Petrobras identifies oil leakage in the Campos Basin

(Rio de Janeiro, November 19, 2004). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, announces that yesterday it identified an oil leakage on the sea bed, approximately 50 meters from MLS-107 well in the Marlin Sul Field in the Campos Basin at a water depth of 1,250 meter and 110 kilometers from Macaé.

Technical personnel from Petrobras with special vessels are on site with equipment for analyzing the possible causes of the leakage and to take preventive measures. The source of the problem was identified by the Company's robotic submarines. The Brazilian Navy, the National Petroleum Agency (ANP) and Ibama (The Brazilian Environmental Protection Agency) have been notified of the occurrence.

The leakage has caused a surface slick and personnel from Petrobras' Environmental Protection Center in Macaé and vessels are at the scene to mechanically disperse the oil.

Production in the Marlin Sul Field is normal since the MLS-107 well was not being operated.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
