## PROVIDENT FINANCIAL SERVICES, INC. AND SUBSIDIARY <br> NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies
A. Basis of Financial Statement Presentation

The accompanying unaudited consolidated financial statements include the accounts of Provident Financial Services, Inc. and its wholly owned subsidiary, The Provident Bank (the "Bank," together with Provident Financial Services, Inc., the "Company").
In preparing the interim unaudited consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statements of financial condition and the results of operations for the periods presented. Actual results could differ from these estimates. The allowance for loan losses and the valuation of securities available for sale are material estimates that are particularly susceptible to near-term change. The continuing unstable economic environment has resulted in a heightened degree of uncertainty inherent in these material estimates.
The interim unaudited consolidated financial statements reflect all normal and recurring adjustments, which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three months ended March 31, 2014 are not necessarily indicative of the results of operations that may be expected for all of 2014.
Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles ("GAAP") have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission.
These unaudited consolidated financial statements should be read in conjunction with the December 31, 2013 Annual Report to Stockholders on Form 10-K.
B. Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations for the three months ended March 31, 2014 and 2013 (dollars in thousands, except per share amounts): Three months ended March 31, 20142013

|  | Weighted |  |
| :--- | :--- | :--- |
| Net | Average | Per |
| Income | Common | Share |
|  | Shares | Amount |
|  | Outstanding |  |

Net income \$ 17,029

|  | Weighted |  |
| :--- | :--- | :--- |
| Net | Average | Per |
| Income | Common | Share |
|  | Shares | Amount |
|  | Outstanding |  | \$17,828

Basic earnings per
share:
Income available to
common stockholders
Dilutive shares
$\$ 17,029 \quad 57,369,039 \quad \$ 0.30$

Diluted earnings per
share:
Income available to common stockholders $\$ 17,029 \quad 57,528,419 \quad \$ 0.30$

Anti-dilutive stock options and awards totaling 838,801 shares at March 31, 2014, were excluded from the earnings per share calculations.

Note 2. Investment Securities
At March 31, 2014, the Company had $\$ 1.13$ billion and $\$ 357.6$ million in available for sale and held to maturity investment securities, respectively. Many factors, including lack of liquidity in the secondary market for certain securities, variations in pricing information, regulatory actions, changes in the business environment or any changes in

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

the competitive marketplace could have an adverse effect on the Company's investment portfolio which could result in other-than-temporary impairment on certain investment securities in future periods. The total number of all held to maturity and available for sale securities in an unrealized loss position as of March 31, 2014 totaled 283, compared with 346 at December 31, 2013. All securities with unrealized losses at March 31, 2014 were analyzed for other-than-temporary impairment. Based upon this analysis, no other-than-temporary impairment existed at March 31, 2014.

## Securities Available for Sale

The following tables present the amortized cost, gross unrealized gains, gross unrealized losses and the fair value for securities available for sale at March 31, 2014 and December 31, 2013 (in thousands):

March 31, 2014

|  | Amortized cost | Gross unrealized gains | Gross unrealized losses |  | Fair value |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Agency obligations | \$93,064 | 335 | (108 | ) | 93,291 |
| Mortgage-backed securities | 1,027,193 | 14,599 | (13,105 | ) | 1,028,687 |
| State and municipal obligations | 7,567 | 154 | (52 | ) | 7,669 |
| Equity securities | 397 | 97 | - |  | 494 |
|  | \$1,128,221 | 15,185 | (13,265 | ) | 1,130,141 |

|  | December 31, 2013 |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Amortized | Gross | Gross | Fair |
|  | cost | unrealized | unrealized | value |
| Agency obligations | $\$ 93,223$ | 372 | losses |  |
| Mortgage-backed securities | $1,060,013$ | 14,493 | $(179$ | $) 93,416$ |
| State and municipal obligations | 8,739 | 171 | $(152$ | $)$ |
| Equity securities | 357 | 89 | - | $8,754,974$ |
|  | $\$ 1,162,332$ | 15,125 | $(19,863$ | 446 |
|  |  | $1,157,594$ |  |  |

The amortized cost and fair value of securities available for sale at March 31, 2014, by contractual maturity, are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

Due in one year or less
Due after one year through five years
Due after five years through ten years
Due after ten years
Mortgage-backed securities
Equity securities
March 31, 2014

| Amortized | Fair |
| :--- | :--- |
| cost | value |
| $\$ 21,105$ | 21,156 |
| 76,516 | 76,846 |
| - | - |
| 3,010 | 2,958 |
| $1,027,193$ | $1,028,687$ |
| 397 | 494 |
| $\$ 1,128,221$ | $1,130,141$ |

Proceeds from the sale of securities from the available for sale portfolio were $\$ 6,085,000$ resulting in gross losses of $\$ 365,000$ and no gross gains during the three months ended March 31, 2014 . In addition, for the three months ended March 31, 2014, the Company recognized gross gains of $\$ 2,000$, and no gross losses related to calls on certain securities in the available for sale portfolio, with proceeds from the calls totaling $\$ 740,000$ for the three months ended March 31, 2014. For the same period last year, proceeds from the sale of securities available for sale were $\$ 7,395,000$ resulting in gross gains of $\$ 481,000$ and no gross losses.
The following table presents a roll-forward of the credit loss component of other-than-temporary impairment ("OTTI") on debt securities for which a non-credit component of OTTI was recognized in other comprehensive income. OTTI recognized in earnings for credit-impaired debt securities is presented in two components based upon whether the current period is the first time a debt security was credit-impaired (initial credit impairment), or whether the current period is not the first time a debt security was credit impaired (subsequent credit impairment). Changes in the credit loss component of credit-impaired debt securities were as follows (in thousands):

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Beginning credit loss amount
Add: Initial OTTI credit losses
Subsequent OTTI credit losses
Less: Realized losses for securities sold
Securities intended or required to be sold
Increases in expected cash flows on debt securities
Ending credit loss amount

| Three months ended March 31, |  |
| :--- | :--- |
| 2014 | 2013 |
| $\$ 1,674$ | 1,240 |
| - | - |
| - | - |
| 1,540 | - |
| - | 1,240 |

The Company did not incur an OTTI charge on securities for the three months ended March 31, 2014 or 2013, respectively. For the three months ended March 31,2014 , the Company realized a $\$ 365,000$ loss on the sale of a previously impaired non-agency mortgage-backed security. The Company previously incurred cumulative credit losses of $\$ 1.5$ million on this security.
The following tables represent the Company's disclosure regarding securities available for sale with temporary impairment at March 31, 2014 and December 31, 2013 (in thousands):

March 31, 2014 Unrealized Losses

|  | Fair value | Gross unrealized losses | Fair <br> value | Gross unrealized losses | Fair value | Gross <br> unrealized <br> losses |

The temporary loss position associated with securities available for sale was the result of changes in market interest rates relative to the coupon of the individual security and changes in credit spreads. In addition, there remains a lack of liquidity in certain sectors of the mortgage-backed securities market. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company does not have the intent to sell securities in a temporary loss position at March 31, 2014, nor is it likely that the Company will be required to sell the securities before their prices recovers.
The number of securities in an unrealized loss position at March 31, 2014 totaled 66, compared with 76 at December 31, 2013. The decrease in the number of securities in an unrealized loss position at March 31, 2014, was a function of improved valuations due to a decline in market interest rates. At March 31, 2014, there were 4 private label mortgage-backed securities in an unrealized loss position, with an amortized cost of $\$ 3.7$ million and unrealized losses totaling $\$ 27,000$. Two of these private label mortgage-backed securities were below investment grade at March 31, 2014.
The Company estimates the loss projections for each security by stressing the individual loans collateralizing the security and applying a range of expected default rates, loss severities, and prepayment speeds in conjunction with the underlying credit enhancement for each security. Based on specific assumptions about collateral and vintage, a range of possible cash flows was identified to determine whether other-than-temporary impairment existed during the three
months ended March 31, 2014. The Company concluded that no other-than-temporary impairment of the securities available for sale portfolio existed at March 31, 2014.

The Company generally purchases securities for long-term investment purposes, and differences between amortized cost and fair values may fluctuate during the investment period. For the three months ended March 31, 2014, the Company recognized gross gains of $\$ 13,000$, and no gross losses related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling $\$ 6,395,000$ for the three months ended March 31, 2014. For the three months ended March 31, 2013, the Company recognized gross gains of $\$ 13,000$ and gross losses of $\$ 2,000$, related to calls on certain securities in the held to maturity portfolio, with proceeds from the calls totaling $\$ 9,044,000$. In addition, for the three months ended March 31, 2013, the Company recognized gross gains of $\$ 19,000$ and no gross losses related to sales on certain securities in the held to maturity portfolio, with proceeds from the sales totaling $\$ 524,000$. The sales of these securities were in response to the credit deterioration of the issuers.
The amortized cost and fair value of investment securities in the held to maturity portfolio at March 31, 2014 by contractual maturity are shown below (in thousands). Expected maturities may differ from contractual maturities due to prepayment or early call privileges of the issuer.

Based upon the review of the held to maturity securities portfolio, the Company believes that as of March 31, 2014, securities with unrealized loss positions shown above do not represent impairments that are other-than-temporary. The review of the portfolio for other-than-temporary impairment considers the percentage and length of time the fair value of an investment is below book value, as well as general market conditions, changes in interest rates, credit risks, whether the Company has the intent to sell the securities and whether it is likely that the Company would be required to sell the securities before their prices recover.
The number of securities in an unrealized loss position at March 31, 2014 totaled 217, compared with 270 at December 31, 2013. The decrease in the number of securities in an unrealized loss position at March 31, 2014, was a function of improved valuations due to slightly lower market interest rates and tighter spreads on municipal securities, which represents the majority of the held to maturity portfolio. All temporarily impaired investment securities were investment grade at March 31, 2014.

Note 3. Loans Receivable and Allowance for Loan Losses
Loans receivable at March 31, 2014 and December 31, 2013 are summarized as follows (in thousands):
March 31, 2014 December 31, 2013
Mortgage loans:
$\left.\begin{array}{lll}\text { Residential } & 1,165,196 & 1,174,043 \\ \text { Commercial } & 1,404,466 & 1,400,624 \\ \text { Multi-family } & 939,018 & 928,906 \\ \text { Construction } & 212,419 & 183,289 \\ \text { Total mortgage loans } & 3,721,099 & 3,686,862 \\ \text { Commercial loans } & 966,444 & 932,199 \\ \text { Consumer loans } & 572,136 & 577,602 \\ \text { Total gross loans } & 5,259,679 & 5,196,663 \\ \text { Premiums on purchased loans } & 4,187 & 4,202 \\ \text { Unearned discounts } & (57 & )(62 \\ \text { Net deferred fees } & (6,035 & )(5,990 \\ & \$ 5,257,774 & 5,194,813\end{array}\right)$

The following tables summarize the aging of loans receivable by portfolio segment and class as follows (in thousands):

March 31, 2014
Recorded

Included in loans receivable are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The principal amounts of these non-accrual loans were $\$ 64.1$
million and $\$ 76.7$ million at March 31, 2014 and December 31, 2013, respectively. Included in non-accrual loans were $\$ 25.8$ million and $\$ 33.5$ million of loans which were less than 90 days past due at March 31, 2014 and December 31, 2013, respectively. There were no loans ninety days or greater past due and still accruing interest at March 31, 2014, or December 31, 2013.

15

Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The Company defines an impaired loan as a non-homogenous loan greater than $\$ 1.0$ million for which it is probable, based on current information, that all amounts due under the contractual terms of the loan agreement will not be collected. Impaired loans also include all loans modified as troubled debt restructurings ("TDRs"). A loan is deemed to be a TDR when a loan modification resulting in a concession is made in an effort to mitigate potential loss arising from a borrower's financial difficulty. Smaller balance homogeneous loans, including residential mortgages and other consumer loans, are evaluated collectively for impairment and are excluded from the definition of impaired loans, unless modified as TDRs. The Company separately calculates the reserve for loan losses on impaired loans. The Company may recognize impairment of a loan based upon: (1) the present value of expected cash flows discounted at the effective interest rate; or (2) if a loan is collateral dependent, the fair value of collateral; or (3) the fair value of the loan. Additionally, if impaired loans have risk characteristics in common, those loans may be aggregated and historical statistics may be used as a means of measuring those impaired loans.
The Company uses third-party appraisals to determine the fair value of the underlying collateral in its analyses of collateral dependent impaired loans. A third party appraisal is generally ordered as soon as a loan is designated as a collateral dependent impaired loan and is updated annually or more frequently, if required.
A specific allocation of the allowance for loan losses is established for each collateral dependent impaired loan with a carrying balance greater than the collateral's fair value, less estimated costs to sell. Charge-offs are generally taken for the amount of the specific allocation when operations associated with the respective property cease and it is determined that collection of amounts due will be derived primarily from the disposition of the collateral. At each fiscal quarter end, if a loan is designated as a collateral dependent impaired loan and the third party appraisal has not yet been received, an evaluation of all available collateral is made using the best information available at the time, including rent rolls, borrower financial statements and tax returns, prior appraisals, management's knowledge of the market and collateral, and internally prepared collateral valuations based upon market assumptions regarding vacancy and capitalization rates, each as and where applicable. Once the appraisal is received and reviewed, the specific reserves are adjusted to reflect the appraised value. The Company believes there have been no significant time lapses as a result of this process.
At March 31, 2014, there were 152 impaired loans totaling $\$ 94.6$ million. Included in this total were 118 TDRs related to 114 borrowers totaling $\$ 57.8$ million that were performing in accordance with their restructured terms and which continued to accrue interest at March 31, 2014. At December 31, 2013, there were 152 impaired loans totaling $\$ 106.4$ million. Included in this total were 115 TDRs to 110 borrowers totaling $\$ 58.2$ million that were performing in accordance with their restructured terms and which continued to accrue interest at December 31, 2013.
Loans receivable summarized by portfolio segment and impairment method are as follows (in thousands):

| Collectively evaluated for impairment | 26,315 | 21,886 | 4,762 | 52,963 | 1,484 | 54,447 |
|  | \$34,144 | 24,107 | 4,929 | 63,180 | 1,484 | 64,664 |

Loan modifications to borrowers experiencing financial difficulties that are considered TDRs primarily involve lowering the monthly payments on such loans through either a reduction in interest rate below a market rate, an extension of the term of the loan without a corresponding adjustment to the risk premium reflected in the interest rate, or a combination of these two methods. These modifications generally do not result in the forgiveness of principal or accrued interest. In addition, the Company attempts to obtain additional collateral or guarantor support when modifying such loans. If the borrower has demonstrated performance under the previous terms and our underwriting process shows the borrower has the capacity to continue to perform under the restructured terms, the loan will continue to accrue interest. Non-accruing restructured loans may be returned to accrual status when there has been a sustained period of repayment performance (generally six consecutive months of payments) and both principal and interest are deemed collectible.
The following tables present the number of loans modified as TDRs during the three months ended March 31, 2014 and 2013 and their balances immediately prior to the modification date and post-modification as of March 31, 2014 and 2013.

Troubled Debt Restructuring
For the three months ended
March 31, 2014
March 31, 2013

Mortgage loans:

| Residential | 4 | $\$ 875$ | $\$ 835$ | 15 | $\$ 2,802$ | $\$ 2,882$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Commercial | - | - | - | 1 | 329 | 308 |
| Total mortgage loans | 4 | 875 | 835 | 16 | 3,131 | 3,190 |
| Commercial loans | 1 | 116 | 28 | - | - | - |
| Consumer loans | - | - | - | 3 | 240 | 244 |
| Total restructured loans | 5 | $\$ 991$ | $\$ 863$ | 19 | $\$ 3,371$ | $\$ 3,434$ |

All TDRs are impaired loans, which are individually evaluated for impairment, as previously discussed. Estimated collateral values of collateral dependent impaired loans modified during the three months ended March 31, 2014 and 2013 exceeded the carrying amounts of such loans. As a result, there were no charge-offs recorded on collateral dependent impaired loans presented in the preceding tables for the three months ended March 31, 2014 and 2013. The allowance for loan losses associated with the TDRs presented in the preceding tables totaled $\$ 41,000$ and $\$ 380,000$ for the three months ended March 31, 2014 and 2013, respectively, and were included in the allowance for loan losses for loans individually evaluated for impairment.
For the three months ended March 31, 2014, the TDRs presented in the preceding tables had a weighted average modified interest rate of approximately $4.31 \%$, respectively, compared to a rate of $5.23 \%$ prior to modification, respectively. For the three months ended March 31, 2013, the TDRs had weighted average modified interest rate of approximately $4.30 \%$, respectively, compared to a rate of $5.90 \%$ prior to modification, respectively.

The following table presents loans modified as TDRs within the previous 12 months from March 31, 2014 and 2013, and for which there was a payment default ( 90 days or more past due) at the quarter ended March 31, 2014 and 2013.

March 31, 2014
Troubled Debt Restructurings Subsequently
Defaulted

| Number of | Outstanding |
| :--- | :--- |
| Loans | Recorded |
|  | Investment |
|  | $(\$$ in |
|  | thousands) |

March 31, 2013

| Defauted | Loans | Investment (\$ in thousands) | Loans | Investment (\$ in thousands) |
| :---: | :---: | :---: | :---: | :---: |
| Mortgage loans: |  |  |  |  |
| Residential | 1 | \$90 | 1 | \$1,785 |
| Total mortgage loans | 1 | 90 | 1 | 1,785 |
| Commercial loans | 3 | \$1,647 | - | \$- |
| Total restructured loans | 4 | \$1,737 | 1 | \$1,785 |

TDRs that subsequently default are considered collateral dependent impaired loans and are evaluated for impairment based on the estimated fair value of the underlying collateral less expected selling costs.

The activity in the allowance for loan losses by portfolio segment for the three months ended March 31, 2014 and 2013 was as follows (in thousands):

| Three months ended March 31, | Mortgage loans |  | Commerci loans |  | Consumer loans |  | Total Portfolio Segments |  | Unallocated | Total |

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Specific allocations of the allowance for loan losses attributable to impaired loans totaled $\$ 7,130,000$ and $\$ 10,217,000$ at March 31, 2014 and December 31, 2013, respectively. At March 31, 2014 and December 31, 2013, impaired loans for which there was no related allowance for loan losses totaled $\$ 20,480,000$ and $\$ 21,958,000$, respectively. The average balance of impaired loans during the three months ended March 31, 2014 was $\$ 95,327,000$.
The Company utilizes an internal nine-point risk rating system to summarize its loan portfolio into categories with similar characteristics. Loans deemed to be "acceptable quality" (pass) are rated 1through 4, with a rating of 1 established for loans with minimal risk. Loans that are deemed to be of "questionable quality" are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9 , respectively. Commercial mortgage, commercial, multi-family and construction loans are rated individually, and each lending officer is responsible for risk rating loans in their portfolio. These
risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and by Credit Administration. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party. Reports concerning periodic loan review examinations by the independent third party are presented directly to both the Audit and Risk Committees of the Board of Directors.

Loans receivable by credit quality risk rating indicator are as follows (in thousands):
At March 31, 2014

|  | Residential | Commercial mortgage | Multifamily | Construction | Total mortgages | Commercial | Consumer | Total loans |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Note 4. Deposits
Deposits at March 31, 2014 and December 31, 2013 are summarized as follows (in thousands):

| March 31, 2014 | December 31, 2013 |
| :--- | :--- |
| $\$ 928,240$ | 921,993 |
| $1,320,095$ | $1,281,596$ |
| $1,298,547$ | $1,326,941$ |
| 875,482 | 865,187 |
| 769,056 | 806,754 |
| $\$ 5,191,420$ | $5,202,471$ |

Note 5. Components of Net Periodic Benefit Cost
The Bank has a noncontributory defined benefit pension plan (the "Plan") covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003, the date on which the Plan was frozen. All

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

participants in the Plan are $100 \%$ vested. The Plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.
In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee became fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen as to new entrants, and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006.

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Net periodic benefit (increase) cost for pension benefits and other post-retirement benefits for the three months ended March 31, 2014 and 2013 includes the following components (in thousands):

|  | Three months ended March 31, |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Pension benefits |  | Other postretirement benefits |  |
|  | 2014 | 2013 | 2014 | 2013 |
| Service cost | \$- | - | 42 | 60 |
| Interest cost | 352 | 318 | 272 | 245 |
| Expected return on plan assets | (894 | ) (792 | ) - | - |
| Amortization of prior service cost | - |  | (1 | ) (1 |
| Amortization of the net loss (gain) | 93 | 338 | (51 | ) 4 |
| Net periodic benefit (increase) cost | \$(449 | (136 | 262 | 308 |

In its consolidated financial statements for the year ended December 31, 2013, the Company previously disclosed that it does not expect to contribute to the Plan in 2014. As of March 31, 2014, no contributions to the Plan have been made.
The net periodic benefit cost (increase) for pension benefits and other post-retirement benefits for the three months ended March 31, 2014 were calculated using the actual January 1, 2014 pension valuation and the estimated results of the other post-retirement benefits January 1, 2014 valuations.
Note 6. Impact of Recent Accounting Pronouncements
The Financial Accounting Standards Board ("FASB") in January 2014 issued Accounting Standards Update ("ASU"), 2014-01, "Investments - Equity Method and Joint Ventures (Subtopic 323) Accounting for Investments in Qualified Affordable Housing Projects," which applies to all reporting entities that invest in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. The amendments in this update modify the conditions that a reporting entity must meet to be eligible to use a method other than the equity or cost methods to account for qualified affordable housing project investments. If the modified conditions are met, the amendments permit an entity to use the proportional amortization method to amortize the initial cost of the investment in proportion to the amount of tax credits and other tax benefits received and recognize the net investment performance in the income statement as a component of income tax expense (benefit).
Additionally, the amendments introduce new recurring disclosures about all investments in qualified affordable housing projects irrespective of the method used to account for the investments. The amendments in ASU 2014-01 are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15,2014 . Early adoption is permitted. The Company does not expect that the adoption of this pronouncement will have a significant impact on the Company's consolidated financial statements.
The FASB in July 2013 issued ASU No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists", which provides guidance on the presentation of unrecognized tax benefits and the manner in which an entity would settle at the reporting date any additional income taxes that would result from the disallowance of a tax position when net operating loss carryforwards, similar tax losses, or tax credit carryforwards exist. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This ASU is effective for fiscal years, and interim reporting periods within those years, beginning after December 31, 2013. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements.
Note 7. Fair Value Measurements

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. Where quoted market values in an active market are not readily available, the Company utilizes various valuation techniques to estimate fair value.
Fair value is an estimate of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, in many instances fair value estimates may not be substantiated by comparison to independent markets and may not be realized in an immediate sale of the financial instrument.
GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Level 1:

Level 2:

Level 3:

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.
The valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.
Assets Measured at Fair Value on a Recurring Basis
The valuation techniques described below were used to measure fair value of financial instruments in the table below on a recurring basis as of March 31, 2014 and December 31, 2013.
Securities Available for Sale
For securities available for sale, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark to comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also may hold equity securities and debt instruments issued by the U.S. government and U.S. government-sponsored agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 inputs.
Assets Measured at Fair Value on a Non-Recurring Basis
The valuation techniques described below were used to estimate fair value of financial instruments measured on a non-recurring basis as of March 31, 2014 and December 31, 2013.
For loans measured for impairment based on the fair value of the underlying collateral, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices, or discounted cash flow analyses, for similar assets in active markets. These appraisals include adjustments, on an individual case-by-case basis, to comparable assets based on the appraisers' market knowledge and experience, as well as adjustments for estimated costs to sell of up to $6 \%$. The Company classifies these loans as Level 3 within the fair value hierarchy.
Assets acquired through foreclosure or deed in lieu of foreclosure are carried at fair value, less estimated selling costs of up to $6 \%$. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments, on an individual case basis, to comparable assets based on the appraisers' market knowledge and experience, and are classified as Level 3. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.
There were no changes to the valuation techniques for fair value measurements as of March 31, 2014 and December 31, 2013.

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of March 31, 2014 and December 31, 2013, by level within the fair value hierarchy.

Fair Value Measurements at Reporting Date Using:

| March 31, 2014 | Quoted Prices | Significant Other Observable | Significant |
| :---: | :---: | :---: | :---: |
|  | Active |  |  |
|  | Markets for |  | Unobservable |

|  | $\$ 1,157,594$ | 93,862 | $1,063,732$ | - |
| Measured on a non-recurring basis: |  |  |  |  |
| Loans measured for impairment based on the | $\$ 29,782$ | - | - | 29,782 |
| fair value of the underlying collateral | 5,486 | - | - | 5,486 |
| Foreclosed assets | $\$ 35,268$ | - | - | 35,268 |

There were no transfers between Level 1 and Level 2 during the three months ended March 31, 2014.
Other Fair Value Disclosures
The Company is required to disclose estimated fair value of financial instruments, both assets and liabilities on and off the balance sheet, for which it is practicable to estimate fair value. The following is a description of valuation methodologies used for those assets and liabilities.
Cash and Cash Equivalents
For cash and due from banks, federal funds sold and short-term investments, the carrying amount approximates fair value.
Investment Securities Held to Maturity
For investment securities held to maturity, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company evaluates the quality of Level 2 matrix pricing through comparison to similar assets with

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

greater liquidity and evaluation of projected cash flows. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service. The Company also holds debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 within the fair value hierarchy.

## FHLB-NY Stock

The carrying value of FHLB-NY stock was its cost. The fair value of FHLB-NY stock is based on redemption at par value. The Company classifies the estimated fair value as Level 1 within the fair value hierarchy.

## Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial mortgage, residential mortgage, commercial, construction and consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and into performing and non-performing categories. The fair value of performing loans was estimated using a combination of techniques, including a discounted cash flow model that utilizes a discount rate that reflects the Company's current pricing for loans with similar characteristics and remaining maturity, adjusted by an amount for estimated credit losses inherent in the portfolio at the balance sheet date. The rates take into account the expected yield curve, as well as an adjustment for prepayment risk, when applicable. The Company classifies the estimated fair value of its loan portfolio as Level 3.
The fair value for significant non-performing loans was based on recent external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows and estimated selling costs. The Company classifies the estimated fair value of its non-performing loan portfolio as Level 3.
Deposits
The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits and savings deposits, was equal to the amount payable on demand and classified as Level 1. The estimated fair value of certificates of deposit was based on the discounted value of contractual cash flows. The discount rate was estimated using the Company's current rates offered for deposits with similar remaining maturities. The Company classifies the estimated fair value of its certificates of deposit portfolio as Level 2.
Borrowed Funds
The fair value of borrowed funds was estimated by discounting future cash flows using rates available for debt with similar terms and maturities and is classified by the Company as Level 2 within the fair value hierarchy. Commitments to Extend Credit and Letters of Credit
The fair value of commitments to extend credit and letters of credit was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value estimates of commitments to extend credit and letters of credit are deemed immaterial.
Limitations
Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to
estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.
Significant assets and liabilities that are not considered financial assets or liabilities include goodwill and other intangibles, deferred tax assets and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

24

The following tables present the Company's financial instruments at their carrying and fair values as of March 31, 2014 and December 31, 2013. Fair values are presented by level within the fair value hierarchy.

Fair Value Measurements at March 31, 2014 Using:

## Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS

 OF OPERATIONS.
## Forward Looking Statements

Certain statements contained herein are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods, or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "estimate," "anticipate," "continue," or similar terms or variations on those terms, or the negative o those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity. Reference is made to the "Risk Factors" disclosure in the Company's Annual Report on Form 10-K for the year ended March 31, 2013.
The Company cautions readers not to place undue reliance on any such forward-looking statements which speak only as of the date made. The Company also advises readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not have an obligation to update any such statements to reflect any subsequent events or circumstances after the date of this statement.
Acquisition
On December 19, 2013, the Company entered into an agreement pursuant to which Team Capital Bank ("Team Capital") will merge with and into The Provident Bank, a subsidiary of the Company. Regulatory approvals for the transaction have been received. The transaction remains subject to the approval of Team Capital's stockholders at a special meeting scheduled to be held on May 23, 2014. At December 31, 2014 Team Capital had $\$ 943.6$ million in assets and operated 12 full-service banking offices in Bucks, Northampton and Lehigh Counties in Pennsylvania and Essex, Somerset, Hunterdon and Warren Counties in New Jersey.
Critical Accounting Policies
The Company considers certain accounting policies to be critically important to the fair presentation of its financial condition and results of operations. These policies require management to make complex judgments on matters which by their nature have elements of uncertainty. The sensitivity of the Company's consolidated financial statements to these critical accounting policies, and the assumptions and estimates applied, could have a significant impact on its financial condition and results of operations. These assumptions, estimates and judgments made by management can be influenced by a number of factors, including the general economic environment. The Company has identified the following as critical accounting policies:
Mdequacy of the allowance for loan losses
Goodwill valuation and analysis for impairment
Naluation of securities available for sale and impairment analysis
Naluation of deferred tax assets
The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses.
The Company's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectibility of principal may not be reasonably assured. For residential mortgage and consumer loans, this is

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

determined primarily by delinquency and collateral values. For commercial real estate and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis. As part of the evaluation of the adequacy of the allowance for loan losses, each quarter management prepares an analysis that categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating.

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

When assigning a risk rating to a loan, management utilizes a nine point internal risk rating system. Loans deemed to be "acceptable quality" are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of "questionable quality" are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7,8 or 9 , respectively. Commercial mortgage, commercial and construction loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Administration Department. The risk ratings are also confirmed through periodic loan review examinations, which are currently performed by an independent third party and periodically, by the Credit Committee in the credit renewal or approval. In addition, the Bank requires an annual review be performed for commercial and commercial real estate loans above certain dollar thresholds, depending on loan type, to help determine the appropriate risk rating Management assigns general valuation allowance ("GVA") percentages to each risk rating category for use in allocating the allowance for loan losses, giving consideration to historical loss experience by loan type and other qualitative or environmental factors such as trends and levels of delinquencies, impaired loans, charge-offs, recoveries, loan volume, as well as the national and local economic trends and conditions. The appropriateness of these percentages is evaluated by management at least annually and monitored on a quarterly basis, with changes made when they are required. In the second quarter of 2013, management completed its most recent evaluation of the GVA percentages. As a result of that evaluation, GVA percentages applied to residential mortgage loans, first-lien home equity loans and commercial mortgage loans were reduced to reflect the decrease in the historical loss experience. In addition, multi-family loans were segregated from other commercial mortgage loans as a result of differing risk characteristics and were assigned GVA percentages accordingly. Multi-family GVAs were established at levels lower than when previously included with other commercial mortgage loans as a result of lower historical loss experience resulting from the diverse cash flow sources supporting these loans.
Management believes the primary risks inherent in the portfolio are a continued decline in the economy, generally a decline in real estate market values, rising unemployment or a protracted period of unemployment at current elevated levels, increasing vacancy rates in commercial investment properties and possible increases in interest rates in the absence of economic improvement. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio.
Although management believes that the Company has established and maintained the allowance for loan losses at appropriate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing and commercial real estate markets and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies periodically review the adequacy of the Company's allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.
Additional critical accounting policies relate to judgments about other asset impairments, including goodwill, investment securities and deferred tax assets. Goodwill is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates.

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Management qualitatively determines whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing Step 1 of the goodwill impairment test. If an entity concludes that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the entity would be required to perform Step 1 of the assessment and then, if needed, Step 2 to determine whether goodwill is impaired. However, if it is more likely than not that the fair value of the reporting unit is more than its carrying amount, the entity does not need to apply the two-step impairment test. For this analysis, the Reporting Unit is defined as the Bank, which includes all core and retail banking operations of the Company but excludes the assets, liabilities, equity, earnings and operations held exclusively at the Company level. The guidance provides certain factors an entity should consider in its qualitative assessment in determining whether it is more likely than not that a reporting unit's fair value is less than its carrying amount. The factors include:

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Macroeconomic conditions, such as deterioration in economic condition and limited access to capital.
Industry and market considerations, such as increased competition, regulatory developments and decline in market-dependent multiples.
Cost factors, such as increased labor costs, cost of materials and other operating costs.
Overall financial performance, such as declining cash flows and decline in revenue or earnings.
Other relevant entity-specific events, such as changes in management, strategy or customers, litigation and contemplation of bankruptcy.
Reporting unit events, such as selling or disposing a portion of a reporting unit and a change in composition of assets. The Company completed its annual goodwill impairment test as of September 30, 2013. Based upon its qualitative assessment of goodwill, the Company concluded it is more likely than not that the fair value of the reporting unit exceeds its carrying amount, goodwill was not impaired and no further quantitative analysis (Step 1) was warranted. The Company may, based upon its qualitative assessment, or at its option, perform the two-step process to evaluate the potential impairment of goodwill. If, based upon Step 1, the fair value of the Reporting Unit exceeds its carrying amount, goodwill of the Reporting Unit is considered not impaired. However, if the carrying amount of the Reporting Unit exceeds its fair value, an additional test must be performed. The second step test compares the implied fair value of the Reporting Unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.
The Company's available for sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in Stockholders' Equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 7 to the consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. Management conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other-than-temporary. In this evaluation, if such a decline were deemed other-than-temporary, Management would measure the total credit-related component of the unrealized loss, and recognize that portion of the loss as a charge to current period earnings. The remaining portion of the unrealized loss would be recognized as an adjustment to accumulated other comprehensive income. The fair value of the securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the fair value of fixed-rate securities decreases and as interest rates fall, the fair value of fixed-rate securities increases. For certain sectors of the mortgage-backed securities market there has been a lack of liquidity. Increases in delinquencies and foreclosures have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company determines if it has the intent to sell these securities or if it is more likely than not that the Company would be required to sell the securities before the anticipated recovery. If either exists, the decline in value is considered other-than-temporary. In this evaluation, the Company did not recognize an other-than-temporary impairment charge on securities for the three months ended March 31, 2014 or 2013, respectively.
The determination of whether deferred tax assets will be realizable is predicated on the reversal of existing deferred tax liabilities, utilization against carryback years and estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items. At March 31, 2014, the Company maintained a valuation allowance of $\$ 242,000$, related to unused capital loss carryforwards.
COMPARISON OF FINANCIAL CONDITION AT MARCH 31, 2014 AND DECEMBER 31, 2013
Total assets increased $\$ 13.5$ million to $\$ 7.50$ billion at March 31, 2014, from $\$ 7.49$ billion at December 31, 2013, primarily due to an increase in total loans, partially offset by a decrease in total investments and cash and cash equivalents.
Total loans increased $\$ 63.0$ million, or $1.2 \%$, to $\$ 5.26$ billion at March 31, 2014, from $\$ 5.19$ billion at December 31, 2013. Loan originations totaled $\$ 360.9$ million and loan purchases totaled $\$ 8.5$ million for the three months ended March 31, 2014. The loan portfolio had net increases of $\$ 34.2$ million in commercial loans, $\$ 29.1$ million in construction loans, primarily multi-family construction, $\$ 10.1$ million in multi-family mortgage loans, and $\$ 3.8$ million in commercial mortgage loans, which were partially offset by net decreases of $\$ 8.8$ million and $\$ 5.5$ million in
residential mortgage and consumer loans, respectively. Commercial real estate, commercial and construction loans represented $67.0 \%$ of the loan portfolio at March 31, 2014, compared to $66.3 \%$ at December 31, 2013.

The Company does not originate or purchase sub-prime or option ARM loans. Prior to September 30, 2008, the Company originated "Alt-A" mortgages in the form of stated income loans with a maximum loan-to-value ratio of $50 \%$ on a limited basis. The balance of these "Alt-A" loans at March 31, 2014 was $\$ 7.0$ million. Of this total, four loans totaling $\$ 493,000$ were 90 days or more delinquent. General valuation reserves of $6.5 \%$, or $\$ 32,000$, were allocated to such loans at March 31, 2014.
The Company participates in loans originated by other banks, including participations designated as Shared National Credits ("SNCs"). The Company's gross commitments and outstanding balances as a participant in SNCs were $\$ 73.2$ million and $\$ 37.1$ million, respectively, at March 31, 2014. No SNCs were 90 days or more delinquent at March 31, 2014.

The Company had outstanding junior lien mortgages totaling $\$ 223.6$ million at March 31, 2014. Of this total, 25 loans totaling $\$ 1.6$ million were 90 days or more delinquent. General valuation reserves of $10.0 \%$, or $\$ 166,000$, were allocated to such loans which were 90 days or more delinquent at March 31, 2014.
At March 31, 2014, the Company had outstanding indirect marine loans totaling $\$ 31.3$ million. No indirect marine loans were 90 days or more delinquent at March 31, 2014. Marine loans are currently made only on a direct, limited accommodation basis to existing customers.
The following table sets forth information regarding the Company's non-performing assets as of March 31, 2014 and December 31, 2013 (in thousands):

March 31, 2014 December 31, 2013
Mortgage loans:

| Residential | $\$ 21,985$ | 23,011 |
| :--- | :--- | :--- |
| Commercial | 18,919 | 18,662 |
| Multi-family | 403 | 403 |
| Construction | - | 8,448 |
| Total mortgage loans | 41,307 | 50,524 |
| Commercial loans | 19,350 | 22,228 |
| Consumer loans | 3,399 | 3,928 |
| Total non-performing loans | 64,056 | 76,680 |
| Foreclosed assets | 6,558 | 5,486 |
| Total non-performing assets | $\$ 70,614$ | 82,166 |

The following table sets forth information regarding the Company's 60-89 day delinquent loans as of March 31, 2014 and December 31, 2013 (in thousands):

March 31, 2014 December 31, 2013
Mortgage loans:
Residential
Commercial
Total mortgage loans
\$5,429

5,429
318

At March 31, 2014, the allowance for loan losses totaled $\$ 63.4$ million, or $1.21 \%$ of total loans, compared with $\$ 64.7$ million, or $1.24 \%$ of total loans at December 31, 2013. Total non-performing loans were $\$ 64.1$ million, or $1.22 \%$ of total loans at March 31, 2014, compared to $\$ 76.7$ million, or $1.48 \%$ of total loans at December 31, 2013. The $\$ 12.6$ million decrease in non-performing loans at March 31, 2014, compared with the trailing quarter, was due to an $\$ 8.4$ million decrease in non-performing construction loans, a $\$ 2.9$ million decrease in non-performing commercial loans, a $\$ 1.0$ million decrease in non-performing residential loans and a $\$ 529,000$ decrease in non-performing consumer loans, partially offset by a $\$ 256,000$ increase in non-performing commercial mortgage loans.
At March 31, 2014, the Company held $\$ 6.6$ million of foreclosed assets, compared with $\$ 5.5$ million at December 31, 2013. Foreclosed assets at March 31, 2014, consisted primarily of $\$ 4.0$ million of commercial real estate and $\$ 2.5$ million of residential real estate.

Non-performing assets totaled $\$ 70.6$ million, or $0.94 \%$ of total assets at March 31, 2014, compared to $\$ 82.2$ million, or $1.10 \%$ of total assets at December 31, 2013.
Total investments decreased $\$ 26.3$ million, or $1.7 \%$, to $\$ 1.55$ billion at March 31,2014 , from $\$ 1.57$ billion at December 31, 2013, largely due to principal repayments on mortgage-backed securities, maturities of municipal and agency bonds, and the sale of certain mortgage-backed securities, partially offset by purchases of mortgage-backed and municipal securities.
Cash and cash equivalents decreased $\$ 19.6$ million to $\$ 81.7$ million at March 31,2014 , from $\$ 101.2$ million at December 31, 2013. The decline in cash was attributable to an increase in total loans and a decrease in total deposits, partially offset by a decrease in total investments and an increase in total borrowings.
Total deposits decreased $\$ 11.1$ million, or $0.2 \%$, during the three months ended March 31, 2014 to $\$ 5.19$ billion. Time deposits decreased $\$ 37.7$ million, or $4.7 \%$, to $\$ 769.1$ million at March 31 , 2014, with the majority of the decrease occurring in the 12-, 24- and 60-month maturity categories. The decrease in time deposits was partially offset by a $\$ 26.6$ million, increase in core deposits. At March 31, 2013, core deposits, which consist of savings and demand deposit accounts, totaled $\$ 4.42$ billion, compared to $\$ 4.40$ billion at March 31, 2013. Within the core deposit category, non-interest bearing demand deposits increased $\$ 10.3$ million, or $1.2 \%$, to $\$ 875.5$ million at March 31, 2014. Core deposits represented $85.2 \%$ of total deposits at March 31, 2014, compared to $84.5 \%$ at December 31, 2013. Borrowed funds increased $\$ 16.3$ million, or $1.4 \%$ during the three months ended March 31,2014 , to $\$ 1.22$ billion, as longer-term wholesale funding was added to mitigate interest rate risk, and shorter-term wholesale funding was used to manage the cyclical outflow of municipal deposits. Borrowed funds represented $16.3 \%$ of total assets at March 31, 2014, an increase from $16.1 \%$ at December 31, 2013.

Stockholders' equity increased $\$ 10.6$ million, or $1.0 \%$ during the three months ended March 31,2014 , to $\$ 1.02$ billion, due to net income earned for the period and an increase in unrealized gains on securities available for sale, partially offset by dividends paid to stockholders. Common stock repurchases for the three months ended March 31, 2014 totaled 231,575 shares at an average cost of $\$ 16.75$ per share. At March 31, 2014, 3.5 million shares remained eligible for repurchase under the current stock repurchase program authorized by the Company's Board of Directors. At March 31,2014 , book value per share and tangible book value per share were $\$ 17.06$ and $\$ 11.11$, respectively, compared with $\$ 16.87$ and $\$ 10.92$, respectively, at December 31, 2013.
Liquidity and Capital Resources. Liquidity refers to the Company's ability to generate adequate amounts of cash to meet financial obligations to its depositors, to fund loans and securities purchases, deposit outflows and operating expenses. Sources of funds include scheduled amortization of loans, loan prepayments, scheduled maturities of investments, cash flows from mortgage-backed securities and the ability to borrow funds from the FHLB-NY and approved broker-dealers.
Cash flows from loan payments and maturing investment securities are fairly predictable sources of funds. Changes in interest rates, local economic conditions and the competitive marketplace can influence loan prepayments, prepayments on mortgage-backed securities and deposit flows.
As of March 31, 2014, the Bank and the Company exceeded all current minimum regulatory capital requirements as follows:

March 31, 2014

| Required | Actual |  |
| :--- | :--- | :--- |

In July 2013, the Federal Deposit Insurance Corporation and the other federal bank regulatory agencies issued a final rule that will revise their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-

32

Frank Act. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5\% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from $4 \%$ to $6 \%$ of risk-weighted assets) and assigns a higher risk weight ( $150 \%$ ) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain "available-for-sale" securities holdings to be included for purposes of calculating regulatory capital unless a one-time opt-out is exercised. Additional constraints will also be imposed on the inclusion in regulatory capital of mortgage-servicing assets, deferred tax assets and minority interests. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a "capital conservation buffer" consisting of $2.5 \%$ of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The final rule becomes effective for the Bank on January 1, 2015. The capital conservation buffer requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective.
COMPARISON OF OPERATING RESULTS FOR THE THREE MONTHS ENDED MARCH 31, 2014 AND 2013 General. The Company reported net income of $\$ 17.0$ million, or $\$ 0.30$ per basic and diluted share for the three months ended March 31, 2014, compared to net income of $\$ 17.8$ million, or $\$ 0.31$ per basic and diluted share for the three months ended March 31, 2013. The decline in earnings for the first quarter 2014 compared to the prior year period was largely attributable to a decline in commercial loan prepayment fees, lower gains on the sale of securities and increased operating costs, a portion of which were due to unusually high seasonal expenses resulting from the severe winter weather. This was partially offset by continued improvement in asset quality and the related reduction in the provision for loan losses coupled with growth in average loans outstanding and an improvement in securities yields. Net Interest Income. Total net interest income increased $\$ 1.3$ million to $\$ 55.2$ million for the quarter ended March 31, 2014, from $\$ 53.9$ million for the quarter ended March 31, 2013. Interest income for the first quarter of 2014 increased $\$ 1.2$ million to $\$ 64.5$ million, from $\$ 63.3$ million for the same period in 2013. Interest expense decreased $\$ 87,000$, or $0.9 \%$, to $\$ 9.3$ million for the quarter ended March 31, 2014, from $\$ 9.4$ million for the quarter ended March 31, 2013. The improvement in net interest income for the three months ended March 31, 2014, compared to the same period in 2013, was principally due to an increase in average loans outstanding, which was partially offset by compression in the net interest margin.
The net interest margin for the quarter ended March 31, 2014, decreased 5 basis points to $3.28 \%$, compared with $3.33 \%$ for the quarter ended March 31, 2013. The decrease in the net interest margin for the quarter ended March 31, 2014, compared with the same period last year, was primarily attributable to reductions in the weighted average yield on total loans, which declined 25 basis points to $4.26 \%$ for the quarter ended March 31, 2014, compared with $4.51 \%$ for the quarter ended March 31, 2013. Securities yields improved, however, to $2.46 \%$ for the quarter ended March 31, 2014, from $2.19 \%$ for the same period last year, resulting in a net decrease in the earning asset yield of 8 basis points, to $3.84 \%$. This decrease in earning asset yield outpaced the reduction in the weighted average cost of interest bearing liabilities, which declined 3 basis points to $0.68 \%$ for the quarter ended March 31, 2014, compared with $0.71 \%$ for the first quarter of 2013. The average cost of interest bearing deposits for the quarter ended March 31, 2014 was $0.35 \%$, compared with $0.44 \%$ for the same period last year. Average non-interest bearing demand deposits totaled $\$ 861.9$ million for the quarter ended March 31, 2014, compared with $\$ 819.5$ million for the quarter ended March 31, 2013. The average cost of borrowed funds for the quarter ended March 31, 2014 was $1.87 \%$, compared with $2.24 \%$ for the same period last year.
Commercial loan interest income increased $\$ 576,000$, or $5.8 \%$, to $\$ 10.5$ million for the three months ended March 31, 2014, from $\$ 10.0$ million for the three months ended March 31, 2013. Interest income on loans secured by real estate increased $\$ 217,000$ to $\$ 38.6$ million for the three months ended March 31, 2014, from $\$ 38.3$ million for the three months ended March 31, 2013. Consumer loan interest income decreased $\$ 295,000$, or $5.0 \%$, to $\$ 5.7$ million for the three months ended March 31, 2014, from $\$ 6.0$ million for the three months ended March 31, 2013. For the three months ended March 31, 2014, the average balance of net loans increased $\$ 323.9$ million to $\$ 5.15$ billion, from $\$ 4.83$ billion for the same period in 2013. The average loan yield for the three months ended March 31, 2014, decreased 25 basis points to $4.26 \%$, from $4.51 \%$ for the same period in 2013.

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

Interest income on securities available for sale and FHLB-NY stock increased $\$ 890,000$, or $14.4 \%$, to $\$ 7.1$ million for the quarter ended March 31, 2014, from $\$ 6.2$ million for the quarter ended March 31, 2013. The average balance of securities available for sale and FHLB-NY stock decreased $\$ 70.9$ million, or $5.5 \%$, to $\$ 1.21$ billion for the three months ended March 31, 2014, from $\$ 1.28$ billion for the same period in 2013.
Interest income on investment securities held to maturity decreased $\$ 169,000$, or $6.0 \%$, to $\$ 2.7$ million for the quarter ended March 31, 2014, compared to the same period last year. Average investment securities held to maturity increased $\$ 7.5$ million, to $\$ 357.9$ million for the quarter ended March 31, 2014, from $\$ 350.3$ million for the same period last year.

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The average yield on total securities increased to $2.46 \%$ for the three months ended March 31, 2014, compared with $2.19 \%$ for the same period in 2013. The increase in the total securities yield for the quarter was primarily attributable to increases in long-term interest rates, the resulting reduction in prepayments on mortgage-backed securities and related premium amortization and the increase in the FHLB-NY stock dividend.
Interest paid on deposit accounts decreased $\$ 1.2$ million, or $24.6 \%$, to $\$ 3.7$ million for the quarter ended March 31 , 2014, from $\$ 5.0$ million for the quarter ended March 31, 2013. The average cost of interest-bearing deposits decreased to $0.35 \%$ for the three ended March 31, 2014, from $0.44 \%$ for the three months ended March 31, 2013. The average balance of interest-bearing core deposit accounts decreased $\$ 86.6$ million, or $2.4 \%$, to $\$ 3.53$ billion for the quarter ended March 31, 2014, from $\$ 3.61$ billion for the quarter ended March 31, 2013.
Interest paid on borrowed funds increased $\$ 1.1$ million, or $25.4 \%$, to $\$ 5.6$ million for the quarter ended March 31, 2014, from $\$ 4.5$ million for the quarter ended March 31, 2013. The average cost of borrowings decreased to $1.87 \%$ for the three months ended March 31, 2014, from 2.24\% for the three months ended March 31, 2013. Average borrowings increased $\$ 407.7$ million, or $50.7 \%$, to $\$ 1.2$ billion for the quarter ended March 31,2014 , from $\$ 804.9$ million for the quarter ended March 31, 2013. The Company added longer-term wholesale funding to mitigate interest rate risk and shorter-term wholesale funding to manage cyclical outflows of municipal deposits.
Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers necessary to absorb probable credit losses inherent in the loan portfolio. In determining the level of the allowance for loan losses, management considers past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or later events change. Management assesses the adequacy of the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance.
The Company recorded provisions for loan losses of $\$ 400,000$ for the three months ended March 31, 2014, compared with $\$ 1.5$ million recorded for the three months ended March 31, 2013. For the three months ended March 31, 2014, the Company had net charge-offs of $\$ 1.6$ million, compared with net charge-offs of $\$ 1.8$ million for the same period in 2013. The Company's allowance for loan losses decreased $\$ 1.2$ million to $\$ 63.4$ million, or $1.21 \%$ of total loans at March 31, 2014, compared with $\$ 64.7$ million, or $1.24 \%$ of total loans at December 31, 2013.
Non-Interest Income. Non-interest income totaled $\$ 8.1$ million for the quarter ended March 31, 2014, a decrease of $\$ 1.8$ million, or $18.4 \%$, compared to the same period in 2013. For the quarter ended March 31, 2014, fee income decreased $\$ 1.1$ million to $\$ 6.9$ million, from $\$ 8.0$ million for the three months ended March 31, 2013, due to decreases in commercial loan prepayment fee income, partially offset by increases in wealth management income and deposit fees. In addition, net gains on securities transactions declined $\$ 861,000$, with losses totaling $\$ 350,000$ for the three months ended March 31, 2014, mainly due to the sale of a previously impaired non-agency mortgage-backed security, compared to gains totaling $\$ 511,000$ for the same period in 2013.
Non-Interest Expense. For the three months ended March 31, 2014, non-interest expense increased $\$ 1.2$ million, to $\$ 38.2$ million, compared to the three months ended March 31, 2013. Compensation and benefits expense increased $\$ 550,000$ for the quarter ended March 31, 2014, compared to the quarter ended March 31, 2013, due to an increase in stock-based compensation, higher salary expense resulting from annual merit increases and increased employee medical costs, partially offset by decreased severance costs and lower retirement benefit costs. Net occupancy expense increased $\$ 883,000$ for the quarter ended March 31, 2014, compared to the same period in 2013, principally due to significant increases in seasonal expenses resulting from the harsh winter weather conditions. In addition, advertising expense increased $\$ 319,000$, to $\$ 1.1$ million for the three months ended March 31, 2014, compared to the same period in 2013, due to the introduction of the Company's new branding initiative, updated logo and the related marketing campaigns. Partially offsetting these increases, other operating expenses decreased $\$ 341,000$ for the quarter ended March 31, 2014, compared to the quarter ended March 31, 2013, largely due to lower costs associated with foreclosed real estate. FDIC insurance costs declined $\$ 114,000$ due to a lower assessment rate, and the amortization of intangibles decreased $\$ 228,000$ for the three months ended March 31, 2014, compared with the same period in 2013,

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

as a result of scheduled reductions in core deposit intangible amortization.
The Company's annualized non-interest expense as a percentage of average assets was $2.07 \%$ for the quarter ended March 31, 2014, compared with $2.08 \%$ for the same period in 2013. The efficiency ratio (non-interest expense divided by the sum of net interest income and non-interest income) was $60.32 \%$ for the quarter ended March 31, 2014, compared with $57.87 \%$ for the same period in 2013.
Income Tax Expense. For the three months ended March 31, 2014, the Company's income tax expense was $\$ 7.7$ million, compared with $\$ 7.6$ million, for the three months ended March 31, 2013. The increase in income tax expense was a function of growth in
pre-tax income from taxable sources. The Company's effective tax rate was $31.1 \%$ for the three months ended March 31, 2014, compared with $29.8 \%$ for the three months ended March 31, 2013, respectively.

## Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20-and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. Investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.
The Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix and the impact of those changes on projected net interest income and net income.
The Company's strategy for liabilities has been to maintain a stable core-funding base by focusing on core deposit account acquisition and increasing products and services per household. The Company's ability to retain maturing time deposit accounts is the result of its strategy to remain competitively priced within its marketplace. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLB of New York during periods of pricing dislocation.
Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analysis captures changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.
Specific assumptions used in the simulation model include:
Parallel yield curve shifts for market rates;
Current asset and liability spreads to market interest rates are fixed;
Traditional savings and interest-bearing demand accounts move at $10 \%$ of the rate ramp in either direction; Retail Money Market and Business Money Market accounts move at $25 \%$ and $75 \%$ of the rate ramp in either direction;respectively; and
Higher-balance demand deposit tiers and promotional demand accounts move at up to $75 \%$ of the rate ramp in either direction.
The following table sets forth the results of a twelve-month net interest income projection model as of March 31, 2014 (dollars in thousands):
Change in Interest Rates in

## Edgar Filing: PROVIDENT FINANCIAL SERVICES INC - Form 10-Q

The preceding table indicates that, as of March 31, 2014, in the event of a 300 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease $5.9 \%$, or $\$ 12.9$ million. In the event of a 100 basis point decrease in interest rates, net interest income is projected to decrease $\$ 2.2$ million over the same period.

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of March 31, 2014 (dollars in thousands):

Change in Interest
Rates (Basis Points)

- 100

Flat
$+100$
$+200$
$+300 \quad 1,051,306 \quad(182,346)(14.8$
The preceding table indicates that as of March 31, 2014, in the event of an immediate and sustained 300 basis point increase in interest rates, the present value of equity is projected to decrease $14.8 \%$, or $\$ 182.3$ million. If rates were to decrease 100 basis points, the model forecasts a $5.3 \%$, or $\$ 64.9$ million increase in the present value of equity. Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

## Item 4. CONTROLS AND PROCEDURES.

Under the supervision and with the participation of management, including the Principal Executive Officer and the Principal Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Principal Executive Officer and the Principal Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

36

## PART II—OTHER INFORMATION

## Item 1. Legal Proceedings

The Company is involved in various legal actions and claims arising in the normal course of business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company's financial condition and results of operations.

Item 1A. Risk Factors
There have been no material changes to the risk factors that were previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.
