Comments on the Company's Consolidated Performance

Economic Scenario

Throughout 2015, the improvement in economic activity in the United States and the UK contrasted with the slower recovery in the Eurozone and the recession in Brazil and Japan. The IMF expects the global economy to grow by 3.3% in 2015, slightly less than in 2014 and by 3.8% in 2016.

The U.S. economy decelerated in the third quarter, recording growth of 1.5%, versus 3.9% in the previous three months. However, domestic demand remained solid and the labor market continued to expand, increasing expectations that the FED would begin the upward interest rate cycle shortly.

In China, the third-quarter figures indicate the continuation of the economic accommodation process. GDP recorded a year-on-year growth of 6.9%, the lowest result since 2Q09. The country's authorities resumed the discussions focused on medium-term reforms and signaled that the current growth rate is acceptable.

In Brazil, the activity indicators are pointing to an even greater deterioration in 3Q15, characterized by economic shrinkage, high interest rates and inflation. As a result, uncertainty has led to greater risk aversion and the depreciation of the real. In this context, the government announced new fiscal measures after the downgrading of sovereign rating and the loss of investment-grade status. The Central Bank's Focus report estimates an economic downturn of 3.10% in 2015, with inflation of 9.99%.

Industrial production fell by 10.9% in September, over the same month last year, primarily due to the 31.7% reduction in capital goods output. The labor market continues to deteriorate. According to the IBGE's Monthly Employment Survey, the country's unemployment rate reached 7.6% in September.

Foreign Exchange Exposure

In order to manage the exposure in dollars, CSN considers the proportional consolidation of the jointly controlled Namisa, in which CSN holds 60% stake.

The net foreign exchange exposure generated by the difference between assets and liabilities in US dollars, derivative instruments and hedge accounting recorded in CSN, was US\$457 million on 09/30/2015.

The derivatives form a long USD position achieved by the purchase of NDFs (Non-Deliverable Forwards).

The hedge accounting adopted by CSN correlates the projected exports flow in dollars with part of the scheduled debt principal payments in the same currency. Therefore, the exchange variation of the dollar-denominated debt is temporarily booked on shareholder's equity, flowing through P&L when the revenues in USD from exports occur.

- Accelerated development of Arcos´ s clinker kiln, enabling higher operational margins in the Southeastern System.

CSN’s investments totaled R\$803 million in 3Q15, in accordance with IFRS, as shown in the table below. 9M15 investments amounted to R\$1,704 million.

- **Steel product sales** totaled 1.2 million tonnes, 6% down quarter-on-quarter. Of this total, 58% came from the domestic market, 39% from overseas subsidiaries and 3% from exports, thus confirming our subsidiaries' gain of export market share. Total sales reached 3.86 million tonnes in 9M15, 2% less than in 9M14.
- In the third quarter, **domestic** steel sales came to 686,000 tonnes, 10% down on 2Q15. Of this total, 645,000 tonnes corresponded to flat steel and 41,000 tonnes to long steel.
- Third-quarter **foreign** steel sales amounted to 506,000 tonnes, in line with the 2Q15 figure. Of this total, the overseas subsidiaries sold 461,000 tonnes, 221,000 by LLC, 154,000 by SWT, 86,000 by Lusosider and, 44,000 tonnes of direct exports.
- In 3Q15 CSN increased its share of coated products in total sales volume, according to the strategy of increasing CSN's value-added product mix. In the **domestic market**, sales of coated such as galvanized and tin plate, accounted for 44% of sales volume compared to the 41% observed in 2Q15. In the foreign market, the increase rise from 66% of sales to 67% in 3Q15.

- **Net revenue** totaled R\$2,737 million in 3Q15, 1% lower than 2Q15, due to the decrease in volumes of domestic steel sales and by SWT, partially offset by the increase of flat steel export sales and the depreciation of the real against the U.S. dollar. **Average net revenue per tonne** increased by 2%, from R\$2,172 in 2Q15 to R\$2,224 in 3Q15.
- In 3Q15, **COGS** amounted to R\$2,270 million, 2% up on the R\$2,225 million posted in 2Q15.
- The parent company's production cost totaled R\$1.59 billion in 3Q15, 5% less than in 2Q15, particularly influenced by: i) the 14% reduction in raw material costs, given the lower production volume, and also due to the higher internal coke production; ii) the increase in labor costs given the pay rise due to the collective labour agreement.
- The slab production cost reached R\$979/t, lower than the R\$984/t recorded in 2Q15. In US dollars, the cost reduced 13% to US\$278/t compared to US\$320/t in 2Q15, helped by the depreciation of the real against the dollar.

- **Adjusted EBITDA** amounted to R\$386 million in 3Q15, with an adjusted margin of 14%.

Mining

In the third quarter, the seaborne iron ore market continued under pressure due to the increasing supply and lower domestic steel demand in China. On the supply side, the capacity closures announced were more than offset by the ramp-up of projects in Australia and Brazil. On the demand side, the weaker investments and construction activities continued to negatively impact steel prices and margins recorded by Chinese steelmakers. In this scenario, iron ore prices dropped by 6% over 2Q15, averaging US\$54.90/dmt (Platts, 62% Fe, N. China) in 3Q15.

Results from CSN's Mining Operation

- In the third quarter, iron ore **production** totaled 7.94 million tonnes¹, 17% up on 2Q15, with record production of 7.46 million tonnes from the Casa de Pedra mine.

- Iron ore **purchases** reached 1.6 million tonne in 3Q15, 60% more than in 2Q15, due to market opportunities.
- Iron ore sales reached 7.6 million tonnes¹ in 3Q15, 27% up on 2Q15. Of this total, 6.0 million tonnes came from the Casa de Pedra and 1.6 million tonnes¹ from Namisa. In addition to iron ore sales to third-parties, the Company allocated 1.4 million tonnes to its own steel production.

- Third-quarter mining **COGS** came to R\$625 million, 17% higher than the previous quarter, due to sales volume growth, partially offset by lower production costs. In the quarter, Casa de Pedra recorded a delivered cash cost to China of US\$ 35.4/wmt, 9% lower compared to 2Q15.

- Third-quarter **adjusted EBITDA** from mining operations totaled R\$395 million, 74% up on 2Q15, due to: i) the increase in sales volume; ii) the effect from the currency depreciation in the quarter; and iii) lower production costs. EBITDA/tonne climbed from R\$40.90 in 2Q15 to R\$57.04 in 3Q15.

- The **EBITDA margin** from mining operations increased 8.5 p.p. reaching 42% in 3Q15 from 33% in 2Q15, the highest margin recorded since the 1Q14.

Consumption in the industrial and residential segments fell by 4.5% and 0.7%, respectively, while the commercial segment registered a 1.1% increase. Given this scenario, EPE's initial forecast at the close of last year of a 3.1% increase in consumption, was revised down to a 1.5% decline in the second four-month review.

Results from CSN's Energy Operation

In 3Q15, **net revenues** from energy operations totaled R\$60 million, **adjusted EBITDA** reached R\$8 million and the **EBITDA margin** was 13%.

**Notes to the Individual and Consolidated Financial Information for the three and nine-month period
ended September 30, 2015**

(Expressed in thousands of reais – R\$, unless otherwise stated)

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, joint ventures, joint operations and associates collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN has shares listed on the São Paulo Stock Exchange (BM&F BOVESPA) and the New York Stock Exchange (NYSE). Accordingly, it reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas Steel Mill (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and performing excellent services for final consumers. Its steels are used in the home appliances, civil construction and automobile industries. CSN holds the concession to operate TECAR a solid bulk terminal, one of the four terminals that form the Port of Itaguaí, located in Rio de Janeiro. Imports of coal and coke are made through this terminal.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, in the State of Minas Gerais. It further mines tin in the State of Rondônia to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties.

Iron ore is substantially sold in the international market, especially in Europe and Asia. The prices in force in these markets are historically cyclical and subject to significant fluctuations over short periods as a result of many factors related to global demand, to the strategies adopted by major steel producers and to the exchange rate. All these factors are beyond the Company's control. The outflow of the ore is done by TECAR.

- **Cement:**

CSN entered the cement market boosted by the synergy between this new activity and its already existing businesses. Next to the Presidente Vargas Steel Mill in Volta Redonda (RJ), it installed a new business unit: CSN Cimentos, which produces CP-III type cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arches drive in the State of Minas Gerais, to supply the needs of UPV and of the cement plant.

- **Logistics**

Railroads:

CSN has equity interests in three railroad companies: MRS Logística S. A., which manages the former Southeast Railway System of Rede Ferroviária Federal S.A., Transnordestina Logística S. A. ("TLSA") and FTL - Ferrovia Transnordestina Logística S.A. ("FTL"), which operate the Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the sections of Missão Velha - Salgueiro, Salgueiro - Trindade, Trindade - Eliseu Martins, Salgueiro - Porto de Suape and Missão Velha - Porto de Pecém (Railway System II) and FTL being responsible for the sections of São Luiz - Mucuripe, Arrojado - Recife, Itabaiana - Cabedelo, Paula Cavalcante - Macau and Propriá - Jorge Lins (Railway System I).

Tecon handles the shipments of CSN steel products, movement of containers, as well as storage, consolidation and deconsolidation of cargo.

- **Energy:**

As energy is fundamental in its production process, the Company has assets for generation of electric power to guarantee its self-sufficiency.

- NACIONAL MINÉRIOS S.A. - ("Namisa")

New strategic alliance with the Asian Consortium

On December 11, 2014, CSN's Board of Directors approved the formation of a strategic alliance with the Asian Consortium ("JKTC").

This transaction consists of creating a partnership between CSN and the JKTC, under which the JKTC will contribute its 40% stake in Namisa to Congonhas Minérios S.A. ("Congonhas Minérios"), a non-operating subsidiary of CSN, and to which CSN will contribute its Casa de Pedra iron ore mine, its 60% stake in Namisa, its 8.63% stake in MRS, and the assets of and the rights to manage and operate the TECAR Port concession.

After closing the deal, CSN and the JKTC will hold approximately 88.25% and 11.75% of the share capital of Congonhas Minérios, respectively.

These percentages were set considering the valuation of the entities' net assets that will compose Congonhas Minérios and adjustments resulting from negotiations between CSN and JKTC involving the extinction of existing operating agreements between CSN and Namisa. As usual in transactions of this nature, in its closing will be held cash adjustments, debt and working capital.

ITR -Quarterly Financial Information - September 30, Version:1
2015 – CIA SIDERURGICA NACIONAL

The transaction also provides for an earn-out mechanism, under which a qualifying liquidity event occurring within certain valuation parameters and a given period of time agreed after the transaction is closed could dilute the Consortium's equity interest in Congonhas Minérios from 11.75% up to 8.21%.

The transaction's primary purpose is to capture synergies among the businesses involved in this reorganization and generate shareholder value to create a world-class company. The main synergies identified are related to procedure optimization, increasing operation efficiencies and cutting operating costs, and capital expansion.

A portion of Congonhas Minérios' iron ore production will be sold to members of the JKTC and CSN. These rights are laid down in long-term supply agreements.

The closing of the transaction is subject to the parties reaching a consensus on a business plan, regulatory approvals by antitrust authorities and the governmental authorities responsible for regulating mining and ports rights, and other precedent conditions usual in this type of transaction. The closing date is scheduled for the end of 2015.

If the transaction described above is not completed by the mentioned closing date (end of 2015), some obligations, the terms and conditions of the operation established in the agreements signed between the Company and JKTC in the year 2008, which remain suspended as a result of the transaction signing, will again be in force.

The shareholders' agreement signed in 2008 provides that certain situations of standstill between the shareholders and not resolved after mediation and negotiation procedures between the parties' executives may give rise to the Company's right to exercise call option and the consortium's right to exercise put option of its stake in Namisa.

Other agreements signed in order to enable this association in 2008, among the share purchase agreement as well as the long-term operating agreements between Namisa and the Company, provide for certain obligations that if not accomplished or resolved in the deadlines can give rise to, in certain situations, to the aggrieved party's right to exercise put option or purchase, as appropriate, the shareholding of the JKTC in Namisa.

Any of these events can generate a significant disbursement that may have adverse effect on the Company.

There are no assets or liabilities classified as Level 3.

II – Investments in financial instruments classified as available for sale and measured at fair value through OCI

Consist mainly of investments in shares acquired in Brazil involving companies considered as top ranked by the Company, which are recognized in non-current assets, and any gains or losses are recognized in shareholders' equity, where they will remain until actual realization of the securities or when any loss is considered unrecoverable.

Impairment of financial assets classified as available for sale

The Company has investments in common (USIM3) and preferred (USIM5) shares (“Usiminas Shares”), designated as available-for-sale financial assets as they do not meet the criteria to be classified within any of the other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset under line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA). According to Company’s policy, the gains and losses arising from changes in the price of shares are recorded directly in equity under other comprehensive income.

Considering the volatility of the quotations of Usiminas shares, the Company evaluated whether, at the end of the reporting period, there was objective evidence of impairment of these financial assets, i.e., the Company’s management evaluated if the decline in the market value of Usiminas shares should be considered either significant or prolonged. In turn, this valuation requires judgment based on CSN’s policy, prepared according to practices used in the domestic and international markets, and consists of an instrument by instrument analysis based on quantitative and qualitative information available in the market, from the time an instrument shows a drop of 20% or more in its market value or from the time there is a significant drop in its market value as compared to its acquisition price during more than twelve months. If a decline in the market value of the instrument is considered prolonged, the corresponding part previously recorded in other comprehensive income must be registered as impairment loss in the income statement.

As of March 31, 2015 and June 30, 2015, after a decline in the quoted prices of the common shares (USIM5) the Company reclassified the accumulated losses recognized in other comprehensive income, amounting to R\$5,555 and R\$59,027, net of income tax and social contribution, to profit (loss) for the period, recognizing R\$8,417 and R\$89,434 in other operating expenses and R\$2,862 and R\$30,407 in deferred taxes, respectively.

As of September 30, 2015, after a new decline in the quoted prices of the common shares (USIM5) as compared with the quoted prices as of June 30, 2015, the Company reclassified the accumulated losses for the quarter recognized in other comprehensive income, amounting to R\$81,016 to profit (loss) for the period, in other operating expenses. Deferred taxes amounting to R\$ 27,545 have not been made as detailed in Note 14b.

The Company's interest in Usiminas has not changed as compared with the percentage disclosed in the financial statements as of December 31, 2014.

- **Share Market risks**

The Company is exposed to the risk of changes in share prices due to the investments made and classified as available-for-sale.

According to the Company's accounting policies, any negative changes in the investment in Usiminas considered significant (impairment) are recognized in profit or loss, and positive changes are recognized in comprehensive income until the investment is realized.

As of September 30, 2015, the amount recognized in comprehensive income for investments available for sale, net of taxes is R\$(45,706).

Forward dollar contracts

As part of the hedging strategy of natural exposure to dollar, CSN contracts foreign exchange derivative instruments. As of September 30, 2015 the Company held in its portfolio forward dollar contracts traded at BM&F Bovespa which totaled the notional amount of US\$ 1.275 billion.

These contracts consist in negotiating the exchange rate of Reais to US dollar, for prompt delivery, contracted under Resolution 1.690/90 of the National Monetary Council (CMN) in standard contracts established by BM&F Bovespa. CSN determines the required volume of currency to be purchased in accordance with its foreign exchange management strategy and negotiates a sufficient volume of contracts to achieve this financial volume.

The maturity of the portfolio always occurs on the first business day of the contract's maturity month, being renewable every 30 days, in average. The contract settlement is exclusively financial, on the due date and occurs daily until the maturity. The position held by the Company is set at the end of each session based on the difference of the day's settlement price (D0) compared to the previous day price (D-1), and is settled on the following day (D+1), according to the rules of BM&F.

For as much as the Company maintains contracts traded on the BM&F Bovespa, it is required by the clearing house a guarantee margin to cover those commitments in these contracts, which is only a percentage of the contract's total amount. CSN maintains securities linked to this guarantee margin, consisting mainly of government bonds, which will be redeemed after the end position. The amounts of these investments are described in Note 4.

The contracts on the BM&F Bovespa have been carried out to replace the foreign exchange swap contracts (NDF - Non Deliverable Forward) traded in over the counter markets.

Fixed rate-to-CDI swap

The purpose of this transaction is to peg obligations subject to a post-fixed rate (CDI) to a fixed rate. Basically, the Company contracted swaps for its obligations indexed to CDI, in which it receives interest on the notional amount (long position) and pays a pre-fixed rate on the notional amount of the contract date (short position). The gains and losses on this contract are directly related to CDI fluctuations. In general, these are transactions conducted in the Brazilian over-the-counter market that have as counterparty a prime financial institution.

Dollar x Euro swap

The subsidiary Lusosider has derivative transactions to protect its dollar exposure versus euro.

- **Hedge accounting – cash flow**

In addition to the hedging strategy of protecting natural exposure to dollar, beginning November 1, 2014, the Company formally designated cash flow hedging relationships to protect highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on its profit, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising on translating the designated liabilities have been temporarily recognized in shareholders' equity and allocated to profit or loss when such exports are carried out, which will allow recognizing the US dollar impact on liabilities and exports concurrently.

From 2011 to the third quarter of 2015, these subsidiaries generated profits amounting to R\$3,826,742, which tax authorities may understand that have already been distributed, hence, it would be subject to additional taxation in Brazil, in the approximate amount of R\$1,301,092. The Company, based on its legal counsel's opinion, assessed the likelihood of loss in a potential challenge by tax authorities as possible and, therefore, no provision was recognized in the condensed interim financial statements.

- **Law 12.973/14**

Law 12.973, enacted in May 2014, brought significant changes to tax legislation, which among others, revoked the Transition Tax Regime (RTT). These changes directly impact the determination of the income tax and social contribution basis. As from 2015, the application of the Law is mandatory and CSN applied the Law's requirements.

- **Impairment test - Deferred taxes**

CSN approved by the Board of Directors' Meeting of November 6th2015, a study to demonstrate the generation of future taxable income with which it is expected that the credits currently registered in the balance sheet are offset.

The test was performed considering only the parent company, since the other group companies have no relevant credits for purposes of this test. The parent company consists of the following businesses:

- Flat Steel Brazil;
- Long Steel Brazil;
- Mining
- Cement;
- Investments in other entities.

The study was prepared based on the CSN's financial model of long-term and considered several scenarios which vary according to different macroeconomic and operating assumptions. Furthermore, the model considers a combination of assets sales scenario and liquidity events in order to achieve a specific amount of resources to CSN allowing a leverage reduction of and consequently, the reduction of financial expenses.

In addition, a sensitivity analysis of tax credits utilization considering a change in macroeconomic assumptions, operational performance and liquidity events took place. This sensitivity analysis showed that the consumption of credits is sensitive to exogenous issues and outside the Company's control.

Thus, considering the study's results, which indicates the probable future taxable income to compensate the deferred income tax and social contribution balances recognized until June 30, 2015, the Board of Directors agreed to not record the deferred income tax and social contribution as from the 3rd quarter of 2015. If the tax credit for the quarter was constituted, the amount would be R\$1.1 billion. Additionally, the study projects the compensation of the balance according to the schedule below:

In million of reais	Parent Company
2016	686
2017	622
2018	152
2019	192
2020	286
2021	464
2022	576
2023	185
	3,164

If the tax credit for the quarter was constituted, the amount would be \$ 1.1 billion, which could be carried out between the years 2023 and 2026.

Environmental proceedings

The environmental proceedings have high complexity for estimating the amount at risk, as they must be considered, among several aspects, procedural developments, the extent of damage and the remediation costs' projection.

During the second quarter 2015, in line with the Company's accounting policy of ongoing evaluation of the ongoing proceedings, management, supported by its internal and external legal counsel, reevaluated their environmental contingencies. As a result of this work, there was an increase of possible risk in R\$187,886.

There are other environmental proceedings to which it is not yet possible to assess the risk and contingency amount due to the aforementioned complexity estimation, the peculiarities of the matters which concern them and their procedural stages.

(*) The ore sales volumes presented in this note take into consideration Company sales and the interest in its subsidiaries and jointly controlled entities (Namisa 60%).

Adjusted EBITDA is the tool based on which the chief operating decision maker measures segment performance and the capacity to generate recurring operating cash, and consists of profit for the year less net finance income (expenses), income tax and social contribution, depreciation and amortization, share of profits of investments, and other operating income (expenses), plus the proportional EBITDA of jointly controlled entities.

Even though it is an indicator used in segment performance measurements, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices.

Aiming to properly mitigate risk and in view of the nature of its operations, the Company and its subsidiaries have taken out several different types of insurance policies. Under the insurance policy, the LMI (Maximum Limit of Indemnity) is US\$600,000,000 and covers the following units and subsidiaries of the Company: Usina Presidente Vargas, Mineração Casa de Pedra, CSN Paraná, Terminal de Cargas Tecar, Terminal Tecon, Namisa, CSN Handel and Namisa Handel. REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of

Companhia Siderúrgica Nacional

São Paulo – SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Companhia Siderúrgica Nacional (the “Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the three-month period ended September 30, 2015, which comprises the balance sheet as of September 30, 2015 and the related statements of income, comprehensive income, changes in equity and cash flows for the three and nine-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of the Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the interim financial information referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

We have also reviewed the individual and consolidated statements of value added (DVA) for the nine-month period ended September 30, 2015, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR) and considered as supplemental information for International Financial Reporting Standards - IFRSs, which do not require the presentation of DVA. These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.

The accompanying individual and consolidated interim financial information has been translated into English for the convenience of readers outside Brazil.
