Yes No

Clarifications on the volume of reserves in Espírito Santo

(Rio de Janeiro, September 26 2008) PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, with regard to the story published in the Agencia Estado's Broadcast titled "Jubarte might be half as big as Tupi", reasserts the announcement made on September 09 2008.

Currently, in addition to the Long Duration Test carried out at well 1 ESS-103, Petrobras is drilling well 6-BAZ-1DB-ESS (Baleia Azul) and recently started drilling well 6-BFR-1-ESS (Baleia Franca), both seeking to reach the pre-salt layers. Only after the drilling of these two wells has been completed and the phases of the evaluation process have been concluded will it be possible to estimate the volumes of recoverable oil, which will be announced to the market in a timely manner. Therefore, any estimation regarding the reserves in the pre-salt layer is premature.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
