowers' inventories, receivables, general intangibles and the proceeds thereof. If at any time during specified periods, our undrawn availability under this facility is less than \$50,000, we will also be required to maintain a minimum fixed coverage ratio of 1.1 to 1.0, calculated based on the combined results of our parent entity and wholly-owned domestic subsidiaries.

The indentures governing the 10³/₈% senior secured notes and the 9% senior notes, among other things, contain covenants limiting our ability and the ability of our restricted subsidiaries to incur additional debt; make restricted payments, including paying dividends or making investments; sell or otherwise dispose of assets, including capital stock of subsidiaries; engage in sale-leaseback transactions; create liens on our or our subsidiaries' assets; receive distributions; engage in transactions with affiliates; and merge or sell substantially all of our or our subsidiaries' assets.

Edgar Filing: Aleris International, Inc. - Form 10-Q

The 10^{3/8}% senior secured notes and our 9% senior notes are jointly and severally, unconditionally guaranteed on a senior basis by all of our existing 100% owned domestic subsidiaries that are co-borrowers under the senior credit facility and by any future restricted domestic subsidiaries. These notes are not guaranteed by any of our current foreign subsidiaries. See Note N Condensed Consolidated Financial Statements. The 10^{0/8}% senior secured notes and guarantees are secured by first-priority liens, subject to permitted liens, on the real property, fixtures and equipment relating to certain of our wholly-owned domestic operating plants and on the fixtures and equipment relating to certain of our leased domestic operating plants. The liens securing the senior secured notes do not extend to any of our inventory, accounts receivable and related property (which secure the senior credit facility) or to any of our foreign real or personal property.

As of September 30, 2005, we were in compliance with all applicable debt covenants.

In February 2004, our wholly-owned German subsidiary, VAW-IMCO Guss und Recycling GmbH (VAW-IMCO), paid Aleris approximately 20,000 Euros (\$24,846, including interest), repaying in full VAW-IMCO's indebtedness owed to Aleris under an intercompany note that Aleris had pledged in October 2003 as part of the collateral security for the 10³/₈% senior secured notes. The prepayment of this intercompany note, which was denominated in U.S. dollars, resulted in a recognized gain of \$278 in the first quarter of 2004. The funds were deposited in a collateral account held by the trustee under the indenture governing the senior secured notes. This indenture permitted us to use these funds through January 2005 for acquisitions and construction of assets and properties to be used in our domestic business, which were in turn added to the collateral security for the senior secured notes. During 2004 we utilized approximately \$15,702 of these restricted funds to acquire property and equipment. At December 31, 2004, approximately \$9,144 remained restricted and was classified as non-current restricted cash. In February 2005, we made an offer to repurchase outstanding senior secured notes in an amount of up to \$5,500, the extent of the amount of the unused funds then remaining in the collateral account. This offer resulted in our repurchase of \$1,170 in senior secured notes. The remaining unused funds are now free of restriction and have been used for our general corporate purposes.

NOTE E EARNINGS (LOSS) PER SHARE

The following table sets forth the reconciliation between weighted average shares used for calculating basic and diluted earnings (loss) per share:

	Three months ended		Nine months ended

Denominator for diluted earnings (loss) per share	31,276	15,186	31,151	15,277
Net earnings (loss) per share:				
Basic	\$ 1.03	\$ (0.02)	\$ 2.62	\$ 0.18
Diluted	\$ 1.01	\$ (0.02)	\$ 2.55	\$ 0.18

NOTE F COMMITMENTS AND CONTINGENCIES

Environmental proceedings and asset retirement obligations

Our operations are subject to environmental laws and regulations governing air emissions, wastewater discharges, the handling, disposal and remediation of hazardous substances and wastes and employee health and safety. These laws can impose joint and several liabilities for releases or threatened releases of hazardous substances upon statutorily defined parties, including us, regardless of fault or the lawfulness of the original activity or disposal. Given the changing nature of environmental legal requirements, we may be required, from time to time, to take environmental control measures at some of our facilities to meet future requirements.

Edgar Filing: Aleris International, Inc. - Form 10-Q

We have been named as a potentially responsible party in certain proceedings initiated pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act and similar state statutes and may be named a potentially responsible party in other similar proceedings in the future. It is not anticipated that the costs incurred in connection with the presently pending proceedings will, individually or in the aggregate, have a material adverse effect on our financial position or results of operations.

We are performing operations and maintenance at two Superfund sites for matters arising out of past waste disposal activity associated with closed facilities. We are also under orders by agencies in four states for environmental remediation at five sites, two of which are located at our operating facilities.

Our reserves for environmental remediation liabilities totaled \$10,471 and \$6,396 at September 30, 2005 and December 31, 2004, respectively, and have been classified as other long-term liabilities in the consolidated balance sheet. During the three months ended September 30, 2005, a third party study of the environmental liabilities assumed as a result of our acquisition of Commonwealth was completed. We recorded additional reserves of \$4,359 through purchase accounting to reflect these environmental liabilities at their estimated fair value as of the acquisition date. We also recorded \$1,258 in other assets related to certain sites where we have been indemnified by third parties.

In addition to environmental liabilities, we have recorded asset retirement obligations associated with legal requirements related to the normal operation of our landfills and the retirement of the related assets. At September 30, 2005 and December 31, 2004, our total asset retirement obligations for our landfills were \$6,110 and \$5,699, respectively, which have been classified within other long-term liabilities in the consolidated balance sheet.

Legal proceedings

We are a party from time to time to what we believe are routine litigation and proceedings considered part of the ordinary course of our business. We believe that the outcome of such existing proceedings would not have a material adverse effect on our financial position, results of operations or cash flows.

NOTE G COMPREHENSIVE INCOME (LOSS)

The following table presents the components of comprehensive income (loss) for the three and nine months ended September 30, 2005 and 2004.

	Three months ended September 30,		Nine months ended September 30,	
	2005	2004	2005	2004
Net income (loss)	\$ 31,525	\$ (314)	\$ 79,527	\$ 2,685
Changes in other comprehensive income (loss), net of tax:				
Foreign currency translation adjustments	1,103	1,691	(4,363)	(79)
Unrealized gains (losses) on derivative financial instruments:				
Net change from periodic revaluations	38,757	1,873	54,079	3,988
Net amount reclassified to income	(4,556)	(435)	(6,849)	(3,028)
Income tax effect	(12,985)	(544)	(16,883)	(363)
Net unrealized gains (losses) on derivative financial instruments	21,216	894	30,347	597
Comprehensive income (loss)	\$ 53,844	\$ 2,271	\$ 105,511	\$ 3,203

See Note L- Market Risk Management Using Financial Instruments for further information relating to our hedging activities.

NOTE H SEGMENT REPORTING

Description of the Types of Products and Services from which Each Reportable Segment Derives its Revenues

We have the following operating segments: rolled products, aluminum recycling, specification alloy, zinc and international.

Our rolled products segment represents the aluminum rolling operations of Commonwealth acquired in December 2004. The aluminum recycling and specification alloy operating segments have been aggregated for reporting purposes into one reporting segment for financial reporting purposes, the aluminum recycling segment. This segment represents all of our aluminum melting, processing, alloying, trading and salt cake recycling activities within the United States. We have aggregated these businesses because the products produced are identical (except for minor differences in chemical composition) and are delivered in the same manner (either molten or in bars), the raw materials used are very similar and the production processes and equipment used are identical. Our international segment represents all of our aluminum melting, processing, alloying and trading activities outside the United States. Our zinc segment represents all of our zinc melting, processing and trading activities.

Measurement of Segment Profit or Loss and Segment Assets

The accounting policies of the reportable segments are the same as those described in Note A Basis of Presentation and Summary of Significant Accounting Policies of our Form 10-K for the year ended December 31, 2004. We evaluate performance based on operating income or loss. Provisions for income taxes, restructuring and merger-related charges, interest, corporate general and administrative costs, including depreciation of corporate assets and amortization of capitalized

debt costs, are not allocated to the reportable segments. Additionally, beginning in the quarter ended March 31, 2005, management no longer includes unrealized gains and losses on derivative financial instruments or asset write-downs within their determination of segment profit and loss. The 2004 segment income has been adjusted to reflect this presentation. Intersegment sales and transfers are recorded at market value; net profits on intersegment sales and transfers were immaterial for the periods presented. Consolidated cash, long-term debt, net capitalized debt costs, deferred tax assets and liabilities and assets located at our headquarters office are not allocated to the reportable segments.

Factors Management Used to Identify Our Reportable Segments

Our reportable segments are business units that offer different types of metal products and services in different geographic locations. The reportable segments are each managed separately, because they produce distinct products and services and sell to different types of customers. The following table shows our segment assets for the indicated periods:

	September 30, 2005	December 31, 2004
Assets:		
Rolled products	\$ 499,525	\$ 490,932
Aluminum recycling	265,259	248,673
International	241,148	214,437
Zinc	107,004	108,922
Other unallocated assets	57,874	18,185
Total assets	\$ 1,170,810	\$ 1,081,149

The following table shows our revenues and segment income for the three and nine month periods ended September 30, 2005 and 2004.

	Three months ended September 30,		Nine months ended September 30,	
	2005	2004	2005	2004
Revenues:				
Rolled products	\$ 270,521	\$	\$ 942,830	\$
Aluminum recycling	134,696	138,072	409,136	419,682
International	96,155	93,472	299,774	276,739
Zinc	60,149	51,500	175,068	157,570
Intersegment revenues	(6,602)		(23,301)	
Total revenues	\$ 554,919	\$ 283,044	\$ 1,803,507	\$ 853,991
Segment income:				
Rolled products	\$ 35,920	\$	\$ 123,724	\$
Aluminum recycling	7,987	4,338	20,953	20,225

Zinc	4,773	2,384	14,865	9,161

Edgar Filing: Aleris International, Inc. - Form 10-Q

Total segment income	\$ 51,393	\$ 12,804	\$ 169,936	\$ 45,912
Unallocated amounts:				
General and administrative expenses	\$ (14,372)	\$ (5,457)	\$ (42,368)	\$ (21,350)
Restructuring and merger-related charges	(1,024)		(4,821)	
Interest expense	(9,777)	(6,643)	(30,053)	(19,948)
Unrealized gains (losses) from derivative financial instruments	2,747	(859)	(10,389)	640
Interest and other income, net	291	56	1,326	28
Earnings (loss) before provision for income taxes and minority interests	\$ 29,258	\$ (99)	\$ 83,631	\$ 5,282

NOTE I STOCK-BASED COMPENSATION

We follow Accounting Principles Board Opinion No. 25 (APB 25), Accounting for Stock Issued to Employees, and related interpretations in accounting for our employee stock options. Under APB 25, if the exercise price of employee stock options equals the market price of the underlying stock on the date of grant, no compensation expense is recorded. For grants of non-vested shares and units, compensation expense is determined based upon the fair value of the underlying stock at the date of

grant and recognized over the vesting period. We have adopted the pro forma disclosure features of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation, as amended by Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure. Our net income (loss) and earnings (loss) per share would have been reduced to the pro forma amounts shown below if compensation cost had been determined based on the fair value at the grant dates.

	Three months ended September 30,		Nine months ended September 30,	
	2005	2004	2005	2004
Net income (loss), as reported	\$ 31,525	\$ (314)	\$ 79,527	\$ 2,685
Add: stock-based compensation expense included in reported net income (loss), net of tax	853	82	2,199	1,366
Less: compensation cost determined under the fair value method, net of tax	(1,619)	(239)	(4,104)	(1,854)
Pro forma net income (loss)	\$ 30,759	\$ (471)	\$ 77,622	\$ 2,197
Basic earnings (loss) per share:				
As reported	\$ 1.03	\$ (0.02)	\$ 2.62	\$ 0.18
Pro forma	1.01	(0.03)	2.56	0.15
Diluted earnings (loss) per share:				
As reported	\$ 1.01	\$ (0.02)	\$ 2.55	\$ 0.18
Pro forma	0.98	(0.03)	2.49	0.14

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 123(R) (SFAS 123(R)), Share-Based Payments, that, upon implementation, will impact our net income and earnings per share, and change the classification of certain elements of the statement of cash flows. The provisions of SFAS 123(R) are similar to those of SFAS 123; however, SFAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements as compensation cost based on their fair value on the date of grant. The fair value of share-based awards will be determined using option pricing models (e.g., Black-Scholes or binomial models) and assumptions that appropriately reflect the specific circumstances of the awards. Compensation cost will be recognized over the vesting period based on the fair value of awards that actually vest.

Consistent with the provisions of the new standard, we intend to adopt SFAS 123(R) on January 1, 2006, implementing its fair value measurement requirements on a prospective basis. We are in the process of evaluating the use of certain option-pricing models as well as the assumptions to be used in such models. We do not currently anticipate that the impact on net income on a quarterly basis of the adoption of SFAS 123(R) will be significantly different from the historical pro forma impacts as disclosed above in accordance with SFAS 123. Future results will be impacted by the number and value of additional stock option grants.

NOTE J INCOME TAXES

Our effective tax rate was 4.2% and 47.0% for the nine months ended September 30, 2005 and 2004, respectively. The effective tax rate for the nine months ended September 30, 2005 differed from the federal statutory rate applied to earnings before income taxes primarily as a result of the reversal of deferred tax valuation allowances against U.S. federal deferred tax assets. During the quarter, we reduced our estimated effective tax rate from the 10.8% rate used in the second quarter to 4.2%. This reduction resulted primarily from the tax benefit associated with the reversal of U.S. federal valuation allowance resulting from the increased deferred tax liabilities associated with the deferred gains on our natural gas hedges. The income tax expense for the three months ended September 30, 2005 includes the impact of this rate reduction partially offset by recorded foreign, state and local income tax expense.

Edgar Filing: Aleris International, Inc. - Form 10-Q

At September 30, 2005 and December 31, 2004, we had valuation allowances totaling approximately \$17,000 and \$48,604, respectively, to reduce certain deferred tax assets to amounts that are more likely than not to be realized. The remaining valuation allowances relate to our potential inability to utilize certain U.S. federal deferred tax assets, foreign net operating loss carry forwards and U.S. state net operating loss and tax credit carry forwards. We intend to maintain the existing valuation allowances until sufficient positive evidence exists (such as cumulative positive earnings and estimated future taxable income) to support their reversal. Any subsequent reversal of the tax valuation allowances will result in a reduction in the otherwise determinable income tax expense.

In December 2004, the FASB issued FASB Staff Position No. 109-2, (FSP 109-2) Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision Within the American Jobs Creation Act of 2004. The American Jobs Creation Act of 2004 introduced a temporary incentive for U.S. multinationals to repatriate earnings accumulated outside the U.S. by

providing a one time tax deduction of 85 percent for certain foreign earnings from controlled foreign corporations. We have elected to continue to reinvest the earnings of our foreign subsidiaries in our foreign operations. As a result, this Act and FSP 109-2 will not have an impact on our financial position or results of operations.

NOTE K EMPLOYEE BENEFITS

Defined Benefit Pension Plans

Our domestic non-contributory defined benefit pension plans cover substantially all salaried and non-salaried employees formerly employed by Commonwealth. The plan benefits are based primarily on years of service and employees' compensation during employment for all employees not covered under a collective bargaining agreement and on stated amounts based on job grade and years of service prior to retirement for non-salaried employees covered under a collective bargaining agreement.

VAW-IMCO maintains a defined benefit pension plan for its employees. This plan is based on final pay and service, but some VAW-IMCO senior officers are entitled to receive enhanced pension benefits. Benefit payments are financed, in part, by contributions to a relief fund which establishes a life insurance contract to secure future pension payments; however, the plan is a substantially unfunded plan under German law. The unfunded accrued pension cost is covered under a pension insurance association under German law if VAW-IMCO is unable to fulfill its obligations.

Components of the net periodic benefit expense for the three and nine months ended September 30, 2005 and 2004 are as follows:

	U.S. Pension Benefits		European Pension Benefits			
			Three months ended		Nine months ended	
			September 30,		September 30,	
	Three months ended September 30, 2005	Nine months ended September 30, 2005	2005	2004	2005	2004
Service cost	\$ 658	\$ 2,165	\$ 140	\$ 117	\$ 436	\$ 353
Interest cost	1,699	5,099	234	219	728	658
Amortization of net loss			(2)	35	124	107
Expected return on plan assets	(1,804)	(5,412)	(2)		(8)	
Net periodic benefit cost	\$ 553	\$ 1,852	\$ 370	\$ 371	\$ 1,280	\$ 1,118

Other Postretirement Benefit Plans

Edgar Filing: Aleris International, Inc. - Form 10-Q

As a result of the acquisition of Commonwealth, we acquired a health care and life insurance benefit plan covering certain employees hired by Commonwealth on or before September 1, 1998. We accrue the cost of postretirement benefits within the covered employees' active service periods. The components of net postretirement benefit expense for the three and nine months ended September 30, 2005 are as follows:

	Three months ended September 30, 2005	Nine months ended September 30, 2005
Service cost	\$ 127	\$ 327
Interest cost	611	1,736
Amortization of net gain	(31)	(31)
	\$ 707	\$ 2,032

NOTE L MARKET RISK MANAGEMENT USING FINANCIAL INSTRUMENTS

Overview

We are engaged in activities that expose us to various market risks, including the effects of natural gas prices and future selling prices of aluminum and zinc. These financial exposures are managed as an integral part of our risk management program, which seeks to reduce the potentially adverse effects that market volatility may have on operating results by entering into derivative financial instruments. We do not engage in speculative transactions, nor do we hold or issue financial instruments for trading purposes. We evaluate and document each derivative financial instrument when entered into.

We are exposed to losses in the event of non-performance by the counter-parties to the financial hedge agreements and futures contracts referred to above; however, we do not currently anticipate any non-performance by counter-parties. The counter-parties are evaluated for creditworthiness and risk assessment prior to initiating trading activities with the brokers. We do not require collateral to support broker transactions.

Gains and losses related to certain of these derivative financial instruments accumulate on our balance sheet (in other comprehensive income (loss)) until the maturity of the respective hedging agreements. Unrealized net gains included in other comprehensive income totaled \$45,413 (\$28,168 net of tax) at September 30, 2005. Certain other derivative financial instruments do not meet the effectiveness tests of Statement of Financial Accounting Standards No. 133 (SFAS 133), Accounting for Derivative Instruments and Hedging Activities, as amended, and, as a result, deferral of unrealized gains and losses is not permitted. For these derivative financial instruments, unrealized gains and losses are included in the current periods consolidated operating results. Unrealized gains and (losses) included in operating results totaled \$2,747 and \$(859) for the three months ended September 30, 2005 and 2004, respectively, and \$(10,389) and \$640 for the nine months ended September 30, 2005 and 2004, respectively. These unrealized gains and losses are not included in management's determination of segment profit and loss.

Upon settlement, gains and losses realized related to all derivative financial instruments are recognized in the respective segment's cost of sales. Cost of sales was reduced by \$5,379 and \$1,236 during the three months ended September 30, 2005 and 2004, respectively, and by \$12,260 and \$4,833 during the nine months ended September 30, 2005 and 2004, respectively, as a result of such realized gains. The fair value gains and losses related to open derivative financial instruments are classified as derivative financial instruments, other long term assets and other current liabilities, respectively, in the consolidated balance sheet and total \$42,856, \$10,597 and \$1,633, respectively, as of September 30, 2005. As of September 30, 2005, we estimate that over the next three months we will recognize in earnings deferred gains from the settlement of our hedging instruments of \$14,700 for natural gas, aluminum and zinc. Actual amounts realized will inevitably differ from our estimates. In addition, our deferred hedging activities reduce, but do not eliminate, the effect of volatile aluminum, zinc and natural gas prices on our operations.

Natural Gas Hedging

In order to manage our price exposure for natural gas purchases, we have fixed the future price of a portion of our natural gas requirements by entering into financial hedge agreements. Under these agreements, payments are made or received based on the differential between the monthly closing price on the New York Mercantile Exchange (NYMEX) and the contractual hedge price. These contracts are accounted for as cash flow hedges, with gains and losses recognized in cost of sales in the same period as the underlying gas purchases. In addition, we have cost escalators included in some of our long-term supply contracts with our customers, which limit our exposure to natural gas price risk.

As of September 30, 2005, we had outstanding swap agreements to hedge our anticipated domestic natural gas requirements for approximately 86% of our expected remaining 2005 natural gas needs and 59% of our expected 2006 natural gas needs. As of September 30, 2005, the fair value gain of these contracts totaled \$49,906 of which \$44,934 (\$27,871 net of tax) is deferred within other comprehensive income. Natural gas hedging activities decreased cost of goods sold by \$4,806 and \$600 during the three months ended September 30, 2005 and 2004, respectively, and by \$7,966 and \$2,091 for the nine months ended September 30, 2005 and 2004, respectively.

Aluminum Hedging

The aluminum recycling segment enters into futures sale contracts with metal brokers to fix the margin on a portion of the aluminum generated by its salt cake processing facility in Morgantown, Kentucky and a portion of the aluminum generated for sale from the processing of other scrap metal. These futures sale contracts are settled in the month of shipment. The aluminum recycling segment also enters into forward purchase contracts to fix the price of future aluminum purchases. As of September 30, 2005, the fair value deferred gain associated with the aluminum recycling segment's open futures and forward contracts was approximately \$31 (\$19 net of tax).

Our aluminum recycling segment's income (decreased) increased by \$(473) and \$(311) during the three months ended September 30, 2005 and 2004, respectively, and by \$(1,301) and \$462 during the nine months ended September 30, 2005 and 2004, respectively, for settled metal hedging contracts.

The rolled products segment enters into futures contracts to manage exposure to price risk related to aluminum purchases. We have designated these futures contracts as cash flow hedges of anticipated aluminum raw material purchases. Unlike the derivative financial instruments entered into by the aluminum recycling segment, these contracts do not meet the requirements set forth in SFAS 133, as amended, for deferral of unrealized gains and losses. Accordingly, the derivative instruments were marked-to-market and the unrealized gains and losses during the three and nine months ended September 30, 2005, totaling net gains (losses) of \$4,756 and \$(8,397), respectively, were recorded in the consolidated statement of income rather than being deferred in other comprehensive income.

As of September 30, 2005, the rolled products segment held open aluminum futures contracts with a fair value gain of \$1,954. In addition, our rolled products segment's income (decreased) increased by \$(36) and \$4,061 for settled metal hedging contracts during the three and nine months ended September 30, 2005, respectively.

VAW-IMCO also enters into forward sales and purchase contracts to mitigate the risk associated with changes in metal prices. The functional currency of VAW-IMCO is the Euro; however, certain of the derivatives utilized in hedging the market risk of changing prices of aluminum purchases and sales at VAW-IMCO facilities are based in U.S. Dollars. This results in foreign currency risk in addition to the risk of changing aluminum prices.

The unrealized gains and losses on VAW-IMCO's derivative contracts do not qualify for deferred treatment under SFAS 133. Unrealized (losses) gains related to VAW-IMCO's metal hedges totaled \$(1,935) and \$(659) during the three months ended September 30, 2005 and 2004, respectively, and \$(2,392) and \$840 during the nine months ended September 30, 2005 and 2004, respectively. Realized gains on settled metal hedging contracts increased the international segment's income by \$871 and \$600 for the three months ended September 30, 2005 and 2004, respectively, and by \$1,793 and \$1,607 for the nine months ended September 30, 2005 and 2004, respectively.

As of September 30, 2005, VAW-IMCO had forward purchase contracts and forward sales contracts having a net fair value of \$(574).

None of our other international locations engage in commodity hedging, as their processing activities consist mainly of tolling, where customer-owned scrap and dross is processed by us for a fee.

Zinc Hedging

In the normal course of business, we enter into fixed-price forward sales and purchase contracts with a number of our zinc customers. In addition, in order to hedge the risk of higher metal prices, we enter into long positions, principally using future purchase contracts. These contracts are settled in the month of the corresponding production or shipment. At September 30, 2005, the fair value deferred gain associated with future sales and purchase contracts totaled \$448 (\$278 net of tax).

Realized gains (losses) on settled zinc metal hedging contracts increased (decreased) the segment's income by \$210 and \$346 for the three months ended September 30, 2005 and 2004, respectively, and by \$(259) and \$673 for the nine months ended September 30, 2005 and 2004, respectively.

NOTE M - RECENTLY ISSUED ACCOUNTING STANDARDS

In March 2005, the FASB issued FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations*. This Interpretation requires companies to recognize a liability for the fair value of a legal obligation to perform asset retirement activities that are conditional on a future event if the amount can be reasonably estimated. The Interpretation is effective for the year ending December 31, 2005. We are currently evaluating the impact that this Interpretation may have on our future financial position and results of operations.

Edgar Filing: Aleris International, Inc. - Form 10-Q

In November 2004, the FASB issued Statement of Financial Accounting Standards No. 151 (SFAS 151), Inventory Costs, an amendment of ARB No. 43, Chapter 4. The amendments made by SFAS 151 clarify that abnormal amounts of idle facility expense, freight, handling costs and wasted materials should be recognized as current-period charges and require the allocation of fixed production overhead to inventory to be based on the normal capacity of the underlying production facilities. SFAS 151 is effective for fiscal years beginning after September 15, 2005. We are currently evaluating the impact that this Statement may have on our future financial position and results of operations.

NOTE N CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Certain of our subsidiaries (Guarantor Subsidiaries) are guarantors of the indebtedness of the Company under its 10³/₈% senior secured notes and 9% senior notes. See Note D - Long-Term Debt. For purposes of complying with the reporting requirements of the Guarantor Subsidiaries, presented below are condensed consolidating financial statements of Aleris International, Inc., the Guarantor Subsidiaries, and those subsidiaries of Aleris International, Inc. that are not guaranteeing the indebtedness under the senior secured notes and senior notes (Non-guarantor Subsidiaries).

Edgar Filing: Aleris International, Inc. - Form 10-Q

Condensed consolidating financial information for the Company, the Guarantor subsidiaries, and the Non-guarantor subsidiaries is as follows:

NOTE O SUBSEQUENT EVENTS

On October 3, 2005, we acquired all of the issued and outstanding stock of ALSCO Holdings, Inc., the parent company of ALSCO Metals Corporation, for approximately \$144,000, plus expenses. The acquisition was funded with cash on hand and \$100,000 of borrowings under our senior credit facility. ALSCO Metals Corporation is headquartered in Raleigh, North Carolina and is one of North America's largest suppliers of aluminum building products with estimated annual revenues of \$283,000.

In November 2005, we announced the closure of our rolled products facility located in Carson, California as the first phase of our plan to integrate ALSCO. We estimate the closure will result in restructuring charges related to asset impairments, employee termination benefits and other costs ranging from \$22,000 to \$25,000 in the fourth quarter of 2005 and \$3,000 to \$5,000 in 2006.

Also in November 2005, we entered into a definitive purchase agreement to acquire certain assets of Ormet Corporation for a purchase price of \$133,000.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Dollars and pounds in thousands, except per share and per pound data)

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

The following is a discussion of our financial condition and results of operations for the periods presented. This discussion should be read in conjunction with the financial statements and notes and other financial information appearing elsewhere in this Form 10-Q, as well as in our Annual Report on Form 10-K for the year ended December 31, 2004.

The discussions of our financial condition and results of operations may include various forward-looking statements about future costs and prices of commodities, production volumes, market trends, demand for our products and services and projected results of operations. Statements contained in this Form 10-Q that are not historical in nature are considered to be forward-looking statements. They include statements regarding our expectations, hopes, beliefs, estimates, intentions or strategies regarding the future. The words believe, expect, anticipate, intend, estimate, will, look forward to and similar expressions are intended to identify forward-looking statements. Forward-looking statements contained in this Form 10-Q and elsewhere are based on certain assumptions that we consider reasonable.

The expectations set forth in this report regarding, among other things, achievement of anticipated cost savings and synergies; estimates of volumes, revenues, profitability and net income in future quarters; future prices and demand for our products; and estimated cash flows and sufficiency of cash flows to fund capital expenditures, reflect only our expectations regarding these matters. Actual results could differ materially from these expectations, depending on certain risk factors that generally affect our business such as:

our success in (and the costs of) integrating acquired businesses into Aleris;

our ability to successfully implement our business strategy;

our substantial leverage and debt service obligations;

the cyclical nature of the metals industry, our end-use segments and our customers' industries;

the rate of automobile production and a continuation of the increasing use of aluminum in automobiles in North America and Europe;

the ability to retain the services of certain members of our management;

our ability to continue to generate positive operating results;

changes in energy prices, raw materials costs and fuel costs;

competition for and the increase in our costs for scrap metal and the affect on our sales margins;

Edgar Filing: Aleris International, Inc. - Form 10-Q

availability of aluminum and zinc scrap at advantageous prices;

our ability to maintain effective internal control over financial reporting under the Sarbanes-Oxley Act of 2002;

our ability to effectively manage our exposure to commodity price fluctuations;

the loss of order volumes from any of our largest customers;

our substantial leverage and debt service obligations;

unexpected higher costs related to our pension and postretirement health benefit plans;

inflation;

covenant restrictions under our indebtedness;

the effect of current and future environmental and governmental regulations;

our ability to obtain additional financing on acceptable terms when necessary;

changes in the pricing of metals;

competitor pricing activity and the general impact of competition;

our ability to generate sufficient cash flows to fund our capital expenditure requirements;

risks of investing in and conducting operations in foreign countries, including political, social, economic, currency and regulatory factors;

labor relations (i.e., disruptions, strikes or work stoppages) and labor costs;

future levels of capacity utilization at our plants;

changes in and customer acceptance of new processes and technologies;

the impact terrorist activities may have on the economy and our businesses in general; and

the state of international, national, regional and local economies.

These factors and other risk factors disclosed in this report and elsewhere are not necessarily all of the important factors that could cause our actual results to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors could also harm our results. Consequently, there can be no assurance that the actual results or developments anticipated by us will be realized or, even if substantially realized, that they will have the expected consequences to, or effects on, us. Given these uncertainties, you are cautioned not to place undue reliance on such forward-looking statements.

The forward-looking statements contained in this report are made only as of the date hereof. We do not undertake, and specifically decline any obligation, to update any forward-looking statements or to publicly announce the results of any revisions to any of such statements to reflect future events or developments.

Additional risks, uncertainties and other factors that may cause our actual results, performance or achievements to be different from those expressed or implied in our written or oral forward-looking statements may be found in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Risk Factors contained in our Annual Report on Form 10-K for the year ended December 31, 2004.

OVERVIEW

We are a global leader in aluminum recycling and the production of specification alloys and a major North American manufacturer of rolled aluminum products. We are also a leading manufacturer of value-added zinc products that include zinc oxide, zinc dust and zinc metal. Our December 2004 acquisition of Commonwealth Industries created a vertically integrated aluminum recycler and sheet manufacturer having 29 production facilities worldwide.

Explanatory Note

As discussed below, we recently completed the acquisition of ALSCO Holdings, Inc. on October 3, 2005. The rules of the Securities Exchange Act of 1934 (the Exchange Act) require us to file three years of historical audited financial statements of ALSCO by December 19, 2005. Such historical audited financial statements of ALSCO are not available and, therefore, we do not expect to be able to file three years of historical audited financial statements for ALSCO by December 19, 2005. However, prior to December 19, 2005, we intend to file all available historical audited financial statements which include the nine months ended September 30, 2005, the year ended December 31, 2004 and the seven months ended December 31, 2003. As a result of not being able to timely file with the SEC the required historical audited financial statements of ALSCO, we will not be in technical compliance with the requirements of the Exchange Act.

We evaluate and review our results of operations based on four reportable business segments: rolled products, aluminum recycling, international and zinc. Segment operating profit performance includes segment-specific selling, general and administrative expenses, but excludes corporate general and administrative expenses, unrealized gains and losses on derivative financial instruments, restructuring and merger-related charges, interest expense, interest and other income and provisions for income taxes. Comparable segment financial information for the three and nine months ended September 30, 2004 contained in this report has been revised to reflect these corporate and segment income and cost allocations.

Operating results for the three and nine months ended September 30, 2005 as compared to the prior year periods reflect the dramatic impact of the acquisition of Commonwealth, which represents our rolled products segment. The rolled products segment accounted for approximately 49% and 52% of our consolidated revenues and approximately 70% and 73% of our total segment income for the three and nine months ended September 30, 2005, respectively. Third quarter 2005 revenues from our aluminum recycling segment decreased approximately 2% from 2004's third quarter primarily as a result of reduced demand for product sales to the automotive industry while segment income increased in both the quarter and year to date periods primarily due to the 2004 bankruptcy of a significant customer which reduced segment revenue and income by \$3,200 in the third quarter of 2004. Our zinc segment benefited from 32% higher average zinc prices on the London Metal Exchange (LME) during the third quarter of 2005 as compared to the third quarter of 2004, which more than offset a 13% reduction in pounds processed. Our international segment's third quarter revenues increased over the prior year as a result of the acquisition of Aleris Latasa Reciclagem (formerly Tomra Latasa Reciclagem) (Aleris Latasa) which offset lower revenues in Germany. Increasing scrap aluminum prices and higher fuel costs in Germany reduced segment income in both the three and nine month periods of 2005.

Total consolidated revenues and gross profit for the nine months ended September 30, 2005 exceeded pro forma combined revenues and gross profit for Aleris for 2004's first nine months by 8% and 71%, respectively, after giving effect to the Commonwealth acquisition and related transactions as if they had occurred on January 1, 2004. The significant improvement in the pro forma operating results reflects the benefits of higher conversion margins per pound in the rolled products segment.

During 2005's third quarter we continued to implement the restructuring and consolidation plans we had previously announced, recording additional restructuring charges totaling \$1,024 related primarily to the termination of the operating lease for our former headquarters in Irving, Texas. As additional aspects of our plans to integrate the rolled product segment are finalized and communicated, additional adjustments to the preliminary purchase price allocation and for additional restructuring charges may be required. We expect to complete our integration efforts by December 31, 2005.

Our improved operating results led to the generation of \$113,639 of cash flow from operating activities, allowing us to pay down the \$50,798 of borrowings on our revolving credit facility outstanding as of December 31, 2004 and leaving us with \$64,444 of cash and cash equivalents as of September 30, 2005.

Interest expense for the first nine months of 2005 increased approximately 51% over interest expense incurred in the first nine months of 2004 due to the impact of the merger. Interest expense during the three months ended September 30, 2005 was 47% higher than 2004's third quarter due to the impact of the merger, which was partially offset by the repayment of amounts borrowed on our revolving credit facility from our cash flows from operations. Our ability to further reduce interest expense is limited due to the fact that the instruments governing the terms of approximately 90% of our current outstanding indebtedness are not redeemable until 2006 or later and contain restrictive features regarding prepayment, including prepayment premiums and penalties. In addition, as discussed below, our indebtedness has increased since September 30, 2005 as a result of the acquisition of ALSCO Holdings, Inc.

The primary aluminum pricing market continues to experience price volatility. We attempt to manage that volatility by entering into derivative financial instruments. However, the aluminum hedges in our rolled products and international segments do not qualify for deferred treatment of unrealized gains and losses under Statement of Financial Accounting Standards No. 133 (SFAS 133), Accounting for Derivative Instruments and Hedging Activities, as amended, which may result in greater volatility in our results of operations for future quarters. This volatility does not impact the economic substance of our hedging strategy, which is intended to insulate material margins from subsequent changes in metal prices. During the third quarter of 2005, we recorded unrealized gains of \$2,747 as the LME price of aluminum increased from June 30, 2005.

Our income tax expense for the first nine months of 2005 represents an effective income tax rate of 4.2%, the rate we currently anticipate using for all of fiscal 2005. This rate is less than the federal statutory rate of 35% due primarily to the reduction in previously recorded valuation allowances established against U.S. deferred tax assets. As a result of the reduction in valuation allowances during the current year, we expect that the effective income tax rate will more closely approximate the federal statutory rate in 2006.

We are planning to continue to make strategic acquisitions in order to grow our business. Our criteria for acquisitions include a continued focus on our core rolled products and recycling business, potential opportunities to diversify end-uses for our rolled products and recycling businesses and potential opportunities in faster-growing geographic regions of the world, such as South America, Eastern Europe and Asia. On August 31, 2005, we acquired Aleris Latasa, a recycling operation in Sao Paulo, Brazil for a cash purchase price of approximately \$17,380, net of cash acquired. We feel this acquisition will help to secure our position in Brazil as well as provide additional manufacturing capabilities.

On October 3, 2005, we completed the acquisition of ALSCO Holdings, Inc., the parent company of ALSCO Metals Corporation. Headquartered in Raleigh, North Carolina, ALSCO manufactures a broad range of residential aluminum building products for the new home, home-improvement and remodeling markets. ALSCO's product line includes aluminum trim coil, soffits, accessories, siding, rainware, roof moldings and painted aluminum coil, which are primary materials used in conjunction with vinyl siding. ALSCO has operating facilities in Richmond, Virginia, Ashville, Ohio, Roxboro, North Carolina and Beloit, Wisconsin. We believe this acquisition will provide us with an opportunity to optimize operations and provide additional metal sourcing and processing opportunities. The purchase price of approximately \$144,000 was funded through available cash and borrowings of \$100,000 under our senior credit facility.

In November 2005, we announced the closure of our rolled products facility located in Carson, California which represents the first phase of our plans to integrate ALSCO. This closure will allow us to better utilize the production capacity of our remaining, more efficient and cost effective rolled products facilities. Costs associated with the closure are expected to range from \$25,000 to \$30,000 and consist of asset impairments, employee termination benefits, and other costs. Approximately \$22,000 to \$25,000 of these costs are expected to be incurred in the fourth quarter of 2005 with the remaining costs expected to be incurred in 2006.

Also in November 2005, we entered into a definitive purchase agreement to acquire certain assets of Ormet Corporation for a purchase price of \$133,000.

We continue to pay close attention to various trends and uncertainties that concern our business. Positive trends in recent periods have been the increase in average selling price per pound of rolled aluminum products shipped, and the increased material margins for those products. Lower volumes of rolled products shipped during the third quarter of 2005 were largely the result of the continuation of customer inventory reductions that began in the second quarter. Negatively affecting our consolidated revenues during the third quarter of 2005 was a reduction in demand from our automotive industry customers for our aluminum recycling and zinc segments' products. Higher domestic natural gas costs and increased costs of scrap metal materials in Europe have also negatively affected our gross profits in 2005. We expect many of these trends to continue for the short term. The present uncertainties concerning the future demand for manufacturing, strength of the housing market and volume of automobile production make it difficult for us to accurately forecast our future results of operations.

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2005 COMPARED TO THE THREE MONTHS ENDED SEPTEMBER 30, 2004 AND FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2005 COMPARED TO THE NINE MONTHS ENDED SEPTEMBER 30, 2004

TOTAL COMPANY ANALYSIS

The following table presents key financial and operating data on a consolidated basis for the three and nine months ended September 30, 2005 and 2004 as well as pro forma operating results, assuming that Aleris and Commonwealth had been operating together on a consolidated basis since January 1, 2004, for the three and nine months ended September 30, 2004:

Actual Results				Pro Forma Results	
Three months ended September 30,		Nine months ended September 30,		Three months ended September 30,	Nine months ended September 30,
2005	2004	2005	2004	2004	2004

Edgar Filing: Aleris International, Inc. - Form 10-Q

Revenues	\$ 554,919	\$ 283,044	\$ 1,803,507	\$ 853,991	\$ 583,949	\$ 1,666,596

Earnings (loss) per diluted share	\$ 1.01	\$ (0.02)	\$ 2.55	\$ 0.18	\$ 0.06	\$ (0.23)
Total recycling pounds of metal processed	834,575	863,047	2,504,533	2,532,970	863,047	2,532,970
Rolled products pounds shipped	201,079		698,731		263,140	758,043

Revenues and Production

Consolidated revenues in the third quarter of 2005 were \$271,875, or 96%, higher than the third quarter of 2004 while year to date revenues were \$949,516, or 111%, higher than the first nine months of 2004. The increases resulted from the inclusion of the rolled products segment's results in our consolidated totals during 2005. Revenues from the rolled products segment, which is comprised of the historical Commonwealth operations, totaled \$270,521 and \$942,830 in the third quarter and first nine months of 2005, respectively. In addition, our international segment's revenue increased \$2,683 and \$23,035 during the

third quarter and first nine months of 2005, respectively, compared to the prior year periods. The acquisition of Aleris Latasa accounted for \$6,775 of the increase in revenues for the quarter which was partially offset by a \$3,832 decrease in revenues from our German operations. The international segment's revenues for the nine months ended September 30, 2005 increased due to the acquisition of Aleris Latasa in August 2005, as well as the stronger Euro, which increased revenues by approximately \$7,800. The aluminum recycling segment's revenues decreased \$3,376 and \$10,546 during the third quarter and first nine months of 2005, respectively, compared to the comparable periods of the prior year. These decreases resulted from lower product sales to customers in the automotive industry. In addition, third quarter 2004 revenues were negatively impacted by the bankruptcy of a major customer which prohibited the recognition of \$3,200 of revenues related to shipments made in the quarter. Our zinc segment's revenues increased \$8,649 compared to the third quarter of 2004 and increased \$17,498 compared to the first nine months of 2004 as increased selling prices per pound resulting from higher LME zinc prices offset volume reductions. Intersegment revenues from the recycling segment to the rolled products segment totaled \$6,602 and \$23,301 for the three and nine months ended September 30, 2005.

On a pro forma basis, our revenues would have decreased by \$29,030 for 2005's third quarter and increased by \$136,911 for the year to date period as compared to the prior year periods. Rolled products pro forma revenues decreased by \$37,976 and increased by \$108,445 during the third quarter and first nine months of 2005, respectively. The reduction in third quarter revenues resulted from a 24% decrease in pounds shipped, which more than offset an increase in average selling prices per pound of 15%. On a year to date basis, the 23% increase in average selling prices per pound more than offset an 8% decline in volume shipped.

Cost of Sales

Cost of sales in the third quarter of 2005 increased \$231,477, or 88%, compared to the third quarter of 2004 while year to date cost of sales increased \$819,525, or 104%, from the prior year. As a percentage of revenues, cost of sales decreased from 93% in the third quarter and first nine months of 2004 to 89% in the third quarter and first nine months of 2005. The increased cost of sales as well as its decreased percentage of sales was due to the inclusion of the operations of the rolled products segment in 2005. The rolled products segment added \$231,620 and \$811,008 of cost of sales to our consolidated results in the third quarter and first nine months of 2005, respectively; however, as a percentage of revenues, rolled products cost of sales were 86% for the three and nine months ended September 30, 2005. Negatively impacting cost of sales of the rolled products segment in the third quarter and first nine months of 2005 were \$1,219 and \$7,914, respectively, of non-cash costs associated with the amortization of the write-up of acquired inventory to fair value and purchase accounting adjustments related to natural gas hedges. Cost of sales from the remaining segments remained constant at 93% of revenues despite higher domestic natural gas prices which increased cost of sales by approximately \$1,450 and \$4,607 over the prior year's third quarter and first nine months, respectively. In addition, the bankruptcy of a major customer reduced revenues by \$3,200 in the third quarter of the prior year.

On a pro forma basis, cost of sales as a percentage of revenues decreased from 94% and 93% in the third quarter and first nine months of 2004, respectively, to 89% for the 2005 periods due to new rolled products' customer agreements beginning in January 2005 which resulted in selling prices per pound increasing at a faster rate than the purchase price of both prime and scrap aluminum. Higher domestic natural gas prices and freight costs as well as the non-cash costs associated with the amortization of the write-up of inventory to fair value and purchase accounting adjustments related to natural gas hedges negatively impacted 2005 cost of sales by approximately \$4,469 and \$18,721 during the three and nine months ended September 30, 2005 as compared to the comparable pro forma periods of 2004. Pro forma cost of sales for the nine months ended September 30, 2004 includes approximately \$2,200 of inventory impairment charges recorded by Commonwealth related to the closure of its tube enterprises.

Gross Profit

Gross profit in the third quarter of 2005 increased \$40,398, or 215%, compared to the third quarter of 2004 while year to date gross profit increased \$129,991, or 207%, from the prior year driven by the inclusion of the rolled products segment and the 2004 bankruptcy of a major customer in the aluminum recycling segment. On a pro forma basis, gross profit for the three and nine months ended September 30, 2005 increased approximately \$23,266 and \$79,821, respectively, from the comparable periods in 2004 driven by the higher selling prices experienced by the rolled products segment.

Selling, General and Administrative Expenses

Selling, general and administrative expenses (SG&A) increased \$10,992, or 99%, in the third quarter of 2005 compared to the third quarter of 2004 while year to date SG&A expenses increased \$27,113, or 72%, from the prior year. As a percentage of revenues, SG&A increased from 3.9% in the third quarter of 2004 to 4.0% during the comparable 2005 period and decreased from 4.4% in the first nine months of 2004 to 3.6 % first nine months of 2005. The increase in SG&A expense in the third quarter is due to higher accruals for incentive compensation in 2005. The decrease in SG&A as a percentage of

revenues in the nine months is due to the increased revenues resulting from the acquisition of Commonwealth and the elimination of duplicative general and administrative positions at both Aleris and Commonwealth as part of our restructuring and integration plans. In addition, SG&A expenses for the nine months ended September 30, 2004 included \$3,665 of compensation expense related to the April 2004 departure of our former chief executive officer.

On a pro forma basis, SG&A increased by \$1,176 in the third quarter of 2005 as compared to the third quarter of 2004 and decreased by \$3,614 in the first nine months of 2005 as compared to 2004. As a percentage of revenues, pro forma SG&A increased from 3.6% in the third quarter of 2004 to 4.0% in the third quarter of 2005 as a result of higher accruals for incentive compensation in 2005 as well as higher expense associated with our other postretirement benefit (OPEB) plan resulting from adjustments made through purchase accounting. SG&A as a percentage of revenues decreased from 4.1% in the pro forma nine months ended September 30, 2004 to 3.6% in 2005 as cost savings generated by our restructuring and integration plans as well as the expenses associated with the departure of our former chief executive officer in 2004 more than offset the increased incentive compensation and OPEB costs.

Restructuring and Merger-Related Charges

Restructuring charges recorded in the third quarter of 2005 include \$734 of lease termination costs and asset impairments resulting from the closure of a portion of our former headquarters in Irving, Texas. In addition, we incurred \$290 of employee relocation benefits related to our previously announced restructuring and integration plans resulting from the acquisition of Commonwealth. In addition to these costs, during the first nine months of 2005, we incurred additional severance, relocation and employee benefits totaling \$2,161, an initial impairment charge for the Irving, Texas headquarters of \$832 and an \$804 asset impairment charge related to idled equipment at our Wendover, Utah recycling facility. See Note C Acquisitions. of the Notes to Consolidated Financial Statements. Restructuring costs included in the pro forma three and nine months ended September 30, 2004 included approximately \$5,300 and \$18,600, respectively, related to the closure of Commonwealth's tube enterprises during the second quarter of 2004 and other restructuring initiatives as well as costs associated with the merger.

Interest Expense

Interest expense in the third quarter of 2005 increased \$3,134, or 47%, from the third quarter of 2004 and by \$10,105, or 51% in the first nine months of 2005 as compared to the prior year period. The increase resulted from higher levels of debt outstanding as a result of the acquisition of Commonwealth. In November 2004 we issued \$125,000 of 9% senior notes and amended and expanded our borrowing capacity under our revolving credit facility. Interest expense related to the 9% senior notes totaled approximately \$2,800 and \$8,400 during the third quarter and first nine months of 2005, respectively, accounting for the majority of the increase in interest expense from 2004. On a pro forma basis, interest expense decreased by \$1,233 and \$2,847 during the third quarter and first nine months of 2005, respectively, as compared to the similar periods of the prior year.

Unrealized Gains (Losses) on Derivative Financial Instruments

Unrealized gains and losses on derivative financial instruments represent the mark-to-market adjustments recorded through the income statement for those derivative instruments that do not meet the effectiveness tests required under SFAS 133. For derivative instruments that are deemed effective under SFAS No. 133, unrealized gains and losses are recorded in other comprehensive income in our consolidated balance sheet. Upon settlement of such contracts, all previously recognized gains and losses are reversed and gains and losses on settlement are recorded in cost of sales. During the three and nine months ended September 30, 2005, we recorded unrealized gains and (losses) totaling \$2,747 and \$(10,389), respectively. We recorded unrealized losses of \$859 during the third quarter of 2004 and unrealized gains of \$640 during the first nine months of 2004.

Income Taxes

Our effective tax rate was 4.2% and 47.0% for the nine months ended September 30, 2005 and 2004, respectively. The effective tax rate for the nine months ended September 30, 2005 differed from the federal statutory rate applied to earnings before income taxes primarily as a result of the reversal of deferred tax valuation allowances against U.S. federal deferred tax assets. During the quarter, we reduced our estimated effective tax rate from the 10.8% rate used in the second quarter to 4.2%. This reduction resulted primarily from the tax benefit associated with the reversal of U.S. federal valuation allowance resulting from increased deferred tax liabilities associated with deferred gains on our natural gas hedges. The income tax expense for the three months ended September 30, 2005 includes the impact of this rate reduction partially offset by recorded foreign, state and local income tax expense.

At September 30, 2005 and December 31, 2004, we had valuation allowances totaling approximately \$17,000 and \$48,604, respectively, to reduce certain deferred tax assets to amounts that are more likely than not to be realized. The remaining valuation allowances relate to our potential inability to utilize certain U.S. federal deferred tax assets, foreign net operating loss carry forwards and U.S. state net operating loss and tax credit carry forwards. We intend to maintain the existing valuation allowances until sufficient positive evidence exists (such as cumulative positive earnings and estimated future taxable income) to support their reversal. Any subsequent reversal of the tax valuation allowances will result in a reduction in the otherwise determinable income tax expense.

Net Income (Loss)

As a result of the factors discussed above, net income (loss) increased to \$31,525 and \$79,527 in the third quarter and first nine months of 2005, respectively, compared to \$(314) and \$2,685 in the comparable periods of 2004.

SEGMENT ANALYSIS

The following discussion of the results of operations for the three and nine months ended September 30, 2005 compared to the three and nine months ended September 30, 2004 presents consolidated information used by management to evaluate the performance of each business segment.

Rolled Products

The following table presents key operating and financial data for the rolled products segment. Data for 2004 is presented on a pro forma basis, reflecting the operations of Commonwealth (excluding that of its discontinued Alflex subsidiary) for the three and nine months ended September 30, 2004 adjusted to give effect to the merger as if it had occurred on January 1, 2004:

	Three months ended September 30,			Nine months ended September 30,		
	Actual	Pro forma	% change	Actual	Pro forma	% change
	2005	2004		2005	2004	
Pounds shipped	201,079	263,140	(24)%	698,731	758,043	(8)%
Revenues	\$ 270,521	\$ 308,497	(12)%	\$ 942,830	\$ 834,385	13%
Segment income	\$ 35,920	\$ 13,457	167%	\$ 123,724	42,176	193%

Rolled products revenues for the three months ended September 30, 2005 decreased \$37,976 as compared to the pro forma revenues for the three months ended September 30, 2004 while year to date revenues increased \$108,445 over the pro forma 2004 period. The decrease in revenues during the third quarter resulted from a 24% decrease in pounds shipped which more than offset a 15% increase in the average selling price per pound shipped. The price increase per pound was driven, in part, by the increased price of primary aluminum as evidenced by a 3% year-over-year increase in the average price of P1020 aluminum as well as by increased conversion margins as new customer agreements went into effect in January 2005. The decrease in third quarter volume resulted from customers in certain markets continuing to reduce inventory levels. The increase in year to date revenues resulted from a 23% increase in selling prices per pound, which reflects an 8% increase in the average P1020 price of primary aluminum as well as higher conversion margins. The higher selling prices per pound were partially offset by an

Edgar Filing: Aleris International, Inc. - Form 10-Q

8% reduction in pounds shipped.

Segment income for the three months ended September 30, 2005 increased \$22,463 in the third quarter of 2005 as compared to the 2004 pro forma third quarter while year to date segment income increased \$81,548 over the 2004 pro forma period. These increases were primarily due to higher material margins which increased approximately 46% and 45% in the third quarter and first nine months of 2005, respectively, from the comparable 2004 pro forma periods as a result of new customer agreements and improved scrap spreads. Partially offsetting these increases in 2005's third quarter and nine months segment income was \$1,219 and \$7,914, respectively, of non-cash costs of sales relating to the amortization of the write-up of acquired inventory to fair value and purchase accounting adjustments related to natural gas hedges and higher freight costs of \$1,800 and \$6,200, respectively.

Aluminum Recycling

	Three months ended September 30,			Nine months ended September 30,		
	2005	2004	% change	2005	2004	% change
Pounds processed	503,164	530,399	(5)%	1,521,095	1,566,820	(3)%
Percentage of pounds processed tolled	52%	52%	0%	52%	51%	1%
Revenues	\$ 134,696	\$ 138,072	(2)%	\$ 409,136	\$ 419,682	(3)%
Segment income	\$ 7,987	\$ 4,338	84%	\$ 20,953	\$ 20,225	4%

For the three and nine month periods ended September 30, 2005, overall production decreased 5% and 3%, respectively, compared to the same periods in the prior year. Within this segment, production decreased at our specification alloy operating segment as a result of reduced demand from the automotive industry, while production at our aluminum recycling operating segment was consistent with the prior year levels.

Revenues decreased in both the three and nine month periods ended September 30, 2005 as a result of decreased demand in the automotive industry served by our specification alloy division which offset improved product mix in the aluminum recycling division. 2004 quarter and year to date revenues were negatively impacted by the bankruptcy of a major customer which precluded the recognition of \$3,200 of revenues related to products shipped to that customer in the third quarter.

Segment income for the three and nine months ended September 30, 2005 increased from the prior year principally as a result of the 2004 bankruptcy of a major customer, lower accruals for incentive compensation and improved operating performance at our Shelbyville, Tennessee specification alloy facility. Natural gas prices have continued to increase and were 19% higher for both the third quarter and first nine months of 2005, as compared to the 2004 periods. The increased cost of natural gas reduced segment income by approximately \$1,430 and \$4,050 in the third quarter and first nine months of 2005, respectively.

International

	Three months ended September 30,			Nine months ended September 30,		
	2005	2004	% change	2005	2004	% change
Pounds processed	273,053	265,608	3%	812,209	780,035	4%
Percentage tolled	59%	61%	(2)%	58%	57%	1%
Revenues	\$ 96,155	\$ 93,472	3%	\$ 299,774	\$ 276,739	8%
Segment income	\$ 2,713	\$ 6,082	(55)%	\$ 10,394	\$ 16,526	(37)%

Third quarter production in 2005 increased from 2004 as a result of the acquisition of Aleris Latasa which contributed 7,700 pounds as well as increased wrought alloy production primarily in Germany. Segment revenues increased \$2,683 in the third quarter due to the acquisition of Aleris Latasa in August 2005, which contributed revenues of \$6,775, offset by lower revenues in Germany. Our German operations reported a \$3,832 decrease in revenues in spite of a 3% increase in production as the traditional summer automotive shut down resulted in a shift to lower priced products. Year to date segment revenues increased \$23,035 compared to the prior year periods due primarily to the acquisition of Aleris Latasa as well as a 3% increase in the value of the Euro against the U.S. Dollar, which increased year to date revenues by approximately \$7,800.

Edgar Filing: Aleris International, Inc. - Form 10-Q

Segment income decreased as tighter scrap spreads resulted in raw material costs increasing relative to selling prices. In addition, third quarter and year to date segment income in 2004 benefited from a \$1,000 one-time gain related to the settlement of a dispute with a customer.

Zinc

	Three months ended			Nine months ended		
	September 30,		% change	September 30,		% change
	2005	2004		2005	2004	
Pounds processed	58,358	67,040	(13)%	171,219	186,115	(8)%
Revenues	\$ 60,149	\$ 51,500	17%	\$ 175,068	\$ 157,570	11%
Segment income	\$ 4,773	\$ 2,384	100%	\$ 14,865	\$ 9,161	62%

Zinc production in the third quarter and first nine months of 2005 lagged prior year periods as a result of weakened demand from galvanizers supplying the automotive industry. The reduction in volume was more than offset by the impact of an approximate 32% and 26% increase in the LME price of zinc in the third quarter and first nine months of 2005, respectively, as compared to prior year periods. Segment income benefited similarly as the rising zinc prices resulted in improved margins.

RECONCILIATION OF SEGMENT INCOME TO EARNINGS (LOSS) BEFORE PROVISION FOR INCOME TAXES AND MINORITY INTERESTS

Items required to reconcile segment income to consolidated earnings (loss) before provision for income taxes and minority interests include: corporate selling, general and administrative expenses, restructuring and merger-related charges, interest expense, unrealized gains and losses on derivative financial instruments, interest expense and other income (expense), net.

The following table reconciles segment information to consolidated totals. Significant changes in reconciling amounts for the three and nine months ended September 30, 2005 compared to the three and nine months ended September 30, 2004 are discussed under the Total Company Analysis section set forth above:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2005	2004	2005	2004
Total segment income	\$ 51,393	\$ 12,804	\$ 169,936	\$ 45,912
Unallocated amounts:				
Corporate SG&A expense	(14,372)	(5,457)	(42,368)	(21,350)
Restructuring and merger-related charges	(1,024)		(4,821)	
Interest expense	(9,777)	(6,643)	(30,053)	(19,948)
Unrealized gains (losses) on derivative financial instruments	2,747	(859)	(10,389)	640
Interest and other income, net	291	56	1,326	28
Earnings (loss) before provision for income taxes and minority interests	\$ 29,258	\$ (99)	\$ 86,631	\$ 5,282

LIQUIDITY AND CAPITAL RESOURCES

We have historically financed our operations and capital expenditures from internally generated cash and available credit facilities. We have traditionally financed our acquisitions and capacity expansions from a combination of funds from long-term borrowings and stock issuances. We believe that our cash on hand, available credit resources and our anticipated internally generated funds will be sufficient to fund our operating needs for at least the next twelve months.

Cash Flows from Operations

Cash flows generated from our operating activities were \$113,639 in the nine months ended September 30, 2005 as compared to \$29,979 in the nine months ended September 30, 2004. Driving this increase was the significant improvement in operating results mainly as a result of the acquisition of Commonwealth. Partially offsetting this increase was an increase of \$31,640 in accounts receivable resulting from higher sales during the month of September 2005 as compared to December 2004. However, days sales outstanding have decreased from 41 days at December 31, 2004 to 39 days at September 30, 2005.

Cash Flows from Investing Activities

Cash flows from investing activities primarily reflect capital expenditures. During the nine months ended September 30, 2005, cash used by investing activities was \$50,908 compared to \$25,860 in the comparable period of 2004. The increased spending is due to the acquisition of Commonwealth and the related capital spending requirements of the rolled products segment, the construction of our new recycling facility in Deizsau, Germany and the acquisition of Aleris Latasa.

Overall capital expenditures for 2005 are expected to be approximately \$58,000. The majority of this amount is planned to be used for the construction of our new recycling facility in Deizsau, Germany, as well as the completion of the Morgantown, Kentucky landfill expansion and Saginaw, Michigan plant expansion.

Cash Flows from Financing Activities

Cash flows from financing activities generally reflect changes in our borrowings and debt obligations. Net cash used by our financing activities was \$15,736 for the nine months ended September 30, 2005, compared to \$9,626 for the same time period in 2004. During the nine months ended September 30, 2005 we reduced our outstanding borrowings under our senior credit facility by \$50,798, and had no borrowings outstanding under this facility at September 30, 2005. Sources of cash from financing activities included \$12,503 from the exercise of 1,174,521 employee stock options, \$14,341 of borrowings under our German credit facilities to begin construction of the new recycling facility in Deizsau, and a \$9,841 reduction in previously restricted cash which was used to acquire fixed assets and for general corporate purposes. During the nine months ended September 30, 2004, we borrowed an additional \$22,391 under the revolving credit facility to fund working capital and capital spending requirements.

As of September 30, 2005, we estimated that our borrowing base would have supported additional borrowings of \$259,574 after giving effect to outstanding letters of credit of \$15,109. As of September 30, 2005, our total borrowing base was approximately \$274,683.

As discussed above, our acquisition of ALSCO was completed on October 3, 2005. After giving effect to approximately \$100,000 in borrowings under our senior credit facility and \$44,000 of our internally generated cash on hand to pay the purchase price for ALSCO, our cash and cash equivalents and outstanding borrowings under our senior credit facility as of September 30, 2005 would have been approximately \$24,444 and \$100,000, respectively. ALSCO's consolidated revenues for the year ended December 31, 2004 were \$266,000 and are expected to be approximately \$283,000 for the year ending December 31, 2005.

EBITDA

We report our financial results in accordance with generally accepted accounting principles (GAAP). However, our management believes that certain non-GAAP performance measures, which we use in managing the business, may provide investors with additional meaningful comparisons between current results and results in prior periods.

EBITDA represents net income, before interest income and expense, provision for income taxes, depreciation and amortization and minority interests, net of provision for income taxes. EBITDA is a non-GAAP financial measure which is presented because we believe that it is a useful indicator of our ability to incur and service debt. EBITDA is also used for internal analysis purposes and is a component of the fixed charge coverage financial covenants under our senior credit facility and our outstanding senior notes. EBITDA should not be construed as an alternative to net income as an indicator of our performance, or cash flows from our operating activities, investing activities or financing activities as a measure of liquidity, in each case as such measure is determined in accordance with GAAP. EBITDA may not be comparable to similarly titled measures used by other entities. Historical EBITDA as presented below may be different than EBITDA as defined under the indentures for our senior notes and the loan agreement for our senior credit facility.

Our reconciliation of EBITDA to net income and net cash from operating activities is as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2005	2004	2005	2004
EBITDA	\$ 52,095	\$ 13,350	\$ 152,279	\$ 46,000
Interest expense	9,777	6,643	30,053	19,948
Interest income	(533)	(110)	(1,169)	(343)
(Benefit from) provision for income taxes	(2,374)	180	3,806	2,475
Depreciation and amortization	13,593	6,916	39,764	21,113
Minority interest, net of provision for income taxes	107	35	298	122
Net income (loss)	\$ 31,525	\$ (314)	\$ 79,527	\$ 2,685
Depreciation and amortization	13,593	6,916	39,764	21,113
Benefit from deferred income taxes	(10,970)	(1,622)	(13,407)	(3,756)
Restructuring and merger-related charges:				
Expenses	1,024		4,821	
Payments	(1,296)		(3,867)	
Deferred compensation expense	787	170	2,295	664
Equity in earnings of affiliates	74	90	295	135
Unrealized (gains) losses on derivative financial instruments	(2,747)	859	10,389	(640)
Other non-cash charges	1,195	308	3,683	4,849
Net change in working capital	17,037	26,134	(9,861)	4,929
Cash provided by operating activities	\$ 50,222	\$ 32,541	\$ 113,639	\$ 29,979

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of our financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates, including those related to the valuation of inventory, property and equipment and goodwill, the effectiveness of our derivative instruments under SFAS 133, allowances for doubtful accounts, workers' compensation liabilities, income taxes, pensions and other postretirement benefits and environmental liabilities. Our management bases its estimates on historical experience, actuarial valuations and other assumptions believed to be reasonable under the circumstances. Actual results could differ from those estimates.

A summary of our significant accounting policies and estimates is included in ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of our Annual Report on Form 10-K for the year ended December 31, 2004. There has been no significant change to our critical accounting policies or estimates during the three and nine months ended September 30, 2005.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Edgar Filing: Aleris International, Inc. - Form 10-Q

In the ordinary course of our business, we are exposed to potential losses arising from changes in the price of aluminum, zinc and natural gas. Changes in currency values and the level of interest rates also expose us to potential losses. We use derivative instruments, such as futures, options, swaps and interest rate caps to manage the effect of such changes. Because of the use of swap and forward contract hedging instruments, we are limited in our ability to take advantage of potential changes in aluminum, gas and zinc prices. The hedging instruments require us to exercise the hedging instrument at the settlement date regardless of the market price at that time. Therefore, in an effort to offset the effect of increasing prices, we have also limited our potential benefit of declining prices.

RISK MANAGEMENT

All derivative contracts are held for purposes other than trading, and are used primarily to mitigate uncertainty and volatility and cover underlying exposures. Our commodity and derivative activities are subject to the management, direction and control of our Risk Management Committee, which is composed of our chief executive officer, chief financial officer, and other officers and employees that the chief executive officer designates. The Risk Management Committee reports to our Board of Directors, which has supervisory authority over all of its activities.

COUNTER-PARTIES

We are exposed to losses in the event of non-performance by the counter-parties to the derivative contracts discussed below. Although non-performance by counter-parties is possible, we do not currently anticipate any non-performance by any of these parties. Counter-parties are evaluated for creditworthiness and risk assessment prior to our initiating contract activities. The counter-parties' creditworthiness is then monitored on an ongoing basis, and credit levels are reviewed to ensure that there is not an inappropriate concentration of credit outstanding to any particular counter-party.

METAL COMMODITY PRICE RISK

Aluminum and zinc ingots are internationally produced, priced and traded commodities, with their principal trading market being the LME. As part of our efforts to preserve margins, we enter into futures and options contracts. In our aluminum recycling and zinc segments, most of the unrealized future gains and losses on these futures and options contracts qualify for deferred treatment under SFAS 133. As a result, unrealized gains and losses related to the effective portions of these hedges are recorded in other comprehensive income within our consolidated balance sheet until the underlying transaction impacts earnings. The futures and options contracts entered into by our rolled products and international segments have not met the requirements for the election to defer unrealized gains and losses under SFAS 133, resulting in immediate recognition of the unrealized gains and losses in the income statement. The unrealized gains and losses recognized in the income statement are not included in management's determination of segment profit and loss.

OVERVIEW OF ALUMINUM RECYCLING AND ZINC DEFERRED METAL HEDGING ACTIVITIES

As of September 30, 2005, our aluminum recycling and zinc segments had net deferred gains of approximately \$479 (\$297 net of tax) related to metal commodity hedging activities. At December 31, 2004, these segments had net deferred losses of approximately \$497 (\$308 net of tax).

ALUMINUM HEDGING

Aluminum Recycling

The aluminum recycling segment enters into futures sale contracts with metal brokers to fix the margin on a portion of the aluminum generated by our salt cake processing facility in Morgantown, Kentucky and some of the aluminum generated for sale from the processing of other scrap metal. These futures sale contracts are settled in the month of pricing of shipments.

The deferred aluminum hedging positions for the aluminum recycling segment as of September 30, 2005 are summarized below:

Metric tonnes _____	Unrealized (deferred) gain (loss)	Unrealized (deferred) gain (loss),
---------------------------	-----------------------------------------	------------------------------------------

Edgar Filing: Aleris International, Inc. - Form 10-Q

			net of tax
Forward sales in 2005	(1500)	\$ (80)	\$ (49)
Forward sales in 2006	(500)	(19)	(12)
Forward purchases in 2005	2,150	106	66
Forward purchases in 2006	500	24	14
Total notional amount	650	\$ 31	\$ 19

Settled metal hedging contracts (decreased) increased the aluminum recycling segment's income by \$(473) and \$(311) during the three months ended September 30, 2005 and 2004, respectively, and by \$(1,301) and \$462 for the nine months ended September 30, 2005 and 2004, respectively.

Rolled Products

The rolled products segment conducts a substantial amount of hedging activity in an effort to eliminate the impact of movements in the price of aluminum from the time of order entry and acceptance through product shipment. However, unlike the aluminum recycling segment, the aluminum hedges entered into by the rolled products segment do not meet the required effectiveness criteria established in SFAS 133 for deferral of gains and losses. As a result, all aluminum hedges are marked-to-market each reporting period with the corresponding unrealized gains and losses reflected in the income statement. For the three and nine months ended September 30, 2005, we recorded unrealized gains (losses) of \$4,756 and \$(8,397), respectively, for open metal hedges and realized (losses) gains of \$(36) and \$4,061, respectively, for settled metal hedges.

International

Much of VAW-IMCO's operations are product sales, requiring it to take ownership of the materials processed and exposing it to risk as to changes in metal prices. In order to mitigate this risk, VAW-IMCO enters into LME high-grade and alloy aluminum forward sales and purchase contracts. The functional currency of VAW-IMCO is the Euro; however, certain of the derivatives utilized in hedging the market risk of changing prices of aluminum purchases and sales at VAW-IMCO facilities are based in U.S. Dollars. This results in foreign currency risk in addition to the risk of changing aluminum prices.

The unrealized gains and losses on VAW-IMCO's derivative contracts do not qualify for deferred treatment under SFAS 133. As a result, VAW-IMCO's derivative contracts are recorded at fair value with unrealized gains and losses recognized currently in the income statement. Unrealized (losses) gains on metal hedging transactions, were approximately \$(1,935) and \$(659) for the three months ended September 30, 2005 and 2004, respectively, and \$(2,392) and \$840 for the nine months ended September 30, 2005 and 2004, respectively.

ZINC HEDGING

In the normal course of business, we enter into fixed-price forward sales and purchase contracts with a number of our zinc customers. In order to hedge the risk of higher metal prices, we enter into long positions, principally using future purchase contracts. These contracts are settled in the month of the corresponding production or shipment.

At September 30, 2005, our deferred zinc hedging positions are summarized below:

	Metric tonnes	Unrealized (deferred) gain (loss)	Unrealized (deferred) gain (loss), net of tax
	<u> </u>	<u> </u>	<u> </u>
Forward sales in 2005	(4,982)	\$ (451)	\$ (280)
Forward sales in 2006	(129)	(31)	(19)
Forward purchases in 2005	3,024	599	372
Forward purchases in 2006	1,856	330	205
Forward purchases in 2007	36	1	
	<u> </u>	<u> </u>	<u> </u>
Net notional amount	(195)	\$ 448	\$ 278

Our zinc segment income was higher (lower) by \$210 and \$346 during the three months ended September 30, 2005 and 2004, respectively, and by \$(259) and \$673 during the nine months ended September 30, 2005 and 2004, respectively, due to settled zinc metal hedging contracts.

NATURAL GAS HEDGING

Edgar Filing: Aleris International, Inc. - Form 10-Q

Natural gas is the principal fuel used in our processing of aluminum and zinc as well as the production of rolled products. Natural gas prices are volatile, and we attempt to manage this volatility through the use of derivative commodity instruments. Our natural gas financial derivatives are traded in months forward, and settlement dates are scheduled to coincide with gas purchases during those future periods. These contracts reference physical natural gas prices or appropriate NYMEX futures contract prices. These contracts are accounted for as cash flow hedges, with gains and losses recognized in cost of sales in the same period of the underlying gas purchases. Gains and losses on the settlement of these contracts decreased our consolidated cost of sales by \$4,806 and \$7,966 for the three and nine months ended September 30, 2005, respectively.

We have entered into forward pricing positions for a portion of our domestic natural gas requirements for 2005 and 2006. We currently have contracts in place to cover about 86% of our natural gas requirements for the next three months and 59% for 2006.

Under the terms of our natural gas swap contracts, we make or receive payments based on the difference between the month-end closing price on the NYMEX and the fixed price agreed to in the swap contracts.

In addition, a portion of our natural gas cost is recovered through price escalation clauses in our long-term contracts.

Our natural gas hedging activities as of September 30, 2005 are summarized in the table below:

Amount of natural gas hedged, at period-end, MMBTUs	8,510,000
Deferred gain	\$ 44,934
Deferred gain, net of tax	\$ 27,871

Our international segment had no natural gas hedging activities for the three months ended September 30, 2005.

INTEREST

We have historically funded our operations from our existing credit facilities. Approximately 93% of our outstanding long-term debt as of September 30, 2005 is at fixed rates.

Our earnings are affected by changes in interest rates due to the impact those changes have on our interest expense from variable-rate debt instruments. The impact of a 10% change in interest rates prevailing as of September 30, 2005, would not be material to our operating results.

FOREIGN CURRENCY

We are increasingly subject to exposure from fluctuations in foreign currencies. When we consider it appropriate, we will utilize foreign currency exchange contracts to hedge the variability in cash flows from forecasted payment or receipts of currencies. Generally, we have not sought to mitigate foreign currency translation effects through the use of derivative instruments.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Aleris has established and maintains disclosure controls and procedures designed to ensure that information required to be disclosed by it in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in rules and forms promulgated by the Securities Exchange Commission (SEC). As of September 30, 2005, an evaluation was carried out, under the supervision and with the participation of our management, including our chairman of the board and chief executive officer, and our executive vice president and chief financial officer, of the effectiveness of Aleris' disclosure controls and procedures as of September 30, 2005.

During the first quarter of 2005, our management completed its evaluation of the effectiveness of Aleris' internal control over financial reporting as required by Section 404 of the Sarbanes-Oxley Act, which required our management to assess and report on the effectiveness of our internal control over financial reporting as of our fiscal year-end, December 31, 2004 (the 404 Assessment). As previously disclosed, our management determined that it would exclude Commonwealth, a wholly-owned subsidiary of Aleris International, Inc., from the scope of its assessment of internal control over financial reporting as of December 31, 2004 in reliance on the guidance set forth in Question 3 of a Frequently Asked Questions interpretive release issued by the staff of the SEC's Office of the Chief Accountant and the Division of Corporation Finance in September 2004 (and revised on October 6, 2004). We excluded Commonwealth from the 404 Assessment because the Commonwealth acquisition was completed in December 2004, and it was not possible for management to conduct a timely assessment of Commonwealth's internal control over financial reporting.

Edgar Filing: Aleris International, Inc. - Form 10-Q

In performing the 404 Assessment, management identified two material weaknesses in our internal control over financial reporting as of that time. Management identified material weaknesses concerning (i) having insufficient controls relating to the accounting for derivative instruments and (ii) having inadequate procedures to (a) calculate certain interest expense on newly issued indebtedness, (b) calculate capitalized interest on certain capital expenditures at our German subsidiary, and (c) review and approve calculations in recording certain pension liabilities in Germany.

We reported in our Annual Report on Form 10-K for the year ended December 31, 2004 and in our Quarterly Report on Form 10-Q for the period ending March 31, 2005 that we had made progress in remediating these material weaknesses in our internal control over financial reporting. During the second quarter of 2005, we completed our remediation efforts, and while management has tested the remediated controls and found them to be operating effectively, the results of our remediation efforts have not yet been evaluated by Ernst & Young LLP, our independent registered public accounting firm. Based on management's testing of the remediated controls and excluding internal control over financial reporting for our Commonwealth and Aleris Latasa subsidiaries, our chief executive officer and chief financial officer have concluded that Aleris's disclosure controls and procedures were effective as of September 30, 2005.

We have begun our evaluation, under the supervision and with the participation of our management, including our chairman of the board and chief executive officer, and our executive vice president and chief financial officer, of the effectiveness of the disclosure controls and procedures for our Commonwealth subsidiary and expect to complete the evaluation in time to be included with our Company's year end assessment of the effectiveness of our internal control over financial reporting as of December 31, 2005.

Remediation of Material Weaknesses in Internal Control over Financial Reporting.

In order to remediate the material weaknesses identified in the 404 Assessment, we have made the following changes:

The Company has hired several qualified individuals to assist in (i) addressing identified technical areas of controls process weakness and (ii) instilling financial accountability and adopting more rigorous processes to improve our controls and procedures;

The Company has implemented a business process design to ensure greater accountability across the organization and;

The Company has initiated a quarterly balance sheet review process and a more rigorous operations review of each of its operating segments to strengthen the quarter and year-end close process.

Changes in Internal Control over Financial Reporting

Other than the remediation actions discussed above, there have not been any changes in Aleris' s internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the three months ended September 30, 2005 that have materially affected, or are reasonably likely to materially affect, Aleris' s internal control over financial reporting.
