## NOTE 1 ORGANIZATION AND DESCRIPTION OF BUSINESS

Alto Group Holdings Inc. (the “Company”) was incorporated in the State of Nevada on September 21, 2007. The Company is an Exploration Stage Company, as defined by Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 915, *Development Stage Entities*. The Company’s principal business is the acquisition and exploration of mineral resources. The Company has not presently determined whether its properties contain mineral reserves that are economically recoverable.

These financial statements have been prepared on a going concern basis, which implies the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The Company has never generated revenues since inception and has never paid any dividends and is unlikely to pay dividends or generate earnings in the immediate or foreseeable future. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, the ability of the Company to obtain necessary equity financing to continue operations, and the attainment of profitable operations. As at August 31, 2011, the Company has a total stockholders’ deficit of \$3,222,345 and has accumulated losses of \$12,649,537 since inception. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

## NOTE 2 - BASIS OF FINANCIAL STATEMENT PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted in accordance with such rules and regulations. The information furnished in the interim consolidated financial statements includes normal recurring adjustments and reflects all adjustments, which, in the opinion of management, are necessary for a fair presentation of such financial statements. Although management believes the disclosures and information presented are adequate to make the information not misleading, it is suggested that these interim consolidated financial statements be read in conjunction with the Company’s audited financial statements and notes thereto included in its Form 10-K/A filed on April 7, 2011. Operating results for the nine months ended August 31, 2011 are not necessarily indicative of the results to be expected for the year ending November 30, 2011.

## NOTE 3 - ACQUISITION OF LIBERTY AMERICAN, LLC

On January 24, 2011, the Company acquired all of the membership units of Liberty American, LLC (“Liberty”), a Utah limited liability company that holds certain development rights with respect to the La Cienega gold mining concession in Northern Sonora, Mexico, in exchange for 10,000,000 restricted shares of the Company common stock to be issued within 30 days (issued March 5, 2011). The agreement embodying the Acquisition contains standard warranties and representations by the Company and the previous owner of Liberty.

## NOTE 3 - ACQUISITION OF LIBERTY AMERICAN, LLC

The estimated fair values of the identifiable net assets of Liberty at January 24, 2011 (date of acquisition) consisted of:

Cash and cash equivalents	\$65
Loan receivable	7,500
Total assets	7,565
Account payable	61,951
Accrued interest payable	35,662
Notes payable	196,665
Total liabilities	294,278
Identifiable net assets	\$(286,713)

Goodwill of \$431,713 (excess of the \$145,000 fair value of the 10,000,000 common shares over the \$286,713 negative identifiable net assets of Liberty) was recorded at the January 24, 2011 acquisition date. As the Company believed that the fair value of the goodwill recorded by the Company was \$-0-, the entire \$431,713 goodwill was written off on the January 24, 2011 acquisition date.

The following pro forma information summarizes the results of operations for the periods indicated as if the acquisition occurred at November 30, 2009. The pro forma information is not necessarily indicative of the results that would have been reported had the transaction actually occurred on November 30, 2009.

Once the reverse split is approved and effective, the Company is to deliver the investors shares of Company common stock calculated by dividing their investment by the closing trading price of the shares on the first full business day following the Effective Date and multiplying the product thereof by 330%. At August 31, 2011, the \$200,000 has been reflected in liabilities pursuant to ASC 480-10-25-14(a) since the amounts embody a conditional obligation that the Company must settle by issuing a variable number of shares and the monetary value of the obligation is based on a fixed monetary amount known at inception.

### **Forward-Looking Statements**

This report contains forward-looking statements that involve risks and uncertainties. We use words such as anticipate, believe, plan, expect, future, intend and similar expressions to identify such forward-looking statements. You should not place too much reliance on these forward-looking statements. Our actual results are likely to differ materially from those anticipated in these forward-looking statements for many reasons, including the risks faced by us described in the Risk Factors section included in this Annual Report on Form 10-K.

### **Plan of Operation**

We were incorporated in the State of Nevada on September 21, 2007. We are an exploration stage corporation. An exploration stage corporation is one engaged in the search of mineral deposits or reserves which are not in either the development or production stage. We maintain our statutory registered agent's office at National Registered Agents, Inc. of NV, 1000 East William Street, Suite 204, Carson City, Nevada 89701 and our business office and mailing address is 700 West Hillsboro Blvd., Suite 207, Deerfield Beach, FL 33441. Our telephone number is (954) 973-2133.

We hold rights to certain mineral interests in North America and Mexico, and seek to acquire additional interests in mineral holdings in these regions as well as other overseas locations. If we are able to successfully develop the interests we acquire, we may engage in (or contract with third parties for the) extraction and production of the minerals involved, may sell these interests, or pursue a combination of the foregoing. Our most significant holding is pursuant to a 51% joint venture interest with Douglas G. McFarland in respect of 60 mining claims concerning the Great Excelsior Mine in Washington State.

Importantly, although we believe that the mineral concessions in which we hold rights may contain valuable deposits that would inure to the benefit of the Company and its shareholders, we cannot assure you that commercially viable deposits exist on any of our properties until further exploration and development has been undertaken and a thorough economic feasibility analysis has been prepared. We are actively seeking to raise working capital sufficient to begin exploration and development of these concessions, as well as for other development opportunities.

We have not generated any revenues since the inception of the Company and we have been issued a “going concern” opinion from our auditors. We have no plans to change our business activities from the exploration and development of mining interests with the objective of including extraction and production operations as a core component of the business of the Company.

## **Liquidity and Capital Resources**

As of August 31, 2011, our working capital deficit of \$3,477,840 was comprised of total current assets of \$10,439 consisting of cash and cash equivalents, and total current liabilities of \$3,488,279. While we continued to consume working capital in the pursuit of our business plan, the consumption was more than offset by the sale of equity securities and the conversion of certain indebtedness into equity.

We do not believe that the Company's current capital resources will be sufficient to fund its operating activity and other capital resource demands during the next fiscal year. Our ability to continue as a going concern is contingent upon our ability to obtain capital through the sale of equity or issuance of debt, joint venture or sale of assets, and ultimately attaining profitable operations. We cannot provide that we will be able to successfully complete any one of these activities.

The independent registered public accounting firm's report on our financial statements as of November 30, 2010, and for each of the years in the two-year period then ended, includes a "going concern" explanatory paragraph, that describes substantial doubt about the Company's ability to continue as a going concern.

We are presently seeking additional debt and equity financing to provide sufficient funds for payment of obligations incurred and to fund our ongoing business plan.

Although we are actively seeking to acquire and develop mineral interests throughout the world, we have not yet generated any revenue from our operations. We have historically relied on equity and debt financings to fund our capital resource requirements. We have experienced net losses since inception. We will be dependent on additional debt and equity financing to develop our new business.

All of our investment in research and development activities has been expensed, and does not appear as an asset on our balance sheet.

Our ability to pay accounts payable and accrued expenses and repay borrowings is dependent upon receipt of new funding from related parties, private placements or debt financing. Certain related parties have periodically advanced funds to us to meet our working capital needs. The related parties are under no obligation to continue these advances.

Net cash used in operating activities was \$2,406,297 during the nine months ended August 31, 2011, compared to \$45,365 during the nine months ended August 30, 2010. During the nine months ended August 31, 2011, we incurred a net loss of \$8,177,472. In addition, accounts payable and accrued expenses increased by \$402,111 during the nine months ended August 31, 2011. By comparison, during the nine months ended August 31, 2010, we incurred a net loss of \$3,214,977 and reported an increase in accounts payable and accrued expenses of \$110,724. Historically, we have reported significant fluctuations in cash usage, as the timing of our cash payments is typically dependent upon cash provided by financing activities.

During the nine months ended August 31, 2011 and 2010, the Company used \$230,987, and \$-0-, respectively, in investing activities. During the nine months ended August 31, 2011, the Company purchased property and equipment in the amount of \$231,052.

Net cash provided by financing activities during the nine months ended August 31, 2011, was \$2,638,081, compared to \$77,500 during the nine months ended August 31, 2010. During the nine months ending August 31, 2011, cash provided by financing activities

consisted of proceeds of \$2,499,500 in the form of loans from accredited investors. The Company also used \$61,419 to repay loans of Liberty American LLC to its Corporate Counsel.

### **Off-Balance Sheet Arrangements**

We do not have any off-balance sheet arrangements.

### **Critical Accounting Policies**

We believe the following more critical accounting policies are used in the preparation of our financial statements:

*Use of Estimates.* The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. On a periodic basis, management reviews those estimates, including those related to valuation allowances, loss contingencies, income taxes, and projection of future cash flows.

*Mineral Property Costs.* The Company has been in the exploration stage since its formation on April 25, 2007 and has not yet realized any revenues from its planned operations. It is primarily engaged in the acquisition, exploration and development of mineral properties. Mineral property acquisition costs are capitalized when management has determined that probable future benefits consisting of a contribution to future cash inflows have been identified and adequate financial resources are available or are expected to be available as required to meet the terms of property acquisition and budgeted exploration and development expenditures. Mineral property acquisition costs are expensed as incurred if the criteria for capitalization are not met. In the event that a mineral property is acquired through the issuance of the Company's shares, the mineral property will be recorded at the fair value of the respective property or the fair value of common shares, whichever is more readily determinable.

When mineral properties are acquired under option agreements with future acquisition payments to be made at the sole discretion of the Company, those future payments, whether in cash or shares, are recorded only when the Company has made or is obliged to make the payment or issue the shares. When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves and pre feasibility, the costs incurred to develop such property will be capitalized.

### **Recent Accounting Pronouncements**

In August 2009, the FASB issued an update to ASC 820. This Accounting Standards Update (“ASU”) No. 2009-5, Measuring Liabilities at Fair Value (“ASU 2009-5”) amends the provisions in ASC 820 related to the fair value measurement of liabilities and clarifies for circumstances in which a quoted price in an active market for the identical liability is not available. ASU 2009-5 is intended to reduce potential ambiguity in financial reporting when measuring the fair value of liabilities. ASU 2009-5 was effective for the Company in the first quarter of fiscal year 2010. ASU 2009-5 concerns disclosure only. The adoption of ASU 2009-5 did not have a material effect on the Company’s consolidated financial statements.

In December 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-17,

which codifies SFAS No. 167, Amendments to FASB Interpretation No. 46(R) issued in June 2009. ASU 2009-17 requires a qualitative approach to identifying a controlling financial interest in a variable interest entity (“VIE”), and requires ongoing assessment of whether an entity is a VIE and whether an interest in a VIE makes the holder the primary beneficiary of the VIE. ASU 2009-17 is effective for annual reporting periods beginning after November 15, 2009. The adoption of ASU 2009-17 did not have a material effect on the Company’s financial statements.

In January 2010, the FASB issued ASU 2010-6, Improving Disclosures About Fair Value Measurements, which requires reporting entities to make new disclosures about recurring or nonrecurring fair-value measurements including significant transfers into and out of Level 1 and Level 2 fair-value measurements and information on purchases, sales, issuances, and settlements on a gross basis in the reconciliation of Level 3 fair-value measurements. ASU 2010-6 is effective for annual reporting periods beginning after December 15, 2009, except for Level 3 reconciliation disclosures which are effective for annual periods beginning after December 15, 2010. The Company believes that the adoption of ASU 2010-6 will not have a material effect on its consolidated financial statements.

The Company has implemented all new accounting pronouncements that are in effect and that impact its financial statements and does not believe that there are any other new accounting pronouncements that have been issued (but are not yet effective) that might have a material impact on its future financial position or results of operations.
